### **IMPORTANT INFORMATION**

- An electrology facility is that portion of any establishment or place wherein electrolysis is performed.
- Electrolysis means the removal of hair using equipment and devices approved by the Board of Medicine as further outlined in Section 478.42(5), Florida Statutes and Rule 64B8-56.002, Florida Administrative Code.
- Electrologist means a person who engages in the practice of electrolysis and is licensed under Chapter 478, Florida Statutes.
- Licensure is required for new facilities or existing licensed facilities that have new owners.

- An electrology facility license may not be transferred from the name of the licensee to the name of another person. If a facility is sold, the new owner must apply to the Department for licensure and no electrolysis services may be performed in the facility after the sale until the new owner has received the required license from the Department. A person purchasing an electrology facility may apply to the Department for licensure prior to the date of purchase. Existing facility owners transferring to a new location must complete a Transfer of Location application prior to opening in the new facility.
- Florida-Licensed Medical Doctors (M.D.) and Florida-Licensed Osteopathic Physicians (D.O.) who are operating an electrology facility on the premises of their medical practice location are not required to obtain an electrology facility license. Likewise, Electrologists employed by physicians licensed under chapter 458 or 459, F.S., and practicing at the physician's medical practice location are not required to obtain an electrology facility license. If there is any change in employment status in an exempt facility (such as changing from employee to independent contractor), you must notify the Council office at once to determine whether licensure will be required.
- Equipment and safety and sanitary requirements are listed in Rule 64B8-51.006, F.A.C. Compliance with these requirements is mandatory upon inspection.
- Upon completion of the application and prior to licensure, the Department of Health will make arrangements to send an inspector to the facility to determine compliance with the law and rules. The most current inspection form is available at <http://www.floridahealth.gov/licensing-and-regulation/enforcement/inspection-program/inspection-forms.html>.
- The inspector will provide a copy of the completed inspection form to the applicant. This form must be displayed in a conspicuous location within the facility along with a copy of Rule 64B8-51.006, F.A.C. When the department determines the proposed electrology facility has met the requirements set forth by rule, the applicant will be issued a license.
- When an applicant fails to meet all the requirements, the Department shall deny the application in writing and shall list the specific requirements not met. No applicant denied licensure because of failure to meet the requirements shall be precluded from reapplying for licensure.
- Practicing in or allowing the practice of electrolysis in an unlicensed facility is punishable by a fine from \$250 to \$5,000 and other disciplinary penalties up to denial of licensure of the facility. The electrologist as well as the facility owner may be fined and/or disciplined by the Board of Medicine.

### GENERAL LICENSURE INFORMATION

- All facility licenses expire on May 31st of every even numbered year. The expiration date is printed on the license.
- Failure to renew the facility license by May 31st of every even numbered year will render the license delinquent. Failure to renew within 6 months of the expiration date will render the license null and void. The facility will no longer be licensed and all electrolysis practice must cease.
- In order to regain the license after voiding, the owner must completely re-apply and be inspected before the license can be issued and practice in that facility recommenced.
- It is the responsibility of the licensee to ensure that the facility is renewed timely, regardless of whether a renewal notice is received or not.
