Looking for more than just a current flood map?

Visit [Search All Products](#) to access the full range of flood risk products for your community.

About Flood Map Service Center

The FEMA Flood Map Service Center (MSC) is the official public source for flood hazard information produced in support of the National Flood Insurance Program (NFIP). Use the MSC to find your official flood map, access a range of other flood hazard products, and take advantage of tools for better understanding flood risk.

FEMA flood maps are continually updated through a variety of processes. Effective information that you download or print from this site may change or become superseded by new maps over time. For additional information, please see the [Flood Hazard Mapping Updates Overview Fact Sheet](#)

Announcements

MSC Downloads that come from the MIP (Preliminary mapping products, NFHL extracts, and recently posted Letters of Map Change) are unavailable. We are working to resolve this issue. We will update you when the issue is resolved or we have more information. We apologize for any inconvenience and appreciate your patience.

FEMA has introduced several enhancements to the Map Service Center (MSC) that expand access to National Flood Hazard Layer (NFHL)-based dynamic maps throughout the mapping lifecycle. These improvements simplify access and make the flood hazard information easier to use.

When users enter an address or location, the map results now show interactive flood hazard information. Most FIRMettes (a portion of the Flood Insurance Rate Map [FIRM] that is easier to print) are created dynamically from the NFHL. Changes also include an improved viewer for the [NFHL](#) that provides customizable, interactive views and printable products. There are also big improvements for interacting with preliminary data through the [Flood Map Changes Viewer](#) that shows the preliminary and pending flood hazard data, the preliminary Changes Since Last FIRM (CSLF), and includes the Preliminary Map Comparison Tool. The new [draft National Flood Hazard Layer Viewer](#), allows FEMA to share draft flood hazard data as well as draft CSLF data when appropriate. Contact [MSC Help](#) if you need more information.

FEMA has introduced an update to the online FIRMette Web tool that is now available on the MSC. Directions on how to interact with the new tool and create a FIRMette are available in the [How to Find and Make a FIRMette tutorial](#). If further assistance is required, please contact the FEMA Mapping and Insurance eXchange (FMIX) at FEMA-FMIX@fema.dhs.gov.
