

STATE OF FLORIDA
DIVISION OF ADMINISTRATIVE HEARINGS

MARINEMAX, INC.,

Petitioner,

vs.

Case No. 18-2664

LARRY LYNN AND DEPARTMENT OF
ENVIRONMENTAL PROTECTION,

Respondents.

RECOMMENDED ORDER

On January 10, 2019, Administrative Law Judge Robert J. Telfer III, of the Florida Division of Administrative Hearings (Division), conducted a duly-noticed hearing in Tallahassee and Fort Myers, Florida, by video teleconference, pursuant to sections 120.569 and 120.57(1), Florida Statutes (2018).

APPEARANCES

For Petitioner MarineMax, Inc.:

Amelia A. Savage, Esquire
Richard S. Brightman, Esquire
Felicia L. Kitzmiller, Esquire
Hopping Green & Sams, P.A.
Post Office Box 6526
Tallahassee, Florida 32314-6526

For Respondent Larry Lynn:

Larry Kenneth Lynn, pro se
111 Placid Drive
Fort Myers, Florida 33919

For Respondent Department of Environmental Protection:

Lorraine M. Novak, Esquire
Department of Environmental Protection
Mail Station 35
3900 Commonwealth Boulevard
Tallahassee, Florida 32399

STATEMENT OF THE ISSUE

The issue to determine in this matter is whether Respondent Department of Environmental Protection (DEP) properly issued its proposed verification of an Environmental Resource Permit (ERP) exemption, dated March 23, 2018, for the installation of nine pilings off of Respondent Larry Lynn's residential property, in the direction of Petitioner MarineMax, Inc.'s commercial property (MarineMax), pursuant to section 373.406(6), Florida Statutes, commonly known as the "de minimus" exemption.

PRELIMINARY STATEMENT

On March 8, 2018, Mr. Lynn applied for, and on March 23, 2018, DEP issued, a verification of exemption from obtaining an ERP for the installation of nine pilings off his residential property's seawall. On April 13, 2018, MarineMax timely filed a Petition for Formal Administrative Hearing with DEP, challenging the issuance of verification of exemption. MarineMax, thereafter, filed a Motion to Amend Petition for Administrative Hearing, dated June 14, 2018, and the previous Administrative Law Judge (ALJ) assigned to this matter thereafter entered an Order Granting Petitioner's Motion to Amend Petition for Formal

Administrative Hearing on June 15, 2018, accepting the Amended Petition for Formal Administrative Hearing as establishing the issues to be tried in the instant proceeding.

On June 18, 2018, MarineMax filed an Unopposed Motion to Continue Final Hearing. On July 3, 2018, the undersigned granted the Unopposed Motion to Continue Final Hearing and scheduled the final hearing for October 10 and 11, 2018. The parties filed a Joint Pre-hearing Stipulation on October 3, 2018. However, because of Hurricane Michael, the undersigned and parties rescheduled the final hearing for January 10, 2019. The parties submitted an Amended Joint Pre-hearing Stipulation on January 3, 2019.

Pursuant to a Second Notice of Hearing by Video Teleconference, the undersigned conducted a final hearing on January 10, 2019, by video teleconference with locations in Tallahassee and Fort Myers, Florida. The parties offered the following exhibits into evidence, which the undersigned admitted: Joint Exhibits 1 through 7; MarineMax Exhibits P1 through P10; and DEP Exhibits DEP1 and DEP2.^{1/}

MarineMax presented the testimony of Sam Lowrey, its corporate vice president of real estate; and Captain Ralph S. Robinson III, a U.S. Coast Guard-licensed boat captain, who the undersigned accepted as an expert in marine navigation.

Respondents DEP and Mr. Lynn presented the testimony of Megan Mills, the environmental specialist and program administrator with DEP's South District Office, and Mr. Lynn.

The one-volume Transcript of this final hearing was filed with the Division on February 26, 2019. MarineMax, and DEP and Mr. Lynn (jointly), timely filed proposed recommended orders that the undersigned considered in the preparation of this Recommended Order.

All statutory references are to the 2018 codification of the Florida Statutes unless otherwise indicated.

FINDINGS OF FACT

1. Mr. Lynn has owned the real property located at 111 Placid Drive, Fort Myers, Florida, since 1994. Mr. Lynn's residential property is a corner lot that fronts a canal on two of the four sides of his property, and also contains his home.

2. MarineMax is a national boat dealer with approximately 65 locations throughout the United States and the British Virgin Islands. MarineMax has approximately 16 locations in Florida.

3. MarineMax, through subsidiary companies, acquired the property at 14030 McGregor Boulevard, Fort Myers, Florida, in December 2014 (MarineMax Property). Prior to MarineMax's acquisition, this property had been an active marina for more than 30 years. MarineMax continues to operate this property as a marina.

4. The MarineMax Property is a 26-acre contiguous parcel that runs north-south and that is surrounded by canals and a larger waterway that connects to the Gulf of Mexico. The "northern" parcel of the MarineMax Property is surrounded by two canals and the larger waterway that connects to the Gulf of Mexico. The "southern" parcel is a separate peninsula that, while contiguous to the northern parcel, is surrounded by a canal that it shares with the northern parcel, along with another canal that separates it from residential properties.

5. Mr. Lynn's property is located directly south of the northern parcel of the MarineMax Property, and the canal that runs east-west. As his property is a corner lot, it also fronts an eastern canal that is directly across from the southern parcel of the MarineMax Property.

6. The eastern canal described above also serves as a border between MarineMax and a residential community that includes Mr. Lynn's residential property.

7. Mr. Lynn has moored a boat to an existing dock on the eastern canal described in paragraphs 5 and 6 for many years.

8. MarineMax holds ERPs for the business it conducts at its MarineMax Property, including the canal between the northern parcel of the MarineMax Property and Mr. Lynn's property. For example, these ERPs permit: (a) the docking of boats up to 85

feet in length with a 23-foot beam; (b) boat slips up to 70 feet in length; (c) up to 480 boats on the MarineMax Property; and (d) a boatlift and boat storage barn (located on the southern parcel).

9. The MarineMax Property also contains a fueling facility that is available for internal and public use. It is located on the northern parcel of the MarineMax Property, directly across the east-west canal from Mr. Lynn's property. The prior owner of the marina constructed this fueling facility prior to 2003.

Request for Verification of Exemption from an ERP

10. Mr. Lynn testified that after MarineMax took over the property from the prior owner, he noticed larger boats moving through the canal that separates his property from the MarineMax Property. Concerned about the potential impact to his property, including his personal boat, Mr. Lynn contracted with Hickox Brothers Marine, Inc. (Hickox), to erect pilings off of his property in this canal.^{2/}

11. On March 8, 2018, Hickox, on behalf of Mr. Lynn, submitted electronically a Request for Verification of Exemption from an Environmental Resource Permit to DEP. The "Project Description" stated, "INSTALL NINE 10 INCH DIAMETER PILINGS AS PER ATTACHED DRAWING FOR SAFETY OF HOMEOWNER'S BOAT." The attached drawing for this project depicted the installation of

these nine pilings 16 and 1/2 feet from Mr. Lynn's seawall, spaced 15 feet apart.

12. On March 23, 2018, DEP approved Mr. Lynn's Request for Verification of Exemption from an Environmental Resource Permit, stating that the activity, as proposed, was exempt under section 373.406(6) from the need to obtain a regulatory permit under part IV of chapter 373. The Request for Verification of Exemption from an Environmental Resource Permit further stated:

This determination is made because the activity, in consideration of its type, size, nature, location, use and operation, is expected to have only minimal or insignificant or cumulative adverse impacts on the water resources.

13. The Request for Verification of Exemption from an Environmental Resource Permit further stated that DEP did not require further authorization under chapter 253, Florida Statutes, to engage in proprietary review of the activity because it was not to take place on sovereign submerged lands. The Request for Verification of Exemption from an Environmental Resource Permit also stated that DEP approved an authorization pursuant to the State Programmatic General Permit V, which precluded the need for Mr. Lynn to seek a separate permit from the U.S. Army Corps of Engineers.

14. Megan Mills, the environmental specialist and program administrator with DEP's South District Office, testified that

DEP's granting of Mr. Lynn's Request for Verification of Exemption from an Environmental Resource Permit was routine, and that his Request for Verification of Exemption from an Environmental Resource Permit met the statutory criteria.

15. After DEP granted the Request for Verification of Exemption from an Environmental Resource Permit, Hickox, on behalf of Mr. Lynn, installed the nine pilings in the canal at various distances approximately 19 feet from Mr. Lynn's seawall and in the canal that divides Mr. Lynn's property from the MarineMax Property (and the fueling facility).^{3/}

16. MarineMax timely challenged DEP's Request for Verification of Exemption from an Environmental Resource Permit.

Impact on Water Resources

17. MarineMax presented the testimony of Sam Lowrey, its corporate vice president of real estate, who had detailed knowledge of the layout of the MarineMax Property.

18. Mr. Lowrey testified that the canal between the MarineMax Property and Mr. Lynn's residential property is active with boating activity, noting that MarineMax's ERP allows up to 480 vessels on-site. With the installation of the pilings, he testified that he was concerned that MarineMax customers "will be uncomfortable navigating their boats through this portion of the canal[,]" which would be detrimental to MarineMax's business.

19. Mr. Lowery testified that he had no personal knowledge of whether MarineMax has lost any business since the installation of the pilings.

20. MarineMax also presented the testimony of Captain Ralph S. Robinson III, who the undersigned accepted as an expert in marine navigation, without objection.^{4/} Captain Robinson has been a boat captain, licensed by the U.S. Coast Guard, since 1991. He has extensive experience captaining a variety of vessels throughout the United States and the Bahamas. He is an independent contractor and works for MarineMax and other marine businesses. Captain Robinson is also a retired law enforcement officer.

21. Captain Robinson testified that he was familiar with the waterways surrounding the MarineMax Property, as he has captained boats in those waterways several times a month for the past 15 years.

22. Captain Robinson testified that he has observed a number of boats with varying lengths and beams navigate these waterways, and particularly, the canal between the MarineMax Property and Mr. Lynn's property. Captain Robinson estimated that the beam of these boats range from eight to 22 feet. He also testified that the most common boats have a beam between eight and 10 feet.

23. Captain Robinson's first experience with the pilings in the canal occurred in April 2018, when he was captaining a 42-foot boat through the canal. He testified that an 85-foot boat was fueling on the fuel dock, and when he cleared the fueling boat and pilings, he had approximately one and a half feet on each side of his boat. He testified that "[i]t was very concerning."

24. Captain Robinson testified that since this experience in April 2018, he calls ahead to MarineMax to determine the number and size of boats in the portion of this canal that contains the pilings.

25. On behalf of MarineMax, in December 2018, Captain Robinson directed the recording of himself captaining a 59-foot Sea Ray boat with an approximately 15- to 16-foot beam through the canal separating the MarineMax Property and Mr. Lynn's residential property, with another boat of the same size parked at MarineMax's fueling dock.^{5/} Captain Robinson testified that these two boats were typical of the boats that he would operate at the MarineMax Property and surrounding waterway.

26. The video demonstration, and Captain Robinson's commentary, showed that when he passed through the canal between the fuel dock (with the boat docked) and Mr. Lynn's residential property (with the pilings), there was approximately four to five feet on either side of his boat. Captain Robinson stated:

This is not an ideal situation for a boat operator. Yes, it can be done. Should it be done? Um, I wasn't happy or comfortable in this depiction.

27. Captain Robinson testified that his "personal comfort zone" of distance between a boat he captains and obstacles in the water is five or six feet.

28. Ultimately, Captain Robinson testified that he believed the pilings in the canal between the MarineMax Property and Mr. Lynn's property were a "navigational hazard." Specifically, Captain Robinson stated:

Q: In your expert opinion, has Mr. Lynn's pilings had more than a minimal, or insignificant impact on navigation in the canal, in which they are placed?

A: I believe they're a navigational hazard. The impact, to me personally, and I'm sure there's other yacht captains that move their boat through there, or a yacht owner, not a licensed captain, um, that has to take a different approach in their operation and diligence, um, taking due care that they can safely go through. It's been an impact.

Q: Is a navigational hazard a higher standard for you as a boat captain, being more than minimal or insignificant?

A: Yes. A navigational hazard is, in my opinion, something that its position could be a low bridge or something hanging off a bridge, a bridge being painted, it could be a marker, it could be a sandbar, anything that is going to cause harm to a boat by its position of normal operation that would cause injury to your boat, or harm an occupant or driver of that boat.

29. Ms. Mills, the environmental specialist and program administrator with DEP's South District Office, testified that after MarineMax filed the instant Petition, she and another DEP employee visited Mr. Lynn's residential property. Although not qualified as an expert in marine navigation, Ms. Mills testified that, even after observing the placement of the pilings and the boating activity the day she visited, the pilings qualified for an exemption from the ERP.^{6/}

CONCLUSIONS OF LAW

Jurisdiction

30. The Division has jurisdiction over the subject matter and the parties to this proceeding in accordance with sections 120.569 and 120.57(1), Florida Statutes.

Standing

31. Section 120.52(13) defines a "party," in pertinent part, as a person "whose substantial interests will be affected by proposed agency action, and who makes an appearance as a party." Section 120.569(1) further provides, in pertinent part, that "[t]he provisions of this section apply in all proceedings in which the substantial interests of a party are determined by an agency."

32. In Agrico Chemical Corporation v. Department of Environmental Regulation, 406 So. 2d 478, 482 (Fla. 2d DCA 1981), the court held:

We believe that before one can be considered to have a substantial interest in the outcome of the proceeding, he must show 1) that he will suffer an injury in fact which is of sufficient immediacy to entitle him to a section 120.57 hearing and 2) that his substantial injury is of a type or nature which the proceeding is designed to protect. The first aspect of the test deals with the degree of injury. The second deals with the nature of the injury.

33. Although DEP and Mr. Lynn disputed whether MarineMax has standing to bring the instant administrative law challenge in the Amended Joint Pre-hearing Statement, neither presented further argument at the final hearing, or in their Joint Proposed Recommended Order, concerning MarineMax's standing.

34. The undersigned concludes that MarineMax has standing to bring this administrative challenge. MarineMax has a substantial interest in the safe operation of boats into and out of the MarineMax Property. It has sufficiently alleged that the pilings in the canal between the MarineMax Property and Mr. Lynn's property could potentially result in a navigational hazard.

Nature of the Proceeding

35. This is a de novo proceeding, intended to formulate final agency action, and not to review action taken earlier and preliminarily. See Young v. Dep't of Cmty. Aff., 625 So. 2d 831, 833 (Fla. 1993); Hamilton Cnty. Bd. of Cnty. Comm'rs v. Dep't of Env'tl. Reg., 587 So. 2d 1378, 1387 (Fla. 1st DCA 1991); and

McDonald v. Dep't of Banking & Fin., 587 So. 2d 569, 584 (Fla. 1st DCA 1977).

36. DEP approved Mr. Lynn's Request for Verification of Exemption from an Environmental Resource Permit pursuant to chapter 373, Florida Statutes. Pursuant to section 120.569(2)(p), the burden of proof is as follows:

For any proceeding arising under chapter 373, chapter 378, or chapter 403, if a nonapplicant petitions as a third party to challenge an agency's issuance of a license, permit, or conceptual approval, the order of presentation in the proceeding is for the permit applicant to present a prima facie case demonstrating entitlement to the license, permit, or conceptual approval, followed by the agency. This demonstration may be made by entering into evidence the application and relevant material submitted to the agency in support of the application, and the agency's staff report or notice of intent to approve the permit, license, or conceptual approval. Subsequent to the presentation of the applicant's prima facie case and any direct evidence submitted by the agency, the petitioner initiating the action challenging the issuance of the permit, license, or conceptual approval has the burden of ultimate persuasion and has the burden of going forward to prove the case in opposition to the license, permit, or conceptual approval through the presentation of competent and substantial evidence.

37. In Pirtle v. Voss, Case No. 13-0515 (Fla. DOAH Sept. 27, 2013; Fla. DEP Dec. 26, 2013), the ALJ applied section 120.569(2)(p)'s burden-shifting requirements to an application for an exemption from an ERP to install mooring

pilings, concluding that the DEP's written determination is a licensure under chapter 373. The undersigned agrees that section 120.569(2)(p) applies to this proceeding, and conducted the final hearing in accordance with this statutory requirement.

Analysis

38. Mr. Lynn satisfied his prima facie case of entitlement to the Verification of Exemption from an Environmental Resource Permit by entering into evidence the complete electronic submission Request for Verification of Exemption from an Environmental Resource Permit, dated March 8, 2018, and DEP's written approval of his Request for Verification of Exemption from an Environmental Resource Permit, dated March 23, 2018. Additionally, Mr. Lynn and DEP presented the testimony of Mr. Lynn and Ms. Mills.

39. With Mr. Lynn having made his prima facie case, the burden of ultimate persuasion falls to MarineMax to prove its case in opposition to the approval of the Request for Verification of Exemption from an ERP by a preponderance of the competent and substantial evidence, and thereby prove that the pilings in question are more than a minimal impact on navigation.

40. DEP issued the approval of Mr. Lynn's Request for Verification of Exemption from an ERP pursuant to section 373.406(6), also known as the "de minimus" exemption, which provides:

Any district of the department may exempt from regulation under this part those activities that the district or department determines will have only minimal or insignificant individual or adverse impacts on the water resources of the district. The district and the department are authorized to determine, on a case-by-case basis, whether a specific activity comes within this exemption. Requests to qualify for this exemption shall be submitted in writing to the district or department, and such activities shall not be commenced without a written determination from the district or department confirming that the activity qualifies for the exemption.

41. Section 403.813(1)(b), Florida Statutes, explains the criteria for an activity that is exempt from the need to obtain an ERP under part IV of chapter 373. Section 403.813(1)(b) states:

(1) A permit is not required under this chapter, chapter 373, chapter 61-691, Laws of Florida, or chapter 25214 or chapter 25270, 1949, Laws of Florida, for activities associated with the following types of projects; however, except as otherwise provided in this subsection, this subsection does not relieve an applicant from any requirement to obtain permission to use or occupy lands owned by the Board of Trustees of the Internal Improvement Trust Fund or a water management district in its governmental or proprietary capacity or from complying with applicable local pollution control programs authorized under this chapter or

other requirements of county and municipal governments:

* * *

(b) The installation and repair of mooring pilings and dolphins associated with private docking facilities or piers and the installation of private docks, piers and recreational docking facilities, or piers and recreational docking facilities of local governmental entities when the local governmental entity's activities will not take place in any manatee habitat, any of which docks:

1. Has 500 square feet or less of over-water surface area for a dock which is located in an area designated as Outstanding Florida Waters or 1,000 square feet or less of over-water surface area for a dock which is located in an area which is not designated as Outstanding Florida Waters;
2. Is constructed on or held in place by pilings or is a floating dock which is constructed so as not to involve filling or dredging other than that necessary to install the pilings;
3. Shall not substantially impede the flow of water or create a navigational hazard;
4. Is used for recreational, noncommercial activities associated with the mooring or storage of boats and boat paraphernalia; and
5. Is the sole dock constructed pursuant to this exemption as measured along the shoreline for a distance of 65 feet, unless the parcel of land or individual lot as platted is less than 65 feet in length along the shoreline, in which case there may be one exempt dock allowed per parcel or lot.

Nothing in this paragraph shall prohibit the department from taking appropriate

enforcement action pursuant to this chapter to abate or prohibit any activity otherwise exempt from permitting pursuant to this paragraph if the department can demonstrate that the exempted activity has caused water pollution in violation of this chapter.

42. MarineMax contends in its Proposed Recommended Order that "navigational hazard" is not the applicable standard for its challenge, and that instead, the undersigned should apply the "minimal or insignificant individual or cumulative adverse impacts on the water resources" standard enunciated in section 373.406(6). According to MarineMax, DEP's previous interpretations of equating "minimal or insignificant individual or cumulative impacts on the water resources" with the "navigational hazard" standard is not entitled to deference by the undersigned, see Art. V, § 21, Fla. Const., is inconsistent with Pirtle, and would constitute an unadopted rule.

43. The undersigned notes that MarineMax's expert, Captain Robinson, when asked whether the pilings at issue have "minimal or insignificant individual or cumulative impacts on the water resources," instead opined that they constitute a "navigational hazard."

44. The undersigned further notes that section 403.813(1)(b)3. specifically incorporates the "navigational hazard" prohibition as a criteria for DEP to

consider in determining whether an activity, such as the installation of mooring pilings, is exempt from an ERP.

45. However, the undersigned also notes that DEP's written approval of Mr. Lynn's Request for Verification of Exemption from an Environmental Resource Permit specifically states that DEP's determination is pursuant to section 373.406(6) and "is made because the activity, in consideration of its type, size, nature, location, use and operation, is expected to have only minimal or insignificant individual or cumulative adverse impacts on the water resources."

46. The undersigned concludes that MarineMax did not establish, by a preponderance of the evidence, that the pilings at issue have a significant impact on navigation. The gravamen of Captain Robinson's testimony was that the location of the pilings were not ideal, not within his "personal comfort zone," that he was not "happy or comfortable" with the pilings, and would require him, or other boat operators, to take a "different approach in their operation and diligence." Captain Robinson also opined that, when he captained the 59-foot Sea Ray boat with a 15- to 16-foot beam through the canal, with another boat of the same size parked at MarineMax's fueling dock, there was approximately four to five feet on either side of the boat, but that he would prefer five or six feet on either side.

47. Pirtle is distinguishable and does not provide support for MarineMax's position. In Pirtle, the closest distance between the T-shaped end of a dock (which operated as a marina) and the nearest mooring piling (that was the subject of an exemption from an ERP) was about eight and a half feet, meaning that only boats with a beam less than eight and a half feet could pass this point. Further, after DEP issued the authorization for exemption, it conducted a site inspection. During this site inspection, DEP employees had difficulty piloting their boat into and out of the slips on the T-shaped end of the dock, and had to be assisted by other DEP employees. Additionally, the ALJ found that marina owner's ability to operate his marina was substantially impaired by the pilings.

48. In contrast, Mr. Lynn's pilings, while being, at most, an inconvenience to operators of larger boats, causing MarineMax customers to exercise caution during ingress and egress through the canal separating the MarineMax Property and Mr. Lynn's property, and invading a distinguished and credible boat captain's "personal comfort zone," do not constitute the level of adverse impacts that the ALJ considered in Pirtle. Additionally, MarineMax presented no direct evidence of substantial impairment of its ability to operate its marina as a result of Mr. Lynn's pilings.

49. Further, the undersigned concludes that Mr. Lynn's pilings do not constitute a navigational hazard, as an inconvenience does not constitute a navigational hazard. See Shanosky v. Town of Ft. Myers Beach, Case No. 18-1940 (Fla. DOAH Nov. 20, 2018, Fla. DEP Jan. 2, 2019) ("While it may create an inconvenience for Petitioners, or cause them to be more cautious during ingress and egress from their docks, the new dock will not create a navigational hazard."); Woolshlager v. Rockman, Case No. 06-3296 (Fla. DOAH May 7, 2007, Fla. DEP June 21, 2007) ("mere inconvenience does not constitute the type of navigational hazard contemplated by the rule."); Scully v. Patterson, Case No. 05-0058 (Fla. DOAH April 14, 2005, Fla. DEP May 12, 2005).

50. The undersigned further concludes that Mr. Lynn met his burden and showed, by a preponderance of the evidence, that the pilings met the criteria set forth in section 373.406(6), and are therefore exempt from the need to obtain an ERP.

RECOMMENDATION

Based on the foregoing Findings of Fact and Conclusions of Law, the undersigned recommends that DEP enter a final order dismissing MarineMax's challenge to the determination that Mr. Lynn's pilings qualify for an exemption from an environmental resources permit pursuant to its March 23, 2018, approval of Mr. Lynn's Request for Verification of Exemption from an Environmental Resources Permit.

DONE AND ENTERED this 28th day of March, 2019, in

Filed with the Clerk of the
Division of Administrative Hearings
this 28th day of March, 2019.

ENDNOTES

^{1/} Mr. Lynn also sought to introduce a recently conducted survey of his property at the final hearing. The undersigned declined to admit this document, as it was not disclosed to the other parties prior to the final hearing.

^{2/} Mr. Lynn testified that, after preliminary discussions with representatives from MarineMax about these concerns, MarineMax erected signs in the canal to direct boats to turn around in other areas for safety purposes.

^{3/} At the final hearing, Ms. Mills testified that while DEP's Verification was for installation of the pilings 16 1/2 feet off of Mr. Lynn's property, her opinion would not change if Mr. Lynn's Request for Verification of Exemption from an Environmental Resource Permit requested that the pilings be placed 19 feet off his property. Ms. Mills stated that "it's common for differences to exist between plans and reality. Things get installed slightly off based on installation techniques and site conditions." She further testified, "after reviewing the site conditions that the activity still qualifies for the exemption granted."

4/ Captain Robinson was the only expert witness to testify at the final hearing.

5/ In addition to a video recording of Captain Robinson on the boat for this presentation, Captain Robinson also utilized a drone, operated by another person, which provided an overhead video recording of this demonstration.

6/ Ms. Mills also explained DEP's process in concluding that Mr. Lynn's pilings project qualified for federal authorization pursuant to the State Programmatic General Permit V (SPGP). Although the parties, in their Amended Joint Pre-hearing Stipulation, agreed that the pilings are not located in sovereign submerged lands, and MarineMax and DEP agreed that the 25-percent rule with regard to encroachment in a navigable waterway as set forth in Florida Administrative Code Chapter 18-21, did not apply to this case, the undersigned finds Ms. Mills's testimony concerning SPGP authorization, which included an analysis of the 25-percent rule, to be relevant to DEP's granting of the exemption.

NOTICE OF RIGHT TO SUBMIT EXCEPTIONS

All parties have the right to submit written exceptions within 15 days from the date of this Recommended Order. Any exceptions to this Recommended Order should be filed with the agency that will issue the Final Order in this case.
