Explanation

The following describe the delineation areas with the contamination for which each  
was delineated and for which testing is required under Rule 62-524.600(1) F.A.C.

- Note: (1) indicates solvent bonded couplings prohibited (62-524.650(2)(b))
- (2) indicates subsidized waterlines. Mandatory connection requirements may apply (62-524.300(2)(b))

The delineated areas on this map represent areas where  
ground water contamination is known to exist as defined  
in chapter 62-524, F.A.C. This does not indicate that  
the areas which are not delineated are necessarily free  
from ground water contamination.
