  - LOCKED GATE OR FENCE
  - TRIANGULATION STATION WITH NAME
  - LOCATION OF S.W. 1/4

This map was compiled from U.S. Geological Survey quadrangle maps and aerial photography taken in March, 1991. General Land Office maps, road inventories, and other data, 1982 and other maps data.

This map was compiled using interactive computer graphic techniques.

The map was prepared on the Lambert conformal conic projection, 1983 North American Datum, North Zone, Florida system of plane coordinates.

The railroad station symbol as shown on this map does not necessarily denote the presence of a depot at the facility. It may be only a point designated for the receipt or delivery of freight, such as a distribution yard.

Local road alignments in Delimited Areas and Residential Areas Under Development are not indicated.

In congested rural areas local roads are indicated by a single line only or dashed lines to maps prepared for this county.

An attempt has been made to show all drainage canals and ditches.

City populations are taken from the U.S. Census for 1990.

In 1990, the population of Walton County was 27,765. There are 1,045 square miles in the county.

No claim is made for the basic cartographic source material taken from a map or work of the United States Government.
