Gold Seal Quality Care Accrediting Standards for Child Care Programs

The following standards must be substantially met or exceeded by the accreditation standards of the entity seeking approval as a Gold Seal Quality Care accrediting association. The applicant for Gold Seal accrediting association will be required to use this form to provide a cross-walk aligning its standards with the standards below. The applicant's standards need not be organized in the same manner as those standards below, but must be completed in a fashion that permits the Department to perform a line-by-line comparison of standards, whenever practicable. It is the responsibility of the applicant to ensure that the crosswalk is clear and concise in its presentation. If a line-by-line comparison is not practicable, the Department will review the applicant's standards using the following grouping and subgrouping of standards.

Please note that an applying association must receive an overall minimum score of 85 % pursuant to Rule 65C-22.009(4)(c) Florida Administrative Code for approval as a Gold Seal Accrediting Agency.

The text in the left column(s) below is the Gold Seal criteria standard. The right column has been left blank for use as a crosswalk, if the accrediting association chooses to use this format.

STANDARD: Ratio and Group Size		
Staff-to-Child Ratio		
Gold Sea	l Criteria	Crosswalk or Comments for Review
The provider uses the following staff-to-child ratios:		
Birth – 24 months	1:3-4	
25 – 35 months	1:4-6	
3 years	1:6-9	
4 years/5 years	1:8-10	
Kindergarten	1:9-12	
6 – 8 years	1:10-12	
9 – 12 years	1:12-15	
The provider has access to available substitute staff to ensure that the above	ve staff-to-child ratios are met at all times of operation.	
Group Size		
Gold Sea	l Criteria	Crosswalk or Comments for Review
The provider uses the following group size ratios:		
 Groups of children may be limited to one (1) age or may include r 	nultiple ages.	
 A group or classroom consists of the children assigned to a teach 	ner or a team of teaching staff for most of the day and who occupy an gling of children from different groups within a larger room or area.	

Birth – 24 months	6-8	
25 - 35 months	8-12	
3 years	12-18	
4 years/5 years	16-20	
Kindergarten	18-24	
6 – 8 years	20-24	
9 – 12 years	24-30	

STANDARD: Teachers and Staff	
Staff Qualifications	
Gold Seal Criteria	Crosswalk or Comments for Review
Lead Teachers must be at least 21 years old.	
Lead Teachers must be certified in First Aid and Pediatric CPR, including management of a blocked airway, and rescue breathing.	
Lead teachers must meet one of the following:	
An undergraduate degree in Early Childhood Education, Child Development, Social Work, Nursing, or other child-related field, and a	
minimum of one (1) year experience working in a child care program serving children ages 0-5; OR	
 A national competency-based early childhood credential such as the CCP, CDA, or state equivalent (example, Florida Child Care 	
Professional Credential), and two (2) years of experience as a teacher serving the children of the age-groups in care, OR	
A combination of coursework and experience including: a high school diploma or GED, a minimum of four (4) college level courses in	
Early Childhood Education and Child Development, and a minimum of three (3) years experience working in a child care program serving	
children ages 0-5.	
Associate/assistant teachers must be at least 18 years old. Associate/assistant teachers must be at least 18 years old.	
Associate/assistant teachers must have a high school diploma or General Education Development certificate (GED). Aides and Volunteers must be at least 16 years old.	
All teaching staff (including substitutes) must complete Level 2 background screening prior to interacting with children.	
All teaching staff must clear a sexual predator check prior to interacting with children.	
A new employee is not considered permanent until the director has assessed his/her mental and physical health and ability to work effectively with	
young children.	
Staff Training/Continued Professional Development	
Gold Seal Criteria	Crosswalk or Comments for Review
The program provides and requires all teaching staff (including substitutes) to complete orientation for new employees prior to interacting with	
children. The orientation includes, but is not limited to	
children. The orientation includes, but is not limited to • Program policies and procedures;	
Program policies and procedures;	
 Program policies and procedures; Health, safety, and emergency procedures; 	
 Program policies and procedures; Health, safety, and emergency procedures; Accepted guidance and classroom management;

STANDARD: Director Requirements	
Director Qualifications	
Gold Seal Criteria	Crosswalk or Comments for Review
Director must be at least 21 years old.	
 The Director must meet one of the following: An undergraduate degree in one (1) of the following: Early Childhood Education, Child Development, Social Work, Early Childhood Special Education, Nursing, Child Care Management, or other child-related field, OR A combination of coursework and experience that includes a minimum of four (4) college level courses in Early Childhood Education and Child Development, Elementary Education, Early Childhood Special Education, Child Care Management; and two (2) years of experience as a lead teacher or director serving the children of the age groups in care. 	
Continuing Professional Development for Director	
Gold Seal Criteria	Crosswalk or Comments for Review
The director and assistant director(s) must complete at least 24 hours of job-related professional development annually. Topics of professional development include: child care operations and management, administration, inclusion, personnel management, behavior management, first aid, medication administration, child abuse reporting and compliance, health, safety, child development, nutrition, evaluation, whole language, curriculum, parent involvement, and communication skills.	

STANDARD: Curriculum Implementation		
Gold Seal Criteria	Crosswalk or Comments for Review	
The program has a written mission and vision statement of its philosophy and goals for its staff and all children in its care. This statement is present and consistent in the program's staff handbook, parent handbook, and orientation materials, etc.		
Strategic and Curriculum Planning		
Gold Seal Criteria	Crosswalk or Comments for Review	
The program uses a strategic planning process to implement its vision and mission, and to achieve desired outcomes for the children in its care.		
The program uses written curriculum plans based on knowledge of appropriate practice(s); assessment of individual needs and interests; cultural		
sensitivity; progress reports and assessment; and the social, emotional, cognitive, physical, and language development of individual children.		
Teaching staff have clearly defined goals for individual children that guide their curriculum planning.		
Teachers use curriculum in all content and developmental areas as a flexible framework for teaching and to support the development of daily plans and learning experiences.		

Curriculum/Teaching Materials	
Gold Seal Criteria	Crosswalk or Comments for Review
The program demonstrates sufficient materials and equipment that are rich in variety to sustain curriculum plans. Materials and equipment are	
available in sufficient quantities to occupy each child in activities that meet his or her interests.	
Materials and equipment used facilitate focused individual and peer play/learning.	
Materials and equipment reflect and respect society's diversity and the cultures of the families being served.	
Staff rotate and adapt materials on a reasonable basis to promote learning and extend children's play opportunities.	
Teachers foster cognitive learning by providing opportunities and materials to encourage infants/toddlers to discover how they can make things	
happen and to solve simple problems. Children are provided equipment to engage in varied opportunities for fine and large motor development.	
All children are provided materials to experience varied opportunities of the key principles of the following:	
Art, music, dramatic play, and dance in ways that reflect cultural diversity.	
The principles of math, such as building understanding of numbers; number names; the relationship of numbers to object quantities and to	
symbols; using numerical symbols; and to explore operations on quantities, such as adding, subtraction, and dividing into equal and	
unequal subsets.	
• Science.	
The physical characteristics of their local environment, and how people positively and negatively affect their environment. Deliber Calculate Deliber Calcul	
Daily Schedule	
Gold Seal Criteria	Crosswalk or Comments for Review
The program's daily schedule provides a balance of activities in consideration of the child's total daily experience. This includes:	
All age groups (including infants)	
 Daily outside play and opportunities for gross motor development 	
Daily quiet and active play	
Activities that incorporate large and small muscle groups	
Daily group activities	
Child-initiated and teacher-initiated activities	
Age-appropriate learning activities	
Activity that provides choices	
Activity that allows for spontaneity.	
Lesson Plans and Implementation	
Gold Seal Criteria	Crosswalk or Comments for Review
Teachers use:	
 The needs and interests of infants to influence schedules, routines, and learning experiences. Infants who show interest or pleasure in an 	
activity are encouraged and supported in prolonging that activity.	
• Children's interest in and curiosity about the world to engage them with new content and developmental skills, including self-help activities that	
promote competency and mastery.	
Their knowledge of individual children to modify strategies and materials to enhance children's learning. The ability position to include to be found in the ability of the strategies and materials to enhance children's learning.	
The child's routine to include tasks for which the children take responsibility, according to their ability, to give children a sense of self-reliance.	
 Environmental design/modifications, schedules and activity modifications, adult or peer support, effective transitions, engaging activities, and 	
other teaching strategies to prevent challenging or disruptive behaviors and support the child's appropriate behavior.	

Teachers demonstrate and use their knowledge of content and developmental areas, and of children's social relationships, interests, ideas, and skills in their lesson plans by: Creating experiences that engage children in purposeful and meaningful learning related to key curriculum concepts. Posing problems and asking questions that stimulate children's thinking. Guiding children in acquiring specific skills and explicitly teaching those skills to promote children's engagement and learning. Helping children express their ideas and build on the meaning of their experiences. Helping children identify and use prior knowledge, and providing experiences that extend and challenge children's current understandings. Having and using a variety of teaching strategies that include a broad range of approaches and responses. Tailoring learning opportunities for groups and individuals. Incorporating indoor and outdoor activities. Planning for children to revisit experiences and materials over periods of days, weeks, and months, and adjusting challenges as children gain competence and understanding, learn and acquire new skills. Teachers' lesson plans are reviewed weekly by the director and/or administration.	
Inclusion	
Gold Seal Criteria	Crosswalk or Comments for Review
The program is designed to be inclusive of all children in keeping with the provisions of the Americans with Disabilities Act, and including children with identified disabilities and special learning and developmental needs. Materials and equipment used to implement the curriculum should accommodate children's special needs.	
When children with special needs enroll, each child has an individual program plan; each child is professionally evaluated; the program has access	
to a referral system; and reviews of each child's progress are done using a team concept.	
Child Assessment	
Gold Seal Criteria	Crosswalk or Comments for Review
Teachers use multiple sources to informally and formally assess each child's development for future learning opportunities. The ongoing assessment process should be used to: Identify what children have learned. Identify any possible learning hindrances and disabilities. Adapt curriculum and teaching to meet children's needs and interests. Foster each child's curiosity, extend the child's engagement, and support self-initiated learning. Communicate each child's progress to parents, including both in and out of teacher/ parent conferences.	
Learning Environment	
Gold Seal Criteria	Crosswalk or Comments for Review
A minimum of 35 square feet of usable space per child is used in each primary indoor activity area.	
Each room provides separate learning "areas" that offer a variety of experiences and learning opportunities. Space may be arranged so children can work individually, in small groups, or in a large group. Classroom areas are set up so that traffic patterns do not interfere with activities. The program has taken measures in all rooms occupied by children to control noise levels so normal conversation can be heard without raising one's voice.	
Classroom areas are made comfortable with the use of soft furniture, pillows, rugs, etc. Staff organizes and groups materials on low, open shelves to encourage use by children.	
Adequate lighting and ventilation are employed in every room. Natural light is available in some of the indoor areas occupied by children during the course of the day.	
Teachers create classroom displays of children's recent work that help children reflect on and extend their learning. Displays are at children's eye level.	

The Start Property of the Property of the Start Property of the St	
Television is limited to educational programs suitable for the developmental level of the child and only on an occasional or intermittent basis.	
Children of all ages have daily opportunities for outdoor play (when weather, air quality, or environmental safety conditions do not pose a health	
risk). When outdoor opportunities for large-motor activities are not possible because of conditions, the program provides similar activities inside.	
Outdoor play areas are designed with equipment that is age and developmentally appropriate, and located in clearly defined spaces with semi-	
private areas where children can play alone or in small groups. Outdoor play areas will accommodate or facilitate:	
 Motor experiences such as running, climbing, balancing, riding, jumping, crawling, scooting or swinging. 	
 Activities such as dramatic play, block building, manipulative play, or art activities. 	
 Exploration of the natural environment, including a variety of natural and manufactured surfaces, and areas with natural materials such as 	
nonpoisonous plants, shrubs, and trees.	
Social Development	
Gold Seal Criteria	Crosswalk or Comments for Review
Children have varied opportunities to recognize and name their own and others' feelings, and are given varied opportunities to learn the skills needed to regulate their emotions, behavior, and attention. Children have varied opportunities to learn to understand, empathize with, and take into account other people's perspectives.	
needed to regulate their emotions, behavior, and attention. Children have varied opportunities to learn to understand, empathize with, and take into

Children are provided opportunities and materials to foster positive identity and an emerging sense of self and others by learning about the community in which they live, and engaging in discussions about fairness, friendship, responsibility, authority, and differences. Children have varied opportunities to engage throughout the day with teaching staff who are attentive and responsive to them, facilitate their social	

STANDARD: Literacy Support		
Gold Seal Criteria	Crosswalk or Comments for Review	
Children's language development is promoted through songs, stories, books and games. Children have varied opportunities to be read to regularly		
in individualized ways including one-to-one or in small groups (2-6 children).		
Children have varied opportunities to develop competence in verbal and nonverbal communication by responding to questions; communicating		
needs, thoughts, and experiences; and describing things and events.		
Children have multiple and varied opportunities to write, to develop phonological awareness, and to understand spoken language by the utilization		
of pictures, familiar objects, body language, and physical cues.		

STANDARD: Health and Safety		
Indoor Environment		
Gold Seal Criteria	Crosswalk or Comments for Review	
The building is well-maintained:		
 Walls, floors, furnishings, and equipment are kept in good repair and are safe, with no sharp edges, splinters, protruding or rusty nails, or 		
missing parts.		
All indoor areas are free from trash, sharp or hazardous items, and are in a clean condition.		
Toys and equipment are in good working order, clean, and free from peeling paint and pinch points.		
 Staff takes steps to correct or avoid unsafe conditions. Smoking is not permitted in or around facility 		
emoking is not permitted in or dream racinty.		
The following furnishings are available: Equipment and furnishings for diaper-changing and changing soiled underwear or other clothing that are located away from food preparation		
areas:		
 Hand-washing sinks within arm's length of diaper-changing tables; 		
 Chairs with a back and a seating height that allows the child to sit with his or her feet on the floor or ground (for each child over the age of one 		
year);		
Tables at a height that allows a child to sit comfortably with the table between underarm and waist;		
 Adaptations that allow children with disabilities and other special needs to fully participate in the program's activities; and 		
 A solid barrier or at least three-foot spacing that separates sleeping children from one another. 		
Documentary evidence, available on-site, indicates that the building has been assessed for lead, radon, radiation, asbestos, fiberglass, or any other		
hazard from friable material. Evidence exists that the program has taken remedial or containment action to prevent exposure to children and adults,		
if warranted by the assessment.		
Fully working fire extinguishers and fire alarms are installed in each classroom and are tagged and serviced annually. Smoke detectors, fire alarms		
and carbon monoxide detectors are tested monthly, and a written log of annual service and testing dates and battery changes is maintained and		
available.		
Cleaning materials, detergents, aerosol cans, health and beauty aids, and other toxic materials are stored in their original labeled containers and		
used according to the manufacturer's instructions and purpose. All art and craft materials used in the program are non-toxic. No paint containing lead in excess of 0.06% is used in areas accessible to children.		
The program has written procedures to protect children and adults from environmental hazards, such as air pollution, lead, and asbestos, according		
to public health requirements.		
Electrical outlets are covered.		
Indoor equipment for large-motor activities meets national safety standards and is supervised at the same level as outdoor equipment.		
At least one (1) staff member who has a certificate showing satisfactory completion of pediatric first-aid training, including managing a blocked		
airway and providing rescue breathing for infants and children, is always present with each group of children. When the program includes		
swimming and wading and when a child in the group has a special health condition that might require CPR, one staff person who has successfully		
completed training in CPR is present in the program at all times		
Outdoor Environment		
Gold Seal Criteria	Crosswalk or Comments for Review	
At least 75 square feet of outside play space is provided for each child playing outside at any one time. The total amount of required play space is	Oroconant of Commonto for Noview	
based on a maximum of one-third of the total center enrollment being outside at one time.		
The director or other designated individual conducts daily inspections of the playground area. A playground inspection log is maintained at all times		
to reflect daily playground inspections.		

Outdoor play areas are entirely smoke-free. No smoking is permitted in the presence of children.	
Outdoor play area is protected by fences or natural barriers to prevent access to streets and to avoid other dangers, such as pits, water hazards, or	
wells.	
Program staff protect children and adults from exposure to high levels of air pollution from smog or heavy traffic by limiting outdoor and physical	
activity as a precaution during smog or other air pollution alerts.	
Any body of water, including swimming pools, built-in wading pools, ponds, and irrigation ditches, is enclosed by a fence at least four (4) feet in	
height, with any gates childproofed to prevent entry by unattended children. To prevent drowning accidents, staff directly supervise all children by	
sight and sound in all areas with access to water in tubs, pails, and water tables.	
Outdoor play equipment is of safe design and in good repair:	
 All pieces of playground equipment are designed to match the body dimensions of children. 	
 Anchored equipment is not placed closer than four (4) feet from any hard, non-resilient surface, including fencing or another piece of play 	
equipment.	
 All elevated pieces of playground equipment are surrounded by a perimeter of resilient surface of an acceptable depth. 	
 All pieces of playground equipment are free of sharp edges, protruding parts, weaknesses, and flaws in material construction. 	
When climbers, climbing gyms, slides, and other play units are part of the outdoor environment, the program provides safety surfacing that is rated	
and installed in the fall zone as recommended by the manufacturer for the fall height of the play equipment. Furnishings such as lofts are	
constructed to prevent falls (e.g., with appropriate barriers), or safety surfacing is installed in the fall zone.	
Sandboxes that are part of a program facility are constructed to allow for drainage, are covered when not in use, and are cleaned of foreign matter	
on a regular basis. Staff replaces sand as often as necessary.	
The program maintains facilities so they are free from harmful animals, insect pests, and poisonous plants:	
Poisonous or potentially harmful plants are not in areas accessible to children.	
Pesticides and herbicides, if used, are applied according to the manufacturer's instructions when children are not at the facility and in a	
manner that prevents skin contact, inhalation, and other exposure to children.	
The program uses the techniques known as Integrated Pest Management (IPM) so the least hazardous means are used to control pests	
and unwanted vegetation.	
The staff are capable of viewing all of the children on the entire playground.	
To protect against cold, heat, sun injury, and insect-borne disease, parents are required to provide their children with at least one change of clothing	
suitable for daily outdoor play.	
Personal Hygiene and Best Practices	
Gold Seal Criteria	Crosswalk or Comments for Review
Proper hand-washing procedures are followed by adults and children, and universal precautions are practiced at all times:	
 Children and adults wash their hands after diapering or using the toilet, handling body fluids, playing in fluid play areas, and before meals 	
and snacks.	
 Adults wash their hands before and after feeding a child, administering medication and after assisting a child with toileting and handling 	
garbage or cleaning.	
 Staff and children wash their hands at specified times during the day. 	
Staff members and children developmentally able to learn personal hygiene are taught hand-washing procedures and are periodically monitored.	
Children wash either independently or with staff assistance as needed to successfully complete the task.	
Toilets, drinking water facilities, and hand-washing facilities are within 40 feet of the indoor areas that children use. The hand-washing sinks are	
accessible to staff and children (step stools are available if needed).	
Daily cleaning tasks are conducted to ensure a healthy and safety environment and include the following: general classroom areas, bathrooms,	
dining areas, and all equipment.	
<u> </u>	

Staff clean and sanitize toilet seats, toilet handles, toilet bowls, doorknobs, or cubicle handles and floors either daily or immediately if visibly soiled.	
Staff clean and sanitize potty chairs, if in use, after each child's use. In situations where sinks are used for both food preparation and other	
purposes, staff clean and sanitize the sinks before using them to prepare food. Staff do not use hand-washing sinks for bathing children or for	
removing smeared fecal material.	
Toys are washed weekly, except mouthed toys, which are washed daily or more frequently, as needed.	
Nutrition and Food Safety	
Gold Seal Criteria	Crosswalk or Comments for Review
The program prepares written daily, weekly, and/or monthly menus that:	
Are posted where families can see them.	
Are made available to families.	
 Are kept on file for review by certified inspectors and/or the accrediting association. 	
Illustrate that meals and snacks are at regularly established times.	
Illustrate that meals and snacks are at least two (2) hours apart but not more than three (3) hours apart.	
The program participates in the United States Department of Agriculture's Child and Adult Care Food Program (USDA's CACFP), OR at least two	
(2) times a year, a registered dietitian or pediatric public health nutritionist evaluates the provider's menus for:	
Nutritional content;	
 Portion sizes, and nationally recommended limits on juice, sugar, sodium, and saturated fats; 	
Food service operations;	
 Food safety (staff discard foods with expired dates, etc.); 	
 Special feeding needs to be met by the program; and 	
 Procedures used for food brought from home. 	
The program documents compliance and any corrections it has made according to the recommendations of the program's health consultant,	
nutrition consultant, or a sanitarian that reflect consideration of federal and other applicable food safety standards.	
Clean, sanitary drinking water is made available to children throughout the day (infants who are fed only breast milk do not need to be offered	
water). When the water supply source is a well or other private source (i.e., not served by a public supply), on-site documentary evidence verifies	
that the local regulatory health authority has determined the water to be safe for human consumption.	
Mealtime is relaxed and pleasant for children. Staff sit and eat with the children while modeling appropriate behavior and using mealtime as a	
learning experience.	
Staff take steps and work with families to ensure that food and beverages brought from home:	
 Meet the United States Department of Agriculture's Child and Adult Care Food Program (USDA's CACFP) food guidelines. 	
 Are labeled with the child's name and the date. 	
 Are refrigerated, if required, and stays cold until served. 	
 Are supplemented by food provided by the program, if necessary. 	
 Must be either whole fruits or commercially prepared packaged foods in factory-sealed containers if food is intended to be shared. 	
For all infants, and for children with disabilities who have special feeding needs, a daily record is kept and documents the type and quantity of food	
a child consumes and provides families with that information.	
For each child with special health care needs, food allergies, or special nutrition needs:	
The child's health provider offers the program an individualized care plan that is prepared in consultation with family members and	
specialists involved in the child's care.	
 The program asks families of a child with food allergies to give consent for posting information about that child's food allergy and, if 	
consent is given, then posts that information in the food preparation area and in the areas of the facility the child uses so it is a visual	
reminder to all who interact with the child during the program day.	

Staff does not offer children younger than four (4) years the following foods: hot dogs, whole or sliced into rounds; whole grapes; nuts; popcorn; raw peas; hard pretzels; spoonfuls of peanut butter; or chunks of raw carrots or meat larger than can be swallowed whole. Staff cut foods into pieces no larger than 1/4-inch square for infants and 1/2-inch square for toddlers/2-year-olds, according to each child's chewing and swallowing capability.	
 In regards to food safety: Liquids and foods that are hotter than 110 degrees Fahrenheit are kept out of children's reach. Staff discards after one (1) hour any formula or human milk that is served but not completely consumed or is not refrigerated. If staff warm formula or human milk, the milk is warmed in water at no more than 120 degrees Fahrenheit for no more than five minutes. No milk, including breast milk, and no other infant foods are warmed in a microwave oven. Except for breast milk, staff serve only formula and infant food that come to the facility in factory-sealed containers (e.g., ready-to-feed powder or concentrated formulas and baby food jars) and are prepared according to the manufacturer's instructions. 	
 The program supports breastfeeding by: Accepting, storing, and serving expressed milk for feedings; Accepting milk in ready-to-feed sanitary containers labeled with the infant's name and date and storing it in a refrigerator for no longer than 48 hours (or no more than 24 hours if the breast milk was previously frozen) or in a freezer at 0 degrees Fahrenheit or below for no longer than three months; Ensuring that staff gently mix, not shake, the milk before feeding to preserve special infection-fighting and nutritional components in breast milk; and Providing a comfortable place for breastfeeding and coordinating feedings with the infant's mother. 	
 In regards to infants and toddlers: The program does not feed cow's milk to infants younger than 12 months, and it serves only whole milk to children of ages 12 months to 24 months. If the program provides food to infants, staff work with families (who are informed by their child's health care provider) to ensure that the food is based on each infant's individual nutritional needs and developmental stage. Bottle feedings do not contain solid foods unless the child's health care provider supplies written instructions and a medical reason for this practice. Teaching staff offer children fluids from a cup as soon as the families and teachers decide together that a child is developmentally ready to use a cup. Teaching staff do not offer solid foods and fruit juices to infants younger than six months of age, unless that practice is recommended by the child's health care provider and approved by families. Sweetened beverages are avoided. If juice (only 100% fruit juice is recommended) is served, the amount is limited to no more than four ounces per child daily. 	
Infant and Toddlers	Occupation Comments for Daily
Gold Seal Criteria Cote mate cribe cheets and blankets are marked with individual shildren's names and washed at least one a week	Crosswalk or Comments for Review
Cots, mats, cribs, sheets, and blankets are marked with individual children's names and washed at least once a week. Program staff identify choking hazards and remove them from the proximity and reach of infants and toddlers/2-year-olds.	
Before walking on surfaces that infants use specifically for play, adults and children remove, replace, or cover with clean foot coverings any shoes they have worn outside that play area. If children or staff are barefoot in such areas, their feet are visibly clean.	
Adults have a comfortable place to sit, hold, and feed infants. Staff place rocking chairs and glider chairs in locations that will avoid injury to children who may be on the floor.	
Infants and toddlers (to age two) do not have bottles while in a crib or bed and do not eat from propped bottles at any time. They also do not carry bottles, sipply cups, or regular cups with them while crawling or walking.	

Teaching staff who are familiar with the infant feed him or her whenever the infant seems hungry. Feeding is not used in lieu of other forms of comfort.	
At least once daily, in a program where children older than one year receive two or more meals, teaching staff provide an opportunity for tooth-	
brushing and gum-cleaning to remove food and plaque. (The use of toothpaste is not required.)	
After each feeding, infant's teeth and gums are wiped with a disposable tissue (or clean soft cloth used only for one child and laundered daily) to	
remove liquid that coats the teeth and gums.	
Cribs are inspected to ensure security. Drop-side cribs are not used.	
To reduce the risk of Sudden Infant Death Syndrome (SIDS):	
Infants, unless otherwise ordered by a physician, are placed on their backs to sleep on a firm surface manufactured for sale as infant sleeping	
equipment that meets the standards of the United States Consumer Product Safety Commission. (This indicator is required of all programs with	
infants.)	
 Pillows, quilts, comforters, sheepskins, stuffed toys, and other soft items are not allowed in cribs or rest equipment for Infants younger than eight months. 	
 If a blanket is used, the infant is placed at the foot of the crib with a thin blanket tucked around the crib mattress, reaching only as far as the 	
infant's chest.	
 The infant's head remains uncovered during sleep. After being placed down for sleep on their backs, infants may then be allowed to assume 	
any comfortable sleep position when they can easily turn themselves from the back position.	
Diaper/Changing area:	
Never located near food preparation areas.	
Changing tables are sanitized after each use.	
 Non-absorbent paper liners are used, which must be large enough to cover the changing surface. 	
 Staff check diagners regularly and change soiled or wet diagners/clothing immediately. 	
Staff check diapers regularly and change soiled or wet diapers/clothing immediately. A closeble foot nodel operated plastic lined trash recentage is provided in every diaper changing area.	
 A closable, foot-pedal operated, plastic-lined trash receptacle is provided in every diaper-changing area. 	
 A closable, foot-pedal operated, plastic-lined trash receptacle is provided in every diaper-changing area. Bathrooms have barriers to prevent entry by unattended infants and toddlers to 2-years-old.

Supervision	
Gold Seal Criteria	Crosswalk or Comments for Review
Attendance is taken when children arrive at the program. The program has in place a system for parents/guardians to sign their children in and out	
on a daily basis.	
Staff maintain supervision of children at all times.	
The physical layout of facilities is arranged so that all areas can be viewed by at least one (1) other adult in addition to the caregiver.	
 Teachers, assistant teachers, or teacher aides are aware of and positioned so they can hear and see any sleeping children for whom they 	
are responsible, especially when they are actively engaged with children who are awake.	
When infants and toddlers to 2-years-old are sleeping, mirrors, video or sound monitors may be used to augment supervision in sleeping	
areas, but such monitors may not be relied on in lieu of direct visual and auditory supervision.	
Children are carefully supervised on field trips.	
Parents are notified in advance of the field trip destination, time of departure, anticipated time of arrival, and time of return. Signed, written	
permission for individual field trips or blanket written permission is kept on file for each child taking part in a field trip.	
Emergency, Medication, and Illness Procedures	
Gold Seal Criteria	Crosswalk or Comments for Review
The program has written policies on the routine health care of children, and the health practices of the program, to promote wellness and safeguard	
the health and safety of children and adults. The program has a system for daily health screenings along with a record of the staff person's	
observations of each child during the screening.	
The program has a written plan for reporting and managing any incident of unusual occurrence that is threatening to the health, safety, or welfare of	
the children or staff. The program has procedures for staff training on the emergency plan, and the plan is posted in each classroom.	
The program has documentation that it has cooperative arrangements with local health authorities and has, at least annually, made contact with	
those authorities to keep current on relevant health information and to arrange for obtaining advice when outbreaks of communicable disease occur.	
Staff maintain areas used by staff or children who have allergies or any other special environmental health needs according to the recommendations of health professionals. Areas used by staff or children who have allergies to dust mites or to components of furnishings or	
supplies are maintained by the program according to the recommendations of health professionals.	
There is a separate area to care for children who are too ill to receive care in the regular group. A program that allows ill children or staff to remain	
in the program implements plans that have been reviewed by a health professional about (a) what level and types of illness require exclusion; (b)	
how care is provided for those who are ill but who are not excluded; and (c) when it is necessary to require consultation and documentation from a	
health care provider for an ill child or staff member.	
The program provides regular vision, speech and language, hearing, and developmental screenings for children either on-site or through referral to	
a community health agency. The program documents annual screenings for each child.	
Complete records for children are updated annually including:	
Names, addresses, and phone numbers of parents or guardians; emergency contact information; medical treatment authorizations; medical	
histories; developmental histories; immunization records; progress reports; parent conference reports; transportation permissions; injury and illness	
logs; and medication administration logs.	
The program maintains a log of all illnesses and parents are notified immediately when a child's behavior indicates illness.	
Evacuation drills are practiced at least monthly from all exit locations at varied times of the day. The program has an emergency exit plan showing	
escape routes from each area.	
At least one (1) person on-site is designated as responsible for health and safety issues.	
90% of the staff are certified in CPR for infants and children. At least one (1) certified staff person is in attendance at all times. Written verification of	
CPR certification is kept on file at all times.	
90% of the staff involved in the provision of direct child care are certified in pediatric first aid.	

There is a health/medical consultant available to the program for questions and advice. The health consultant observes program practices and reviews and makes recommendations about the program's practices and written health policies to ensure health promotion and prevention of infection and injury. The consultation addresses physical, social-emotional, nutritional, and oral health, including the care and exclusion of ill children.	
There is a fully-stocked, readily accessible first aid kit in the facility.	
Medication is administered to children only when a written order has been submitted by a parent, and the medication is consistently administered by	
a designated staff member. A log is kept and filed of all medication administered.	I
Classroom pets or visiting animals appear to be in good health. Pets or visiting animals have documentation from a veterinarian or an animal shelter	I
to show that the animals are fully immunized (if the animal should be so protected) and that animals are suitable for contact with children. Teaching	I
staff supervise all interactions between children and animals and instruct children on safe behavior when in close proximity to animals. Program	ı
staff make sure that any child who is allergic to a type of animal is not exposed to that animal. Reptiles are not allowed as classroom pets because	I
of the risk for salmonella infection	ı

STANDARD: Teacher-Child Interactions	
Gold Seal Criteria	Crosswalk or Comments for Review
 Every attempt is made to maintain continuity of relationships between teaching staff and children and among groups of children: The program is organized and staffed to minimize the number of group, teaching staff, and classroom transitions experienced by an individual child during the day and program year. Policies prescribe that each group of children be assigned teaching staff who have primary responsibility for working with that group. Policies encourage keeping infants and toddlers to age two (2) together with their teaching staff for nine (9) months or longer. Teaching staff's daily interactions: 	
 Demonstrate their knowledge of the children they teach, their families, and the social, linguistic, and cultural context in which the children live. Support and challenge children's learning during interactions or activities that are teacher-initiated and child-initiated. Are available and responsive to children; encourage children to share experiences, ideas and feelings. Engage in collaborative inquiry with individual children and small groups of children. Include listening to children attentively and with respect; teachers speak to each child frequently (by name), make eye contact and use clear, correct language patterns, and affectionate, supportive words. Encourage and recognize children's work and accomplishments. 	
 Teachers manage behavior by: Helping individual children learn socially appropriate behavior by providing guidance that is consistent with the child's level of development. Managing behavior and implementing classroom rules and expectations in a manner that is consistent and predictable. Responding to challenging, unpredictable, or unusual behavior with their knowledge of children's homes and classroom life. Observing patterns in children's challenging behaviors to provide thoughtful, consistent, and individualized responses. Convening families and professionals to develop individualized plans to address behavior. Using positive behavior support strategies. 	
Behavior management includes positive guidance, redirection, and the setting of clear-cut limits that foster the child's ability to become self-disciplined. Teaching staff anticipate and take steps to prevent potential behavior problems.	
Teachers make a concerted effort to understand what children are trying to communicate, and respond sensitively when children are frustrated or angry. Teaching staff actively seek to understand infants' needs and desires by recognizing and responding to their nonverbal cues and by using simple language.	
Teachers observe children who have challenging behavior and respond quickly and calmly to prevent children from hurting each other while showing understanding of the children's needs and feelings. Teaching staff assist children in resolving conflicts by helping them identify feelings, describe problems, try alternative solutions, and identify events, activities, interactions, and other contextual factors that predict challenging behavior and may contribute to the behavior.	•
Staff promote pro-social behavior and create a climate of mutual respect for children and their families by treating them with respect and dignity. No adult or child is treated differently because of a disability, or because of his/her race, religion, ethnic origin, or physical appearance. Teaching staff are consistent and predictable in their physical and emotional care of all children. Corporal punishment; withdrawal of food, rest, or	
bathroom opportunities; and any form of emotional abuse are prohibited. Teaching staff evaluate and change their responses based on individual needs. Teaching staff vary their interactions to be sensitive and responsive to differing abilities, temperaments, activity levels, and cognitive and social development. Teaching staff adjust their interactions to infants' and toddlers'/2-year-olds' various states and levels of arousal.	

Teaching staff give one-to-one attention to infants when engaging in care-giving routines. Teaching staff engage infants in frequent face-to-face social interactions each day. These include both verbal behaviors (e.g., talking, cooing, repeating infant sounds, and singing) and nonverbal behaviors (e.g., smiling, touching, and holding).	
Teaching staff quickly respond to infants' and toddlers'/2-year-olds' cries or other signs of distress by providing physical comfort and needed care. The teaching staff are sensitive to infants' and toddlers'/2-year-olds' various signals and learn to read their individual cries. Teaching staff facilitate	
an infant's social interaction when he or she is interested in looking at, touching, or vocalizing to others.	
Teaching staff support children's development of friendships and provide opportunities for children to play with and learn from each other. Teaching staff facilitate positive peer interaction for children who are socially reserved or withdrawn and for those who are bullied or excluded.	
Teachers provide children opportunities to develop the classroom community through participation in decision-making about classroom rules, plans,	
and activities.	

STANDARD: Program Operations	
Gold Seal Criteria	Crosswalk or Comments for Review
All components of program operation are guided by written policies that:	
Hiring procedures ensure that all employees in the program (including bus drivers, bus monitors, custodians, cooks, clerical and other support staff) who come into contact with children in the program or who have responsibility for children: Have passed a criminal-record check and are free from any history of substantiated child abuse or neglect. Have cleared a sexual predator check. Are at least 18 years old (except vehicle drivers, who must be at least 21). Have completed high school or an equivalent diploma. Have provided personal references and a current health assessment that attest to the prospective employee's ability to perform the tasks required to carry out the responsibilities of their position.	
 The child care program: Fosters staff communication through staff meetings, a newsletter, written memoranda, suggestion boxes, etc. Provides a written job description for each position and a policy in writing on nondiscrimination. Provides staff with a staff lounge or separate break area and a staff bathroom. Staff have ways of taking breaks and finding relief at times of high stress. Offers a benefits package for full-time staff that satisfactorily completes their introductory period of employment. Has a teacher retention plan. Has in place technology-based information management systems that collect and analyze data used to monitor program operation and to inform program improvement. 	
Confidential personnel files, including applications with records of experience, transcripts of education, health-assessment records, documentation of ongoing professional development, and results of performance evaluation, are kept in a secure location. Information about children and families is held in strictest confidence by the program staff. At least annually, directors, parents, program staff and other ancillary professionals collaborate on a written evaluation of the program's	
effectiveness in meeting the needs of children, parents, and program modification. Staff and families have the opportunity to assist in making decisions to improve the program. The program uses this information to plan professional development and program quality-improvement activities, as well as to improve operations and policies. The program has a formal merit evaluation program and every staff person is formally reviewed by a supervisor at least once each year. An individual professional development plan is generated from the staff-evaluation process and is updated at least annually and ongoing as needed.	
All teaching staff evaluate and improve their own performance based on ongoing reflection and feedback from supervisors, peers and families. They add to their knowledge and increase their ability to put knowledge into practice. They develop an annual individualized professional development plan with their supervisor and use it to inform their continuous professional development.	

Financial policies and the procedures to implement them:

- Provide evidence of sound fiscal accountability using standard accounting practices.
- Are consistent with the program's vision, philosophy, mission, goals, and expected child outcomes. The program has resources to support the program's vision, philosophy, mission, goals, operation, and expected child outcomes.
- Include an annual operating budget.
- Include at least a quarterly reconciliation of expenses to budget.
- Include a system exists to review or adjust the budget if circumstances change.
- Include the person directly responsible for program implementation (administrator, site manager, program manager, or supervising teacher) in long-range fiscal planning and in operating budget preparation, reconciliation, and review.
- Include a yearly audit. Fiscal records (such as revenue and expenditure statements, balance sheets, banking reconciliation, etc.) are kept as evidence of sound financial management.

Program staff maintain a current list of child and family support services available in the community based on the pattern of needs they observe among families and based on what families request (e.g., health, mental health, oral health, nutrition, child welfare, parenting programs, early intervention-special education screening and assessment services, and basic needs such as housing and child care subsidies). They share the list with families and assist them in locating, contacting, and using community resources that support children's and families' well-being and development.

Program staff:

- Develop partnerships and professional relationships with agencies, consultants, and organizations in the community that further the program's capacity to meet the needs and interests of the children and families that they serve.
- Are familiar with family support services and specialized consultants who are able to provide culturally and linguistically appropriate services. They use this knowledge to suggest and guide families to these services as appropriate.
- Encourage continuity of services for children by communicating with other agencies and programs to achieve mutually desired outcomes
 for children and to guide collaborative work.
- Identify and establish relationships with specialized consultants who can assist all children's and families' full participation in the program. This assistance includes support for children with disabilities, behavioral challenges, or other special needs.
- Advocate for the program and its families by creating awareness of the program's needs among community councils, service agencies, and local governmental entities.
- Use their knowledge of the community and the families they serve as an integral part of the curriculum and children's learning experiences.
- Connect with and use their community's urban, suburban, rural, or tribal cultural resources.
- Inform families about community events sponsored by local organizations, such as museum exhibits, concerts, storytelling, and theater intended for children.
- Invite members of the performing and visual arts community, such as musical performers, coordinators of traveling museum exhibits, local artists, and community residents, to share their interests and talents with the children.
- Engage with other community organizations and groups to cosponsor or participate in cultural events to enrich the experience of children and families in the program.
- Are encouraged to participate in local, state, or national early childhood education organizations by joining and attending meetings and
 conferences. Program staff are also encouraged to participate regularly in local, state, or regional public-awareness activities related to
 early care and education.
- Are encouraged and given the opportunity to participate in community or statewide interagency councils or service integration efforts.

The program leadership:	
 Encourages staff and families to work together to participate in and support community improvement or advocacy projects. 	
 Builds mutual relationships and communicates regularly with close neighbors, informing them about the program, seeking out their 	
perspectives, involving them in the program as appropriate, and cooperating with them on neighborhood interests and needs.	
• Is knowledgeable about how policy changes at local, state, tribal, or national levels affect the services and resources available for children	
and their families.	
The program has written procedures to be followed if a staff member is accused of abuse or neglect of a child in the program that protect the rights	
of the accused staff person as well as protect the children in the program. Employees and volunteers receive an instruction sheet about child abuse	
reporting that contains a summary of the state child abuse reporting statute, instructions on reporting and the chain of command, and a statement	
that they will not be discharged solely because they have made a child abuse report. Suspected incidents of child abuse/neglect are reported to the	
Florida Abuse Hotline and appropriate local agencies.	

STANDARD: Family Interactions	
Gold Seal Criteria	Crosswalk or Comments for Review
The program has written policies and procedures that are updated at least annually and:	
 Demonstrate how the program prepares for, orients, and welcomes children and families. 	
Are shared verbally and in writing with families of enrolled children.	
Are available in languages that families use and understand.	
Include parent conflict resolution procedures.	
 Include program operations, such as tuition and fee schedules, payment and refunds, and attendance and vacation. 	
The program offers a parent display/bulletin board which covers, at a minimum, program description, policy statements, philosophy, schedules, and	
menus. The program compiles and provides program information to families in a language the family can understand. This information includes	
program policies and operating procedures.	
Families may visit any area of the facility at any time during the program's regular hours of operation as specified by the procedures of the facility.	
Nursing mothers have a place to breast-feed their children that meets their needs for comfort and privacy.	
The program has a procedure for transitioning children to another program or elementary school. This process includes reviewing children's specific	
needs, a family needs assessment, and a mechanism to share summary information. An informed consent form will be signed by the parent that identifies specifically what will be shared.	
When program staff suspect that a child has a developmental delay or other special need, this possibility is communicated to families in a sensitive,	
supportive, and confidential manner and is provided with documentation and explanation for the concern, suggested next steps, and information	
about resources for assessment. For children with persistent, serious, challenging behavior, teachers, families, and other professionals work as a	
team to develop and implement an individualized plan that supports the child's inclusion and success.	

To better understand the cultural backgrounds of children, families, and the community, program staff (as a part of program activities or as individuals):

- Participate in community cultural events, concerts, storytelling activities, or other events and performances designed for children and their families.
- Use a variety of formal and informal strategies (including conversations) to become acquainted with and learn from families about their family structure; their preferred child-rearing practices; and information families wish to share about their socioeconomic, linguistic, racial, religious, and cultural backgrounds.
- Actively use information about families to adapt the program environment, curriculum, and teaching methods to the families they serve.

Program staff:

- Arrange the environment to be welcoming and accessible.
- Make an effort to speak daily with each child's parents in order to briefly discuss the child's day and to report any unusual occurrence or special success.
- Communicate with family members on an ongoing basis to learn about children's individual needs and ensure a smooth transition between home and program.
- Share information with families about classroom rules, expectations, and routines not only at enrollment but also as needed throughout the year.
- Hold parent-teacher conferences at least twice a year and at other times, as needed, to discuss individual children's needs, progress, and accomplishments.
- Inform parents about the program and the curriculum, and about policy or regulatory changes and other critical issues that could potentially affect the program.
- Provide parents with information regarding social services within the community, including health care services, assistance with basic and emergency family needs, and tuition payment alternatives.
- Establish intentional practices designed to foster strong reciprocal relationships with families from the first contact and maintain them over time.
- Ensure that all families, regardless of family structure; socioeconomic, racial, religious, and cultural backgrounds; gender; abilities; or preferred language are included in all aspects of the program, including volunteer opportunities.
- Use a variety of formal and informal methods to communicate with families about the program philosophy and curriculum objectives, including educational goals and effective strategies that can be used by families to promote their children's learning.
- Facilitate opportunities for families to meet with one another on a formal and informal basis, work together on projects to support the program, and learn from and provide support for each other.
- Work together with families to plan events. Families' schedules and availability are considered as part of this planning.
- Use a variety of mechanisms such as family conferences or home visits to promote dialogue with families. The program staff ask adults to translate or interpret communications as needed.
- Inform families about the program's systems for formally and informally assessing children's progress. This information includes the purposes of the assessment, the procedures used for assessment, procedures for gathering family input and information, the timing of assessments, the way assessment results or information will be shared with families, and ways the program will use the information.
- Communicate with families on a daily basis regarding infants' and toddlers'/2-year-olds' activities and developmental milestones, shared care giving issues, and other information that affects the well-being and development of their children. Where in-person communication is not possible, program staff communicate through established alternative means.
- Encourage families to raise concerns and work collaboratively with them to find mutually satisfying solutions that staff then incorporate into classroom practice.
- Encourage and support families to make the primary decisions about services that their children need, and encourage families to advocate to obtain needed services.
- Use a variety of techniques to negotiate difficulties that arise in their interactions with family members. Program staff make arrangements to use these techniques in a language the family can understand.
- Provide basic general information on enrollment procedures and practices, visiting opportunities, and program options to help families with their transitions to other programs or schools.

STANDARD: Validation Process	
Gold Seal Criteria	Crosswalk or Comments for Review
The program will be subject to visit(s) by validator(s) representing the accrediting agency. The program will be evaluated based on standards outlined above. The program must receive a satisfactory evaluation. Onsite visits, excluding the initial visit, are unannounced visits: • Program personnel records will be monitored for compliance with training requirements. • Program files, surveys, and other information used to complete the self study must be available during time of visit. • Program environment will be monitored, both indoor and outdoor classroom settings.	

STANDARD: Renewal Process	
Gold Seal Criteria	Crosswalk or Comments for Review
 The program must apply for accreditation renewal prior to the expiration date of the current accreditation to ensure that a lapse does not occur. Program must provide an annual report. Provider must provide licensing inspections, including administrative actions as a result of noncompliance for the last two years.
