

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Database and Programming Essentials  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	Secondary	PSAV
Program Number	8206400	Y300100
CIP Number	0511080207	0511080207
Grade Level	9-12, 30, 31	30, 31
Standard Length	4 credits	600 hours
Teacher Certification	BUS ED 1 @2 COMPU SCI 6	BUS ED 1 @2 COMPU SCI 6
Additional teacher certifications accepted:	Any Academic Field PLUS appropriate industry certification.	Any Academic Field PLUS appropriate industry certification.
CTSO	FBLA BPA	Phi Beta Lambda BPA
SOC Codes	15-1061	15-1061
Facility Code	212 <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)	
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Basic Skills Level	N/A	Mathematics: 11 Language: 11 Reading: 11

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and entry-level database and internet/web related careers; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, and technical skills related to database and Internet technologies skills using the latest industry tools. This curriculum is project-based and modeled after the Oracle Academy.

## Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and one occupational completion point. Students who have previously completed the Business Technology Education Core will not have to repeat the core. It is recommended that students complete Algebra I and a programming/flow-charting course concurrently or prior to taking this program.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1061
	CTS0046	Database Fundamentals	150	
	CTS0047	Specialized Database Programming	150	
	CTS0067	Specialized Database Applications	150	

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1061	2
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
	8206410	Database Fundamentals	.5 credit		2
	8206420	Data Control and Functions	.5 credit		2
	8206430	Specialized Database Programming	1 credit		3
8206440	Specialized Database Applications	1 credit	3		

## Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computer and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computing for College and Careers	**	**	**	**	**	**	**	**	**	**	**	**

Specialized Database Applications	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### Career and Technical Student Organization (CTSO)

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and

reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 11, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education.

Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

## **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

## **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

## **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to

<http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

#### **Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.

- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

OR

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

OR

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.

- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.
- 25.0 Develop an awareness of the changes taking place in the Information Age and how they fit into an evolving society.
- 26.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs.
- 27.0 Develop the process of creating an entity by identifying relationships.
- 28.0 Formulate and assemble initial Entity Relationship by expanding on modeling concepts.
- 29.0 Consider the degree and optionality of relationships of entities.
- 30.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and Many-to-Many (M:M) relationships for building Entity Relationship Diagrams.
- 31.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships.
- 32.0 Demonstrate proficiency in data storage and dangers in designing the process for storage by adding complexity to an Entity-Relationship Model (ERM).
- 33.0 Apply the complex ERM information by fine tuning entities and the process for relating them.
- 34.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved.
- 35.0 Demonstrate proficiency in the technique of normalization by labeling and organizing all items in a database in such a way as to prevent any confusion of mistakes.
- 36.0 Demonstrate proficiency in table normalization by combining the techniques of an Entity Relationship Model or a top-down, business approach to data with Normalization or a bottom-up mathematical approach to data.
- 37.0 Apply blueprint principles to begin designing a tool for creating a web-based interface access to a database.
- 38.0 Extend the ERM presentation model by normalizing the data and mapping the management system.
- 39.0 Apply techniques for building a storage management system by creating a website using templates and wizards.
- 40.0 Demonstrate storage closet design and functionality by constructing a group business

- presentation.
- 41.0 Demonstrate comprehension of database modeling competency through group presentation.
  - 42.0 Demonstrate comprehension that the database management software is a system for organizing the storage unit (or database) according to business needs and rules, through data integrity constraints.
  - 43.0 Demonstrate comprehension of aspects of SQL Language interface by writing basic SQL statements.
  - 44.0 Demonstrate proficiency working with columns, characters, and rows in SQL.
  - 45.0 Demonstrate proficiency in using SQL comparison operators.
  - 46.0 Demonstrate proficiency in using logical comparisons and precedence rules.
  - 47.0 Demonstrate proficiency using SQL single row functions.
  - 48.0 Demonstrate proficiency displaying data from multiple tables.
  - 49.0 Demonstrate proficiency aggregating data using group functions.
  - 50.0 Demonstrate proficiency utilizing subqueries.
  - 51.0 Demonstrate proficiency producing readable output with SQL language interface and reporting tool and manipulating data.
  - 52.0 Demonstrate proficiency creating and managing database objects.
  - 53.0 Demonstrate proficiency altering tables and constraints implementing views.
  - 54.0 Demonstrate mastery of creating and implementing views, synonyms, indexes and other database objects.
  - 55.0 Demonstrate ability to control user access and SQL language interface and reporting tool.
  - 56.0 Demonstrate comprehension of bundling features of SQL.
  - 57.0 Demonstrate comprehension working with composite data types by writing executable script files.
  - 58.0 Describe the differences between SQL and PL/SQL
  - 59.0 Create PL/SQL blocks.
  - 60.0 Use variables in PL/SQL.
  - 61.0 Recognize lexical units.
  - 62.0 Recognize data types.
  - 63.0 Use scalar data types.
  - 64.0 Use various types of joins.
  - 65.0 Use SQL group functions and subqueries.
  - 66.0 Write PL/SQL executable statements.
  - 67.0 Use nested blocks and variable scope.
  - 68.0 Use good programming practices.
  - 69.0 Write DML statements to manipulate data.
  - 70.0 Retrieve data using PL/SQL.
  - 71.0 Manipulate data using PL/SQL.
  - 72.0 Use transaction control statements.
  - 73.0 Use IF conditional control statements.
  - 74.0 Use CASE conditional control statements.
  - 75.0 Use basic loop iterative control statements.
  - 76.0 Use WHILE and FOR loop iterative control statements.
  - 77.0 Use nested loop iterative control statements.
  - 78.0 Use explicit cursors.
  - 79.0 Use explicit cursor attributes.
  - 80.0 Use cursor for loops.
  - 81.0 Use cursors with parameters.
  - 82.0 Use cursors for update transactions.

- 83.0 Use multiple cursors.
- 84.0 Handle exceptions.
- 85.0 Trap Oracle server exceptions.
- 86.0 Trap user-defined exceptions.
- 87.0 Create procedures.
- 88.0 Use parameters in procedures.
- 89.0 Pass parameters.
- 90.0 Create stored functions.
- 91.0 Use functions in SQL statements.
- 92.0 Manage procedures and functions.
- 93.0 Manage object privileges.
- 94.0 Use invoker's rights.
- 95.0 Create packages.
- 96.0 Manage package constructs.
- 97.0 Use advanced package concepts.
- 98.0 Manage persistent state of package variables.
- 99.0 Use Oracle-supplied packages.
- 100.0 Understand dynamic SQL.
- 101.0 Understand triggers.
- 102.0 Create DML triggers.
- 103.0 Create DDL and database event triggers.
- 104.0 Manage triggers.
- 105.0 Use large object data types.
- 106.0 Manage BFILES.
- 107.0 Manage indexes.
- 108.0 Manage dependencies.
- 109.0 Program a database application.
- 110.0 Utilize the basic concepts of database design.
- 111.0 Utilize SQL and union queries.
- 112.0 Implement program statements using objects.
- 113.0 Utilize debugging tools and write error handlers.
- 114.0 Demonstrate file I/O.
- 115.0 Create forms and identify all the properties of a form.
- 116.0 Manipulate data using object models
- 117.0 Develop custom controls.
- 118.0 Utilize API functions.
- 119.0 Demonstrate database replication and implement database replication using programming tools.
- 120.0 Analyze and implement security options.
- 121.0 Implement client/server applications.
- 122.0 Optimize the performance of a database.
- 123.0 Perform application distribution.
- 124.0 Test and debug databases.
- 125.0 Demonstrate language arts knowledge and skills.
- 126.0 Demonstrate mathematics knowledge and skills.
- 127.0 Demonstrate science knowledge and skills.
- 128.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 129.0 Solve problems using critical thinking skills, creativity and innovation.
- 130.0 Use information technology tools.

- 131.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 132.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 133.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 134.0 Describe the importance of professional ethics and legal responsibilities.
- 135.0 Explain the importance of employability skill and entrepreneurship skills.
- 136.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Database and Programming Essentials**  
**PSAV Number: Y300100**

**Course Number: OTA0040**  
**Occupational Completion Point: A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1061**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 11.0 Perform e-mail activities. – The student will be able to:
- 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
- 12.0 Demonstrate operating systems. – The student will be able to:
- 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
- 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
- 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
- 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
- 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
- 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
- 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
- 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
- 12.02 Identify components of an e-mail message.
- 12.03 Identify the components of an e-mail address.

- 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the www. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.

- 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
- 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the www. – The student will be able to:
  - 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
  - 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
  - 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
  - 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
  - 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.

- 20.03 Explain how compilers work.
- 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
  - 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (osi) model. – The student will be able to:
  - 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
  - 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
  - 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: CTS0046**  
**Occupational Completion Point: A**  
**Database Fundamentals – 150 Hours – SOC Code 15-1061**

- 25.0 Develop an awareness of the changes taking place in the information age and how they fit into an evolving society. – The student will be able to:
- 25.01 Cite examples of jobs, salary, and opportunities he/she will have as a result of participating in the Academy.
  - 25.02 Describe the role a database plays in a business and predict its evolution.
  - 25.03 Demonstrate the difference between "data" and "information."
  - 25.04 Understand the importance of clear communication when discussing business informational requirements.
  - 25.05 Identify important historical contributions in database development and design.
- 26.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs. – The student will be able to:
- 26.01 Identify and analyze the phases of the database development process.
  - 26.02 Explain what conceptual data modeling and database design involve.
  - 26.03 Compare database development Process with that of the application development process.
  - 26.04 Distinguish between a conceptual model and a physical implementation.
- 27.0 Develop the process of creating an entity by identifying relationships. – The student will be able to:
- 27.01 Identify and model various types of entities.
  - 27.02 Identify naming and drawing conventions for entities.
  - 27.03 Sequence the steps that are necessary for creation of an entity.
  - 27.04 Analyze and model the relationships between entities.
- 28.0 Formulate and assemble initial entity relationship by expanding on modeling concepts. – The student will be able to:
- 28.01 Analyze and model attributes.
  - 28.02 Identify unique identifiers for each entity.
  - 28.03 Develop an entity relationship diagram tagging attributes with optionality.
- 29.0 Consider the degree and optionality of relationships of entities. – The student will be able to:
- 29.01 Create entity relationship models based on information requirements and interviews.
  - 29.02 Differentiate between one-to-many, many-to-many and one-to-one relationships.
  - 29.03 Identify relationship between two entities by reading a given diagram.
  - 29.04 Create a relationship between instances of the same entity.
  - 29.05 Read an entity relationship model in order to validate it.

- 30.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and many-to-many (M:M) relationships for building entity relationship diagrams. – The student will be able to:
- 30.01 Identify the significance of an attribute that has more than one value for each entity instance.
  - 30.02 Evaluate appropriate methods of storing validation rules for attributes.
  - 30.03 Recognize unique identifiers inherited from other entities.
  - 30.04 Sequence the steps involved in resolving a many-to-many relationship.
- 31.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships. – The student will be able to:
- 31.01 Validate that an attribute is properly placed based upon its dependence on its entity's unique identifier (UID).
  - 31.02 Resolve many-to-many relationships with intersection entities.
  - 31.03 Model advanced data constructs including recursive relationships, subtypes, and exclusive relationships.
  - 31.04 Create exclusive entities and relationships by using subtypes and arcs, respectively.
  - 31.05 Identify initial layout for presentation and generate a list of action items for members of group.
  - 31.06 Develop an entity relationship model using subtypes, super-types and an exclusive arc.
- 32.0 Demonstrate proficiency in designing and adding complexity to an entity-relationship model (ERM). – The student will be able to:
- 32.01 Revise an entity relationship model according to the diagramming techniques covered in this course.
  - 32.02 Define and give examples of hierarchical and recursive relationships.
  - 32.03 Recognize and resolve fan traps and chasm traps.
  - 32.04 Differentiate between transferable and non-transferable relationships.
  - 32.05 Deliver a professional, formal business style presentation.
  - 32.06 Evaluate and critique presentation layout, design and performance.
  - 32.07 Construct a model using both recursion and hierarchies to express the same conceptual meaning.
  - 32.08 Distinguish between using date as an attribute and DAY as an entity.
- 33.0 Apply complex ERM information by fine-tuning entities and the process for relating them. – The student will be able to:
- 33.01 Describe a relational database and how it differs from other database systems.
  - 33.02 Define primary keys and foreign keys and describe their purpose.
  - 33.03 Describe what data integrity refers to and list some constraints.
  - 33.04 Explain how database design fits into the database development process.
  - 33.05 Translate an entity-relationship model into a relational database design.
  - 33.06 Document a database design using table instance charts.
- 34.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved. – The student will be able to:

- 34.01 Demonstrate ability to implement six steps for mapping entity relationship models.
  - 34.02 Document an initial database design on table instance charts.
  - 34.03 Recognize raw data and evaluate the steps for creating a data group in unnormalized form (UNF).
- 35.0 Demonstrate proficiency in the technique of normalization by labeling and organizing all items in a database in such a way as to prevent any confusion or mistakes. – The student will be able to:
- 35.01 Differentiate between unnormalized data and normalized.
  - 35.02 Move data from an unnormalized form through to a third normal form.
  - 35.03 Demonstrate ability to test data groups for third normal form compliance.
  - 35.04 Identify optimized data groups from given groups of normalized data.
- 36.0 Demonstrate proficiency in table normalization by combining the techniques of an entity relationship model or a top-down, business approach to data with normalization or a bottom-up mathematical approach to data. – The student will be able to:
- 36.01 Compare the normalization and entity relationship modeling (ERM) techniques in terms of strengths and weaknesses.
  - 36.02 Further define normalization and explain its benefits.
  - 36.03 Place tables in third normal form.
  - 36.04 Explain how conceptual data modeling rules ensure normalized tables.
  - 36.05 Specify referential integrity constraints and design indices.
- 37.0 Apply blueprint principles to begin designing a tool for creating a web-based interface access to a database. – The student will be able to:
- 37.01 Evaluate the transformation of business requirements into an initial layout and design for a database.
  - 37.02 Construct simple web page design for personal work folder.
  - 37.03 Evaluate existing web sites and determine quality of design.
- 38.0 Extend the ERM presentation model by normalizing the data and mapping the management system. – The student will be able to:
- 38.01 Formulate a plan of action for the Database Project using skills previously learned in this course.
  - 38.02 Normalize an ERM to the third normal form (TNF).
  - 38.03 Create a table in the database using a database authoring tool.
  - 38.04 Demonstrate ability to edit tables using a database authoring tool.
  - 38.05 Create forms that will display the table components created with a database authoring tool.
- 39.0 Apply techniques for building a storage management system by creating a website using templates and wizards. – The student will be able to:
- 39.01 Create a web site that displays the database project home.
  - 39.02 Link a web site to create a web-enabled interface to the industry database.

- 39.03 Edit the forms created and specify appropriate field labels for data entry.
- 40.0 Demonstrate storage closet design and functionality by constructing a group business presentation. – The student will be able to:
- 40.01 Evaluate and generate criteria for a formal, business presentation.
- 40.02 Construct a persuasive group presentation using the guidelines set forth in class.
- 41.0 Demonstrate comprehension of database modeling competency through group presentation. – The student will be able to:
- 41.01 Deliver a formal business presentation for the class that discusses an entity-relationship model and initial database design.
- 41.02 Demonstrate the functionality of the database and the layout/design capabilities of a database authoring tool.
- 41.03 Self-assess learning experience through the presentation and demonstration of their final database project.
- 42.0 Demonstrate comprehension that the database management software is a system for organizing the storage unit (or database) according to business needs and rules, through data integrity constraints. – The student will be able to:
- 42.01 Identify the structural elements of a relational database table.
- 42.02 List and describe the system development life cycle.
- 42.03 Describe the industry implementation of the relational database management system (RDBMS) and object relational database management system (ORDBMS).
- 42.04 Explain how SQL and languages that extend SQL are used in the industry product set.
- 42.05 Identify the advantages of a database management system.
- 43.0 Demonstrate comprehension of aspects of SQL language interface by writing basic SQL statements. – The student will be able to:
- 43.01 List the capabilities of SQL SELECT statements.
- 43.02 Execute a basic select statement.
- 43.03 Differentiate between SQL statements and language commands that extend SQL.
- 44.0 Demonstrate proficiency working with columns, characters, and rows in SQL. – The student will be able to:
- 44.01 Apply the concatenation operator to link columns to other columns, arithmetic expressions, or constant values to create a character expression.
- 44.02 Use column aliases to rename columns in the query result.
- 44.03 Eliminate duplicate rows in the query result.
- 44.04 Display the structure of a table.
- 44.05 Apply SQL syntax to restrict the rows returned from a query.
- 44.06 Demonstrate application of the WHERE clause syntax.
- 44.07 Construct and produce output using a SQL query containing character strings and date values.

- 45.0 Demonstrate proficiency in using SQL comparison operators. – The student will be able to:
- 45.01 Apply the proper comparison operator to return a desired result.
  - 45.02 Demonstrate proper use of BETWEEN, IN, and LIKE conditions to return a desired result.
  - 45.03 Distinguish between zero and the value of NULL as unavailable, unassigned, unknown, or inapplicable.
  - 45.04 Explain the use of comparison conditions and NULL.
- 46.0 Demonstrate proficiency in using logical comparisons and precedence rules. – The student will be able to:
- 46.01 Evaluate logical comparisons to restrict the rows returned based on two or more conditions.
  - 46.02 Apply the rules of precedence to determine the order in which expressions are evaluated and calculated.
  - 46.03 Construct a query to order a results set for single or multiple columns.
  - 46.04 Construct a query to sort a results set in ascending or descending order.
- 47.0 Demonstrate proficiency using SQL single row functions. – The student will be able to:
- 47.01 Perform calculations on data.
  - 47.02 Modify individual data items.
  - 47.03 Use character, number and date functions in SELECT statements.
  - 47.04 Format data and numbers for display purposes.
  - 47.05 Convert column data types.
- 48.0 Demonstrate proficiency displaying data from multiple tables. – The student will be able to:
- 48.01 Construct select statements to access data from more than one table using equality and non-equality joins.
  - 48.02 Use outer joins through viewing data that generally does not meet a join condition.
  - 48.03 Join a table to itself.
- 49.0 Demonstrate proficiency aggregating data using group functions. – The student will be able to:
- 49.01 Identify the available group functions and describe their use.
  - 49.02 Demonstrate the ability to group data through the use of the GROUP BY clause.
  - 49.03 Demonstrate the ability to include or exclude grouped rows by using the HAVING clause.
- 50.0 Demonstrate proficiency utilizing subqueries. – The student will be able to:
- 50.01 Write a query with an embedded subquery.
  - 50.02 Evaluate and perform a multiple-column subquery.
  - 50.03 Describe and explain the behavior of subqueries when null values are retrieved.

- 50.04 Create a subquery in a FROM clause.
- 51.0 Demonstrate proficiency producing readable output with SQL language interface, reporting tool, and data manipulation language. – The student will be able to:
- 51.01 Produce queries that require an input variable.
  - 51.02 Customize the SQL language interface and reporting environment using SET commands for control.
  - 51.03 Produce more readable output through the use of the column and break commands.
  - 51.04 Describe data manipulation language (DML) and describe various DML statements.
  - 51.05 Utilize data manipulation language (DML) through inserting, updating and deleting rows from a table.
  - 51.06 Control transactions using COMMIT and ROLLBACK statements.
- 52.0 Demonstrate proficiency creating and managing database objects. – The student will be able to:
- 52.01 Describe the main database objects.
  - 52.02 Create tables and alter their definitions.
  - 52.03 Describe the data types that can be used when specifying column definition.
- 53.0 Demonstrate proficiency altering tables and constraints implementing views. – The student will be able to:
- 53.01 Create, drop, rename and truncate tables using SQL.
  - 53.02 Identify and describe various constraints including not null, unique, primary key, foreign key, and check.
  - 53.03 Create and maintain constraints including adding, dropping, enabling, disabling, and cascading.
  - 53.04 Recognize views and explain how they are created, how they retrieve data and how they perform DML operations.
- 54.0 Demonstrate mastery of creating and implementing views, synonyms, indexes and other database objects. – The student will be able to:
- 54.01 Create views, retrieve data through a view, alter the definition of a view and drop a view.
  - 54.02 Categorize information by using Top-N queries to retrieve specified data.
  - 54.03 Identify the features of a sequence and display sequence values using a data dictionary view.
  - 54.04 Identify the characteristics of a cached sequence.
  - 54.05 Modify and remove a sequence using a SQL statement.
  - 54.06 Identify the features of private and public synonyms.
  - 54.07 Identify characteristics of an index and describe different types.
  - 54.08 Create and remove an index using a SQL statement.
- 55.0 Demonstrate ability to control user access and SQL language interface and reporting tool. – The student will be able to:

- 55.01 Identify the features of database security.
  - 55.02 Create users using SQL statements.
  - 55.03 Grant and revoke object privileges using a SQL language interface and reporting tool.
- 56.0 Demonstrate comprehension of bundling features of SQL. – The student will be able to:
- 56.01 List and describe the benefits of extensions to SQL.
  - 56.02 Recognize the basic SQL block and its sections.
  - 56.03 Declare SQL variables and describe their significance.
  - 56.04 Execute a SQL block.
- 57.0 Demonstrate comprehension working with composite data types by writing executable script files. – The student will be able to:
- 57.01 Recognize the significance of the executable section and decide when to use it.
  - 57.02 Write statements in the executable section.
  - 57.03 Describe the rules of nested blocks.
  - 57.04 Identify and utilize appropriate coding conventions.
  - 57.05 Create a script that will select, insert, and update data in a table.
- 125.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 125.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 125.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 125.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 126.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 126.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 126.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 126.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 127.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 127.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 127.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

**Course Number: CTS0047****Occupational Completion Point – A****Specialized Database Programming – 150 Hours – SOC Code 15-1061**

- 58.0 Describe the differences between SQL and PL/SQL. – The student will be able to:
- 58.01 Describe PL/SQL.
  - 58.02 Differentiate between SQL and PL/SQL.

- 58.03 Explain the need for and benefits of PL/SQL.
- 59.0 Create PL/SQL blocks. – The student will be able to:
  - 59.01 Describe the structure of a PL/SQL block.
  - 59.02 Identify the different types of PL/SQL blocks.
  - 59.03 Identify PL/SQL programming environments.
  - 59.04 Create and execute an anonymous block.
  - 59.05 Output messages in PL/SQL.
- 60.0 Use variables in PL/SQL. – The student will be able to:
  - 60.01 Describe how variables are used in PL/SQL.
  - 60.02 Identify the syntax for using variables.
  - 60.03 Declare and initialize variables.
  - 60.04 Assign new values to variables.
- 61.0 Recognize lexical units. – The student will be able to:
  - 61.01 Describe the types of lexical units in PL/SQL.
  - 61.02 Describe identifiers and identify valid and invalid identifiers.
  - 61.03 Describe and identify reserved words, delimiters, literals, and comments.
- 62.0 Recognize data types. – The student will be able to:
  - 62.01 Describe the data type categories.
  - 62.02 Give examples of scalar, composite, and large object (LOB) data types.
  - 62.03 Identify when an object becomes eligible for garbage collection.
- 63.0 Use scalar data types. – The student will be able to:
  - 63.01 Declare and use scalar data types.
  - 63.02 Define guidelines for declaring and initializing variables.
  - 63.03 Describe the benefits of anchoring data types with the %TYPE attribute.
- 64.0 Use various types of JOINS. – The student will be able to:
  - 64.01 Construct and execute SELECT statements using an equijoin.
  - 64.02 Construct and execute SELECT statements using a non-equijoin.
  - 64.03 Construct and execute SELECT statements using an outer join.
  - 64.04 Construct and execute SELECT statements that result in a Cartesian product.
- 65.0 Use SQL group functions and subqueries. – The student will be able to:
  - 65.01 Construct and execute an SQL query using group functions to determine a sum total, an average amount, and a maximum value.
  - 65.02 Construct and execute an SQL query that groups data based on specified criteria.
  - 65.03 Construct and execute an SQL query that contains a WHERE clause using a single-row subquery.

- 65.04 Construct and execute an SQL query that contains a WHERE clause using a multiple-row subquery.
- 66.0 Write PL/SQL executable statements. – The student will be able to:
- 66.01 Construct variable assignment statements.
  - 66.02 Construct statements using built-in SQL functions.
  - 66.03 Differentiate between implicit and explicit data type conversions.
  - 66.04 Describe when implicit data type conversions take place.
  - 66.05 List the drawbacks of implicit data type conversions.
  - 66.06 Construct statements using functions to explicitly convert data types.
  - 66.07 Construct statements using operators.
- 67.0 Use nested blocks and variable scope. – The student will be able to:
- 67.01 Understand the scope and visibility of variables.
  - 67.02 Write nested blocks and qualify variables with labels.
  - 67.03 Describe the scope of an exception.
  - 67.04 Describe the effect of exception propagation in nested blocks.
- 68.0 Use good programming practices. – The student will be able to:
- 68.01 List examples of good programming practices.
  - 68.02 Insert comments into PL/SQL code.
  - 68.03 Follow formatting guidelines when writing code.
- 69.0 Write DML statements to manipulate data. – The student will be able to:
- 69.01 Construct and execute a DML statement to insert data into a table.
  - 69.02 Construct and execute a DML statement to update data in a table.
  - 69.03 Construct and execute a DML statement to delete data from a table.
  - 69.04 Construct and execute a DML statement to merge data into a table.
- 70.0 Retrieve data using PL/SQL. – The student will be able to:
- 70.01 Identify SQL statements that can be directly included in an executable block.
  - 70.02 Construct and execute an INTO clause to hold values returned by a single-row SELECT statement.
  - 70.03 Construct statements that retrieve data.
- 71.0 Manipulate data using PL/SQL. – The student will be able to:
- 71.01 Construct and execute PL/SQL statements that manipulate data with DML statements.
  - 71.02 Describe when to use implicit or explicit cursors.
  - 71.03 Create code to use SQL implicit cursor attributes to evaluate cursor activity.
- 72.0 Use transaction control statements. – The student will be able to:
- 72.01 Define a transaction and give an example.
  - 72.02 Construct and execute a transaction control statement.

- 73.0 Use IF conditional control statements. – The student will be able to:
  - 73.01 Construct and use an IF statement.
  - 73.02 Construct and use an IF-THEN-ELSIF-ELSE statement.
  - 73.03 Create PL/SQL to handle null conditions in an IF statement.
  
- 74.0 Use CASE conditional control statements. – The student will be able to:
  - 74.01 Construct and use CASE statements.
  - 74.02 Construct and use CASE expressions.
  - 74.03 Include syntax to handle null conditions in a CASE statement.
  - 74.04 Include syntax to handle Boolean conditions in IF and CASE statements.
  
- 75.0 Use basic LOOP iterative control statements. – The student will be able to:
  - 75.01 Describe the types of LOOP statements and their uses.
  - 75.02 Create PL/SQL containing a basic loop and an EXIT statement.
  - 75.03 Create PL/SQL containing a basic loop and an EXIT statement with conditional termination.
  
- 76.0 Use WHILE and FOR loop iterative control statements. – The student will be able to:
  - 76.01 Construct and use the WHILE looping construct.
  - 76.02 Construct and use the FOR looping construct.
  - 76.03 Describe when a WHILE loop is used.
  - 76.04 Describe when a FOR loop is used.
  
- 77.0 Use nested loop iterative control statements. – The student will be able to:
  - 77.01 Construct and execute PL/SQL using nested loops.
  - 77.02 Evaluate a nested loop construct and identify the exit point.
  
- 78.0 Use explicit cursors. – The student will be able to:
  - 78.01 List the guidelines for declaring and controlling explicit cursors.
  - 78.02 Create PL/SQL code to open a cursor and fetch a piece of data into a variable.
  - 78.03 Use a simple loop to fetch multiple rows from a cursor.
  - 78.04 Create PL/SQL code to close a cursor.
  
- 79.0 Use explicit cursor attributes. – The student will be able to:
  - 79.01 Define a record structure using the %ROWTYPE attribute.
  - 79.02 Create PL/SQL code to process the row of an active set using record types in cursors.
  - 79.03 Use cursor attributes to retrieve information about the state of an explicit cursor.
  
- 80.0 Use cursor FOR loops. – The student will be able to:
  - 80.01 List and explain the benefits of using Cursor FOR loops.
  - 80.02 Create PL/SQL code to declare a cursor and manipulate it in a FOR loop.

- 80.03 Create PL/SQL code containing a Cursor FOR loop using a subquery.
- 81.0 Use cursors with parameters. – The student will be able to:
- 81.01 List the benefits of using parameters with cursors.
  - 81.02 Create PL/SQL code to declare and manipulate a cursor with a parameter.
- 82.0 Use cursors for update transactions. – The student will be able to:
- 82.01 Create PL/SQL code to lock rows before an update using the appropriate clause.
  - 82.02 Explain the effect of using NOWAIT in an update cursor declaration.
  - 82.03 Create PL/SQL code to use the current row of the cursor in an UPDATE or DELETE statement.
- 83.0 Use multiple cursors. – The student will be able to:
- 83.01 Explain the need for using multiple cursors to produce multilevel reports.
  - 83.02 Create PL/SQL code to declare and manipulate multiple cursors within nested loops.
  - 83.03 Create PL/SQL code to declare and manipulate multiple cursors using parameters.
- 84.0 Handle exceptions. – The student will be able to:
- 84.01 Describe the advantages of including exception handling code.
  - 84.02 Describe the purpose of an EXCEPTION section in a PL/SQL block.
  - 84.03 Create PL/SQL code to include an EXCEPTION section.
  - 84.04 List the guidelines for exception handling.
- 85.0 Trap Oracle server exceptions. – The student will be able to:
- 85.01 Distinguish between errors defined by the Oracle Server and those defined by the programmer.
  - 85.02 Differentiate between errors that are handled implicitly and explicitly by the Oracle Server.
  - 85.03 Write PL/SQL code to trap a predefined Oracle Server error.
  - 85.04 Write PL/SQL code to trap a non-predefined Oracle Server error.
  - 85.05 Write PL/SQL code to identify an exception by error code and by error message.
- 86.0 Trap user-defined exceptions. – The student will be able to:
- 86.01 Write PL/SQL code to name a user-defined exception.
  - 86.02 Write PL/SQL code to raise an exception.
  - 86.03 Write PL/SQL code to handle a raised exception.
  - 86.04 Write PL/SQL code to use RAISE\_APPLICATION\_ERROR.
- 87.0 Create procedures. – The student will be able to:
- 87.01 Differentiate between anonymous blocks and subprograms.
  - 87.02 Identify the benefits of using subprograms.
  - 87.03 Describe a stored procedure.

- 87.04 Create a procedure.
- 87.05 Describe how a stored procedure is invoked.
- 88.0 Use parameters in procedures. – The student will be able to:
  - 88.01 Describe how parameters contribute to a procedure.
  - 88.02 Define a parameter.
  - 88.03 Create a procedure using a parameter.
  - 88.04 Invoke a procedure that has parameters.
  - 88.05 Distinguish between formal and actual parameters.
- 89.0 Pass parameters. – The student will be able to:
  - 89.01 List the types of parameter modes.
  - 89.02 Create a procedure that passes parameters.
  - 89.03 Identify three methods for passing parameters.
  - 89.04 Describe the DEFAULT option for parameters.
- 90.0 Create stored functions. – The student will be able to:
  - 90.01 Describe the difference between a stored procedure and a stored function.
  - 90.02 Create a PL/SQL block containing a function.
  - 90.03 Identify ways in which functions may be invoked.
  - 90.04 Create a PL/SQL block that invokes a function that has parameters.
- 91.0 Use functions in SQL statements. – The student will be able to:
  - 91.01 Describe where user-defined functions can be called from within an SQL statement.
  - 91.02 Describe the restrictions on calling functions from SQL statements.
  - 91.03 Describe the purpose of the Data Dictionary.
  - 91.04 Differentiate between the three types of Data Dictionary views.
  - 91.05 Write SQL SELECT statements to retrieve information from the Data Dictionary.
  - 91.06 Explain the use of DICTIONARY as a Data Dictionary search engine.
- 92.0 Manage procedures and functions. – The student will be able to:
  - 92.01 Describe how exceptions are propagated.
  - 92.02 Remove a function and a procedure.
  - 92.03 Use Data Dictionary views to identify and manage stored procedures.
- 93.0 Manage object privileges. – The student will be able to:
  - 93.01 List and explain several object privileges.
  - 93.02 Explain the function of the EXECUTE object privilege.
  - 93.03 Write SQL statements to grant and revoke object privileges.
- 94.0 Use invoker's rights. – The student will be able to:
  - 94.01 Contrast invoker's rights with definer's rights.
  - 94.02 Create a procedure that uses invoker's rights.

- 95.0 Create packages. – The student will be able to:
- 95.01 Describe a package, its components, and the reasons for use.
  - 95.02 Create packages containing related variables, cursors, constants, exceptions, procedures, and functions.
  - 95.03 Create a PL/SQL block that invokes a package construct.
- 96.0 Manage package constructs. – The student will be able to:
- 96.01 Explain the difference between public and private package constructs.
  - 96.02 Designate a package construct as either public or private.
  - 96.03 Specify the syntax to drop a package.
  - 96.04 Identify Data Dictionary views used to manage packages.
  - 96.05 Identify the guidelines for using packages.
- 97.0 Use advanced package concepts. – The student will be able to:
- 97.01 Write packages that use the overloading feature.
  - 97.02 Write packages that use forward declarations.
  - 97.03 Explain the purpose of a package initialization block.
  - 97.04 Identify restrictions on using packaged functions in SQL statements.
- 98.0 Manage persistent state of package variables. – The student will be able to:
- 98.01 Identify persistent states of package variables.
  - 98.02 Control the persistent state of a package cursor.
- 99.0 Use Oracle-supplied packages. – The student will be able to:
- 99.01 Describe two common uses for the DBMS\_OUTPUT package.
  - 99.02 Use the syntax to specify messages for the DBMS\_OUTPUT package.
  - 99.03 Describe the purpose for the UTL\_FILE package.
  - 99.04 Identify the exceptions used in conjunction with the UTL\_FILE package.
- 100.0 Understand dynamic SQL. – The student will be able to:
- 100.01 Identify the stages through which all SQL statements pass.
  - 100.02 Describe the reasons for using dynamic SQL to create an SQL statement.
  - 100.03 List four PL/SQL statements supporting Native Dynamic SQL.
  - 100.04 Describe the benefits of Execute Immediate over DBMS\_SQL for Dynamic SQL.
- 101.0 Understand triggers. – The student will be able to:
- 101.01 Describe database triggers and their uses.
  - 101.02 Differentiate between a database trigger and an application trigger.
  - 101.03 List the guidelines for using triggers.
  - 101.04 Compare and contrast database triggers and stored procedures.
- 102.0 Create DML triggers. – The student will be able to:

- 102.01 Create a DML trigger and identify its components.
  - 102.02 Create a statement level trigger.
  - 102.03 Describe the trigger firing sequence options.
  - 102.04 Create a DML trigger that uses conditional predicates.
  - 102.05 Create a row level trigger.
  - 102.06 Create a row level trigger that uses OLD and NEW qualifiers.
  - 102.07 Create an INSTEAD OF trigger.
- 103.0 Create DDL and database event triggers. – The student will be able to:
- 103.01 Describe the events that cause DDL and database event triggers to fire.
  - 103.02 Create a trigger for a DDL statement.
  - 103.03 Create a trigger for a database event.
  - 103.04 Describe the functionality of the CALL statement.
  - 103.05 Describe the cause of a mutating table.
- 104.0 Manage triggers. – The student will be able to:
- 104.01 View trigger information in the Data Dictionary.
  - 104.02 Disable and enable a database trigger.
  - 104.03 Remove a trigger from the database.
- 105.0 Use large object data types. – The student will be able to:
- 105.01 Compare and contrast LONG and LOB data types.
  - 105.02 Describe LOB data types and how they are used.
  - 105.03 Differentiate between internal and external LOBs.
  - 105.04 Create and maintain LOB data types.
  - 105.05 Migrate data from LONG to LOB.
- 106.0 Manage BFILEs. – The student will be able to:
- 106.01 Define BFILEs and the BFILE column data type.
  - 106.02 Create directory objects and view them in the Data Dictionary.
  - 106.03 Manage and manipulate BFILEs using BFILENAME and DBMS\_LOB.
- 107.0 Manage indexes. – The student will be able to:
- 107.01 Create and manipulate user-defined PL/SQL records.
  - 107.02 Create an INDEX BY table.
  - 107.03 Create an INDEX BY table of records.
  - 107.04 Describe the difference between records, tables, and tables of records.
- 108.0 Manage dependencies. – The student will be able to:
- 108.01 Describe the implications of procedural dependencies.
  - 108.02 Contrast dependent objects and referenced objects.
  - 108.03 View dependency information in the Data Dictionary.
  - 108.04 Use the UTLDTREE script to create the objects required to display dependencies.
  - 108.05 Use the IDEPTREE and DEPTREE views to display dependencies.

- 108.06 Describe when automatic recompilation occurs.
- 108.07 Describe how to minimize dependency failures.
- 128.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 128.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 128.02 Locate, organize and reference written information from various sources. CM 3.0
- 128.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 128.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 128.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 128.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 128.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 129.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 129.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS1.0
- 129.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 129.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 129.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 130.0 Use information technology tools. – The student will be able to:
- 130.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 130.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 130.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 130.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 131.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 131.01 Describe the nature and types of business organizations. SY 1.0
- 131.02 Explain the effect of key organizational systems on performance and quality.
- 131.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 131.04 Explain the impact of the global economy on business organizations.
- 134.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 134.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0

- 134.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 134.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 134.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0067****Occupational Completion Point – A****Specialized Database Applications – 150 Hours – SOC Code 15-1061**

109.0 Program a database application. – The student will be able to:

- 109.01 Utilize loop statements.
- 109.02 Given a scenario, use arithmetic, comparison, and pattern-matching operators.
- 109.03 Create user-defined functions.
- 109.04 Utilize common built-in functions.
- 109.05 Declare variables in modules and procedures.
- 109.06 Declare arrays, and initialize elements of arrays.
- 109.07 Declare and use object variables and collections, and use their associated properties and methods.
- 109.08 Declare symbolic constants, and make them available locally or publicly.
- 109.09 Respond to events.

110.0 Utilize the basic concepts of database design. – The student will be able to:

- 110.01 Apply basic concepts of normalization.
- 110.02 Utilize the cascade update and cascade delete options.

111.0 Utilize SQL and UNION queries. – The student will be able to:

- 111.01 Utilize SQL to write common queries.
- 111.02 Refer to objects by using SQL.
- 111.03 Utilize UNION queries.

112.0 Implement program statements using objects. – The student will be able to:

- 112.01 Determine when to use data access objects.
- 112.02 Differentiate between objects and collections.
- 112.03 Write statements that access and modify database objects.
- 112.04 Utilize data access objects.
- 112.05 Select appropriate methods and property settings for use with specified objects.

113.0 Utilize debugging tools and write error handlers. – The student will be able to:

- 113.01 Trap errors.
- 113.02 Utilize debugging tools to suspend program execution, and to examine, step through, and reset execution of code.
- 113.03 Debug code samples.
- 113.04 Utilize the Debugger to monitor variable values.
- 113.05 Write an error handler.

- 114.0 Demonstrate file I/O. – The student will be able to:
  - 114.01 Read from files.
  - 114.02 Write to files.
  - 114.03 Utilize record locking.
  
- 115.0 Create forms and identify all the properties of a form. – The student will be able to:
  - 115.01 Choose form-specific and report-specific properties to set.
  - 115.02 Choose control properties to set.
  - 115.03 Assign event-handling procedures to controls in a form.
  - 115.04 Define and create form and report modules.
  - 115.05 Identify the scope of a form or report module.
  - 115.06 Open multiple instances of a form, and refer to them.
  - 115.07 Assign values to form properties.
  - 115.08 Use form methods.
  
- 116.0 Manipulate data using object models. – The student will be able to:
  - 116.01 Connect to a data source.
  - 116.02 Open a recordset.
  - 116.03 Insert, update, delete and find data.
  
- 117.0 Develop custom controls. – The student will be able to:
  - 117.01 Set properties for custom controls.
  - 117.02 Customize user interface controls.
  
- 118.0 Utilize API functions. – The student will be able to:
  - 118.01 Properly declare functions.
  - 118.02 Use the by value and by reference parameters.
  
- 119.0 Demonstrate database replication and implement database replication using programming tools. – The student will be able to:
  - 119.01 Make a database replicable.
  - 119.02 View a synchronization schedule.
  - 119.03 Explain the purpose of the Replication ID.
  - 119.04 Explain how synchronization conflicts are resolved.
  - 119.05 Identify the advantages of using replication of synchronization.
  - 119.06 Identify the changes that the database engine makes when it converts a nonreplicable database into replicable database.
  
- 120.0 Analyze and implement security options. – The student will be able to:
  - 120.01 Analyze a scenario, and recommend an appropriate type of security.
  - 120.02 Explain the steps for implementing security.
  - 120.03 Analyze code to ensure that it sets security options.
  - 120.04 Write code to implement security options.

- 121.0 Implement client/server applications. – The student will be able to:
- 121.01 Demonstrate SQL pass through queries and application queries.
  - 121.02 Access external data by using ODBC.
  - 121.03 Trap errors that are generated by the server.
  - 121.04 Optimize connections.
  - 121.05 Optimize performance for a given client/server application.
- 122.0 Optimize the performance of a database. – The student will be able to:
- 122.01 Differentiate between single-field and multiple-field indexes.
  - 122.02 Optimize queries.
  - 122.03 Restructure queries to allow faster execution.
  - 122.04 Optimize performance in distributed applications.
  - 122.05 Optimize performance for client/server applications.
- 123.0 Perform application distribution. – The student will be able to:
- 123.01 Prepare an application for distribution.
  - 123.02 Analyze various methods to distribute a client/server application.
  - 123.03 Distribute custom controls with an application.
  - 123.04 Provide online help.
- 124.0 Test and debug databases. – The student will be able to:
- 124.01 Implement error handling.
  - 124.02 Test and debug library databases.
- 132.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 132.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 132.02 Explain emergency procedures to follow in response to workplace accidents.
  - 132.03 Create a disaster and/or emergency response plan. SHE 2.0
- 133.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 133.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 133.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 133.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 133.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 135.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 135.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0

- |        |  |          |
|--------|--|----------|
| 135.02 | Develop personal career plan that includes goals, objectives, and strategies.  | ECD 2.0  |
| 135.03 | Examine licensing, certification, and industry credentialing requirements.   | ECD 3.0  |
| 135.04 | Maintain a career portfolio to document knowledge, skills, and experience.   | ECD 5.0  |
| 135.05 | Evaluate and compare employment opportunities that match career goals.   | ECD 6.0  |
| 135.06 | Identify and exhibit traits for retaining employment.  | ECD 7.0  |
| 135.07 | Identify opportunities and research requirements for career advancement.   | ECD 8.0  |
| 135.08 | Research the benefits of ongoing professional development.   | ECD 9.0  |
| 135.09 | Examine and describe entrepreneurship opportunities as a career planning option.                                     | ECD 10.0 |
| 136.0  | <u>Demonstrate personal money-management concepts, procedures, and strategies.</u> –<br>The student will be able to: |          |
| 136.01 | Identify and describe the services and legal responsibilities of financial institutions.                             | FL 2.0   |
| 136.02 | Describe the effect of money management on personal and career goals.  | FL 3.0   |
| 136.03 | Develop a personal budget and financial goals.   | FL 3.1   |
| 136.04 | Complete financial instruments for making deposits and withdrawals.  | FL 3.2   |
| 136.05 | Maintain financial records.  | FL 3.3   |
| 136.06 | Read and reconcile financial statements.   | FL 3.4   |
| 136.07 | Research, compare and contrast investment opportunities.   |          |

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 14.01 Develop keyboarding skills to enter and manipulate text and data.
- 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 14.03 Identify and describe communications and networking systems used in workplace environments.
- 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 14.05 Demonstrate basic file management skills.
- 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
- 14.07 Describe ethical issues and problems associated with computers and information systems.
- 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.

15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
- 15.02 Accurately follow written and oral instructions.
- 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Computing for College and Careers**  
**Course Number:**       **8209020**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:

- 14.01 Identify and describe Web terminology.
- 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
- 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
- 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
- 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
- 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
- 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
- 14.08 Identify effective Boolean search strategies.

15.0 Demonstrate proficiency using html commands. – The student will be able to:

- 15.01 Identify elements of a Web page.
- 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
- 15.03 Define basic HTML terminology.
- 15.04 Analyze HTML source code developed by others.
- 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 15.07 Edit and test HTML documents for accuracy and validity.
- 15.08 Use basic functions of WYSIWYG editors.
- 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
- 15.10 Enhance web pages through the addition of images and graphics including animation.

16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
- 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
- 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
- 16.04 Use image design software to create and edit images.
- 16.05 Demonstrate proficiency in publishing to the Internet.
- 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
- 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Database Fundamentals  
**Course Number:** 8206410  
**Course Credit:** .5

**Course Description:**

This data modeling course is designed to provide the foundation for future software engineers or database administrators. It transforms business requirements into an operational database utilizing a top-down systematic approach. Content includes creation of entity-relationship diagrams that accurately model an organization's needs and support the functions of a business, mapping of information needs into a relational database design, creation of physical relational database tables to implement database design, construction of a website that interacts with a database and generates report using web-based reports, and organization and composition of formal presentations, integrating multimedia software.

25.0 Develop an awareness of the changes taking place in the information age and how they fit into an evolving society. – The student will be able to:

25.01 Cite examples of jobs, salary, and opportunities he/she will have as a result of participating in the Academy.

25.02 Describe the role a database plays in a business and predict its evolution.

25.03 Demonstrate the difference between "data" and "information."

25.04 Understand the importance of clear communication when discussing business informational requirements.

25.05 Identify important historical contributions in database development and design.

26.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs. – The student will be able to:

26.01 Identify and analyze the phases of the database development process.

26.02 Explain what conceptual data modeling and database design involve.

26.03 Compare database development Process with that of the application development process.

26.04 Distinguish between a conceptual model and a physical implementation.

27.0 Develop the process of creating an entity by identifying relationships. – The student will be able to:

27.01 Identify and model various types of entities.

27.02 Identify naming and drawing conventions for entities.

27.03 Sequence the steps that are necessary for creation of an entity.

27.04 Analyze and model the relationships between entities.

28.0 Formulate and assemble initial entity relationship by expanding on modeling concepts. – The student will be able to:

28.01 Analyze and model attributes.

- 28.02 Identify unique identifiers for each entity.
- 28.03 Develop an entity relationship diagram tagging attributes with optionality.
- 29.0 Consider the degree and optionality of relationships of entities. – The student will be able to:
- 29.01 Create entity relationship models based on information requirements and interviews.
- 29.02 Differentiate between one-to-many, many-to-many and one-to-one relationships.
- 29.03 Identify relationship between two entities by reading a given diagram.
- 29.04 Create a relationship between instances of the same entity.
- 29.05 Read an entity relationship model in order to validate it.
- 30.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and many-to-many (M:M) relationships for building entity relationship diagrams. – The student will be able to:
- 30.01 Identify the significance of an attribute that has more than one value for each entity instance.
- 30.02 Evaluate appropriate methods of storing validation rules for attributes.
- 30.03 Recognize unique identifiers inherited from other entities.
- 30.04 Sequence the steps involved in resolving a many-to-many relationship.
- 31.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships. – The student will be able to:
- 31.01 Validate that an attribute is properly placed based upon its dependence on its entity's unique identifier (UID).
- 31.02 Resolve many-to-many relationships with intersection entities.
- 31.03 Model advanced data constructs including recursive relationships, subtypes, and exclusive relationships.
- 31.04 Create exclusive entities and relationships by using subtypes and arcs, respectively.
- 31.05 Identify initial layout for presentation and generate a list of action items for members of group.
- 31.06 Develop an entity relationship model using subtypes, super-types and an exclusive arc.
- 32.0 Demonstrate proficiency in designing and adding complexity to an entity-relationship model (ERM). – The student will be able to:
- 32.01 Revise an entity relationship model according to the diagramming techniques covered in this course.
- 32.02 Define and give examples of hierarchical and recursive relationships.
- 32.03 Recognize and resolve fan traps and chasm traps.
- 32.04 Differentiate between transferable and non-transferable relationships.
- 32.05 Deliver a professional, formal business style presentation.
- 32.06 Evaluate and critique presentation layout, design and performance.
- 32.07 Construct a model using both recursion and hierarchies to express the same conceptual meaning.
- 32.08 Distinguish between using date as an attribute and DAY as an entity.

- 33.0 Apply complex ERM information by fine-tuning entities and the process for relating them.  
– The student will be able to:
- 33.01 Describe a relational database and how it differs from other database systems.
  - 33.02 Define primary keys and foreign keys and describe their purpose.
  - 33.03 Describe what data integrity refers to and list some constraints.
  - 33.04 Explain how database design fits into the database development process.
  - 33.05 Translate an entity-relationship model into a relational database design.
  - 33.06 Document a database design using table instance charts.
- 34.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved. – The student will be able to:
- 34.01 Demonstrate ability to implement six steps for mapping entity relationship models.
  - 34.02 Document an initial database design on table instance charts.
  - 34.03 Recognize raw data and evaluate the steps for creating a data group in unnormalized form (UNF).
- 35.0 Demonstrate proficiency in the technique of normalization by labeling and organizing all items in a database in such a way as to prevent any confusion or mistakes. – The student will be able to:
- 35.01 Differentiate between unnormalized data and normalized.
  - 35.02 Move data from an unnormalized form through to a third normal form.
  - 35.03 Demonstrate ability to test data groups for third normal form compliance.
  - 35.04 Identify optimized data groups from given groups of normalized data.
- 36.0 Demonstrate proficiency in table normalization by combining the techniques of an entity relationship model or a top-down, business approach to data with normalization or a bottom-up mathematical approach to data. – The student will be able to:
- 36.01 Compare the normalization and entity relationship modeling (ERM) techniques in terms of strengths and weaknesses.
  - 36.02 Further define normalization and explain its benefits.
  - 36.03 Place tables in third normal form.
  - 36.04 Explain how conceptual data modeling rules ensure normalized tables.
  - 36.05 Specify referential integrity constraints and design indices.
- 37.0 Apply blueprint principles to begin designing a tool for creating a web-based interface access to a database. – The student will be able to:
- 37.01 Evaluate the transformation of business requirements into an initial layout and design for a database.
  - 37.02 Construct simple web page design for personal work folder.
  - 37.03 Evaluate existing web sites and determine quality of design.
- 38.0 Extend the ERM presentation model by normalizing the data and mapping the management system. – The student will be able to:

- 38.01 Formulate a plan of action for the Database Project using skills previously learned in this course.
- 38.02 Normalize an ERM to the third normal form (TNF).
- 38.03 Create a table in the database using a database authoring tool.
- 38.04 Demonstrate ability to edit tables using a database authoring tool.
- 38.05 Create forms that will display the table components created with a database authoring tool.
- 39.0 Apply techniques for building a storage management system by creating a website using templates and wizards. – The student will be able to:
- 39.01 Create a web site that displays the database project home.
- 39.02 Link a web site to create a web-enabled interface to the industry database.
- 39.03 Edit the forms created and specify appropriate field labels for data entry.
- 40.0 Demonstrate storage closet design and functionality by constructing a group business presentation. – The student will be able to:
- 40.01 Evaluate and generate criteria for a formal, business presentation.
- 40.02 Construct a persuasive group presentation using the guidelines set forth in class.
- 41.0 Demonstrate comprehension of database modeling competency through group presentation. – The student will be able to:
- 41.01 Deliver a formal business presentation for the class that discusses an entity-relationship model and initial database design.
- 41.02 Demonstrate the functionality of the database and the layout/design capabilities of a database authoring tool.
- 41.03 Self-assess learning experience through the presentation and demonstration of their final database project.
- 125.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 125.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 125.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 125.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 126.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 126.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 126.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 126.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 127.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 127.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 127.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Data Control and Functions  
**Course Number:** 8206420  
**Course Credit:** .5

**Course Description:**

This course introduces data-server technology. Structured Query Language (SQL) is the standardized language that creates a medium for companies to compete in the building of databases or data management systems. Content of this course includes creation and maintenance of database objects and storage, retrieval and manipulation of data using SQL and Programming Language (PL) PL/SQL programming languages. At the completion of Database Fundamentals and Data Control and Functions, students will be able to create blocks of application code that can be shared by multiple forms, reports and data management applications and to sit for the first of two certification exams.

- 42.0 Demonstrate comprehension that the database management software is a system for organizing the storage unit (or database) according to business needs and rules, through data integrity constraints. – The student will be able to:
- 42.01 Identify the structural elements of a relational database table.
  - 42.02 List and describe the system development life cycle.
  - 42.03 Describe the industry implementation of the relational database management system (RDBMS) and object relational database management system (ORDBMS).
  - 42.04 Explain how SQL and languages that extend SQL are used in the industry product set.
  - 42.05 Identify the advantages of a database management system.
- 43.0 Demonstrate comprehension of aspects of SQL language interface by writing basic SQL statements. – The student will be able to:
- 43.01 List the capabilities of SQL SELECT statements.
  - 43.02 Execute a basic select statement.
  - 43.03 Differentiate between SQL statements and language commands that extend SQL.
- 44.0 Demonstrate proficiency working with columns, characters, and rows in SQL. – The student will be able to:
- 44.01 Apply the concatenation operator to link columns to other columns, arithmetic expressions, or constant values to create a character expression.
  - 44.02 Use column aliases to rename columns in the query result.
  - 44.03 Eliminate duplicate rows in the query result.
  - 44.04 Display the structure of a table.
  - 44.05 Apply SQL syntax to restrict the rows returned from a query.
  - 44.06 Demonstrate application of the WHERE clause syntax.

- 44.07 Construct and produce output using a SQL query containing character strings and date values.
- 45.0 Demonstrate proficiency in using SQL comparison operators. – The student will be able to:
  - 45.01 Apply the proper comparison operator to return a desired result.
  - 45.02 Demonstrate proper use of BETWEEN, IN, and LIKE conditions to return a desired result.
  - 45.03 Distinguish between zero and the value of NULL as unavailable, unassigned, unknown, or inapplicable.
  - 45.04 Explain the use of comparison conditions and NULL.
- 46.0 Demonstrate proficiency in using logical comparisons and precedence rules. – The student will be able to:
  - 46.01 Evaluate logical comparisons to restrict the rows returned based on two or more conditions.
  - 46.02 Apply the rules of precedence to determine the order in which expressions are evaluated and calculated.
  - 46.03 Construct a query to order a results set for single or multiple columns.
  - 46.04 Construct a query to sort a results set in ascending or descending order.
- 47.0 Demonstrate proficiency using SQL single row functions. – The student will be able to:
  - 47.01 Perform calculations on data.
  - 47.02 Modify individual data items.
  - 47.03 Use character, number and date functions in SELECT statements.
  - 47.04 Format data and numbers for display purposes.
  - 47.05 Convert column data types.
- 48.0 Demonstrate proficiency displaying data from multiple tables. – The student will be able to:
  - 48.01 Construct select statements to access data from more than one table using equality and non-equality joins.
  - 48.02 Use outer joins through viewing data that generally does not meet a join condition.
  - 48.03 Join a table to itself.
- 49.0 Demonstrate proficiency aggregating data using GROUP functions. – The student will be able to:
  - 49.01 Identify the available group functions and describe their use.
  - 49.02 Demonstrate the ability to group data through the use of the GROUP BY clause.
  - 49.03 Demonstrate the ability to include or exclude grouped rows by using the HAVING clause.
- 50.0 Demonstrate proficiency utilizing subqueries. – The student will be able to:
  - 50.01 Write a query with an embedded subquery.

- 50.02 Evaluate and perform a multiple-column subquery.
  - 50.03 Describe and explain the behavior of subqueries when null values are retrieved.
  - 50.04 Create a subquery in a FROM clause.
- 51.0 Demonstrate proficiency producing readable output with SQL language interface, reporting tool, and data manipulation language. – The student will be able to:
- 51.01 Produce queries that require an input variable.
  - 51.02 Customize the SQL language interface and reporting environment using SET commands for control.
  - 51.03 Produce more readable output through the use of the column and break commands.
  - 51.04 Describe data manipulation language (DML) and describe various DML statements.
  - 51.05 Utilize data manipulation language (DML) through inserting, updating and deleting rows from a table.
  - 51.06 Control transactions using COMMIT and ROLLBACK statements.
- 52.0 Demonstrate proficiency creating and managing database objects. – The student will be able to:
- 52.01 Describe the main database objects.
  - 52.02 Create tables and alter their definitions.
  - 52.03 Describe the data types that can be used when specifying column definition.
- 53.0 Demonstrate proficiency altering tables and constraints implementing views. – The student will be able to:
- 53.01 Create, drop, rename and truncate tables using SQL.
  - 53.02 Identify and describe various constraints including not null, unique, primary key, foreign key, and check.
  - 53.03 Create and maintain constraints including adding, dropping, enabling, disabling, and cascading.
  - 53.04 Recognize views and explain how they are created, how they retrieve data and how they perform DML operations.
- 54.0 Demonstrate mastery of creating and implementing views, synonyms, indexes and other database objects. – The student will be able to:
- 54.01 Create views, retrieve data through a view, alter the definition of a view and drop a view.
  - 54.02 Categorize information by using Top-N queries to retrieve specified data.
  - 54.03 Identify the features of a sequence and display sequence values using a data dictionary view.
  - 54.04 Identify the characteristics of a cached sequence.
  - 54.05 Modify and remove a sequence using a SQL statement.
  - 54.06 Identify the features of private and public synonyms.
  - 54.07 Identify characteristics of an index and describe different types.
  - 54.08 Create and remove an index using a SQL statement.

- 55.0 Demonstrate ability to control user access and SQL language interface and reporting tool. – The student will be able to:
- 55.01 Identify the features of database security.
  - 55.02 Create users using SQL statements.
  - 55.03 Grant and revoke object privileges using a SQL language interface and reporting tool.
- 56.0 Demonstrate comprehension of bundling features of SQL. – The student will be able to:
- 56.01 List and describe the benefits of extensions to SQL.
  - 56.02 Recognize the basic SQL block and its sections.
  - 56.03 Declare SQL variables and describe their significance.
  - 56.04 Execute a SQL block.
- 57.0 Demonstrate comprehension working with composite data types by writing executable script files. – The student will be able to:
- 57.01 Recognize the significance of the executable section and decide when to use it.
  - 57.02 Write statements in the executable section.
  - 57.03 Describe the rules of nested blocks.
  - 57.04 Identify and utilize appropriate coding conventions.
  - 57.05 Create a script that will select, insert, and update data in a table.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Specialized Database Programming  
**Course Number:** 8206430  
**Course Credit:** 1

**Course Description:**

This course covers PL/SQL, a procedural language extension to SQL. Through an innovative project-based approach, students learn procedural logic constructs such as variables, constants, conditional statements, and iterative controls. After completing this course, the student will have the opportunity to sit for the second of two exams required to earn the Oracle Certified Associate certification and the student will be able to:

58.0 Describe the differences between SQL and PL/SQL. – The student will be able to:

- 58.01 Describe PL/SQL.
- 58.02 Differentiate between SQL and PL/SQL.
- 58.03 Explain the need for and benefits of PL/SQL.

59.0 Create PL/SQL blocks. – The student will be able to:

- 59.01 Describe the structure of a PL/SQL block.
- 59.02 Identify the different types of PL/SQL blocks.
- 59.03 Identify PL/SQL programming environments.
- 59.04 Create and execute an anonymous block.
- 59.05 Output messages in PL/SQL.

60.0 Use variables in PL/SQL. – The student will be able to:

- 60.01 Describe how variables are used in PL/SQL.
- 60.02 Identify the syntax for using variables.
- 60.03 Declare and initialize variables.
- 60.04 Assign new values to variables.

61.0 Recognize lexical units. – The student will be able to:

- 61.01 Describe the types of lexical units in PL/SQL.
- 61.02 Describe identifiers and identify valid and invalid identifiers.
- 61.03 Describe and identify reserved words, delimiters, literals, and comments.

62.0 Recognize data types. – The student will be able to:

- 62.01 Describe the data type categories.
- 62.02 Give examples of scalar, composite, and large object (LOB) data types.
- 62.03 Identify when an object becomes eligible for garbage collection.

63.0 Use scalar data types. – The student will be able to:

- 63.01 Declare and use scalar data types.
  - 63.02 Define guidelines for declaring and initializing variables.
  - 63.03 Describe the benefits of anchoring data types with the %TYPE attribute.
- 64.0 Use various types of joins. – The student will be able to:
- 64.01 Construct and execute SELECT statements using an equijoin.
  - 64.02 Construct and execute SELECT statements using a non-equijoin.
  - 64.03 Construct and execute SELECT statements using an outer join.
  - 64.04 Construct and execute SELECT statements that result in a Cartesian product.
- 65.0 Use SQL group functions and subqueries. – The student will be able to:
- 65.01 Construct and execute an SQL query using group functions to determine a sum total, an average amount, and a maximum value.
  - 65.02 Construct and execute an SQL query that groups data based on specified criteria.
  - 65.03 Construct and execute an SQL query that contains a WHERE clause using a single-row subquery.
  - 65.04 Construct and execute an SQL query that contains a WHERE clause using a multiple-row subquery.
- 66.0 Write PL/SQL executable statements. – The student will be able to:
- 66.01 Construct variable assignment statements.
  - 66.02 Construct statements using built-in SQL functions.
  - 66.03 Differentiate between implicit and explicit data type conversions.
  - 66.04 Describe when implicit data type conversions take place.
  - 66.05 List the drawbacks of implicit data type conversions.
  - 66.06 Construct statements using functions to explicitly convert data types.
  - 66.07 Construct statements using operators.
- 67.0 Use nested blocks and variable scope. – The student will be able to:
- 67.01 Understand the scope and visibility of variables.
  - 67.02 Write nested blocks and qualify variables with labels.
  - 67.03 Describe the scope of an exception.
  - 67.04 Describe the effect of exception propagation in nested blocks.
- 68.0 Use good programming practices. – The student will be able to:
- 68.01 List examples of good programming practices.
  - 68.02 Insert comments into PL/SQL code.
  - 68.03 Follow formatting guidelines when writing code.
- 69.0 Write DML statements to manipulate data. – The student will be able to:
- 69.01 Construct and execute a DML statement to insert data into a table.
  - 69.02 Construct and execute a DML statement to update data in a table.
  - 69.03 Construct and execute a DML statement to delete data from a table.
  - 69.04 Construct and execute a DML statement to merge data into a table.

- 70.0 Retrieve data using PL/SQL. – The student will be able to:
  - 70.01 Identify SQL statements that can be directly included in an executable block.
  - 70.02 Construct and execute an INTO clause to hold values returned by a single-row SELECT statement.
  - 70.03 Construct statements that retrieve data.
  
- 71.0 Manipulate data using PL/SQL. – The student will be able to:
  - 71.01 Construct and execute PL/SQL statements that manipulate data with DML statements.
  - 71.02 Describe when to use implicit or explicit cursors.
  - 71.03 Create code to use SQL implicit cursor attributes to evaluate cursor activity.
  
- 72.0 Use transaction control statements. – The student will be able to:
  - 72.01 Define a transaction and give an example.
  - 72.02 Construct and execute a transaction control statement.
  
- 73.0 Use IF conditional control statements. – The student will be able to:
  - 73.01 Construct and use an IF statement.
  - 73.02 Construct and use an IF-THEN-ELSIF-ELSE statement.
  - 73.03 Create PL/SQL to handle null conditions in an IF statement.
  
- 74.0 Use CASE conditional control statements. – The student will be able to:
  - 74.01 Construct and use CASE statements.
  - 74.02 Construct and use CASE expressions.
  - 74.03 Include syntax to handle null conditions in a CASE statement.
  - 74.04 Include syntax to handle Boolean conditions in IF and CASE statements.
  
- 75.0 Use basic LOOP iterative control statements. – The student will be able to:
  - 75.01 Describe the types of LOOP statements and their uses.
  - 75.02 Create PL/SQL containing a basic loop and an EXIT statement.
  - 75.03 Create PL/SQL containing a basic loop and an EXIT statement with conditional termination.
  
- 76.0 Use WHILE and FOR loop iterative control statements. – The student will be able to:
  - 76.01 Construct and use the WHILE looping construct.
  - 76.02 Construct and use the FOR looping construct.
  - 76.03 Describe when a WHILE loop is used.
  - 76.04 Describe when a FOR loop is used.
  
- 77.0 Use nested loop iterative control statements. – The student will be able to:
  - 77.01 Construct and execute PL/SQL using nested loops.
  - 77.02 Evaluate a nested loop construct and identify the exit point.

- 78.0 Use explicit cursors. – The student will be able to:
  - 78.01 List the guidelines for declaring and controlling explicit cursors.
  - 78.02 Create PL/SQL code to open a cursor and fetch a piece of data into a variable.
  - 78.03 Use a simple loop to fetch multiple rows from a cursor.
  - 78.04 Create PL/SQL code to close a cursor.
  
- 79.0 Use explicit cursor attributes. – The student will be able to:
  - 79.01 Define a record structure using the %ROWTYPE attribute.
  - 79.02 Create PL/SQL code to process the row of an active set using record types in cursors.
  - 79.03 Use cursor attributes to retrieve information about the state of an explicit cursor.
  
- 80.0 Use CURSOR FOR loops. – The student will be able to:
  - 80.01 List and explain the benefits of using Cursor FOR loops.
  - 80.02 Create PL/SQL code to declare a cursor and manipulate it in a FOR loop.
  - 80.03 Create PL/SQL code containing a Cursor FOR loop using a subquery.
  
- 81.0 Use cursors with parameters. – The student will be able to:
  - 81.01 List the benefits of using parameters with cursors.
  - 81.02 Create PL/SQL code to declare and manipulate a cursor with a parameter.
  
- 82.0 Use cursors for UPDATE transactions. – The student will be able to:
  - 82.01 Create PL/SQL code to lock rows before an update using the appropriate clause.
  - 82.02 Explain the effect of using NOWAIT in an update cursor declaration.
  - 82.03 Create PL/SQL code to use the current row of the cursor in an UPDATE or DELETE statement.
  
- 83.0 Use multiple cursors. – The student will be able to:
  - 83.01 Explain the need for using multiple cursors to produce multilevel reports.
  - 83.02 Create PL/SQL code to declare and manipulate multiple cursors within nested loops.
  - 83.03 Create PL/SQL code to declare and manipulate multiple cursors using parameters.
  
- 84.0 Handle exceptions. – The student will be able to:
  - 84.01 Describe the advantages of including exception handling code.
  - 84.02 Describe the purpose of an EXCEPTION section in a PL/SQL block.
  - 84.03 Create PL/SQL code to include an EXCEPTION section.
  - 84.04 List the guidelines for exception handling.
  
- 85.0 Trap Oracle server exceptions. – The student will be able to:

- 85.01 Distinguish between errors defined by the Oracle Server and those defined by the programmer.
  - 85.02 Differentiate between errors that are handled implicitly and explicitly by the Oracle Server.
  - 85.03 Write PL/SQL code to trap a predefined Oracle Server error.
  - 85.04 Write PL/SQL code to trap a non-predefined Oracle Server error.
  - 85.05 Write PL/SQL code to identify an exception by error code and by error message.
- 86.0 Trap user-defined exceptions. – The student will be able to:
- 86.01 Write PL/SQL code to name a user-defined exception.
  - 86.02 Write PL/SQL code to raise an exception.
  - 86.03 Write PL/SQL code to handle a raised exception.
  - 86.04 Write PL/SQL code to use RAISE\_APPLICATION\_ERROR.
- 87.0 Create procedures. – The student will be able to:
- 87.01 Differentiate between anonymous blocks and subprograms.
  - 87.02 Identify the benefits of using subprograms.
  - 87.03 Describe a stored procedure.
  - 87.04 Create a procedure.
  - 87.05 Describe how a stored procedure is invoked.
- 88.0 Use parameters in procedures. – The student will be able to:
- 88.01 Describe how parameters contribute to a procedure.
  - 88.02 Define a parameter.
  - 88.03 Create a procedure using a parameter.
  - 88.04 Invoke a procedure that has parameters.
  - 88.05 Distinguish between formal and actual parameters.
- 89.0 Pass parameters. – The student will be able to:
- 89.01 List the types of parameter modes.
  - 89.02 Create a procedure that passes parameters.
  - 89.03 Identify three methods for passing parameters.
  - 89.04 Describe the DEFAULT option for parameters.
- 90.0 Create stored functions. – The student will be able to:
- 90.01 Describe the difference between a stored procedure and a stored function.
  - 90.02 Create a PL/SQL block containing a function.
  - 90.03 Identify ways in which functions may be invoked.
  - 90.04 Create a PL/SQL block that invokes a function that has parameters.
- 91.0 Use functions in SQL statements. – The student will be able to:
- 91.01 Describe where user-defined functions can be called from within an SQL statement.
  - 91.02 Describe the restrictions on calling functions from SQL statements.
  - 91.03 Describe the purpose of the Data Dictionary.

- 91.04 Differentiate between the three types of Data Dictionary views.
- 91.05 Write SQL SELECT statements to retrieve information from the Data Dictionary.
- 91.06 Explain the use of DICTIONARY as a Data Dictionary search engine.
  
- 92.0 Manage procedures and functions. – The student will be able to:
  - 92.01 Describe how exceptions are propagated.
  - 92.02 Remove a function and a procedure.
  - 92.03 Use Data Dictionary views to identify and manage stored procedures.
  
- 93.0 Manage object privileges. – The student will be able to:
  - 93.01 List and explain several object privileges.
  - 93.02 Explain the function of the EXECUTE object privilege.
  - 93.03 Write SQL statements to grant and revoke object privileges.
  
- 94.0 Use invoker's rights. – The student will be able to:
  - 94.01 Contrast invoker's rights with definer's rights.
  - 94.02 Create a procedure that uses invoker's rights.
  
- 95.0 Create packages. – The student will be able to:
  - 95.01 Describe a package, its components, and the reasons for use.
  - 95.02 Create packages containing related variables, cursors, constants, exceptions, procedures, and functions.
  - 95.03 Create a PL/SQL block that invokes a package construct.
  
- 96.0 Manage package constructs. – The student will be able to:
  - 96.01 Explain the difference between public and private package constructs.
  - 96.02 Designate a package construct as either public or private.
  - 96.03 Specify the syntax to drop a package.
  - 96.04 Identify Data Dictionary views used to manage packages.
  - 96.05 Identify the guidelines for using packages.
  
- 97.0 Use advanced package concepts. – The student will be able to:
  - 97.01 Write packages that use the overloading feature.
  - 97.02 Write packages that use forward declarations.
  - 97.03 Explain the purpose of a package initialization block.
  - 97.04 Identify restrictions on using packaged functions in SQL statements.
  
- 98.0 Manage persistent state of package variables. – The student will be able to:
  - 98.01 Identify persistent states of package variables.
  - 98.02 Control the persistent state of a package cursor.
  
- 99.0 Use Oracle-supplied packages. – The student will be able to:
  - 99.01 Describe two common uses for the DBMS\_OUTPUT package.

- 99.02 Use the syntax to specify messages for the DBMS\_OUTPUT package.
- 99.03 Describe the purpose for the UTL\_FILE package.
- 99.04 Identify the exceptions used in conjunction with the UTL\_FILE package.
- 100.0 Understand dynamic SQL. – The student will be able to:
  - 100.01 Identify the stages through which all SQL statements pass.
  - 100.02 Describe the reasons for using dynamic SQL to create an SQL statement.
  - 100.03 List four PL/SQL statements supporting Native Dynamic SQL.
  - 100.04 Describe the benefits of Execute Immediate over DBMS\_SQL for Dynamic SQL.
- 101.0 Understand triggers. – The student will be able to:
  - 101.01 Describe database triggers and their uses.
  - 101.02 Differentiate between a database trigger and an application trigger.
  - 101.03 List the guidelines for using triggers.
  - 101.04 Compare and contrast database triggers and stored procedures.
- 102.0 Create DML triggers. – The student will be able to:
  - 102.01 Create a DML trigger and identify its components.
  - 102.02 Create a statement level trigger.
  - 102.03 Describe the trigger firing sequence options.
  - 102.04 Create a DML trigger that uses conditional predicates.
  - 102.05 Create a row level trigger.
  - 102.06 Create a row level trigger that uses OLD and NEW qualifiers.
  - 102.07 Create an INSTEAD OF trigger.
- 103.0 Create DDL and database event triggers. – The student will be able to:
  - 103.01 Describe the events that cause DDL and database event triggers to fire.
  - 103.02 Create a trigger for a DDL statement.
  - 103.03 Create a trigger for a database event.
  - 103.04 Describe the functionality of the CALL statement.
  - 103.05 Describe the cause of a mutating table.
- 104.0 Manage triggers. – The student will be able to:
  - 104.01 View trigger information in the Data Dictionary.
  - 104.02 Disable and enable a database trigger.
  - 104.03 Remove a trigger from the database.
- 105.0 Use large object data types. – The student will be able to:
  - 105.01 Compare and contrast LONG and LOB data types.
  - 105.02 Describe LOB data types and how they are used.
  - 105.03 Differentiate between internal and external LOBs.
  - 105.04 Create and maintain LOB data types.
  - 105.05 Migrate data from LONG to LOB.
- 106.0 Manage BFILEs. – The student will be able to:

- 106.01 Define BFILEs and the BFILE column data type.
- 106.02 Create directory objects and view them in the Data Dictionary.
- 106.03 Manage and manipulate BFILEs using BFILENAME and DBMS\_LOB.
- 107.0 Manage indexes. – The student will be able to:
- 107.01 Create and manipulate user-defined PL/SQL records.
- 107.02 Create an INDEX BY table.
- 107.03 Create an INDEX BY table of records.
- 107.04 Describe the difference between records, tables, and tables of records.
- 108.0 Manage dependencies. – The student will be able to:
- 108.01 Describe the implications of procedural dependencies.
- 108.02 Contrast dependent objects and referenced objects.
- 108.03 View dependency information in the Data Dictionary.
- 108.04 Use the UTLDTREE script to create the objects required to display dependencies.
- 108.05 Use the IDEPTREE and DEPTREE views to display dependencies.
- 108.06 Describe when automatic recompilation occurs.
- 108.07 Describe how to minimize dependency failures.
- 128.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 128.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 128.02 Locate, organize and reference written information from various sources. CM 3.0
- 128.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 128.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 128.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 128.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 128.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 129.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 129.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 129.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 129.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 129.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 130.0 Use information technology tools. – The student will be able to:
- 130.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0

- 130.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 130.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 130.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 131.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 131.01 Describe the nature and types of business organizations. SY 1.0
- 131.02 Explain the effect of key organizational systems on performance and quality.
- 131.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 131.04 Explain the impact of the global economy on business organizations.
- 134.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 134.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 134.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 134.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 134.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Specialized Database Applications  
**Course Number:** 8206440  
**Course Credit:** 1

**Course Description:**

This is the final course in the Database and Programming Essentials program and is designed to teach specialized database operations and utilization of SQL language for database administration and maintenance.

109.0 Program a database application. – The student will be able to:

- 109.01 Utilize loop statements.
- 109.02 Given a scenario, use arithmetic, comparison, and pattern-matching operators.
- 109.03 Create user-defined functions.
- 109.04 Utilize common built-in functions.
- 109.05 Declare variables in modules and procedures.
- 109.06 Declare arrays, and initialize elements of arrays.
- 109.07 Declare and use object variables and collections, and use their associated properties and methods.
- 109.08 Declare symbolic constants, and make them available locally or publicly.
- 109.09 Respond to events.

110.0 Utilize the basic concepts of database design. – The student will be able to:

- 110.01 Apply basic concepts of normalization.
- 110.02 Utilize the cascade update and cascade delete options.

111.0 Utilize SQL and UNION queries. – The student will be able to:

- 111.01 Utilize SQL to write common queries.
- 111.02 Refer to objects by using SQL.
- 111.03 Utilize union queries.

112.0 Implement program statements using objects. – The student will be able to:

- 112.01 Determine when to use data access objects.
- 112.02 Differentiate between objects and collections.
- 112.03 Write statements that access and modify database objects.
- 112.04 Utilize data access objects.
- 112.05 Select appropriate methods and property settings for use with specified objects.

113.0 Utilize debugging tools and write error handlers. – The student will be able to:

- 113.01 Trap errors.
- 113.02 Utilize debugging tools to suspend program execution, and to examine, step through, and reset execution of code.

- 113.03 Debug code samples.
- 113.04 Utilize the Debugger to monitor variable values.
- 113.05 Write an error handler.
  
- 114.0 Demonstrate file I/O. – The student will be able to:
  - 114.01 Read from files.
  - 114.02 Write to files.
  - 114.03 Utilize record locking.
  
- 115.0 Create forms and identify all the properties of a form. – The student will be able to:
  - 115.01 Choose form-specific and report-specific properties to set.
  - 115.02 Choose control properties to set.
  - 115.03 Assign event-handling procedures to controls in a form.
  - 115.04 Define and create form and report modules.
  - 115.05 Identify the scope of a form or report module.
  - 115.06 Open multiple instances of a form, and refer to them.
  - 115.07 Assign values to form properties.
  - 115.08 Use form methods.
  
- 116.0 Manipulate data using object models – The student will be able to:
  - 116.01 Connect to a data source.
  - 116.02 Open a recordset.
  - 116.03 Insert, update, delete and find data.
  
- 117.0 Develop custom controls. – The student will be able to:
  - 117.01 Set properties for custom controls.
  - 117.02 Customize user interface controls.
  
- 118.0 Utilize API functions. – The student will be able to:
  - 118.01 Properly declare functions.
  - 118.02 Use the by value and by reference parameters.
  
- 119.0 Demonstrate database replication and implement database replication using programming tools. – The student will be able to:
  - 119.01 Make a database replicable.
  - 119.02 View a synchronization schedule.
  - 119.03 Explain the purpose of the Replication ID.
  - 119.04 Explain how synchronization conflicts are resolved.
  - 119.05 Identify the advantages of using replication of synchronization.
  - 119.06 Identify the changes that the database engine makes when it converts a nonreplicable database into replicable database.
  
- 120.0 Analyze and implement security options. – The student will be able to:
  - 120.01 Analyze a scenario, and recommend an appropriate type of security.

- 120.02 Explain the steps for implementing security.
- 120.03 Analyze code to ensure that it sets security options.
- 120.04 Write code to implement security options.
- 121.0 Implement client/server applications. – The student will be able to:
- 121.01 Demonstrate SQL pass through queries and application queries.
- 121.02 Access external data by using ODBC.
- 121.03 Trap errors that are generated by the server.
- 121.04 Optimize connections.
- 121.05 Optimize performance for a given client/server application.
- 122.0 Optimize the performance of a database. – The student will be able to:
- 122.01 Differentiate between single-field and multiple-field indexes.
- 122.02 Optimize queries.
- 122.03 Restructure queries to allow faster execution.
- 122.04 Optimize performance in distributed applications.
- 122.05 Optimize performance for client/server applications.
- 123.0 Perform application distribution. – The student will be able to:
- 123.01 Prepare an application for distribution.
- 123.02 Analyze various methods to distribute a client/server application.
- 123.03 Distribute custom controls with an application.
- 123.04 Provide online help.
- 124.0 Test and debug databases. – The student will be able to:
- 124.01 Implement error handling.
- 124.02 Test and debug library databases.
- 132.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 132.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 132.02 Explain emergency procedures to follow in response to workplace accidents.
- 132.03 Create a disaster and/or emergency response plan. SHE 2.0
- 133.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 133.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 133.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 133.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 133.04 Employ mentoring skills to inspire and teach others. LT 5.0

135.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:

- |   |          |
|---|----------|
| 135.01 Identify and demonstrate positive work behaviors needed to be employable.        | ECD 1.0  |
| 135.02 Develop personal career plan that includes goals, objectives, and strategies.    | ECD 2.0  |
| 135.03 Examine licensing, certification, and industry credentialing requirements.       | ECD 3.0  |
| 135.04 Maintain a career portfolio to document knowledge, skills, and experience.       | ECD 5.0  |
| 135.05 Evaluate and compare employment opportunities that match career goals.           | ECD 6.0  |
| 135.06 Identify and exhibit traits for retaining employment.                            | ECD 7.0  |
| 135.07 Identify opportunities and research requirements for career advancement.         | ECD 8.0  |
| 135.08 Research the benefits of ongoing professional development.                       | ECD 9.0  |
| 135.09 Examine and describe entrepreneurship opportunities as a career planning option. | ECD 10.0 |

136.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:

- |   |        |
|---|--------|
| 136.01 Identify and describe the services and legal responsibilities of financial institutions. | FL 2.0 |
| 136.02 Describe the effect of money management on personal and career goals.                    | FL 3.0 |
| 136.03 Develop a personal budget and financial goals.   | FL 3.1 |
| 136.04 Complete financial instruments for making deposits and withdrawals.                      | FL 3.2 |
| 136.05 Maintain financial records.  | FL 3.3 |
| 136.06 Read and reconcile financial statements.   | FL 3.4 |
| 136.07 Research, compare and contrast investment opportunities.                                 |        |

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Business Computer Programming  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8206500	B070320
CIP Number	0511020202	0511020202
Grade Level	9-12, 30, 31	30, 31
Standard Length	8 credit hours	1200 hours
Teacher Certification	BUS ED 1 @2 VOE @7 TEACH CBE @7 BUS DP @7 G TEC ELEC \$7 G ELECT DP @7 G BOOKKEEPIN @4 @7 G COMPU SCI 6	BUS ED 1 @2 VOE @7 TEACH CBE @7 BUS DP @7 G TEC ELEC \$7 G ELECT DP @7 G BOOKKEEPIN @4 @7 G COMPU SCI 6
CTSO	FBLA BPA	Phi Beta Lambda BPA
SOC Codes (all applicable)	15-1041, 15-1021	15-1041, 15-1021
Facility Code	212 <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)	
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Statewide Articulation	<a href="http://www.fldoe.org/workforce/dwdframe/artic_frame.asp">http://www.fldoe.org/workforce/dwdframe/artic_frame.asp</a>	
Basic Skills Level	N/A	Mathematics: 9 Language: 9 Reading: 9

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to

prepare for further education and careers in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster. This program offers a broad foundation of knowledge and skills to prepare students for employment in computer programming positions.

The content includes but is not limited to converting problems into detailed plans; writing code into computer language; testing, monitoring, debugging, documenting, and maintaining computer programs; and designing programs for specific uses and machines.

### Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and four additional occupational completion points. Secondary or postsecondary students who have previously completed the Business Technology Education Core will not have to repeat the core. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1041
B	CTS0041	Computer Programmer Assistant	300	15-1021
C	CTS0042	Junior Programmer	300	15-1021
D	CTS0043	Junior Programmer II	300	15-1021
E	CTS0044	Computer Programmer	150	15-1021

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2

OCP	Course Number	Course Title	Length	SOC Code	Level
B	8206010	Business Computer Programming 1	1 credit	15-1021	2
	8206020	Business Computer Programming 2	1 credit		2
C	8206030	Business Computer Programming 3	1 credit	15-1021	2
	8206040	Business Computer Programming 4	1 credit		2
D	8206050	Business Computer Programming 5	1 credit	15-1021	3
	8206060	Business Computer Programming 6	1 credit		3
E	8206070	Business Computer Programming 7	1 credit	15-1021	3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

## **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is

expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B070320) has a statewide articulation agreement approved by the Florida State Board of Education:

1. Computer Programming & Analysis AS/AAS (1511020100/0511020100) – 15 credits

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Core Standards**

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.

- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.

- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

### **Program Standards**

- 25.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal develop, and life goals.
- 26.0 Participate in work-based learning experiences.
- 27.0 Identify functions of information processing.
- 28.0 Identify functions of computers.
- 29.0 Test programs.
- 30.0 Plan program design.
- 31.0 Code programs.
- 32.0 Perform program maintenance.
- 33.0 Create and maintain documentation.
- 34.0 Evaluate assigned business computer programming tasks.
- 35.0 Develop an understanding of basic financial business concepts.
- 36.0 Understand the integrated nature of corporate systems.
- 37.0 Demonstrate an understanding of operating systems, environments, and platforms.
- 38.0 Develop an awareness of software quality assurance.
- 39.0 Implement enhanced program structures.
- 40.0 Develop an understanding of programming techniques and concepts.
  
- 41.0 Demonstrate language arts knowledge and skills.
- 42.0 Demonstrate mathematics knowledge and skills.
- 43.0 Demonstrate science knowledge and skills.
- 44.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 45.0 Solve problems using critical thinking skills, creativity and innovation.
- 46.0 Use information technology tools.
- 47.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 48.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 49.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 50.0 Describe the importance of professional ethics and legal responsibilities.
- 51.0 Explain the importance of employability skill and entrepreneurship skills.
- 52.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Business Computer Programming**  
**PSAV Number: B070320**

**Course Number: OTA0040**  
**Occupational Completion Point: A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 11.0 Perform e-mail activities. – The student will be able to:
  - 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
- 12.0 Demonstrate operating systems. – The student will be able to:
  - 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers Standards:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
- 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
- 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
- 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
- 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
- 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
- 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
- 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
- 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
- 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
- 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
- 04.04 Demonstrate proficiency using search engines and search tools.
- 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
- 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
- 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
- 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

OR

**Introduction to Information Technology Standards:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Use professional business vocabulary appropriate for information technology environments.
  - 02.03 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.04 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.05 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.06 Apply the writing process to the creation of appropriate documents following designated business formats.

- 02.07 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, and presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

- 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
  - 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
  - 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
  - 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
  - 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
  - 12.01 Describe e-mail capabilities and functions.

- 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, pdf, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).

- 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:

- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: CTS0041**  
**Occupational Completion Point: B**  
**Computer Programmer Assistant – 300 Hours – SOC Code 15-1021**

- 25.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 25.01 Investigate specific job opportunities in single language computer programming in the local job market.
  - 25.02 Identify tasks performed by computer programming personnel.
  - 25.03 Identify alternative career paths for computer programmers.
  - 25.04 Investigate the need for additional training for computer programmers.
- 26.0 Participate in work-based learning experiences. – The student will be able to:
- 26.01 Participate in work-based learning experiences in a computer programming environment.
  - 26.02 Discuss the use of technology in a computer programming environment.
  - 26.03 Compare and contrast programming languages used in a computer programming environment.
- 27.0 Identify functions of information processing. – The student will be able to:
- 27.01 Identify characteristics of high-level languages.
  - 27.02 Identify characteristics of operating systems.
  - 27.03 Identify characteristics of sequential, indexed-sequential, random, and direct files.
  - 27.04 Identify characteristics of a network.
  - 27.05 Identify needs for software development in business.
  - 27.06 Identify causes of software development problems in business.
  - 27.07 Identify most appropriate languages for solving business problems.
  - 27.08 Describe the difference between a database management system and a file management system.
  - 27.09 Manipulate data between numbering systems.
  - 27.10 Identify how numeric and non-numeric data are represented in memory.
  - 27.11 Distinguish among integer, fixed-point, and floating-point calculations.
- 28.0 Identify functions of computers. – The student will be able to:
- 28.01 Identify computer hardware and software.
  - 28.02 Identify generic data processing terminology.
  - 28.03 Identify advanced data processing terminology.
  - 28.04 Sequence and define the steps in the input, processing, output, and storage cycle.
  - 28.05 Identify examples of emerging hardware technology.
  - 28.06 Illustrate various configurations of hardware components.
- 29.0 Test programs. – The student will be able to:
- 29.01 Develop a plan for testing programs.

- 29.02 Develop data for use in program testing.
  - 29.03 Perform debugging activities.
  - 29.04 Distinguish among the different types of program and design errors.
  - 29.05 Evaluate program test results.
  - 29.06 Execute programs and subroutines as they relate to the total application.
  - 29.07 Use trace routines of compilers to assist in program debugging.
  - 29.08 Compile and run programs.
- 30.0 Plan program design. – The student will be able to:
- 30.01 Formulate a plan to determine program specifications individually or in groups.
  - 30.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
  - 30.03 Design programs to solve problems using problem-solving strategies.
  - 30.04 Prepare proper input/output layout specifications.
  - 30.05 Examine existing utility programs and subroutines for use with other programs.
  - 30.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 31.0 Code programs. – The student will be able to:
- 31.01 Utilize reference manuals.
  - 31.02 Write programs according to recognized programming standards.
  - 31.03 Write internal documentation statements as needed in the program source code.
  - 31.04 Code programs in high-level languages for business applications.
  - 31.05 Write code that accesses sequential, indexed sequential, random, and direct files.
  - 31.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).
  - 31.07 Enter and modify source code using a program language editor.
  - 31.08 Code routines within programs that validate input data.
  - 31.09 Use the rounding function in calculations within programs.
- 32.0 Perform program maintenance. – The student will be able to:
- 32.01 Review requested modification of programs and establish a plan of action.
  - 32.02 Design needed modifications in conformance with established standards.
  - 32.03 Code, test, and debug modifications prior to updating production code.
  - 32.04 Update production programs and documentation with changes.
  - 32.05 Analyze output to identify and annotate errors or enhancements.
- 33.0 Create and maintain documentation. – The student will be able to:
- 33.01 Write documentation to assist operators and end-users.
  - 33.02 Follow established documentation standards.
  - 33.03 Update existing documentation to reflect program changes.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
- 34.01 Estimate the time necessary to write a program.
- 35.0 Develop an understanding of basic financial business concepts. – The student will be

able to:

- 35.01 Identify generic accounting terminology as it relates to information systems.
- 35.02 Identify ways in which transactions interact with various business systems.

36.0 Understand the integrated nature of corporate systems. – The student will be able to:

- 36.01 Analyze the flow of information throughout the various departments in a business.
- 36.02 Explain how programs written for one department affect other departments in the business.

37.0 Demonstrate an understanding of operating systems, environments, and platforms. – The student will be able to:

- 37.01 Identify various types of operating systems/environments for different computer hardware platforms.
- 37.02 Assess and analyze the functions of different operating systems.
- 37.03 Distinguish between different types of computer hardware platforms.

38.0 Develop an awareness of software quality assurance. – The student will be able to:

- 38.01 Identify the legal and social consequences of errors in software.
- 38.02 Describe copyright and other laws that relate to software theft and misuse.
- 38.03 Describe software security measures to protect computer systems and data from unauthorized use and tampering (e.g., physical security, passwords, virus protection/prevention).

39.0 Implement enhanced program structures. – The student will be able to:

- 39.01 Write programs that incorporate multi-level subtotals and page breaks.
- 39.02 Write programs that include tables or arrays and routines for data entry and lookup.
- 39.03 Write routines to sort arrays.
- 39.04 Write programs that sort records in files.
- 39.05 Write programs to create and maintain a master file.
- 39.06 Write programs to process transactions.
- 39.07 Write programs that use iteration.
- 39.08 Write programs that read and write sequential files.
- 39.09 Write programs that read and write indexed-sequential files.
- 39.10 Write programs that read and write random files.

40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:

- 40.01 Identify the basic constructs used in structured programming.
- 40.02 Distinguish between top-down and bottom-up design.
- 40.03 Distinguish between iteration and recursion.
- 40.04 Evaluate Boolean expressions.
- 40.05 Distinguish between interpreters and compilers.

- 41.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 41.01 Locate, comprehend and evaluate key elements of oral and written information. AF2.4
- 41.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF2.5
- 41.03 Present information formally and informally for specific purposes and audiences. AF2.9
- 42.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF3.0
- 42.01 Demonstrate knowledge of arithmetic operations. AF3.2
- 42.02 Analyze and apply data and measurements to solve problems and interpret documents. AF3.4
- 42.03 Construct charts/tables/graphs using functions and data. AF3.5
- 43.0 Demonstrate science knowledge and skills. – The student will be able to: AF4.0
- 43.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF4.1
- 43.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF4.3
- 44.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 44.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 44.02 Locate, organize and reference written information from various sources. CM 3.0
- 44.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 44.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 44.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 44.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 44.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 45.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 45.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS1.0
- 45.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 45.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 45.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 46.0 Use information technology tools. – The student will be able to:
- 46.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0

- 46.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 46.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 46.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 47.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 47.01 Describe the nature and types of business organizations. SY 1.0
- 47.02 Explain the effect of key organizational systems on performance and quality.
- 47.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 47.04 Explain the impact of the global economy on business organizations.
- 50.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 50.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 50.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR1.1
- 50.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR1.2
- 50.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0042**  
**Occupational Completion Point: C**  
**Junior Programmer – 300 Hours – SOC Code 15-1021**

- 26.0 Participate in work-based learning experiences. – The student will be able to:
- 26.01 Participate in work-based learning experiences in a computer programming environment.
- 26.02 Compare and contrast programming languages used in a computer programming environment.
- 26.03 Discuss the management/supervisory skills needed in a computer programming environment.
- 27.0 Identify functions of information processing. – The student will be able to:
- 27.01 Identify the advantages and disadvantages of blocking and buffering when accessing data on tape and disk storage.
- 27.02 Choose appropriate storage of numeric values to insure precision needed for calculations (e.g., integer, fixed-point, floating-point).
- 28.0 Identify functions of computers. – The student will be able to:
- 28.01 Identify the advantages and disadvantages of virtual memory.

- 29.0 Test programs. – The student will be able to:
  - 29.01 Develop a plan for system integration testing.
- 30.0 Plan program design. – The student will be able to:
  - 30.01 Plan interfaces for systems integration.
- 31.0 Code programs. – The student will be able to:
  - 31.01 Access external files in a client/server environment.
- 32.0 Perform program maintenance. – The student will be able to:
  - 32.01 Modify or create new programs for vendor supplied applications.
  - 32.02 Use a computer system with current commercial-end application software to solve problems within an organizational environment.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
  - 34.01 Utilize and apply project and time management tools to control systems development.
  - 34.02 Analyze computer resources necessary to run a program.
- 38.0 Develop an awareness of software quality assurance. – The student will be able to:
  - 38.01 Evaluate performance, functionality, and validity of various software packages.
- 39.0 Implement enhanced program structures. – The student will be able to:
  - 39.01 Write programs to import/export data from external sources.
  - 39.02 Write routines that incorporate “help” text.
  - 39.03 Write interactive programs.
  - 39.04 Design screen layouts for use in interactive programs.
- 40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
  - 40.01 Identify object-oriented concepts and provide examples of objects in an object-oriented language.
  - 40.02 Describe development methodologies, programming and system languages, database technologies, and data communication.
- 48.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
  - 48.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 48.02 Explain emergency procedures to follow in response to workplace accidents.

- 48.03 Create a disaster and/or emergency response plan. SHE 2.0
- 49.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 49.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 49.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 49.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 49.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 51.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 51.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 51.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 51.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 51.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 51.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 51.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 51.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 51.08 Research the benefits of ongoing professional development. ECD 9.0
- 51.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 52.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 52.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 52.02 Describe the effect of money management on personal and career goals. FL 3.0
- 52.03 Develop a personal budget and financial goals. FL 3.1
- 52.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 52.05 Maintain financial records. FL 3.3
- 52.06 Read and reconcile financial statements. FL 3.4
- 52.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0043**  
**Occupational Completion Point – D**  
**Junior Programmer II – 300 Hours – SOC Code 15-1021**

- 29.0 Test programs. – The student will be able to:
- 29.01 Develop a plan for testing programs.
- 29.02 Develop a plan for system integration testing.
- 29.03 Develop data for use in program testing.
- 29.04 Perform debugging activities.
- 29.05 Distinguish among the different types of program and design errors.
- 29.06 Evaluate program test results.
- 29.07 Execute programs and subroutines as they relate to the total application.

- 29.08 Use trace routines of compilers to assist in program debugging.
- 29.09 Compile and run programs.
- 30.0 Plan program design. – The student will be able to:
  - 30.01 Formulate a plan to determine program specifications individually or in groups.
  - 30.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
  - 30.03 Design programs to solve problems using problem-solving strategies.
  - 30.04 Prepare proper input/output layout specifications.
  - 30.05 Examine existing utility programs and subroutines for use with other programs.
  - 30.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 31.0 Code programs. – The student will be able to:
  - 31.01 Utilize reference manuals.
  - 31.02 Write programs according to recognized programming standards.
  - 31.03 Write internal documentation statements as needed in the program source code.
  - 31.04 Code programs in high-level languages for business applications.
  - 31.05 Write code that accesses sequential, indexed sequential, random, and direct files.
  - 31.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).
  - 31.07 Enter and modify source code using a program language editor.
  - 31.08 Code routines within programs that validate input data.
  - 31.09 Use the rounding function in calculations within programs.
- 32.0 Perform program maintenance. – The student will be able to:
  - 32.01 Review requested modification of programs and establish a plan of action.
  - 32.02 Design needed modifications in conformance with established standards.
  - 32.03 Code, test, and debug modifications prior to updating production code.
  - 32.04 Update production programs and documentation with changes.
  - 32.05 Analyze output to identify and annotate errors or enhancements.
  - 32.06 Modify or create new programs for vendor supplied applications.
  - 32.07 Use a computer system with current commercial-end application software to solve problems within an organizational environment.
- 33.0 Create and maintain documentation. – The student will be able to:
  - 33.01 Write documentation to assist operators and end-users.
  - 33.02 Follow established documentation standards.
  - 33.03 Update existing documentation to reflect program changes.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
  - 34.01 Utilize and apply project and time management tools to control systems development.
  - 34.02 Analyze computer resources necessary to run a program.
- 37.0 Demonstrate an understanding of operating systems, environments, and platforms. –

The student will be able to:

- 37.01 Assess and analyze the functions of different operating systems.
- 37.02 Assess and analyze the program development and execution utilities of relevant operating systems.

38.0 Develop an awareness of software quality assurance. – The student will be able to:

- 38.01 Evaluate performance, functionality, and validity of various software packages.

39.0 Implement enhanced program structures. – The student will be able to:

- 39.01 Write programs that incorporate multi-level subtotals and page breaks.
- 39.02 Write programs that include tables or arrays and routines for data entry and lookup.
- 39.03 Write routines to sort arrays.
- 39.04 Write programs that sort records in files.
- 39.05 Write programs to create and maintain a master file.
- 39.06 Write programs to process transactions.
- 39.07 Write programs to import/export/convert data from external sources.
- 39.08 Write programs that use iteration.
- 39.09 Write routines that incorporate “help” text.
- 39.10 Write programs that read and write sequential files.
- 39.11 Write programs that read and write indexed-sequential files.
- 39.12 Write programs that read and write random files.
- 39.13 Write interactive programs.
- 39.14 Design screen layouts for use in interactive programs.
- 39.15 Write programs using object-oriented languages.

40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:

- 40.01 Describe development methodologies, programming and system languages, database technologies, and data communication.

**Course Number: CTS0044**

**Occupational Completion Point – E**

**Computer Programmer – 150 Hours – SOC Code 15-1021**

29.0 Test programs. – The student will be able to:

- 29.01 Develop a plan for testing programs.
- 29.02 Develop a plan for system integration testing.
- 29.03 Develop data for use in program testing.
- 29.04 Perform debugging activities.
- 29.05 Distinguish among the different types of program and design errors.
- 29.06 Evaluate program test results.
- 29.07 Execute programs and subroutines as they relate to the total application.
- 29.08 Use trace routines of compilers to assist in program debugging.
- 29.09 Compile and run programs.

- 30.0 Plan program design. – The student will be able to:
- 30.01 Formulate a plan to determine program specifications individually or in groups.
  - 30.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
  - 30.03 Design programs to solve problems using problem-solving strategies.
  - 30.04 Prepare proper input/output layout specifications.
  - 30.05 Examine existing utility programs and subroutines for use with other programs.
  - 30.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 31.0 Code programs. – The student will be able to:
- 31.01 Utilize reference manuals.
  - 31.02 Write programs according to recognized programming standards.
  - 31.03 Write internal documentation statements as needed in the program source code.
  - 31.04 Code programs in high-level languages for business applications.
  - 31.05 Write code that accesses sequential, indexed sequential, random, and direct files.
  - 31.06 Code programs using logical statements (e.g., If-Then-Else, Do-While).
  - 31.07 Enter and modify source code using a program language editor.
  - 31.08 Code routines within programs that validate input data.
  - 31.09 Use the rounding function in calculations within programs.
- 32.0 Perform program maintenance. – The student will be able to:
- 32.01 Review requested modification of programs and establish a plan of action.
  - 32.02 Design needed modifications in conformance with established standards.
  - 32.03 Code, test, and debug modifications prior to updating production code.
  - 32.04 Update production programs and documentation with changes.
  - 32.05 Analyze output to identify and annotate errors or enhancements.
- 39.0 Implement enhanced program structures. – The student will be able to:
- 39.01 Write programs that include tables or arrays and routines for data entry and lookup.
  - 39.02 Write programs that use iteration.
  - 39.03 Write routines that incorporate “help” text.
  - 39.04 Write programs that read and write sequential files.
  - 39.05 Write programs that read and write indexed-sequential files.
  - 39.06 Write programs that read and write random files.
  - 39.07 Write interactive programs.
  - 39.08 Design screen layouts for use in interactive programs.
  - 39.09 Write programs using object-oriented languages.
  - 39.10 Write programs that include data structures (e.g., stacks, queues, trees, linked lists).
  - 39.11 Write programs that are event-driven.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2011 – 2012

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Computing for College and Careers**  
**Course Number:**       **8209020**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.

- 13.03 Prepare and deliver a report using appropriate presentation software.
  - 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 1  
**Course Number:** 8206010  
**Course Credit:** 1

**Course Description:**

This course introduces computer programming concepts for business applications. The content includes basic information processing and computer functions; operating systems, environments, and hardware platforms; programming techniques and concepts; and basic financial business concepts. After successful completion of Business Computer Programming 1 and 2, students will have met Occupational Completion Point B, Computer Programmer Assistant, SOC Code 15.1021.

**Job Readiness and Career Development**

25.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

- 25.01 Investigate specific job opportunities in computer programming in the local job market.
- 25.02 Identify tasks performed by computer programming personnel.
- 25.03 Identify alternative career paths for computer programmers.
- 25.04 Investigate the need for additional training for computer programmers.

**Work-Based Learning**

26.0 Participate in work-based learning experiences. – The student will be able to:

- 26.01 Participate in work-based learning experiences in a computer programming environment.
- 26.02 Discuss the use of technology in a computer programming environment.

**Business Computer Programming**

27.0 Identify functions of information processing. – The student will be able to:

- 27.01 Identify characteristics of high-level languages.
- 27.02 Identify characteristics of operating systems.
- 27.03 Identify characteristics of sequential, indexed-sequential, random, and direct files.
- 27.04 Identify characteristics of a network.
- 27.05 Identify needs for software development in business.
- 27.06 Distinguish among integer, fixed-point, and floating-point calculations.

28.0 Identify functions of computers. – The student will be able to:

- 28.01 Identify computer hardware and software.

- 28.02 Identify generic data processing terminology.
  - 28.03 Sequence and define the steps in the input, processing, output, and storage cycle.
- 29.0 Test programs. – The student will be able to:
- 29.01 Develop a plan for testing programs.
  - 29.02 Develop data for use in program testing.
  - 29.03 Perform debugging activities.
  - 29.04 Distinguish among the different types of program and design errors.
  - 29.05 Evaluate program test results.
  - 29.06 Execute programs and subroutines as they relate to the total application.
  - 29.07 Compile and run programs.
- 30.0 Plan program design. – The student will be able to:
- 30.01 Formulate a plan to determine program specifications individually and in groups.
  - 30.02 Use a graphical representation or pseudocode to represent the structure in a program or subroutine.
  - 30.03 Design programs to solve problems using problem-solving strategies.
  - 30.04 Prepare proper input/output layout specifications.
  - 30.05 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 31.0 Code programs. – The student will be able to:
- 31.01 Utilize reference manuals.
  - 31.02 Write programs according to the recognized programming standards.
  - 31.03 Write internal documentation statements as needed in the program source code.
  - 31.04 Code programs in high-level languages for business applications.
  - 31.05 Code programs using logical statement (e.g., If-Then-Else, Do...While).
  - 31.06 Enter and modify source code using a program language editor.
  - 31.07 Code routines within programs that validate input data.
  - 31.08 Use the rounding function in calculations within programs.
- 32.0 Perform program maintenance. – The student will be able to:
- 32.01 Analyze output to identify and annotate errors or enhancements.
- 33.0 Create and maintain documentation. – The student will be able to:
- 33.01 Follow established documentation standards.
- 35.0 Develop an understanding of basic financial business concepts. – The student will be able to:
- 35.01 Identify generic accounting terminology as it relates to information systems.
  - 35.02 Identify ways in which transactions interact with various business systems.
- 37.0 Demonstrate an understanding of operating systems, environments, and platforms. – The student will be able to:

- 37.01 Identify various types of operating systems/environments for different computer hardware platforms.
- 37.02 Distinguish between different types of computer hardware platforms.
- 38.0 Develop an awareness of software quality assurance. – The student will be able to:
- 38.01 Identify the legal and social consequences of errors in software.
- 38.02 Describe copyright and other laws that relate to software theft and misuse.
- 38.03 Describe software security measures to protect computer systems and data from unauthorized use and tampering (e.g., physical security, passwords, virus protection/prevention).
- 39.0 Implement enhanced program structures. – The student will be able to:
- 39.01 Write programs that incorporate multi-level subtotals and page breaks.
- 39.02 Write programs that include tables or arrays or routines for data entry and lookup.
- 39.03 Write programs that use iteration.
- 40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
- 40.01 Identify the basic constructs used in structured programming.
- 40.02 Distinguish between top-down and bottom-up design.
- 40.03 Distinguish between interpreters and compilers.
- 41.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 41.01 Locate, comprehend and evaluate key elements of oral and written information. AF2.4
- 41.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF2.5
- 41.03 Present information formally and informally for specific purposes and audiences. AF2.9
- 42.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF3.0
- 42.01 Demonstrate knowledge of arithmetic operations. AF3.2
- 42.02 Analyze and apply data and measurements to solve problems and interpret documents. AF3.4
- 42.03 Construct charts/tables/graphs using functions and data. AF3.5
- 43.0 Demonstrate science knowledge and skills. – The student will be able to: AF4.0
- 43.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF4.1
- 43.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 2  
**Course Number:** 8206020  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes information processing and computer functions; operating systems; programming techniques and concepts for sequential, indexed sequential, random, and direct files; and the integrated nature of corporate systems. After successful completion of Business Computer Programming 1 and 2, students will have met Occupational Completion Point B, Computer Programmer Assistant, SOC Code 15.1021.

**Work-Based Learning**

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a computer programming environment.
  - 25.02 Discuss the use of technology in a computer programming environment.
  - 25.03 Compare and contrast programming languages used in a computer programming environment.

**Business Computer Programming**

- 27.0 Identify functions of information processing. – The student will be able to:
- 27.01 Identify causes of software development problems in business.
  - 27.02 Identify most appropriate languages for solving business problems.
  - 27.03 Describe the difference between a database management system and a file management system.
  - 27.04 Manipulate data between numbering systems.
  - 27.05 Identify how numeric and non-numeric data are represented in memory.
- 28.0 Identify functions of computers. – The student will be able to:
- 28.01 Identify advanced data processing terminology.
  - 28.02 Identify examples of emerging hardware technology.
  - 28.03 Illustrate various configurations of hardware components.
- 29.0 Test programs. – The student will be able to:
- 29.01 Use trace routines of compilers to assist in program debugging.
- 30.0 Plan program design. – The student will be able to:
- 30.01 Examine existing utility programs and subroutines for use with other programs.

- 31.0 Code programs. – The student will be able to:
  - 31.01 Write code that accesses sequential, indexed sequential, random, and direct files.
- 32.0 Perform program maintenance. – The student will be able to:
  - 32.01 Review requested modification of programs and establish a plan of action.
  - 32.02 Design needed modifications in conformance with established standards.
  - 32.03 Code, test, and debug modifications prior to updating production code.
  - 32.04 Update production programs and documentation with changes.
- 33.0 Create and maintain documentation. – The student will be able to:
  - 33.01 Write documentation to assist operators and end-users.
  - 33.02 Update existing documentation to reflect program changes.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
  - 34.01 Estimate the time necessary to write a program.
- 36.0 Understand the integrated nature of corporate systems. – The student will be able to:
  - 36.01 Analyze the flow of information throughout the various departments in a business.
  - 36.02 Explain how programs written for one department affect other departments in the business.
- 37.0 Demonstrate an understanding of operating systems, environments, and platforms. – The student will be able to:
  - 37.01 Assess and analyze the functions of different operating systems.
- 39.0 Implement enhanced program structures. – The student will be able to:
  - 39.01 Write routines to sort arrays.
  - 39.02 Write programs that sort records in files.
  - 39.03 Write programs to create and maintain a master file.
  - 39.04 Write programs to process transactions.
  - 39.05 Write programs that read and write sequential files.
  - 39.06 Write programs that read and write indexed-sequential files.
  - 39.07 Write programs that read and write random files.
- 40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
  - 40.01 Distinguish between iteration and recursion.
  - 40.02 Evaluate Boolean expressions.

- 44.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 44.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 44.02 Locate, organize and reference written information from various sources. CM 3.0
  - 44.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 44.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 44.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 44.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 44.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 45.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 45.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 45.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 45.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
  - 45.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 46.0 Use information technology tools. – The student will be able to:
- 46.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 46.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 46.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 46.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 47.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 47.01 Describe the nature and types of business organizations. SY 1.0
  - 47.02 Explain the effect of key organizational systems on performance and quality.
  - 47.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 47.04 Explain the impact of the global economy on business organizations.
- 50.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 50.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 50.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1

- 50.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 50.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 3  
**Course Number:** 8206030  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes interfaces for systems integration, software quality assurance, and advanced programming techniques and concepts. After successful completion of Business Computer Programming 3 and 4, students will have met Occupational Completion Point C, Junior Programmer, SOC Code 15.1021.

**Work-Based Learning**

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a computer programming environment.
  - 25.02 Compare and contrast programming languages used in a computer programming environment.

**Business Computer Programming**

- 27.0 Identify functions of information processing. – The student will be able to:
- 27.01 Choose appropriate storage of numeric values to insure precision needed for calculations (e.g., integer, fixed-point, floating-point).
- 28.0 Identify functions of computers. – The student will be able to:
- 28.01 Identify the advantages and disadvantages of virtual memory.
- 29.0 Test programs. – The student will be able to:
- 29.01 Develop a plan for system integration testing.
- 30.0 Plan program design. – The student will be able to:
- 30.01 Plan interface for systems integration.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
- 34.01 Analyze computer resources necessary to run a program.
- 38.0 Develop an awareness of software quality assurance. – The student will be able to:
- 38.01 Evaluate performance, functionality, and validity of various software packages.

- 39.0 Implement enhanced program structures. – The student will be able to:
- 39.01 Write programs to import/export data from external sources.
- 40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
- 40.01 Identify object-oriented concepts and provide examples of objects in an object-oriented language.
- 40.02 Describe development methodologies, programming and system languages, database technologies, and data communication.
- 48.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 48.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 48.02 Explain emergency procedures to follow in response to workplace accidents.
- 48.03 Create a disaster and/or emergency response plan. SHE 2.0
- 49.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 49.01 Employ leadership skills to accomplish organizational goals and objectives. LT1.0
- 49.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT3.0
- 49.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 49.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 51.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 51.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 51.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 51.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 51.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 51.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 51.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 51.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 51.08 Research the benefits of ongoing professional development. ECD 9.0
- 51.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 52.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 52.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 52.02 Describe the effect of money management on personal and career goals. FL 3.0

52.03	Develop a personal budget and financial goals.	FL3.1
52.04	Complete financial instruments for making deposits and withdrawals.	FL3.2
52.05	Maintain financial records.	FL3.3
52.06	Read and reconcile financial statements.	FL3.4
52.07	Research, compare and contrast investment opportunities.	

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 4  
**Course Number:** 8206040  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes client/server environments, interactive programming, and vendor application programming. After successful completion of Business Computer Programming 3 and 4, students will have met Occupational Completion Point C, Junior Programmer, SOC Code 15.1021.

**Work-Based Learning**

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a computer programming environment.
  - 25.02 Compare and contrast programming languages used in a computer programming environment.
  - 25.03 Discuss the management/supervisory skills needed in a computer programming environment.

**Business Computer Programming**

- 27.0 Identify functions of information processing. – The student will be able to:
- 27.01 Identify the advantages and disadvantages of blocking and buffering when accessing data on tape and disk storage.
- 31.0 Code programs. – The student will be able to:
- 31.01 Access external files in a client/server environment.
- 32.0 Perform program maintenance. – The student will be able to:
- 32.01 Modify or create new programs for vendor supplied applications.
  - 32.02 Use a computer system with current commercial-end application software to solve problems within an organizational environment.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
- 34.01 Utilize and apply project and time management tools to control systems development.
- 39.0 Implement enhanced program structures. – The student will be able to:

- 39.01 Write routines that incorporate “help” text.
- 39.02 Write interactive programs.
- 39.03 Design screen layouts for use in interactive programs.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 5  
**Course Number:** 8206050  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes client/server environments, interactive programming, and vendor application programming.

The competencies included in Business Programming 5 and 6 are designed to allow students to learn a second language. They build on the same tools as mastered in a previous language with increasing refinement of skill. Activities utilized must reflect increasingly greater complexity.

29.0 Test programs. – The student will be able to:

- 29.01 Develop a plan for testing programs.
- 29.02 Develop data for use in program testing.
- 29.03 Perform debugging activities.
- 29.04 Distinguish among the different types of program and design errors.
- 29.05 Evaluate program test results.
- 29.06 Execute programs and subroutines as they relate to the total application.
- 29.07 Use trace routines of compilers to assist in program debugging.
- 29.08 Compile and run programs.

30.0 Plan program design. – The student will be able to:

- 30.01 Formulate a plan to determine program specifications individually or in groups.
- 30.02 Use a graphical representation or pseudocode to represent the structure in a program or subroutine.
- 30.03 Design programs to solve problems using problem-solving strategies.
- 30.04 Prepare proper input/output layout specifications.
- 30.05 Examine existing utility programs and subroutines for use with other programs.
- 30.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.

31.0 Code programs. – The student will be able to:

- 31.01 Utilize reference manuals.
- 31.02 Write programs according to recognized programming standards.
- 31.03 Write internal documentation statements as needed in the program source code.
- 31.04 Code programs in high-level languages for business applications.
- 31.05 Write code that accesses sequential, indexed sequential, random, and direct files.
- 31.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).
- 31.07 Enter and modify source code using a program language editor.

- 31.08 Code routines within programs that validate input data.
- 31.09 Use the rounding function in calculations within programs.
- 32.0 Perform program maintenance. – The student will be able to:
  - 32.01 Review requested modification of programs and establish a plan of action.
  - 32.02 Design needed modifications in conformance with established standards.
  - 32.03 Code, test, and debug modifications prior to updating production code.
  - 32.04 Update production programs and documentation with changes.
  - 32.05 Analyze output to identify and annotate errors or enhancements.
- 33.0 Create and maintain documentation. – The student will be able to:
  - 33.01 Write documentation to assist operators and end-users.
  - 33.02 Follow established documentation standards.
  - 33.03 Update existing documentation to reflect program changes.
- 34.0 Evaluate assigned business computer programming tasks. – The student will be able to:
  - 34.01 Utilize and apply project and time management tools to control systems development.
- 39.0 Implement enhanced program structures. – The student will be able to:
  - 39.01 Write programs that incorporate multi-level subtotals and page breaks.
  - 39.02 Write programs that include tables or arrays and routines for data entry and lookup.
  - 39.03 Write routines to sort arrays.
  - 39.04 Write programs that sort records in files.
  - 39.05 Write programs to create and maintain a master file.
  - 39.06 Write programs to process transactions.
  - 39.07 Write programs that use iteration.
  - 39.08 Write programs that read and write sequential files.
  - 39.09 Write programs that read and write indexed-sequential files.
  - 39.10 Write programs that read and write random files.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 6  
**Course Number:** 8206060  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes client/server environments, interactive programming, and vendor application programming.

The competencies included in Business Programming 5 and 6 are designed to allow students to learn a second language. They build on the same tools as mastered in a previous language with increasing refinement of skill. Activities utilized must reflect increasingly greater complexity.

29.0 Test programs. – The student will be able to:

29.01 Develop a plan for system integration testing.

32.0 Perform program maintenance. – The student will be able to:

32.01 Modify or create new programs for vendor supplied applications.

32.02 Use a computer system with current commercial-end application software to solve problems within an organizational environment.

34.0 Evaluate assigned business computer programming tasks. – The student will be able to:

34.01 Utilize and apply project and time management tools to control systems development.

34.02 Analyze computer resources necessary to run a program.

37.0 Demonstrate an understanding of operating systems, environments, and platforms. – The student will be able to:

37.01 Assess and analyze the functions of different operating systems.

37.02 Assess and analyze the program development and execution utilities of relevant operating systems.

38.0 Develop an awareness of software quality assurance. – The student will be able to:

38.01 Evaluate performance, functionality, and validity of various software packages.

39.0 Implement enhanced program structures. – The student will be able to:

39.01 Write programs to import/export/convert data from external sources.

39.02 Write routines that incorporate “help” text.

39.03 Write interactive programs.

- 39.04 Design screen layouts for use in interactive programs.
- 39.05 Write programs using object-oriented languages.
- 40.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
  - 40.01 Describe development methodologies, programming and system languages, database technologies, and data communication.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Business Computer Programming 7  
**Course Number:** 8206070  
**Course Credit:** 1

**Course Description:**

This course continues the study of computer programming concepts for business applications. The content includes client/server environments, interactive programming, and vendor application programming.

The competencies included in Business Programming 7 are designed to allow students to master a second language. They build on the same tools as mastered in a previous language with increasing refinement of skill. Activities utilized must reflect increasingly greater complexity.

29.0 Test programs. – The student will be able to:

- 29.01 Develop a plan for testing programs.
- 29.02 Develop a plan for system integration testing.
- 29.03 Develop data for use in program testing.
- 29.04 Perform debugging activities.
- 29.05 Distinguish among the different types of program and design errors.
- 29.06 Evaluate program test results.
- 29.07 Execute programs and subroutines as they relate to the total application.
- 29.08 Use trace routines of compilers to assist in program debugging.
- 29.09 Compile and run programs.

30.0 Plan program design. – The student will be able to:

- 30.01 Formulate a plan to determine program specifications individually or in groups.
- 30.02 Use a graphical representation or pseudocode to represent the structure in a program or subroutine.
- 30.03 Design programs to solve problems using problem-solving strategies.
- 30.04 Prepare proper input/output layout specifications.
- 30.05 Examine existing utility programs and subroutines for use with other programs.
- 30.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.

31.0 Code programs. – The student will be able to:

- 31.01 Utilize reference manuals.
- 31.02 Write programs according to recognized programming standards.
- 31.03 Write internal documentation statements as needed in the program source code.
- 31.04 Code programs in high-level languages for business applications.
- 31.05 Write code that accesses sequential, indexed sequential, random, and direct files.
- 31.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).

- 31.07 Enter and modify source code using a program language editor.
- 31.08 Code routines within programs that validate input data.
- 31.09 Use the rounding function in calculations within programs.

32.0 Perform program maintenance. – The student will be able to:

- 32.01 Review requested modification of programs and establish a plan of action.
- 32.02 Design needed modifications in conformance with established standards.
- 32.03 Code, test, and debug modifications prior to updating production code.
- 32.04 Update production programs and documentation with changes.
- 32.05 Analyze output to identify and annotate errors or enhancements.

39.0 Implement enhanced program structures. – The student will be able to:

- 39.01 Write programs that include tables or arrays and routines for data entry and lookup.
- 39.02 Write programs that use iteration.
- 39.03 Write routines that incorporate “help” text.
- 39.04 Write programs that read and write sequential files.
- 39.05 Write programs that read and write indexed-sequential files.
- 39.06 Write programs that read and write random files.
- 39.07 Write interactive programs.
- 39.08 Design screen layouts for use in interactive programs.
- 39.09 Write programs using object-oriented languages.
- 39.10 Write programs that include data structures (e.g., stacks, queues, trees, linked lists).
- 39.11 Write programs that are event-driven.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Information Technology  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8207300	Y300300

Basic Skills Level	N/A	Mathematics: 9 Language: 9 Reading: 9

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to computer application skills including computer keyboarding, software applications (e.g., word processing, spreadsheet, database, presentation, desktop publishing), e-mail, Internet browser applications, computer programming (e.g., Scheme, HTML), web page design and advanced web tools, systems support and maintenance, basic network concepts, basic concepts of relational database engines and the tools to use them, digital media (e.g., audio, video, graphics, text, and animation tools), and multimedia tools; extensive exploration of information technology careers; strategies for success including goal setting, study skills, organizing skills, learning styles, employability skills, and service learning; and core academic skills with a strong emphasis on effective communication skills.

### Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1041
B	CTS0040	IT Programming and Database	150	15-1021
	CTS0099	IT Technical Support & Networking	150	
C	CTS0079	IT Web & Digital Media	150	15-1041
	CTS0940	IT Internship	150	

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8207310	Introduction to Information Technology	1 credit	15-1041	2
B	8207320	IT Programming/Database	1 credit	15-1021	3
	8203051	IT Technical Support/Networking	1 credit		3
C	8207360	IT Web/Digital Media	1 credit	15-1041	3
	8207350	IT Internship	1 credit		2

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to Information Technology	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### National Alignment

The Information Technology program aligns with the Academy of Information Technology model developed by the National Academy Foundation. In order to provide the true meaning of the Academy concept, a total interdisciplinary approach should be implemented. Instructional strategies for infusion of information technology concepts into the core academic subjects of language arts, math, science, and social studies are available through the National Academy Foundation. It is through a balanced and integrated curriculum that students attain the attitudes, skills, and knowledge needed to compete successfully in today's work force. To achieve total curriculum integration, academic and career and technical education Academy teachers should be scheduled with common planning times.

The Academy of Information Technology emphasizes the development of abilities and/or awareness necessary to function in a highly technological society. The use of cooperative learning groups is recommended. By learning and practicing group process skills, students will be prepared to work "together" in real work situations. Program graduates will develop enhanced self-esteem as well as the problem solving and teamwork skills necessary to succeed in careers and postsecondary education. Students will gain knowledge about career paths, have access to business role models, and have choices they would not otherwise have.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College

must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

- 25.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing.
- 26.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 27.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 28.0 Participate in work-based learning experiences.
- 29.0 Identify functions of information processing.
- 30.0 Identify functions of computers.
- 31.0 Test programs.
- 32.0 Plan program design.
- 33.0 Code programs.
- 34.0 Perform program maintenance.
- 35.0 Create and maintain documentation.
- 36.0 Develop an awareness of software quality assurance.
- 37.0 Develop an understanding of programming techniques and concepts.
- 38.0 Design structured programs.
- 39.0 Develop an awareness of the changes taking place in the information age and how they fit into an evolving society.
- 40.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs.
- 41.0 Develop the process of creating an entity by identifying relationships.
- 42.0 Formulate and assemble initial entity relationship by expanding on modeling concepts.
- 43.0 Consider the degree and optionality of relationships of entities.
- 44.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and many-to-many (M:M) relationships for building entity relationship diagrams.
- 45.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships.
- 46.0 Apply the complex ERM information by fine-tuning entities and the process for relating them.
- 47.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved.
- 48.0 Manipulating data.
- 49.0 Building and modifying tables.
- 50.0 Performing queries and filtering records.
- 51.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing.
- 52.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 53.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 54.0 Participate in work-based learning experiences.
- 55.0 Perform installation and configuration activities.
- 56.0 Demonstrate proficiency using computer networks.
- 57.0 Perform the process for problem diagnostics and problem resolution through telephone, e-mail, remote access, or direct contact.

- 58.0 Identify appropriate wide area network access strategies.
- 59.0 Identify appropriate local area network access strategies.
- 60.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing.
- 61.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 62.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 63.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 64.0 Participate in work-based learning experiences.
- 65.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing.
- 66.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 67.0 Participate in work-based learning experiences.
- 68.0 Demonstrate proficiency in page design applicable to the WWW.
- 69.0 Demonstrate knowledge of presentation production issues.
- 70.0 Demonstrate proficiency in using presentation software and equipment.
- 71.0 Demonstrate proficiency using video editing software and equipment.
- 72.0 Demonstrate proficiency in web page design applicable to the WWW.
- 73.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design.
- 74.0 Demonstrate proficiency in using digital photography and digital imaging.
- 75.0 Perform decision-making activities in a multimedia environment
- 76.0 Demonstrate language arts knowledge and skills.
- 77.0 Demonstrate mathematics knowledge and skills.
- 78.0 Demonstrate science knowledge and skills.
- 79.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 80.0 Solve problems using critical thinking skills, creativity and innovation.
- 81.0 Use information technology tools.
- 82.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 83.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 84.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 85.0 Describe the importance of professional ethics and legal responsibilities.
- 86.0 Explain the importance of employability skill and entrepreneurship skills.
- 87.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Information Technology**  
**PSAV Number: Y300300**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1021**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

- 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
  - 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
  - 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
  - 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
  - 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.

- 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
  - 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
  - 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using HTML commands. – The student will be able to:
  - 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
  - 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.

- 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.

- 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.
- 76.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 76.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 76.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 76.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 77.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 77.01 Demonstrate knowledge of arithmetic operations. AF 3.2

- 77.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 77.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 78.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 78.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 78.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

**Course Number: CTS0040**  
**Occupational Completion Point – B**  
**IT Programming & Database – 150 Hours – SOC Code 15-1021**

**Workplace Communications**

- 25.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 25.01 Demonstrate active listening techniques.
- 25.02 Identify relevant information in oral messages.
- 25.03 Determine when more information is needed and ask appropriate questions.
- 25.04 Use professional business vocabulary appropriate for computer programming environments.
- 25.05 Organize ideas and communicate oral and written messages appropriate for computer programming environments.
- 25.06 Collaborate with individuals and teams to complete tasks and solve computer programming problems.
- 25.07 Apply the writing process to the creation of computer programming-related documents following designated business formats.
- 25.08 Use critical reading, analytical thinking, creative synthesis, and attention to detail as they relate to computer programming tasks.
- 26.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 26.01 Demonstrate an understanding of how computations work (e.g., precedence of mathematical and logical operators).
- 26.02 Solve computational problems in a systematic manner.
- 27.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 27.01 Analyze personal skills and aptitudes in comparison with computer programming career opportunities.

- 27.02 Refine and implement a plan to facilitate personal growth and skill development related to computer programming career opportunities.
  - 27.03 Update and maintain an electronic career portfolio.
  - 27.04 Research, compare and contrast career opportunities in computer programming and database administration.
- 28.0 Participate in work-based learning experiences. – The student will be able to:
- 28.01 Participate in work-based learning experiences in a computer programming environment.
  - 28.02 Discuss the use of business computer programming technology in an information technology environment.
- 29.0 Identify functions of information processing. – The student will be able to:
- 29.01 Identify needs for software development in business.
  - 29.02 Identify characteristics of object-oriented languages (techniques).
- 30.0 Identify functions of computers. – The student will be able to:
- 30.01 Identify computer hardware and software.
  - 30.02 Identify generic data processing terminology.
- 31.0 Test programs. – The student will be able to:
- 31.01 Develop a plan for testing programs.
  - 31.02 Develop data for use in program testing.
  - 31.03 Perform debugging activities.
  - 31.04 Distinguish among the different types of program and design errors.
  - 31.05 Evaluate program test results.
  - 31.06 Execute programs and subroutines as they relate to the total application.
  - 31.07 Develop examples that illustrate the core behavior of each program.
  - 31.08 Develop examples that illustrate the core behavior of each program component.
  - 31.09 Illustrate the behavior of boundary cases.
  - 31.10 Demonstrate an understanding that engineering artifacts requires rigorous and systematic testing.
  - 31.11 Use examples to show that the solution meets pre-determined criteria.
  - 31.12 Demonstrate understanding that testing can expose problems but not prove the correctness of the design in an absolute sense.
  - 31.13 Compile (interpret) and run programs.
- 32.0 Plan program design. – The student will be able to:
- 32.01 Formulate a plan to determine program specifications individually or in groups.
  - 32.02 Use a graphical representation or pseudocode to represent the structure in a program or subroutine.
  - 32.03 Design programs to solve problems using problem-solving strategies.
  - 32.04 Prepare proper input/output layout specifications.
  - 32.05 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
  - 32.06 Analyze problem statements.

- 32.07 Determine what kind of information the desired program must process.
  - 32.08 Formulate concise descriptions of a program's task and purpose.
  - 32.09 Formulate concise descriptions of task and purpose of a program's pieces.
  - 32.10 Organize programs according to the problem analysis.
  - 32.11 Recognize changes in the problem statement.
  - 32.12 Suggest changes in the program organization.
- 33.0 Code programs. – The student will be able to:
- 33.01 Write programs according to recognized programming standards.
  - 33.02 Write internal documentation statements as needed in the program source code.
  - 33.03 Code programs using logical statements (e.g., If-Then-Else, Do..While).
  - 33.04 Enter and modify source code using a program language editor.
  - 33.05 Code routines within programs that validate input data.
  - 33.06 Code programs using object-oriented languages (techniques).
  - 33.07 Select the essential aspects of a problem statement.
  - 33.08 Provide a solution to a problem.
  - 33.09 Find solutions to an extended problem statement.
  - 33.10 Utilize reference manuals and help systems.
  - 33.11 Use pre-defined functions within programs.
- 34.0 Perform program maintenance. – The student will be able to:
- 34.01 Analyze output to identify and annotate errors or enhancements.
- 35.0 Create and maintain documentation. – The student will be able to:
- 35.01 Follow established documentation standards.
- 36.0 Develop an awareness of software quality assurance. – The student will be able to:
- 36.01 Identify the legal and social consequences of errors in software.
  - 36.02 Describe copyright and other laws that relate to software theft and misuse.
  - 36.03 Describe software security measures to protect computer systems and data from unauthorized use and tampering (e.g., physical security, passwords, virus protection/prevention).
- 37.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
- 37.01 Identify the basic constructs used in structured programming.
- 38.0 Design structured programs. – The student will be able to:
- 38.01 Design programs that model mathematical relationships from application areas (e.g., accounting, economics, multimedia, programming, science, web, etc.).
  - 38.02 Design programs that deal with multi-faceted objects (e.g., personnel records, physical objects, attributes of HTML tags, etc.).
  - 38.03 Design programs that deal with mixed classes of objects (e.g., a class of geometric shapes containing circles, rectangles, triangles, squares, polygons, etc.).

- 38.04 Design programs that deal with objects of undetermined size (e.g., shopping lists, family trees, file directories on computers, web sites, etc.).
- 39.0 Develop an awareness of the changes taking place in the information age and how they fit into an evolving society. – The student will be able to:
- 39.01 Describe the role a database plays in a business and predict its evolution.
  - 39.02 Demonstrate the difference between “data” and “information.”
  - 39.03 Understand the importance of clear communication when discussing business informational requirements.
  - 39.04 Experiment with web-based email and explain how these services use a database.
- 40.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs. – The student will be able to:
- 40.01 Identify and analyze the phases of the database development process.
  - 40.02 Explain what conceptual data modeling and database design involves.
  - 40.03 Compare database development process with that of the application development process.
  - 40.04 Identify the need for databases and why they are used.
  - 40.05 Explain the various types of databases (i.e., flat file, relational) and the appropriate use of each.
  - 40.06 Demonstrate proficiency in design methodology by completing appropriate tasks during the appropriate time of the developmental life cycle.
  - 40.07 Demonstrate proficiency in design methodology by considering where the database will reside.
- 41.0 Develop the process of creating an entity by identifying relationships. – The student will be able to:
- 41.01 Identify and model various types of entities.
  - 41.02 Identify naming and drawing conventions for entities.
  - 41.03 Sequence the steps that are necessary for creation of an entity.
  - 41.04 Analyze and model the relationships between entities.
- 42.0 Formulate and assemble initial entity relationship by expanding on modeling concepts. – The student will be able to:
- 42.01 Analyze and model attributes.
  - 42.02 Identify unique identifiers for each entity.
  - 42.03 Develop an entity relationship diagram tagging attributes with optionality.
- 43.0 Consider the degree and optionality of relationships of entities. – The student will be able to:
- 43.01 Create models and entity relationship information requirements and interviews.
  - 43.02 Begin to differentiate between one-to-many, many-to-many and one-to-one relationships.
  - 43.03 Identify relationship between two entities by reading a given diagram.
  - 43.04 Create a relationship between instances of the same entity.

- 43.05 Read an entity relationship model in order to validate it.
- 44.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and many-to-many (M:M) relationships for building entity relationship diagrams. – The student will be able to:
- 44.01 Identify the significance of an attribute that has more than one value for each entity instance.
  - 44.02 Evaluate appropriate methods of storing validation rules for attributes.
  - 44.03 Recognize unique identifiers inherited from other entities.
  - 44.04 Sequence the steps involved in resolving a many-to-many relationship.
- 45.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships -The student will be able to:
- 45.01 Validate that an attribute is properly placed based upon its dependence on its entity's unique identifier (UID).
  - 45.02 Model advanced data constructs including recursive relationships, subtypes, and exclusive relationships.
  - 45.03 Enforce referential integrity.
- 46.0 Apply the complex ERM information by fine-tuning entities and the process for relating them. – The student will be able to:
- 46.01 Describe a relational database and how it is different from other database systems.
  - 46.02 Define primary keys and foreign keys and describe their purpose.
  - 46.03 Describe what data integrity refers to and list some constraints.
  - 46.04 Explain how database design fits into the database development process.
  - 46.05 Translate an entity-relationship model into a relational database design.
- 47.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved. – The student will be able to:
- 47.01 Recognize raw data and evaluate the steps for creating a data group in unnormalized form (UNF).
- 48.0 Manipulating data. – The student will be able to:
- 48.01 Determine appropriate data inputs and outputs for an existing database.
  - 48.02 Demonstrate proficiency in record management (i.e., entering, editing, finding, selecting, sorting, deleting records).
  - 48.03 Change the layout of a datasheet.
  - 48.04 Create forms, reports, mailing labels, and charts using a database.
  - 48.05 Export data to appropriate software applications.
  - 48.06 Demonstrate proficiency in coordinating databases with appropriate software applications.
- 49.0 Building and modifying tables. – The student will be able to:
- 49.01 Create a database table.

- 49.02 Create table structures and establish table relationships.
- 49.03 Determine fields and assign data types in a database table.
- 49.04 Demonstrate appropriate manipulation of database tables (i.e., enter data, add and delete records).
- 49.05 Modify a database table by adding, deleting, and removing fields.
- 49.06 Demonstrate proficiency in the appropriate use of database wizards.
- 50.0 Performing queries and filtering records. – The student will be able to:
- 50.01 Design a query and extract specific data from a database table.
- 50.02 Create a calculated field.
- 50.03 Filter data in records by selection and by form.
- 50.04 Modify a saved query.
- 79.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 79.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 79.02 Locate, organize and reference written information from various sources. CM 3.0
- 79.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 79.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 79.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 79.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 79.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 80.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 80.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 80.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 80.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 80.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 81.0 Use information technology tools. – The student will be able to:
- 81.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 81.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 81.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 81.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 82.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:

- 82.01 Describe the nature and types of business organizations. SY 1.0
- 82.02 Explain the effect of key organizational systems on performance and quality.
- 82.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 82.04 Explain the impact of the global economy on business organizations.
- 85.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 85.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 85.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 85.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 85.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0099**  
**Occupational Completion Point – B**  
**IT Technical Support & Networking – 150 Hours – SOC Code 15-1021**

- 51.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 51.01 Access reference materials.
- 51.02 Apply assertive service techniques.
- 51.03 Demonstrate interactive listening techniques.
- 51.04 Use professional business vocabulary appropriate for PC support services/networking environments.
- 51.05 Organize ideas and communicate oral and written messages appropriate for PC support services/networking environments.
- 51.06 Collaborate with individuals and teams to complete tasks and solve PC support services/networking problems.
- 51.07 Apply the writing process to the creation of PC support services/networking-related documents following designated business formats.
- 51.08 Apply appropriate communication etiquette in responding to user requests for assistance in a timely manner.
- 51.09 Demonstrate patience, active listening skills, and probing skills in responding to user requests for assistance.
- 52.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 52.01 Develop diplomatic methods to communicate with customers.
- 53.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 53.01 Research, compare and contrast career opportunities in PC and network support.
  - 53.02 Analyze personal skills and aptitudes in comparison with PC and network support career opportunities.
  - 53.03 Refine and implement a plan to facilitate personal growth and skill development related to PC and network support career opportunities.
  - 53.04 Update and maintain an electronic career portfolio.
- 54.0 Participate in work-based learning experiences. – The student will be able to:
- 54.01 Participate in work-based learning experiences in a PC support/networking information technology environment.
  - 54.02 Discuss the application of PC support and networking principles in an information technology environment.
  - 54.03 Discuss the use of PC support and networking technology in an information technology environment.
  - 54.04 Discuss the use of technology in a network support services environment.
  - 54.05 Discuss the management/supervisory skills needed in a network support services environment.
- 55.0 Perform installation and configuration activities. – The student will be able to:
- 55.01 Install and configure software including device drivers.
  - 55.02 Install and configure operating system software.
  - 55.03 Install and configure application software.
  - 55.04 Install and configure peripherals including device drivers (e.g., scanners, cameras, printers).
  - 55.05 Supervise the testing of operating system management systems (e.g., registry, INI files).
  - 55.06 Prepare the hard disk and related issues for operating system installation (e.g., BIOS, disk controllers).
  - 55.07 Format and partition the hard disk.
  - 55.08 Verify the proper operation of the system (e.g., physical inspection, tests, utilities).
  - 55.09 Compare and contrast memory technologies (e.g., RAM, ROM, virtual memory, memory management)
  - 55.10 Demonstrate proficiency using various memory technologies (e.g., RAM, ROM, virtual memory, memory management).
- 56.0 Demonstrate proficiency using computer networks. – The student will be able to:
- 56.01 Define networking and describe the purpose of a network.
  - 56.02 Describe the conceptual background of digital networks including terminology and basics.
  - 56.03 Compare and contrast various implementation models (e.g., TCP/IP protocols, OSI 7, NetBEUI, PX, cross mapping of protocols).
  - 56.04 Describe various networks and the advantages and disadvantages of each (e.g., peer to peer, client/server, mainframe/terminal).
  - 56.05 Describe the use and advantages and disadvantages of various network media (e.g., thinnet cable (coaxial), twisted pair (category 5), fiber optic).

- 56.06 Describe class A, B, C networks and their relationship to the TCP/IP dotted decimal addressing.
- 56.07 Describe an Ethernet network and the use of CSMA\CD.
- 56.08 Describe the function of various network devices (e.g., hub, switched hub or switch, router bridge, gateway).
- 57.0 Perform the process for problem diagnostics and problem resolution through telephone, e-mail, remote access, or direct contact. – The student will be able to:
- 57.01 Identify, troubleshoot and propose solutions for configuration problems.
- 57.02 Identify, troubleshoot and propose solutions for software problems.
- 57.03 Identify, troubleshoot and propose solutions for hardware malfunctions.
- 57.04 Identify, troubleshoot and propose solutions for network malfunctions.
- 57.05 Plan and implement a system upgrade and downgrade.
- 57.06 Evaluate data recovery using various techniques (e.g., MBR repair tools, rescue disks, disk image, backup).
- 57.07 Organize and perform system maintenance activities (e.g., management console, SNMP, system monitors, diagnostics, virus management).
- 57.08 Demonstrate corporate interaction proficiency (e.g., responsibility, interaction, communication).
- 58.0 Identify appropriate wide area network access strategies. – The student will be able to:
- 58.01 Compare and contrast various types of host access (e.g., leased lines, service providers, ISP's, DSL's, cable modems, wireless service providers).
- 58.02 Compare and contrast various types of connections (e.g., dial up, network interface cards, crossover cables, straight through cables, null modem cables, client server) with a hub and wireless connections.
- 59.0 Identify appropriate local area network access strategies. – The student will be able to:
- 59.01 Compare and contrast various local area networks (e.g., token ring, Ethernet, Apple Talk).
- 59.02 Compare and contrast various local area connections (e.g., Banyan vines, Novell, Windows NT, Windows 2000).
- 83.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 83.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 83.02 Explain emergency procedures to follow in response to workplace accidents.
- 83.03 Create a disaster and/or emergency response plan. SHE 2.0
- 84.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 84.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 84.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0

- 84.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 84.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 86.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 86.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 86.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 86.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 86.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 86.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 86.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 86.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 86.08 Research the benefits of ongoing professional development. ECD 9.0
- 86.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 87.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 87.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 87.02 Describe the effect of money management on personal and career goals. FL 3.0
- 87.03 Develop a personal budget and financial goals. FL 3.1
- 87.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 87.05 Maintain financial records. FL 3.3
- 87.06 Read and reconcile financial statements. FL 3.4
- 87.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0940**  
**Occupational Completion Point – C**  
**IT Internship – 150 Hours – SOC Code 15-1041**

- 60.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 60.01 Demonstrate effective written and oral communication and listening skills in a workplace environment
- 60.02 Use professional business vocabulary related to information technology environments.
- 61.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 61.01 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 61.02 Demonstrate the ability to resolve customer, employee, and employee/employer problems and concerns.

- 61.03 Demonstrate acceptable work habits and conduct in the workplace as defined by company policy.
  - 61.04 Demonstrate legal and ethical behavior within the scope of job responsibilities.
  - 61.05 Apply a positive customer service attitude.
  - 61.06 Demonstrate an understanding of the organization's mission and services.
- 62.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 62.01 Update and maintain an electronic career portfolio.
  - 62.02 Create an electronic resume.
  - 62.03 Apply for an information technology position using a letter of application and resume.
  - 62.04 Demonstrate successful interview techniques for an information technology position.
- 63.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 63.01 Exhibit behavior supporting and promoting cultural and ethnic diversity.
  - 63.02 Demonstrate interpersonal skills that enhance team productivity and foster positive work ethics.
  - 63.03 Demonstrate appropriate dress and grooming for the workplace environment.
- 64.0 Participate in work-based learning experiences. – The student will be able to:
- 64.01 Perform tasks as outlined in the job performance skills plan.
  - 64.02 Display an acceptable level of productivity and quality control in an information technology position.
  - 64.03 Maintain appropriate records.

**Course Number: CTS0079**

**Occupational Completion Point – C**

**IT Web & Digital Media – 150 Hours – SOC Code 15-1041**

- 65.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 65.01 Use professional business vocabulary appropriate for multimedia information technology environments.
  - 65.02 Organize ideas and communicate oral and written messages appropriate for multimedia information technology environments.
  - 65.03 Collaborate with individuals and teams to complete tasks and solve multimedia information technology problems.
  - 65.04 Apply the writing process to the creation of multimedia-related documents following designated business formats.

66.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 66.01 Update and maintain an electronic career portfolio.
- 66.02 Research, compare, and contrast career opportunities in web and multimedia design.
- 66.03 Analyze personal skills and aptitudes in comparison with web and multimedia design career opportunities.
- 66.04 Refine and implement a plan to facilitate personal growth and skill development related to web and multimedia design career opportunities.
- 66.05 Present an electronic career portfolio to an audience.
- 66.06 Update an electronic resume.
- 66.07 Conduct a comprehensive job search.
- 66.08 Develop a postsecondary education plan to prepare for an information technology career.

67.0 Participate in work-based learning experiences. – The student will be able to:

- 67.01 Participate in work-based learning experiences in a multimedia information technology environment.
- 67.02 Discuss the application of multimedia design principles in an information technology environment.
- 67.03 Discuss the use of multimedia design technology in an information technology environment.

68.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 68.01 Identify and convert graphic formats.
- 68.02 Demonstrate proficiency in adding Java scripts to web pages.

69.0 Demonstrate knowledge of presentation production issues. – The student will be able to:

- 69.01 Demonstrate knowledge of copyright laws including copyright statute, disclaimers, and filing procedure.
- 69.02 Demonstrate an understanding of graphic and other file formats (e.g., EPS, TIFF, JPEG, ASCII, MPEG, MIDI, AVI, WAV, etc.) and knowledge of image size when scanning and saving files for use in different presentation types (Web, computer, print, etc.).
- 69.03 Demonstrate knowledge of presentation vocabulary/terms.
- 69.04 Compare and contrast and utilize various audio/video output solutions and devices (e.g., DVD, CD-Rom, web).

70.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:

- 70.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.

- 70.02 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.
  - 70.03 Demonstrate knowledge of the roles and responsibilities of a multimedia production team (e.g. project manager, creative or design director, content experts, writers, graphic designers, animators, sound designers, videographer, interface designers/ programmers, etc.)
  - 70.04 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation where individuals on the team function in specific production roles that were outlined in mastery of 201.03.
  - 70.05 Create a self-running presentation with synchronized audio, convert presentation slides (e.g., PowerPoint) into streaming ASF files for use on the Web.
  - 70.06 Create and edit an animation that includes text, symbols, layers, buttons, and tweened animation.
  - 70.07 Construct web pages with streaming media content.
- 71.0 Demonstrate proficiency using video editing software and equipment. – The student will be able to:
- 71.01 Demonstrate knowledge of video and sound editing vocabulary, terms, and acronyms.
  - 71.02 Demonstrate knowledge of non-linear editing software (NLEs) and compare the strengths and weaknesses of these programs.
  - 71.03 Identify components of non-linear video editing equipment.
  - 71.04 Set-up non-linear video editing equipment.
  - 71.05 Compare offline to “real time” video editing.
  - 71.06 Use storyboarding to plan a short nonlinear video project that includes existing video footage with a title, transitions, background sound, voice-over, animation, and rolling credits.
  - 71.07 Create and edit a movie using video editing software that includes existing video footage with a title, transitions, background sound, voice-over, and rolling credits and output to video.
  - 71.08 Collaborate with team members to plan, edit, and shoot video footage utilizing advanced video editing techniques and output to video.
  - 71.09 Compare and contrast single track vs. multi-track audio/video editors.
  - 71.10 Compose and edit sound tracks.
- 72.0 Demonstrate proficiency in web page design applicable to the WWW. – The student will be able to:
- 72.01 Determine the objectives and the audience for Web pages.
  - 72.02 Identify design strategies to reach and keep an audience.
  - 72.03 Use storyboarding to plan a Web site.
  - 72.04 Create styles and other design elements (e.g. backgrounds, colors, fonts, buttons, etc.).
- 73.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design. – The student will be able to:
- 73.01 Apply style sheets for consistent Web site design.

- 73.02 Create and edit images and photographs for Web pages using digital imaging software (e.g., ImageReady in Photoshop).
  - 73.03 Insert audio files into a Web page.
  - 73.04 Create, edit and integrate video files into a Web page.
  - 73.05 Create, edit and integrate animation files into a Web page.
  - 73.06 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
  - 73.07 Build, optimize, edit, and test web pages for publication.
  - 73.08 Create a web page that utilizes plug-ins.
  - 73.09 Demonstrate an understanding of network and web implementation issues (e.g., bandwidth, compression, streaming).
  - 73.10 Compare and contrast various methods by which information may be accessed on the Internet/Intranet (e.g., FTP, telnet, browser).
  - 73.11 Demonstrate an understanding of file encryption methods (e.g., secure server, unsecured server).
- 74.0 Demonstrate proficiency in using digital photography and digital imaging. – The student will be able to:
- 74.01 Demonstrate knowledge of ethics related to digital imaging and legal and consent issues.
  - 74.02 Apply effective design principles in digital photography compositions.
  - 74.03 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.
  - 74.04 Compare and contrast still raster and still vector graphics.
- 75.0 Perform decision-making activities in a multimedia environment. – The student will be able to:
- 75.01 Determine work priorities, the audience, project budgets, project specifications, and the production schedule.
  - 75.02 Evaluate and select appropriate software packages and multimedia tools to complete assigned tasks.
  - 75.03 Present and defend design projects.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:

- 14.01 Identify and describe Web terminology.
- 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
- 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
- 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
- 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
- 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
- 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
- 14.08 Identify effective Boolean search strategies.

15.0 Demonstrate proficiency using html commands. – The student will be able to:

- 15.01 Identify elements of a Web page.
- 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
- 15.03 Define basic HTML terminology.
- 15.04 Analyze HTML source code developed by others.
- 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 15.07 Edit and test HTML documents for accuracy and validity.
- 15.08 Use basic functions of WYSIWYG editors.
- 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
- 15.10 Enhance web pages through the addition of images and graphics including animation.

16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
- 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
- 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
- 16.04 Use image design software to create and edit images.
- 16.05 Demonstrate proficiency in publishing to the Internet.
- 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
- 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** IT Programming/Database  
**Course Number:** 8207320  
**Course Credit:** 1

**Course Description:**

This course introduces computer programming concepts for information technology applications using the Scheme programming language and an introduction to database fundamentals. The content includes information technology career research, computer functions, programming techniques and concepts, data modeling and advanced database techniques. Emphasis is placed on the techniques needed to develop well-documented, structured computer programs.

25.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 25.01 Demonstrate active listening techniques.
- 25.02 Identify relevant information in oral messages.
- 25.03 Determine when more information is needed and ask appropriate questions.
- 25.04 Use professional business vocabulary appropriate for computer programming environments.
- 25.05 Organize ideas and communicate oral and written messages appropriate for computer programming environments.
- 25.06 Collaborate with individuals and teams to complete tasks and solve computer programming problems.
- 25.07 Apply the writing process to the creation of computer programming-related documents following designated business formats.
- 25.08 Use critical reading, analytical thinking, creative synthesis, and attention to detail as they relate to computer programming tasks.

26.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 26.01 Demonstrate an understanding of how computations work (e.g., precedence of mathematical and logical operators).
- 26.02 Solve computational problems in a systematic manner.

27.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 27.01 Analyze personal skills and aptitudes in comparison with computer programming career opportunities.
- 27.02 Refine and implement a plan to facilitate personal growth and skill development related to computer programming career opportunities.
- 27.03 Update and maintain an electronic career portfolio.
- 27.04 Research, compare and contrast career opportunities in computer programming

and database administration.

- 28.0 Participate in work-based learning experiences. – The student will be able to:
- 28.01 Participate in work-based learning experiences in a computer programming environment.
  - 28.02 Discuss the use of business computer programming technology in an information technology environment.
- 29.0 Identify functions of information processing. – The student will be able to:
- 29.01 Identify needs for software development in business.
  - 29.02 Identify characteristics of object-oriented languages (techniques).
- 30.0 Identify functions of computers. – The student will be able to:
- 30.01 Identify computer hardware and software.
  - 30.02 Identify generic data processing terminology.
- 31.0 Test programs. – The student will be able to:
- 31.01 Develop a plan for testing programs.
  - 31.02 Develop data for use in program testing.
  - 31.03 Perform debugging activities.
  - 31.04 Distinguish among the different types of program and design errors.
  - 31.05 Evaluate program test results.
  - 31.06 Execute programs and subroutines as they relate to the total application.
  - 31.07 Develop examples that illustrate the core behavior of each program.
  - 31.08 Develop examples that illustrate the core behavior of each program component.
  - 31.09 Illustrate the behavior of boundary cases.
  - 31.10 Demonstrate an understanding that engineering artifacts requires rigorous and systematic testing.
  - 31.11 Use examples to show that the solution meets pre-determined criteria.
  - 31.12 Demonstrate understanding that testing can expose problems but not prove the correctness of the design in an absolute sense.
  - 31.13 Compile (interpret) and run programs.
- 32.0 Plan program design. – The student will be able to:
- 32.01 Formulate a plan to determine program specifications individually or in groups.
  - 32.02 Use a graphical representation or pseudocode to represent the structure in a program or subroutine.
  - 32.03 Design programs to solve problems using problem-solving strategies.
  - 32.04 Prepare proper input/output layout specifications.
  - 32.05 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
  - 32.06 Analyze problem statements.
  - 32.07 Determine what kind of information the desired program must process.
  - 32.08 Formulate concise descriptions of a program's task and purpose.
  - 32.09 Formulate concise descriptions of task and purpose of a program's pieces.
  - 32.10 Organize programs according to the problem analysis.

- 32.11 Recognize changes in the problem statement.
- 32.12 Suggest changes in the program organization.
- 33.0 Code programs. – The student will be able to:
  - 33.01 Write programs according to recognized programming standards.
  - 33.02 Write internal documentation statements as needed in the program source code.
  - 33.03 Code programs using logical statements (e.g., If-Then-Else, Do..While).
  - 33.04 Enter and modify source code using a program language editor.
  - 33.05 Code routines within programs that validate input data.
  - 33.06 Code programs using object-oriented languages (techniques).
  - 33.07 Select the essential aspects of a problem statement.
  - 33.08 Provide a solution to a problem.
  - 33.09 Find solutions to an extended problem statement.
  - 33.10 Utilize reference manuals and help systems.
  - 33.11 Use pre-defined functions within programs.
- 34.0 Perform program maintenance. – The student will be able to:
  - 34.01 Analyze output to identify and annotate errors or enhancements.
- 35.0 Create and maintain documentation. – The student will be able to:
  - 35.01 Follow established documentation standards.
- 36.0 Develop an awareness of software quality assurance. – The student will be able to:
  - 36.01 Identify the legal and social consequences of errors in software.
  - 36.02 Describe copyright and other laws that relate to software theft and misuse.
  - 36.03 Describe software security measures to protect computer systems and data from unauthorized use and tampering (e.g., physical security, passwords, virus protection/prevention).
- 37.0 Develop an understanding of programming techniques and concepts. – The student will be able to:
  - 37.01 Identify the basic constructs used in structured programming.
- 38.0 Design structured programs. – The student will be able to:
  - 38.01 Design programs that model mathematical relationships from application areas (e.g., accounting, economics, multimedia, programming, science, web, etc.).
  - 38.02 Design programs that deal with multi-faceted objects (e.g., personnel records, physical objects, attributes of HTML tags, etc.).
  - 38.03 Design programs that deal with mixed classes of objects (e.g., a class of geometric shapes containing circles, rectangles, triangles, squares, polygons, etc.).
  - 38.04 Design programs that deal with objects of undetermined size (e.g., shopping lists, family trees, file directories on computers, web sites, etc.).
- 39.0 Develop an awareness of the changes taking place in the information age and how they

fit into an evolving society. – The student will be able to:

- 39.01 Describe the role a database plays in a business and predict its evolution.
- 39.02 Demonstrate the difference between “data” and “information.”
- 39.03 Understand the importance of clear communication when discussing business informational requirements.
- 39.04 Experiment with web-based email and explain how these services use a database.

40.0 Develop the "big picture" of database design and how to best organize data according to business rules and/or client needs. – The student will be able to:

- 40.01 Identify and analyze the phases of the database development process.
- 40.02 Explain what conceptual data modeling and database design involves.
- 40.03 Compare database development process with that of the application development process.
- 40.04 Identify the need for databases and why they are used.
- 40.05 Explain the various types of databases (i.e., flat file, relational) and the appropriate use of each.
- 40.06 Demonstrate proficiency in design methodology by completing appropriate tasks during the appropriate time of the developmental life cycle.
- 40.07 Demonstrate proficiency in design methodology by considering where the database will reside.

41.0 Develop the process of creating an entity by identifying relationships. – The student will be able to:

- 41.01 Identify and model various types of entities.
- 41.02 Identify naming and drawing conventions for entities.
- 41.03 Sequence the steps that are necessary for creation of an entity.
- 41.04 Analyze and model the relationships between entities.

42.0 Formulate and assemble initial entity relationship by expanding on modeling concepts. – The student will be able to:

- 42.01 Analyze and model attributes.
- 42.02 Identify unique identifiers for each entity.
- 42.03 Develop an entity relationship diagram tagging attributes with optionality.

43.0 Consider the degree and optionality of relationships of entities. – The student will be able to:

- 43.01 Create models and entity relationship information requirements and interviews.
- 43.02 Begin to differentiate between one-to-many, many-to-many and one-to-one relationships.
- 43.03 Identify relationship between two entities by reading a given diagram.
- 43.04 Create a relationship between instances of the same entity.
- 43.05 Read an entity relationship model in order to validate it.

- 44.0 Demonstrate proficiency in early construction stages of the data modeling process by using unique identifiers and many-to-many (M:M) relationships for building entity relationship diagrams. – The student will be able to:
- 44.01 Identify the significance of an attribute that has more than one value for each entity instance.
  - 44.02 Evaluate appropriate methods of storing validation rules for attributes.
  - 44.03 Recognize unique identifiers inherited from other entities.
  - 44.04 Sequence the steps involved in resolving a many-to-many relationship.
- 45.0 Demonstrate proficiency in advanced data constructs by analyzing business requirements and diagramming entities and relationships. – The student will be able to:
- 45.01 Validate that an attribute is properly placed based upon its dependence on its entity's unique identifier (UID).
  - 45.02 Model advanced data constructs including recursive relationships, subtypes, and exclusive relationships.
  - 45.03 Enforce referential integrity.
- 46.0 Apply the complex ERM information by fine-tuning entities and the process for relating them. – The student will be able to:
- 46.01 Describe a relational database and how it is different from other database systems.
  - 46.02 Define primary keys and foreign keys and describe their purpose.
  - 46.03 Describe what data integrity refers to and list some constraints.
  - 46.04 Explain how database design fits into the database development process.
  - 46.05 Translate an entity-relationship model into a relational database design.
- 47.0 Apply initial database design and normalization by following the set of house rules that determine how items are stored and retrieved. – The student will be able to:
- 47.01 Recognize raw data and evaluate the steps for creating a data group in unnormalized form (UNF).
- 48.0 Manipulating data. – The student will be able to:
- 48.01 Determine appropriate data inputs and outputs for an existing database.
  - 48.02 Demonstrate proficiency in record management (i.e., entering, editing, finding, selecting, sorting, deleting records).
  - 48.03 Change the layout of a datasheet.
  - 48.04 Create forms, reports, mailing labels, and charts using a database.
  - 48.05 Export data to appropriate software applications.
  - 48.06 Demonstrate proficiency in coordinating databases with appropriate software applications.
- 49.0 Building and modifying tables. – The student will be able to:
- 49.01 Create a database table.
  - 49.02 Create table structures and establish table relationships.
  - 49.03 Determine fields and assign data types in a database table.

- 49.04 Demonstrate appropriate manipulation of database tables (i.e., enter data, add and delete records).
- 49.05 Modify a database table by adding, deleting, and removing fields.
- 49.06 Demonstrate proficiency in the appropriate use of database wizards.
- 50.0 Performing queries and filtering records. – The student will be able to:
- 50.01 Design a query and extract specific data from a database table.
- 50.02 Create a calculated field.
- 50.03 Filter data in records by selection and by form.
- 50.04 Modify a saved query.
- 79.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 79.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 79.02 Locate, organize and reference written information from various sources. CM 3.0
- 79.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 79.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 79.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 79.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 79.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 80.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 80.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 80.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 80.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 80.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 81.0 Use information technology tools. – The student will be able to:
- 81.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 81.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 81.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 81.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 82.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 82.01 Describe the nature and types of business organizations. SY 1.0

- 82.02 Explain the effect of key organizational systems on performance and quality.
  - 82.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 82.04 Explain the impact of the global economy on business organizations.
- 85.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 85.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 85.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
  - 85.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
  - 85.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** IT Technical Support/Networking  
**Course Number:** 8203051  
**Course Credit:** 1

**Course Description:**

This course focuses on system support, maintenance, and basic network concepts. The content includes information technology career research and emphasis is placed on developing an understanding of various computer software and hardware applications including installation, troubleshooting, diagnostic techniques, and repair of system components, operating systems, and application software; common safety and preventive maintenance procedures; basic networking including physical and logical network connectivity; and effective behaviors that contribute to customer satisfaction.

51.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 51.01 Access reference materials.
- 51.02 Apply assertive service techniques.
- 51.03 Demonstrate interactive listening techniques.
- 51.04 Use professional business vocabulary appropriate for PC support services/networking environments.
- 51.05 Organize ideas and communicate oral and written messages appropriate for PC support services/networking environments.
- 51.06 Collaborate with individuals and teams to complete tasks and solve PC support services/networking problems.
- 51.07 Apply the writing process to the creation of PC support services/networking-related documents following designated business formats.
- 51.08 Apply appropriate communication etiquette in responding to user requests for assistance in a timely manner.
- 51.09 Demonstrate patience, active listening skills, and probing skills in responding to user requests for assistance.

52.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 52.01 Develop diplomatic methods to communicate with customers.

53.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 53.01 Research, compare and contrast career opportunities in PC and network support.
- 53.02 Analyze personal skills and aptitudes in comparison with PC and network support career opportunities.

- 53.03 Refine and implement a plan to facilitate personal growth and skill development related to PC and network support career opportunities.
- 53.04 Update and maintain an electronic career portfolio.
- 54.0 Participate in work-based learning experiences. – The student will be able to:
  - 54.01 Participate in work-based learning experiences in a PC support/networking information technology environment.
  - 54.02 Discuss the application of PC support and networking principles in an information technology environment.
  - 54.03 Discuss the use of PC support and networking technology in an information technology environment.
  - 54.04 Discuss the use of technology in a network support services environment.
  - 54.05 Discuss the management/supervisory skills needed in a network support services environment.
- 55.0 Perform installation and configuration activities. – The student will be able to:
  - 55.01 Install and configure software including device drivers.
  - 55.02 Install and configure operating system software.
  - 55.03 Install and configure application software.
  - 55.04 Install and configure peripherals including device drivers (e.g., scanners, cameras, printers).
  - 55.05 Supervise the testing of operating system management systems (e.g., registry, INI files).
  - 55.06 Prepare the hard disk and related issues for operating system installation (e.g., BIOS, disk controllers).
  - 55.07 Format and partition the hard disk.
  - 55.08 Verify the proper operation of the system (e.g., physical inspection, tests, utilities).
  - 55.09 Compare and contrast memory technologies (e.g., RAM, ROM, virtual memory, memory management)
  - 55.10 Demonstrate proficiency using various memory technologies (e.g., RAM, ROM, virtual memory, memory management).
- 56.0 Demonstrate proficiency using computer networks. – The student will be able to:
  - 56.01 Define networking and describe the purpose of a network.
  - 56.02 Describe the conceptual background of digital networks including terminology and basics.
  - 56.03 Compare and contrast various implementation models (e.g., TCP/IP protocols, OSI 7, NetBEUI, PX, cross mapping of protocols).
  - 56.04 Describe various networks and the advantages and disadvantages of each (e.g., peer to peer, client/server, mainframe/terminal).
  - 56.05 Describe the use and advantages and disadvantages of various network media (e.g., thinnet cable (coaxial), twisted pair (category 5), fiber optic).
  - 56.06 Describe class A, B, C networks and their relationship to the TCP/IP dotted decimal addressing.
  - 56.07 Describe an Ethernet network and the use of CSMA\CD.
  - 56.08 Describe the function of various network devices (e.g., hub, switched hub or switch, router bridge, gateway).

- 57.0 Perform the process for problem diagnostics and problem resolution through telephone, e-mail, remote access, or direct contact. – The student will be able to:
- 57.01 Identify, troubleshoot and propose solutions for configuration problems.
  - 57.02 Identify, troubleshoot and propose solutions for software problems.
  - 57.03 Identify, troubleshoot and propose solutions for hardware malfunctions.
  - 57.04 Identify, troubleshoot and propose solutions for network malfunctions.
  - 57.05 Plan and implement a system upgrade and downgrade.
  - 57.06 Evaluate data recovery using various techniques (e.g., MBR repair tools, rescue disks, disk image, backup).
  - 57.07 Organize and perform system maintenance activities (e.g., management console, SNMP, system monitors, diagnostics, virus management).
  - 57.08 Demonstrate corporate interaction proficiency (e.g., responsibility, interaction, communication).
- 58.0 Identify appropriate wide area network access strategies. – The student will be able to:
- 58.01 Compare and contrast various types of host access (e.g., leased lines, service providers, ISP's, DSL's, cable modems, wireless service providers).
  - 58.02 Compare and contrast various types of connections (e.g., dial up, network interface cards, crossover cables, straight through cables, null modem cables, client server) with a hub and wireless connections.
- 59.0 Identify appropriate local area network access strategies. – The student will be able to:
- 59.01 Compare and contrast various local area networks (e.g., token ring, Ethernet, Apple Talk).
  - 59.02 Compare and contrast various local area connections (e.g., Banyan vines, Novell, Windows NT, Windows2000).
- 83.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 83.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 83.02 Explain emergency procedures to follow in response to workplace accidents.
  - 83.03 Create a disaster and/or emergency response plan. SHE 2.0
- 84.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 84.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 84.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 84.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 84.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 86.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:

- |       |  |          |
|-------|--|----------|
| 86.01 | Identify and demonstrate positive work behaviors needed to be employable.  | ECD 1.0  |
| 86.02 | Develop personal career plan that includes goals, objectives, and strategies.  | ECD 2.0  |
| 86.03 | Examine licensing, certification, and industry credentialing requirements.   | ECD 3.0  |
| 86.04 | Maintain a career portfolio to document knowledge, skills, and experience.   | ECD 5.0  |
| 86.05 | Evaluate and compare employment opportunities that match career goals.   | ECD 6.0  |
| 86.06 | Identify and exhibit traits for retaining employment.  | ECD 7.0  |
| 86.07 | Identify opportunities and research requirements for career advancement.   | ECD 8.0  |
| 86.08 | Research the benefits of ongoing professional development.   | ECD 9.0  |
| 86.09 | Examine and describe entrepreneurship opportunities as a career planning option.                                     | ECD 10.0 |
| 87.0  | <u>Demonstrate personal money-management concepts, procedures, and strategies.</u> –<br>The student will be able to: |          |
| 87.01 | Identify and describe the services and legal responsibilities of financial institutions.                             | FL 2.0   |
| 87.02 | Describe the effect of money management on personal and career goals.  | FL 3.0   |
| 87.03 | Develop a personal budget and financial goals.   | FL 3.1   |
| 87.04 | Complete financial instruments for making deposits and withdrawals.  | FL 3.2   |
| 87.05 | Maintain financial records.  | FL 3.3   |
| 87.06 | Read and reconcile financial statements.   | FL 3.4   |
| 87.07 | Research, compare and contrast investment opportunities.   |          |

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** IT Internship  
**Course Number:** 8207350  
**Course Credit:** 1

**Course Description:**

The IT internship course provides students with the opportunity to stimulate their career interest and to demonstrate human relations, communications, and employability skills necessary for entry-level employment in the information technology industry. Students will enhance and apply instructional competencies learned in the classroom through the internship experience.

60.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

60.01 Demonstrate effective written and oral communication and listening skills in a workplace environment

60.02 Use professional business vocabulary related to information technology environments.

61.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

61.01 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.

61.02 Demonstrate the ability to resolve customer, employee, and employee/employer problems and concerns.

61.03 Demonstrate acceptable work habits and conduct in the workplace as defined by company policy.

61.04 Demonstrate legal and ethical behavior within the scope of job responsibilities.

61.05 Apply a positive customer service attitude.

61.06 Demonstrate an understanding of the organization's mission and services.

62.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

62.01 Update and maintain an electronic career portfolio.

62.02 Create an electronic resume.

62.03 Apply for an information technology position using a letter of application and resume.

62.04 Demonstrate successful interview techniques for an information technology position.

63.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:

- 63.01 Exhibit behavior supporting and promoting cultural and ethnic diversity.
  - 63.02 Demonstrate interpersonal skills that enhance team productivity and foster positive work ethics.
  - 63.03 Demonstrate appropriate dress and grooming for the workplace environment.
- 64.0 Participate in work-based learning experiences. – The student will be able to:
- 64.01 Perform tasks as outlined in the job performance skills plan.
  - 64.02 Display an acceptable level of productivity and quality control in an information technology position.
  - 64.03 Maintain appropriate records.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** IT Web/Digital Media  
**Course Number:** 8207360  
**Course Credit:** 1

**Course Description:**

This course focuses on digital media and advanced web tools. The content includes information technology career research; advanced HTML, DHTML, and XML commands and web page design; advanced web topics such as web scripting and web server administration; and basic multimedia applications including audio, video, graphics, text, and animation tools.

65.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 65.01 Use professional business vocabulary appropriate for multimedia information technology environments.
- 65.02 Organize ideas and communicate oral and written messages appropriate for multimedia information technology environments.
- 65.03 Collaborate with individuals and teams to complete tasks and solve multimedia information technology problems.
- 65.04 Apply the writing process to the creation of multimedia-related documents following designated business formats.

66.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 66.01 Update and maintain an electronic career portfolio.
- 66.02 Research, compare, and contrast career opportunities in web and multimedia design.
- 66.03 Analyze personal skills and aptitudes in comparison with web and multimedia design career opportunities.
- 66.04 Refine and implement a plan to facilitate personal growth and skill development related to web and multimedia design career opportunities.
- 66.05 Present an electronic career portfolio to an audience.
- 66.06 Update an electronic resume.
- 66.07 Conduct a comprehensive job search.
- 66.08 Develop a postsecondary education plan to prepare for an information technology career.

67.0 Participate in work-based learning experiences. – The student will be able to:

- 67.01 Participate in work-based learning experiences in a multimedia information technology environment.
- 67.02 Discuss the application of multimedia design principles in an information technology environment.

- 67.03 Discuss the use of multimedia design technology in an information technology environment.
- 68.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
  - 68.01 Identify and convert graphic formats.
  - 68.02 Demonstrate proficiency in adding Java scripts to web pages.
- 69.0 Demonstrate knowledge of presentation production issues. – The student will be able to:
  - 69.01 Demonstrate knowledge of copyright laws including copyright statute, disclaimers, and filing procedure.
  - 69.02 Demonstrate an understanding of graphic and other file formats (e.g., EPS, TIFF, JPEG, ASCII, MPEG, MIDI, AVI, WAV, etc.) and knowledge of image size when scanning and saving files for use in different presentation types (Web, computer, print, etc.).
  - 69.03 Demonstrate knowledge of presentation vocabulary/terms.
  - 69.04 Compare and contrast and utilize various audio/video output solutions and devices (e.g., DVD, CD-Rom, web).
- 70.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:
  - 70.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.
  - 70.02 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.
  - 70.03 Demonstrate knowledge of the roles and responsibilities of a multimedia production team (e.g. project manager, creative or design director, content experts, writers, graphic designers, animators, sound designers, videographer, interface designers/ programmers, etc.)
  - 70.04 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation where individuals on the team function in specific production roles that were outlined in mastery of 201.03.
  - 70.05 Create a self-running presentation with synchronized audio, convert presentation slides (e.g., PowerPoint) into streaming ASF files for use on the Web.
  - 70.06 Create and edit an animation that includes text, symbols, layers, buttons, and tweened animation.
  - 70.07 Construct web pages with streaming media content.
- 71.0 Demonstrate proficiency using video editing software and equipment. – The student will be able to:
  - 71.01 Demonstrate knowledge of video and sound editing vocabulary, terms, and acronyms.
  - 71.02 Demonstrate knowledge of non-linear editing software (NLEs) and compare the strengths and weaknesses of these programs.
  - 71.03 Identify components of non-linear video editing equipment.
  - 71.04 Set-up non-linear video editing equipment.

- 71.05 Compare offline to “real time” video editing.
  - 71.06 Use storyboarding to plan a short nonlinear video project that includes existing video footage with a title, transitions, background sound, voice-over, animation, and rolling credits.
  - 71.07 Create and edit a movie using video editing software that includes existing video footage with a title, transitions, background sound, voice-over, and rolling credits and output to video.
  - 71.08 Collaborate with team members to plan, edit, and shoot video footage utilizing advanced video editing techniques and output to video.
  - 71.09 Compare and contrast single track vs. multi-track audio/video editors.
  - 71.10 Compose and edit sound tracks.
- 72.0 Demonstrate proficiency in web page design applicable to the WWW. – The student will be able to:
- 72.01 Determine the objectives and the audience for Web pages.
  - 72.02 Identify design strategies to reach and keep an audience.
  - 72.03 Use storyboarding to plan a Web site.
  - 72.04 Create styles and other design elements (e.g. backgrounds, colors, fonts, buttons, etc.).
- 73.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design. – The student will be able to:
- 73.01 Apply style sheets for consistent Web site design.
  - 73.02 Create and edit images and photographs for Web pages using digital imaging software (e.g., ImageReady in Photoshop).
  - 73.03 Insert audio files into a Web page.
  - 73.04 Create, edit and integrate video files into a Web page.
  - 73.05 Create, edit and integrate animation files into a Web page.
  - 73.06 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
  - 73.07 Build, optimize, edit, and test web pages for publication.
  - 73.08 Create a web page that utilizes plug-ins.
  - 73.09 Demonstrate an understanding of network and web implementation issues (e.g., bandwidth, compression, streaming).
  - 73.10 Compare and contrast various methods by which information may be accessed on the Internet/Intranet (e.g., FTP, telnet, browser).
  - 73.11 Demonstrate an understanding of file encryption methods (e.g., secure server, unsecured server).
- 74.0 Demonstrate proficiency in using digital photography and digital imaging. – The student will be able to:
- 74.01 Demonstrate knowledge of ethics related to digital imaging and legal and consent issues.
  - 74.02 Apply effective design principles in digital photography compositions.
  - 74.03 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.

- 74.04 Compare and contrast still raster and still vector graphics.
- 75.0 Perform decision-making activities in a multimedia environment. – The student will be able to:
  - 75.01 Determine work priorities, the audience, project budgets, project specifications, and the production schedule.
  - 75.02 Evaluate and select appropriate software packages and multimedia tools to complete assigned tasks.
  - 75.03 Present and defend design projects.

2012 – 2013

## Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as a Help Desk Support Assistant, Help Desk Specialist (Help Desk Technician), and Help Desk Analyst in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster. This program offers a broad foundation of knowledge and skills to prepare students for employment in network support services positions.

The content includes but is not limited to software applications and operating systems including the use of advanced software/system features and programs; electronic communication via the Internet; Web page components; computer networking and network administration; the interrelationships among major components of networks; hardware and software selection and installation; integration techniques to enhance projects; and preventative hardware maintenance.

## Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and three additional occupational completion points. Secondary or postsecondary students who have previously completed the Business Technology Education Core will not have to repeat the core. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1041
B	CTS0086	Help Desk Support Assistant	300	15-1041
C	CTS0087	Help Desk Technician	300	15-1041
D	CTS0088	Help Desk Analyst	150	15-1041

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2
		AND			

OCP	Course Number	Course Title	Length	SOC Code	Level
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
B	8207210	PC Support 1	1 credit	15-1041	2
	8207220	PC Support 2	1 credit		3
C	8207230	PC Support 3	1 credit	15-1041	3
	8207240	PC Support 4	1 credit		3
D	8207250	PC Support 5	1 credit	15-1041	3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on

the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on

different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B070400) has four statewide articulation agreement approved by the Florida State Board of Education:

Computer Information Technology AS/AAS (1511010305/0511010305) – 9 credits  
Computer Engineering Technology AS/AAS (1615120100/0615120100) – 6 credits  
Networking Services Technology AS/AAS (1511090101/0511090101) – 6 credits  
Office Administration AS/AAS (1552020400/0552020400) – 6 credits

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.

- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.

- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

**Program Standards**

- 25.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing.
- 26.0 Participate in work-based learning experiences.
- 27.0 Perform installation and configuration activities.
- 28.0 Identify the purpose of and interrelationships among major hardware components.
- 29.0 Develop electronic communications skills.
- 30.0 Demonstrate an understanding of system software and application software.
- 31.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing.
- 32.0 Participate in work-based learning experiences.
- 33.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact.
- 34.0 Perform installation and configuration activities.
- 35.0 Identify the purpose of and interrelationships among major hardware components.
- 36.0 Perform e-mail activities.
- 37.0 Demonstrate an understanding of computer networks.
- 38.0 Develop electronic communications skills.
- 39.0 Demonstrate an understanding of system software and application software.
- 40.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing.
- 41.0 Participate in work-based learning experiences.
- 42.0 Perform installation and configuration activities.
- 43.0 Identify the purpose of and interrelationships among major hardware components.
- 44.0 Demonstrate proficiency using computer networks.
- 45.0 Develop electronic communications skills.
- 46.0 Demonstrate proficiency using system software and application software.
- 47.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing.
- 48.0 Participate in work-based learning experiences.
- 49.0 Perform installation and configuration activities.
- 50.0 Identify the purpose of and interrelationships among major hardware components.
- 51.0 Demonstrate proficiency using computer networks.
- 52.0 Develop electronic communications skills.
- 53.0 Demonstrate proficiency using system software and application software.
- 54.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing.
- 55.0 Participate in work-based learning experiences.
- 56.0 Perform installation and configuration activities.
- 57.0 Demonstrate proficiency using computer networks.
- 58.0 Demonstrate proficiency using system software and application software.
- 59.0 Develop telephone skills and techniques relevant to customer care services.
- 60.0 Demonstrate language arts knowledge and skills.
- 61.0 Demonstrate mathematics knowledge and skills.
- 62.0 Demonstrate science knowledge and skills.
- 63.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 64.0 Solve problems using critical thinking skills, creativity and innovation.
- 65.0 Use information technology tools.
- 66.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.

- 67.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 68.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 69.0 Describe the importance of professional ethics and legal responsibilities.
- 70.0 Explain the importance of employability skill and entrepreneurship skills.
- 71.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: PC Support Services**  
**PSAV Number: B070400**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
  
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
  
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
  
- 11.0 Perform e-mail activities. – The student will be able to:
  - 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
  
- 12.0 Demonstrate operating systems. – The student will be able to:
  - 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance . – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
  - 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
  - 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
  - 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
  - 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
  - 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.

- 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.

- 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
  - 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
  - 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
  - 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
  - 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
  - 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.

- 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
  - 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
  - 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
  - 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
  - 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: CTS0086**

**Occupational Completion Point – B**

**Help Desk Support Assistant – 300 Hours – SOC Code 15-1041**

- 25.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 25.01 Communicate in a multicultural setting (e.g., with people from varying international, cultural, ethnic, and racial backgrounds).
- 26.0 Participate in work-based learning experiences. – The student will be able to:
- 26.01 Participate in work-based learning experiences in a PC/software support services environment.
  - 26.02 Discuss the use of technology in a PC/software support services environment.
- 27.0 Perform installation and configuration activities. – The student will be able to:
- 27.01 Install operating system software.
- 28.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:
- 28.01 Demonstrate an understanding of the operation and purpose of hardware components.
  - 28.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 28.03 Apply basic rules for hardware safety.
- 29.0 Develop electronic communications skills. – The student will be able to:
- 29.01 Explain the operation of the Internet, its importance today, and its brief history.
  - 29.02 Identify the types of electronic communications software and hardware and explain their functions and use.
  - 29.03 Exhibit proficiency in using various features of a browser.
- 30.0 Demonstrate an understanding of system software and application software. – The student will be able to:
- 30.01 Perform word processing, spreadsheet, database, presentation, desktop publishing, and accounting activities with software commonly used in business.
  - 30.02 Identify software problems to execute appropriate course of action.
- 31.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 31.01 Communicate in a multicultural setting (e.g., with people from varying international, cultural, ethnic, and racial backgrounds).
  - 31.02 Communicate technical information in a concise, understandable manner to a non-technical audience both verbally and in writing.
  - 31.03 Contribute technical solutions to a resource library.
  - 31.04 Demonstrate active listening techniques.
- 32.0 Participate in work-based learning experiences. – The student will be able to:

- 32.01 Participate in work-based learning experiences in a PC/software support services environment.
- 32.02 Discuss the use of technology in a PC/software support services environment.
- 32.03 Compare and contrast the software applications used in a PC/software support services environment.
  
- 33.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact. – The student will be able to:
  - 33.01 Apply appropriate communication etiquette in responding to user requests for assistance in a timely manner.
  - 33.02 Demonstrate patience, active listening skills, and probing skills in responding to user requests for assistance.
  
- 34.0 Perform installation and configuration activities. – The student will be able to:
  - 34.01 Interpret error messages properly.
  - 34.02 Install operating system software.
  - 34.03 Customize operating systems.
  - 34.04 Install application software.
  
- 35.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:
  - 35.01 Demonstrate an understanding of the operation and purpose of hardware components.
  - 35.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 35.03 Apply basic rules for hardware safety.
  
- 36.0 Perform e-mail activities - The student will be able to:
  - 36.01 Describe e-mail capabilities and functions.
  - 36.02 Create and send e-mail messages with attachments.
  - 36.03 Reply to and forward e-mail messages.
  - 36.04 Organize and manage e-mail messages.
  - 36.05 Utilize all applicable e-mail options and functions.
  - 36.06 Use the Internet to perform e-mail activities.
  
- 37.0 Demonstrate an understanding of computer networks. – The student will be able to:
  - 37.01 Define networking and describe the purpose of a network.
  - 37.02 Describe the various types of network topologies.
  
- 38.0 Develop electronic communications skills. – The student will be able to:
  - 38.01 Explain the operation of the Internet, its importance today, and its brief history.
  - 38.02 Identify the types of electronic communications software and hardware and explain their functions and use.
  - 38.03 Exhibit proficiency in using various features of a browser.
  - 38.04 Demonstrate ethical use of the Internet.

- 39.0 Demonstrate an understanding of system software and application software. – The student will be able to:
- 39.01 Perform word processing, spreadsheet, database, presentation, desktop publishing, and accounting activities with software commonly used in business.
  - 39.02 Identify software problems to execute appropriate course of action.
  - 39.03 Diagnose software problems to execute appropriate course of action.
  - 39.04 Perform system backup.
- 60.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 60.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 60.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 60.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 61.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 61.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 61.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 61.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 62.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 62.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 62.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 63.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 63.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 63.02 Locate, organize and reference written information from various sources. CM 3.0
  - 63.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 63.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 63.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 63.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 63.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 64.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 64.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 64.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0

- 64.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 64.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 65.0 Use information technology tools. – The student will be able to:
- 65.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 65.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 65.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 65.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 66.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 66.01 Describe the nature and types of business organizations. SY 1.0
- 66.02 Explain the effect of key organizational systems on performance and quality.
- 66.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 66.04 Explain the impact of the global economy on business organizations.
- 69.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 69.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 69.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 69.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 69.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0087****Occupational Completion Point – C****Help Desk Technician – 300 Hours – SOC Code 15-1041**

- 40.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 40.01 Contribute technical solutions to a resource library.
- 40.02 Collaborate with associates to resolve user technical difficulties.
- 40.03 Use appropriate etiquette and manners when communicating with people of varying cultures.
- 41.0 Participate in work-based learning experiences. – The student will be able to:

- 41.01 Participate in work-based learning experiences in a PC/software support services environment.
- 41.02 Compare and contrast the software applications used in a PC/software support services environment.
- 42.0 Perform installation and configuration activities. – The student will be able to:
  - 42.01 Install and configure software including device drivers.
- 43.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:
  - 43.01 Demonstrate an understanding of the operation and purpose of hardware components.
- 44.0 Demonstrate proficiency using computer networks. – The student will be able to:
  - 44.01 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
- 45.0 Develop electronic communications skills. – The student will be able to:
  - 45.01 Select and use appropriate electronic communications software and hardware for specific tasks.
  - 45.02 Compare and contrast Internet software and protocols.
- 46.0 Demonstrate proficiency using system software and application software. – The student will be able to:
  - 46.01 Identify software problems to execute appropriate course of action.
  - 46.02 Perform advanced word processing, spreadsheet, database, presentation, desktop publishing, and accounting activities with software commonly used in business.
- 47.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
  - 47.01 Collaborate with associates to resolve user technical difficulties.
- 48.0 Participate in work-based learning experiences. – The student will be able to:
  - 48.01 Participate in work-based learning experiences in a PC/software support services environment.
  - 48.02 Discuss the management/supervisory skills needed in a PC/software support services environment.
- 49.0 Perform installation and configuration activities. – The student will be able to:
  - 49.01 Resolve computer error messages.

- 50.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:
  - 50.01 Demonstrate preventative hardware maintenance.
- 51.0 Demonstrate proficiency using computer networks. – The student will be able to:
  - 51.01 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
  - 51.02 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).
- 52.0 Develop electronic communications skills. – The student will be able to:
  - 52.01 Diagnose and resolve electronic communications operational problems.
  - 52.02 Identify the components of a Web page.
- 53.0 Demonstrate proficiency using system software and application software. – The student will be able to:
  - 53.01 Refine and resolve software performance issues using advanced software/system features and programs.
  - 53.02 Apply integration techniques to enhance business software application projects.
  - 53.03 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.

- 67.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 67.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 67.02 Explain emergency procedures to follow in response to workplace accidents.
  - 67.03 Create a disaster and/or emergency response plan. SHE 2.0
- 68.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 68.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 68.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 68.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 68.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 70.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 70.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 70.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 70.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 70.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 70.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 70.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 70.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 70.08 Research the benefits of ongoing professional development. ECD 9.0
  - 70.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 71.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 71.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 71.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 71.03 Develop a personal budget and financial goals. FL 3.1
  - 71.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 71.05 Maintain financial records. FL 3.3
  - 71.06 Read and reconcile financial statements. FL 3.4
  - 71.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0088****Occupational Completion Point – D****Help Desk Analyst – 150 Hours – SOC Code 15-1041**

- 54.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 54.01 Determine when more information is needed and ask appropriate questions.
- 55.0 Participate in work-based learning experiences. – The student will be able to:
  - 55.01 Participate in work-based learning experiences in a PC/software support services environment.
- 56.0 Perform installation and configuration activities. – The student will be able to:
  - 56.01 Perform procedures for installing and replacing hardware.
- 57.0 Demonstrate proficiency using computer networks. – The student will be able to:
  - 57.01 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
- 58.0 Demonstrate proficiency using system software and application software. – The student will be able to:
  - 58.01 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.
- 59.0 Develop telephone skills and techniques relevant to customer care services. – The student will be able to:
  - 59.01 Apply call center vocabulary.
  - 59.02 Listen and input information simultaneously.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Demonstrate basic file management skills.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers, integrating a variety of information.
- 02.03 Prepare and deliver an oral report with appropriate materials to the class
- 02.04 Participate in large group discussions as a member and/or a leader.
- 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 02.06 Accurately follow written and oral instructions.
- 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
- 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic file management skills.
- 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
- 01.07 Describe ethical issues and problems associated with computers and information systems.
- 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.

02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
- 02.02 Accurately follow written and oral instructions.
- 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
- 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
- 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
- 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
- 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
- 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
- 08.08 Build mentor relationships with local professionals in the industry.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Accept constructive criticism.
- 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
- 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 11.0 Perform e-mail activities. – The student will be able to:
- 11.01 Describe e-mail capabilities and functions.
- 11.02 Use the Internet to perform e-mail activities.
- 12.0 Demonstrate operating systems. – The student will be able to:
- 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 12.03 Demonstrate a working knowledge of standard file formats.
  - 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 13.0 Develop an awareness of emerging technologies. – The student will be able to:
- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computing for College and Careers  
**Course Number:** 8209020  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** PC Support 1  
**Course Number:** 8207210  
**Course Credit:** 1

**Course Description:**

This course is designed to develop entry-level skills for PC support services. Emphasis is placed on developing an understanding of various computer software applications and computer hardware.

25.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

25.01 Communicate in a multicultural setting (e.g., with people from varying international, cultural, ethnic, and racial backgrounds).

26.0 Participate in work-based learning experiences. – The student will be able to:

26.01 Participate in work-based learning experiences in a PC/software support services environment.

26.02 Discuss the use of technology in a PC/software support services environment.

27.0 Perform installation and configuration activities. – The student will be able to:

27.01 Install operating system software.

28.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:

28.01 Demonstrate an understanding of the operation and purpose of hardware components.

28.02 Demonstrate proficiency in basic preventative hardware maintenance.

28.03 Apply basic rules for hardware safety.

29.0 Develop electronic communications skills. – The student will be able to:

29.01 Explain the operation of the Internet, its importance today, and its brief history.

29.02 Identify the types of electronic communications software and hardware and explain their functions and use.

29.03 Exhibit proficiency in using various features of a browser.

30.0 Demonstrate an understanding of system software and application software. – The student will be able to:

30.01 Perform word processing, spreadsheet, database, presentation, desktop publishing, and accounting activities with software commonly used in business.

30.02 Identify software problems to execute appropriate course of action.

- 60.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 60.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 60.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 60.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 61.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 61.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 61.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 61.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 62.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 62.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 62.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** PC Support 2  
**Course Number:** 8207220  
**Course Credit:** 1

**Course Description:**

This course continues the development of basic entry-level skills for PC support services. The content includes software applications and operating systems, electronic communication via the Internet, and an introduction to computer networking.

31.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 31.01 Communicate in a multicultural setting (e.g., with people from varying international, cultural, ethnic, and racial backgrounds).
- 31.02 Communicate technical information in a concise, understandable manner to a non-technical audience both verbally and in writing.
- 31.03 Contribute technical solutions to a resource library.
- 31.04 Demonstrate active listening techniques.

32.0 Participate in work-based learning experiences. – The student will be able to:

- 32.01 Participate in work-based learning experiences in a PC/software support services environment.
- 32.02 Discuss the use of technology in a PC/software support services environment.
- 32.03 Compare and contrast the software applications used in a PC/software support services environment.

33.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact. – The student will be able to:

- 33.01 Apply appropriate communication etiquette in responding to user requests for assistance in a timely manner.
- 33.02 Demonstrate patience, active listening skills, and probing skills in responding to user requests for assistance.

34.0 Perform installation and configuration activities. – The student will be able to:

- 34.01 Interpret error messages properly.
- 34.02 Install operating system software.
- 34.03 Customize operating systems.
- 34.04 Install application software.

35.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:

- 35.01 Demonstrate an understanding of the operation and purpose of hardware components.
- 35.02 Demonstrate proficiency in basic preventative hardware maintenance.
- 35.03 Apply basic rules for hardware safety.
  
- 36.0 Perform e-mail activities. – The student will be able to:
  - 36.01 Describe e-mail capabilities and functions.
  - 36.02 Create and send e-mail messages with attachments.
  - 36.03 Reply to and forward e-mail messages.
  - 36.04 Organize and manage e-mail messages.
  - 36.05 Utilize all applicable e-mail options and functions.
  - 36.06 Use the Internet to perform e-mail activities.
  
- 37.0 Demonstrate an understanding of computer networks. – The student will be able to:
  - 37.01 Define networking and describe the purpose of a network.
  - 37.02 Describe the various types of network topologies.
  
- 38.0 Develop electronic communications skills. – The student will be able to:
  - 38.01 Demonstrate ethical use of the Internet.
  
- 39.0 Demonstrate an understanding of system software and application software. – The student will be able to:
  - 39.01 Diagnose software problems to execute appropriate course of action.
  - 39.02 Perform system backup.
  
- 63.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
  - 63.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 63.02 Locate, organize and reference written information from various sources. CM 3.0
  - 63.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 63.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 63.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 63.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 63.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
  
- 64.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
  - 64.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 64.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 64.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0

- 64.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 65.0 Use information technology tools. – The student will be able to:
- 65.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 65.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 65.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 65.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 66.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 66.01 Describe the nature and types of business organizations. SY 1.0
  - 66.02 Explain the effect of key organizational systems on performance and quality.
  - 66.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 66.04 Explain the impact of the global economy on business organizations.
- 69.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 69.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 69.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
  - 69.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
  - 69.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** PC Support 3  
**Course Number:** 8207230  
**Course Credit:** 1

**Course Description:**

This course continues the study of PC support services and is designed to develop advanced skills for employment. The content includes advanced software applications, the interrelationships among major components of networks, hardware installation, and selection of electronic communications software and hardware.

40.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

- 40.01 Contribute technical solutions to a resource library.
- 40.02 Collaborate with associates to resolve user technical difficulties.
- 40.03 Use appropriate etiquette and manners when communicating with people of varying cultures.

41.0 Participate in work-based learning experiences. – The student will be able to:

- 41.01 Participate in work-based learning experiences in a PC/software support services environment.
- 41.02 Compare and contrast the software applications used in a PC/software support services environment.

42.0 Perform installation and configuration activities. – The student will be able to:

- 42.01 Install and configure software including device drivers.

43.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:

- 43.01 Demonstrate an understanding of the operation and purpose of hardware components.

44.0 Demonstrate proficiency using computer networks. – The student will be able to:

- 44.01 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).

45.0 Develop electronic communications skills. – The student will be able to:

- 45.01 Select and use appropriate electronic communications software and hardware for specific tasks.

- 45.02 Compare and contrast Internet software and protocols.
- 46.0 Demonstrate proficiency using system software and application software. – The student will be able to:
- 46.01 Identify software problems to execute appropriate course of action.
- 46.02 Perform advanced word processing, spreadsheet, database, presentation, desktop publishing, and accounting activities with software commonly used in business.
- 67.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 67.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 67.02 Explain emergency procedures to follow in response to workplace accidents.
- 67.03 Create a disaster and/or emergency response plan. SHE 2.0
- 68.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 68.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 68.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 68.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 68.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 70.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 70.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 70.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 70.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 70.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 70.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 70.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 70.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 70.08 Research the benefits of ongoing professional development. ECD 9.0
- 70.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 71.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 71.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 71.02 Describe the effect of money management on personal and career goals. FL 3.0
- 71.03 Develop a personal budget and financial goals. FL 3.1
- 71.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 71.05 Maintain financial records. FL 3.3

- 71.06 Read and reconcile financial statements.
- 71.07 Research, compare and contrast investment opportunities.

FL 3.4

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** PC Support 4  
**Course Number:** 8207240  
**Course Credit:** 1

**Course Description:**

This course continues the development of advanced skills for entry –level employment in PC support services positions. The content includes utilization of advanced software/system features and programs, integration techniques to enhance projects, network administration, components of Web pages, and preventative hardware maintenance.

47.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

47.01 Collaborate with associates to resolve user technical difficulties.

48.0 Participate in work-based learning experiences. – The student will be able to:

48.01 Participate in work-based learning experiences in a PC/software support services environment.

48.02 Discuss the management/supervisory skills needed in a PC/software support services environment.

49.0 Perform installation and configuration activities. – The student will be able to:

49.01 Resolve computer error messages.

50.0 Identify the purpose of and interrelationships among major hardware components. – The student will be able to:

50.01 Demonstrate preventative hardware maintenance.

51.0 Demonstrate proficiency using computer networks. – The student will be able to:

51.01 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.

51.02 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).

52.0 Develop electronic communications skills - The student will be able to:

52.01 Diagnose and resolve electronic communications operational problems.

52.02 Identify the components of a Web page.

53.0 Demonstrate proficiency using system software and application software. – The student will be able to:

- 53.01 Refine and resolve software performance issues using advanced software/system features and programs.
- 53.02 Apply integration techniques to enhance business software application projects.
- 53.03 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** PC Support 5  
**Course Number:** 8207250  
**Course Credit:** 1

**Course Description:**

This course continues the development of advanced skills for entry –level employment in PC support services positions. The content includes utilization of advanced software/system features and programs, integration techniques to enhance projects, network administration, components of Web pages, and preventative hardware maintenance.

54.0 Use technology to apply communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:

54.01 Determine when more information is needed and ask appropriate questions.

55.0 Participate in work-based learning experiences. – The student will be able to:

55.01 Participate in work-based learning experiences in a PC/software support services environment.

56.0 Perform installation and configuration activities. – The student will be able to:

56.01 Perform procedures for installing and replacing hardware.

57.0 Demonstrate proficiency using computer networks. – The student will be able to:

57.01 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).

58.0 Demonstrate proficiency using system software and application software. – The student will be able to:

58.01 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.

59.0 Develop telephone skills and techniques relevant to customer care services. – The student will be able to:

59.01 Apply call center vocabulary.

59.02 Listen and input information simultaneously.

2012 – 2013

Secondary		PSAV	
Basic Skills Level	N/A	Mathematics:	9
		Language:	9
		Reading:	9

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in digital media, new media, and multimedia positions in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to an overview of the skills needed for entry-level positions in these career fields through practical experiences in digital photography, Web page design, digital video editing, and presentation development. Specialized skills in multimedia presentations and production such as video editing, audio input, and simple animation are used to produce a variety of multimedia projects.

### Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and three additional occupational completion points. Secondary students who have previously completed the Business Technology Education Core will not have to repeat the core. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040*	Information Technology Assistant	150	15-1041
B	GRA0001	Presentation Specialist	150	27-1014
C	GRA0002	Presentation Graphic Artist	150	27-1014
D	GRA0003	Web Production/Design Assistant	150	27-1014

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2

OCP	Course Number	Course Title	Length	SOC Code	Level
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
B	8207410	New Media and Digital Imaging Fundamentals	1 credit	27-1014	2
C	8207420	Digital Video and Sound Fundamentals	1 credit	27-1014	2
D	8207110	Web Design 1	1 credit	27-1014	2

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported

accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND****Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR****Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.

11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

**Program Standards**

- 25.0 Demonstrate knowledge of presentation production issues.
- 26.0 Demonstrate proficiency in using presentation software and equipment.
- 27.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page creation.
- 28.0 Demonstrate proficiency in using Digital Photography and Digital Imaging.
- 29.0 Demonstrate proficiency in using presentation software and equipment.
- 30.0 Demonstrate proficiency using video editing software and equipment.
- 31.0 Demonstrate language arts knowledge and skills.

- 32.0 Demonstrate mathematics knowledge and skills.
- 33.0 Demonstrate science knowledge and skills.
- 34.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 35.0 Solve problems using critical thinking skills, creativity and innovation.
- 36.0 Use information technology tools.
- 37.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 38.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 39.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 40.0 Describe the importance of professional ethics and legal responsibilities.
- 41.0 Explain the importance of employability skill and entrepreneurship skills.
- 42.0 Demonstrate personal money-management concepts, procedures, and strategies.

### **Web Design 1 Competencies**

- 01.0 Participate in work-based learning experiences.
- 02.0 Perform e-mail activities.
- 03.0 Demonstrate proficiency using operating systems.
- 04.0 Perform decision making activities.
- 05.0 Demonstrate proficiency navigating the Internet, intranet, and the WWW.
- 06.0 Demonstrate proficiency using HTML commands.
- 07.0 Demonstrate proficiency in page design applicable to the WWW.
- 08.0 Develop an awareness of Internet/intranet tools.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:** New Media Technology  
**PSAV Number:** B077400

**Course Number:** OTA0040  
**Occupational Completion Point – A**  
**Multimedia Production Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
  
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
  
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
  
- 11.0 Perform e-mail activities. – The student will be able to:
  - 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
  
- 12.0 Demonstrate operating systems. – The student will be able to:
  - 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.

- 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the www. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.

- 16.0 Demonstrate proficiency in page design applicable to the www. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).

- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (osi) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: GRA0001**

**Occupational Completion Point – B**

**Presentation Specialist – 150 Hours – SOC Code 27-1014**

- 25.0 Demonstrate knowledge of presentation production issues. – The student will be able to:
- 25.01 Identify characteristics of various types of presentations informing, selling, teaching, entertaining).
  - 25.02 Identify presentation materials (e.g.. handouts, seminar notebooks, business cards, coupons, etc.) and presentation marketing mediums (ex. print media such as newspaper, magazines; TV; movies; computer presentations; interactive CD ROM; kiosks, and Web pages, etc.).
  - 25.03 Identify design characteristics (fonts, size and styles, backgrounds, etc.) that are suited for each type of presentation format and material.
  - 25.04 Demonstrate knowledge of copyright laws including copyright statue, disclaimers, and filing procedures.
  - 25.05 Research and identify skills needed for career positions in multimedia.
  - 25.06 Demonstrate an understanding of graphic and other file formats (e.g., EPS, TIFF, JPEG, ASCII, MPEG, MIDI, AVI, WAV, etc.) and knowledge of image size when scanning and saving files for use in different presentation types (Web, computer, print, etc.).
  - 25.07 Demonstrate knowledge of presentation vocabulary/terms.
- 26.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:
- 26.01 Produce a simple presentation that includes handouts and present it using a projection system.
- 27.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page creation. – The student will be able to:
- 27.01 Create and edit images, photographs for Web pages using digital imaging software (e.g. ImageReady in Photoshop).
  - 27.02 Optimize images to make them “Web ready”.
  - 27.03 Demonstrate knowledge of image formats related to photos and graphics on the Internet (e.g. Graphic formats (Tiff & EPS), Web formats (JPEG, GIF, PNG), etc.).
  - 27.04 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
  - 27.05 Save and export a photograph to the Web in the format best for image quality and file size.
- 28.0 Demonstrate proficiency in using digital photography and digital imaging. – The student will be able to:
- 28.01 Demonstrate knowledge of ethics related to digital imaging, and legal and consent issues.
  - 28.02 Apply effective design principles in digital photography compositions.
  - 28.03 Illustrate the essence of an event, quote, or slogan through digital photography/imaging.
  - 28.04 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.
  - 28.05 Demonstrate skill in scanning and cropping photographs.

- 28.06 Incorporate scanned or digitally taken photographs into documents (poster, brochure, card, photo journalism story, report or book covers, letterhead, etc.) that have been designed using desktop publishing software or the desktop publishing features of word processing software.
- 31.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 31.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 31.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 31.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 32.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 32.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 32.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 32.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 33.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 33.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 33.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

**Course Number: GRA0002**  
**Occupational Completion Point – C**  
**Presentation Graphic Artist – 150 Hours – SOC Code 27-1014**

- 29.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:
- 29.01 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.
- 29.02 Demonstrate knowledge of the roles and responsibilities of a multimedia production team (e.g. project manager, creative or design director, content experts, writers, graphic designers, animators, sound designers, videographer, interface designers/programmers, etc.).
- 29.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation.
- 30.0 Demonstrate proficiency using video editing software and equipment. – The student will be able to:
- 30.01 Demonstrate knowledge of video and sound editing vocabulary, terms, and acronyms.

- 30.02 Demonstrate knowledge of non-linear editing software (NLEs) and compare the strengths and weaknesses of these programs.
- 30.03 Identify components of non-linear video editing equipment.
- 30.04 Set-up non-linear video editing equipment.
- 30.05 Compare offline to “real time” video editing.
- 30.06 Use storyboarding to plan a short nonlinear video project that includes existing video footage with a title, transitions, background sound, voice-over, animation, and rolling credits.
- 30.07 Create and edit a movie using video editing software that includes existing video footage with a title, transitions, background sound, voice-over, and rolling credits and output to video.
- 30.08 Collaborate with team members to create a short movie utilizing good lighting and sound: plan, shoot, and edit video footage as a team.
- 30.09 Using a video editor, create animated GIFs.
- 30.10 Collaborate with team members to plan, edit, and shoot video footage utilizing advanced video editing techniques and output to video.
- 30.11 Discuss the use of batch processing and project trimming.
- 30.12 Plan, create, edit and present a short nonlinear QuickTime movie with title, transitions, sub and virtual clips, sound, background music, voice-over, and credits.
- 34.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 34.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 34.02 Locate, organize and reference written information from various sources. CM 3.0
- 34.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 34.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 34.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 34.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 34.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 35.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 35.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 35.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 35.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 35.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 36.0 Use information technology tools. – The student will be able to:
- 36.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0

- 36.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 36.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 36.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 37.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 37.01 Describe the nature and types of business organizations. SY 1.0
- 37.02 Explain the effect of key organizational systems on performance and quality.
- 37.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 37.04 Explain the impact of the global economy on business organizations.
- 40.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 40.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 40.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 40.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 40.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: GRA0003****Occupational Completion Point – D****Web Production/Design Assistant – 150 Hours – SOC Code 27-1014**

- 01.0 Participate in work-based learning experiences. – The student will be able to:
- 01.01 Participate in work-based learning experiences in a Web Design environment.
- 01.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
- 01.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 02.0 Perform e-mail activities. – The student will be able to:
- 02.01 Describe e-mail capabilities and functions.
- 02.02 Create and send e-mail messages with attachments.
- 02.03 Reply to and forward e-mail messages.
- 02.04 Organize and manage e-mail messages.
- 02.05 Utilize all applicable e-mail options and functions.
- 02.06 Use the Internet to perform e-mail activities.
- 02.07 Define the standards used by Internet/Intranet e-mail (e.g., pop3, mime).
- 02.08 Describe the issues involved in sending and receiving documents as e-mail attachments.

- 02.09 Identify privacy issues in the employee/employer relationship (e.g., avoid libel, spam, personal usage).
- 03.0 Demonstrate proficiency using operating systems. – The student will be able to:
  - 03.01 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 03.02 Describe the difference between relative and absolute path commands.
  - 03.03 Demonstrate a working knowledge of standard file formats.
  - 03.04 Demonstrate proficiency with help references.
- 04.0 Perform decision making activities. – The student will be able to:
  - 04.01 Determine work priorities.
  - 04.02 Evaluate and select appropriate software packages to complete assigned tasks.
  - 04.03 Evaluate information to be used and choose relevant material.
  - 04.04 Determine the audience.
  - 04.05 Compare and select appropriate multimedia tools.
- 05.0 Demonstrate proficiency navigating the Internet, intranet, and the WWW. – The student will be able to:
  - 05.01 Identify and describe Web terminology.
  - 05.02 Describe the history of the Internet and intranet.
  - 05.03 Describe the difference between a client and a server.
  - 05.04 Describe the difference between the Internet, intranet, and WWW.
  - 05.05 Describe the different methods by which information may be accessed on the Internet/intranet (e.g., browser, FTP, gopher, telnet, veronica).
  - 05.06 List the available resources and services on the Internet (e.g., electronic commerce, personal, government, business, etiquette, education, distance learning).
  - 05.07 Locate information on the Internet/intranet using a Web browser.
  - 05.08 Copy information from the Internet/intranet, save, and print using a Web browser.
  - 05.09 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 05.10 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 05.11 Identify and use search engines to locate information.
  - 05.12 Describe the various ways of communicating on the Internet/Intranet (e.g., e-mail, forums, IRC, CHAT, Listserv, Usenet, MOOs, etc.).
  - 05.13 Describe and observe Internet/intranet ethics and copyright laws.
  - 05.14 Identify methods to protect personal copyright.
- 06.0 Demonstrate proficiency using HTML commands. – The student will be able to:
  - 06.01 Identify elements of a Web page.
  - 06.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 06.03 Define basic HTML terminology.
  - 06.04 Analyze HTML source code developed by others.

- 06.05 Create a Web page using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 06.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 06.07 Add graphics to Web pages.
- 06.08 Edit and test HTML documents for accuracy and validity.
- 06.09 Use basic functions of HTML editors and converters.
- 06.10 Use basic functions of WYSIWYG editors.
  
- 07.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
  - 07.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 07.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 07.03 Identify and convert graphic formats.
  - 07.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD ROMS).
  - 07.05 Use image design software to create and edit images.
  
- 08.0 Develop an awareness of Internet/intranet tools. – The student will be able to:
  - 08.01 Describe the various hardware components used on the Internet/Intranet.
  - 08.02 Demonstrate the use of compression programs.
  - 08.03 Demonstrate the use of backups.
  
- 38.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
  - 38.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 38.02 Explain emergency procedures to follow in response to workplace accidents.
  - 38.03 Create a disaster and/or emergency response plan. SHE 2.0
  
- 39.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
  - 39.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 39.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 39.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 39.04 Employ mentoring skills to inspire and teach others. LT 5.0
  
- 41.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
  - 41.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 41.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 41.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0

- |       |  |          |
|-------|--|----------|
| 41.04 | Maintain a career portfolio to document knowledge, skills, and experience.               | ECD 5.0  |
| 41.05 | Evaluate and compare employment opportunities that match career goals.                   | ECD 6.0  |
| 41.06 | Identify and exhibit traits for retaining employment.                                    | ECD 7.0  |
| 41.07 | Identify opportunities and research requirements for career advancement.                 | ECD 8.0  |
| 41.08 | Research the benefits of ongoing professional development.                               | ECD 9.0  |
| 41.09 | Examine and describe entrepreneurship opportunities as a career planning option.         | ECD 10.0 |
| 42.0  | <u>Demonstrate personal money-management concepts, procedures, and strategies.</u> –     |          |
|       | The student will be able to:   |          |
| 42.01 | Identify and describe the services and legal responsibilities of financial institutions. | FL 2.0   |
| 42.02 | Describe the effect of money management on personal and career goals.                    | FL 3.0   |
| 42.03 | Develop a personal budget and financial goals.   | FL 3.1   |
| 42.04 | Complete financial instruments for making deposits and withdrawals.                      | FL 3.2   |
| 42.05 | Maintain financial records.  | FL 3.3   |
| 42.06 | Read and reconcile financial statements.   | FL 3.4   |
| 42.07 | Research, compare and contrast investment opportunities.                                 |          |

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

- 10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 10.01 Develop keyboarding skills to enter and manipulate text and data.
  - 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 10.03 Demonstrate basic file management skills.
- 11.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 11.02 Write clear and well-organized research papers, integrating a variety of information.
  - 11.03 Prepare and deliver an oral report with appropriate materials to the class
  - 11.04 Participate in large group discussions as a member and/or a leader.
  - 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 11.06 Accurately follow written and oral instructions.
  - 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computing for College and Careers  
**Course Number:** 8209020  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** New Media and Digital Imaging Fundamentals  
**Course Number:** 8207410  
**Course Credit:** 1

**Course Description:**

This course provides an overview of presentation guidelines and design elements associated with various presentation types. Effective digital photography composition and digital imaging software features including optimizing digital photographs for Web publication are covered. Students will create an electronic slide presentation using presentation software.

25.0 Demonstrate knowledge of presentation production issues. – The student will be able to:

- 25.01 Identify characteristics of various types of presentations informing, selling, teaching, entertaining).
- 25.02 Identify presentation materials (e.g.. handouts, seminar notebooks, business cards, coupons, etc.) and presentation marketing mediums (ex. print media such as newspaper, magazines; TV; movies; computer presentations; interactive CD ROM; kiosks, and Web pages, etc.).
- 25.03 Identify design characteristics (fonts, size and styles, backgrounds, etc.) that are suited for each type of presentation format and material.
- 25.04 Demonstrate knowledge of copyright laws including copyright statue, disclaimers, and filing procedures.
- 25.05 Research and identify skills needed for career positions in multimedia.
- 25.06 Demonstrate an understanding of graphic and other file formats (e.g., EPS, TIFF, JPEG, ASCII, MPEG, MIDI, AVI, WAV, etc.) and knowledge of image size when scanning and saving files for use in different presentation types (Web, computer, print, etc.).
- 25.07 Demonstrate knowledge of presentation vocabulary/terms.

26.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:

- 26.01 Produce a simple presentation that includes handouts and present it using a projection system.

27.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page creation. – The student will be able to:

- 27.01 Create and edit images, photographs for Web pages using digital imaging software (e.g. ImageReady in Photoshop).
- 27.02 Optimize images to make them “Web ready”.
- 27.03 Demonstrate knowledge of image formats related to photos and graphics on the Internet (e.g. Graphic formats (Tiff & EPS), Web formats (JPEG, GIF, PNG), etc.).

- 27.04 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
- 27.05 Save and export a photograph to the Web in the format best for image quality and file size.
- 28.0 Demonstrate proficiency in using digital photography and digital imaging. – The student will be able to:
- 28.01 Demonstrate knowledge of ethics related to digital imaging, and legal and consent issues.
- 28.02 Apply effective design principles in digital photography compositions.
- 28.03 Illustrate the essence of an event, quote, or slogan through digital photography/imaging.
- 28.04 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.
- 28.05 Demonstrate skill in scanning and cropping photographs.
- 28.06 Incorporate scanned or digitally taken photographs into documents (poster, brochure, card, photo journalism story, report or book covers, letterhead, etc.) that have been designed using desktop publishing software or the desktop publishing features of word processing software.
- 31.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 31.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 31.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 31.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 32.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 32.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 32.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 32.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 33.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 33.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 33.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Digital Video and Sound Fundamentals  
**Course Number:** 8207420  
**Course Credit:** 1

**Course Description:**

This course covers advanced planning and video editing for multimedia presentations. Students design presentations through various steps of development, implementation, and final output.

29.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:

29.01 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.

29.02 Demonstrate knowledge of the roles and responsibilities of a multimedia production team (e.g. project manager, creative or design director, content experts, writers, graphic designers, animators, sound designers, videographer, interface designers/programmers, etc.).

29.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation.

30.0 Demonstrate proficiency using video editing software and equipment. – The student will be able to:

30.01 Demonstrate knowledge of video and sound editing vocabulary, terms, and acronyms.

30.02 Demonstrate knowledge of non-linear editing software (NLEs) and compare the strengths and weaknesses of these programs.

30.03 Identify components of non-linear video editing equipment.

30.04 Set-up non-linear video editing equipment.

30.05 Compare offline to “real time” video editing.

30.06 Use storyboarding to plan a short nonlinear video project that includes existing video footage with a title, transitions, background sound, voice-over, animation, and rolling credits.

30.07 Create and edit a movie using video editing software that includes existing video footage with a title, transitions, background sound, voice-over, and rolling credits and output to video.

30.08 Collaborate with team members to create a short movie utilizing good lighting and sound: plan, shoot, and edit video footage as a team.

30.09 Using a video editor, create animated GIFs.

30.10 Collaborate with team members to plan, edit, and shoot video footage utilizing advanced video editing techniques and output to video.

30.11 Discuss the use of batch processing and project trimming.

- 30.12 Plan, create, edit and present a short nonlinear QuickTime movie with title, transitions, sub and virtual clips, sound, background music, voice-over, and credits.
- 34.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 34.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 34.02 Locate, organize and reference written information from various sources. CM 3.0
  - 34.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 34.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 34.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 34.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 34.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 35.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 35.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 35.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 35.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
  - 35.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 36.0 Use information technology tools. – The student will be able to:
- 36.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 36.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 36.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 36.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 37.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 37.01 Describe the nature and types of business organizations. SY 1.0
  - 37.02 Explain the effect of key organizational systems on performance and quality.
  - 37.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 37.04 Explain the impact of the global economy on business organizations.
- 40.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:

- |       |   |         |
|-------|---|---------|
| 40.01 | Evaluate and justify decisions based on ethical reasoning.  | ELR 1.0 |
| 40.02 | Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. | ELR 1.1 |
| 40.03 | Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace.                                    | ELR 1.2 |
| 40.04 | Interpret and explain written organizational policies and procedures.   | ELR 2.0 |

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 1  
**Course Number:** 8207110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of the Internet, Intranet, and WWW. The content includes operating systems; basic HTML commands; navigation of the Internet, Intranet, and Web; and Web page design.

- 01.0 Participate in work-based learning experiences. – The student will be able to:
- 01.01 Participate in work-based learning experiences in a Web Design environment.
  - 01.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 01.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 02.0 Perform e-mail activities. – The student will be able to:
- 02.01 Describe e-mail capabilities and functions.
  - 02.02 Create and send e-mail messages with attachments.
  - 02.03 Reply to and forward e-mail messages.
  - 02.04 Organize and manage e-mail messages.
  - 02.05 Utilize all applicable e-mail options and functions.
  - 02.06 Use the Internet to perform e-mail activities.
  - 02.07 Define the standards used by Internet/Intranet e-mail (e.g., pop3, mime).
  - 02.08 Describe the issues involved in sending and receiving documents as e-mail attachments.
  - 02.09 Identify privacy issues in the employee/employer relationship (e.g., avoid libel, spam, personal usage).
- 03.0 Demonstrate proficiency using operating systems. – The student will be able to:
- 03.01 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 03.02 Describe the difference between relative and absolute path commands.
  - 03.03 Demonstrate a working knowledge of standard file formats.
  - 03.04 Demonstrate proficiency with help references.
- 04.0 Perform decision making activities. – The student will be able to:
- 04.01 Determine work priorities.
  - 04.02 Evaluate and select appropriate software packages to complete assigned tasks.
  - 04.03 Evaluate information to be used and choose relevant material.
  - 04.04 Determine the audience.
  - 04.05 Compare and select appropriate multimedia tools.

05.0 Demonstrate proficiency navigating the Internet, intranet, and the WWW. – The student will be able to:

- 05.01 Identify and describe Web terminology.
- 05.02 Describe the history of the Internet and intranet.
- 05.03 Describe the difference between a client and a server.
- 05.04 Describe the difference between the Internet, intranet, and WWW.
- 05.05 Describe the different methods by which information may be accessed on the Internet/intranet (e.g., browser, FTP, gopher, telnet, veronica).
- 05.06 List the available resources and services on the Internet (e.g., electronic commerce, personal, government, business, etiquette, education, distance learning).
- 05.07 Locate information on the Internet/intranet using a Web browser.
- 05.08 Copy information from the Internet/intranet, save, and print using a Web browser.
- 05.09 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
- 05.10 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
- 05.11 Identify and use search engines to locate information.
- 05.12 Describe the various ways of communicating on the Internet/Intranet (e.g., e-mail, forums, IRC, CHAT, Listserv, Usenet, MOOs, etc.).
- 05.13 Describe and observe Internet/intranet ethics and copyright laws.
- 05.14 Identify methods to protect personal copyright.

06.0 Demonstrate proficiency using HTML commands. – The student will be able to:

- 06.01 Identify elements of a Web page.
- 06.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
- 06.03 Define basic HTML terminology.
- 06.04 Analyze HTML source code developed by others.
- 06.05 Create a Web page using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 06.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 06.07 Add graphics to Web pages.
- 06.08 Edit and test HTML documents for accuracy and validity.
- 06.09 Use basic functions of HTML editors and converters.
- 06.10 Use basic functions of WYSIWYG editors.

07.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 07.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
- 07.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
- 07.03 Identify and convert graphic formats.
- 07.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD ROMS).

- 07.05 Use image design software to create and edit images.
- 08.0 Develop an awareness of Internet/intranet tools. – The student will be able to:
- 08.01 Describe the various hardware components used on the Internet/Intranet.
- 08.02 Demonstrate the use of compression programs.
- 08.03 Demonstrate the use of backups.
- 38.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 38.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 38.02 Explain emergency procedures to follow in response to workplace accidents.
- 38.03 Create a disaster and/or emergency response plan. SHE 2.0
- 39.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 39.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 39.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 39.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 39.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 41.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 41.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 41.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 41.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 41.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 41.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 41.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 41.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 41.08 Research the benefits of ongoing professional development. ECD 9.0
- 41.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 42.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 42.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 42.02 Describe the effect of money management on personal and career goals. FL 3.0
- 42.03 Develop a personal budget and financial goals. FL 3.1
- 42.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 42.05 Maintain financial records. FL 3.3
- 42.06 Read and reconcile financial statements. FL 3.4
- 42.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Network Systems Administration  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8207440	B079300
CIP Number	0511090105	0511090105
Grade Level	9-12, 30, 31	30, 31
Standard Length	7 credits	1050 hours

CTSO	FBLA BPA	Phi Beta Lambda BPA
SOC Codes (all applicable)	15-1041; 15-1071; 15-1081	15-1041; 15-1071; 15-1081
Facility Code	[212] <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)	
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Statewide Articulation	<a href="http://www.fldoe.org/workforce/dwdframe/artic_frame.asp">http://www.fldoe.org/workforce/dwdframe/artic_frame.asp</a>	
Basic Skills Level	N/A	Mathematics: 9 Language: 9 Reading: 9

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as a Computer Support Assistant, Network Support Technician, Systems Administrator, Systems Engineer, Wireless Network Administrator, and Data Communications Analyst in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to instruction in computer literacy; software application support; basic hardware configuration and troubleshooting; networking technologies, troubleshooting, security, and administration; and customer service and human relations skills.

### Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and six additional occupational completion points. Secondary or postsecondary students who have previously completed the Business Technology Education Core will not have to repeat the core. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1041
B	EEV0504	Computer Support Assistant	150	15-1041
C	CTS0026	Network Support Technician	150	15-1071
D	CTS0027	Systems Administrator	150	15-1071
E	CTS0028	Systems Engineer	150	15-1081
F	CTS0029	Wireless Network Administrator	150	15-1081
G	EEV0317	Data Communications Analyst	150	15-1081

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2
		AND			
	8200330	Computer and Business Skills	.5 credit		2

OCP	Course Number	Course Title	Length	SOC Code	Level
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
B	8207020	Networking 1	1 credit	15-1041	2
C	8207441	Networking 2, Administration	1 credit	15-1071	3
D	8207442	Networking 3, Administration	1 credit	15-1071	3
E	8207443	Networking 4, Administration	1 credit	15-1081	3
F	8207060	Networking 5	1 credit	15-1081	3
G	8207070	Networking 6	1 credit	15-1081	3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computer and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computing for College and Careers	**	**	**	**	**	**	**	**	**	**	**	**

Networking 6	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported

accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B079300) has two statewide articulation agreement approved by the Florida State Board of Education:

Networking Services Technology AS/AAS (1511090101/0511090101) – 9 credits (12 credits if implemented as a Microsoft MCSA track)

Computer Engineering Technology AAS/AS (1615120100/0615120100) – 9 credits (12 credits if implemented as a Microsoft MCSA track)

For both of the above agreements, three additional credits awarded if implementation includes wireless coursework or CompTIA Linux+ and Server+ coursework.

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.

- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.

- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

**Program Standards**

- 25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules.
- 27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment.
- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems.
- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 35.0 Participate in work-based learning experiences.
- 36.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact.
- 37.0 Perform installation and configuration activities.
- 38.0 Demonstrate proficiency using computer networks.
- 39.0 Demonstrate proficiency in configuring and troubleshooting hardware devices and drivers.
- 40.0 Demonstrate proficiency in managing, monitoring, and optimizing system performance, reliability and availability.
- 41.0 Demonstrate proficiency in managing, configuring and troubleshooting storage use.
- 42.0 Demonstrate proficiency in configuring and troubleshooting network connections.
- 43.0 Demonstrate proficiency in implementing, monitoring, and troubleshooting security.
- 44.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 45.0 Participate in work-based learning experiences.
- 46.0 Administer accounts and resources on computers running server operating system software in a networked environment.
- 47.0 Modify user and computer accounts on computers running a server operating system in a networked environment.
- 48.0 Perform various administrative functions using groups.
- 49.0 Enable resource access with permissions, manage access to files and folders using permissions, and manage permission inheritance.
- 50.0 Implement printing in a networked environment utilizing a particular server operating system.

- 51.0 Set up a network-wide printing strategy to meet the needs of users and troubleshoot installation or configuration problems.
- 52.0 Utilize available permissions for managing access to global directory objects, how to move objects between organizational units in the same domain, and how to delegate control of an organizational unit.
- 53.0 Use group policy to configure folder redirection, browser connectivity, and the desktop.
- 54.0 Manage computer security in a networking environment.
- 55.0 Administer servers remotely.
- 56.0 Monitor server performance by using performance tools, configure and manage performance logs, configure and manage alerts, and manage system monitor views.
- 57.0 Collect performance data by monitoring primary server subsystems and identify system bottlenecks by using the performance monitoring software.
- 58.0 Maintaining device drivers.
- 59.0 Use software tools to manage and set up disks.
- 60.0 Use file encryption for security of data.
- 61.0 Plan for a computer disaster and use the features of a server operating system to prevent a disaster or recover when one occurs.
- 62.0 Manage and distribute critical software updates that resolve known security vulnerabilities and other stability issues.
- 63.0 Construct and assign IP addresses and isolate addressing issues associated with the IP routing process.
- 64.0 Configure an internet protocol (IP) address for client computers.
- 65.0 Configure name resolution mechanisms for clients on a network and describe the name resolution process.
- 66.0 Isolate common connectivity issues and describe how to use utilities and tools as part of this process.
- 67.0 Configure a routing solution for a network environment.
- 68.0 Allocate IP addressing in a network environment.
- 69.0 Manage the DHCP service to reflect changing client IP addressing needs and monitor DHCP server performance.
- 70.0 Assign computer names to the IP addresses of the source and destination hosts, and then use the computer name to contact the hosts.
- 71.0 Resolve host names by using domain name system.
- 72.0 Manage and monitor DNS servers to ensure that they are functioning properly and to optimize network performance.
- 73.0 Configure a server with the routing and remote access service, create appropriate remote access connections on a network access server, and configure users' access rights.
- 74.0 Manage and monitor network access and the network access services.
- 75.0 Perform installation of a network client operating system.
- 76.0 Install and configure hardware devices.
- 77.0 Configure and manage file systems.
- 78.0 Troubleshoot the boot process and other system issues.
- 79.0 Configure the desktop.
- 80.0 Configure IP addresses and name resolution.
- 81.0 Configure the client to work in a network environment.
- 82.0 Support remote users.
- 83.0 Configure a client OS for mobile computing.
- 84.0 Monitor resources and performance.
- 85.0 Apply communication skills (reading, writing, speaking, listening, and viewing) in a courteous, concise, and correct manner on personal and professional levels.

- 86.0 Participate in work-based learning experiences.
- 87.0 Plan a network infrastructure.
- 88.0 Plan and optimize a TCP/IP physical and logical network.
- 89.0 Plan and troubleshoot routing.
- 90.0 Plan a DHCP strategy.
- 91.0 Plan a DNS strategy.
- 92.0 Optimize and troubleshoot DNS.
- 93.0 Plan and troubleshoot IPSEC.
- 94.0 Plan a network access.
- 95.0 Troubleshoot network access.
- 96.0 Analyze global directory infrastructure.
- 97.0 Implement a global directory structure and domain.
- 98.0 Implement an organizational unit structure.
- 99.0 Implement user, group, and computer accounts.
- 100.0 Implement group policy.
- 101.0 Deploy and manage software by using group policies.
- 102.0 Implement sites to manage global directory replication.
- 103.0 Implement placement of domain controllers.
- 104.0 Use a framework for designing security and create a security design team.
- 105.0 Recognize and predict common threats by using a threat model.
- 106.0 Apply a framework for planning risk management.
- 107.0 Design security for physical resources.
- 108.0 Design security for computers.
- 109.0 Design security for accounts.
- 110.0 Design security for authentication.
- 111.0 Design security for data.
- 112.0 Design security for data transmission.
- 113.0 Design security for network perimeter.
- 114.0 Design an audit policy and an incident response procedure.
- 115.0 Participate in work-based learning experiences.
- 116.0 Demonstrate proficiency in applying radio frequency (RF) technologies.
- 117.0 Develop an awareness of wireless LAN technologies.
- 118.0 Perform implementation and management activities.
- 119.0 Develop an awareness of wireless security systems.
- 120.0 Demonstrate knowledge of wireless industry standards.
- 121.0 Participate in work-based learning experiences.
- 122.0 Demonstrate knowledge of general security concepts.
- 123.0 Develop an awareness of communication security concepts.
- 124.0 Develop an awareness of network infrastructure security.
- 125.0 Develop an awareness of cryptography and its relation to security.
- 126.0 Incorporate organizational and operational security in an appropriate and effective manner.
- 127.0 Demonstrate language arts knowledge and skills.
- 128.0 Demonstrate mathematics knowledge and skills.
- 129.0 Demonstrate science knowledge and skills.
- 130.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 131.0 Solve problems using critical thinking skills, creativity and innovation.
- 132.0 Use information technology tools.
- 133.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.

- 134.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 135.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 136.0 Describe the importance of professional ethics and legal responsibilities.
- 137.0 Explain the importance of employability skill and entrepreneurship skills.
- 138.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Network Support Services**  
**PSAV Number: B078000**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 11.0 Perform e-mail activities. – The student will be able to:
- 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
- 12.0 Demonstrate operating systems. – The student will be able to:
- 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
- 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
- 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
- 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
- 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
- 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
- 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
- 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
- 12.02 Identify components of an e-mail message.
- 12.03 Identify the components of an e-mail address.
- 12.04 Identify when to use different e-mail options.

- 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the www. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.

- 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the www. – The student will be able to:
  - 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
  - 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
  - 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
  - 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
  - 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.

- 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
  - 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (osi) model. – The student will be able to:
  - 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
  - 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
  - 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: EEV0504**

**Occupational Completion Point – B**

**Computer Support Assistant – 150 Hours – SOC Code 15-1041**

25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

25.01 Develop strategies for resolving customer conflicts.

26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules. – The student will be able to:

26.01 Identify and describe the functions of main processing boards (e.g., CPUs, RAM, ROM, bus architecture).

26.02 Identify and describe the functions of communication ports (e.g., serial and parallel ports).

26.03 Identify and describe the functions of peripheral devices (e.g., scanners, modems, hard drives, printers).

26.04 Identify and describe the components of portable systems (e.g., battery, LCD, AC adapter, PDAs).

26.05 Troubleshoot, install and upgrade computers and peripherals.

26.06 Perform system hardware setup Demonstrate an understanding of input/output devices.

26.07 Installation and configuration of applications software, hardware, and device drivers.

26.08 Demonstrate an understanding of the operation and purpose of hardware components.

26.09 Install operating system software.

26.10 Customize operating systems.

26.11 Install application software.

26.12 Perform storage formatting and preparation activities.

26.13 Identify data measurement (e.g., bits, bytes, kilobytes).

26.14 Install and Configure RAID.

26.15 Recognize and report on server room environmental issues (temperature, humidity/ESD/power surges, back-up).

27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment. – The student will be able to:

27.01 Troubleshoot a personal computer system

27.02 Identify configuration problems.

27.03 Identify software problems.

27.04 Identify hardware malfunctions.

27.05 Identify network malfunctions

27.06 Resolve computer error messages.

27.07 Understand and troubleshoot memory and cache systems.

27.08 Verify that drives are the appropriate type.

27.09 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.

- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace. – The student will be able to:
- 28.01 Apply basic rules for hardware safety.
  - 28.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 28.03 Special disposal procedures that comply with environmental guidelines for batteries, CRTs, toner kits/cartridges, chemical solvents and cans, and MSDS.
  - 28.04 Apply ergonomic principles applicable to the configuration of computer workstations.
  - 28.05 Describe ethical issues and problems associated with computers and information systems.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems. – The student will be able to:
- 29.01 Identify EDO RAM, DRAM, SRAM, RIMM, VRAM, SDRAM, and WRAM.
  - 29.02 Identify memory banks, memory chips (8-bit, 16-bit, and 32-bit), SIMMS (Single In-line Memory Module), DIMMS (Dual In-line Memory Module), parity chips versus non-parity chips.
  - 29.03 Identify printer parallel port, COM/serial port, floppy drive, hard drive, Memory, and Boot sequence.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems. – The student will be able to:
- 30.01 Identify types of printers—Laser, Inkjet, Dot Matrix.
  - 30.02 Identify care and service techniques and common problems with primary printer types.
  - 30.03 Implement and manage printing on a network.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked. – The student will be able to:
- 31.01 Define networking and describe the purpose of a network.
  - 31.02 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
  - 31.03 Describe the various types of network topologies.
  - 31.04 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
  - 31.05 Configure network and verify network connectivity.
  - 31.06 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).
  - 31.07 Develop user logon procedures.

- 31.08 Utilize network management infrastructures (e.g., network monitoring, alerting, security) to perform administrative tasks.
  - 31.09 Identify common backup strategies and procedures.
  - 31.10 Select and use appropriate electronic communications software and hardware for specific tasks.
  - 31.11 Compare and contrast Internet software and protocols.
  - 31.12 Diagnose and resolve electronic communications operational problems.
  - 31.13 Design and implement directory tree structures.
  - 31.14 Install services tools (SNMP, backup software)
  - 31.15 Perform full backup and verify backup
  - 31.16 Identify bottlenecks (e.g., processor, bus transfer, I/O, disk I/O, network I/O, memory).
  - 31.17 Use the concepts of fault tolerance/fault recovery to create a disaster recovery plan.
  - 31.18 Document and test disaster recovery plan regularly, and update as needed.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, internet, remote access, or direct contact. – The student will be able to:
- 32.01 Apply call center vocabulary.
  - 32.02 Listen and input information simultaneously.
  - 32.03 Apply first response assistance for minor repair work.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems. – The student will be able to:
- 33.01 Identify parts of GUI windows.
  - 33.02 Create and use icons.
  - 33.03 Demonstrate proficiency in using menu systems.
  - 33.04 Demonstrate proficiency in using pointing and selection devices.
  - 33.05 Identify keyboard shortcuts and special function keys.
  - 33.06 Demonstrate proficiency in manipulating windows.
  - 33.07 Utilize help systems and hypertext links.
  - 33.08 Create, organize, and maintain file system directories.
  - 33.09 Organize desktop objects.
  - 33.10 Run multiple applications.
- 127.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 127.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 127.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 127.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 128.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 128.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 128.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 128.03 Construct charts/tables/graphs using functions and data. AF 3.5

- 129.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 129.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 129.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

**Course Number: CTS0026****Occupational Completion Point – C****Network Support Technician – 150 Hours – SOC Code 15-1071**

- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 34.01 Develop diplomatic methods to communicate with customers.
- 35.0 Participate in work-based learning experiences. – The student will be able to:
- 35.01 Participate in work-based learning experiences in a network support services environment.
- 35.02 Discuss the use of technology in a network environment.
- 36.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact. – The student will be able to:
- 36.01 Apply first response assistance for minor repair work.
- 37.0 Perform installation and configuration activities. – The student will be able to:
- 37.01 Configure the operating system environment.
- 37.02 Connect client workstation running similar operating system to the network.
- 37.03 Configure Internet access for a network.
- 37.04 Configure a Web server.
- 37.05 Use remote server to deploy operating system.
- 37.06 Troubleshoot failed installations.
- 37.07 Install and configure network services for interoperability.
- 37.08 Monitor, configure troubleshoot and control access to printers.
- 37.09 Monitor, configure troubleshoot and control access to files, folders, and shared folders.
- 37.10 Monitor, configure troubleshoot and control access to Web sites.
- 38.0 Demonstrate proficiency using computer networks. – The student will be able to:
- 38.01 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
- 39.0 Demonstrate proficiency in configuring and troubleshooting hardware devices and drivers. – The student will be able to:

- 39.01 Configure hardware devices.
  - 39.02 Configure driver signing options.
  - 39.03 Update device drivers.
  - 39.04 Troubleshoot problems with hardware.
- 40.0 Demonstrate proficiency in managing, monitoring, and optimizing system performance, reliability and availability. – The student will be able to:
- 40.01 Monitor and optimize usage of system resources.
  - 40.02 Manage processes.
  - 40.03 Optimize disk performance.
  - 40.04 Manage and optimize availability of system data and user data.
  - 40.05 Recover systems and user data.
- 41.0 Demonstrate proficiency in managing, configuring and troubleshooting storage use. – The student will be able to:
- 41.01 Configure and manage user profiles.
  - 41.02 Monitor, configure and troubleshoot disks and volumes.
  - 41.03 Configure data compression.
  - 41.04 Monitor and configure disk quotas.
  - 41.05 Recover from disk failures.
- 42.0 Demonstrate proficiency in configuring and troubleshooting network connections. – The student will be able to:
- 42.01 Install, configure and troubleshoot shared access.
  - 42.02 Install, configure and troubleshoot a virtual private network.
  - 42.03 Install, configure and troubleshoot network protocols.
  - 42.04 Install and configure network services.
  - 42.05 Configure, monitor and troubleshoot remote access.
  - 42.06 Install, configure, monitor, and troubleshoot Terminal Services.
  - 42.07 Configure the properties of a connection.
  - 42.08 Install, configure, and troubleshoot network adapters and drivers.
- 43.0 Demonstrate proficiency in implementing, monitoring, and troubleshooting security. – The student will be able to:
- 43.01 Encrypt data on a hard disk by using Encrypting File System.
  - 43.02 Implement, configure, manage and troubleshoot policies in an operating system environment.
  - 43.03 Implement, configure, manage and troubleshoot auditing.
  - 43.04 Implement, configure, manage and troubleshoot local accounts.
  - 43.05 Implement, configure, manage and troubleshoot account policy.
  - 43.06 Implement, configure, manage and troubleshoot security by using the Security Configuration Tool Set.
- 130.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:

- 130.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 130.02 Locate, organize and reference written information from various sources. CM 3.0
- 130.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 130.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 130.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 130.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 130.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 131.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 131.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 131.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 131.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 131.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 132.0 Use information technology tools. – The student will be able to:
- 132.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 132.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 132.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 132.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 133.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 133.01 Describe the nature and types of business organizations. SY 1.0
- 133.02 Explain the effect of key organizational systems on performance and quality.
- 133.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 133.04 Explain the impact of the global economy on business organizations.
- 136.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 136.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 136.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 136.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 136.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0027**  
**Occupational Completion Point – D**  
**Systems Administrator – 150 Hours – SOC Code 15-1071**

- 44.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 44.01 Develop diplomatic methods to communicate with customers, clients, and end-users of information technology services.
- 45.0 Participate in work-based learning experiences. – The student will be able to:
- 45.01 Participate in work-based learning experiences in a network support services environment.
  - 45.02 Discuss the use of technology in a network support services environment.
  - 45.03 Discuss the management/supervisors skills needed in a network support services environment.
- 46.0 Administer accounts and resources on computers running server operating system software in a networked environment. – The student will be able to:
- 46.01 Describe features of server operating system.
  - 46.02 Log on to the server operating system.
  - 46.03 Install and configure administrative tools.
  - 46.04 Create user accounts.
  - 46.05 Create computer accounts.
  - 46.06 Create an organizational unit.
- 47.0 Modify user and computer accounts on computers running a server operating system in a networked environment. – The student will be able to:
- 47.01 Modify user and computer account properties.
  - 47.02 Enable and unlock user and computer accounts.
  - 47.03 Create a user account template.
  - 47.04 Locate user and computer accounts in a global directory structure.
  - 47.05 Save queries.
  - 47.06 Reset user and computer accounts.
  - 47.07 Move domain objects.
- 48.0 Perform various administrative functions using groups. – The student will be able to:
- 48.01 Create groups.
  - 48.02 Manage group membership
  - 48.03 Apply strategies for using groups
  - 48.04 Modify groups.
  - 48.05 Manage default groups.

- 49.0 Enable resource access with permissions, manage access to files and folders using permissions, and manage permission inheritance. – The student will be able to:
  - 49.01 Manage access to resources.
  - 49.02 Manage access to shared folders.
  - 49.03 Manage access to files and folders by using file system permissions.
  - 49.04 Determine effective permissions.
  - 49.05 Manage access to shared files by using offline caching.
  
- 50.0 Implement printing in a networked environment utilizing a particular server operating system. – The student will be able to:
  - 50.01 Install and share printers.
  - 50.02 Manage access to printers by using shared printer permissions.
  - 50.03 Manage printer drivers.
  - 50.04 Implement printer locations.
  
- 51.0 Set up a network-wide printing strategy to meet the needs of users and troubleshoot installation or configuration problems. – The student will be able to:
  - 51.01 Change the location of the print spooler.
  - 51.02 Set printing priorities.
  - 51.03 Schedule printer availability.
  - 51.04 Configure a printing tool.
  
- 52.0 Utilize available permissions for managing access to global directory objects, how to move objects between organizational units in the same domain, and how to delegate control of an organizational unit. – The student will be able to:
  - 52.01 Identify the role of organizational units.
  - 52.02 Modify permissions for global directory objects.
  - 52.03 Delegate control of organizational units.
  
- 53.0 Use group policy to configure folder redirection, browser connectivity, and the desktop. – The student will be able to:
  - 53.01 Configure group policy settings.
  - 53.02 Assign scripts with group policy.
  - 53.03 Configure folder redirection.
  
- 54.0 Manage computer security in a security in a networking environment. – The student will be able to:
  - 54.01 Describe the security features a server operating system.
  - 54.02 Use security templates to secure computers.
  - 54.03 Test computer security policy.
  - 54.04 Configure auditing.
  - 54.05 Manage security logs.
  
- 55.0 Administer servers remotely. – The student will be able to:

- 55.01 Explain the tasks, tools, and rights that are required to administer a server.
- 55.02 Configure remote access for administration and client preferences.
- 55.03 Manage remote desktop connections.
  
- 56.0 Monitor server performance by using performance tools, configure and manage performance logs, configure and manage alerts, and manage system monitor views. – The student will be able to:
  - 56.01 Establish a performance baseline.
  - 56.02 Perform real-time and logged monitoring.
  - 56.03 Configure and manage counter logs.
  - 56.04 Configure alerts.
  
- 57.0 Collect performance data by monitoring primary server subsystems and identify system bottlenecks by using the performance monitoring software. – The student will be able to:
  - 57.01 Explain how the four primary server subsystems affect server performance.
  - 57.02 Monitor server memory.
  - 57.03 Monitor processor usage.
  - 57.04 Monitor disks.
  - 57.05 Monitor network usage.
  - 57.06 Identify the guidelines for using counters and thresholds.
  - 57.07 Describe the best practices for monitoring server performance.
  
- 58.0 Maintaining device drivers. – The student will be able to:
  - 58.01 Configure device driver signing.
  - 58.02 Restore the previous version of a device driver.
  
- 59.0 Use software tools to manage and set up disks. – The student will be able to:
  - 59.01 Initialize and partition a disk.
  - 59.02 View and update disk properties.
  - 59.03 Manage mounted drives.
  - 59.04 Create volumes on a disk.
  - 59.05 Convert a disk from basic to dynamic and from dynamic to basic.
  - 59.06 Import disks.
  
- 60.0 Use file encryption for security of data. – The student will be able to:
  - 60.01 Manage disk based file compression.
  - 60.02 Configure file encryption.
  - 60.03 Implement disk quotas.
  
- 61.0 Plan for a computer disaster and use the features of a server operating system to prevent a disaster or recover when one occurs. – The student will be able to:
  - 61.01 Prepare for disaster recovery.
  - 61.02 Back up data.
  - 61.03 Schedule backup jobs.
  - 61.04 Restore data.

- 61.05 Configure a shadow copy.
- 61.06 Recover from server failure.
- 61.07 Select a disaster recovery method.
  
- 62.0 Manage and distribute critical software updates that resolve known security vulnerabilities and other stability issues. – The student will be able to:
  - 62.01 Install and configure client computers to use receive software updates.
  - 62.02 Install and configure servers to use perform software updates.
  - 62.03 Manage the Software Update Services infrastructure.
  
- 63.0 Construct and assign IP addresses and isolate addressing issues associated with the ip routing process. – The student will be able to:
  - 63.01 Convert IP Addresses from decimal to binary.
  - 63.02 Calculate a subnet mask.
  - 63.03 Create subnets using VLSM and CIDR.
  - 63.04 Isolate addressing issues associated with the IP routing process.
  
- 64.0 Configure an internet protocol (IP) address for client computers. – The student will be able to:
  - 64.01 Configure a client to use a static IP address.
  - 64.02 Configure a client to obtain an IP address automatically by using DHCP.
  - 64.03 Configure a client to obtain an IP address automatically by using Alternate Configuration.
  
- 65.0 Configure name resolution mechanisms for clients on a network and describe the name resolution process. – The student will be able to:
  - 65.01 Use ARP to identify client media access control (MAC) addresses.
  - 65.02 Describe the function of Network Basic Input/Output System (NetBIOS).
  - 65.03 Configure a client to use a static IP address.
  - 65.04 Configure a client to use name resolution servers.
  
- 66.0 Isolate common connectivity issues and describe how to use utilities and tools as part of this process. – The student will be able to:
  - 66.01 Isolate common connectivity issues.
  - 66.02 Use a flow chart to isolate a problem.
  - 66.03 Use utilities and tools to isolate a problem
  
- 67.0 Configure a routing solution for a network environment. – The student will be able to:
  - 67.01 Describe the role of routing in the network infrastructure.
  - 67.02 Enable and configure the Routing and Remote Access service.
  - 67.03 Configure packet filters.
  
- 68.0 Allocate IP addressing in a network environment. – The student will be able to:
  - 68.01 Describe the role of DHCP in the network infrastructure.

- 68.02 Add and authorize a DHCP Server service.
  - 68.03 Configure a DHCP scope.
  - 68.04 Configure DHCP options.
  - 68.05 Configure a DHCP reservation.
  - 68.06 Configure a DHCP relay agent.
- 69.0 Manage the DHCP service to reflect changing client IP addressing needs and monitor DHCP server performance. – The student will be able to:
- 69.01 Manage a DHCP database.
  - 69.02 Monitor DHCP.
  - 69.03 Apply security guidelines for DHCP.
- 70.0 Assign computer names to the IP addresses of the source and destination hosts, and then use the computer name to contact the hosts. – The student will be able to:
- 70.01 Describe the name resolution process.
  - 70.02 View names on a client.
  - 70.03 Configure host name resolution.
- 71.0 Resolve host names by using domain name system. – The student will be able to:
- 71.01 Describe the role of DNS in the network infrastructure.
  - 71.02 Install the DNS Server service.
  - 71.03 Configure the properties for the DNS Server service.
  - 71.04 Configure the DNS zones.
  - 71.05 Configure DNS zone transfers.
  - 71.06 Configure dynamic updates.
  - 71.07 Configure a DNS client.
  - 71.08 Delegate authority for zones.
- 72.0 Manage and monitor DNS servers to ensure that they are functioning properly and to optimize network performance. – The student will be able to:
- 72.01 Configure the Time-to-Live (TTL) value.
  - 72.02 Configure aging and scavenging.
  - 72.03 Integrate DNS with WINS.
  - 72.04 Test the DNS server configuration.
  - 72.05 Monitor DNS server performance.
- 73.0 Configure a server with the routing and remote access service, create appropriate remote access connections on a network access server, and configure users' access rights. – The student will be able to:
- 73.01 Describe a network access infrastructure.
  - 73.02 Configure a virtual private network (VPN) connection.
  - 73.03 Configure a dial-up connection.
  - 73.04 Configure a wireless connection.
  - 73.05 Control remote user access to a network.
  - 73.06 Centralize authentication and policy management for network access by using Internet Authentication Service (IAS).

74.0 Manage and monitor network access and the network access services. – The student will be able to:

- 74.01 Configure logging on the network access server.
- 74.02 Collect and monitor network access data.

75.0 Perform installation of a network client operating system. – The student will be able to:

- 75.01 Plan a client operating system installation.
- 75.02 Install a client operating system.
- 75.03 Upgrade a client operating system from an earlier version.
- 75.04 Automate the installation process for a client operating system.

76.0 Install and configure hardware devices. – The student will be able to:

- 76.01 Configure hardware devices and drivers on a computer running a client OS.
- 76.02 Add and remove devices by using built in utilities and wizards
- 76.03 Restore device drivers.

77.0 Configure and manage file systems. – The student will be able to:

- 77.01 Work with file systems.
- 77.02 Manage data compression.
- 77.03 Secure data by using EFS.
- 77.04 Configure disk compression.
- 77.05 Secure files by using EFS.

78.0 Troubleshoot the boot process and other system issues. – The student will be able to:

- 78.01 Examine the boot process.
- 78.02 Control system settings during the boot process.
- 78.03 Change startup behavior.
- 78.04 Use advanced boot options to troubleshoot startup problems.
- 78.05 Restore a computer to a previous state.
- 78.06 Troubleshoot the boot process and other system issues.

79.0 Configure the desktop. – The student will be able to:

- 79.01 Configure user desktop settings.
- 79.02 Customize the desktop environment.
- 79.03 Configure system settings.
- 79.04 Describe how user profiles and group policy affect desktop customization.

80.0 Configure IP addresses and name resolution. – The student will be able to:

- 80.01 Configure IP addresses.
- 80.02 Troubleshoot IP addresses.
- 80.03 Determine TCP/IP name resolution methods.
- 80.04 Configure a DNS and WINS client.
- 80.05 Connect to a remote host.

- 80.06 Configure IP addresses.
  - 80.07 Configure the DNS client.
- 81.0 Configure the client to work in a network environment. – The student will be able to:
- 81.01 Examine workgroups and user accounts.
  - 81.02 Create and authenticate local user accounts.
  - 81.03 Configure local security.
  - 81.04 Configure logon options.
  - 81.05 Configure networking.
  - 81.06 Join a domain.
  - 81.07 Operate in a domain.
- 82.0 Support remote users. – The student will be able to:
- 82.01 Establish remote access connections.
  - 82.02 Connect to Virtual Private Networks.
  - 82.03 Configure inbound connections.
  - 82.04 Configure authentication protocols and encryption.
  - 82.05 Using remote desktop.
  - 82.06 Store user names and passwords to facilitate remote connections.
  - 82.07 Configure a VPN connection.
  - 82.08 Configure and using remote desktop.
  - 82.09 Store user names and passwords.
- 83.0 Configure a client OS for mobile computing. – The student will be able to:
- 83.01 Configure hardware for mobile computing.
  - 83.02 Configure power management options for mobile computing.
  - 83.03 Make files, folders, and web pages available for offline use.
- 84.0 Monitor resources and performance. – The student will be able to:
- 84.01 Determine system information.
  - 84.02 Use task manager to monitor system performance.
  - 84.03 Use performance and maintenance tools to improve performance.
  - 84.04 Monitor event logs.
  - 84.05 Configure program compatibility.
- 134.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 134.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 134.02 Explain emergency procedures to follow in response to workplace accidents.
  - 134.03 Create a disaster and/or emergency response plan. SHE 2.0
- 135.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:

- 135.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 135.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 135.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 135.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 137.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 137.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 137.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 137.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 137.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 137.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 137.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 137.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 137.08 Research the benefits of ongoing professional development. ECD 9.0
- 137.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 138.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 138.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 138.02 Describe the effect of money management on personal and career goals. FL 3.0
- 138.03 Develop a personal budget and financial goals. FL 3.1
- 138.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 138.05 Maintain financial records. FL 3.3
- 138.06 Read and reconcile financial statements. FL 3.4
- 138.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0028**  
**Occupational Completion Point – E**  
**Systems Engineer – 150 Hours – SOC Code 15-1081**

- 85.0 Apply communication skills (reading, writing, speaking, listening, and viewing) in a courteous, concise, and correct manner on personal and professional levels. – The student will be able to:
- 85.01 Communicate technical information in a concise, understandable manner to a non-technical audience both verbally and in writing.
- 86.0 Participate in work-based learning experiences. – The student will be able to:
- 86.01 Participate in work-based learning experiences in a network support services environment.
- 86.02 Discuss the use of technology in a network support services environment.

- 86.03 Compare and contrast the software applications used in a network support services environment.
- 87.0 Plan a network infrastructure. – The student will be able to:
  - 87.01 Explain how to plan a network.
  - 87.02 Explain how to prepare development and test environments.
  - 87.03 Explain the concepts of managing and maintaining a network environment by using specific tools.
  - 87.04 Explain the technologies and services implemented in a network.
- 88.0 Plan and optimize a TCP/IP physical and logical network. – The student will be able to:
  - 88.01 Discuss TCP/IP.
  - 88.02 Plan a TCP/IP addressing scheme.
  - 88.03 Optimize network performance.
- 89.0 Plan and troubleshoot routing. – The student will be able to:
  - 89.01 Describe how routing works.
  - 89.02 Create a secure routing plan.
  - 89.03 Identify TCP/IP routing trouble shooting tools.
  - 89.04 Troubleshoot TCP/IP routing.
- 90.0 Plan a DHCP strategy. – The student will be able to:
  - 90.01 Demonstrate how DHCP operates in an enterprise environment.
  - 90.02 Plan a DHCP strategy.
  - 90.03 Secure a DHCP strategy.
- 91.0 Plan a DNS strategy. – The student will be able to:
  - 91.01 Plan a namespace strategy.
  - 91.02 Plan zones.
  - 91.03 Plan zone replication.
  - 91.04 Plan a DNS server implementation.
- 92.0 Optimize and troubleshoot DNS. – The student will be able to:
  - 92.01 Optimize a DNS server.
  - 92.02 Optimize the DNS server-to-server communications.
  - 92.03 Optimize DNS client support traffic.
  - 92.04 Troubleshoot host name resolution.
- 93.0 Plan and troubleshoot IPSEC. – The student will be able to:
  - 93.01 Discuss IPsec.
  - 93.02 Understand IPsec default policies, rules, and settings.
  - 93.03 Plan IPsec deployment.
  - 93.04 Troubleshoot IPsec.

- 94.0 Plan a network access. – The student will be able to:
  - 94.01 Select appropriate connection methods for a network access strategy.
  - 94.02 Select a remote access policy strategy.
  - 94.03 Select a network access authentication method.
  - 94.04 Plan a network access strategy.
  
- 95.0 Troubleshoot network access. – The student will be able to:
  - 95.01 Identify network access troubleshooting resources.
  - 95.02 Troubleshoot network authentication.
  - 95.03 Troubleshoot LAN authentication.
  - 95.04 Troubleshoot remote access.
  
- 96.0 Analyze global directory infrastructure. – The student will be able to:
  - 96.01 Describe the architecture of global directory.
  - 96.02 Describe the working of global directory.
  - 96.03 Use administrative tools to examine the components of global directory.
  - 96.04 Describe the global directory design, planning, and implementation processes.
  
- 97.0 Implement a global directory structure and domain structure. – The student will be able to:
  - 97.01 Create a forest and domain structure.
  - 97.02 Configure DNS in a global directory environment.
  - 97.03 Raise the functional level of a forest and a domain.
  - 97.04 Create trust relationships between domains.
  - 97.05 Secure trusts by using SID filtering.
  
- 98.0 Implement an organizational unit structure. – The student will be able to:
  - 98.01 Create an organizational unit.
  - 98.02 Delegate control for an organizational unit.
  - 98.03 Plan an organization unit strategy.
  
- 99.0 Implement user, group, and computer accounts. – The student will be able to:
  - 99.01 Describe the types of global directory accounts and groups.
  - 99.02 Create multiple user and computer accounts.
  - 99.03 Implement UPN suffixes.
  - 99.04 Move objects within a domain and across domains in a global structure.
  - 99.05 Plan a strategy for user computer and group accounts.
  - 99.06 Plan a global directory audit strategy.
  
- 100.0 Implement group policy. – The student will be able to:
  - 100.01 Create and configure group policy objects.
  - 100.02 Manage group policy objects.
  - 100.03 Verify and troubleshoot group policies.
  - 100.04 Delegate administrative control of group policies.

- 100.05 Plan a group policies strategy for the enterprise.
- 101.0 Deploy and manage software by using group policies. – The student will be able to:
  - 101.01 Explain the basic concepts of software deployment by using group policies.
  - 101.02 Deploy software by using group policies.
  - 101.03 Configure software deployment by using group policies.
  - 101.04 Maintain deployed software by using group policies.
  - 101.05 Troubleshoot some common problems with software deployment.
  - 101.06 Plan a software deployment strategy.
- 102.0 Implement sites to manage global directory replication. – The student will be able to:
  - 102.01 Explain the components and the process of replication.
  - 102.02 Create and configure sites.
  - 102.03 Manage a global directory site topology.
  - 102.04 Monitor and troubleshoot global directory replication failures.
  - 102.05 Plan a site strategy.
- 103.0 Implement placement of domain controllers. – The student will be able to:
  - 103.01 Implement a global catalog in a global directory.
  - 103.02 Determine the placement of domain controllers in a global directory.
  - 103.03 Create a plan for placing domain controllers in a global directory.
- 104.0 Use a framework for designing security and create a security design team. – The student will be able to:
  - 104.01 Describe common elements of security policies and procedures.
  - 104.02 Create a security design framework.
  - 104.03 Create a security design team.
- 105.0 Recognize and predict common threats by using a threat model. – The student will be able to:
  - 105.01 Explain common network vulnerabilities and how attackers can exploit them.
  - 105.02 Predict threats to security by using the STRIDE (Spoofing, Tampering, Repudiation, Information disclosure, Denial of service, and Elevation of privilege) threat model.
- 106.0 Apply a framework for planning risk management. – The student will be able to:
  - 106.01 Explain the purpose and operation of risk management.
  - 106.02 Draft the elements of a risk management plan.
- 107.0 Design security for physical resources. – The student will be able to:
  - 107.01 Determine threats and analyze risks to physical resources.
  - 107.02 Design security for physical resources.
- 108.0 Design security for computers. – The student will be able to:

108.01 Determine threats and analyze risks to computers.  
108.02 Design security for computers.

109.0 Design security for accounts. – The student will be able to:

109.01 Determine threats and analyze risks to accounts.  
109.02 Design security for accounts.

110.0 Design security for authentication. – The student will be able to:

110.01 Determine threats and analyze risks to authentication.  
110.02 Design security for authentication.

111.0 Design security for data. – The student will be able to:

111.01 Determine threats and analyze risks to data.  
111.02 Design security for data.

112.0 Design security for data transmission. – The student will be able to:

112.01 Determine threats and analyze risks to data transmission.  
112.02 Design security for data transmission.

113.0 Design security for network perimeters. – The student will be able to:

113.01 Determine threats and analyze risks to network perimeters.  
113.02 Design security for network perimeters.

114.0 Design an audit policy and an incident response procedure. – The student will be able to:

114.01 Explain the importance of auditing and incident response.  
114.02 Design an auditing policy.  
114.03 Design an incident response procedure.

**Course Number: CTS0029**

**Occupational Completion Point – F**

**Wireless Network Administrator – 150 Hours – SOC Code 15-1081**

115.0 Participate in work-based learning experiences. – The student will be able to:

115.01 Participate in work-based learning experiences in a network support services environment.  
115.02 Discuss the use of technology in a network support services environment.  
115.03 Discuss the management/supervisory skills needed in a network support service environment.

116.0 Demonstrate proficiency in applying radio frequency (RF) technologies. – The student will be able to:

- 116.01 Define and apply the basic concepts of RF behavior.
- 116.02 Understand the applications of basic RF antenna concepts.
- 116.03 Understand and apply the basic components of RF
- 116.04 Identify some of the different uses for spread spectrum technologies.
- 116.05 Comprehend the differences between, and apply the different types of spread spectrum technologies.
- 116.06 Identify and apply the concepts which make up the functionality of spread spectrum technology.
- 116.07 Identify the laws set forth by the FCC that govern spread spectrum technology, including power outputs, frequencies, bandwidths, hop times, and dwell times.

117.0 Develop an awareness of wireless LAN technologies. – The student will be able to:

- 117.01 Identify and apply the processes involved in authentication and association.
- 117.02 Recognize the concepts associated with wireless LAN service sets.
- 117.03 Understand the implications of the following power management features of wireless LANs.
- 117.04 Specify the modes of operation involved in the movement of data traffic across wireless LANs.

118.0 Perform implementation and management activities. – The student will be able to:

- 118.01 Identify the technology roles for which wireless LAN technology is an appropriate technology application.
- 118.02 Identify the purpose of infrastructure devices and explain how to install, configure, and manage them.
- 118.03 Identify the purpose of wireless LAN client devices and explain how to install, configure, and manage them.
- 118.04 Identify the purpose of wireless LAN gateway devices and explain how to install, configure, and manage them.
- 118.05 Identify the basic attributes, purpose, and function of types of antennas.
- 118.06 Describe the proper locations and methods for installing antennas.
- 118.07 Explain the concepts of polarization, gain, beamwidth, and free-space path loss as they apply to implementing solutions that require antennas.
- 118.08 Identify the use of wireless LAN accessories and explain how to install, configure, and manage them.
- 118.09 Identify, understand, correct or compensate for wireless LAN implementation challenges.
- 118.10 Explain how antenna diversity compensates for multipath.
- 118.11 Identify and understand the importance and process of conducting a thorough site survey.
- 118.12 Identify and understand the importance of the necessary tasks involved in preparing to do an RF site survey.
- 118.13 Identify the necessary equipment involved in performing a site survey.
- 118.14 Understand the necessary procedures involved in performing a site survey.
- 118.15 Identify and understand site survey reporting procedures.

119.0 Develop an awareness of wireless security systems. – The student will be able to:

- 119.01 Identify the strengths, weaknesses and appropriate uses of wireless LAN security techniques.
- 119.02 Describe types of wireless LAN security attacks, and explain how to identify and prevent them.
- 119.03 Given a wireless LAN scenario, identify the appropriate security solution from the following available wireless LAN security solutions.
- 119.04 Explain the uses of corporate security policies and how they are used to secure a wireless LAN.
- 119.05 Identify how and security precautions are used to secure a wireless LAN.

120.0 Demonstrate knowledge of wireless industry standards. – The student will be able to:

- 120.01 Identify, apply and comprehend the differences between wireless LAN standards.
- 120.02 Understand the roles of organizations in providing direction and accountability within the wireless LAN industry.
- 120.03 Identify the differences between the ISM and UNII bands.
- 120.04 Identify and understand the differences between the power output rules for point-to-point and point-to-multipoint links.
- 120.05 Identify the basic characteristics of infrared wireless LANs.

**Course Number: EEV0317**  
**Occupational Completion Point – G**  
**Data Communication Analyst – 150 Hours – SOC Code 15-1081**

121.0 Participate in work-based learning experiences. – The student will be able to:

- 121.01 Participate in work-based learning experiences in a network support services environment.
- 121.02 Discuss the use of technology in a network support services environment.
- 121.03 Discuss the management/supervisors skills needed in a network support services environment.

122.0 Demonstrate a knowledge of general security concepts. – The student will be able to:

- 122.01 Describe access control.
- 122.02 Describe network authentication.
- 122.03 Understand the various types of network attacks (backdoors, DOS, spoofing, etc.)
- 122.04 Identify and modify non-essential services and protocols.
- 122.05 Identify malicious code (virus, worm, Trojan).
- 122.06 Configure system auditing, logging, and scanning as it relates to security procedures.

123.0 Develop an awareness of communication security concepts. – The student will be able to:

- 123.01 Describe remote access protocols (VPN, RADIUS, L2TP, etc.).
- 123.02 Identify E-mail security concerns (hoaxes, spam, etc.).

- 123.03 Identify web (HTML) security concepts and designs (HTTP/S, IM, etc.).
- 123.04 Demonstrate an awareness of file transfer security concerns.
- 123.05 Describe and identify wireless networking security concerns and vulnerabilities.
- 124.0 Develop an awareness of network infrastructure security. – The student will be able to:
  - 124.01 Install and configure network firewalls.
  - 124.02 Identify security concerns with various wiring media (copper, fiber).
  - 124.03 Identify security concerns associated with removable media and storage devices.
  - 124.04 Demonstrate an awareness of security topologies (security zones, Intranets, NAT, etc.).
  - 124.05 Configure and use intrusion detection software.
  - 124.06 Establish security baselines (updates, patches, hot fixes, Access Control lists, etc.).
  - 124.07 Demonstrate the ability to configure a Virtual Private Network (VPN).
  - 124.08 Describe the function of Network Address Translation (NAT).
- 125.0 Develop an awareness of cryptography and its relation to security. – The student will be able to:
  - 125.01 Demonstrate an understanding of security algorithms and encryption.
  - 125.02 Use and apply Public Key Certificates.
  - 125.03 Demonstrate an understanding of standards and protocols in commerce.
- 126.0 Incorporate organizational and operational security in an appropriate and effective manner. – The student will be able to:
  - 126.01 Describe how to establish a network security policy.
  - 126.02 Explain the importance of physical security to protect network resources.
  - 126.03 Identify and use disaster recovery procedures.
  - 126.04 Describe the importance of business continuity and its relationship to network and corporate security.
  - 126.05 Describe security policies and procedures that would be used in a business environment.
  - 126.06 Explain the importance of privilege management (access, password management, sign-on, etc.).
  - 126.07 Describe the concept of forensics as it applies to network security (obtaining evidence of security breaches).
  - 126.08 Explain the importance of educating users and supervisors in regard to network security.
  - 126.09 Create documentation that describes standards and guidelines for a network security system.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**           **Computer and Business Skills**  
**Course Number:**       **8200330**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
  
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
  
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
  
- 24.0 Perform e-mail activities. – The student will be able to:
  - 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
  
- 25.0 Demonstrate operating systems. – The student will be able to:
  - 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computing for College and Careers  
**Course Number:** 8209020  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 1**  
**Course Number:**       **8207020**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to develop competencies needed for employment in network support positions. The content includes instruction in basic hardware configuration, hardware and software troubleshooting, operating systems, and computer networking.

25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

25.01 Develop strategies for resolving customer conflicts.

26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules. – The student will be able to:

26.01 Identify and describe the functions of main processing boards (e.g., CPUs, RAM, ROM, bus architecture).

26.02 Identify and describe the functions of communication ports (e.g., serial and parallel ports).

26.03 Identify and describe the functions of peripheral devices (e.g., scanners, modems, hard drives, printers).

26.04 Identify and describe the components of portable systems (e.g., battery, LCD, AC adapter, PDAs).

26.05 Troubleshoot, install and upgrade computers and peripherals.

26.06 Perform system hardware setup Demonstrate an understanding of input/output devices.

26.07 Installation and configuration of applications software, hardware, and device drivers.

26.08 Demonstrate an understanding of the operation and purpose of hardware components.

26.09 Install operating system software.

26.10 Customize operating systems.

26.11 Install application software.

26.12 Perform storage formatting and preparation activities.

26.13 Identify data measurement (e.g., bits, bytes, kilobytes).

26.14 Install and Configure RAID.

26.15 Recognize and report on server room environmental issues (temperature, humidity/ESD/power surges, back-up).

27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment. – The student will be able to:

- 27.01 Troubleshoot a personal computer system
  - 27.02 Identify configuration problems.
  - 27.03 Identify software problems.
  - 27.04 Identify hardware malfunctions.
  - 27.05 Identify network malfunctions
  - 27.06 Resolve computer error messages.
  - 27.07 Understand and troubleshoot memory and cache systems.
  - 27.08 Verify that drives are the appropriate type.
  - 27.09 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.
- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace. – The student will be able to:
- 28.01 Apply basic rules for hardware safety.
  - 28.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 28.03 Special disposal procedures that comply with environmental guidelines for batteries, CRTs, toner kits/cartridges, chemical solvents and cans, and MSDS.
  - 28.04 Apply ergonomic principles applicable to the configuration of computer workstations.
  - 28.05 Describe ethical issues and problems associated with computers and information systems.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems. – The student will be able to:
- 29.01 Identify EDO RAM, DRAM, SRAM, RIMM, VRAM, SDRAM, and WRAM.
  - 29.02 Identify memory banks, memory chips (8-bit, 16-bit, and 32-bit), SIMMS (Single In-line Memory Module), DIMMS (Dual In-line Memory Module), parity chips versus non-parity chips.
  - 29.03 Identify printer parallel port, COM/serial port, floppy drive, hard drive, Memory, and Boot sequence.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems. – The student will be able to:
- 30.01 Identify types of printers—Laser, Inkjet, Dot Matrix.
  - 30.02 Identify care and service techniques and common problems with primary printer types.
  - 30.03 Implement and manage printing on a network.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked. – The student will be able to:

- 31.01 Define networking and describe the purpose of a network.
  - 31.02 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
  - 31.03 Describe the various types of network topologies.
  - 31.04 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
  - 31.05 Configure network and verify network connectivity.
  - 31.06 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).
  - 31.07 Develop user logon procedures.
  - 31.08 Utilize network management infrastructures (e.g., network monitoring, alerting, security) to perform administrative tasks.
  - 31.09 Identify common backup strategies and procedures.
  - 31.10 Select and use appropriate electronic communications software and hardware for specific tasks.
  - 31.11 Compare and contrast Internet software and protocols.
  - 31.12 Diagnose and resolve electronic communications operational problems.
  - 31.13 Design and implement directory tree structures.
  - 31.14 Install services tools (SNMP, backup software)
  - 31.15 Perform full backup and verify backup
  - 31.16 Identify bottlenecks (e.g., processor, bus transfer, I/O, disk I/O, network I/O, memory).
  - 31.17 Use the concepts of fault tolerance/fault recovery to create a disaster recovery plan.
  - 31.18 Document and test disaster recovery plan regularly, and update as needed.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, internet, remote access, or direct contact. – The student will be able to:
- 32.01 Apply call center vocabulary.
  - 32.02 Listen and input information simultaneously.
  - 32.03 Apply first response assistance for minor repair work.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems. – The student will be able to:
- 33.01 Identify parts of GUI windows.
  - 33.02 Create and use icons.
  - 33.03 Demonstrate proficiency in using menu systems.
  - 33.04 Demonstrate proficiency in using pointing and selection devices.
  - 33.05 Identify keyboard shortcuts and special function keys.
  - 33.06 Demonstrate proficiency in manipulating windows.
  - 33.07 Utilize help systems and hypertext links.
  - 33.08 Create, organize, and maintain file system directories.
  - 33.09 Organize desktop objects.
  - 33.10 Run multiple applications.
- 127.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0

- 127.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 127.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 127.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 128.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 128.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 128.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 128.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 129.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 129.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 129.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 2, Administration**  
**Course Number:**       **8207441**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to provide individuals with the knowledge necessary to understand and identify the tasks involved in supporting operating system within a large networking environment.

- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 34.01 Develop diplomatic methods to communicate with customers.
- 35.0 Participate in work-based learning experiences. – The student will be able to:
- 35.01 Participate in work-based learning experiences in a network support services environment.
- 35.02 Discuss the use of technology in a network environment.
- 36.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact. – The student will be able to:
- 36.01 Apply first response assistance for minor repair work.
- 37.0 Perform installation and configuration activities. – The student will be able to:
- 37.01 Configure the operating system environment.
- 37.02 Connect client workstation running similar operating system to the network.
- 37.03 Configure Internet access for a network.
- 37.04 Configure a Web server.
- 37.05 Use remote server to deploy operating system.
- 37.06 Troubleshoot failed installations.
- 37.07 Install and configure network services for interoperability.
- 37.08 Monitor, configure troubleshoot and control access to printers.
- 37.09 Monitor, configure troubleshoot and control access to files, folders, and shared folders.
- 37.10 Monitor, configure troubleshoot and control access to Web sites.
- 38.0 Demonstrate proficiency using computer networks. – The student will be able to:
- 38.01 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.

- 39.0 Demonstrate proficiency in configuring and troubleshooting hardware devices and drivers. – The student will be able to:
- 39.01 Configure hardware devices.
  - 39.02 Configure driver signing options.
  - 39.03 Update device drivers.
  - 39.04 Troubleshoot problems with hardware.
- 40.0 Demonstrate proficiency in managing, monitoring, and optimizing system performance, reliability and availability. – The student will be able to:
- 40.01 Monitor and optimize usage of system resources.
  - 40.02 Manage processes.
  - 40.03 Optimize disk performance.
  - 40.04 Manage and optimize availability of system data and user data.
  - 40.05 Recover systems and user data.
- 41.0 Demonstrate proficiency in managing, configuring and troubleshooting storage use. – The student will be able to:
- 41.01 Configure and manage user profiles.
  - 41.02 Monitor, configure and troubleshoot disks and volumes.
  - 41.03 Configure data compression.
  - 41.04 Monitor and configure disk quotas.
  - 41.05 Recover from disk failures.
- 42.0 Demonstrate proficiency in configuring and troubleshooting network connections. – The student will be able to:
- 42.01 Install, configure and troubleshoot shared access.
  - 42.02 Install, configure and troubleshoot a virtual private network.
  - 42.03 Install, configure and troubleshoot network protocols.
  - 42.04 Install and configure network services.
  - 42.05 Configure, monitor and troubleshoot remote access.
  - 42.06 Install, configure, monitor, and troubleshoot Terminal Services.
  - 42.07 Configure the properties of a connection.
  - 42.08 Install, configure, and troubleshoot network adapters and drivers.
- 43.0 Demonstrate proficiency in implementing, monitoring, and troubleshooting security. – The student will be able to:
- 43.01 Encrypt data on a hard disk by using Encrypting File System.
  - 43.02 Implement, configure, manage and troubleshoot policies in an operating system environment.
  - 43.03 Implement, configure, manage and troubleshoot auditing.
  - 43.04 Implement, configure, manage and troubleshoot local accounts.
  - 43.05 Implement, configure, manage and troubleshoot account policy.
  - 43.06 Implement, configure, manage and troubleshoot security by using the Security Configuration Tool Set.

- 130.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 130.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 130.02 Locate, organize and reference written information from various sources. CM 3.0
  - 130.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 130.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 130.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 130.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 130.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 131.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 131.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 131.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 131.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
  - 131.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 132.0 Use information technology tools. – The student will be able to:
- 132.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 132.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 132.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 132.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 133.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 133.01 Describe the nature and types of business organizations. SY 1.0
  - 133.02 Explain the effect of key organizational systems on performance and quality.
  - 133.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 133.04 Explain the impact of the global economy on business organizations.
- 136.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 136.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 136.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1

- 136.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 136.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 3, Administration**  
**Course Number:**       **8207442**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes the planning, implementation, and management of server and client operating systems in a networking environment.

- 44.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 44.01 Develop diplomatic methods to communicate with customers, clients, and end-users of information technology services.
- 45.0 Participate in work-based learning experiences. – The student will be able to:
- 45.01 Participate in work-based learning experiences in a network support services environment.
  - 45.02 Discuss the use of technology in a network support services environment.
  - 45.03 Discuss the management/supervisors skills needed in a network support services environment.
- 46.0 Administer accounts and resources on computers running server operating system software in a networked environment. – The student will be able to:
- 46.01 Describe features of server operating system.
  - 46.02 Log on to the server operating system.
  - 46.03 Install and configure administrative tools.
  - 46.04 Create user accounts.
  - 46.05 Create computer accounts.
  - 46.06 Create an organizational unit.
- 47.0 Modify user and computer accounts on computers running a server operating system in a networked environment. – The student will be able to:
- 47.01 Modify user and computer account properties.
  - 47.02 Enable and unlock user and computer accounts.
  - 47.03 Create a user account template.
  - 47.04 Locate user and computer accounts in a global directory structure.
  - 47.05 Save queries.
  - 47.06 Reset user and computer accounts.
  - 47.07 Move domain objects.
- 48.0 Perform various administrative functions using groups. – The student will be able to:

- 48.01 Create groups.
  - 48.02 Manage group membership
  - 48.03 Apply strategies for using groups
  - 48.04 Modify groups.
  - 48.05 Manage default groups.
- 49.0 Enable resource access with permissions, manage access to files and folders using permissions, and manage permission inheritance. – The student will be able to:
- 49.01 Manage access to resources.
  - 49.02 Manage access to shared folders.
  - 49.03 Manage access to files and folders by using file system permissions.
  - 49.04 Determine effective permissions.
  - 49.05 Manage access to shared files by using offline caching.
- 50.0 Implement printing in a networked environment utilizing a particular server operating system. – The student will be able to:
- 50.01 Install and share printers.
  - 50.02 Manage access to printers by using shared printer permissions.
  - 50.03 Manage printer drivers.
  - 50.04 Implement printer locations.
- 51.0 Set up a network-wide printing strategy to meet the needs of users and troubleshoot installation or configuration problems. – The student will be able to:
- 51.01 Change the location of the print spooler.
  - 51.02 Set printing priorities.
  - 51.03 Schedule printer availability.
  - 51.04 Configure a printing tool.
- 52.0 Utilize available permissions for managing access to global directory objects, how to move objects between organizational units in the same domain, and how to delegate control of an organizational unit. – The student will be able to:
- 52.01 Identify the role of organizational units.
  - 52.02 Modify permissions for global directory objects.
  - 52.03 Delegate control of organizational units.
- 53.0 Use group policy to configure folder redirection, browser connectivity, and the desktop. – The student will be able to:
- 53.01 Configure group policy settings.
  - 53.02 Assign scripts with group policy.
  - 53.03 Configure folder redirection.
- 54.0 Manage computer security in a security in a networking environment. – The student will be able to:
- 54.01 Describe the security features a server operating system.

- 54.02 Use security templates to secure computers.
  - 54.03 Test computer security policy.
  - 54.04 Configure auditing.
  - 54.05 Manage security logs.
- 55.0 Administer servers remotely. – The student will be able to:
- 55.01 Explain the tasks, tools, and rights that are required to administer a server.
  - 55.02 Configure remote access for administration and client preferences.
  - 55.03 Manage remote desktop connections.
- 56.0 Monitor server performance by using performance tools, configure and manage performance logs, configure and manage alerts, and manage system monitor views. – The student will be able to:
- 56.01 Establish a performance baseline.
  - 56.02 Perform real-time and logged monitoring.
  - 56.03 Configure and manage counter logs.
  - 56.04 Configure alerts.
- 57.0 Collect performance data by monitoring primary server subsystems and identify system bottlenecks by using the performance monitoring software. – The student will be able to:
- 57.01 Explain how the four primary server subsystems affect server performance.
  - 57.02 Monitor server memory.
  - 57.03 Monitor processor usage.
  - 57.04 Monitor disks.
  - 57.05 Monitor network usage.
  - 57.06 Identify the guidelines for using counters and thresholds.
  - 57.07 Describe the best practices for monitoring server performance.
- 58.0 Maintaining device drivers. – The student will be able to:
- 58.01 Configure device driver signing.
  - 58.02 Restore the previous version of a device driver.
- 59.0 Use software tools to manage and set up disks. – The student will be able to:
- 59.01 Initialize and partition a disk.
  - 59.02 View and update disk properties.
  - 59.03 Manage mounted drives.
  - 59.04 Create volumes on a disk.
  - 59.05 Convert a disk from basic to dynamic and from dynamic to basic.
  - 59.06 Import disks.
- 60.0 Use file encryption for security of data. – The student will be able to:
- 60.01 Manage disk based file compression.
  - 60.02 Configure file encryption.
  - 60.03 Implement disk quotas.

- 61.0 Plan for a computer disaster and use the features of a server operating system to prevent a disaster or recover when one occurs. – The student will be able to:
  - 61.01 Prepare for disaster recovery.
  - 61.02 Back up data.
  - 61.03 Schedule backup jobs.
  - 61.04 Restore data.
  - 61.05 Configure a shadow copy.
  - 61.06 Recover from server failure.
  - 61.07 Select a disaster recovery method.
  
- 62.0 Manage and distribute critical software updates that resolve known security vulnerabilities and other stability issues. – The student will be able to:
  - 62.01 Install and configure client computers to use receive software updates.
  - 62.02 Install and configure servers to use perform software updates.
  - 62.03 Manage the Software Update Services infrastructure.
  
- 63.0 Construct and assign IP addresses and isolate addressing issues associated with the ip routing process. – The student will be able to:
  - 63.01 Convert IP Addresses from decimal to binary.
  - 63.02 Calculate a subnet mask.
  - 63.03 Create subnets using VLSM and CIDR.
  - 63.04 Isolate addressing issues associated with the IP routing process.
  
- 64.0 Configure an internet protocol (IP) address for client computers. – The student will be able to:
  - 64.01 Configure a client to use a static IP address.
  - 64.02 Configure a client to obtain an IP address automatically by using DHCP.
  - 64.03 Configure a client to obtain an IP address automatically by using Alternate Configuration.
  
- 65.0 Configure name resolution mechanisms for clients on a network and describe the name resolution process. – The student will be able to:
  - 65.01 Use ARP to identify client media access control (MAC) addresses.
  - 65.02 Describe the function of Network Basic Input/Output System (NetBIOS).
  - 65.03 Configure a client to use a static IP address.
  - 65.04 Configure a client to use name resolution servers.
  
- 66.0 Isolate common connectivity issues and describe how to use utilities and tools as part of this process. – The student will be able to:
  - 66.01 Isolate common connectivity issues.
  - 66.02 Use a flow chart to isolate a problem.
  - 66.03 Use utilities and tools to isolate a problem
  
- 67.0 Configure a routing solution for a network environment. – The student will be able to:

- 67.01 Describe the role of routing in the network infrastructure.
- 67.02 Enable and configure the Routing and Remote Access service.
- 67.03 Configure packet filters.
  
- 68.0 Allocate IP addressing in a network environment. – The student will be able to:
  - 68.01 Describe the role of DHCP in the network infrastructure.
  - 68.02 Add and authorize a DHCP Server service.
  - 68.03 Configure a DHCP scope.
  - 68.04 Configure DHCP options.
  - 68.05 Configure a DHCP reservation.
  - 68.06 Configure a DHCP relay agent.
  
- 69.0 Manage the DHCP service to reflect changing client IP addressing needs and monitor DHCP server performance. – The student will be able to:
  - 69.01 Manage a DHCP database.
  - 69.02 Monitor DHCP.
  - 69.03 Apply security guidelines for DHCP.
  
- 70.0 Assign computer names to the IP addresses of the source and destination hosts, and then use the computer name to contact the hosts. – The student will be able to:
  - 70.01 Describe the name resolution process.
  - 70.02 View names on a client.
  - 70.03 Configure host name resolution.
  
- 71.0 Resolve host names by using domain name system. – The student will be able to:
  - 71.01 Describe the role of DNS in the network infrastructure.
  - 71.02 Install the DNS Server service.
  - 71.03 Configure the properties for the DNS Server service.
  - 71.04 Configure the DNS zones.
  - 71.05 Configure DNS zone transfers.
  - 71.06 Configure dynamic updates.
  - 71.07 Configure a DNS client.
  - 71.08 Delegate authority for zones.
  
- 72.0 Manage and monitor DNS servers to ensure that they are functioning properly and to optimize network performance. – The student will be able to:
  - 72.01 Configure the Time-to-Live (TTL) value.
  - 72.02 Configure aging and scavenging.
  - 72.03 Integrate DNS with WINS.
  - 72.04 Test the DNS server configuration.
  - 72.05 Monitor DNS server performance.
  
- 73.0 Configure a server with the routing and remote access service, create appropriate remote access connections on a network access server, and configure users' access rights. – The student will be able to:

- 73.01 Describe a network access infrastructure.
  - 73.02 Configure a virtual private network (VPN) connection.
  - 73.03 Configure a dial-up connection.
  - 73.04 Configure a wireless connection.
  - 73.05 Control remote user access to a network.
  - 73.06 Centralize authentication and policy management for network access by using Internet Authentication Service (IAS).
- 74.0 Manage and monitor network access and the network access services. – The student will be able to:
- 74.01 Configure logging on the network access server.
  - 74.02 Collect and monitor network access data.
- 75.0 Perform installation of a network client operating system. – The student will be able to:
- 75.01 Plan a client operating system installation.
  - 75.02 Install a client operating system.
  - 75.03 Upgrade a client operating system from an earlier version.
  - 75.04 Automate the installation process for a client operating system.
- 76.0 Install and configure hardware devices. – The student will be able to:
- 76.01 Configure hardware devices and drivers on a computer running a client OS.
  - 76.02 Add and remove devices by using built in utilities and wizards
  - 76.03 Restore device drivers.
- 77.0 Configure and manage file systems. – The student will be able to:
- 77.01 Work with file systems.
  - 77.02 Manage data compression.
  - 77.03 Secure data by using EFS.
  - 77.04 Configure disk compression.
  - 77.05 Secure files by using EFS.
- 78.0 Troubleshoot the boot process and other system issues. – The student will be able to:
- 78.01 Examine the boot process.
  - 78.02 Control system settings during the boot process.
  - 78.03 Change startup behavior.
  - 78.04 Use advanced boot options to troubleshoot startup problems.
  - 78.05 Restore a computer to a previous state.
  - 78.06 Troubleshoot the boot process and other system issues.
- 79.0 Configure the desktop. – The student will be able to:
- 79.01 Configure user desktop settings.
  - 79.02 Customize the desktop environment.
  - 79.03 Configure system settings.
  - 79.04 Describe how user profiles and group policy affect desktop customization.

- 80.0 Configure IP addresses and name resolution. – The student will be able to:
  - 80.01 Configure IP addresses.
  - 80.02 Troubleshoot IP addresses.
  - 80.03 Determine TCP/IP name resolution methods.
  - 80.04 Configure a DNS and WINS client.
  - 80.05 Connect to a remote host.
  - 80.06 Configure IP addresses.
  - 80.07 Configure the DNS client.
  
- 81.0 Configure the client to work in a network environment. – The student will be able to:
  - 81.01 Examine workgroups and user accounts.
  - 81.02 Create and authenticate local user accounts.
  - 81.03 Configure local security.
  - 81.04 Configure logon options.
  - 81.05 Configure networking.
  - 81.06 Join a domain.
  - 81.07 Operate in a domain.
  
- 82.0 Support remote users. – The student will be able to:
  - 82.01 Establish remote access connections.
  - 82.02 Connect to Virtual Private Networks.
  - 82.03 Configure inbound connections.
  - 82.04 Configure authentication protocols and encryption.
  - 82.05 Using remote desktop.
  - 82.06 Store user names and passwords to facilitate remote connections.
  - 82.07 Configure a VPN connection.
  - 82.08 Configure and using remote desktop.
  - 82.09 Store user names and passwords.
  
- 83.0 Configure a client OS for mobile computing. – The student will be able to:
  - 83.01 Configure hardware for mobile computing.
  - 83.02 Configure power management options for mobile computing.
  - 83.03 Make files, folders, and web pages available for offline use.
  
- 84.0 Monitor resources and performance. – The student will be able to:
  - 84.01 Determine system information.
  - 84.02 Use task manager to monitor system performance.
  - 84.03 Use performance and maintenance tools to improve performance.
  - 84.04 Monitor event logs.
  - 84.05 Configure program compatibility.
  
- 134.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:

- 134.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 134.02 Explain emergency procedures to follow in response to workplace accidents.
- 134.03 Create a disaster and/or emergency response plan. SHE 2.0
- 135.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 135.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 135.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 135.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 135.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 137.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 137.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 137.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 137.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 137.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 137.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 137.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 137.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 137.08 Research the benefits of ongoing professional development. ECD 9.0
- 137.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 138.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 138.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 138.02 Describe the effect of money management on personal and career goals. FL 3.0
- 138.03 Develop a personal budget and financial goals. FL 3.1
- 138.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 138.05 Maintain financial records. FL 3.3
- 138.06 Read and reconcile financial statements. FL 3.4
- 138.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 4, Administration**  
**Course Number:**       **8207443**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes the planning, implementation, and management of server and client operating systems in a networking environment.

- 85.0 Apply communication skills (reading, writing, speaking, listening, and viewing) in a courteous, concise, and correct manner on personal and professional levels. – The student will be able to:
- 85.01 Communicate technical information in a concise, understandable manner to a non-technical audience both verbally and in writing.
- 86.0 Participate in work-based learning experiences. – The student will be able to:
- 86.01 Participate in work-based learning experiences in a network support services environment.
- 86.02 Discuss the use of technology in a network support services environment.
- 86.03 Compare and contrast the software applications used in a network support services environment.
- 87.0 Plan a network infrastructure. – The student will be able to:
- 87.01 Explain how to plan a network.
- 87.02 Explain how to prepare development and test environments.
- 87.03 Explain the concepts of managing and maintaining a network environment by using specific tools.
- 87.04 Explain the technologies and services implemented in a network.
- 88.0 Plan and optimize a TCP/IP physical and logical network. – The student will be able to:
- 88.01 Discuss TCP/IP.
- 88.02 Plan a TCP/IP addressing scheme.
- 88.03 Optimize network performance.
- 89.0 Plan and troubleshoot routing. – The student will be able to:
- 89.01 Describe how routing works.
- 89.02 Create a secure routing plan.
- 89.03 Identify TCP/IP routing troubleshooting tools.
- 89.04 Troubleshoot TCP/IP routing.
- 90.0 Plan a DHCP strategy. – The student will be able to:

- 90.01 Demonstrate how DHCP operates in an enterprise environment.
- 90.02 Plan a DHCP strategy.
- 90.03 Secure a DHCP strategy.
  
- 91.0 Plan a DNS strategy. – The student will be able to:
  - 91.01 Plan a namespace strategy.
  - 91.02 Plan zones.
  - 91.03 Plan zone replication.
  - 91.04 Plan a DNS server implementation.
  
- 92.0 Optimize and troubleshoot DNS. – The student will be able to:
  - 92.01 Optimize a DNS server.
  - 92.02 Optimize the DNS server-to-server communications.
  - 92.03 Optimize DNS client support traffic.
  - 92.04 Troubleshoot host name resolution.
  
- 93.0 Plan and troubleshoot IPSEC. – The student will be able to:
  - 93.01 Discuss IPsec.
  - 93.02 Understand IPsec default policies, rules, and settings.
  - 93.03 Plan IPsec deployment.
  - 93.04 Troubleshoot IPsec.
  
- 94.0 Plan a network access. – The student will be able to:
  - 94.01 Select appropriate connection methods for a network access strategy.
  - 94.02 Select a remote access policy strategy.
  - 94.03 Select a network access authentication method.
  - 94.04 Plan a network access strategy.
  
- 95.0 Troubleshoot network access. – The student will be able to:
  - 95.01 Identify network access troubleshooting resources.
  - 95.02 Troubleshoot network authentication.
  - 95.03 Troubleshoot LAN authentication.
  - 95.04 Troubleshoot remote access.
  
- 96.0 Analyze global director infrastructure. – The student will be able to:
  - 96.01 Describe the architecture of global directory.
  - 96.02 Describe the working of global directory.
  - 96.03 Use administrative tools to examine the components of global directory.
  - 96.04 Describe the global directory design, planning, and implementation processes.
  
- 97.0 Implement a global directory structure and domain structure. – The student will be able to:
  - 97.01 Create a forest and domain structure.

- 97.02 Configure DNS in a global directory environment.
  - 97.03 Raise the functional level of a forest and a domain.
  - 97.04 Create trust relationships between domains.
  - 97.05 Secure trusts by using SID filtering.
- 98.0 Implement an organizational unit structure. – The student will be able to:
- 98.01 Create an organizational unit.
  - 98.02 Delegate control for an organizational unit.
  - 98.03 Plan an organization unit strategy.
- 99.0 Implement user, group, and computer accounts. – The student will be able to:
- 99.01 Describe the types of global directory accounts and groups.
  - 99.02 Create multiple user and computer accounts.
  - 99.03 Implement UPN suffixes.
  - 99.04 Move objects within a domain and across domains in a global structure.
  - 99.05 Plan a strategy for user computer and group accounts.
  - 99.06 Plan a global directory audit strategy.
- 100.0 Implement group policy. – The student will be able to:
- 100.01 Create and configure group policy objects.
  - 100.02 Manage group policy objects.
  - 100.03 Verify and troubleshoot group policies.
  - 100.04 Delegate administrative control of group policies.
  - 100.05 Plan a group policies strategy for the enterprise.
- 101.0 Deploy and manage software by using group policies. – The student will be able to:
- 101.01 Explain the basic concepts of software deployment by using group policies.
  - 101.02 Deploy software by using group policies.
  - 101.03 Configure software deployment by using group policies.
  - 101.04 Maintain deployed software by using group policies.
  - 101.05 Troubleshoot some common problems with software deployment.
  - 101.06 Plan a software deployment strategy.
- 102.0 Implement sites to manage global directory replication. – The student will be able to:
- 102.01 Explain the components and the process of replication.
  - 102.02 Create and configure sites.
  - 102.03 Manage a global directory site topology.
  - 102.04 Monitor and troubleshoot global directory replication failures.
  - 102.05 Plan a site strategy.
- 103.0 Implement placement of domain controllers. – The student will be able to:
- 103.01 Implement a global catalog in a global directory.
  - 103.02 Determine the placement of domain controllers in a global directory.
  - 103.03 Create a plan for placing domain controllers in a global directory.

- 104.0 Use a framework for designing security and create a security design team. – The student will be able to:
- 104.01 Describe common elements of security policies and procedures.
  - 104.02 Create a security design framework.
  - 104.03 Create a security design team.
- 105.0 Recognize and predict common threats by using a threat model. – The student will be able to:
- 105.01 Explain common network vulnerabilities and how attackers can exploit them.
  - 105.02 Predict threats to security by using the STRIDE (Spoofing, Tampering, Repudiation, Information disclosure, Denial of service, and Elevation of privilege) threat model.
- 106.0 Apply a framework for planning risk management. – The student will be able to:
- 106.01 Explain the purpose and operation of risk management.
  - 106.02 Draft the elements of a risk management plan.
- 107.0 Design security for physical resources. – The student will be able to:
- 107.01 Determine threats and analyze risks to physical resources.
  - 107.02 Design security for physical resources.
- 108.0 Design security for computers. – The student will be able to:
- 108.01 Determine threats and analyze risks to computers.
  - 108.02 Design security for computers.
- 109.0 Design security for accounts. – The student will be able to:
- 109.01 Determine threats and analyze risks to accounts.
  - 109.02 Design security for accounts.
- 110.0 Design security for authentication. – The student will be able to:
- 110.01 Determine threats and analyze risks to authentication.
  - 110.02 Design security for authentication.
- 111.0 Design security for data. – The student will be able to:
- 111.01 Determine threats and analyze risks to data.
  - 111.02 Design security for data.
- 112.0 Design security for data transmission. – The student will be able to:
- 112.01 Determine threats and analyze risks to data transmission.
  - 112.02 Design security for data transmission.
- 113.0 Design security for network perimeters. – The student will be able to:

113.01 Determine threats and analyze risks to network perimeters.

113.02 Design security for network perimeters.

114.0 Design an audit policy and an incident response procedure. – The student will be able to:

114.01 Explain the importance of auditing and incident response.

114.02 Design an auditing policy.

114.03 Design an incident response procedure.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 5**  
**Course Number:**       **8207060**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes wireless networking technologies, implementation, management and security.

115.0 Participate in work-based learning experiences. – The student will be able to:

115.01 Participate in work-based learning experiences in a network support services environment.

115.02 Discuss the use of technology in a network support services environment.

115.03 Discuss the management/supervisory skills needed in a network support service environment.

116.0 Demonstrate proficiency in applying radio frequency (RF) technologies. – The student will be able to:

116.01 Define and apply the basic concepts of RF behavior.

116.02 Understand the applications of basic RF antenna concepts.

116.03 Understand and apply the basic components of RF

116.04 Identify some of the different uses for spread spectrum technologies.

116.05 Comprehend the differences between, and apply the different types of spread spectrum technologies.

116.06 Identify and apply the concepts which make up the functionality of spread spectrum technology.

116.07 Identify the laws set forth by the FCC that govern spread spectrum technology, including power outputs, frequencies, bandwidths, hop times, and dwell times.

117.0 Develop an awareness of wireless LAN technologies. – The student will be able to:

117.01 Identify and apply the processes involved in authentication and association.

117.02 Recognize the concepts associated with wireless LAN service sets.

117.03 Understand the implications of the following power management features of wireless LANs.

117.04 Specify the modes of operation involved in the movement of data traffic across wireless LANs.

118.0 Perform implementation and management activities. – The student will be able to:

118.01 Identify the technology roles for which wireless LAN technology is an appropriate technology application.

118.02 Identify the purpose of infrastructure devices and explain how to install, configure, and manage them.

- 118.03 Identify the purpose of wireless LAN client devices and explain how to install, configure, and manage them.
  - 118.04 Identify the purpose of wireless LAN gateway devices and explain how to install, configure, and manage them.
  - 118.05 Identify the basic attributes, purpose, and function of types of antennas.
  - 118.06 Describe the proper locations and methods for installing antennas.
  - 118.07 Explain the concepts of polarization, gain, beamwidth, and free-space path loss as they apply to implementing solutions that require antennas.
  - 118.08 Identify the use of wireless LAN accessories and explain how to install, configure, and manage them.
  - 118.09 Identify, understand, correct or compensate for wireless LAN implementation challenges.
  - 118.10 Explain how antenna diversity compensates for multipath.
  - 118.11 Identify and understand the importance and process of conducting a thorough site survey.
  - 118.12 Identify and understand the importance of the necessary tasks involved in preparing to do an RF site survey.
  - 118.13 Identify the necessary equipment involved in performing a site survey.
  - 118.14 Understand the necessary procedures involved in performing a site survey.
  - 118.15 Identify and understand site survey reporting procedures.
- 119.0 Develop an awareness of wireless security systems. – The student will be able to:
- 119.01 Identify the strengths, weaknesses and appropriate uses of wireless LAN security techniques.
  - 119.02 Describe types of wireless LAN security attacks, and explain how to identify and prevent them.
  - 119.03 Given a wireless LAN scenario, identify the appropriate security solution from the following available wireless LAN security solutions.
  - 119.04 Explain the uses of corporate security policies and how they are used to secure a wireless LAN.
  - 119.05 Identify how and security precautions are used to secure a wireless LAN.
- 120.0 Demonstrate knowledge of wireless industry standards. – The student will be able to:
- 120.01 Identify, apply and comprehend the differences between wireless LAN standards.
  - 120.02 Understand the roles of organizations in providing direction and accountability within the wireless LAN industry.
  - 120.03 Identify the differences between the ISM and UNII bands.
  - 120.04 Identify and understand the differences between the power output rules for point-to-point and point-to-multipoint links.
  - 120.05 Identify the basic characteristics of infrared wireless LANs.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 6**  
**Course Number:**       **8207070**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes network security.

121.0 Participate in work-based learning experiences. – The student will be able to:

121.01 Participate in work-based learning experiences in a network support services environment.

121.02 Discuss the use of technology in a network support services environment.

121.03 Discuss the management/supervisors skills needed in a network support services environment.

122.0 Demonstrate a knowledge of general security concepts. – The student will be able to:

122.01 Describe access control.

122.02 Describe network authentication.

122.03 Understand the various types of network attacks (backdoors, DOS, spoofing, etc.)

122.04 Identify and modify non-essential services and protocols.

122.05 Identify malicious code (virus, worm, Trojan).

122.06 Configure system auditing, logging, and scanning as it relates to security procedures.

123.0 Develop an awareness of communication security concepts. – The student will be able to:

123.01 Describe remote access protocols (VPN, RADIUS, L2TP, etc.).

123.02 Identify E-mail security concerns (hoaxes, spam, etc.).

123.03 Identify web (HTML) security concepts and designs (HTTP/S, IM, etc.).

123.04 Demonstrate an awareness of file transfer security concerns.

123.05 Describe and identify wireless networking security concerns and vulnerabilities.

124.0 Develop an awareness of network infrastructure security. – The student will be able to:

124.01 Install and configure network firewalls.

124.02 Identify security concerns with various wiring media (copper, fiber).

124.03 Identify security concerns associated with removable media and storage devices.

124.04 Demonstrate an awareness of security topologies (security zones, Intranets, NAT, etc.).

124.05 Configure and use intrusion detection software.

124.06 Establish security baselines (updates, patches, hot fixes, Access Control lists, etc.).

124.07 Demonstrate the ability to configure a Virtual Private Network (VPN).

124.08 Describe the function of Network Address Translation (NAT).

125.0 Develop an awareness of cryptography and its relation to security. – The student will be able to:

125.01 Demonstrate an understanding of security algorithms and encryption.

125.02 Use and apply Public Key Certificates.

125.03 Demonstrate an understanding of standards and protocols in commerce.

126.0 Incorporate organizational and operational security in an appropriate and effective manner. – The student will be able to:

126.01 Describe how to establish a network security policy.

126.02 Explain the importance of physical security to protect network resources.

126.03 Identify and use disaster recovery procedures.

126.04 Describe the importance of business continuity and its relationship to network and corporate security.

126.05 Describe security policies and procedures that would be used in a business environment.

126.06 Explain the importance of privilege management (access, password management, sign-on, etc.).

126.07 Describe the concept of forensics as it applies to network security (obtaining evidence of security breaches).

126.08 Explain the importance of educating users and supervisors in regard to network security.

126.09 Create documentation that describes standards and guidelines for a network security system.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Web Design  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8207500	B070500

Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Statewide Articulation	<a href="http://www.fldoe.org/workforce/dwdframe/artic_frame.asp">http://www.fldoe.org/workforce/dwdframe/artic_frame.asp</a>	
Basic Skills Level	N/A	Mathematics: 9 Language: 9 Reading: 9

## Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as an Assistant Web Designer, a Web Designer, and Senior Web Designer in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to operating system commands and web document development, design, promotion and scripting.

## Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and three additional occupational completion points. Secondary or postsecondary students who have previously completed the Business Technology Education Core will not have to repeat the core.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant *	150	15-1041
B	CTS0076	Assistant Web Designer	300	15-1099.04
C	CTS0077	Web Designer	300	15-1099.04
D	CTS0078	Senior Web Designer	300	15-1099.04

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			

OCP	Course Number	Course Title	Length	SOC Code	Level
	8207310	Introduction to Information Technology	1 credit		2
B	8207110	Web Design 1	1 credit	15-1099.04	2
	8207120	Web Design 2	1 credit		3
C	8207130	Web Design 3	1 credit	15-1099.04	3
	8207140	Web Design 4	1 credit		3
D	8207150	Web Design 5	1 credit	15-1099.04	3
	8207160	Web Design 6	1 credit		3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Computer and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computing for College and Careers	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 1	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 2	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 3	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 4	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 5	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 6	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported

accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B070500) two statewide articulation agreement approved by the Florida State Board of Education:

Graphics Technology AS/AAS (1611080300/0611080300) – 6 credits  
Internet Services Technology AS/AAS (1511080102/0511080102) – 9 credits

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.

- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.

- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

**Program Standards**

- 25.0 Participate in work-based learning experiences.
- 26.0 Perform e-mail activities.
- 27.0 Demonstrate proficiency using operating systems.

- 28.0 Perform decision making activities.
- 29.0 Demonstrate proficiency navigating the Internet, Intranet, and the WWW.
- 30.0 Demonstrate proficiency using HTML commands.
- 31.0 Demonstrate proficiency in page design applicable to the WWW.
- 32.0 Develop an awareness of Internet/intranet tools.
- 33.0 Demonstrate proficiency using advanced HTML commands.
- 34.0 Participate in work-based learning experiences.
- 35.0 Perform decision making activities.
- 36.0 Perform layout, design, and measurement activities.
- 37.0 Demonstrate proficiency using HTML commands.
- 38.0 Demonstrate Proficiency in graphic editing operations.
- 39.0 Demonstrate proficiency using interactive web site components.
- 40.0 Demonstrate proficiency in digital imaging.
- 41.0 Create digital media web site components.
- 42.0 Demonstrate proficiency in server configuration standards.
- 43.0 Participate in work-based learning experiences.
- 44.0 Perform decision making activities.
- 45.0 Develop an awareness of Internet/Intranet tools.
- 46.0 Demonstrate proficiency in web site marketing fundamentals.
- 47.0 Demonstrate proficiency using interactive Web site components.
- 48.0 Demonstrate proficiency using a scripting language.
- 49.0 Demonstrate concepts necessary for e-commerce.
- 50.0 Demonstrate proficiency in page design applications.
- 51.0 Demonstrate proficiency in web site promotion and registration.
- 52.0 Participate in a group based business web project.
- 53.0 Demonstrate language arts knowledge and skills.
- 54.0 Demonstrate mathematics knowledge and skills.
- 55.0 Demonstrate science knowledge and skills.
- 56.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 57.0 Solve problems using critical thinking skills, creativity and innovation.
- 58.0 Use information technology tools.
- 59.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 60.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 61.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 62.0 Describe the importance of professional ethics and legal responsibilities.
- 63.0 Explain the importance of employability skill and entrepreneurship skills.
- 64.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:                   Web Design**  
**PSAV Number:                 B070500**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.  
– The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 11.0 Perform e-mail activities. – The student will be able to:
- 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
- 12.0 Demonstrate operating systems. – The student will be able to:
- 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Use professional business vocabulary appropriate for information technology environments.
  - 02.03 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.04 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.05 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.06 Apply the writing process to the creation of appropriate documents following designated business formats.

- 02.07 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, and presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

- 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
  - 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
  - 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
  - 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
  - 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
  - 12.01 Describe e-mail capabilities and functions.

- 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW . – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, pdf, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).

- 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:

- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications . – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: CTS0076**  
**Occupational Completion Point – B**  
**Assistant Web Designer – 300 Hours – SOC Code 15-1099.04**

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a Web Design environment.
  - 25.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 25.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 26.0 Perform e-mail activities. – The student will be able to:
- 26.01 Describe e-mail capabilities and functions.
  - 26.02 Create and send e-mail messages with attachments.
  - 26.03 Reply to and forward e-mail messages.
  - 26.04 Organize and manage e-mail messages.
  - 26.05 Utilize all applicable e-mail options and functions.
  - 26.06 Use the Internet to perform e-mail activities.
  - 26.07 Define the standards used by Internet/Intranet e-mail (e.g., pop3, mime).
  - 26.08 Describe the issues involved in sending and receiving documents as e-mail attachments.
  - 26.09 Identify privacy issues in the employee/employer relationship (e.g., avoid libel, spam, personal usage).
- 27.0 Demonstrate proficiency using operating systems. – The student will be able to:
- 27.01 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 27.02 Describe the difference between relative and absolute path commands.
  - 27.03 Demonstrate a working knowledge of standard file formats.
  - 27.04 Demonstrate proficiency with help references.
- 28.0 Perform decision making activities. – The student will be able to:
- 28.01 Determine work priorities.
  - 28.02 Evaluate and select appropriate software packages to complete assigned tasks.
  - 28.03 Evaluate information to be used and choose relevant material.
  - 28.04 Determine the audience.
  - 28.05 Compare and select appropriate multimedia tools.
- 29.0 Demonstrate proficiency navigating the internet, intranet, and the WWW . – The student will be able to:
- 29.01 Identify and describe Web terminology.
  - 29.02 Describe the history of the Internet and Intranet.
  - 29.03 Describe the difference between a client and a server.
  - 29.04 Describe the difference between the Internet, Intranet, and WWW.

- 29.05 Describe the different methods by which information may be accessed on the Internet/Intranet (e.g., browser, FTP, gopher, telnet, veronica).
  - 29.06 List the available resources and services on the Internet (e.g., electronic commerce, personal, government, business, etiquette, education, distance learning).
  - 29.07 Locate information on the Internet/Intranet using a Web browser.
  - 29.08 Copy information from the Internet/Intranet, save, and print using a Web browser.
  - 29.09 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 29.10 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 29.11 Identify and use search engines to locate information.
  - 29.12 Describe the various ways of communicating on the Internet/Intranet (e.g., e-mail, forums, IRC, CHAT, Listserv, Usenet, MOOs, etc.).
  - 29.13 Describe and observe Internet/Intranet ethics and copyright laws.
  - 29.14 Identify methods to protect personal copyright.
- 30.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 30.01 Identify elements of a Web page.
  - 30.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 30.03 Define basic HTML terminology.
  - 30.04 Analyze HTML source code developed by others.
  - 30.05 Create a Web page using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 30.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 30.07 Add graphics to Web pages.
  - 30.08 Edit and test HTML documents for accuracy and validity.
  - 30.09 Use basic functions of HTML editors and converters.
  - 30.10 Use basic functions of WYSIWYG editors.
- 31.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 31.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 31.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 31.03 Identify and convert graphic formats.
  - 31.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD ROMS).
  - 31.05 Use image design software to create and edit images.
  - 31.06 Embed video files into Web page designs.
  - 31.07 Embed audio files into Web page designs.
  - 31.08 Embed animation files into Web page designs.
  - 31.09 Use a team approach for Web project design.
  - 31.10 Identify design strategies to reach and keep your audience.
  - 31.11 Determine the objectives and the audience of Web sites.
  - 31.12 Create storyboards of Web sites.

- 31.13 Create maps of index pages.
  - 31.14 Use style sheets for consistent Web site design.
  - 31.15 Create images for Web sites using digital imaging software.
  - 31.16 Edit images using appropriate software.
  - 31.17 Identify and create low-bandwidth graphic file types (e.g., transparent images, filters).
  - 31.18 Create buttons for Web sites.
  - 31.19 Format text for Web sites (e.g., font families, sizes).
  - 31.20 Format online images for Web sites.
  - 31.21 Create links to external images.
  - 31.22 Optimize page size for effective downloading to browsers.
  - 31.23 Build Web sites for publication using conventional file name structures.
  - 31.24 Edit and test Web sites for accuracy and validity.
  - 31.25 Compare and contrast appropriate design elements of various industries.
- 32.0 Develop an awareness of Internet/intranet tools. – The student will be able to:
- 32.01 Describe the various hardware components used on the Internet/Intranet.
  - 32.02 Demonstrate the use of compression programs.
  - 32.03 Demonstrate the use of backups.
  - 32.04 Demonstrate the use of various software components used on the Internet (e.g., browser software with plug-ins).
  - 32.05 Configure a browser for use with a plug-in.
  - 32.06 Summarize the features of various plug-ins.
- 33.0 Demonstrate proficiency using advanced HTML commands. – The student will be able to:
- 33.01 Use advanced storyboarding and organization for Web site design.
  - 33.02 Develop, integrate, and apply the use of frames in Web site design (e.g., simple and complex framesets).
  - 33.03 Develop, integrate, and apply the use of client-side image maps in Web site design.
  - 33.04 Develop, integrate, and apply the use of forms in Web site design.
  - 33.05 Develop, integrate, and apply HTML codes for search engines (e.g., META tags).
  - 33.06 Use advanced functions of HTML editors and converters.
  - 33.07 Explore and integrate new HTML tags as they are developed.
  - 33.08 Compare and contrast WYSIWYG editors.
  - 33.09 Compare and contrast HTML editors.
- 53.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 53.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 53.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 53.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 54.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 54.01 Demonstrate knowledge of arithmetic operations. AF 3.2

- 54.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 54.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 55.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 55.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 55.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 56.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 56.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 56.02 Locate, organize and reference written information from various sources. CM 3.0
- 56.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 56.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 56.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 56.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 56.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 57.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 57.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 57.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 57.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 57.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 58.0 Use information technology tools. – The student will be able to:
- 58.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 58.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 58.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 58.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 59.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 59.01 Describe the nature and types of business organizations. SY 1.0

- 59.02 Explain the effect of key organizational systems on performance and quality.
- 59.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 59.04 Explain the impact of the global economy on business organizations.
- 62.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 62.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 62.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 62.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 62.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0077****Occupational Completion Point – C****Web Designer – 300 Hours – SOC Code 15-1099.04**

- 34.0 Participate in work-based learning experiences. – The student will be able to:
- 34.01 Participate in work-based learning experiences in a Web Design environment.
- 34.02 Discuss the use of technology in a Web Design environment.
- 34.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 35.0 Perform decision making activities. – The student will be able to:
- 35.01 Present and defend design projects.
- 35.02 Determine project specifications.
- 36.0 Perform layout, design and measurement activities. – The student will be able to:
- 36.01 Prepare rough layout designs.
- 36.02 Identify elements of design.
- 36.03 Utilize and formulate advanced storyboarding techniques.
- 36.04 Utilize navigational efficiency in the creation of Web sites.
- 37.0 Demonstrate proficiency using advanced HTML commands. – The student will be able to:
- 37.01 Use advanced functions of HTML editors and converters.
- 37.02 Explore and integrate new HTML tags as they are developed.
- 37.03 Use advanced functions of WYSIWYG editors.
- 38.0 Demonstrate proficiency using interactive web site components. – The student will be able to:
- 38.01 Discuss the components of multimedia applicable to the WWW.
- 38.02 Discuss the technical requirements necessary to view multimedia Web sites.

- 38.03 Identify and incorporate interactive elements on Web pages.
  - 38.04 Identify animation technologies.
  - 38.05 Demonstrate the components of online conferencing.
  - 38.06 Demonstrate the components of enhanced HTML (e.g., Dynamic HTML).
  - 38.07 Create embed, and demonstrate multimedia components using various tools (e.g., QuickTime, Shockwave, ScreenCam, ActiveX, PDF).
  - 38.08 Edit and test enhancements for accuracy and validity.
- 39.0 Demonstrate proficiency in graphic editing operations. – The student will be able to:
- 39.01 Produce designs integrating all elements of design.
  - 39.02 Complete projects using a variety of fonts, sizes, leading, and alignments.
  - 39.03 Produce electronic illustrations using graphic editing software.
  - 39.04 Produce documents integrating all elements of design using balance and continuity.
  - 39.05 Produce projects using illustrations.
  - 39.06 Produce projects using white space.
  - 39.07 Design logos using type.
- 40.0 Demonstrate proficiency in digital imaging. – The student will be able to:
- 40.01 Demonstrate advance usage of a scanner/slide scanner.
  - 40.02 Crop and scale photographs and line art electronically.
  - 40.03 Demonstrate an understanding of formats and modes.
  - 40.04 Demonstrate use of image editing software.
  - 40.05 Demonstrate advanced usage of digital imaging (e.g., digital camera, photo disk).
- 41.0 Create digital media web site components . – The student will be able to:
- 41.01 Create and edit video files for Web sites.
  - 41.02 Create and edit audio files for Web sites.
  - 41.03 Create animations using current tools.
  - 41.04 Edit and test enhancements for accuracy and validity.
- 42.0 Demonstrate proficiency in server configuration standards.
- 60.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 60.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 60.02 Explain emergency procedures to follow in response to workplace accidents.
  - 60.03 Create a disaster and/or emergency response plan. SHE 2.0
- 61.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 61.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 61.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 61.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0

- 61.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 63.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 63.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 63.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 63.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 63.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 63.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 63.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 63.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 63.08 Research the benefits of ongoing professional development. ECD 9.0
  - 63.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 64.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 64.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 64.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 64.03 Develop a personal budget and financial goals. FL 3.1
  - 64.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 64.05 Maintain financial records. FL 3.3
  - 64.06 Read and reconcile financial statements. FL 3.4
  - 64.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0078****Occupational Completion Point – D****Senior Web Designer – 300 Hours – SOC Code 15-1099.04**

- 43.0 Participate in work-based learning experiences. – The student will be able to:
- 43.01 Participate in work-based learning experiences in a Web Design Services (Web Design) environment.
  - 43.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 43.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 44.0 Perform decision making activities. – The student will be able to:
- 44.01 Determine advanced project specifications.
  - 44.02 Present and defend advanced design projects.
- 45.0 Develop an awareness of Internet/intranet tools. – The student will be able to:
- 45.01 Demonstrate file transfer protocol.
  - 45.02 Identify and use techniques/software for multiple page downloading.

- 46.0 Demonstrate proficiency in web site marketing fundamentals. – The student will be able to:
- 46.01 Create a marketing strategy for the Web site.
  - 46.02 Create a business plan for the Web site including research on competitive URL's.
  - 46.03 Describe costing and proposal writing.
  - 46.04 Identify, compare and select Internet services required for publishing site.
- 47.0 Demonstrate proficiency using interactive web site components. – The student will be able to:
- 47.01 Create animations using current tools.
  - 47.02 Demonstrate professional communication skills with clients (e.g., in the conception, creation and implementation of the web site).
- 48.0 Demonstrate proficiency using a scripting language. – The student will be able to:
- 48.01 List common scripting languages.
  - 48.02 Compare features of different scripting languages.
  - 48.03 Analyze scripts developed by others.
  - 48.04 Modify existing scripts.
  - 48.05 Create and embed scripts for Web page enhancement.
  - 48.06 Create scripts to transfer data from a form to a database.
  - 48.07 Edit and test scripts for accuracy and validity.
  - 48.08 Create searchable indexes.
- 49.0 Demonstrate concepts necessary for e-commerce . – The student will be able to:
- 49.01 Define e-commerce.
  - 49.02 Discuss security issues.
  - 49.03 Compare existing e-commerce sites.
  - 49.04 Discuss components of a successful web presence.
  - 49.05 Contact e-commerce providers to determine current standards (e.g., Visa, MC, AmEx, banks).
- 50.0 Demonstrate proficiency in page design applications. – The student will be able to:
- 50.01 Create embedded video files for Web page designs.
  - 50.02 Create embedded audio files for Web page designs.
  - 50.03 Create embedded animation files for Web page designs (e.g., Flash).
- 51.0 Demonstrate proficiency in web site promotion and registration. – The student will be able to:
- 51.01 Describe ways in which organizations can use Internet/Intranet technology to reduce costs, improve communications, and market products or images.
  - 51.02 Demonstrate the use of offline promotion.
  - 51.03 List different models for creating an organizational presence on the Web.
  - 51.04 Describe site registration procedures.

- 51.05 Create an evaluation plan to measure the effectiveness of the Web site (e.g., page counters, logs, search engines, asking visitors how they found your site).
  - 51.06 Develop an awareness of online resources for doing business on the Internet/Intranet.
  - 51.07 Demonstrate site registration with major search engines and Web directories
- 52.0 Participate in group based business web project. – The student will be able to:
- 52.01 Formulate a design team for a web site project.
  - 52.02 Determine individual and group responsibilities.
  - 52.03 Create a web site for a business as an individual.
  - 52.04 Create a web site as a team for a business.
  - 52.05 Determine design issues.
  - 52.06 Coordinate story boards into the overall design.
  - 52.07 Assign management responsibilities necessary for project completion.
  - 52.08 Determine schedules and deadlines.
  - 52.09 Review, edit and implement the project.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Computing for College and Careers**  
**Course Number:**       **8209020**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 1  
**Course Number:** 8207110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of the Internet, Intranet, and WWW. The content includes operating systems; basic HTML commands; navigation of the Internet, Intranet, and Web; and Web page design.

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a Web Design environment.
  - 25.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 25.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 26.0 Perform e-mail activities. – The student will be able to:
- 26.01 Describe e-mail capabilities and functions.
  - 26.02 Create and send e-mail messages with attachments.
  - 26.03 Reply to and forward e-mail messages.
  - 26.04 Organize and manage e-mail messages.
  - 26.05 Utilize all applicable e-mail options and functions.
  - 26.06 Use the Internet to perform e-mail activities.
  - 26.07 Define the standards used by Internet/Intranet e-mail (e.g., pop3, mime).
  - 26.08 Describe the issues involved in sending and receiving documents as e-mail attachments.
  - 26.09 Identify privacy issues in the employee/employer relationship (e.g., avoid libel, spam, personal usage).
- 27.0 Demonstrate proficiency using operating systems. – The student will be able to:
- 27.01 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 27.02 Describe the difference between relative and absolute path commands.
  - 27.03 Demonstrate a working knowledge of standard file formats.
  - 27.04 Demonstrate proficiency with help references.
- 28.0 Perform decision making activities. – The student will be able to:
- 28.01 Determine work priorities.
  - 28.02 Evaluate and select appropriate software packages to complete assigned tasks.
  - 28.03 Evaluate information to be used and choose relevant material.
  - 28.04 Determine the audience.
  - 28.05 Compare and select appropriate multimedia tools.

- 29.0 Demonstrate proficiency navigating the Internet, intranet, and the WWW. – The student will be able to:
- 29.01 Identify and describe Web terminology.
  - 29.02 Describe the history of the Internet and intranet.
  - 29.03 Describe the difference between a client and a server.
  - 29.04 Describe the difference between the Internet, intranet, and WWW.
  - 29.05 Describe the different methods by which information may be accessed on the Internet/intranet (e.g., browser, FTP, gopher, telnet, veronica).
  - 29.06 List the available resources and services on the Internet (e.g., electronic commerce, personal, government, business, etiquette, education, distance learning).
  - 29.07 Locate information on the Internet/intranet using a Web browser.
  - 29.08 Copy information from the Internet/intranet, save, and print using a Web browser.
  - 29.09 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 29.10 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 29.11 Identify and use search engines to locate information.
  - 29.12 Describe the various ways of communicating on the Internet/Intranet (e.g., e-mail, forums, IRC, CHAT, Listserv, Usenet, MOOs, etc.).
  - 29.13 Describe and observe Internet/intranet ethics and copyright laws.
  - 29.14 Identify methods to protect personal copyright.
- 30.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 30.01 Identify elements of a Web page.
  - 30.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 30.03 Define basic HTML terminology.
  - 30.04 Analyze HTML source code developed by others.
  - 30.05 Create a Web page using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 30.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 30.07 Add graphics to Web pages.
  - 30.08 Edit and test HTML documents for accuracy and validity.
  - 30.09 Use basic functions of HTML editors and converters.
  - 30.10 Use basic functions of WYSIWYG editors.
- 31.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 31.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 31.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 31.03 Identify and convert graphic formats.
  - 31.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD ROMS).

- 31.05 Use image design software to create and edit images.
- 32.0 Develop an awareness of Internet/intranet tools - The student will be able to:
- 32.01 Describe the various hardware components used on the Internet/Intranet.
- 32.02 Demonstrate the use of compression programs.
- 32.03 Demonstrate the use of backups.
- 53.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 53.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 53.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 53.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 54.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 54.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 54.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 54.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 55.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 55.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 55.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 2  
**Course Number:** 8207120  
**Course Credit:** 1

**Course Description:**

This course provides advanced concepts for Internet, Intranet, and Web design. The content includes Internet/Intranet tools, Web site promotion, advanced HTML commands, advanced page design, and multimedia applications.

- 25.0 Participate in work-based learning experiences. – The student will be able to:
- 25.01 Participate in work-based learning experiences in a Web Design environment.
  - 25.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 25.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 30.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 30.01 Use advanced storyboarding and organization for Web site design.
  - 30.02 Develop, integrate, and apply the use of frames in Web site design (e.g., simple and complex framesets).
  - 30.03 Develop, integrate, and apply the use of client-side image maps in Web site design.
  - 30.04 Develop, integrate, and apply the use of forms in Web site design.
  - 30.05 Develop, integrate, and apply HTML codes for search engines (e.g., META tags).
  - 30.06 Use advanced functions of HTML editors and converters.
  - 30.07 Explore and integrate new HTML tags as they are developed.
  - 30.08 Compare and contrast WYSIWYG editors.
  - 30.09 Compare and contrast HTML editors.
- 31.0 Demonstrate proficiency in page design applicable to the www . – The student will be able to:
- 31.01 Embed video files into Web page designs.
  - 31.02 Embed audio files into Web page designs.
  - 31.03 Embed animation files into Web page designs.
  - 31.04 Use a team approach for Web project design.
  - 31.05 Identify design strategies to reach and keep your audience.
  - 31.06 Determine the objectives and the audience of Web sites.
  - 31.07 Create storyboards of Web sites.
  - 31.08 Create maps of index pages.
  - 31.09 Use style sheets for consistent Web site design.
  - 31.10 Create images for Web sites using digital imaging software.
  - 31.11 Edit images using appropriate software.

- 31.12 Identify and create low-bandwidth graphic file types (e.g., transparent images, filters).
  - 31.13 Create buttons for Web sites.
  - 31.14 Format text for Web sites (e.g., font families, sizes).
  - 31.15 Format online images for Web sites.
  - 31.16 Create links to external images.
  - 31.17 Optimize page size for effective downloading to browsers.
  - 31.18 Build Web sites for publication using conventional file name structures.
  - 31.19 Edit and test Web sites for accuracy and validity.
  - 31.20 Compare and contrast appropriate design elements of various industries.
- 32.0 Develop an awareness of internet/intranet tools. – The student will be able to:
- 32.01 Demonstrate the use of various software components used on the Internet (e.g., browser software with plug-ins).
  - 32.02 Configure a browser for use with a plug-in.
  - 32.03 Summarize the features of various plug-ins.
- 33.0 Demonstrate proficiency using advanced HTML commands. – The student will be able to:
- 33.01 Use advanced storyboarding and organization for Web site design.
  - 33.02 Develop, integrate, and apply the use of frames in Web site design (e.g., simple and complex framesets).
  - 33.03 Develop, integrate, and apply the use of client-side image maps in Web site design.
  - 33.04 Develop, integrate, and apply the use of forms in Web site design.
  - 33.05 Develop, integrate, and apply HTML codes for search engines (e.g., META tags).
  - 33.06 Use advanced functions of HTML editors and converters.
  - 33.07 Explore and integrate new HTML tags as they are developed.
  - 33.08 Compare and contrast WYSIWYG editors.
  - 33.09 Compare and contrast HTML editors.
- 56.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 56.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 56.02 Locate, organize and reference written information from various sources. CM 3.0
  - 56.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 56.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 56.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 56.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 56.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 57.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:

- 57.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 57.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 57.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 57.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 58.0 Use information technology tools. – The student will be able to:
- 58.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 58.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 58.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 58.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 59.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 59.01 Describe the nature and types of business organizations. SY 1.0
- 59.02 Explain the effect of key organizational systems on performance and quality.
- 59.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 59.04 Explain the impact of the global economy on business organizations.
- 62.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 62.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 62.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 62.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 62.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 3  
**Course Number:** 8207130  
**Course Credit:** 1

**Course Description:**

This course provides advanced concepts in HTML, design, and Internet tools.

- 34.0 Participate in work-based learning experiences. – The student will be able to:
- 34.01 Participate in work-based learning experiences in a Web Design environment.
  - 34.02 Discuss the use of technology in a Web Design environment.
  - 34.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 35.0 Perform decision making activities. – The student will be able to:
- 35.01 Present and defend design projects.
  - 35.02 Determine project specifications.
- 36.0 Perform layout, design and measurement activities. – The student will be able to:
- 36.01 Prepare rough layout designs.
  - 36.02 Identify elements of design.
  - 36.03 Utilize and formulate advanced storyboarding techniques.
  - 36.04 Utilize navigational efficiency in the creation of Web sites.
- 37.0 Demonstrate proficiency using advanced HTML commands. – The student will be able to:
- 37.01 Use advanced functions of HTML editors and converters.
  - 37.02 Explore and integrate new HTML tags as they are developed.
  - 37.03 Use advanced functions of WYSIWYG editors.
- 38.0 Demonstrate proficiency using interactive web site components. – The student will be able to:
- 38.01 Discuss the components of multimedia applicable to the WWW.
  - 38.02 Discuss the technical requirements necessary to view multimedia Web sites.
  - 38.03 Identify and incorporate interactive elements on Web pages.
  - 38.04 Identify animation technologies.
  - 38.05 Demonstrate the components of online conferencing.
  - 38.06 Demonstrate the components of enhanced HTML (e.g., Dynamic HTML).
  - 38.07 Create embed, and demonstrate multimedia components using various tools (e.g., QuickTime, Shockwave, ScreenCam, ActiveX, PDF).
  - 38.08 Edit and test enhancements for accuracy and validity.

- 60.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 60.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 60.02 Explain emergency procedures to follow in response to workplace accidents.
  - 60.03 Create a disaster and/or emergency response plan. SHE 2.0
- 61.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 61.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 61.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 61.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 61.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 63.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 63.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 63.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 63.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 63.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 63.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 63.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 63.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 63.08 Research the benefits of ongoing professional development. ECD 9.0
  - 63.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 64.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 64.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 64.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 64.03 Develop a personal budget and financial goals. FL 3.1
  - 64.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 64.05 Maintain financial records. FL 3.3
  - 64.06 Read and reconcile financial statements. FL 3.4
  - 64.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 4  
**Course Number:** 8207140  
**Course Credit:** 1

**Course Description:**

This course provides advanced concepts in web site promotion, interactive web site development, and using scripting languages as they relate to WWW site.

- 34.0 Participate in work-based learning experiences. – The student will be able to:
- 34.01 Participate in work-based learning experiences in a Web Design Services (Web Design) environment.
  - 34.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 34.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 39.0 Demonstrate proficiency in graphic editing operations. – The student will be able to:
- 39.01 Produce designs integrating all elements of design.
  - 39.02 Complete projects using a variety of fonts, sizes, leading, and alignments.
  - 39.03 Produce electronic illustrations using graphic editing software.
  - 39.04 Produce documents integrating all elements of design using balance and continuity.
  - 39.05 Produce projects using illustrations.
  - 39.06 Produce projects using white space.
  - 39.07 Design logos using type.
- 40.0 Demonstrate proficiency in digital imaging. – The student will be able to:
- 40.01 Demonstrate advance usage of a scanner/slide scanner.
  - 40.02 Crop and scale photographs and line art electronically.
  - 40.03 Demonstrate an understanding of formats and modes.
  - 40.04 Demonstrate use of image editing software.
  - 40.05 Demonstrate advanced usage of digital imaging (e.g., digital camera, photo disk).
- 41.0 Demonstrate proficiency using interactive web site components. – The student will be able to:
- 41.01 Create and edit video files for Web sites.
  - 41.02 Create and edit audio files for Web sites.
  - 41.03 Create animations using current tools.
  - 41.04 Edit and test enhancements for accuracy and validity.
- 42.0 Demonstrate proficiency in server configuration standards.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 5  
**Course Number:** 8207150  
**Course Credit:** 1

**Course Description:**

This course is designed to present an overview of e-commerce, introduce scripting and increase proficiency in audiovisual techniques.

- 43.0 Participate in work-based learning experiences. – The student will be able to:
- 43.01 Participate in work-based learning experiences in a Web Design Services (Web Design) environment.
  - 43.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 43.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 44.0 Perform decision making activities. – The student will be able to:
- 44.01 Determine advanced project specifications.
  - 44.02 Present and defend advanced design projects.
- 45.0 Develop and awareness of Internet/intranet tools. – The student will be able to:
- 45.01 Demonstrate file transfer protocol.
  - 45.02 Identify and use techniques/software for multiple page downloading.
- 46.0 Demonstrate proficiency in web site marketing fundamentals. – The student will be able to:
- 46.01 Create a marketing strategy for the Web site.
  - 46.02 Create a business plan for the Web site including research on competitive URL's.
  - 46.03 Describe costing and proposal writing.
  - 46.04 Identify, compare and select Internet services required for publishing site.
- 47.0 Demonstrate proficiency using interactive web site components. – The student will be able to:
- 47.01 Create animations using current tools.
  - 47.02 Demonstrate professional communication skills with clients (e.g., in the conception, creation and implementation of the web site).
- 48.0 Demonstrate proficiency using a scripting language. – The student will be able to:
- 48.01 List common scripting languages.
  - 48.02 Compare features of different scripting languages.

- 48.03 Analyze scripts developed by others.
- 48.04 Modify existing scripts.
- 48.05 Create and embed scripts for Web page enhancement.
- 48.06 Create scripts to transfer data from a form to a database.
- 48.07 Edit and test scripts for accuracy and validity.
- 48.08 Create searchable indexes.

49.0 Demonstrate concepts necessary for e-commerce. – The student will be able to:

- 49.01 Define e-commerce.
- 49.02 Discuss security issues.
- 49.03 Compare existing e-commerce sites.
- 49.04 Discuss components of a successful web presence.
- 49.05 Contact e-commerce providers to determine current standards (e.g., Visa, MC, AmEx, banks).

50.0 Demonstrate proficiency in page design applications. – The student will be able to:

- 50.01 Create embedded video files for Web page designs.
- 50.02 Create embedded audio files for Web page designs.
- 50.03 Create embedded animation files for Web page designs (e.g., Flash).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 6  
**Course Number:** 8207160  
**Course Credit:** 1

**Course Description:**

With the completion of this course the student will be able to plan, design, implement and promote a business web site using both individual and team talents. Students will demonstrate proficiency with industry standard software.

- 43.0 Participate in work-based learning experiences. – The student will be able to:
- 43.01 Participate in work-based learning experiences in a Web Design Services (Web Design) environment.
  - 43.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 43.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 51.0 Demonstrate proficiency in web site promotion and registration. – The student will be able to:
- 51.01 Describe ways in which organizations can use Internet/Intranet technology to reduce costs, improve communications, and market products or images.
  - 51.02 Demonstrate the use of offline promotion.
  - 51.03 List different models for creating an organizational presence on the Web.
  - 51.04 Describe site registration procedures.
  - 51.05 Create an evaluation plan to measure the effectiveness of the Web site (e.g., page counters, logs, search engines, asking visitors how they found your site).
  - 51.06 Develop an awareness of online resources for doing business on the Internet/Intranet.
  - 51.07 Demonstrate site registration with major search engines and Web directories
- 52.0 Participate in group based business web project. – The student will be able to:
- 52.01 Formulate a design team for a web site project.
  - 52.02 Determine individual and group responsibilities.
  - 52.03 Create a web site for a business as an individual.
  - 52.04 Create a web site as a team for a business.
  - 52.05 Determine design issues.
  - 52.06 Coordinate story boards into the overall design.
  - 52.07 Assign management responsibilities necessary for project completion.
  - 52.08 Determine schedules and deadlines.
  - 52.09 Review, edit and implement the project.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Network Support Services  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8208000	B078000
CIP Number	0511090102	0511090102
Grade Level	9-12, 30, 31	30, 31
Standard Length	7 credits	1050 hours

Basic Skills Level	N/A	Mathematics: 9 Language: 9 Reading: 9

## Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in network support services positions in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster. This program offers a broad foundation of knowledge and skills to prepare students for employment.

The content includes but is not limited to instruction in computer literacy; software application support; basic hardware configuration and troubleshooting; networking technologies, troubleshooting, security, and administration; and customer service and human relations skills.

## Program Structure

This program is a planned sequence of instruction consisting of the Business Technology Education Core and six additional occupational completion points. Secondary or postsecondary students who have previously completed the Business Technology Education Core will not have to repeat the core. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040	Information Technology Assistant	150	15-1041
B	EEV0504	Computer Support Assistant	150	15-1041
C	CTS0022	Network Support Help Desk Assistant	150	15-1071
D	CTS0023	Network Support Administrator	150	15-1071
E	CTS0024	Senior Network Administrator	150	15-1081
F	CTS0029	Wireless Network Administrator	150	15-1081
G	EEV0317	Data Communications Analyst	150	15-1081

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	15-1041	2

OCP	Course Number	Course Title	Length	SOC Code	Level
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
B	8207020	Networking 1	1 credit	15-1041	2
C	8207030	Networking 2, Infrastructure	1 credit	15-1071	3
D	8207040	Networking 3, Infrastructure	1 credit	15-1071	3
E	8207050	Networking 4, Infrastructure	1 credit	15-1081	3
F	8207060	Networking 5	1 credit	15-1081	3
G	8207070	Networking 6	1 credit	15-1081	3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

#### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computer and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computing for College and Careers	**	**	**	**	**	**	**	**	**	**	**	**
Networking 1	**	**	**	**	**	**	**	**	**	**	**	**
Networking 2, Infrastructure	**	**	**	**	**	**	**	**	**	**	**	**
Networking 3, Infrastructure	**	**	**	**	**	**	**	**	**	**	**	**
Networking 4, Infrastructure	**	**	**	**	**	**	**	**	**	**	**	**
Networking 5	**	**	**	**	**	**	**	**	**	**	**	**
Networking 6	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general

knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills (if applicable)**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular

Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B078000) has two statewide articulation agreements approved by the Florida State Board of Education:

Networking Services Technology AS/AAS (1511090101/0511090101) – 9 credits (12 credits if implemented as a Cisco Networking Academy)

Computer Engineering Technology AS/AAS (1615120100/0615120100) – 9 credits (12 credits if implemented as a Cisco Networking Academy)

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.

- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.

- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

### **Program Standards**

- 25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules.
- 27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment.
- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems.
- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 35.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact.
- 36.0 Understand, describe, and explain internet connections.
- 37.0 Define networking terminology.
- 38.0 Explain how to connect copper media, optical media, and wireless media.
- 39.0 Perform tasks related to the network cable testing and cable making.
- 40.0 Define network topologies, devices and connections.
- 41.0 Define Ethernet fundamentals and operations.
- 42.0 Define and explain the functions of bridges and switches.
- 43.0 Explain the mathematical concepts and protocols behind the internet.
- 44.0 Define and explain the difference between routed and routing protocols.
- 45.0 Recognize, define, and explain functions of the transport layer.
- 46.0 Explain, define, and identify the components of a WAN and router.
- 47.0 Describe and identify an operating system for a router.
- 48.0 Explain how to establish connections between neighboring routers.
- 49.0 Identify and explain the router boot sequence and file system.
- 50.0 Identify and explain static and dynamic routing protocols.
- 51.0 Describe and configure distance vector protocols.
- 52.0 Perform tasks related to protocol troubleshooting.
- 53.0 Examine and test networks.

- 54.0 Define, explain and describe access lists.
- 55.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 56.0 Participate in work-based learning experiences.
- 57.0 Provide network support and assistance by troubleshooting and diagnosing through direct contact remote access.
- 58.0 Develop electronic communications skills.
- 59.0 Perform logical and physical network design activities.
- 60.0 Demonstrate proficiency in selecting appropriate various routing protocols and IP routing configuration for various network designs.
- 61.0 Demonstrate proficiency in using network traffic filtering to improve network performance and provide basic levels of security.
- 62.0 Perform network management activities related to documentation, security, performance, administration, troubleshooting and coping with environmental factors.
- 63.0 Identify and describe various wan functions, devices, and demonstrate understanding of the wan design process.
- 64.0 Describe the operation and implementation of virtual private networks.
- 65.0 Participate in work-based learning experiences.
- 66.0 Compare and contrast hierarchical network design models and scalable internetworks.
- 67.0 Discuss advanced IP addressing management.
- 68.0 Demonstrate proficiency in basic router configuration.
- 69.0 Demonstrate proficiency in the use of OSPF.
- 70.0 Understand and discuss multi-area OSPF operation and configuration.
- 71.0 Demonstrate the use of stub and totally stubby areas.
- 72.0 Configure and define virtual links.
- 73.0 Demonstrate proficiency in the use of EIGRP.
- 74.0 Demonstrate proficiency in route optimization.
- 75.0 Demonstrate proficiency in the use of BGP.
- 76.0 Define and show proficiency in security.
- 77.0 Use lab equipment, demonstrate the setup, configuration, connectivity of routers to create a small WAN.
- 78.0 Show the process of using modems and asynchronous dialup connections.
- 79.0 Configure and verify PPP configurations.
- 80.0 Configure and monitor ISDN and DDR.
- 81.0 Configure dialer profiles.
- 82.0 Create and troubleshoot X.25 configurations.
- 83.0 Configure and troubleshoot frame relay.
- 84.0 Demonstrate the use of WAN backup and dial backup.
- 85.0 Demonstrate the use of queuing and compression techniques.
- 86.0 Demonstrate the use of scaling IP addresses with NAT.
- 87.0 Demonstrate proficiency using AAA to scale access control.
- 88.0 Discuss and explain emerging remote-access technologies.
- 89.0 Demonstrate proficiency configuring a 700 series router.
- 90.0 Understand and describe key characteristics of various switching technologies, LAN switching and the hierarchical model of network design, and the building-block approach.
- 91.0 Understand and describe campus networks, design models, and switching technologies.
- 92.0 List and describe various types of LAN media.
- 93.0 Show proficiency configuring a switch.
- 94.0 Demonstrate proficiency configuring VLANs.
- 95.0 Understand and explain spanning tree protocol (STP) AND redundant links.

- 96.0 Demonstrate proficiency routing between VLANS.
- 97.0 Demonstrate proficiency with multilayer switching.
- 98.0 Demonstrate the use of hot standby routing protocol (HSRP).
- 99.0 Understand and use IGMP and multicasting.
- 100.0 Demonstrate proficiency restricting network access.
- 101.0 Demonstrate proficiency using network troubleshooting tools and basic network management diagnostic tools.
- 102.0 List and define the commonly used protocols, routing techniques, and switching processes
- 103.0 Demonstrate proficiency troubleshooting TCP/IP, LAN switch environment, VLANs, frame relay, and ISDN.
- 104.0 Demonstrate proficiency configuring and trouble-shooting IPX and APPLETalk.
- 105.0 Demonstrate proficiency troubleshooting EIGRP, OSPF, and BGP.
- 106.0 Participate in work-based learning experiences.
- 107.0 Demonstrate proficiency in applying radio frequency (RF) technologies.
- 108.0 Develop an awareness of wireless LAN technologies.
- 109.0 Perform implementation and management activities.
- 110.0 Develop an awareness of wireless security systems.
- 111.0 Demonstrate knowledge of wireless industry standards.
- 112.0 Participate in work-based learning experiences.
- 113.0 Demonstrate knowledge of general security concepts.
- 114.0 Develop an awareness of communication security concepts.
- 115.0 Develop an awareness of network infrastructure security.
- 116.0 Develop an awareness of cryptography and its relation to security.
- 117.0 Incorporate organizational and operational security in an appropriate and effective manner.
- 118.0 Demonstrate language arts knowledge and skills.
- 119.0 Demonstrate mathematics knowledge and skills.
- 120.0 Demonstrate science knowledge and skills.
- 121.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 122.0 Solve problems using critical thinking skills, creativity and innovation.
- 123.0 Use information technology tools.
- 124.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 125.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 126.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 127.0 Describe the importance of professional ethics and legal responsibilities.
- 128.0 Explain the importance of employability skill and entrepreneurship skills.
- 129.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Network Support Services**  
**PSAV Number: B078000**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Information Technology Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
  
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
  
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
  
- 11.0 Perform e-mail activities. – The student will be able to:
  - 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
  
- 12.0 Demonstrate operating systems. – The student will be able to:
  - 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

OR

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

- 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.

- 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the www. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using HTML commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.

- 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
  - 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
  - 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
  - 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
  - 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
  - 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.

- 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
  - 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (OSI) model. – The student will be able to:
  - 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
  - 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
  - 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: EEV0504**

**Occupational Completion Point – B**

**Computer Support Assistant – 150 Hours – SOC Code 15-1041**

- 25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 25.01 Develop strategies for resolving customer conflicts.
- 26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules. – The student will be able to:
- 26.01 Identify and describe the functions of main processing boards (e.g., CPUs, RAM, ROM, bus architecture).
  - 26.02 Identify and describe the functions of communication ports (e.g., serial and parallel ports).
  - 26.03 Identify and describe the functions of peripheral devices (e.g., scanners, modems, hard drives, printers).
  - 26.04 Identify and describe the components of portable systems (e.g., battery, LCD, AC adapter, PDAs).
  - 26.05 Troubleshoot, install and upgrade computers and peripherals.
  - 26.06 Perform system hardware setup Demonstrate an understanding of input/output devices.
  - 26.07 Installation and configuration of applications software, hardware, and device drivers.
  - 26.08 Demonstrate an understanding of the operation and purpose of hardware components.
  - 26.09 Install operating system software.
  - 26.10 Customize operating systems.
  - 26.11 Install application software.
  - 26.12 Perform storage formatting and preparation activities.
  - 26.13 Identify data measurement (e.g., bits, bytes, kilobytes).
  - 26.14 Install and Configure RAID.
  - 26.15 Recognize and report on server room environmental issues (temperature, humidity/ESD/power surges, back-up).
- 27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment. – The student will be able to:
- 27.01 Troubleshoot a personal computer system
  - 27.02 Identify configuration problems.
  - 27.03 Identify software problems.
  - 27.04 Identify hardware malfunctions.
  - 27.05 Identify network malfunctions
  - 27.06 Resolve computer error messages.
  - 27.07 Understand and troubleshoot memory and cache systems.
  - 27.08 Verify that drives are the appropriate type.
  - 27.09 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.

- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace. – The student will be able to:
- 28.01 Apply basic rules for hardware safety.
  - 28.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 28.03 Special disposal procedures that comply with environmental guidelines for batteries, CRTs, toner kits/cartridges, chemical solvents and cans, and MSDS.
  - 28.04 Apply ergonomic principles applicable to the configuration of computer workstations.
  - 28.05 Describe ethical issues and problems associated with computers and information systems.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems. – The student will be able to:
- 29.01 Identify EDO RAM, DRAM, SRAM, RIMM, VRAM, SDRAM, and WRAM.
  - 29.02 Identify memory banks, memory chips (8-bit, 16-bit, and 32-bit), SIMMS (Single In-line Memory Module), DIMMS (Dual In-line Memory Module), parity chips versus non-parity chips.
  - 29.03 Identify printer parallel port, COM/serial port, floppy drive, hard drive, Memory, and Boot sequence.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems. – The student will be able to:
- 30.01 Identify types of printers—Laser, Inkjet, Dot Matrix.
  - 30.02 Identify care and service techniques and common problems with primary printer types.
  - 30.03 Implement and manage printing on a network.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked. – The student will be able to:
- 31.01 Define networking and describe the purpose of a network.
  - 31.02 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
  - 31.03 Describe the various types of network topologies.
  - 31.04 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
  - 31.05 Configure network and verify network connectivity.
  - 31.06 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).
  - 31.07 Develop user logon procedures.
  - 31.08 Utilize network management infrastructures (e.g., network monitoring, alerting, security) to perform administrative tasks.

- 31.09 Identify common backup strategies and procedures.
  - 31.10 Select and use appropriate electronic communications software and hardware for specific tasks.
  - 31.11 Compare and contrast Internet software and protocols.
  - 31.12 Diagnose and resolve electronic communications operational problems.
  - 31.13 Design and implement directory tree structures.
  - 31.14 Install services tools (SNMP, backup software)
  - 31.15 Perform full backup and verify backup
  - 31.16 Identify bottlenecks (e.g., processor, bus transfer, I/O, disk I/O, network I/O, memory).
  - 31.17 Use the concepts of fault tolerance/fault recovery to create a disaster recovery plan.
  - 31.18 Document and test disaster recovery plan regularly, and update as needed.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, internet, remote access, or direct contact. – The student will be able to:
- 32.01 Apply call center vocabulary.
  - 32.02 Listen and input information simultaneously.
  - 32.03 Apply first response assistance for minor repair work.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems. – The student will be able to:
- 33.01 Identify parts of GUI windows.
  - 33.02 Create and use icons.
  - 33.03 Demonstrate proficiency in using menu systems.
  - 33.04 Demonstrate proficiency in using pointing and selection devices.
  - 33.05 Identify keyboard shortcuts and special function keys.
  - 33.06 Demonstrate proficiency in manipulating windows.
  - 33.07 Utilize help systems and hypertext links.
  - 33.08 Create, organize, and maintain file system directories.
  - 33.09 Organize desktop objects.
  - 33.10 Run multiple applications.
- 118.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 118.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 118.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 118.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 119.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 119.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 119.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 119.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 120.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0

- 120.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 120.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

**Course Number: CTS0022****Occupational Completion Point – C****Network Support Help Desk Assistant – 150 Hours – SOC Code 15-1071**

- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 34.01 Develop diplomatic methods to communicate with customers.
- 35.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact . – The student will be able to:
- 35.01 Apply first response assistance for minor repair work.
- 36.0 Understand, describe, and explain internet connections. – The student will be able to:
- 36.01 Understand the physical connectivity necessary for a computer to connect to the Internet.
- 36.02 Recognize the primary components of a computer.
- 36.03 Install and troubleshoot network interface cards and/or modems.
- 36.04 Use basic testing procedures to test the Internet connection.
- 36.05 Demonstrate a basic understanding of the use of Web browsers and plug-ins.
- 37.0 Define networking terminology. – The student will be able to:
- 37.01 Explain the importance of bandwidth in networking.
- 37.02 Identify bps, kbps, Mbps, and Gbps as units of bandwidth.
- 37.03 Explain the difference between bandwidth and throughput.
- 37.04 Explain the development of the Open System Interconnection model(OSI).
- 37.05 List the advantages of a layered approach.
- 37.06 Identify each of the seven layers of the OSI model.
- 37.07 Identify the four layers of the TCP/IP model.
- 37.08 Describe the similarities and differences between the two models.
- 37.09 Briefly outline the history of networking.
- 37.10 Identify devices used in networking.
- 37.11 Understand the role of protocols in networking.
- 37.12 Define LAN, WAN, MAN, and SAN.
- 37.13 Explain VPNs and their advantages.
- 37.14 Describe the differences between intranets and extranets.
- 38.0 Explain how to connect copper media, optical media, and wireless media. – The student will be able to:

- 38.01 Discuss the electrical properties of matter.
  - 38.02 Define voltage, resistance, impedance, current, and circuits.
  - 38.03 Describe the specifications and performances of different types of cable.
  - 38.04 Describe coaxial cable and its advantages and disadvantages over other types of cable.
  - 38.05 Describe shielded twisted-pair (STP) cable and unshielded twisted-pair cable and its uses.
  - 38.06 Describe (UTP) and their uses.
  - 38.07 Discuss the characteristics of straight-through, crossover, and rollover cables and where each is used.
  - 38.08 Explain the basics of fiber-optic cable.
  - 38.09 Describe how fibers can guide light for long distances.
  - 38.10 Describe multimode and single-mode fiber.
  - 38.11 Describe how fiber is installed.
  - 38.12 Describe the type of connectors and equipment used with fiber-optic cable.
  - 38.13 Explain how fiber is tested to ensure that it will function properly.
  - 38.14 Discuss safety issues dealing with fiber-optics.
- 39.0 Perform tasks related to the network cable testing and cable making . – The student will be able to:
- 39.01 Differentiate between sine waves and square waves.
  - 39.02 Define and calculate exponents and logarithms.
  - 39.03 Define and calculate decibels.
  - 39.04 Define basic terminology related to time, frequency, a noise.
  - 39.05 Differentiate between digital bandwidth and analog bandwidth.
  - 39.06 Compare and contrast noise levels on various types of cabling.
  - 39.07 Define and describe the affects of attenuation and impedance mismatch.
  - 39.08 Define crosstalk, near-end crosstalk, far-end crosstalk, and power sum near-end crosstalk.
  - 39.09 Describe how crosstalk and twisted pairs help reduce noise.
  - 39.10 Describe the ten copper cable tests defined in TIA/EIA-568-B.
  - 39.11 Describe the difference between Category 5 and Category 6 cable.
- 40.0 Define network topologies, devices and connections. – The student will be able to perform tasks related to the following:
- 40.01 Identify characteristics of Ethernet networks.
  - 40.02 Identify straight-through, crossover, and rollover cable
  - 40.03 Describe the function, advantages, and disadvantages of repeaters, hubs, bridges, switches, and wireless network components.
  - 40.04 Describe the function of peer-to-peer networks.
  - 40.05 Describe the function, advantages, and disadvantages of client-server networks.
  - 40.06 Describe and differentiate between serial, Integrated Services Digital Network (ISDN), digital subscriber line (DSL), and cable modem WAN connections.
  - 40.07 Identify router serial ports and their cable and connectors.
  - 40.08 Identify and describe the placement of equipment used in various WAN configurations.
- 41.0 Define Ethernet fundamentals and operations. – The student will be able to:

- 41.01 Describe the basics of Ethernet technology.
  - 41.02 Explain naming rules of Ethernet technology.
  - 41.03 Define how Ethernet and the OSI model interact.
  - 41.04 Describe the Ethernet framing process and frame structure.
  - 41.05 List Ethernet frame field names and purposes.
  - 41.06 Identify the characteristics of CSMA/CD.
  - 41.07 Describe the key aspects of Ethernet timing, interframe spacing and backoff time after a collision.
  - 41.08 Define Ethernet errors and collisions.
  - 41.09 Explain the concept of auto-negotiation in relation to speed and duplex.
- 42.0 Define and explain the functions of bridges and switches. – The student will be able to:
- 42.01 Define bridging and switching.
  - 42.02 Define and describe the content-addressable memory (CAM) table.
  - 42.03 Define latency.
  - 42.04 Describe store-and forward and cut-through switching modes.
  - 42.05 Explain Spanning-Tree Protocol (STP).
  - 42.06 Define collisions, broadcasts, collision domains, and broadcast domains.
  - 42.07 Identify the Layer 1, 2, and 3 devices used to create collision domains and broadcast domains.
  - 42.08 Discuss data flow and problems with broadcasts.
  - 42.09 Explain network segmentation and list the devices used to create segments.
- 43.0 Explain the mathematical concepts and protocols behind the internet. – The student will be able to:
- 43.01 Explain why the Internet was developed and how TCP/IP fits the design of the Internet.
  - 43.02 List the four layers of the TCP/IP model.
  - 43.03 Describe the functions of each layer of the TCP/IP model.
  - 43.04 Compare the OSI model and the TCP/IP model.
  - 43.05 Describe the function and structure of IP addresses.
  - 43.06 Understand why subnetting is necessary.
  - 43.07 Explain the difference between public and private addressing.
  - 43.08 Understand the function of reserved IP addresses.
  - 43.09 Explain the use of static and dynamic addressing for a device.
  - 43.10 Understand how dynamic addressing can be done using RARP, BootP and DHCP.
  - 43.11 Use ARP to obtain the MAC address to send a packet to another device.
  - 43.12 Understand the issues related to addressing between networks.
- 44.0 Define and explain the difference between routed and routing protocols. – The student will be able to:
- 44.01 Describe routed (routable) protocols.
  - 44.02 List the steps of data encapsulation in an internetwork as data is routed to one or more Layer 3 devices.
  - 44.03 Describe connectionless and connection-oriented delivery.
  - 44.04 Name the IP packet fields.
  - 44.05 Describe process of routing.

- 44.06 Compare and contrast different types of routing protocols.
  - 44.07 List and describe several metrics used by routing protocols.
  - 44.08 List several uses for subnetting.
  - 44.09 Determine the subnet mask for a given situation.
  - 44.10 Use a subnet mask to determine the subnet ID.
- 45.0 Recognize, define, and explain functions of the transport layer. – The student will be able to:
- 45.01 Describe the functions of the TCP/IP transport layer.
  - 45.02 Describe flow control.
  - 45.03 Describe the processes of establishing a connection between peer systems.
  - 45.04 Describe windowing.
  - 45.05 Describe acknowledgment.
  - 45.06 Identify and describe transport layer protocols.
  - 45.07 Describe TCP and UDP header formats.
  - 45.08 Describe TCP and UDP port numbers and ports used for services and clients.
  - 45.09 List the major protocols of the TCP/IP application layer.
  - 45.10 Provide a brief description of the features and operation of well-known TCP/IP applications.
  - 45.11 Describe TCP and UDP with its function.
  - 45.12 Describe TCP synchronization and flow control.
  - 45.13 Describe multiple conversations between hosts.
  - 45.14 Understand the differences and the relationship between MAC addresses, IP addresses, and port numbers.
- 46.0 Explain, define, and identify the components of a wan and router. – The student will be able to:
- 46.01 Identify organizations responsible for WAN standards.
  - 46.02 Explain the difference between a WAN and LAN and the type of addresses each uses.
  - 46.03 Describe the role of a router in a WAN.
  - 46.04 Identify internal components of the router and describe their functions.
  - 46.05 Describe the physical characteristics of the router.
  - 46.06 Identify common ports on a router.
  - 46.07 Properly connect FastEthernet, serial WAN, and console ports.
- 47.0 Describe and identify an operating system for a router. – The student will be able to:
- 47.01 Describe the purpose of the IOS.
  - 47.02 Describe the basic operation of the IOS.
  - 47.03 Identify various IOS features.
  - 47.04 Identify the methods to establish a CLI session with the router.
  - 47.05 Move between the user EXEC and privileged EXEC modes.
  - 47.06 Establish a HyperTerminal session on a router.
  - 47.07 Log into a router.
  - 47.08 Use the help feature in the command line interface.
  - 47.09 Troubleshoot command errors.
  - 47.10 Name a router.
  - 47.11 Set passwords.

- 47.12 Examine show commands.
  - 47.13 Configure a serial interface.
  - 47.14 Configure an Ethernet interface.
  - 47.15 Execute changes to a router.
  - 47.16 Save changes to a router.
  - 47.17 Configure an interface description.
  - 47.18 Configure a message-of-the-day banner.
  - 47.19 Configure host tables.
  - 47.20 Understand the importance of backups and documentation.
- 48.0 Explain how to establish connections between neighboring routers. – The student will be able to:
- 48.01 Enable and disable Protocols.
  - 48.02 Determine which neighboring devices are connected to which local interfaces.
  - 48.03 Gather network address information about neighboring devices using CDP.
  - 48.04 Establish, Verify, Disconnect, Suspend a Telnet connection.
  - 48.05 Perform alternative connectivity tests.
  - 48.06 Troubleshoot remote terminal connections.
- 49.0 Identify and explain the router boot sequence and file system. – The student will be able to:
- 49.01 Identify the stages of the router boot sequence.
  - 49.02 Determine how a router locates and loads its operating system.
  - 49.03 Use the boot system command.
  - 49.04 Identify the configuration register values.
  - 49.05 Briefly describe the files used by the Router IOS and their functions.
  - 49.06 List the locations on the router of the different file types.
  - 49.07 Briefly describe the parts of the IOS name.
  - 49.08 Save and restore configuration files using TFTP and copy-and paste.
  - 49.09 Load an IOS image using TFTP.
  - 49.10 Load an IOS image using XModem.
  - 49.11 Verify the file system using show commands.
- 50.0 Identify and explain static and dynamic routing protocols. – The student will be able to:
- 50.01 Explain the significance of static routing.
  - 50.02 Configure static and default routes.
  - 50.03 Verify and troubleshoot static and default routes.
  - 50.04 Identify the classes of routing protocols.
  - 50.05 Identify distance vector routing protocols.
  - 50.06 Identify link-state routing protocols.
  - 50.07 Describe the basic characteristics of common routing protocols.
  - 50.08 Identify interior gateway protocols.
  - 50.09 Identify exterior gateway protocols.
  - 50.10 Enable Routing Information Protocol (RIP) on a router.
- 51.0 Describe and configure distance vector protocols. – The student will be able to:
- 51.01 Describe how routing loops can occur in distance vector routing.

- 51.02 Describe several methods used by distance vector routing protocols to ensure that routing information is accurate.
  - 51.03 Configure RIP.
  - 51.04 Use the IP classless command.
  - 51.05 Troubleshoot RIP.
  - 51.06 Configure RIP for load balancing.
  - 51.07 Configure static routes for RIP.
  - 51.08 Verify RIP.
  - 51.09 Configure IGRP.
  - 51.10 Verify IGRP operation.
  - 51.11 Troubleshoot IGRP.
- 52.0 Perform tasks related to protocol troubleshooting. – The student will be able to:
- 52.01 Describe ICMP.
  - 52.02 Describe the ICMP message format and error message types.
  - 52.03 Identify potential causes of specific ICMP error messages.
  - 52.04 Describe ICMP control messages.
  - 52.05 Identify a variety of ICMP control messages used in networks today.
  - 52.06 Determine the causes for ICMP control messages.
- 53.0 Examine and test networks. – The student will be able to:
- 53.01 Use the commands to gather detailed information about the routes installed on the router.
  - 53.02 Configure a default route or default network.
  - 53.03 Understand how a router uses both Layer 2 and Layer addressing to move data through the network.
  - 53.04 Use commands to the router at different OSI layers.
- 54.0 Define, explain and describe access lists. – The student will be able to:
- 54.01 Describe the differences between standard and extended ACLs.
  - 54.02 Explain the rules for placement of ACLs.
  - 54.03 Create and apply named ACLs.
  - 54.04 Describe the function of firewalls.
  - 54.05 Use ACLs to restrict virtual terminal access.
- 121.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 121.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 121.02 Locate, organize and reference written information from various sources. CM 3.0
  - 121.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 121.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 121.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 121.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 121.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0

- 122.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 122.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 122.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 122.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
  - 122.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 123.0 Use information technology tools. – The student will be able to:
- 123.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 123.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 123.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 123.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 124.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 124.01 Describe the nature and types of business organizations. SY 1.0
  - 124.02 Explain the effect of key organizational systems on performance and quality.
  - 124.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 124.04 Explain the impact of the global economy on business organizations.
- 127.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 127.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 127.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
  - 127.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
  - 127.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: CTS0023****Occupational Completion Point – D****Network Support Administrator – 150 Hours – SOC Code 15-1071**

- 55.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 55.01 Develop diplomatic methods to communicate with customers.

- 56.0 Participate in work-based learning experiences. – The student will be able to:
  - 56.01 Participate in work-based learning experiences in a network support services environment.
  - 56.02 Discuss the use of technology in a network support services environment.
  
- 57.0 Provide network support and assistance by troubleshooting and diagnosing through direct contact remote access. – The student will be able to:
  - 57.01 Apply appropriate diagnostic techniques to solve network problems.
  - 57.02 Perform local network support using various troubleshooting and diagnostic techniques.
  - 57.03 Perform remote network support using various remote access methods.
  
- 58.0 Develop electronic communications skills. – The student will be able to:
  - 58.01 Exhibit proficiency in using Internet services.
  - 58.02 Exhibit proficiency in downloading and uploading Internet information.
  - 58.03 Perform web-based research to solve specific network problems.
  
- 59.0 Perform logical and physical network design activities. – The student will be able to:
  - 59.01 Describe the various LAN communication problems.
  - 59.02 Describe the effects of LAN segmentation with bridges, routers, and switches.
  - 59.03 Describe the operation, characteristics and benefits of VLANS.
  - 59.04 Explain and identify LAN design goals, issues, and methodology.
  - 59.05 Demonstrate the ability to analyze equipment necessary to meet specific design requirement.
  - 59.06 Demonstrate the ability to create physical and logical network implementation documentation.
  
- 60.0 Demonstrate proficiency in selecting appropriate various routing protocols and ip routing configuration for various network designs. – The student will be able to:
  - 60.01 Describe the two parts of network addressing, and then identify the parts in specific protocol address examples.
  - 60.02 Create the different classes of IP addresses [and sub netting].
  - 60.03 Configure IP addresses.
  - 60.04 Verify IP addresses.
  - 60.05 Identify the functions of the TCP/IP transport-layer protocols.
  - 60.06 Identify the functions of the TCP/IP network-layer protocols.
  - 60.07 Identify the functions performed by ICMP.
  - 60.08 Configure IPX access lists and SAP filters to control traffic.
  - 60.09 Explain the services of separate and integrated multi-protocol routing.
  - 60.10 List problems that each routing type encounters when dealing with topology changes and describe techniques to reduce the number of these problems.
  
- 61.0 Demonstrate proficiency in using network traffic filtering to improve network performance and provide basic levels of security. – The student will be able to:

- 61.01 Define and describe the purpose and operation of network traffic filtering.
- 61.02 Demonstrate proficiency in using configuration and interface perform commands to and monitor network traffic filtering.
- 62.0 Perform network management activities related to documentation, security, performance, administration, troubleshooting and coping with environmental factors. – The student will be able to:
- 62.01 Perform documentation activities for networks, such as logs, journals, diagrams, labeling schemes, layouts, software listings, user policy, security policy.
- 62.02 Plan network security measures by establishing security policies and procedures, including user policies, authentication procedures, back-up and data recovery procedures, and redundancy techniques.
- 62.03 Demonstrate proficiency in using network monitoring software.
- 62.04 Explain the procedures necessary to monitor, create benchmarks, and plan for improvement of network performance.
- 62.05 Explain the administrative side of network management, including physical and logical boundaries, costs, error report documentation and the management of human resources.
- 63.0 Identify and describe various wan functions, devices, and demonstrate understanding of the wan design process. – The student will be able to:
- 63.01 Describe the functions of private addressing and be able to explain the major features of and configure NAT, PAT, and DHCP.
- 63.02 Describe the major features of WAN technology, including, devices, standards, encapsulation, link options, and packet and circuit switching.
- 63.03 Perform WAN design activities that require using the necessary steps in WAN design, the three-layered design model, and various other design models.
- 64.0 Describe the operation and implementation of virtual private networks. – The student will be able to:
- 64.01 Describe the virtual private network operation.
- 64.02 Describe the virtual private network implementation.
- 64.03 Demonstrate an understanding of tunneling.
- 64.04 Describe the end-to-end virtual dialup process.
- 125.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 125.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 125.02 Explain emergency procedures to follow in response to workplace accidents.
- 125.03 Create a disaster and/or emergency response plan. SHE 2.0
- 126.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 126.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0

- 126.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 126.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 126.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 128.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 128.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 128.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 128.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 128.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 128.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 128.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 128.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 128.08 Research the benefits of ongoing professional development. ECD 9.0
- 128.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 129.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 129.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 129.02 Describe the effect of money management on personal and career goals. FL 3.0
- 129.03 Develop a personal budget and financial goals. FL 3.1
- 129.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 129.05 Maintain financial records. FL 3.3
- 129.06 Read and reconcile financial statements. FL 3.4
- 129.07 Research, compare and contrast investment opportunities.

**Course Number: CTS0024**  
**Occupational Completion Point – E**  
**Senior Network Administrator – 150 Hours – SOC Code 15-1071**

- 65.0 Participate in work-based learning experiences. – The student will be able to:
- 65.01 Participate in work-based learning experiences in a network support services environment.
- 65.02 Discuss the use of technology in a network support services environment.
- 66.0 Compare and contrast hierarchical network design models and scalable internetworks. – The student will be able to:
- 66.01 Show proficiency in the use of the three-layer hierarchical design model.
- 66.02 Describe router functions in the core layer, distribution layer, and access layer.
- 66.03 Describe key characteristics of making the network reliable, available, responsive, efficient, adaptable, accessible, scalable and secure.
- 66.04 Compare and contrast Equal-Cost load balancing with RIP and Unequal-Cost load balancing with IGRP.

- 67.0 Discuss advanced IP addressing management. – The student will be able to:
- 67.01 Describe and explain IPv4 addressing, Internet's address architecture, classes of IP addresses, and perform subnet masking.
  - 67.02 Understand and explain Classless Interdomain Routing (CIDR), route aggregation, supernetting and address allocation.
  - 67.03 Discuss and explain Variable-Length Subnet Masks along with classless and classfull routing protocols.
  - 67.04 Compare and contrast route summarization and route flapping.
  - 67.05 Describe and discuss Network Address Translation (NAT), private addressing with NAT, private IP addresses (RFC 1918) and discontinuous subnets.
  - 67.06 Use IP unnumbered and DHCP operations
  - 67.07 Configure IOS DHCP server, Easy IP and IP helper addresses
  - 67.08 Discuss IP addressing crisis and solutions with IPv6 address formats.
  - 67.09 Configure IP unnumbered in a lab setting.
- 68.0 Demonstrate proficiency in basic router configuration. – The student will be able to:
- 68.01 Build 'Start.TXT', capture hyperterminal and telnet sessions, create access control list and extended pings, and configure VLSM using routing fundamentals.
  - 68.02 Configure static routing and dynamic routing using distance-vector routing protocols, link-state routing protocols, and hybrid routing.
  - 68.03 Configure static default routes and default routing with IGRP using default route caveats and floating static routes
  - 68.04 Describe and explain convergence issues and route calculation fundamentals.
  - 68.05 Start routing process using various configurations, initiate routing updates and routing metrics.
  - 68.06 Show proficiency in migrating from RIP to EIGRP.
  - 68.07 Configuring default routing with RIP and IGRP, configuring floating static routes.
- 69.0 Demonstrate proficiency in the use of OSPF. – The student will be able to:
- 69.01 Discuss issues addressed by the use OSPF, list and define OSPF terminology, list OSPF states and OSPF network types, describe OSPF Hello protocol and Steps of OSPF operation.
  - 69.02 Establish router adjacencies, elect a DR and a BDR, and discover routes.
  - 69.03 Select appropriate routes and maintain routing information configuring OSPF on routers within a single area.
  - 69.04 Use optional configuration commands and configure OSPF over NBMA in a lab setting.
  - 69.05 Describe Full-Mesh Frame Relay, Partial-Mesh Frame Relay, Point-to-Multipoint OSPF.
- 70.0 Understand and discuss multi-area OSPF operation and configuration. – The student will be able to:
- 70.01 Configure OSPF, examining the DR/BDR election process
  - 70.02 Configure Point-to-Multipoint OSPF over frame relay, create
  - 70.03 multiple OSPF areas, use OSPF router types, and incorporate
  - 70.04 OSPF LSA and area types.

- 70.05 Configuring OSPF operation across multiple areas and flooding LSUs to multiple areas, updating the routing table
  - 70.06 Configure Multi-area OSPF, using and configuring OSPF, multi-area components, and configuring OSPF route summarization.
  - 70.07 Verify OSPF operation, show commands, clear and debug commands.
- 71.0 Demonstrate the use of stub and totally stubby areas. – The student will be able to:
- 71.01 Use stub and totally stubby areas.
  - 71.02 Set up stub and totally stub area criteria.
  - 71.03 Configure stub and totally stubby areas.
  - 71.04 Set up a OSPF stub area configuration example.
  - 71.05 Set up a OSPF totally stubby configuration example.
  - 71.06 Monitor multi-area OSPF, verifying multi-area OSPF operation
  - 71.07 Create a multi-area OSPF.
- 72.0 Configure and define virtual links. – The student will be able to:
- 72.01 Meet the backbone area requirements.
  - 72.02 Configure virtual links.
  - 72.03 Set up a virtual link configuration example.
  - 72.04 Show not-so-stubby areas.
  - 72.05 Demonstrate how NSSA operates.
  - 72.06 Configure a stub area and a totally stubby area.
  - 72.07 Configure an NSSA and configure virtual links.
- 73.0 Demonstrate proficiency in the use of EIGRP. – The student will be able to:
- 73.01 Define and explain EIGRP fundamentals, features, components, operations.
  - 73.02 Configure and monitor EIGRP in lab exercise.
- 74.0 Demonstrate proficiency in route optimization. – The student will be able to:
- 74.01 Show how to control routing updates, policy routing, and route redistribution.
  - 74.02 Create a route optimization configuration in lab setting.
- 75.0 Demonstrate proficiency in the use of BGP. – The student will be able to:
- 75.01 Define and explain autonomous systems and basic BGP operations.
  - 75.02 Configure and monitor BGP operations and routing process.
  - 75.03 Define and explain BGP attributes and the BGP decision process.
  - 75.04 Create BGP configuration in lab setting.
  - 75.05 Develop a scaling BGP and route reflectors.
  - 75.06 Set up BGP route filtering and policy routing.
  - 75.07 Explain the community attribute and peer groups.
  - 75.08 Explain redundancy, symmetry, and load balancing.
  - 75.09 Define and explain BGP redistribution.
  - 75.10 Perform scaling BGP lab exercises and configure BGP in a lab setting.
- 76.0 Define and show proficiency in security. – The student will be able to:

- 76.01 Show proficiency in securing router access using access lists.
  - 76.02 Show proficiency in using dynamic access lists using lock-and-key.
  - 76.03 Show proficiency in session filtering.
  - 76.04 Define and explain context-based access control.
  - 76.05 Use an alternative to access lists.
  - 76.06 Configure router security in a lab setting.
- 77.0 Using lab equipment, demonstrate the setup, configuration, connectivity of routers to create a small WAN. – The student will be able to:
- 77.01 Demonstrate the use of remote access.
  - 77.02 Select appropriate WAN technologies for different scenarios.
  - 77.03 Select remote access solutions for different technologies.
  - 77.04 Assemble and Cable WAN components.
- 78.0 Show the process of using modems and asynchronous dialup connections. – The student will be able to:
- 78.01 List, describe and verify modem functions.
  - 78.02 Configure asynchronous interfaces and terminal lines.
  - 78.03 Demonstrate proficiency in the creation of modem configurations.
  - 78.04 Configuring a Windows PC dialup connection.
  - 78.05 Use dialup connection configurations.
- 79.0 Configure and verify PPP configurations. – The student will be able to:
- 79.01 Demonstrate the use of PPP authentication, PPP callback, PPP compression, and PPP multilink.
  - 79.02 Create and verifying PPP configurations.
- 80.0 Configure and monitor ISDN and DDR. – The student will be able to:
- 80.01 Explain and discuss ISDN architecture and ISDN protocol layers.
  - 80.02 Configure ISDN BRI Dial-on-Demand, static routing and default routing, and ISDN PRI.
  - 80.03 Create optional configurations.
  - 80.04 Monitor the ISDN interface.
  - 80.05 Create ISDN configurations.
- 81.0 Configure dialer profiles. – The student will be able to:
- 81.01 Demonstrate the use of Legacy DDR.
  - 81.02 Create and use various dialer profiles.
  - 81.03 Verify and monitor dialer profiles configurations.
- 82.0 Create and trouble-shoot x.25 configurations. – The student will be able to:
- 82.01 Show proficiency in the use of X.25 concepts.
  - 82.02 Configure and Trouble-shoot X.25.
- 83.0 Configure and trouble-shoot frame relay. – The student will be able to:

- 83.01 Show proficiency using frame relay concepts.
  - 83.02 Configure frame relay.
  - 83.03 Create various frame relay topologies and configurations.
  - 83.04 Demonstrate proficiency managing frame relay traffic.
  - 83.05 Show the process of frame relay traffic shaping.
  - 83.06 Create on demand routing using frame relay.
  - 83.07 Trouble-shoot frame relay traffic configurations.
- 84.0 Demonstrate the use of WAN backup and dial backup. – The student will be able to:
- 84.01 Demonstrate dial backup.
  - 84.02 Demonstrate backup interface operations.
  - 84.03 Demonstrate routing with the load backup feature.
  - 84.04 Verifying dial backup configurations in a lab setting.
  - 84.05 Create various WAN backup configurations in a lab setting.
- 85.0 Demonstrate the use of queuing and compression techniques. – The student will be able to:
- 85.01 Demonstrate proficiency using various queuing options.
  - 85.02 Demonstrate proficiency optimizing traffic flow with data compression.
- 86.0 Demonstrate the use of scaling IP addresses with NAT. – The student will be able to:
- 86.01 Define and explain NAT concepts and terminology.
  - 86.02 Demonstrate proficiency in configuring, creating and verifying NAT configurations in lab setting.
- 87.0 Demonstrate proficiency using AAA to scale access control. – The student will be able to:
- 87.01 List and define AAA concepts and terminology.
  - 87.02 Demonstrate proficiency configuring AAA.
  - 87.03 Perform lab exercises using access control configurations.
- 88.0 Discuss and explain emerging remote-access technologies. – The student will be able to:
- 88.01 List and define features and capabilities of cable, modems wireless, network access, multichannel multipoint distribution services, local multipoint distribution services, wireless local area networking, very-high-data-rate digital subscriber line (VDSL).
- 89.0 Demonstrate proficiency configuring a 700 series router. – The student will be able to:
- 89.01 Use a series router.
  - 89.02 Configure the 700 Series router in a lab setting.
  - 89.03 Use various IOS configurations in a lab setting.

- 90.0 Understand and describe key characteristics of various switching technologies, LAN switching and the hierarchical model of network design, and the building-block approach.  
– The student will be able to:
- 90.01 Discuss the requirements of the evolving campus structure and the issues with traditional network designs.
  - 90.02 Describe the fundamental campus elements and contributing variables to campus networks.
  - 90.03 Compare and contrast the traditional 80/20 rule of network traffic and the new 20/80 rule of network traffic.
  - 90.04 Discuss switching and the OSI model, layer 2, 3, and 4 switching, and multiplayer switching.
  - 90.05 Discuss the core layer, the distribution layer, and the access layer in relation to switching.
  - 90.06 List and describe the advantages and disadvantages of the building-block approach, scaling the switch block, building the core block and layer 2 and 3 backbone scaling.
- 91.0 Understand and describe campus networks, design models, and switching technologies.  
– The student will be able to:
- 91.01 List and explain key characteristics of various switching technologies.
  - 91.02 Discuss LAN switching and the hierarchical model of network design.
  - 91.03 Show proficiency using the building-block approach to networking.
- 92.0 List and describe various types of LAN media. – The student will be able to:
- 92.01 Show proficiency using modem functions and maintaining modem auto-configurations.
  - 92.02 Create configurations for asynchronous connections.
  - 92.03 Create various modem configurations.
- 93.0 Show proficiency configuring a switch. – The student will be able to:
- 93.01 Demonstrate the process for initial connectivity to a switch.
  - 93.02 Show proficiency creating the basic configuration of a switch.
  - 93.03 List and explain important IOS features.
- 94.0 Demonstrate proficiency configuring VLANs. – The student will be able to:
- 94.01 Understand and explain VLANs.
  - 94.02 Discuss VLAN basics and VLAN types.
  - 94.03 Configure a VLAN in a lab setting.
  - 94.04 Show use of VLAN identification techniques and VLAN trunking protocol.
  - 94.05 Create VTP configuration and use VTP pruning.
- 95.0 Understand and explain spanning tree protocol (STP) and redundant links. – The student will be able to:
- 95.01 Discuss Basic STP Operations and STP Processes.
  - 95.02 Compare and contrast VLANs and STP.

- 95.03 Show how STP is used in the Campus Network.
- 95.04 Demonstrate the resolution of Redundant Links
- 96.0 Demonstrate proficiency routing between VLANS. – The student will be able to:
  - 96.01 Understand and discuss VLAN issues.
  - 96.02 Route switch modules.
  - 96.03 Show proficiency using external routers in a lab setting.
- 97.0 Demonstrate proficiency with multilayer switching. – The student will be able to:
  - 97.01 Define and explain MLS Processes.
  - 97.02 Create basic MLS configurations.
  - 97.03 Show proficiency using flow masks.
  - 97.04 Show how to use MLS on the switch.
- 98.0 Demonstrate the use of hot standby routing protocol (HSRP). – The student will be able to:
  - 98.01 Define and explain HSRP operations.
  - 98.02 Create HSRP configurations in a lab setting.
- 99.0 Understand and use IGMP and multicasting. – The student will be able to:
  - 99.01 Define and explain multicasting.
  - 99.02 Understand and discuss IGMP.
  - 99.03 Show proficiency routing multicast traffic.
  - 99.04 Demonstrate proficiency using multicast routing protocols.
  - 99.05 Configure IP multicast routing in a lab setting.
  - 99.06 List and describe optional IP multicast routing tasks.
- 100.0 Demonstrate proficiency restricting network access. – The student will be able to:
  - 100.01 Show proficiency creating networking policies.
  - 100.02 Discuss and explain basic network security techniques.
  - 100.03 Demonstrate execution of policy configurations on a set of routers.
- 101.0 Demonstrate proficiency using network troubleshooting tools and basic network management diagnostic tools. – The student will be able to:
  - 101.01 Explain and discuss troubleshooting methodologies and general problem-solving concepts.
  - 101.02 List and define general considerations in troubleshooting.
  - 101.03 Define and explain each component of the general problem-solving model.
  - 101.04 Demonstrate proficiency using common management and diagnostic tools.
  - 101.05 Show proficiency using network management software.
  - 101.06 Demonstrate proficiency using router diagnostic commands.
  - 101.07 Familiarize logging and error message formats.
  - 101.08 Demonstrate proficiency interacting with technical support.

- 102.0 List and define the commonly used protocols, routing techniques, and switching processes. – The student will be able to:
- 102.01 List and define network services, layer 2 LAN protocols, and layer 2 WAN protocols.
  - 102.02 Race packets through a router.
  - 102.03 Define and explain packet switching paths.
  - 102.04 Identify performance issues affecting packet switching.
  - 102.05 Define and explain low-level troubleshooting.
- 103.0 Demonstrate proficiency troubleshooting TCP/IP, LAN switch environment, VLANs, frame relay, and ISDN. – The student will be able to:
- 103.01 List, define, and explain theory, concepts, and terminology of TCP/IP, LAN switch environment, spanning tree, VLANs, frame relay, and ISDN.
  - 103.02 List, define, and explain common problems with TCP/IP, LAN switching, and ISDN.
  - 103.03 List, define, and explain common scenarios with VLANs, frame relay, and ISDN.
  - 103.04 Troubleshoot TCP/IP in a Windows environment; use LAN switch troubleshooting tools, explain general VLAN troubleshooting issues; list and explain the steps in frame relay troubleshooting and ISDN problem isolation.
  - 103.05 Use show commands to verify LAN switch configuration settings.
  - 103.06 Use show and debug commands for TCP/IP, router VLANs, frame relay, and ISDN.
  - 103.07 Use TCP/IP diagnostic tools.
- 104.0 Demonstrate proficiency configuring and trouble-shooting IPX and APPLE TALK. – The student will be able to:
- 104.01 List, define, and explain theory, concepts, and terminology of IPX and AppleTalk.
  - 104.02 Demonstrate proficiency configuring IPX and AppleTalk.
  - 104.03 Demonstrate proficiency trouble shooting IPX and AppleTalk.
  - 104.04 Demonstrate proficiency using show and debug command with IPX and AppleTalk.
- 105.0 Demonstrate proficiency troubleshooting EIGRP, OSPF, and BGP. – The student will be able to:
- 105.01 List, define, and explain theory, concepts, and terminology of EIGRP, OSPF, and BGP.
  - 105.02 Demonstrate proficiency configuring AAA, EIGRP, OSPF, and BGP.
  - 105.03 Demonstrate proficiency trouble shooting EIGRP, OSPF, and BGP.
  - 105.04 Demonstrate proficiency using the show and debug commands for OSPF and BGP.

**Course Number: CTS0029**

**Occupational Completion Point – F**

**Wireless Network Administrator – 150 Hours – SOC Code 15-1081**

- 106.0 Participate in work-based learning experiences. – The student will be able to:

- 106.01 Participate in work-based learning experiences in a network support services environment.
- 106.02 Discuss the use of technology in a network support services environment.
- 106.03 Discuss the management/supervisory skills needed in a network support service environment.
  
- 107.0 Demonstrate proficiency in applying radio frequency (RF) technologies. – The student will be able to:
  - 107.01 Define and apply the basic concepts of RF behavior.
  - 107.02 Understand the applications of basic RF antenna concepts.
  - 107.03 Understand and apply the basic components of RF
  - 107.04 Identify some of the different uses for spread spectrum technologies.
  - 107.05 Comprehend the differences between, and apply the different types of spread spectrum technologies.
  - 107.06 Identify and apply the concepts which make up the functionality of spread spectrum technology.
  - 107.07 Identify the laws set forth by the FCC that govern spread spectrum technology, including power outputs, frequencies, bandwidths, hop times, and dwell times.
  
- 108.0 Develop an awareness of wireless LAN technologies. – The student will be able to:
  - 108.01 Identify and apply the processes involved in authentication and association.
  - 108.02 Recognize the concepts associated with wireless LAN service sets.
  - 108.03 Understand the implications of the following power management features of wireless LANs.
  - 108.04 Specify the modes of operation involved in the movement of data traffic across wireless LANs.
  
- 109.0 Perform implementation and management activities. – The student will be able to:
  - 109.01 Identify the technology roles for which wireless LAN technology is an appropriate technology application.
  - 109.02 Identify the purpose of infrastructure devices and explain how to install, configure, and manage them.
  - 109.03 Identify the purpose of wireless LAN client devices and explain how to install, configure, and manage them.
  - 109.04 Identify the purpose of wireless LAN gateway devices and explain how to install, configure, and manage them.
  - 109.05 Identify the basic attributes, purpose, and function of types of antennas.
  - 109.06 Describe the proper locations and methods for installing antennas.
  - 109.07 Explain the concepts of polarization, gain, beamwidth, and free-space path loss as they apply to implementing solutions that require antennas.
  - 109.08 Identify the use of wireless LAN accessories and explain how to install, configure, and manage them.
  - 109.09 Identify, understand, correct or compensate for wireless LAN implementation challenges.
  - 109.10 Explain how antenna diversity compensates for multipath.
  - 109.11 Identify and understand the importance and process of conducting a thorough site survey.

- 109.12 Identify and understand the importance of the necessary tasks involved in preparing to do an RF site survey.
- 109.13 Identify the necessary equipment involved in performing a site survey.
- 109.14 Understand the necessary procedures involved in performing a site survey.
- 109.15 Identify and understand site survey reporting procedures.

110.0 Develop an awareness of wireless security systems. – The student will be able to:

- 110.01 Identify the strengths, weaknesses and appropriate uses of wireless LAN security techniques.
- 110.02 Describe types of wireless LAN security attacks, and explain how to identify and prevent them.
- 110.03 Given a wireless LAN scenario, identify the appropriate security solution from the following available wireless LAN security solutions.
- 110.04 Explain the uses of corporate security policies and how they are used to secure a wireless LAN.
- 110.05 Identify how and security precautions are used to secure a wireless LAN.

111.0 Demonstrate knowledge of wireless industry standards. – The student will be able to:

- 111.01 Identify, apply and comprehend the differences between wireless LAN standards.
- 111.02 Understand the roles of organizations in providing direction and accountability within the wireless LAN industry.
- 111.03 Identify the differences between the ISM and UNII bands.
- 111.04 Identify and understand the differences between the power output rules for point-to-point and point-to-multipoint links.
- 111.05 Identify the basic characteristics of infrared wireless LANs.

**Course Number: EEV0317**

**Occupational Completion Point – G**

**Data Communication Analyst – 150 Hours – SOC Code 15-1081**

112.0 Participate in work-based learning experiences. – The student will be able to:

- 112.01 Participate in work-based learning experiences in a network support services environment.
- 112.02 Discuss the use of technology in a network support services environment.
- 112.03 Discuss the management/supervisors skills needed in a network support services environment.

113.0 Demonstrate a knowledge of general security concepts. – The student will be able to:

- 113.01 Describe access control.
- 113.02 Describe network authentication.
- 113.03 Understand the various types of network attacks (backdoors, DOS, spoofing, etc.)
- 113.04 Identify and modify non-essential services and protocols.
- 113.05 Identify malicious code (virus, worm, Trojan).
- 113.06 Configure system auditing, logging, and scanning as it relates to security procedures.

- 114.0 Develop an awareness of communication security concepts. – The student will be able to:
- 114.01 Describe remote access protocols (VPN, RADIUS, L2TP, etc.).
  - 114.02 Identify E-mail security concerns (hoaxes, spam, etc.).
  - 114.03 Identify web (HTML) security concepts and designs (HTTP/S, IM, etc.).
  - 114.04 Demonstrate an awareness of file transfer security concerns.
  - 114.05 Describe and identify wireless networking security concerns and vulnerabilities.
- 115.0 Develop an awareness of network infrastructure security. – The student will be able to:
- 115.01 Install and configure network firewalls.
  - 115.02 Identify security concerns with various wiring media (copper, fiber).
  - 115.03 Identify security concerns associated with removable media and storage devices.
  - 115.04 Demonstrate an awareness of security topologies (security zones, Intranets, NAT, etc.).
  - 115.05 Configure and use intrusion detection software.
  - 115.06 Establish security baselines (updates, patches, hot fixes, Access Control lists, etc.).
  - 115.07 Demonstrate the ability to configure a Virtual Private Network (VPN).
  - 115.08 Describe the function of Network Address Translation (NAT).
- 116.0 Develop an awareness of cryptography and its relation to security. – The student will be able to:
- 116.01 Demonstrate an understanding of security algorithms and encryption.
  - 116.02 Use and apply Public Key Certificates.
  - 116.03 Demonstrate an understanding of standards and protocols in commerce.
- 117.0 Incorporate organizational and operational security in an appropriate and effective manner. – The student will be able to:
- 117.01 Describe how to establish a network security policy.
  - 117.02 Explain the importance of physical security to protect network resources.
  - 117.03 Identify and use disaster recovery procedures.
  - 117.04 Describe the importance of business continuity and its relationship to network and corporate security.
  - 117.05 Describe security policies and procedures that would be used in a business environment.
  - 117.06 Explain the importance of privilege management (access, password management, sign-on, etc.).
  - 117.07 Describe the concept of forensics as it applies to network security (obtaining evidence of security breaches).
  - 117.08 Explain the importance of educating users and supervisors in regard to network security.
  - 117.09 Create documentation that describes standards and guidelines for a network security system.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**           **Computer and Business Skills**  
**Course Number:**       **8200330**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

- related to learning and work environments.
- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computing for College and Careers  
**Course Number:** 8209020  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.
- 16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 1**  
**Course Number:**       **8207020**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to develop competencies needed for employment in network support positions. The content includes instruction in basic hardware configuration, hardware and software troubleshooting, operating systems, and computer networking.

25.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

25.01 Develop strategies for resolving customer conflicts.

26.0 Identify, install, configure, and upgrade desktop and server computer modules and peripherals, following established basic procedures for system assembly and disassembly of field replaceable modules. – The student will be able to:

26.01 Identify and describe the functions of main processing boards (e.g., CPUs, RAM, ROM, bus architecture).

26.02 Identify and describe the functions of communication ports (e.g., serial and parallel ports).

26.03 Identify and describe the functions of peripheral devices (e.g., scanners, modems, hard drives, printers).

26.04 Identify and describe the components of portable systems (e.g., battery, LCD, AC adapter, PDAs).

26.05 Troubleshoot, install and upgrade computers and peripherals.

26.06 Perform system hardware setup Demonstrate an understanding of input/output devices.

26.07 Installation and configuration of applications software, hardware, and device drivers.

26.08 Demonstrate an understanding of the operation and purpose of hardware components.

26.09 Install operating system software.

26.10 Customize operating systems.

26.11 Install application software.

26.12 Perform storage formatting and preparation activities.

26.13 Identify data measurement (e.g., bits, bytes, kilobytes).

26.14 Install and Configure RAID.

26.15 Recognize and report on server room environmental issues (temperature, humidity/ESD/power surges, back-up).

27.0 Diagnose and troubleshoot common module problems and system malfunctions of computer software, hardware, peripherals, and other office equipment. – The student will be able to:

- 27.01 Troubleshoot a personal computer system
  - 27.02 Identify configuration problems.
  - 27.03 Identify software problems.
  - 27.04 Identify hardware malfunctions.
  - 27.05 Identify network malfunctions
  - 27.06 Resolve computer error messages.
  - 27.07 Understand and troubleshoot memory and cache systems.
  - 27.08 Verify that drives are the appropriate type.
  - 27.09 Describe knowledge database search procedures used to identify possible solutions when troubleshooting software and hardware problems.
- 28.0 Identify issues, procedures and devices for protection within the computing environment, including people, hardware and the surrounding workspace. – The student will be able to:
- 28.01 Apply basic rules for hardware safety.
  - 28.02 Demonstrate proficiency in basic preventative hardware maintenance.
  - 28.03 Special disposal procedures that comply with environmental guidelines for batteries, CRTs, toner kits/cartridges, chemical solvents and cans, and MSDS.
  - 28.04 Apply ergonomic principles applicable to the configuration of computer workstations.
  - 28.05 Describe ethical issues and problems associated with computers and information systems.
- 29.0 Identify specific terminology, facts, ways and means of dealing with classifications, categories and principles of motherboards, processors and memory in desktop and server computer systems. – The student will be able to:
- 29.01 Identify EDO RAM, DRAM, SRAM, RIMM, VRAM, SDRAM, and WRAM.
  - 29.02 Identify memory banks, memory chips (8-bit, 16-bit, and 32-bit), SIMMS (Single In-line Memory Module), DIMMS (Dual In-line Memory Module), parity chips versus non-parity chips.
  - 29.03 Identify printer parallel port, COM/serial port, floppy drive, hard drive, Memory, and Boot sequence.
- 30.0 Demonstrate knowledge of basic types of printers, basic concepts, printer components, how they work, how they print onto a page, paper path, care and service techniques, and common problems. – The student will be able to:
- 30.01 Identify types of printers—Laser, Inkjet, Dot Matrix.
  - 30.02 Identify care and service techniques and common problems with primary printer types.
  - 30.03 Implement and manage printing on a network.
- 31.0 Identify and describe basic network concepts and terminology, ability to determine whether a computer is networked, knowledge of procedures for swapping and configuring network interface cards, and knowledge of the ramifications of repairs when a computer is networked. – The student will be able to:

- 31.01 Define networking and describe the purpose of a network.
  - 31.02 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
  - 31.03 Describe the various types of network topologies.
  - 31.04 Identify and describe the purpose of standards, protocols, and the Open Systems Interconnection (OSI) reference model.
  - 31.05 Configure network and verify network connectivity.
  - 31.06 Discuss the responsibilities of the network administrator (e.g., rights and responsibilities).
  - 31.07 Develop user logon procedures.
  - 31.08 Utilize network management infrastructures (e.g., network monitoring, alerting, security) to perform administrative tasks.
  - 31.09 Identify common backup strategies and procedures.
  - 31.10 Select and use appropriate electronic communications software and hardware for specific tasks.
  - 31.11 Compare and contrast Internet software and protocols.
  - 31.12 Diagnose and resolve electronic communications operational problems.
  - 31.13 Design and implement directory tree structures.
  - 31.14 Install services tools (SNMP, backup software)
  - 31.15 Perform full backup and verify backup
  - 31.16 Identify bottlenecks (e.g., processor, bus transfer, I/O, disk I/O, network I/O, memory).
  - 31.17 Use the concepts of fault tolerance/fault recovery to create a disaster recovery plan.
  - 31.18 Document and test disaster recovery plan regularly, and update as needed.
- 32.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, internet, remote access, or direct contact. – The student will be able to:
- 32.01 Apply call center vocabulary.
  - 32.02 Listen and input information simultaneously.
  - 32.03 Apply first response assistance for minor repair work.
- 33.0 Demonstrate proficiency using graphical user interface (GUI) operating systems. – The student will be able to:
- 33.01 Identify parts of GUI windows.
  - 33.02 Create and use icons.
  - 33.03 Demonstrate proficiency in using menu systems.
  - 33.04 Demonstrate proficiency in using pointing and selection devices.
  - 33.05 Identify keyboard shortcuts and special function keys.
  - 33.06 Demonstrate proficiency in manipulating windows.
  - 33.07 Utilize help systems and hypertext links.
  - 33.08 Create, organize, and maintain file system directories.
  - 33.09 Organize desktop objects.
  - 33.10 Run multiple applications.
- 118.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0

- 118.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 118.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 118.03 Present information formally and informally for specific purposes and audiences. AF 2.9
  
- 119.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
  - 119.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 119.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 119.03 Construct charts/tables/graphs using functions and data. AF 3.5
  
- 120.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
  - 120.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 120.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 2, Infrastructure**  
**Course Number:**       **8207030**  
**Course Credit:**         **1**

**Course Description:**

This course focuses on understanding network terminology and protocols, local-area networks, wide-area networks, OSI models, cabling, cabling tools, routers, router programming, Ethernet, IP addressing and network standards.

- 34.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 34.01 Develop diplomatic methods to communicate with customers.
- 35.0 Perform end user support and assistance by troubleshooting and diagnosing through telephone, e-mail, remote access, or direct contact. – The student will be able to:
- 35.01 Apply first response assistance for minor repair work.
- 36.0 Understand, describe, and explain internet connections. – The student will be able to:
- 36.01 Understand the physical connectivity necessary for a computer to connect to the Internet.
- 36.02 Recognize the primary components of a computer.
- 36.03 Install and troubleshoot network interface cards and/or modems.
- 36.04 Use basic testing procedures to test the Internet connection.
- 36.05 Demonstrate a basic understanding of the use of Web browsers and plug-ins.
- 37.0 Define networking terminology. – The student will be able to:
- 37.01 Explain the importance of bandwidth in networking.
- 37.02 Identify bps, kbps, Mbps, and Gbps as units of bandwidth.
- 37.03 Explain the difference between bandwidth and throughput.
- 37.04 Explain the development of the Open System Interconnection model (OSI).
- 37.05 List the advantages of a layered approach.
- 37.06 Identify each of the seven layers of the OSI model.
- 37.07 Identify the four layers of the TCP/IP model.
- 37.08 Describe the similarities and differences between the two models.
- 37.09 Briefly outline the history of networking.
- 37.10 Identify devices used in networking.
- 37.11 Understand the role of protocols in networking.
- 37.12 Define LAN, WAN, MAN, and SAN.
- 37.13 Explain VPNs and their advantages.
- 37.14 Describe the differences between intranets and extranets.

- 38.0 Explain how to connect copper media, optical media, and wireless media. – The student will be able to:
- 38.01 Discuss the electrical properties of matter.
  - 38.02 Define voltage, resistance, impedance, current, and circuits.
  - 38.03 Describe the specifications and performances of different types of cable.
  - 38.04 Describe coaxial cable and its advantages and disadvantages over other types of cable.
  - 38.05 Describe shielded twisted-pair (STP) cable and unshielded twisted-pair cable and its uses.
  - 38.06 Describe (UTP) and their uses.
  - 38.07 Discuss the characteristics of straight-through, crossover, and rollover cables and where each is used.
  - 38.08 Explain the basics of fiber-optic cable.
  - 38.09 Describe how fibers can guide light for long distances.
  - 38.10 Describe multimode and single-mode fiber.
  - 38.11 Describe how fiber is installed.
  - 38.12 Describe the type of connectors and equipment used with fiber-optic cable.
  - 38.13 Explain how fiber is tested to ensure that it will function properly.
  - 38.14 Discuss safety issues dealing with fiber-optics.
- 39.0 Perform tasks related to the network cable testing and cable making. – The student will be able to:
- 39.01 Differentiate between sine waves and square waves.
  - 39.02 Define and calculate exponents and logarithms.
  - 39.03 Define and calculate decibels.
  - 39.04 Define basic terminology related to time, frequency, and noise.
  - 39.05 Differentiate between digital bandwidth and analog bandwidth.
  - 39.06 Compare and contrast noise levels on various types of cabling.
  - 39.07 Define and describe the affects of attenuation and impedance mismatch.
  - 39.08 Define crosstalk, near-end crosstalk, far-end crosstalk, and power sum near-end crosstalk.
  - 39.09 Describe how crosstalk and twisted pairs help reduce noise.
  - 39.10 Describe the ten copper cable tests defined in TIA/EIA-568-B.
  - 39.11 Describe the difference between Category 5 and Category 6 cable.
- 40.0 Define network topologies, devices and connections. – The student will be able to perform tasks related to the following:
- 40.01 Identify characteristics of Ethernet networks.
  - 40.02 Identify straight-through, crossover, and rollover cable
  - 40.03 Describe the function, advantages, and disadvantages of repeaters, hubs, bridges, switches, and wireless network components.
  - 40.04 Describe the function of peer-to-peer networks.
  - 40.05 Describe the function, advantages, and disadvantages of client-server networks.
  - 40.06 Describe and differentiate between serial, Integrated Services Digital Network (ISDN), digital subscriber line (DSL), and cable modem WAN connections.
  - 40.07 Identify router serial ports and their cable and connectors.
  - 40.08 Identify and describe the placement of equipment used in various WAN configurations.

- 41.0 Define Ethernet fundamentals and operations. – The student will be able to:
- 41.01 Describe the basics of Ethernet technology.
  - 41.02 Explain naming rules of Ethernet technology.
  - 41.03 Define how Ethernet and the OSI model interact.
  - 41.04 Describe the Ethernet framing process and frame structure.
  - 41.05 List Ethernet frame field names and purposes.
  - 41.06 Identify the characteristics of CSMA/CD.
  - 41.07 Describe the key aspects of Ethernet timing, interframe spacing and backoff time after a collision.
  - 41.08 Define Ethernet errors and collisions.
  - 41.09 Explain the concept of auto-negotiation in relation to speed and duplex.
- 42.0 Define and explain the functions of bridges and switches. – The student will be able to:
- 42.01 Define bridging and switching.
  - 42.02 Define and describe the content-addressable memory (CAM) table.
  - 42.03 Define latency.
  - 42.04 Describe store-and forward and cut-through switching modes.
  - 42.05 Explain Spanning-Tree Protocol (STP).
  - 42.06 Define collisions, broadcasts, collision domains, and broadcast domains.
  - 42.07 Identify the Layer 1, 2, and 3 devices used to create collision domains and broadcast domains.
  - 42.08 Discuss data flow and problems with broadcasts.
  - 42.09 Explain network segmentation and list the devices used to create segments.
- 43.0 Explain the mathematical concepts and protocols behind the internet. – The student will be able to:
- 43.01 Explain why the Internet was developed and how TCP/IP fits the design of the Internet.
  - 43.02 List the four layers of the TCP/IP model.
  - 43.03 Describe the functions of each layer of the TCP/IP model.
  - 43.04 Compare the OSI model and the TCP/IP model.
  - 43.05 Describe the function and structure of IP addresses.
  - 43.06 Understand why subnetting is necessary.
  - 43.07 Explain the difference between public and private addressing.
  - 43.08 Understand the function of reserved IP addresses.
  - 43.09 Explain the use of static and dynamic addressing for a device.
  - 43.10 Understand how dynamic addressing can be done using RARP, BootP and DHCP.
  - 43.11 Use ARP to obtain the MAC address to send a packet to another device.
  - 43.12 Understand the issues related to addressing between networks.
- 44.0 Define and explain the difference between routed and routing protocols. – The student will be able to:
- 44.01 Describe routed (routable) protocols.
  - 44.02 List the steps of data encapsulation in an internetwork as data is routed to one or more Layer 3 devices.

- 44.03 Describe connectionless and connection-oriented delivery.
  - 44.04 Name the IP packet fields.
  - 44.05 Describe process of routing.
  - 44.06 Compare and contrast different types of routing protocols.
  - 44.07 List and describe several metrics used by routing protocols.
  - 44.08 List several uses for subnetting.
  - 44.09 Determine the subnet mask for a given situation.
  - 44.10 Use a subnet mask to determine the subnet ID.
- 45.0 Recognize, define, and explain functions of the transport layer. – The student will be able to:
- 45.01 Describe the functions of the TCP/IP transport layer.
  - 45.02 Describe flow control.
  - 45.03 Describe the processes of establishing a connection between peer systems.
  - 45.04 Describe windowing.
  - 45.05 Describe acknowledgment.
  - 45.06 Identify and describe transport layer protocols.
  - 45.07 Describe TCP and UDP header formats.
  - 45.08 Describe TCP and UDP port numbers and ports used for services and clients.
  - 45.09 List the major protocols of the TCP/IP application layer.
  - 45.10 Provide a brief description of the features and operation of well-known TCP/IP applications.
  - 45.11 Describe TCP and UDP with its function.
  - 45.12 Describe TCP synchronization and flow control.
  - 45.13 Describe multiple conversations between hosts.
  - 45.14 Understand the differences and the relationship between MAC addresses, IP addresses, and port numbers.
- 46.0 Explain, define, and identify the components of a WAN and router. – The student will be able to:
- 46.01 Identify organizations responsible for WAN standards.
  - 46.02 Explain the difference between a WAN and LAN and the type of addresses each uses.
  - 46.03 Describe the role of a router in a WAN.
  - 46.04 Identify internal components of the router and describe their functions.
  - 46.05 Describe the physical characteristics of the router.
  - 46.06 Identify common ports on a router.
  - 46.07 Properly connect FastEthernet, serial WAN, and console ports.
- 47.0 Describe and identify an operating system for a router. – The student will be able to:
- 47.01 Describe the purpose of the IOS.
  - 47.02 Describe the basic operation of the IOS.
  - 47.03 Identify various IOS features.
  - 47.04 Identify the methods to establish a CLI session with the router.
  - 47.05 Move between the user EXEC and privileged EXEC modes.
  - 47.06 Establish a HyperTerminal session on a router.
  - 47.07 Log into a router.
  - 47.08 Use the help feature in the command line interface.

- 47.09 Troubleshoot command errors.
  - 47.10 Name a router.
  - 47.11 Set passwords.
  - 47.12 Examine show commands.
  - 47.13 Configure a serial interface.
  - 47.14 Configure an Ethernet interface.
  - 47.15 Execute changes to a router.
  - 47.16 Save changes to a router.
  - 47.17 Configure an interface description.
  - 47.18 Configure a message-of-the-day banner.
  - 47.19 Configure host tables.
  - 47.20 Understand the importance of backups and documentation.
- 48.0 Explain how to establish connections between neighboring routers. – The student will be able to:
- 48.01 Enable and disable Protocols.
  - 48.02 Determine which neighboring devices are connected to which local interfaces.
  - 48.03 Gather network address information about neighboring devices using CDP.
  - 48.04 Establish, Verify, Disconnect, Suspend a Telnet connection.
  - 48.05 Perform alternative connectivity tests.
  - 48.06 Troubleshoot remote terminal connections.
- 49.0 Identify and explain the router boot sequence and file system. – The student will be able to:
- 49.01 Identify the stages of the router boot sequence.
  - 49.02 Determine how a router locates and loads its operating system.
  - 49.03 Use the boot system command.
  - 49.04 Identify the configuration register values.
  - 49.05 Briefly describe the files used by the Router IOS and their functions.
  - 49.06 List the locations on the router of the different file types.
  - 49.07 Briefly describe the parts of the IOS name.
  - 49.08 Save and restore configuration files using TFTP and copy-and paste.
  - 49.09 Load an IOS image using TFTP.
  - 49.10 Load an IOS image using XModem.
  - 49.11 Verify the file system using show commands.
- 50.0 Identify and explain static and dynamic routing protocols. – The student will be able to:
- 50.01 Explain the significance of static routing.
  - 50.02 Configure static and default routes.
  - 50.03 Verify and troubleshoot static and default routes.
  - 50.04 Identify the classes of routing protocols.
  - 50.05 Identify distance vector routing protocols.
  - 50.06 Identify link-state routing protocols.
  - 50.07 Describe the basic characteristics of common routing protocols.
  - 50.08 Identify interior gateway protocols.
  - 50.09 Identify exterior gateway protocols.
  - 50.10 Enable Routing Information Protocol (RIP) on a router.

- 51.0 Describe and configure distance vector protocols. – The student will be able to:
- 51.01 Describe how routing loops can occur in distance vector routing.
  - 51.02 Describe several methods used by distance vector routing protocols to ensure that routing information is accurate.
  - 51.03 Configure RIP.
  - 51.04 Use the ip classless command.
  - 51.05 Troubleshoot RIP.
  - 51.06 Configure RIP for load balancing.
  - 51.07 Configure static routes for RIP.
  - 51.08 Verify RIP.
  - 51.09 Configure IGRP.
  - 51.10 Verify IGRP operation.
  - 51.11 Troubleshoot IGRP.
- 52.0 Perform tasks related to protocol troubleshooting. – The student will be able to:
- 52.01 Describe ICMP.
  - 52.02 Describe the ICMP message format and error message types.
  - 52.03 Identify potential causes of specific ICMP error messages.
  - 52.04 Describe ICMP control messages.
  - 52.05 Identify a variety of ICMP control messages used in networks today.
  - 52.06 Determine the causes for ICMP control messages.
- 53.0 Examine and test networks. – The student will be able to:
- 53.01 Use the commands to gather detailed information about the routes installed on the router.
  - 53.02 Configure a default route or default network.
  - 53.03 Understand how a router uses both Layer 2 and Layer addressing to move data through the network.
  - 53.04 Use commands to the router at different OSI layers.
- 54.0 Define, explain and describe access lists. – The student will be able to:
- 54.01 Describe the differences between standard and extended ACLs.
  - 54.02 Explain the rules for placement of ACLs.
  - 54.03 Create and apply named ACLs.
  - 54.04 Describe the function of firewalls.
  - 54.05 Use ACLs to restrict virtual terminal access.
- 121.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 121.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 121.02 Locate, organize and reference written information from various sources. CM 3.0
  - 121.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 121.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0

- 121.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 121.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 121.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 122.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 122.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 122.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 122.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 122.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 123.0 Use information technology tools. – The student will be able to:
- 123.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 123.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 123.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 123.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 124.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 124.01 Describe the nature and types of business organizations. SY 1.0
- 124.02 Explain the effect of key organizational systems on performance and quality.
- 124.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 124.04 Explain the impact of the global economy on business organizations.
- 127.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 127.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 127.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 127.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 127.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 3, Infrastructure**  
**Course Number:**       **8207040**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes IT management skills, troubleshooting and diagnostic techniques; network design, devices, topographies, protocols and standards; e-mail and Internet activities, network traffic control and security, and WAN vs. LAN technologies.

- 55.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 55.01 Develop diplomatic methods to communicate with customers.
- 56.0 Participate in work-based learning experiences. – The student will be able to:
- 56.01 Participate in work-based learning experiences in a network support services environment.
- 56.02 Discuss the use of technology in a network support services environment.
- 57.0 Provide network support and assistance by troubleshooting and diagnosing through direct contact remote access. – The student will be able to:
- 57.01 Apply appropriate diagnostic techniques to solve network problems.
- 57.02 Perform local network support using various troubleshooting and diagnostic techniques.
- 57.03 Perform remote network support using various remote access methods.
- 58.0 Develop electronic communications skills. – The student will be able to:
- 58.01 Exhibit proficiency in using Internet services.
- 58.02 Exhibit proficiency in downloading and uploading Internet information.
- 58.03 Perform web-based research to solve specific network problems.
- 59.0 Perform logical and physical network design activities. – The student will be able to:
- 59.01 Describe the various LAN communication problems.
- 59.02 Describe the effects of LAN segmentation with bridges, routers, and switches.
- 59.03 Describe the operation, characteristics and benefits of VLANs.
- 59.04 Explain and identify LAN design goals, issues, and methodology.
- 59.05 Demonstrate the ability to analyze equipment necessary to meet specific design requirement.
- 59.06 Demonstrate the ability to create physical and logical network implementation documentation.

- 60.0 Demonstrate proficiency in selecting appropriate various routing protocols and IP routing configuration for various network designs. – The student will be able to:
- 60.01 Describe the two parts of network addressing, and then identify the parts in specific protocol address examples.
  - 60.02 Create the different classes of IP addresses [and sub netting].
  - 60.03 Configure IP addresses.
  - 60.04 Verify IP addresses.
  - 60.05 Identify the functions of the TCP/IP transport-layer protocols.
  - 60.06 Identify the functions of the TCP/IP network-layer protocols.
  - 60.07 Identify the functions performed by ICMP.
  - 60.08 Configure IPX access lists and SAP filters to control traffic.
  - 60.09 Explain the services of separate and integrated multi-protocol routing.
  - 60.10 List problems that each routing type encounters when dealing with topology changes and describe techniques to reduce the number of these problems.
- 61.0 Demonstrate proficiency in using network traffic filtering to improve network performance and provide basic levels of security. – The student will be able to:
- 61.01 Define and describe the purpose and operation of network traffic filtering.
  - 61.02 Demonstrate proficiency in using configuration and interface commands to perform and monitor network traffic filtering.
- 62.0 Perform network management activities related to documentation, security, performance, administration, troubleshooting and coping with environmental factors -  
The student will be able to:
- 62.01 Perform documentation activities for networks, such as logs, journals, diagrams, labeling schemes, layouts, software listings, user policy, security policy.
  - 62.02 Plan network security measures by establishing security policies and procedures, including user policies, authentication procedures, back-up and data recovery procedures, and redundancy techniques.
  - 62.03 Demonstrate proficiency in using network monitoring software.
  - 62.04 Explain the procedures necessary to monitor, create benchmarks, and plan for improvement of network performance.
  - 62.05 Explain the administrative side of network management, including physical and logical boundaries, costs, error report documentation and the management of human resources.
- 63.0 Identify and describe various WAN functions, devices, and demonstrate understanding of the WAN design process. – The student will be able to:
- 63.01 Describe the functions of private addressing and be able to explain the major features of and configure NAT, PAT, and DHCP.
  - 63.02 Describe the major features of WAN technology, including, devices, standards, encapsulation, link options, and packet and circuit switching.
  - 63.03 Perform WAN design activities that require using the necessary steps in WAN design, the three-layered design model, and various other design models.

- 64.0 Describe the operation and implementation of virtual private networks. – The student will be able to:
- 64.01 Describe the virtual private network operation.
  - 64.02 Describe the virtual private network implementation.
  - 64.03 Demonstrate an understanding of tunneling.
  - 64.04 Describe the end-to-end virtual dialup process.
- 125.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 125.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 125.02 Explain emergency procedures to follow in response to workplace accidents.
  - 125.03 Create a disaster and/or emergency response plan. SHE 2.0
- 126.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 126.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 126.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 126.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 126.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 128.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 128.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 128.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 128.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 128.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 128.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 128.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 128.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 128.08 Research the benefits of ongoing professional development. ECD 9.0
  - 128.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 129.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 129.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 129.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 129.03 Develop a personal budget and financial goals. FL 3.1
  - 129.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 129.05 Maintain financial records. FL 3.3
  - 129.06 Read and reconcile financial statements. FL 3.4
  - 129.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 4, Infrastructure**  
**Course Number:**       **8207050**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The - student will learn to install, configure, and maintain large networks. Student will also be able to demonstrate proficiency in defining, configuring and trouble-shooting the following protocols: IP, IGRP, IPX, Async Routing, AppleTalk, Extended Access Lists, IP RIP, Route Redistribution, RIP, Route Summarization, OSPF, VLSM, BGP, Serial, Frame Relay, ISDN, ISL, X.25, DDR, PSTN, PPP, VLANs, Ethernet, Access Lists, 802.10, FDDI, Transparent and Translational Bridging installation.

- 65.0 Participate in work-based learning experiences. – The student will be able to:
- 65.01 Participate in work-based learning experiences in a network support services environment.
  - 65.02 Discuss the use of technology in a network support services environment.
- 66.0 Compare and contrast hierarchical network design models and scalable internetworks – The student will be able to:
- 66.01 Show proficiency in the use of the three-layer hierarchical design model.
  - 66.02 Describe router functions in the core layer, distribution layer, and access layer.
  - 66.03 Describe key characteristics of making the network reliable, available, responsive, efficient, adaptable, accessible, scalable and secure.
  - 66.04 Compare and contrast Equal-Cost load balancing with RIP and Unequal-Cost load balancing with IGRP.
- 67.0 Discuss advanced IP addressing management. – The student will be able to:
- 67.01 Describe and explain IPv4 addressing, Internet's address architecture, classes of IP addresses, and perform subnet masking.
  - 67.02 Understand and explain Classless Interdomain Routing (CIDR), route aggregation, supernetting and address allocation.
  - 67.03 Discuss and explain Variable-Length Subnet Masks along with classless and classful routing protocols.
  - 67.04 Compare and contrast route summarization and route flapping.
  - 67.05 Describe and discuss Network Address Translation (NAT), private addressing with NAT, private IP addresses (RFC 1918) and discontinuous subnets.
  - 67.06 Use IP unnumbered and DHCP operations
  - 67.07 Configure IOS DHCP server, Easy IP and IP helper addresses
  - 67.08 Discuss IP addressing crisis and solutions with IPv6 address formats.
  - 67.09 Configure IP unnumbered in a lab setting.
- 68.0 Demonstrate proficiency in basic router configuration – The student will be able to:

- 68.01 Build 'Start.TXT', capture hyperterminal and telnet sessions, create access control list and extended pings, and configure VLSM using routing fundamentals.
  - 68.02 Configure static routing and dynamic routing using distance-vector routing protocols, link-state routing protocols, and hybrid routing.
  - 68.03 Configure static default routes and default routing with IGRP using default route caveats and floating static routes
  - 68.04 Describe and explain convergence issues and route calculation fundamentals.
  - 68.05 Start routing process using various configurations, initiate routing updates and routing metrics.
  - 68.06 Show proficiency in migrating from RIP to EIGRP.
  - 68.07 Configuring default routing with RIP and IGRP, configuring floating static routes.
- 69.0 Demonstrate proficiency in the use of OSPF. – The student will be able to:
- 69.01 Discuss issues addressed by the use OSPF, list and define OSPF terminology, list OSPF states and OSPF network types, describe OSPF Hello protocol and Steps of OSPF operation.
  - 69.02 Establish router adjacencies, elect a DR and a BDR, and discover routes.
  - 69.03 Select appropriate routes and maintain routing information, configuring OSPF on routers within a single area.
  - 69.04 Use optional configuration commands and configure OSPF over NBMA in a lab setting.
  - 69.05 Describe Full-Mesh Frame Relay, Partial-Mesh Frame Relay, Point-to-Multipoint OSPF.
- 70.0 Understand and discuss multi-area OSPF operation and configuration. – The student will be able to:
- 70.01 Configure OSPF, examining the DR/BDR election process
  - 70.02 Configure Point-to-Multipoint OSPF over frame relay, create multiple OSPF areas, use OSPF router types, and incorporate OSPF LSA and area types.
  - 70.03 Configuring OSPF operation across multiple areas and flooding LSUs to multiple areas, updating the routing table
  - 70.04 Configure Multi-area OSPF, using and configuring OSPF multi-area components, and configuring OSPF route summarization.
  - 70.05 Verify OSPF operation, show commands, clear and debug commands.
- 71.0 Demonstrate the use of stub and totally stubby areas. – The student will be able to:
- 71.01 Use stub and totally stubby areas.
  - 71.02 Set up stub and totally stub area criteria.
  - 71.03 Configure stub and totally stubby areas.
  - 71.04 Set up a OSPF stub area configuration example.
  - 71.05 Set up a OSPF totally stubby configuration example.
  - 71.06 Monitor multi-area OSPF, verifying multi-area OSPF operation
  - 71.07 Create a multi-area OSPF.
- 72.0 Configure and define virtual links. – The student will be able to:
- 72.01 Meet the backbone area requirements.

- 72.02 Configure virtual links.
  - 72.03 Set up a virtual link configuration example.
  - 72.04 Show not-so-stubby areas.
  - 72.05 Demonstrate how NSSA operates.
  - 72.06 Configure a stub area and a totally stubby area.
  - 72.07 Configure an NSSA and configure virtual links.
- 73.0 Demonstrate proficiency in the use of EIGRP. – The student will be able to:
- 73.01 Define and explain EIGRP fundamentals, features, components, operations.
  - 73.02 Configure and monitor EIGRP in lab exercise.
- 74.0 Demonstrate proficiency in route optimization. – The student will be able to:
- 74.01 Show how to control routing updates, policy routing, and route redistribution.
  - 74.02 Create a route optimization configuration in lab setting.
- 75.0 Demonstrate proficiency in the use of BGP. – The student will be able to:
- 75.01 Define and explain autonomous systems and basic BGP operations.
  - 75.02 Configure and monitor BGP operations and routing process.
  - 75.03 Define and explain BGP attributes and the BGP decision process.
  - 75.04 Create BGP configuration in lab setting.
  - 75.05 Develop a scaling BGP and route reflectors.
  - 75.06 Set up BGP route filtering and policy routing.
  - 75.07 Explain the community attribute and peer groups.
  - 75.08 Explain redundancy, symmetry, and load balancing.
  - 75.09 Define and explain BGP redistribution.
  - 75.10 Perform scaling BGP lab exercises and configure BGP in a lab setting.
- 76.0 Define and show proficiency in security. – The student will be able to:
- 76.01 Show proficiency in securing router access using access lists.
  - 76.02 Show proficiency in using dynamic access lists using lock-and-key.
  - 76.03 Show proficiency in session filtering.
  - 76.04 Define and explain context-based access control.
  - 76.05 Use an alternative to access lists.
  - 76.06 Configure router security in a lab setting.
- 77.0 Using lab equipment, demonstrate the setup, configuration, connectivity of routers to create a small WAN. – The student will be able to:
- 77.01 Demonstrate the use of remote access.
  - 77.02 Select appropriate WAN technologies for different scenarios.
  - 77.03 Select remote access solutions for different technologies.
  - 77.04 Assemble and Cable WAN components.
- 78.0 Show the process of using modems and asynchronous dialup connections. – The student will be able to:
- 78.01 List, describe and verify modem functions.

- 78.02 Configure asynchronous interfaces and terminal lines.
  - 78.03 Demonstrate proficiency in the creation of modem configurations.
  - 78.04 Configuring a Windows PC dialup connection.
  - 78.05 Use dialup connection configurations.
- 79.0 Configure and verify PPP configurations. – The student will be able to:
- 79.01 Demonstrate the use of PPP authentication, PPP callback, PPP compression, and PPP multilink.
  - 79.02 Create and verifying PPP configurations.
- 80.0 Configure and monitor ISDN and DDR. – The student will be able to:
- 80.01 Explain and discuss ISDN architecture and ISDN protocol layers.
  - 80.02 Configure ISDN BRI Dial-on-Demand, static routing and default routing, and ISDN PRI.
  - 80.03 Create optional configurations.
  - 80.04 Monitor the ISDN interface.
  - 80.05 Create ISDN configurations.
- 81.0 Configure dialer profiles. – The student will be able to:
- 81.01 Demonstrate the use of Legacy DDR.
  - 81.02 Create and use various dialer profiles.
  - 81.03 Verify and monitor dialer profiles configurations.
- 82.0 Create and trouble-shoot X.25 configurations. – The student will be able to:
- 82.01 Show proficiency in the use of X.25 concepts.
  - 82.02 Configure and Trouble-shoot X.25.
- 83.0 Configure and trouble-shoot frame relay. – The student will be able to:
- 83.01 Show proficiency using frame relay concepts.
  - 83.02 Configure frame relay.
  - 83.03 Create various frame relay topologies and configurations.
  - 83.04 Demonstrate proficiency managing frame relay traffic.
  - 83.05 Show the process of frame relay traffic shaping.
  - 83.06 Create on demand routing using frame relay.
  - 83.07 Trouble-shoot frame relay traffic configurations.
- 84.0 Demonstrate the use of WAN backup and dial backup. – The student will be able to:
- 84.01 Demonstrate dial backup.
  - 84.02 Demonstrate backup interface operations.
  - 84.03 Demonstrate routing with the load backup feature.
  - 84.04 Verifying dial backup configurations in a lab setting.
  - 84.05 Create various WAN backup configurations in a lab setting.
- 85.0 Demonstrate the use of queuing and compression techniques. – The student will be able to:

- 85.01 Demonstrate proficiency using various queuing options.
- 85.02 Demonstrate proficiency optimizing traffic flow with data compression.
- 86.0 Demonstrate the use of scaling IP addresses with NAT. – The student will be able to:
  - 86.01 Define and explain NAT concepts and terminology.
  - 86.02 Demonstrate proficiency in configuring, creating and verifying NAT configurations in lab setting.
- 87.0 Demonstrate proficiency using AAA to scale access control. – The student will be able to:
  - 87.01 List and define AAA concepts and terminology.
  - 87.02 Demonstrate proficiency configuring AAA.
  - 87.03 Perform lab exercises using access control configurations.
- 88.0 Discuss and explain emerging remote-access technologies. – The student will be able to:
  - 88.01 List and define features and capabilities of cable, modems, wireless, network access, multichannel multipoint distribution services, local multipoint distribution services, wireless local area networking, very-high-data-rate digital subscriber line (VDSL).
- 89.0 Demonstrate proficiency configuring a 700 series router. – The student will be able to:
  - 89.01 Use a series router.
  - 89.02 Configure the 700 Series router in a lab setting.
  - 89.03 Use various IOS configurations in a lab setting.
- 90.0 Understand and describe key characteristics of various switching technologies, LAN switching and the hierarchical model of network design, and the building-block approach. – The student will be able to:
  - 90.01 Discuss the requirements of the evolving campus structure and the issues with traditional network designs.
  - 90.02 Describe the fundamental campus elements and contributing variables to campus networks.
  - 90.03 Compare and contrast the traditional 80/20 rule of network traffic and the new 20/80 rule of network traffic.
  - 90.04 Discuss switching and the OSI model, layer 2, 3, and 4 switching, and multiplayer switching.
  - 90.05 Discuss the core layer, the distribution layer, and the access layer in relation to switching.
  - 90.06 List and describe the advantages and disadvantages of the building-block approach, scaling the switch block, building the core block and layer 2 and 3 backbone scaling.
- 91.0 Understand and describe campus networks, design models, and switching technologies - The student will be able to:

- 91.01 List and explain key characteristics of various switching technologies.
  - 91.02 Discuss LAN switching and the hierarchical model of network design.
  - 91.03 Show proficiency using the building-block approach to networking.
- 92.0 List and describe various types of LAN media. – The student will be able to:
- 92.01 Show proficiency using modem functions and maintaining modem auto-configurations.
  - 92.02 Create configurations for asynchronous connections.
  - 92.03 Create various modem configurations.
- 93.0 Show proficiency configuring a switch. – The student will be able to:
- 93.01 Demonstrate the process for initial connectivity to a switch.
  - 93.02 Show proficiency creating the basic configuration of a switch.
  - 93.03 List and explain important IOS features.
- 94.0 Demonstrate proficiency configuring VLANs. – The student will be able to:
- 94.01 Understand and explain VLANs.
  - 94.02 Discuss VLAN basics and VLAN types.
  - 94.03 Configure a VLAN in a lab setting.
  - 94.04 Show use of VLAN identification techniques and VLAN trunking protocol.
  - 94.05 Create VTP configuration and use VTP pruning.
- 95.0 Understand and explain spanning tree protocol (STP) and redundant links. – The student will be able to:
- 95.01 Discuss Basic STP Operations and STP Processes.
  - 95.02 Compare and contrast VLANs and STP.
  - 95.03 Show how STP is used in the Campus Network.
  - 95.04 Demonstrate the resolution of Redundant Links
- 96.0 Demonstrate proficiency routing between VLANs. – The student will be able to:
- 96.01 Understand and discuss VLAN issues.
  - 96.02 Route switch modules.
  - 96.03 Show proficiency using external routers in a lab setting.
- 97.0 Demonstrate proficiency with multilayer switching. – The student will be able to:
- 97.01 Define and explain MLS Processes.
  - 97.02 Create basic MLS configurations.
  - 97.03 Show proficiency using flow masks.
  - 97.04 Show how to use MLS on the switch.
- 98.0 Demonstrate the use of hot standby routing protocol (HSRP). – The student will be able to:
- 98.01 Define and explain HSRP operations.

- 98.02 Create HSRP configurations in a lab setting.
- 99.0 Understand and use IGMP and multicasting. – The student will be able to:
- 99.01 Define and explain multicasting.
  - 99.02 Understand and discuss IGMP.
  - 99.03 Show proficiency routing multicast traffic.
  - 99.04 Demonstrate proficiency using multicast routing protocols.
  - 99.05 Configure IP multicast routing in a lab setting.
  - 99.06 List and describe optional IP multicast routing tasks.
- 100.0 Demonstrate proficiency restricting network access. – The student will be able to:
- 100.01 Show proficiency creating networking policies.
  - 100.02 Discuss and explain basic network security techniques.
  - 100.03 Demonstrate execution of policy configurations on a set of routers.
- 101.0 Demonstrate proficiency using network troubleshooting tools and basic network management diagnostic tools. – The student will be able to:
- 101.01 Explain and discuss troubleshooting methodologies and general problem-solving concepts.
  - 101.02 List and define general considerations in troubleshooting.
  - 101.03 Define and explain each component of the general problem-solving model.
  - 101.04 Demonstrate proficiency using common management and diagnostic tools.
  - 101.05 Show proficiency using network management software.
  - 101.06 Demonstrate proficiency using router diagnostic commands.
  - 101.07 Familiarize logging and error message formats.
  - 101.08 Demonstrate proficiency interacting with technical support.
- 102.0 List and define the commonly used protocols, routing techniques, and switching processes. – The student will be able to:
- 102.01 List and define network services, layer 2 LAN protocols, and layer 2 WAN protocols.
  - 102.02 Race packets through a router.
  - 102.03 Define and explain packet switching paths.
  - 102.04 Identify performance issues affecting packet switching.
  - 102.05 Define and explain low-level troubleshooting.
- 103.0 Demonstrate proficiency troubleshooting TCP/IP, LAN switch environment, VLANs, frame relay, and ISDN. – The student will be able to:
- 103.01 List, define, and explain theory, concepts, and terminology of TCP/IP, LAN switch environment, spanning tree, VLANs, frame relay, and ISDN.
  - 103.02 List, define, and explain common problems with TCP/IP, LAN switching, and ISDN.
  - 103.03 List, define, and explain common scenarios with VLANs, frame relay, and ISDN.
  - 103.04 Troubleshoot TCP/IP in a Windows environment; use LAN switch troubleshooting tools, explain general VLAN troubleshooting issues; list and explain the steps in frame relay troubleshooting and ISDN problem isolation.

- 103.05 Use show commands to verify LAN switch configuration settings.
- 103.06 Use show and debug commands for TCP/IP, router VLANs, frame relay, and ISDN.
- 103.07 Use TCP/IP diagnostic tools.
  
- 104.0 Demonstrate proficiency configuring and trouble-shooting IPX and APPLE TALK. – The student will be able to:
  - 104.01 List, define, and explain theory, concepts, and terminology of IPX and AppleTalk.
  - 104.02 Demonstrate proficiency configuring IPX and AppleTalk.
  - 104.03 Demonstrate proficiency trouble shooting IPX and Apple Talk.
  - 104.04 Demonstrate proficiency using show and debug command with IPX and AppleTalk.
  
- 105.0 Demonstrate proficiency troubleshooting EIGRP, OSPF, and BGP. – The student will be able to:
  - 105.01 List, define, and explain theory, concepts, and terminology of EIGRP, OSPF, and BGP.
  - 105.02 Demonstrate proficiency configuring AAA, EIGRP, OSPF, and BGP.
  - 105.03 Demonstrate proficiency trouble shooting EIGRP, OSPF, and BGP.
  - 105.04 Demonstrate proficiency using the show and debug commands for OSPF and BGP.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 5**  
**Course Number:**       **8207060**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes wireless networking technologies, implementation, management and security.

106.0 Participate in work-based learning experiences. – The student will be able to:

106.01 Participate in work-based learning experiences in a network support services environment.

106.02 Discuss the use of technology in a network support services environment.

106.03 Discuss the management/supervisory skills needed in a network support service environment.

107.0 Demonstrate proficiency in applying radio frequency (RF) technologies. – The student will be able to:

107.01 Define and apply the basic concepts of RF behavior.

107.02 Understand the applications of basic RF antenna concepts.

107.03 Understand and apply the basic components of RF

107.04 Identify some of the different uses for spread spectrum technologies.

107.05 Comprehend the differences between, and apply the different types of spread spectrum technologies.

107.06 Identify and apply the concepts which make up the functionality of spread spectrum technology.

107.07 Identify the laws set forth by the FCC that govern spread spectrum technology, including power outputs, frequencies, bandwidths, hop times, and dwell times.

108.0 Develop an awareness of wireless LAN technologies. – The student will be able to:

108.01 Identify and apply the processes involved in authentication and association.

108.02 Recognize the concepts associated with wireless LAN service sets.

108.03 Understand the implications of the following power management features of wireless LANs.

108.04 Specify the modes of operation involved in the movement of data traffic across wireless LANs.

109.0 Perform implementation and management activities. – The student will be able to:

109.01 Identify the technology roles for which wireless LAN technology is an appropriate technology application.

109.02 Identify the purpose of infrastructure devices and explain how to install, configure, and manage them.

- 109.03 Identify the purpose of wireless LAN client devices and explain how to install, configure, and manage them.
  - 109.04 Identify the purpose of wireless LAN gateway devices and explain how to install, configure, and manage them.
  - 109.05 Identify the basic attributes, purpose, and function of types of antennas.
  - 109.06 Describe the proper locations and methods for installing antennas.
  - 109.07 Explain the concepts of polarization, gain, beamwidth, and free-space path loss as they apply to implementing solutions that require antennas.
  - 109.08 Identify the use of wireless LAN accessories and explain how to install, configure, and manage them.
  - 109.09 Identify, understand, correct or compensate for wireless LAN implementation challenges.
  - 109.10 Explain how antenna diversity compensates for multipath.
  - 109.11 Identify and understand the importance and process of conducting a thorough site survey.
  - 109.12 Identify and understand the importance of the necessary tasks involved in preparing to do an RF site survey.
  - 109.13 Identify the necessary equipment involved in performing a site survey.
  - 109.14 Understand the necessary procedures involved in performing a site survey.
  - 109.15 Identify and understand site survey reporting procedures.
- 110.0 Develop an awareness of wireless security systems. – The student will be able to:
- 110.01 Identify the strengths, weaknesses and appropriate uses of wireless LAN security techniques.
  - 110.02 Describe types of wireless LAN security attacks, and explain how to identify and prevent them.
  - 110.03 Given a wireless LAN scenario, identify the appropriate security solution from the following available wireless LAN security solutions.
  - 110.04 Explain the uses of corporate security policies and how they are used to secure a wireless LAN.
  - 110.05 Identify how and security precautions are used to secure a wireless LAN.
- 111.0 Demonstrate knowledge of wireless industry standards. – The student will be able to:
- 111.01 Identify, apply and comprehend the differences between wireless LAN standards.
  - 111.02 Understand the roles of organizations in providing direction and accountability within the wireless LAN industry.
  - 111.03 Identify the differences between the ISM and UNII bands.
  - 111.04 Identify and understand the differences between the power output rules for point-to-point and point-to-multipoint links.
  - 111.05 Identify the basic characteristics of infrared wireless LANs.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Networking 6**  
**Course Number:**       **8207070**  
**Course Credit:**         **1**

**Course Description:**

This course continues the study of network support services. The content includes network security.

112.0 Participate in work-based learning experiences. – The student will be able to:

112.01 Participate in work-based learning experiences in a network support services environment.

112.02 Discuss the use of technology in a network support services environment.

112.03 Discuss the management/supervisors skills needed in a network support services environment.

113.0 Demonstrate a knowledge of general security concepts. – The student will be able to:

113.01 Describe access control.

113.02 Describe network authentication.

113.03 Understand the various types of network attacks (backdoors, DOS, spoofing, etc.)

113.04 Identify and modify non-essential services and protocols.

113.05 Identify malicious code (virus, worm, Trojan).

113.06 Configure system auditing, logging, and scanning as it relates to security procedures.

114.0 Develop an awareness of communication security concepts. – The student will be able to:

114.01 Describe remote access protocols (VPN, RADIUS, L2TP, etc.).

114.02 Identify E-mail security concerns (hoaxes, spam, etc.).

114.03 Identify web (HTML) security concepts and designs (HTTP/S, IM, etc.).

114.04 Demonstrate an awareness of file transfer security concerns.

114.05 Describe and identify wireless networking security concerns and vulnerabilities.

115.0 Develop an awareness of network infrastructure security. – The student will be able to:

115.01 Install and configure network firewalls.

115.02 Identify security concerns with various wiring media (copper, fiber).

115.03 Identify security concerns associated with removable media and storage devices.

115.04 Demonstrate an awareness of security topologies (security zones, Intranets, NAT, etc.).

115.05 Configure and use intrusion detection software.

115.06 Establish security baselines (updates, patches, hot fixes, Access Control lists, etc.).

115.07 Demonstrate the ability to configure a Virtual Private Network (VPN).

115.08 Describe the function of Network Address Translation (NAT).

116.0 Develop an awareness of cryptography and its relation to security. – The student will be able to:

116.01 Demonstrate an understanding of security algorithms and encryption.

116.02 Use and apply Public Key Certificates.

116.03 Demonstrate an understanding of standards and protocols in commerce.

117.0 Incorporate organizational and operational security in an appropriate and effective manner. – The student will be able to:

117.01 Describe how to establish a network security policy.

117.02 Explain the importance of physical security to protect network resources.

117.03 Identify and use disaster recovery procedures.

117.04 Describe the importance of business continuity and its relationship to network and corporate security.

117.05 Describe security policies and procedures that would be used in a business environment.

117.06 Explain the importance of privilege management (access, password management, sign-on, etc.).

117.07 Describe the concept of forensics as it applies to network security (obtaining evidence of security breaches).

117.08 Explain the importance of educating users and supervisors in regard to network security.

117.09 Create documentation that describes standards and guidelines for a network security system.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Game/Simulation/Animation Visual Design  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8208100	B082100
CIP Number	0550041114	0550041114
Grade Level	9-12, 30, 31	30, 31
Standard Length	4 credits	600 hours
Teacher Certification	BUS ED 1 @2 COMPU SCI 6 COMM ART @7 G TV PRO TEC @7 G	BUS ED 1 @2 COMPU SCI 6 COMM ART @7 G TV PRO TEC @7 G
CTSO	FBLA BPA	Phi Beta Lambda BPA
SOC Codes (all applicable)	15-1099.13; 27-1014	15-1099.13; 27-1014
Facility Code	212 <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)

Statewide Articulation	<a href="http://www.fldoe.org/workforce/dwdframe/artic_frame.asp">http://www.fldoe.org/workforce/dwdframe/artic_frame.asp</a>	
Basic Skills Level	N/A	Mathematics: 10 Language: 10 Reading: 10

### **Purpose**

This program offers a sequence of project-based courses that provide coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Information Technology career cluster such as Game or Simulation Designer, Game or Simulation Graphic Artist, and Game or Simulation 3-D Animator; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and

occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to practical experiences in game/simulation conceptualization, design, storyboarding, development methodologies, 2D/3D animation design and production, and implementation issues. Specialized skills involving graphic animation software are used to produce a variety of two and three dimensional components.

### Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. Students enrolling in this program must be computer literate. This literacy can be achieved by completing one credit of the Business Technology Education core. This includes Computing for College & Careers (8209020) or Introduction to Information Technology (8207310). It is also recommended that students complete academic courses in visual arts, computer arts, or digital arts. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	DIG0070	Game/Simulation Designer	300	15-1099.13
B	DIG0071	Game/Simulation Graphic Artist	150	27-1014
C	DIG0072	Game/Simulation 3D Animator	150	27-1014

\* Note: OTA0040 is a highly recommended core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8208110	Game & Simulation Foundations	1 credit	15-	2
	8208120	Game & Simulation Design	1 credit	1099.13	2
B	8208130	Game & Simulation 2D Graphic Development	1 credit	27-1014	2
C	8208140	Game & Simulation 3D Graphic Animation	1 credit	27-1014	2

\* Note: It is highly recommended that students complete the BTE Core, either Computing for College and Careers (8209020) or Introduction to Information Technology (8207310), prior to or concurrently with the first two courses.

## Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Game & Simulation Foundations	12/36 33%	3/41 7%	#	3/53 5%	13/52 25%	3/56 5%	17/52 31%	14/58 24%	3/35 9%	14/42 33%	21/56 38%	24/53 45%
Game & Simulation Design	2/36 6%	#	5/45 11%	2/53 4%	8/52 15%	2/56 4%	9/52 16%	6/58 10%	1/35 3%	3/42 7%	14/56 25%	15/53 28%
Game & Simulation 2D Graphic Development	**	**	**	**	**	**	**	**	**	**	**	**
Game & Simulation 3D Graphic Development	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

## **Program Recommendations**

The Game, Simulation & Animation Visual Design program lends itself to integration of the core academic subjects of language arts, math, science, visual arts, and social studies into project activities. It is through a balanced and integrated curriculum that students attain the attitudes, skills, and knowledge needed to compete successfully in today's work force. To achieve total curriculum integration, academic and career and technical education teachers should be scheduled with common planning times.

This program emphasizes the development of technical abilities as well as ethical and societal awareness necessary to function in a highly technological society. The use of cooperative learning groups is recommended. By learning and practicing group process skills, students will be prepared to work "together" in real work situations. Program graduates will develop enhanced self-esteem as well as the problem solving and teamwork skills necessary to succeed in careers and postsecondary education.

The Game, Simulation & Animation Visual Design program places a strong emphasis on workplace learning. Job shadowing and mentoring experiences with game and simulation professionals along with on-site trips to local businesses connect classroom learning to the workplace. In-class guest speakers bring the real world into the classroom.

The Foundations and Design courses should be taken in sequence prior to the 2D Graphic Development and 3D Graphic Animation courses. The 2D Graphic Development and 3D Graphic Animation courses may be taken concurrently. The BTE core course may be taken concurrently with either the Foundations course or the Design course.

The Game/Simulation/Animation Advanced Applications program (8208400) is an appropriate follow-on capstone program.

## **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

## **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10.0, Language 10.0, and Reading 10.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need

modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game.
- 02.0 Design and create a playable game.
- 03.0 Categorize the different gaming genres.
- 04.0 Categorize different gaming systems.
- 05.0 Understand the historical significance of electronic and non-electronic games.
- 06.0 Describe the trends in current and next-generation game development.
- 07.0 Understand the role of play in human culture.
- 08.0 Understand the psychological impact of games on individuals and groups.

- 09.0 Understand the business model commonly used in the game development industry.
- 10.0 Examine and categorize the significant processes in the production of interactive games.
- 11.0 Understand the core tasks and challenges that face a video game design team.
- 12.0 Understand legal issues that affect games, developers and players.
- 13.0 Describe the impact of the video game industry on the economy.
- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace.
- 16.0 Investigate career opportunities in the game industry.
- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow, and game design.
- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game.
- 20.0 Understand the general procedure and requirements of game design.
- 21.0 Explore the methods used to create and sustain player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMax, and different gaming engines.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices.
- 24.0 Create a working game or simulation individually or as part of a team.
- 25.0 Describe the game development life cycle.
- 26.0 Identify hardware constraints on video games including processors and I/O devices.
- 27.0 Identify non-hardware development constraints.
- 28.0 Understand the general principles of storytelling.
- 29.0 Understand the use of storyboarding in game design.
- 30.0 Develop a game design document or blueprint.
- 31.0 Understand strategic outlining in game designs.
- 32.0 Explore elements of puzzle design.
- 33.0 Discuss key strategic considerations in game design.
- 34.0 Understand the process of creating and designing player actions.
- 35.0 Create and design the game flow as it relates to story and plot.
- 36.0 Assess common principles and procedures in game flow design.
- 37.0 Describe rule creation elements of player challenge.
- 38.0 Identify tools and software commonly used in game development.
- 39.0 Understand the methodologies for integrating digital media into a game or simulation.
- 40.0 Identify commonly used art and animation production tools in the game design industry.
- 41.0 Understand the general concepts of environmental design.
- 42.0 Describe how environmental design is used in conjunction with game level design.
- 43.0 Define the meaning of simulation and pertinent issues facing game designers.
- 44.0 Describe applied event modeling as it relates to game design.
- 45.0 Understand basic HCI principles.
- 46.0 Discuss the eight golden rules of HCI.
- 47.0 Understand the use of inventory systems in game design.
  
- 48.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 2D game graphics.
- 49.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets.
- 50.0 Understand the various job titles and responsibilities of a 2D artist as it relates to the game industry.

- 51.0 Develop the art direction for a 2D game.
- 52.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials.
- 53.0 Understand the fundamentals of drawing and painting techniques.
- 54.0 Demonstrate a working knowledge of vector and paint programs used to make 2D graphics and animation.
- 55.0 2D world building, making graphics and backgrounds for 2D side scrolling, top down, and Isometric projection.
- 56.0 Understand the principles of Sprite animation as it relates to 2D game graphics (walk, run, Jump, idle...etc.).
- 57.0 Facial animation, expressions, and audio lip syncing.
- 58.0 Create graphics for the user interface including titles and button states.
- 59.0 Particle system design and other in-game effects such as lighting and shadows.
- 60.0 Demonstrate the effective use of 2D hardware such as scanners and digital tablets.
- 61.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 3D game graphics.
- 62.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets.
- 63.0 Understand the various job titles and responsibilities of a 3D artist as it relates to the game industry.
- 64.0 Develop the art direction for a 3D game.
- 65.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials.
- 66.0 Understand the fundamentals of drawing and painting techniques.
- 67.0 Demonstrate a working knowledge of modeling and paint programs used to make 3D graphics and animation.
- 68.0 3D world building, making graphics and backgrounds for 3D side scrolling, top down, and Isometric projection.
- 69.0 Understand the principles of Sprite animation as it relates to 3D game graphics (walk, run, Jump, idle...etc.).
- 70.0 Facial animation, expressions, and audio lip syncing.
- 71.0 Create graphics for the user interface including titles and button states.
- 72.0 Particle system design and other in-game effects such as lighting and shadows.
- 73.0 Demonstrate the effective use of 3D hardware such as scanners and digital tablets.
- 74.0 Demonstrate language arts knowledge and skills.
- 75.0 Demonstrate mathematics knowledge and skills.
- 76.0 Demonstrate science knowledge and skills.
- 77.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 78.0 Solve problems using critical thinking skills, creativity and innovation.
- 79.0 Use information technology tools.
- 80.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 81.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 82.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 83.0 Describe the importance of professional ethics and legal responsibilities.
- 84.0 Explain the importance of employability skill and entrepreneurship skills.
- 85.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Game, Simulation, Animation Programming  
**PSAV Number:** B082100

**Course Number:** DIG0070  
**Occupational Completion Point – A**  
**Game/Simulation Designer – 300 Hours – SOC Code 15-1099.13**

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:

01.01 Use industry standard game design production documents to create a game design production plan.

02.0 Design and create a playable game. – The student will be able to:

02.01 Use a number of computer tools to enhance and ease game programming and artistry.

02.02 Use a game engine to create a playable game.

02.03 Use animated objects.

02.04 Program sound and music to enhance the game experience.

02.05 Test and debug the completed game.

**Critical Game & Simulation Studies**

03.0 Categorize the different gaming genres. – The student will be able to:

03.01 Research, compare and categorize the different gaming genres.

03.02 Analyze examples of different gaming genres.

03.03 Define and use the necessary vocabulary related to gaming and the different genres.

04.0 Categorize different gaming systems. – The student will be able to:

04.01 Research, compare and categorize different gaming systems.

04.02 Analyze the distinctive features of each system.

04.03 Define the target audience for different systems based on features, available games, and price of system and games.

04.04 Define and use the necessary vocabulary related to gaming hardware.

- 05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:
- 05.01 Discuss the history of non-electronic games.
  - 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
  - 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.
- 06.0 Describe the trends in current and next-generation game development. – The student will be able to:
- 06.01 Determine and analyze the significant trends in game development in the past two decades.
  - 06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

- 07.0 Understand the role of play in human culture. – The student will be able to:
- 07.01 Discuss the word “play” and its many definitions.
  - 07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.
  - 07.03 Describe the history of play and its importance in developing societies and cultures.
  - 07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.
  - 07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.
- 08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:
- 08.01 Investigate studies that discuss the impact of violent games on children and adults.
  - 08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.
  - 08.03 Research and discuss differing opinions on video game addiction and what would define addiction.
  - 08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

- 09.0 Understand the business model commonly used in the game development industry. – The student will be able to:
- 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
  - 09.02 Identify and describe licensing management for different gaming platforms.

- 09.03 Discuss the product value and business differences between major game platforms.
- 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.
- 10.0 Examine and categorize the significant processes in the production of interactive games.  
– The student will be able to:
  - 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
  - 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
  - 10.03 Explore and describe the effects of globalization on the design and production of video games.
- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:
  - 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
  - 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
  - 11.03 Explore and discuss methods of communications and scheduling for design teams.
  - 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.
- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:
  - 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
  - 12.02 Describe legal and liability issues that could affect online communities.
  - 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.
- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:
  - 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
  - 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
  - 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
  - 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

## **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:
- 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
  - 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:
- 15.01 Solicit and accept constructive criticism.
  - 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
  - 15.03 Collaborate with individuals and teams to complete tasks and solve problems.
- 16.0 Investigate career opportunities in the game industry. – The student will be able to:
- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  - 16.03 Describe job requirements for a variety of occupations within the game development industry.

## **Game & Simulation Analysis**

- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:
- 17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.
  - 17.02 Identify and define the vocabulary used by game players and online gaming communities.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:
- 18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.
  - 18.02 Research and evaluate the game analysis techniques used by the video game industry.
  - 18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.

18.04 Evaluate professional reviews and write a critical analysis of a current video game.

19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:

19.01 Analyze and deconstruct game environments and interactions.

19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

### **Game & Simulation Design**

20.0 Understand the general procedure and requirements of game design. – The student will be able to:

20.01 Describe the design process from conception to production.

20.02 Discuss the iterative nature of game and simulation design.

20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.

21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:

21.01 Research and define the term “player immersion”.

21.02 Explore and explain the factors that create player immersion in a game.

21.03 Examine popular games and explain the methods each game uses to increase player immersion.

22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:

22.01 Identify and discuss the popular game development tools currently used in the industry.

22.02 Identify and discuss popular gaming engines.

22.03 Research and analyze the uses for different game development tools.

23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:

23.01 Identify the different control systems for video games.

23.02 Compare and contrast personal computer and video game console hardware.

23.03 Explain the factors that can limit the game playing ability of personal computers.

23.04 Chart the evolution of video game hardware over the past 20 years.

### **Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

- 24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:
- 24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.
  - 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
  - 24.03 Using a simple game development tool, create a game or simulation.
  - 24.04 Present the game or simulation.

### **Design Essentials**

- 25.0 Describe the game development life cycle. – The student will be able to:
- 25.01 Identify steps in the pre-production process including the proof of concept and market research.
  - 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
  - 25.03 Determine scripting requirements.
  - 25.04 Implement techniques of scenario development, levels, and missions.
  - 25.05 Discuss game testing requirements and methods.
  - 25.06 Identify and describe maintenance, upgrade and sequel issues.
- 26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:
- 26.01 Identify the different control systems for video games.
  - 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
  - 26.03 Explain the factors that can limit the game-playing ability of personal computers.
- 27.0 Identify non-hardware development constraints. – The student will be able to:
- 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
  - 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
  - 27.03 Describe societal and legal constraints affecting game and simulation design.

### **Game Design Documentation**

- 28.0 Understand the general principles of storytelling. – The student will be able to:
- 28.01 Identify the essential elements of a story.
  - 28.02 Describe how creative writing is used as a game design tool.
  - 28.03 Compare and contrast methods of delivering a story in a game.
- 29.0 Understand the use of storyboarding in game design. – The student will be able to:
- 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.

- 29.02 Describe how game layout charts are used in game design.
- 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.
- 29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.

30.0 Develop a game design document or blueprint. – The student will be able to:

- 30.01 Evaluate and discuss the choice of delivery system.
- 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
- 30.03 Create a game strategy overview, character overview, and storyboard overview.
- 30.04 Define the rules of play and multi-player options.
- 30.05 Create the layout and interfaces overview and digital media overview.
- 30.06 Determine the event modeling requirements and create the progression levels overview.
- 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
- 30.08 Identify hardware and software constraints.

### **Game Strategy**

31.0 Understand strategic outlining in game designs. – The student will be able to:

- 31.01 Assess techniques of goal design in gaming.
- 31.02 Describe the concept of nested victories.
- 31.03 Discuss the use of players as agents of change.
- 31.04 Compare and contrast examples of understandable context in gaming.
- 31.05 Discuss the principles underlying the creation of understandable rules.
- 31.06 Describe how skill building is used in game design.
- 31.07 Describe conventional techniques of positive feedback.
- 31.08 Discuss functional consistency as it relates to the use of interfaces.

32.0 Explore elements of puzzle design. – The student will be able to:

- 32.01 Describe the essential elements of a puzzle.
- 32.02 Identify the different types of puzzles.
- 32.03 Describe the basic principles of high-level puzzle design.
- 32.04 Describe the basic principles of low-level puzzle design.

33.0 Discuss key strategic considerations in game design. – The student will be able to:

- 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
- 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
- 33.03 Identify techniques used in the industry to help the player to navigate.
- 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
- 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.

- 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.
- 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

## **Rules of Play**

- 34.0 Understand the process of creating and designing player actions. – The student will be able to:
  - 34.01 Discuss the principles of player-centric design.
  - 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
  - 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
  - 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
  - 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.
  
- 35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:
  - 35.01 Identify techniques of introducing the story plot and beginning play.
  - 35.02 Describe story plot development techniques for the middle of play in game design.
  - 35.03 Analyze and discuss planning techniques for climax and finale of games.
  
- 36.0 Assess common principles and procedures in game flow design. – The student will be able to:
  - 36.01 Assess missions and scenarios game flow techniques.
  - 36.02 Describe common use of mission design and campaigns.
  - 36.03 Evaluate usage of static versus dynamic campaigns.
  
- 37.0 Describe rule creation elements of player challenge. – The student will be able to:
  - 37.01 Research common design methods for clearing obstacles or series of obstacles.
  - 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
  - 37.03 Identify common design elements used to vary weapons, characters and tools.
  - 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
  - 37.05 Evaluate industry use of boss encounters in games.
  - 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

## **Game Development Tools**

- 38.0 Identify tools and software commonly used in game development. – The student will be able to:

- 38.01 Identify and discuss the popular game development tools currently used in the industry.
- 38.02 Identify and discuss popular gaming engines.
- 38.03 Identify and discuss popular world building tools.

### **Music, Sound, Art & Animation**

- 39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:
  - 39.01 Survey and discuss the use of naming conventions and temp sounds.
  - 39.02 Analyze and discuss methods of matching sound effects to art assets.
  - 39.03 Identify and categorize commonly used technology sound engine integration equipment.
  - 39.04 Identify and discuss resources such as sound effects libraries.
  - 39.05 Examine methods of sound implementation and associated software.
  - 39.06 Describe how and why digital video may be integrated into a game or simulation design.
  - 39.07 Describe how special effects differ from animation.
- 40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:
  - 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

### **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
  - 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
  - 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

### **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:
- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.
  - 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
  - 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:
- 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
  - 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
  - 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.
  - 44.04 Discuss the process of designing entities including behavior and entity graphics.
  - 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
  - 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
  - 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
  - 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
  - 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
  - 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
  - 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

## **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
- 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.

- 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:
- 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
- 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
- 47.01 Discuss the various methods of describing items in player’s inventory in contemporary game design.
- 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 74.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 74.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 74.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 74.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 75.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 75.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 75.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 75.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 76.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 76.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 76.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 77.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 77.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 77.02 Locate, organize and reference written information from various sources. CM 3.0
- 77.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 77.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 77.05 Apply active listening skills to obtain and clarify information. CM 7.0

- 77.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 77.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 78.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 78.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 78.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 78.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 78.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 79.0 Use information technology tools. – The student will be able to:
- 79.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 79.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 79.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 79.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 80.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 80.01 Describe the nature and types of business organizations. SY 1.0
- 80.02 Explain the effect of key organizational systems on performance and quality.
- 80.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 80.04 Explain the impact of the global economy on business organizations.
- 83.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 83.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 83.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 83.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 83.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: DIG0071**  
**Occupational Completion Point – B**  
**Game/Simulation 2D Graphic Artist – 150 Hours – SOC Code 27-1014**

- 48.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 2D game graphics. – The student will be able to:
- 48.01 Identify styles of art and trends such as surrealism, pop art, and expressionism by viewing reproductions, prints, videos, periodicals, books or Internet sites.
  - 48.02 Identify art styles from various historical periods.
  - 48.03 Use concise vocabulary to compare and contrast artistic elements and design principles in personal works and the works of others.
  - 48.04 Explore the details in works noting the use of materials, lighting and features that contribute to the overall feel and mood of the work.
- 49.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:
- 49.01 Understand the use of “Fair use and Fair Dealing”.
  - 49.02 Understand the transfer and licensing of creative works.
  - 49.03 Understand the use of “exclusive rights” to intellectual creations.
  - 49.04 Demonstrate the use of digital watermarking.
- 50.0 Understand the various job titles and responsibilities of a 2D artist as it relates to the game industry. – The student will be able to:
- 50.01 Identify the job titles of visual artist used in a 2D game project.
  - 50.02 Demonstrate the ability to work as part of an art team.
  - 50.03 Perform the role of the concept artist for a 2D game project.
  - 50.04 Perform the role of the art director for a 2D game project.
  - 50.05 Perform the role of the texture artist for a 2D game project.
  - 50.06 Perform the role of the environment artist for a 2D game project.
- 51.0 Develop the art direction for a 2D game. – The student will be able to:
- 51.01 Develop a vision for visual elements of a 2D game.
  - 51.02 Effectively convey the mood or psychological appeal of the game to the target audience through the use of visual styles.
  - 51.03 Create conceptual game art using various techniques, emphasizing space and form through range of value, placement, reflections, and shadows.
  - 51.04 Create character sketches, architectural sketches and background sketches for the concept artist to render from.
  - 51.05 Develop the game design documents, including schedules and technical specifications for the art team.
  - 51.06 Understand the challenges of art direction as it relates to mobile devices.
- 52.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials. – The student will be able to:
- 52.01 Understand the design requirements and limitations of a 2D game engine.

- 52.02 Develop characters and game elements in respect to the art direction laid out in the design documents
  - 52.03 Determine the appropriate file format vector based resolution independent vs. pixel based graphics which are resolution dependent.
  - 52.04 Understand the different aspects of quality and detail in relation to performance and size.
  - 52.05 Understand the role of naming conventions as it applies to creative assets storage used in the work flow.
  - 52.06 Demonstrate the effective use of alternative resolutions, scaling and file formats.
- 53.0 Understand the fundamentals of drawing and painting techniques. – The student will be able to:
- 53.01 Demonstrate the use (traditional or digital) of inks, watercolors, acrylics, oils, and mixed media in a 2D game.
  - 53.02 Demonstrate the use of different techniques, format, media or style.
  - 53.03 Understand the use of primitives.
  - 53.04 Demonstrate basic understanding of composition of a scene.
  - 53.05 Understand the shape of the human form.
  - 53.06 Know the value of lights and shadows.
- 54.0 Demonstrate a working knowledge of vector and paint programs used to make 2D graphics and animation. – The student will be able to:
- 54.01 Know the difference between Vectors and Bitmaps.
  - 54.02 Demonstrate understanding of various 2D art programs.
  - 54.03 Utilize the programs tools and brushes
  - 54.04 Know the importance of Layers.
  - 54.05 Identify file formats
- 55.0 2D world building, making graphics and backgrounds for 2D side scrolling, top down, and Isometric projection. – The student will be able to:
- 55.01 Know the importance of scale in relation to the player.
  - 55.02 Understand 2D level design to successfully lead the player.
  - 55.03 Effectively use 2D graphics to convey mood and story in the game world.
- 56.0 Understand the principles of Sprite animation as it relates to 2D game graphics (walk, run, Jump, idle...etc.). – The student will be able to:
- 56.01 Demonstrate the ability to create character and object views from which to animate.
  - 56.02 Break down animation into a series of pictures to import animation to a game engine.
  - 56.03 Demonstrate the effective use of animation loops and cycles in a game engine.
  - 56.04 Demonstrate an understanding of the value of timing to convey character motion
  - 56.05 Demonstrate the effective use of animation arcs for the articulation of body elements
  - 56.06 Demonstrate the use of principles of animation such as anticipation, squash, stretch, weight, exaggeration and overlapping & secondary motion

- 57.0 Facial animation, expressions, and audio lip syncing. – The student will be able to:
- 57.01 Know the basics of lip syncing.
  - 57.02 Understand facial land marking
  - 57.03 Demonstrate the ability to show emotions thru the eyes.
- 58.0 Create graphics for the user interface including titles and button states. – The student will be able to:
- 58.01 Understanding good menu flow of the user interface
  - 58.02 Designing the ideal HUD (Heads Up Display)
  - 58.03 Wisely using text in the game interface.
  - 58.04 Demonstrate the ability for creating Mock-Ups.
- 59.0 Particle system design and other in-game effects such as lighting and shadows. – The student will be able to:
- 59.01 Understand particle design for fire and smoke.
  - 59.02 Create water using 2D particles.
  - 59.03 Know the anatomy of an explosion effect.
  - 59.04 Create a 3D feel in a 2D world using light and shadows.
- 60.0 Demonstrate the effective use of 2D hardware such as scanners and digital tablets. – The student will be able to:
- 60.01 Demonstrate the installation, software and hardware associated with digital tablets, scanners, and a digital camera.
  - 60.02 Demonstrate the use of a digital tablet within a paint software application.
  - 60.03 Demonstrate the process of capturing textures using a digital camera.
  - 60.04 Demonstrate the process of importing images from a digital camera into a photo editing software application.
  - 60.05 Demonstrate the proper use of a scanner for image processing.
- 81.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 81.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 81.02 Explain emergency procedures to follow in response to workplace accidents.
  - 81.03 Create a disaster and/or emergency response plan. SHE 2.0
- 82.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 82.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 82.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 82.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 82.04 Employ mentoring skills to inspire and teach others. LT 5.0

- 84.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 84.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 84.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 84.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 84.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 84.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 84.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 84.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 84.08 Research the benefits of ongoing professional development. ECD 9.0
  - 84.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 85.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 85.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 85.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 85.03 Develop a personal budget and financial goals. FL 3.1
  - 85.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 85.05 Maintain financial records. FL 3.3
  - 85.06 Read and reconcile financial statements. FL 3.4
  - 85.07 Research, compare and contrast investment opportunities.

**Course Number: DIG0072****Occupational Completion Point – C****Game/Simulation 3D Graphic Animator – 150 Hours – SOC Code 27-1014**

- 61.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 3D game graphics. – The student will be able to:
- 61.01 Identify styles of art and trends such as surrealism, pop art, and expressionism by viewing reproductions, prints, videos, periodicals, books or Internet sites.
  - 61.02 Identify art styles from various historical periods.
  - 61.03 Use concise vocabulary to compare and contrast artistic elements and design principles in personal works and the works of others.
  - 61.04 Explore the details in works noting the use of materials, lighting and features that contribute to the overall feel and mood of the work.
- 62.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:
- 62.01 Understand the use of “Fair use and Fair Dealing”.
  - 62.02 Understand the transfer and licensing of creative works.
  - 62.03 Understand the use of “exclusive rights” to intellectual creations.
  - 62.04 Demonstrate the use of digital watermarking.

- 63.0 Understand the various job titles and responsibilities of a 3D artist as it relates to the game industry. – The student will be able to:
- 63.01 Identify the job titles of visual artist used in a 3D game project.
  - 63.02 Demonstrate the ability to work as part of an art team.
  - 63.03 Perform the role of the concept artist for a 3D game project.
  - 63.04 Perform the role of the art director for a 3D game project.
  - 63.05 Perform the role of the texture artist for a 3D game project.
  - 63.06 Perform the role of the environment artist for a 3D game project.
- 64.0 Develop the art direction for a 3D game. – The student will be able to:
- 64.01 Develop a vision for visual elements of a 3D game.
  - 64.02 Effectively convey the mood or psychological appeal of the game to the target audience through the use of visual styles.
  - 64.03 Create conceptual game art using various techniques, emphasizing space and form through range of value, placement, reflections, and shadows.
  - 64.04 Create character sketches, architectural sketches and background sketches for the concept artist to render from.
  - 64.05 Develop the game design documents, including schedules and technical specifications for the art team.
  - 64.06 Understand the challenges of art direction as it relates to mobile devices.
- 65.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials. – The student will be able to:
- 65.01 Understand the design requirements and limitations of a 3D game engine.
  - 65.02 Develop characters and game elements in respect to the art direction laid out in the design documents
  - 65.03 Determine the appropriate file format as it applies to pixel based graphics, which are resolution dependent.
  - 65.04 Understand the different aspects of quality and detail in relation to performance and size.
  - 65.05 Understand the role of naming conventions as it applies to creative assets storage used in the work flow.
  - 65.06 Demonstrate the effective use of alternative resolutions, scaling and file formats.
- 66.0 Understand the fundamentals of drawing and painting techniques. – The student will be able to:
- 66.01 Demonstrate the use (traditional or digital) of inks, watercolors, acrylics, oils, and mixed media in a 3D game.
  - 66.02 Demonstrate the use of different techniques, format, media or style.
  - 66.03 Understand the use of primitives.
  - 66.04 Demonstrate basic understanding of composition of a scene.
  - 66.05 Understand the shape of the human form.
  - 66.06 Know the value of lights and shadows.
- 67.0 Demonstrate a working knowledge of modeling and paint programs used to make 3D graphics and animation. – The student will be able to:

- 67.01 Understand the limitation of bitmaps graphics.
  - 67.02 Understand the use and application of bump map images applied to a model.
  - 67.03 Demonstrate understanding of various 3D art programs.
  - 67.04 Utilize the programs tools and brushes
  - 67.05 Know the importance of Layers.
  - 67.06 Identify file formats
- 68.0 3D world building, making graphics and backgrounds for 3D side scrolling, top down, and Isometric projection. – The student will be able to:
- 68.01 Know the importance of scale in relation to the player.
  - 68.02 Understand 3D level design to successfully lead the player.
  - 68.03 Effectively use 3D graphics to convey mood and story in the game world.
- 69.0 Understand the principles of Sprite animation as it relates to 3D game graphics (walk, run, Jump, idle...etc.). – The student will be able to:
- 69.01 Demonstrate the ability to create character and object views from which to animate.
  - 69.02 Break down animation into a series of pictures to import animation to a game engine.
  - 69.03 Demonstrate the effective use of animation loops and cycles in a game engine.
  - 69.04 Demonstrate an understanding of the value of timing to convey character motion.
  - 69.05 Demonstrate the effective use of animation arcs for the articulation of body elements.
  - 69.06 Demonstrate the use of principles of animation such as anticipation, squash, stretch, weight, exaggeration and overlapping & secondary motion.
  - 69.07 Understand the use of motion capture techniques and acting principles.
- 70.0 Facial animation, expressions, and audio lip syncing. – The student will be able to:
- 70.01 Know the basics of lip syncing.
  - 70.02 Understand facial land marking
  - 70.03 Demonstrate the ability to show emotions thru the eyes.
  - 70.04 Demonstrate the use of motion capture data as it applies to facial animation.
- 71.0 Create graphics for the user interface including titles and button states. – The student will be able to:
- 71.01 Understanding good menu flow of the user interface
  - 71.02 Designing the ideal HUD (Heads Up Display)
  - 71.03 Wisely using text in the game interface.
  - 71.04 Demonstrate the ability for creating Mock-Ups.
- 72.0 Particle system design and other in-game effects such as lighting and shadows. – The student will be able to:
- 72.01 Understand particle design for fire and smoke.
  - 72.02 Create water using 3D particles.
  - 72.03 Know the anatomy of an explosion effect.

- 72.04 Create a photorealistic or artistic style in a 3D world using light, shadows, bump maps, and textures.
- 73.0 Demonstrate the effective use of 3D hardware such as scanners and digital tablets. –  
The student will be able to:
  - 73.01 Demonstrate the installation, software and hardware associated with digital tablets, scanners, and a digital camera.
  - 73.02 Demonstrate the use of a digital tablet within a paint software application.
  - 73.03 Demonstrate the process of capturing textures using a digital camera.
  - 73.04 Demonstrate the process of importing images from a digital camera into a photo editing software application.
  - 73.05 Demonstrate the proper use of a scanner for image processing.
  - 73.06 Understand the use of motion capture systems, optical, mechanical, mark less as it applies to 3D animation content.
  - 73.07 Understand the use of 3D scanners to create objects and apply textures images captured from the device.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Foundations  
**Course Number:** 8208110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to game and simulation concepts and careers, the impact game and simulation has on society and industry, and basic game/simulation design concepts such as rule design, play mechanics, and media integration. This course compares and contrasts games and simulations, key development methodologies and tools, careers, and industry-related information. This course also covers strategies, processes, and methods for conceptualizing a game or simulation application; storyboarding techniques; and development tools.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. **Regardless of topic sequencing, the culminating activity is the creation of a playable game.**

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	12/36 33%	<b>Biology 1</b>	3/56 5%	<b>Anatomy/Physiology Honors</b>	1/53 2%	<b>Astronomy Solar/Galactic Honors</b>	13/52 25%
<b>Algebra 2</b>	3/41 7%	<b>Chemistry 1</b>	17/55 31%	<b>Genetics</b>	3/35 9%	<b>Marine Science 1 Honors</b>	14/42 33%
<b>Geometry</b>	#	<b>Physics 1</b>	24/53 45%	<b>Earth-Space Science</b>	14/58 24%	<b>Physical Science</b>	21/56 38%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:

01.01 Use industry standard game design production documents to create a game design production plan.

02.0 Design and create a playable game. – The student will be able to:

- 02.01 Use a number of computer tools to enhance and ease game programming and artistry.
- 02.02 Use a game engine to create a playable game.
- 02.03 Use animated objects.
- 02.04 Program sound and music to enhance the game experience.
- 02.05 Test and debug the completed game.

### **Critical Game & Simulation Studies**

03.0 Categorize the different gaming genres. – The student will be able to:

- 03.01 Research, compare and categorize the different gaming genres.
- 03.02 Analyze examples of different gaming genres.
- 03.03 Define and use the necessary vocabulary related to gaming and the different genres.

04.0 Categorize different gaming systems. – The student will be able to:

- 04.01 Research, compare and categorize different gaming systems.
- 04.02 Analyze the distinctive features of each system.
- 04.03 Define the target audience for different systems based on features, available games, and price of system and games.
- 04.04 Define and use the necessary vocabulary related to gaming hardware.

05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:

- 05.01 Discuss the history of non-electronic games.
- 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
- 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.

06.0 Describe the trends in current and next-generation game development. – The student will be able to:

- 06.01 Determine and analyze the significant trends in game development in the past two decades.
- 06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

07.0 Understand the role of play in human culture. – The student will be able to:

- 07.01 Discuss the word “play” and its many definitions.
- 07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.
- 07.03 Describe the history of play and its importance in developing societies and cultures.

- 07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.
- 07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.
- 08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:
  - 08.01 Investigate studies that discuss the impact of violent games on children and adults.
  - 08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.
  - 08.03 Research and discuss differing opinions on video game addiction and what would define addiction.
  - 08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

- 09.0 Understand the business model commonly used in the game development industry. – The student will be able to:
  - 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
  - 09.02 Identify and describe licensing management for different gaming platforms.
  - 09.03 Discuss the product value and business differences between major game platforms.
  - 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.
- 10.0 Examine and categorize the significant processes in the production of interactive games. – The student will be able to:
  - 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
  - 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
  - 10.03 Explore and describe the effects of globalization on the design and production of video games.
- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:
  - 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
  - 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
  - 11.03 Explore and discuss methods of communications and scheduling for design teams.
  - 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.

- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:
- 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
  - 12.02 Describe legal and liability issues that could affect online communities.
  - 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.
- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:
- 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
  - 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
  - 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
  - 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

### **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:
- 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
  - 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:
- 15.01 Solicit and accept constructive criticism.
  - 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
  - 15.03 Collaborate with individuals and teams to complete tasks and solve problems.
- 16.0 Investigate career opportunities in the game industry. – The student will be able to:
- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

- 16.03 Describe job requirements for a variety of occupations within the game development industry.

### **Game & Simulation Analysis**

- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:
  - 17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.
  - 17.02 Identify and define the vocabulary used by game players and online gaming communities.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:
  - 18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.
  - 18.02 Research and evaluate the game analysis techniques used by the video game industry.
  - 18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.
  - 18.04 Evaluate professional reviews and write a critical analysis of a current video game.
- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:
  - 19.01 Analyze and deconstruct game environments and interactions.
  - 19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

### **Game & Simulation Design**

- 20.0 Understand the general procedure and requirements of game design. – The student will be able to:
  - 20.01 Describe the design process from conception to production.
  - 20.02 Discuss the iterative nature of game and simulation design.
  - 20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.
- 21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:
  - 21.01 Research and define the term “player immersion”.
  - 21.02 Explore and explain the factors that create player immersion in a game.
  - 21.03 Examine popular games and explain the methods each game uses to increase player immersion.

- 22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:
- 22.01 Identify and discuss the popular game development tools currently used in the industry.
  - 22.02 Identify and discuss popular gaming engines.
  - 22.03 Research and analyze the uses for different game development tools.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:
- 23.01 Identify the different control systems for video games.
  - 23.02 Compare and contrast personal computer and video game console hardware.
  - 23.03 Explain the factors that can limit the game playing ability of personal computers.
  - 23.04 Chart the evolution of video game hardware over the past 20 years.
- 74.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 74.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 74.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 74.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 75.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 75.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 75.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 75.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 76.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 76.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 76.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Design  
**Course Number:** 8208120  
**Course Credit:** 1

**Course Description:**

This course covers fundamental principles of designing a game or a simulation application, in particular Human Computer Interface (HCI) principles, rules and strategies of play, conditional branching, design and development constraints, use of sound and animation, design tools, and implementation issues. The content includes market research, product design documentation, storyboarding, proposal development, and presentation of a project report. Emphasis is placed on the techniques needed to develop well-documented, structured game or simulation programs. Extensive use is made of evaluating and analyzing existing games or simulations.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. **Regardless of topic sequencing, the culminating activity is the creation and presentation of a playable game with design documentation.**

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	2/36 6%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	8/52 15%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	9/55 16%	<b>Genetics</b>	1/35 3%	<b>Marine Science 1 Honors</b>	3/42 7%
<b>Geometry</b>	5/45 11%	<b>Physics 1</b>	15/53 28%	<b>Earth-Space Science</b>	6/58 10%	<b>Physical Science</b>	14/56 25%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

**Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:

24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.

- 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
- 24.03 Using a simple game development tool, create a game or simulation.
- 24.04 Present the game or simulation.

## **Design Essentials**

- 25.0 Describe the game development life cycle. – The student will be able to:
  - 25.01 Identify steps in the pre-production process including the proof of concept and market research.
  - 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
  - 25.03 Determine scripting requirements.
  - 25.04 Implement techniques of scenario development, levels, and missions.
  - 25.05 Discuss game testing requirements and methods.
  - 25.06 Identify and describe maintenance, upgrade and sequel issues.
- 26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:
  - 26.01 Identify the different control systems for video games.
  - 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
  - 26.03 Explain the factors that can limit the game-playing ability of personal computers.
- 27.0 Identify non-hardware development constraints. – The student will be able to:
  - 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
  - 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
  - 27.03 Describe societal and legal constraints affecting game and simulation design.

## **Game Design Documentation**

- 28.0 Understand the general principles of storytelling. – The student will be able to:
  - 28.01 Identify the essential elements of a story.
  - 28.02 Describe how creative writing is used as a game design tool.
  - 28.03 Compare and contrast methods of delivering a story in a game.
- 29.0 Understand the use of storyboarding in game design. – The student will be able to:
  - 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.
  - 29.02 Describe how game layout charts are used in game design.
  - 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.

29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.

30.0 Develop a game design document or blueprint. – The student will be able to:

- 30.01 Evaluate and discuss the choice of delivery system.
- 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
- 30.03 Create a game strategy overview, character overview, and storyboard overview.
- 30.04 Define the rules of play and multi-player options.
- 30.05 Create the layout and interfaces overview and digital media overview.
- 30.06 Determine the event modeling requirements and create the progression levels overview.
- 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
- 30.08 Identify hardware and software constraints.

### **Game Strategy**

31.0 Understand strategic outlining in game designs. – The student will be able to:

- 31.01 Assess techniques of goal design in gaming.
- 31.02 Describe the concept of nested victories.
- 31.03 Discuss the use of players as agents of change.
- 31.04 Compare and contrast examples of understandable context in gaming.
- 31.05 Discuss the principles underlying the creation of understandable rules.
- 31.06 Describe how skill building is used in game design.
- 31.07 Describe conventional techniques of positive feedback.
- 31.08 Discuss functional consistency as it relates to the use of interfaces.

32.0 Explore elements of puzzle design. – The student will be able to:

- 32.01 Describe the essential elements of a puzzle.
- 32.02 Identify the different types of puzzles.
- 32.03 Describe the basic principles of high-level puzzle design.
- 32.04 Describe the basic principles of low-level puzzle design.

33.0 Discuss key strategic considerations in game design. – The student will be able to:

- 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
- 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
- 33.03 Identify techniques used in the industry to help the player to navigate.
- 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
- 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.
- 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.

- 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

## Rules of Play

- 34.0 Understand the process of creating and designing player actions. – The student will be able to:
  - 34.01 Discuss the principles of player-centric design.
  - 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
  - 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
  - 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
  - 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.
  
- 35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:
  - 35.01 Identify techniques of introducing the story plot and beginning play.
  - 35.02 Describe story plot development techniques for the middle of play in game design.
  - 35.03 Analyze and discuss planning techniques for climax and finale of games.
  
- 36.0 Assess common principles and procedures in game flow design. – The student will be able to:
  - 36.01 Assess missions and scenarios game flow techniques.
  - 36.02 Describe common use of mission design and campaigns.
  - 36.03 Evaluate usage of static versus dynamic campaigns.
  
- 37.0 Describe rule creation elements of player challenge. – The student will be able to:
  - 37.01 Research common design methods for clearing obstacles or series of obstacles.
  - 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
  - 37.03 Identify common design elements used to vary weapons, characters and tools.
  - 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
  - 37.05 Evaluate industry use of boss encounters in games.
  - 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

## Game Development Tools

- 38.0 Identify tools and software commonly used in game development. – The student will be able to:
  - 38.01 Identify and discuss the popular game development tools currently used in the industry.

- 38.02 Identify and discuss popular gaming engines.
- 38.03 Identify and discuss popular world building tools.

### **Music, Sound, Art & Animation**

- 39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:
  - 39.01 Survey and discuss the use of naming conventions and temp sounds.
  - 39.02 Analyze and discuss methods of matching sound effects to art assets.
  - 39.03 Identify and categorize commonly used technology sound engine integration equipment.
  - 39.04 Identify and discuss resources such as sound effects libraries.
  - 39.05 Examine methods of sound implementation and associated software.
  - 39.06 Describe how and why digital video may be integrated into a game or simulation design.
  - 39.07 Describe how special effects differ from animation.
  
- 40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:
  - 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

### **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
  - 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
  
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
  - 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

### **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:

- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.
  - 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
  - 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:
- 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
  - 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
  - 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.
  - 44.04 Discuss the process of designing entities including behavior and entity graphics.
  - 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
  - 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
  - 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
  - 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
  - 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
  - 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
  - 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

## **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
- 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.
  - 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:

- 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
- 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
- 47.01 Discuss the various methods of describing items in player’s inventory in contemporary game design.
- 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 77.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 77.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 77.02 Locate, organize and reference written information from various sources. CM 3.0
- 77.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 77.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 77.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 77.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 77.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 78.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 78.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 78.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 78.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 78.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 79.0 Use information technology tools. – The student will be able to:
- 79.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 79.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 79.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 79.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 80.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:

- 80.01 Describe the nature and types of business organizations. SY 1.0
  - 80.02 Explain the effect of key organizational systems on performance and quality.
  - 80.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 80.04 Explain the impact of the global economy on business organizations.
- 83.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 83.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 83.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
  - 83.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
  - 83.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation 2D Graphic Development  
**Course Number:** 8208130  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring skills to create, refine, and integrate realistic 2D graphics into a game or simulation product. Students will essentially learn how to use a graphic software package, file maintenance strategies, and migration techniques and issues.

48.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 2D game graphics. – The student will be able to:

- 48.01 Identify styles of art and trends such as surrealism, pop art, and expressionism by viewing reproductions, prints, videos, periodicals, books or Internet sites.
- 48.02 Identify art styles from various historical periods.
- 48.03 Use concise vocabulary to compare and contrast artistic elements and design principles in personal works and the works of others.
- 48.04 Explore the details in works noting the use of materials, lighting and features that contribute to the overall feel and mood of the work.

49.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:

- 49.01 Understand the use of “Fair use and Fair Dealing”.
- 49.02 Understand the transfer and licensing of creative works.
- 49.03 Understand the use of “exclusive rights” to intellectual creations.
- 49.04 Demonstrate the use of digital watermarking.

50.0 Understand the various job titles and responsibilities of a 2D artist as it relates to the game industry. – The student will be able to:

- 50.01 Identify the job titles of visual artist used in a 2D game project.
- 50.02 Demonstrate the ability to work as part of an art team.
- 50.03 Perform the role of the concept artist for a 2D game project.
- 50.04 Perform the role of the art director for a 2D game project.
- 50.05 Perform the role of the texture artist for a 2D game project.
- 50.06 Perform the role of the environment artist for a 2D game project.

51.0 Develop the art direction for a 2D game. – The student will be able to:

- 51.01 Develop a vision for visual elements of a 2D game.
- 51.02 Effectively convey the mood or psychological appeal of the game to the target audience through the use of visual styles.
- 51.03 Create conceptual game art using various techniques, emphasizing space and form through range of value, placement, reflections, and shadows.

- 51.04 Create character sketches, architectural sketches and background sketches for the concept artist to render from.
  - 51.05 Develop the game design documents, including schedules and technical specifications for the art team.
  - 51.06 Understand the challenges of art direction as it relates to mobile devices.
- 52.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials. – The student will be able to:
- 52.01 Understand the design requirements and limitations of a 2D game engine.
  - 52.02 Develop characters and game elements in respect to the art direction laid out in the design documents
  - 52.03 Determine the appropriate file format vector based resolution independent vs. pixel based graphics which are resolution dependent.
  - 52.04 Understand the different aspects of quality and detail in relation to performance and size.
  - 52.05 Understand the role of naming conventions as it applies to creative assets storage used in the work flow.
  - 52.06 Demonstrate the effective use of alternative resolutions, scaling and file formats.
- 53.0 Understand the fundamentals of drawing and painting techniques. – The student will be able to:
- 53.01 Demonstrate the use (traditional or digital) of inks, watercolors, acrylics, oils, and mixed media in a 2D game.
  - 53.02 Demonstrate the use of different techniques, format, media or style.
  - 53.03 Understand the use of primitives.
  - 53.04 Demonstrate basic understanding of composition of a scene.
  - 53.05 Understand the shape of the human form.
  - 53.06 Know the value of lights and shadows.
- 54.0 Demonstrate a working knowledge of vector and paint programs used to make 2D graphics and animation. – The student will be able to:
- 54.01 Know the difference between Vectors and Bitmaps.
  - 54.02 Demonstrate understanding of various 2D art programs.
  - 54.03 Utilize the programs tools and brushes
  - 54.04 Know the importance of Layers.
  - 54.05 Identify file formats
- 55.0 2D world building, making graphics and backgrounds for 2D side scrolling, top down, and Isometric projection. – The student will be able to:
- 55.01 Know the importance of scale in relation to the player.
  - 55.02 Understand 2D level design to successfully lead the player.
  - 55.03 Effectively use 2D graphics to convey mood and story in the game world.
- 56.0 Understand the principles of Sprite animation as it relates to 2D game graphics (walk, run, Jump, idle...etc.). – The student will be able to:

- 56.01 Demonstrate the ability to create character and object views from which to animate.
  - 56.02 Break down animation into a series of pictures to import animation to a game engine.
  - 56.03 Demonstrate the effective use of animation loops and cycles in a game engine.
  - 56.04 Demonstrate an understanding of the value of timing to convey character motion
  - 56.05 Demonstrate the effective use of animation arcs for the articulation of body elements
  - 56.06 Demonstrate the use of principles of animation such as anticipation, squash, stretch, weight, exaggeration and overlapping & secondary motion
- 57.0 Facial animation, expressions, and audio lip syncing. – The student will be able to:
- 57.01 Know the basics of lip syncing.
  - 57.02 Understand facial land marking
  - 57.03 Demonstrate the ability to show emotions thru the eyes.
- 58.0 Create graphics for the user interface including titles and button states. – The student will be able to:
- 58.01 Understanding good menu flow of the user interface
  - 58.02 Designing the ideal HUD (Heads Up Display)
  - 58.03 Wisely using text in the game interface.
  - 58.04 Demonstrate the ability for creating Mock-Ups.
- 59.0 Particle system design and other in-game effects such as lighting and shadows. – The student will be able to:
- 59.01 Understand particle design for fire and smoke.
  - 59.02 Create water using 2D particles.
  - 59.03 Know the anatomy of an explosion effect.
  - 59.04 Create a 3D feel in a 2D world using light and shadows.
- 60.0 Demonstrate the effective use of 2D hardware such as scanners and digital tablets. – The student will be able to:
- 60.01 Demonstrate the installation, software and hardware associated with digital tablets, scanners, and a digital camera.
  - 60.02 Demonstrate the use of a digital tablet within a paint software application.
  - 60.03 Demonstrate the process of capturing textures using a digital camera.
  - 60.04 Demonstrate the process of importing images from a digital camera into a photo editing software application.
  - 60.05 Demonstrate the proper use of a scanner for image processing.
- 81.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 81.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 81.02 Explain emergency procedures to follow in response to workplace accidents.

- 81.03 Create a disaster and/or emergency response plan. SHE 2.0
- 82.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 82.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 82.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 82.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 82.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 84.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 84.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 84.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 84.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 84.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 84.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 84.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 84.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 84.08 Research the benefits of ongoing professional development. ECD 9.0
- 84.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 85.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 85.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 85.02 Describe the effect of money management on personal and career goals. FL 3.0
- 85.03 Develop a personal budget and financial goals. FL 3.1
- 85.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 85.05 Maintain financial records. FL 3.3
- 85.06 Read and reconcile financial statements. FL 3.4
- 85.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation 3D Graphic Animation  
**Course Number:** 8208140  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring skills to create, refine, and integrate realistic 3D graphics into a game or simulation product. Students will essentially learn how to use a 3D animation software package, file maintenance conventions, and migration techniques and issues.

- 61.0 Understand the significance of historical and cultural heritage of art and artistic styles as it relates to 3D game graphics. – The student will be able to:
- 61.01 Identify styles of art and trends such as surrealism, pop art, and expressionism by viewing reproductions, prints, videos, periodicals, books or Internet sites.
  - 61.02 Identify art styles from various historical periods.
  - 61.03 Use concise vocabulary to compare and contrast artistic elements and design principles in personal works and the works of others.
  - 61.04 Explore the details in works noting the use of materials, lighting and features that contribute to the overall feel and mood of the work.
- 62.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:
- 62.01 Understand the use of “Fair use and Fair Dealing”.
  - 62.02 Understand the transfer and licensing of creative works.
  - 62.03 Understand the use of “exclusive rights” to intellectual creations.
  - 62.04 Demonstrate the use of digital watermarking.
- 63.0 Understand the various job titles and responsibilities of a 3D artist as it relates to the game industry. – The student will be able to:
- 63.01 Identify the job titles of visual artist used in a 3D game project.
  - 63.02 Demonstrate the ability to work as part of an art team.
  - 63.03 Perform the role of the concept artist for a 3D game project.
  - 63.04 Perform the role of the art director for a 3D game project.
  - 63.05 Perform the role of the texture artist for a 3D game project.
  - 63.06 Perform the role of the environment artist for a 3D game project.
- 64.0 Develop the art direction for a 3D game. – The student will be able to:
- 64.01 Develop a vision for visual elements of a 3D game.
  - 64.02 Effectively convey the mood or psychological appeal of the game to the target audience through the use of visual styles.

- 64.03 Create conceptual game art using various techniques, emphasizing space and form through range of value, placement, reflections, and shadows.
  - 64.04 Create character sketches, architectural sketches and background sketches for the concept artist to render from.
  - 64.05 Develop the game design documents, including schedules and technical specifications for the art team.
  - 64.06 Understand the challenges of art direction as it relates to mobile devices.
- 65.0 Determine and document the graphical and animation needs of a game using design documents including art direction and reference materials. – The student will be able to:
- 65.01 Understand the design requirements and limitations of a 3D game engine.
  - 65.02 Develop characters and game elements in respect to the art direction laid out in the design documents
  - 65.03 Determine the appropriate file format as it applies to pixel based graphics, which are resolution dependent.
  - 65.04 Understand the different aspects of quality and detail in relation to performance and size.
  - 65.05 Understand the role of naming conventions as it applies to creative assets storage used in the work flow.
  - 65.06 Demonstrate the effective use of alternative resolutions, scaling and file formats.
- 66.0 Understand the fundamentals of drawing and painting techniques. – The student will be able to:
- 66.01 Demonstrate the use (traditional or digital) of inks, watercolors, acrylics, oils, and mixed media in a 3D game.
  - 66.02 Demonstrate the use of different techniques, format, media or style.
  - 66.03 Understand the use of primitives.
  - 66.04 Demonstrate basic understanding of composition of a scene.
  - 66.05 Understand the shape of the human form.
  - 66.06 Know the value of lights and shadows.
- 67.0 Demonstrate a working knowledge of modeling and paint programs used to make 3D graphics and animation. – The student will be able to:
- 67.01 Understand the limitation of bitmaps graphics.
  - 67.02 Understand the use and application of bump map images applied to a model.
  - 67.03 Demonstrate understanding of various 3D art programs.
  - 67.04 Utilize the programs tools and brushes
  - 67.05 Know the importance of Layers.
  - 67.06 Identify file formats
- 68.0 3D world building, making graphics and backgrounds for 3D side scrolling, top down, and Isometric projection. – The student will be able to:
- 68.01 Know the importance of scale in relation to the player.
  - 68.02 Understand 3D level design to successfully lead the player.
  - 68.03 Effectively use 3D graphics to convey mood and story in the game world.

- 69.0 Understand the principles of Sprite animation as it relates to 3D game graphics (walk, run, Jump, idle...etc.). – The student will be able to:
- 69.01 Demonstrate the ability to create character and object views from which to animate.
  - 69.02 Break down animation into a series of pictures to import animation to a game engine.
  - 69.03 Demonstrate the effective use of animation loops and cycles in a game engine.
  - 69.04 Demonstrate an understanding of the value of timing to convey character motion.
  - 69.05 Demonstrate the effective use of animation arcs for the articulation of body elements.
  - 69.06 Demonstrate the use of principles of animation such as anticipation, squash, stretch, weight, exaggeration and overlapping & secondary motion.
  - 69.07 Understand the use of motion capture techniques and acting principles.
- 70.0 Facial animation, expressions, and audio lip syncing. – The student will be able to:
- 70.01 Know the basics of lip syncing.
  - 70.02 Understand facial land marking
  - 70.03 Demonstrate the ability to show emotions thru the eyes.
  - 70.04 Demonstrate the use of motion capture data as it applies to facial animation.
- 71.0 Create graphics for the user interface including titles and button states. – The student will be able to:
- 71.01 Understanding good menu flow of the user interface
  - 71.02 Designing the ideal HUD (Heads Up Display)
  - 71.03 Wisely using text in the game interface.
  - 71.04 Demonstrate the ability for creating Mock-Ups.
- 72.0 Particle system design and other in-game effects such as lighting and shadows. – The student will be able to:
- 72.01 Understand particle design for fire and smoke.
  - 72.02 Create water using 3D particles.
  - 72.03 Know the anatomy of an explosion effect.
  - 72.04 Create a photorealistic or artistic style in a 3D world using light, shadows, bump maps, and textures.
- 73.0 Demonstrate the effective use of 3D hardware such as scanners and digital tablets. – The student will be able to:
- 73.01 Demonstrate the installation, software and hardware associated with digital tablets, scanners, and a digital camera.
  - 73.02 Demonstrate the use of a digital tablet within a paint software application.
  - 73.03 Demonstrate the process of capturing textures using a digital camera.
  - 73.04 Demonstrate the process of importing images from a digital camera into a photo editing software application.
  - 73.05 Demonstrate the proper use of a scanner for image processing.
  - 73.06 Understand the use of motion capture systems, optical, mechanical, mark less as it applies to 3D animation content.

73.07 Understand the use of 3D scanners to create objects and apply textures images captured from the device.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Game/Simulation/Animation Audio/Video Effects  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8208200	B082200
CIP Number	0550041115	0550041115
Grade Level	9-12, 30, 31	30, 31
Standard Length	4 credits	600 hours
Teacher Certification	BUS ED 1 @2 COMPU SCI 6 COMM ART @7 G TV PRO TEC @ 7 G	BUS ED 1 @2 COMPU SCI 6 COMM ART @7 G TV PRO TEC @ 7 G
CTSO	FBLA BPA	Phi Beta Lambda BPA
SOC Codes (all applicable)	15-1099.13; 27-1014	15-1099.13; 27-1014
Facility Code	212 <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)	
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Basic Skills Level	N/A	Mathematics: 10 Language: 10 Reading: 10

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as a Game/Simulation Designer, Digital Media Artist, and Digital Media Specialist in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to practical experiences in game/simulation conceptualization, design, storyboarding, development methodologies, audio/sound effects design and production, video/special effects design and production, and implementation issues. Specialized skills involving audio and video editing equipment and software are used to produce a variety of intrinsic and special audio/video effects.

This program is project-based and focuses on broad, transferable skills and stresses understanding and demonstration of the following rudiments of the game and simulation industry: production planning, elements of production design, storyboarding, elements of visual design, integration of digital audio and digital video into new game/simulation productions, and collaboration/teamwork.

### Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. Students enrolling in this program must be computer literate. This literacy can be achieved by completing one credit of the Business Technology Education core. This includes Computing for College & Careers (8209020) or Introduction to Information Technology (8207310). It is also recommended that students complete core courses in digital arts, computer arts, or digital media. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	DIG0070	Game/Simulation Designer	300	15-1099.13
B	DIG0073	Digital Media Artist	150	27-1014
C	DIG0074	Digital Media Specialist	150	27-1014

\* Note: OTA0040 is a highly recommended core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8208110	Game & Simulation Foundations	1 credit	15-1099.13	2
	8208120	Game & Simulation Design	1 credit		
B	8208230	Game & Simulation Audio/Sound Effects	1 credit	27-1014	2
C	8208240	Game & Simulation Video/Special Effects	1 credit	27-1014	2

\* Note: It is highly recommended that students complete the BTE Core, either Computing for College and Careers (8209020) or Introduction to Information Technology (8207310), prior to or concurrently with the first two courses.

## Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Game & Simulation Foundations	12/36 33%	3/41 7%	#	3/53 5%	13/52 25%	3/56 5%	17/52 31%	14/58 24%	3/35 9%	14/42 33%	21/56 38%	24/53 45%
Game & Simulation Design	2/36 6%	#	5/45 11%	2/53 4%	8/52 15%	2/56 4%	9/52 16%	6/58 10%	1/35 3%	3/42 7%	14/56 25%	15/53 28%
Game & Simulation Audio/Sound Effects	**	**	**	**	**	**	**	**	**	**	**	**
Game & Simulation Video/ Special Effects	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

## **Program Recommendations**

The Game/Simulation/Animation Audio/Video Effects program lends itself to integration of the core academic subjects of language arts, math, science, visual arts, and social studies into project activities. It is through a balanced and integrated curriculum that students attain the attitudes, skills, and knowledge needed to compete successfully in today's work force. To achieve total curriculum integration, academic and career and technical education teachers should be scheduled with common planning times.

This program emphasizes the development of technical abilities as well as ethical and societal awareness necessary to function in a highly technological society. The use of cooperative learning groups is recommended. By learning and practicing group process skills, students will be prepared to work "together" in real work situations. Program graduates will develop enhanced self-esteem as well as the problem solving and teamwork skills necessary to succeed in careers and postsecondary education.

The Game/Simulation/Animation Audio/Video Effects program places a strong emphasis on workplace learning. Job shadowing and mentoring experiences with game and simulation professionals along with on-site trips to local businesses connect classroom learning to the workplace. In-class guest speakers bring the real world into the classroom.

## **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills to secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10.0, Language 10.0, and Reading 10.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in

exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns

credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game.
- 02.0 Design and create a playable game.
- 03.0 Categorize the different gaming genres.
- 04.0 Categorize different gaming systems.
- 05.0 Understand the historical significance of electronic and non-electronic games.
- 06.0 Describe the trends in current and next-generation game development.
- 07.0 Understand the role of play in human culture.
- 08.0 Understand the psychological impact of games on individuals and groups.
- 09.0 Understand the business model commonly used in the game development industry.
- 10.0 Examine and categorize the significant processes in the production of interactive games.
- 11.0 Understand the core tasks and challenges that face a video game design team.
- 12.0 Understand legal issues that affect games, developers and players.
- 13.0 Describe the impact of the video game industry on the economy.
- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace.
- 16.0 Investigate career opportunities in the game industry.
- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow, and game design.

- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game.
- 20.0 Understand the general procedure and requirements of game design.
- 21.0 Explore the methods used to create and sustain player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMax, and different gaming engines.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices.
- 24.0 Create a working game or simulation individually or as part of a team.
- 25.0 Describe the game development life cycle.
- 26.0 Identify hardware constraints on video games including processors and I/O devices.
- 27.0 Identify non-hardware development constraints.
- 28.0 Understand the general principles of storytelling.
- 29.0 Understand the use of storyboarding in game design.
- 30.0 Develop a game design document or blueprint.
- 31.0 Understand strategic outlining in game designs.
- 32.0 Explore elements of puzzle design.
- 33.0 Discuss key strategic considerations in game design.
- 34.0 Understand the process of creating and designing player actions.
- 35.0 Create and design the game flow as it relates to story and plot.
- 36.0 Assess common principles and procedures in game flow design.
- 37.0 Describe rule creation elements of player challenge.
- 38.0 Identify tools and software commonly used in game development.
- 39.0 Understand the methodologies for integrating digital media into a game or simulation.
- 40.0 Identify commonly used art and animation production tools in the game design industry.
- 41.0 Understand the general concepts of environmental design.
- 42.0 Describe how environmental design is used in conjunction with game level design.
- 43.0 Define the meaning of simulation and pertinent issues facing game designers.
- 44.0 Describe applied event modeling as it relates to game design.
- 45.0 Understand basic HCI principles.
- 46.0 Discuss the eight golden rules of HCI.
- 47.0 Understand the use of inventory systems in game design.
- 48.0 Understand the history of audio/sound effects in the entertainment industry.
- 49.0 Perform various job roles typical for an audio technician on a game/ simulation project.
- 50.0 Understand intellectual property rights, copyright laws, and plagiarism as they apply to creative assets.
- 51.0 Demonstrate a knowledge of production writing as it relates to game and simulation design.
- 52.0 Demonstrate appropriate voice acting skills.
- 53.0 Demonstrate basic audio production.
- 54.0 Set-up and configure a computer for audio applications.
- 55.0 Operate an audio workstation.
- 56.0 Demonstrate application of MIDI in a game/simulation project.
- 57.0 Incorporate audio assets into game/simulation engine.
- 58.0 Understand the history of video effects in the entertainment.
- 59.0 Understand the various job titles and responsibilities video technician as it relates to game and simulation design.
- 60.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets.
- 61.0 Demonstrate a knowledge of production writing as it relates to game and simulation design.

- 62.0 Demonstrate appropriate acting skills.
- 63.0 Demonstrate basic video production.
- 64.0 Demonstrate set-up and configuration of a computer for video applications.
- 65.0 Demonstrate the basic operation of a video workstation.
- 66.0 Incorporate video assets into game/simulation engine.
- 67.0 Demonstrate language arts knowledge and skills.
- 68.0 Demonstrate mathematics knowledge and skills.
- 69.0 Demonstrate science knowledge and skills.
- 70.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 71.0 Solve problems using critical thinking skills, creativity and innovation.
- 72.0 Use information technology tools.
- 73.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 74.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 75.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 76.0 Describe the importance of professional ethics and legal responsibilities.
- 77.0 Explain the importance of employability skill and entrepreneurship skills.
- 78.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Game, Simulation & Animation Audio/Video Effects  
**PSAV Number:** B082200

**Course Number:** DIG0070  
**Occupational Completion Point – A**  
**Game/Simulation Designer – 300 Hours – SOC Code 27-1021**

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

- 01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:
- 01.01 Use industry standard game design production documents to create a game design production plan.
- 02.0 Design and create a playable game. – The student will be able to:
- 02.01 Use a number of computer tools to enhance and ease game programming and artistry.
  - 02.02 Use a game engine to create a playable game.
  - 02.03 Use animated objects.
  - 02.04 Program sound and music to enhance the game experience.
  - 02.05 Test and debug the completed game.

**Critical Game & Simulation Studies**

- 03.0 Categorize the different gaming genres. – The student will be able to:
- 03.01 Research, compare and categorize the different gaming genres.
  - 03.02 Analyze examples of different gaming genres.
  - 03.03 Define and use the necessary vocabulary related to gaming and the different genres.
- 04.0 Categorize different gaming systems. – The student will be able to:
- 04.01 Research, compare and categorize different gaming systems.
  - 04.02 Analyze the distinctive features of each system.
  - 04.03 Define the target audience for different systems based on features, available games, and price of system and games.
  - 04.04 Define and use the necessary vocabulary related to gaming hardware.
- 05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:

- 05.01 Discuss the history of non-electronic games.
  - 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
  - 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.
- 06.0 Describe the trends in current and next-generation game development. – The student will be able to:
- 06.01 Determine and analyze the significant trends in game development in the past two decades.
  - 06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

- 07.0 Understand the role of play in human culture. – The student will be able to:
- 07.01 Discuss the word “play” and its many definitions.
  - 07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.
  - 07.03 Describe the history of play and its importance in developing societies and cultures.
  - 07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.
  - 07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.
- 08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:
- 08.01 Investigate studies that discuss the impact of violent games on children and adults.
  - 08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.
  - 08.03 Research and discuss differing opinions on video game addiction and what would define addiction.
  - 08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

- 09.0 Understand the business model commonly used in the game development industry. – The student will be able to:
- 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
  - 09.02 Identify and describe licensing management for different gaming platforms.
  - 09.03 Discuss the product value and business differences between major game platforms.

- 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.
- 10.0 Examine and categorize the significant processes in the production of interactive games.
  - The student will be able to:
    - 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
    - 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
    - 10.03 Explore and describe the effects of globalization on the design and production of video games.
- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:
  - 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
  - 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
  - 11.03 Explore and discuss methods of communications and scheduling for design teams.
  - 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.
- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:
  - 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
  - 12.02 Describe legal and liability issues that could affect online communities.
  - 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.
- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:
  - 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
  - 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
  - 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
  - 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

### **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:
- 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
  - 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:
- 15.01 Solicit and accept constructive criticism.
  - 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
  - 15.03 Collaborate with individuals and teams to complete tasks and solve problems.
- 16.0 Investigate career opportunities in the game industry. – The student will be able to:
- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  - 16.03 Describe job requirements for a variety of occupations within the game development industry.

### **Game & Simulation Analysis**

- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:
- 17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.
  - 17.02 Identify and define the vocabulary used by game players and online gaming communities.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:
- 18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.
  - 18.02 Research and evaluate the game analysis techniques used by the video game industry.
  - 18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.
  - 18.04 Evaluate professional reviews and write a critical analysis of a current video game.

- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:
- 19.01 Analyze and deconstruct game environments and interactions.
  - 19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

### **Game & Simulation Design**

- 20.0 Understand the general procedure and requirements of game design. – The student will be able to:
- 20.01 Describe the design process from conception to production.
  - 20.02 Discuss the iterative nature of game and simulation design.
  - 20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.
- 21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:
- 21.01 Research and define the term “player immersion”.
  - 21.02 Explore and explain the factors that create player immersion in a game.
  - 21.03 Examine popular games and explain the methods each game uses to increase player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:
- 22.01 Identify and discuss the popular game development tools currently used in the industry.
  - 22.02 Identify and discuss popular gaming engines.
  - 22.03 Research and analyze the uses for different game development tools.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:
- 23.01 Identify the different control systems for video games.
  - 23.02 Compare and contrast personal computer and video game console hardware.
  - 23.03 Explain the factors that can limit the game playing ability of personal computers.
  - 23.04 Chart the evolution of video game hardware over the past 20 years.

### **Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

- 24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:

- 24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.
- 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
- 24.03 Using a simple game development tool, create a game or simulation.
- 24.04 Present the game or simulation.

### **Design Essentials**

- 25.0 Describe the game development life cycle. – The student will be able to:
  - 25.01 Identify steps in the pre-production process including the proof of concept and market research.
  - 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
  - 25.03 Determine scripting requirements.
  - 25.04 Implement techniques of scenario development, levels, and missions.
  - 25.05 Discuss game testing requirements and methods.
  - 25.06 Identify and describe maintenance, upgrade and sequel issues.
- 26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:
  - 26.01 Identify the different control systems for video games.
  - 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
  - 26.03 Explain the factors that can limit the game-playing ability of personal computers.
- 27.0 Identify non-hardware development constraints. – The student will be able to:
  - 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
  - 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
  - 27.03 Describe societal and legal constraints affecting game and simulation design.

### **Game Design Documentation**

- 28.0 Understand the general principles of storytelling. – The student will be able to:
  - 28.01 Identify the essential elements of a story.
  - 28.02 Describe how creative writing is used as a game design tool.
  - 28.03 Compare and contrast methods of delivering a story in a game.
- 29.0 Understand the use of storyboarding in game design. – The student will be able to:
  - 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.
  - 29.02 Describe how game layout charts are used in game design.
  - 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.

29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.

30.0 Develop a game design document or blueprint. – The student will be able to:

- 30.01 Evaluate and discuss the choice of delivery system.
- 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
- 30.03 Create a game strategy overview, character overview, and storyboard overview.
- 30.04 Define the rules of play and multi-player options.
- 30.05 Create the layout and interfaces overview and digital media overview.
- 30.06 Determine the event modeling requirements and create the progression levels overview.
- 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
- 30.08 Identify hardware and software constraints.

### **Game Strategy**

31.0 Understand strategic outlining in game designs. – The student will be able to:

- 31.01 Assess techniques of goal design in gaming.
- 31.02 Describe the concept of nested victories.
- 31.03 Discuss the use of players as agents of change.
- 31.04 Compare and contrast examples of understandable context in gaming.
- 31.05 Discuss the principles underlying the creation of understandable rules.
- 31.06 Describe how skill building is used in game design.
- 31.07 Describe conventional techniques of positive feedback.
- 31.08 Discuss functional consistency as it relates to the use of interfaces.

32.0 Explore elements of puzzle design. – The student will be able to:

- 32.01 Describe the essential elements of a puzzle.
- 32.02 Identify the different types of puzzles.
- 32.03 Describe the basic principles of high-level puzzle design.
- 32.04 Describe the basic principles of low-level puzzle design.

33.0 Discuss key strategic considerations in game design. – The student will be able to:

- 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
- 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
- 33.03 Identify techniques used in the industry to help the player to navigate.
- 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
- 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.
- 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.

- 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

### **Rules of Play**

- 34.0 Understand the process of creating and designing player actions. – The student will be able to:
  - 34.01 Discuss the principles of player-centric design.
  - 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
  - 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
  - 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
  - 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.
  
- 35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:
  - 35.01 Identify techniques of introducing the story plot and beginning play.
  - 35.02 Describe story plot development techniques for the middle of play in game design.
  - 35.03 Analyze and discuss planning techniques for climax and finale of games.
  
- 36.0 Assess common principles and procedures in game flow design. – The student will be able to:
  - 36.01 Assess missions and scenarios game flow techniques.
  - 36.02 Describe common use of mission design and campaigns.
  - 36.03 Evaluate usage of static versus dynamic campaigns.
  
- 37.0 Describe rule creation elements of player challenge. – The student will be able to:
  - 37.01 Research common design methods for clearing obstacles or series of obstacles.
  - 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
  - 37.03 Identify common design elements used to vary weapons, characters and tools.
  - 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
  - 37.05 Evaluate industry use of boss encounters in games.
  - 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

### **Game Development Tools**

- 38.0 Identify tools and software commonly used in game development. – The student will be able to:
  - 38.01 Identify and discuss the popular game development tools currently used in the industry.

- 38.02 Identify and discuss popular gaming engines.
- 38.03 Identify and discuss popular world building tools.

### **Music, Sound, Art & Animation**

- 39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:
  - 39.01 Survey and discuss the use of naming conventions and temp sounds.
  - 39.02 Analyze and discuss methods of matching sound effects to art assets.
  - 39.03 Identify and categorize commonly used technology sound engine integration equipment.
  - 39.04 Identify and discuss resources such as sound effects libraries.
  - 39.05 Examine methods of sound implementation and associated software.
  - 39.06 Describe how and why digital video may be integrated into a game or simulation design.
  - 39.07 Describe how special effects differ from animation.
  
- 40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:
  - 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

### **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
  - 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
  
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
  - 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

### **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:

- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.
  - 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
  - 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:
- 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
  - 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
  - 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.
  - 44.04 Discuss the process of designing entities including behavior and entity graphics.
  - 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
  - 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
  - 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
  - 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
  - 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
  - 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
  - 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

### **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
- 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.
  - 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:

- 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
- 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
- 47.01 Discuss the various methods of describing items in player’s inventory in contemporary game design.
- 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 67.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 67.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 67.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 67.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 68.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 68.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 68.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 68.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 69.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 69.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 69.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 70.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 70.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 70.02 Locate, organize and reference written information from various sources. CM 3.0
- 70.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 70.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 70.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 70.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 70.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 71.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:

- 71.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 71.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 71.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 71.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 72.0 Use information technology tools. – The student will be able to:
- 72.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 72.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 72.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 72.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 73.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 73.01 Describe the nature and types of business organizations. SY 1.0
- 73.02 Explain the effect of key organizational systems on performance and quality.
- 73.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 73.04 Explain the impact of the global economy on business organizations.
- 76.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 76.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 76.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 76.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 76.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: DIG0073**  
**Occupational Completion Point – B**  
**Digital Media Artist – 150 Hours – SOC Code 27-1014**

- 48.0 Understand the history of audio/sound effects in the entertainment industry. – The student will be able to:
- 48.01 Discuss the role of sound in a visual presentation.
- 48.02 Describe how audio/sound effects can establish or reinforce the mood.
- 48.03 Explain the importance of production value.
- 48.04 Describe the evolution of audio/sound effects production.
- 48.05 Identify the technology incorporated into the production of sound.

- 49.0 Perform various job roles typical for an audio technician on a game/ simulation project.  
– The student will be able to:
- 49.01 Identify the job titles of audio technicians and artists typically involved in a game project.
  - 49.02 Work as part of a sound design team.
  - 49.03 Perform the role of the sound designer for a game/simulation project.
  - 49.04 Perform the role of music supervisor for a game/simulation project.
  - 49.05 Perform the role of Foley artist for a game/simulation project.
  - 49.06 Perform the role of voice actor for a game/simulation project.
  - 49.07 Perform the role of recording engineer for a game/simulation project.
  - 49.08 Perform the role of sound editor for a game/simulation project.
  - 49.09 Perform the role of composer/arranger for a game/simulation project.
- 50.0 Understand intellectual property rights, copyright laws, and plagiarism as they apply to creative assets. – The student will be able to:
- 50.01 Compare and contrast the doctrines of fair use and fair dealing.
  - 50.02 Describe the transfer and licensing of creative works.
  - 50.03 Explain the use of “exclusive rights” to intellectual creations.
  - 50.04 Use digital watermarking to embed copyright information in an audio file.
- 51.0 Demonstrate a knowledge of production writing as it relates to game and simulation design. – The student will be able to:
- 51.01 Explain the job of a scriptwriter and outline the elements of a script.
  - 51.02 Breakdown a script into audio production elements.
  - 51.03 Write simple dialog.
  - 51.04 Translate script elements into lyrics for a theme song.
  - 51.05 Write narration or instructions for game/simulation.
- 52.0 Demonstrate appropriate voice acting skills. – The student will be able to:
- 52.01 Read aloud in a professional manner.
  - 52.02 Receive and properly act upon direction given by the producer/director.
  - 52.03 Understand the concept of voice acting and playing a role while speaking.
  - 52.04 Perform various voice acting assignments in a professional manner according to industry standards.
- 53.0 Demonstrate basic audio production. – The student will be able to:
- 53.01 Describe digital audio storage concepts and digital storage media.
  - 53.02 Operate digital recording decks and other digital storage devices.
  - 53.03 Describe the function and operation of digital audio workstations.
  - 53.04 Edit, cut, erase, and insert sound utilizing various digital production techniques.
  - 53.05 Perform digital noise reduction and noise extraction via spectral display.
- 54.0 Set-up and configure a computer for audio applications. – The student will be able to:
- 54.01 Install basic peripheral devices related to audio programs.

- 54.02 Install and configure software related to audio programs.
  - 54.03 Demonstrate basic knowledge of computer system requirements.
  - 54.04 Install plug-ins or additional audio source material such as beats and or samples.
  - 54.05 Diagram the signal flow of a digital audio workstation.
- 55.0 Operate an audio workstation. – The student will be able to:
- 55.01 Demonstrate knowledge of the digital audio workstation interface.
  - 55.02 Create and arrange a multi-track project.
  - 55.03 Create interest and effect using editing techniques
  - 55.04 Design and edit audio using a waveform editor.
  - 55.05 Record audio directly to the digital audio workstation.
  - 55.06 Mix audio.
  - 55.07 Demonstrate skill in using audio effects and plug-ins.
  - 55.08 Prepare an audio project for finishing and final mix down.
  - 55.09 Transfer audio files between various audio software applications.
  - 55.10 Demonstrate the understanding of audio file bit depth, bandwidth and dithering and be able to explain when and where these apply in various applications of digital audio production.
  - 55.11 Export finished audio.
- 56.0 Demonstrate application of MIDI in a game/simulation project. – The student will be able to:
- 56.01 Demonstrate an understanding of MIDI.
  - 56.02 Discuss the advantage and use of MIDI in a game/simulation.
  - 56.03 Discuss the limitations of MIDI.
  - 56.04 Utilize a computer and multiple MIDI instruments.
  - 56.05 Record a single sound track; add multiple sound tracks, and change MIDI voices using the software.
  - 56.06 Export a MIDI soundtrack for use in a game/simulation
  - 56.07 Export a MIDI sound effect for use in a game/simulation
  - 56.08 Apply MIDI file to an object or game/simulation element.
- 57.0 Incorporate audio assets into game/simulation engine. – The student will be able to:
- 57.01 Describe the audio effects workflow.
  - 57.02 Explain audio codecs and formats used in game/simulation engines.
  - 57.03 Import audio into the game/simulation engine
  - 57.04 Use appropriate naming conventions for audio assets.
  - 57.05 Describe the use of 3D and surround sound.
  - 57.06 Apply knowledge of distance/spatial effects including surround sound in a game/simulation.
  - 57.07 Contrast the audio environment as it relates to the visual environment.
- 74.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 74.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.

- 74.02 Explain emergency procedures to follow in response to workplace accidents.
- 74.03 Create a disaster and/or emergency response plan. SHE 2.0
- 75.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 75.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 75.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 75.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 75.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 77.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 77.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 77.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 77.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 77.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 77.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 77.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 77.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 77.08 Research the benefits of ongoing professional development. ECD 9.0
- 77.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 78.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 78.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 78.02 Describe the effect of money management on personal and career goals. FL 3.0
- 78.03 Develop a personal budget and financial goals. FL 3.1
- 78.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 78.05 Maintain financial records. FL 3.3
- 78.06 Read and reconcile financial statements. FL 3.4
- 78.07 Research, compare and contrast investment opportunities.

**Course Number: DIG0074****Occupational Completion Point – C****Digital Media Specialist – 150 Hours – SOC Code 27-1014**

- 58.0 Understand the history of video effects in the entertainment. – The student will be able to:
- 58.01 Understand the role of video in a visual presentation.
- 58.02 Understand how video effects can establish or reinforce the mood.
- 58.03 Understand the importance of production value.
- 58.04 Understand the history of video effects production.

- 58.05 Understand the technology incorporated into the production video and video effects.
- 59.0 Understand the various job titles and responsibilities video technician as it relates to game and simulation design. – The student will be able to:
- 59.01 Identify the job titles of video technicians and artist game project.
  - 59.02 Demonstrate the ability to work as part of a video production team.
  - 59.03 Perform the role of the video technical director for a game/simulation project.
  - 59.04 Perform the role of video editor for a game/simulation project.
  - 59.05 Perform the role of camera operator for a game/simulation project.
  - 59.06 Perform the role of special effects coordinator for a game/simulation project.
  - 59.07 Perform the role of video recording operator for a game/simulation project.
  - 59.08 Perform the role of video effects artist for a game/simulation project.
  - 59.09 Perform the role of compositor for a game/simulation project.
- 60.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:
- 60.01 Understand the use of “Fair use and Fair Dealing”.
  - 60.02 Understand the transfer and licensing of creative works.
  - 60.03 Understand the use of “exclusive rights” to intellectual creations.
  - 60.04 Demonstrate the use of digital watermarking.
- 61.0 Demonstrate a knowledge of production writing as it relates to game and simulation design. – The student will be able to:
- 61.01 Explain the job of a scriptwriter and outline the elements of a script.
  - 61.02 Demonstrate ability to breakdown a script into video production elements.
  - 61.03 Demonstrate ability to write simple dialog.
  - 61.04 Demonstrate ability to translate script elements into production schedule.
  - 61.05 Demonstrate ability to write narration or instructions for game/simulation.
- 62.0 Demonstrate appropriate acting skills. – The student will be able to:
- 62.01 Demonstrate the ability to read aloud in a professional manner.
  - 62.02 Demonstrate the ability to receive and properly act upon direction given by the producer/director.
  - 62.03 Understand the concept of acting and playing a role while speaking.
  - 62.04 Perform the various assignments in a professional manner according to industry standards.
- 63.0 Demonstrate basic video production. – The student will be able to:
- 63.01 Use current industry standard production video equipment.
  - 63.02 Operate camera in studio and location (field) production environments.
  - 63.03 Demonstrate understanding of digital video storage concepts and digital storage media.
  - 63.04 Demonstrate knowledge of and the ability to operate digital recording decks, and other digital storage devices.
  - 63.05 Identify and select microphones for production needs.

- 63.06 Determine appropriate lighting needs for production settings.
- 63.07 Identify location and studio lighting types, method of use and application.
- 64.0 Demonstrate set-up and configuration of a computer for video applications. – The student will be able to:
  - 64.01 Install basic peripheral devices related to video programs.
  - 64.02 Install and configure software related to video programs.
  - 64.03 Demonstrate basic knowledge of computer system requirements.
  - 64.04 Demonstrate basic knowledge of installing plug-ins or additional audio source material such as beats and or samples.
  - 64.05 Understand the signal flow of a digital video workstation.
- 65.0 Demonstrate the basic operation of a video workstation. – The student will be able to:
  - 65.01 Demonstrate knowledge of the digital video workstation interface.
  - 65.02 Demonstrate a working familiarity and understanding of the function and operation of digital video workstations.
  - 65.03 Demonstrate ability to edit, cut, erase, and insert video utilizing various digital production techniques.
  - 65.04 Record video directly to the digital video workstation.
  - 65.05 Demonstrate knowledge of editing video according to message.
  - 65.06 Demonstrate skill in using video effects and plug-ins.
  - 65.07 Prepare a video project for final compositing and export.
  - 65.08 Transfer video files between various video software applications.
  - 65.09 Export finished video.
- 66.0 Incorporate video assets into game/simulation engine. – The student will be able to:
  - 66.01 Demonstrate knowledge of the video effects workflow.
  - 66.02 Demonstrate knowledge of video codecs and formats used in game/simulation engines.
  - 66.03 Demonstrate knowledge and ability to import video into the game/simulation engine
  - 66.04 Use appropriate naming conventions for video assets.
  - 66.05 Understand the use of placing video assets into a 3D environment.
  - 66.06 Demonstrate knowledge of distance/spatial video effects in relation to sound effects in a game/simulation.
  - 66.07 Understand the audio environment as it relates to the visual environment.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Foundations  
**Course Number:** 8208110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to game and simulation concepts and careers, the impact game and simulation has on society and industry, and basic game/simulation design concepts such as rule design, play mechanics, and media integration. This course compares and contrasts games and simulations, key development methodologies and tools, careers, and industry-related information. This course also covers strategies, processes, and methods for conceptualizing a game or simulation application; storyboarding techniques; and development tools.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. Regardless of topic sequencing, the culminating activity is the creation of a playable game.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	12/36 33%	<b>Biology 1</b>	3/56 5%	<b>Anatomy/Physiology Honors</b>	1/53 2%	<b>Astronomy Solar/Galactic Honors</b>	13/52 25%
<b>Algebra 2</b>	3/41 7%	<b>Chemistry 1</b>	17/55 31%	<b>Genetics</b>	3/35 9%	<b>Marine Science 1 Honors</b>	14/42 33%
<b>Geometry</b>	#	<b>Physics 1</b>	24/53 45%	<b>Earth-Space Science</b>	14/58 24%	<b>Physical Science</b>	21/56 38%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:

01.01 Use industry standard game design production documents to create a game design production plan.

- 02.0 Design and create a playable game. – The student will be able to:
- 02.01 Use a number of computer tools to enhance and ease game programming and artistry.
  - 02.02 Use a game engine to create a playable game.
  - 02.03 Use animated objects.
  - 02.04 Program sound and music to enhance the game experience.
  - 02.05 Test and debug the completed game.

### **Critical Game & Simulation Studies**

- 03.0 Categorize the different gaming genres. – The student will be able to:
- 03.01 Research, compare and categorize the different gaming genres.
  - 03.02 Analyze examples of different gaming genres.
  - 03.03 Define and use the necessary vocabulary related to gaming and the different genres.
- 04.0 Categorize different gaming systems. – The student will be able to:
- 04.01 Research, compare and categorize different gaming systems.
  - 04.02 Analyze the distinctive features of each system.
  - 04.03 Define the target audience for different systems based on features, available games, and price of system and games.
  - 04.04 Define and use the necessary vocabulary related to gaming hardware.
- 05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:
- 05.01 Discuss the history of non-electronic games.
  - 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
  - 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.
- 06.0 Describe the trends in current and next-generation game development. – The student will be able to:
- 06.01 Determine and analyze the significant trends in game development in the past two decades.
  - 06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

- 07.0 Understand the role of play in human culture. – The student will be able to:
- 07.01 Discuss the word “play” and its many definitions.
  - 07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.

- 07.03 Describe the history of play and its importance in developing societies and cultures.
  - 07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.
  - 07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.
- 08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:
- 08.01 Investigate studies that discuss the impact of violent games on children and adults.
  - 08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.
  - 08.03 Research and discuss differing opinions on video game addiction and what would define addiction.
  - 08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

- 09.0 Understand the business model commonly used in the game development industry. – The student will be able to:
- 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
  - 09.02 Identify and describe licensing management for different gaming platforms.
  - 09.03 Discuss the product value and business differences between major game platforms.
  - 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.
- 10.0 Examine and categorize the significant processes in the production of interactive games. – The student will be able to:
- 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
  - 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
  - 10.03 Explore and describe the effects of globalization on the design and production of video games.
- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:
- 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
  - 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
  - 11.03 Explore and discuss methods of communications and scheduling for design teams.

- 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.
- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:
  - 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
  - 12.02 Describe legal and liability issues that could affect online communities.
  - 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.
- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:
  - 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
  - 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
  - 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
  - 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

### **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:
  - 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
  - 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:
  - 15.01 Solicit and accept constructive criticism.
  - 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
  - 15.03 Collaborate with individuals and teams to complete tasks and solve problems.
- 16.0 Investigate career opportunities in the game industry. – The student will be able to:

- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
- 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 16.03 Describe job requirements for a variety of occupations within the game development industry.

### **Game & Simulation Analysis**

- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:
  - 17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.
  - 17.02 Identify and define the vocabulary used by game players and online gaming communities.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:
  - 18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.
  - 18.02 Research and evaluate the game analysis techniques used by the video game industry.
  - 18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.
  - 18.04 Evaluate professional reviews and write a critical analysis of a current video game.
- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:
  - 19.01 Analyze and deconstruct game environments and interactions.
  - 19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

### **Game & Simulation Design**

- 20.0 Understand the general procedure and requirements of game design. – The student will be able to:
  - 20.01 Describe the design process from conception to production.
  - 20.02 Discuss the iterative nature of game and simulation design.
  - 20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.
- 21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:
  - 21.01 Research and define the term “player immersion”.

- 21.02 Explore and explain the factors that create player immersion in a game.
- 21.03 Examine popular games and explain the methods each game uses to increase player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:
- 22.01 Identify and discuss the popular game development tools currently used in the industry.
- 22.02 Identify and discuss popular gaming engines.
- 22.03 Research and analyze the uses for different game development tools.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:
- 23.01 Identify the different control systems for video games.
- 23.02 Compare and contrast personal computer and video game console hardware.
- 23.03 Explain the factors that can limit the game playing ability of personal computers.
- 23.04 Chart the evolution of video game hardware over the past 20 years.
- 67.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 67.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 67.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 67.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 68.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 68.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 68.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 68.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 69.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 69.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 69.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Design  
**Course Number:** 8208120  
**Course Credit:** 1

**Course Description:**

This course covers fundamental principles of designing a game or a simulation application, in particular Human Computer Interface (HCI) principles, rules and strategies of play, conditional branching, design and development constraints, use of sound and animation, design tools, and implementation issues. The content includes market research, product design documentation, storyboarding, proposal development, and presentation of a project report. Emphasis is placed on the techniques needed to develop well-documented, structured game or simulation programs. Extensive use is made of evaluating and analyzing existing games or simulations.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. **Regardless of topic sequencing, the culminating activity is the creation and presentation of a playable game with design documentation.**

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	2/36 6%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	8/52 15%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	9/55 16%	<b>Genetics</b>	1/35 3%	<b>Marine Science 1 Honors</b>	3/42 7%
<b>Geometry</b>	5/45 11%	<b>Physics 1</b>	15/53 28%	<b>Earth-Space Science</b>	6/58 10%	<b>Physical Science</b>	14/56 25%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

**Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:

24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.

- 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
- 24.03 Using a simple game development tool, create a game or simulation.
- 24.04 Present the game or simulation.

### **Design Essentials**

- 25.0 Describe the game development life cycle. – The student will be able to:
  - 25.01 Identify steps in the pre-production process including the proof of concept and market research.
  - 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
  - 25.03 Determine scripting requirements.
  - 25.04 Implement techniques of scenario development, levels, and missions.
  - 25.05 Discuss game testing requirements and methods.
  - 25.06 Identify and describe maintenance, upgrade and sequel issues.
  
- 26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:
  - 26.01 Identify the different control systems for video games.
  - 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
  - 26.03 Explain the factors that can limit the game-playing ability of personal computers.
  
- 27.0 Identify non-hardware development constraints. – The student will be able to:
  - 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
  - 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
  - 27.03 Describe societal and legal constraints affecting game and simulation design.

### **Game Design Documentation**

- 28.0 Understand the general principles of storytelling. – The student will be able to:
  - 28.01 Identify the essential elements of a story.
  - 28.02 Describe how creative writing is used as a game design tool.
  - 28.03 Compare and contrast methods of delivering a story in a game.
  
- 29.0 Understand the use of storyboarding in game design. – The student will be able to:
  - 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.
  - 29.02 Describe how game layout charts are used in game design.
  - 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.

29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.

30.0 Develop a game design document or blueprint. – The student will be able to:

- 30.01 Evaluate and discuss the choice of delivery system.
- 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
- 30.03 Create a game strategy overview, character overview, and storyboard overview.
- 30.04 Define the rules of play and multi-player options.
- 30.05 Create the layout and interfaces overview and digital media overview.
- 30.06 Determine the event modeling requirements and create the progression levels overview.
- 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
- 30.08 Identify hardware and software constraints.

### **Game Strategy**

31.0 Understand strategic outlining in game designs. – The student will be able to:

- 31.01 Assess techniques of goal design in gaming.
- 31.02 Describe the concept of nested victories.
- 31.03 Discuss the use of players as agents of change.
- 31.04 Compare and contrast examples of understandable context in gaming.
- 31.05 Discuss the principles underlying the creation of understandable rules.
- 31.06 Describe how skill building is used in game design.
- 31.07 Describe conventional techniques of positive feedback.
- 31.08 Discuss functional consistency as it relates to the use of interfaces.

32.0 Explore elements of puzzle design. – The student will be able to:

- 32.01 Describe the essential elements of a puzzle.
- 32.02 Identify the different types of puzzles.
- 32.03 Describe the basic principles of high-level puzzle design.
- 32.04 Describe the basic principles of low-level puzzle design.

33.0 Discuss key strategic considerations in game design. – The student will be able to:

- 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
- 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
- 33.03 Identify techniques used in the industry to help the player to navigate.
- 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
- 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.
- 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.

- 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

### **Rules of Play**

- 34.0 Understand the process of creating and designing player actions. – The student will be able to:
  - 34.01 Discuss the principles of player-centric design.
  - 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
  - 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
  - 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
  - 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.
  
- 35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:
  - 35.01 Identify techniques of introducing the story plot and beginning play.
  - 35.02 Describe story plot development techniques for the middle of play in game design.
  - 35.03 Analyze and discuss planning techniques for climax and finale of games.
  
- 36.0 Assess common principles and procedures in game flow design. – The student will be able to:
  - 36.01 Assess missions and scenarios game flow techniques.
  - 36.02 Describe common use of mission design and campaigns.
  - 36.03 Evaluate usage of static versus dynamic campaigns.
  
- 37.0 Describe rule creation elements of player challenge. – The student will be able to:
  - 37.01 Research common design methods for clearing obstacles or series of obstacles.
  - 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
  - 37.03 Identify common design elements used to vary weapons, characters and tools.
  - 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
  - 37.05 Evaluate industry use of boss encounters in games.
  - 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

### **Game Development Tools**

- 38.0 Identify tools and software commonly used in game development. – The student will be able to:
  - 38.01 Identify and discuss the popular game development tools currently used in the industry.

- 38.02 Identify and discuss popular gaming engines.
- 38.03 Identify and discuss popular world building tools.

### **Music, Sound, Art & Animation**

- 39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:
  - 39.01 Survey and discuss the use of naming conventions and temp sounds.
  - 39.02 Analyze and discuss methods of matching sound effects to art assets.
  - 39.03 Identify and categorize commonly used technology sound engine integration equipment.
  - 39.04 Identify and discuss resources such as sound effects libraries.
  - 39.05 Examine methods of sound implementation and associated software.
  - 39.06 Describe how and why digital video may be integrated into a game or simulation design.
  - 39.07 Describe how special effects differ from animation.
  
- 40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:
  - 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

### **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
  - 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
  
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
  - 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

### **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:

- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.
  - 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
  - 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:
- 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
  - 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
  - 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.
  - 44.04 Discuss the process of designing entities including behavior and entity graphics.
  - 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
  - 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
  - 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
  - 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
  - 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
  - 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
  - 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

### **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
- 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.
  - 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:

- 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
- 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
- 47.01 Discuss the various methods of describing items in player’s inventory in contemporary game design.
- 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 70.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 70.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 70.02 Locate, organize and reference written information from various sources. CM 3.0
- 70.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 70.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 70.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 70.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 70.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 71.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 71.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 71.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 71.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 71.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 72.0 Use information technology tools. – The student will be able to:
- 72.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 72.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 72.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 72.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 73.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:

- 73.01 Describe the nature and types of business organizations. SY 1.0
  - 73.02 Explain the effect of key organizational systems on performance and quality.
  - 73.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 73.04 Explain the impact of the global economy on business organizations.
- 76.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 76.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 76.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
  - 76.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
  - 76.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Audio/Sound Effects  
**Course Number:** 8208230  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring skills in designing, producing, editing, and integrating audio and sound effects into a game or simulation application.

48.0 Understand the history of audio/sound effects in the entertainment industry. – The student will be able to:

- 48.01 Discuss the role of sound in a visual presentation.
- 48.02 Describe how audio/sound effects can establish or reinforce the mood.
- 48.03 Explain the importance of production value.
- 48.04 Describe the evolution of audio/sound effects production.
- 48.05 Identify the technology incorporated into the production of sound.

49.0 Perform various job roles typical for an audio technician on a game/ simulation project. – The student will be able to:

- 49.01 Identify the job titles of audio technicians and artists typically involved in a game project.
- 49.02 Work as part of a sound design team.
- 49.03 Perform the role of the sound designer for a game/simulation project.
- 49.04 Perform the role of music supervisor for a game/simulation project.
- 49.05 Perform the role of Foley artist for a game/simulation project.
- 49.06 Perform the role of voice actor for a game/simulation project.
- 49.07 Perform the role of recording engineer for a game/simulation project.
- 49.08 Perform the role of sound editor for a game/simulation project.
- 49.09 Perform the role of composer/arranger for a game/simulation project.

50.0 Understand intellectual property rights, copyright laws, and plagiarism as they apply to creative assets. – The student will be able to:

- 50.01 Compare and contrast the doctrines of fair use and fair dealing.
- 50.02 Describe the transfer and licensing of creative works.
- 50.03 Explain the use of “exclusive rights” to intellectual creations.
- 50.04 Use digital watermarking to embed copyright information in an audio file.

51.0 Demonstrate a knowledge of production writing as it relates to game and simulation design. – The student will be able to:

- 51.01 Explain the job of a scriptwriter and outline the elements of a script.
- 51.02 Breakdown a script into audio production elements.
- 51.03 Write simple dialog.
- 51.04 Translate script elements into lyrics for a theme song.

- 51.05 Write narration or instructions for game/simulation.
- 52.0 Demonstrate appropriate voice acting skills. – The student will be able to:
  - 52.01 Read aloud in a professional manner.
  - 52.02 Receive and properly act upon direction given by the producer/director.
  - 52.03 Understand the concept of voice acting and playing a role while speaking.
  - 52.04 Perform various voice acting assignments in a professional manner according to industry standards.
- 53.0 Demonstrate basic audio production. – The student will be able to:
  - 53.01 Describe digital audio storage concepts and digital storage media.
  - 53.02 Operate digital recording decks and other digital storage devices.
  - 53.03 Describe the function and operation of digital audio workstations.
  - 53.04 Edit, cut, erase, and insert sound utilizing various digital production techniques.
  - 53.05 Perform digital noise reduction and noise extraction via spectral display.
- 54.0 Set-up and configure a computer for audio applications. – The student will be able to:
  - 54.01 Install basic peripheral devices related to audio programs.
  - 54.02 Install and configure software related to audio programs.
  - 54.03 Demonstrate basic knowledge of computer system requirements.
  - 54.04 Install plug-ins or additional audio source material such as beats and or samples.
  - 54.05 Diagram the signal flow of a digital audio workstation.
- 55.0 Operate an audio workstation. – The student will be able to:
  - 55.01 Demonstrate knowledge of the digital audio workstation interface.
  - 55.02 Create and arrange a multi-track project.
  - 55.03 Create interest and effect using editing techniques
  - 55.04 Design and edit audio using a waveform editor.
  - 55.05 Record audio directly to the digital audio workstation.
  - 55.06 Mix audio.
  - 55.07 Demonstrate skill in using audio effects and plug-ins.
  - 55.08 Prepare an audio project for finishing and final mix down.
  - 55.09 Transfer audio files between various audio software applications.
  - 55.10 Demonstrate the understanding of audio file bit depth, bandwidth and dithering and be able to explain when and where these apply in various applications of digital audio production.
  - 55.11 Export finished audio.
- 56.0 Demonstrate application of MIDI in a game/simulation project. – The student will be able to:
  - 56.01 Demonstrate an understanding of MIDI.
  - 56.02 Discuss the advantage and use of MIDI in a game/simulation.
  - 56.03 Discuss the limitations of MIDI.
  - 56.04 Utilize a computer and multiple MIDI instruments.
  - 56.05 Record a single sound track; add multiple sound tracks, and change MIDI voices using the software.

- 56.06 Export a MIDI soundtrack for use in a game/simulation
- 56.07 Export a MIDI sound effect for use in a game/simulation
- 56.08 Apply MIDI file to an object or game/simulation element.
- 57.0 Incorporate audio assets into game/simulation engine. – The student will be able to:
- 57.01 Describe the audio effects workflow.
- 57.02 Explain audio codecs and formats used in game/simulation engines.
- 57.03 Import audio into the game/simulation engine
- 57.04 Use appropriate naming conventions for audio assets.
- 57.05 Describe the use of 3D and surround sound.
- 57.06 Apply knowledge of distance/spatial effects including surround sound in a game/simulation.
- 57.07 Contrast the audio environment as it relates to the visual environment.
- 74.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 74.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 74.02 Explain emergency procedures to follow in response to workplace accidents.
- 74.03 Create a disaster and/or emergency response plan. SHE 2.0
- 75.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 75.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 75.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 75.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 75.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 77.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 77.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 77.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 77.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 77.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 77.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 77.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 77.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 77.08 Research the benefits of ongoing professional development. ECD 9.0
- 77.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 78.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:

- |       |  |        |
|-------|--|--------|
| 78.01 | Identify and describe the services and legal responsibilities of financial institutions. | FL 2.0 |
| 78.02 | Describe the effect of money management on personal and career goals.                    | FL 3.0 |
| 78.03 | Develop a personal budget and financial goals.   | FL 3.1 |
| 78.04 | Complete financial instruments for making deposits and withdrawals.                      | FL 3.2 |
| 78.05 | Maintain financial records.  | FL 3.3 |
| 78.06 | Read and reconcile financial statements.   | FL 3.4 |
| 78.07 | Research, compare and contrast investment opportunities.                                 |        |

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Video/Special Effects  
**Course Number:** 82082400  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring skills in designing, producing, editing, and integrating video and special effects into a game or simulation application.

58.0 Understand the history of video effects in the entertainment. – The student will be able to:

- 58.01 Understand the role of video in a visual presentation.
- 58.02 Understand how video effects can establish or reinforce the mood.
- 58.03 Understand the importance of production value.
- 58.04 Understand the history of video effects production.
- 58.05 Understand the technology incorporated into the production video and video effects.

59.0 Understand the various job titles and responsibilities video technician as it relates to game and simulation design. – The student will be able to:

- 59.01 Identify the job titles of video technicians and artist game project.
- 59.02 Demonstrate the ability to work as part of a video production team.
- 59.03 Perform the role of the video technical director for a game/simulation project.
- 59.04 Perform the role of video editor for a game/simulation project.
- 59.05 Perform the role of camera operator for a game/simulation project.
- 59.06 Perform the role of special effects coordinator for a game/simulation project.
- 59.07 Perform the role of video recording operator for a game/simulation project.
- 59.08 Perform the role of video effects artist for a game/simulation project.
- 59.09 Perform the role of compositor for a game/simulation project.

60.0 Understand intellectual property rights, copyright laws and plagiarism as it applies to creative assets. – The student will be able to:

- 60.01 Understand the use of “Fair use and Fair Dealing”.
- 60.02 Understand the transfer and licensing of creative works.
- 60.03 Understand the use of “exclusive rights” to intellectual creations.
- 60.04 Demonstrate the use of digital watermarking.

61.0 Demonstrate a knowledge of production writing as it relates to game and simulation design.–The student will be able to:

- 61.01 Explain the job of a scriptwriter and outline the elements of a script.
- 61.02 Demonstrate ability to breakdown a script into video production elements.
- 61.03 Demonstrate ability to write simple dialog.

- 61.04 Demonstrate ability to translate script elements into production schedule.
- 61.05 Demonstrate ability to write narration or instructions for game/simulation.
- 62.0 Demonstrate appropriate acting skills. – The student will be able to:
  - 62.01 Demonstrate the ability to read aloud in a professional manner.
  - 62.02 Demonstrate the ability to receive and properly act upon direction given by the producer/director.
  - 62.03 Understand the concept of acting and playing a role while speaking.
  - 62.04 Perform the various assignments in a professional manner according to industry standards.
- 63.0 Demonstrate basic video production. – The student will be able to:
  - 63.01 Use current industry standard production video equipment.
  - 63.02 Operate camera in studio and location (field) production environments.
  - 63.03 Demonstrate understanding of digital video storage concepts and digital storage media.
  - 63.04 Demonstrate knowledge of and the ability to operate digital recording decks, and other digital storage devices.
  - 63.05 Identify and select microphones for production needs.
  - 63.06 Determine appropriate lighting needs for production settings.
  - 63.07 Identify location and studio lighting types, method of use and application.
- 64.0 Demonstrate set-up and configuration of a computer for video applications. – The student will be able to:
  - 64.01 Install basic peripheral devices related to video programs.
  - 64.02 Install and configure software related to video programs.
  - 64.03 Demonstrate basic knowledge of computer system requirements.
  - 64.04 Demonstrate basic knowledge of installing plug-ins or additional audio source material such as beats and or samples.
  - 64.05 Understand the signal flow of a digital video workstation.
- 65.0 Demonstrate the basic operation of a video workstation. – The student will be able to:
  - 65.01 Demonstrate knowledge of the digital video workstation interface.
  - 65.02 Demonstrate a working familiarity and understanding of the function and operation of digital video workstations.
  - 65.03 Demonstrate ability to edit, cut, erase, and insert video utilizing various digital production techniques.
  - 65.04 Record video directly to the digital video workstation.
  - 65.05 Demonstrate knowledge of editing video according to message.
  - 65.06 Demonstrate skill in using video effects and plug-ins.
  - 65.07 Prepare a video project for final compositing and export.
  - 65.08 Transfer video files between various video software applications.
  - 65.09 Export finished video.
- 66.0 Incorporate video assets into game/simulation engine. – The student will be able to:
  - 66.01 Demonstrate knowledge of the video effects workflow.

- 66.02 Demonstrate knowledge of video codecs and formats used in game/simulation engines.
- 66.03 Demonstrate knowledge and ability to import video into the game/simulation engine
- 66.04 Use appropriate naming conventions for video assets.
- 66.05 Understand the use of placing video assets into a 3D environment.
- 66.06 Demonstrate knowledge of distance/spatial video effects in relation to sound effects in a game/simulation.
- 66.07 Understand the audio environment as it relates to the visual environment.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Game/Simulation/Animation Programming  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>
Program Number	8208300	B082300
CIP Number	0550041116	0550041116
Grade Level	9-12, 30, 31	30, 31

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as a Game/Simulation Designer, Game Programmer, and Game Software Developer in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and

knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to practical experiences in game/simulation conceptualization, design, storyboarding, development methodologies, essential programming techniques, and implementation issues. Specialized programming skills involving advanced mathematical calculations and physics are also integrated into the curriculum.

### Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. Students enrolling in this program must be computer literate. This literacy can be achieved by completing one credit of the Business Technology Education core. This includes Computing for College & Careers (8209020) or Introduction to Information Technology (8207310). It is also recommended that students complete core courses in advanced mathematics and physics. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	DIG0070	Game/Simulation Designer	300	15-1099.13
B	DIG0075	Game/Simulation Programmer	150	15-1021
C	DIG0076	Game/Simulation Software Developer	150	15-1021

\* Note: OTA0040 is a highly recommended core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8208110	Game & Simulation Foundations	1 credit	27-1021	2
	8208120	Game & Simulation Design	1 credit		
B	8208330	Game & Simulation Programming	1 credit	15-1021	2
C	8208340	Multi-User Game & Simulation Programming	1 credit	15-1041	2

\* Note: It is highly recommended that students complete the BTE Core, either Computing for College and Careers (8209020) or Introduction to Information Technology (8207310), prior to or concurrently with the first two courses.

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Game & Simulation Foundations	12/36 33%	3/41 7%	#	3/53 5%	13/52 25%	3/56 5%	17/52 31%	14/58 24%	3/35 9%	14/42 33%	21/56 38%	24/53 45%
Game & Simulation Design	2/36 6%	#	5/45 11%	2/53 4%	8/52 15%	2/56 4%	9/52 16%	6/58 10%	1/35 3%	3/42 7%	14/56 25%	15/53 28%
Game & Simulation Programming	2/36 6%	#	4/45 9%	2/53 4%	2/52 4%	2/56 4%	2/52 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Multi-User Game & Simulation Programming	1/36 2%	#	2/45 4%	3/53 5%	12/52 23%	3/56 5%	11/52 20%	10/58 17%	2/35 6%	9/42 21%	14/56 25%	18/53 34%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### Program Recommendations

This program is project-based and focuses on broad, transferable skills and stresses understanding and demonstration of the following rudiments of the game and simulation

industry: production planning, elements of production design, storyboarding, elements of visual design, integration of digital audio and digital video into new game/simulation productions, programming for single and multi-user environments, delivery systems, and collaboration/teamwork.

The Foundations and Design courses should be taken in sequence prior to the Programming and Multi-User Programming courses. The Programming and Multi-User Programming courses may be taken concurrently. It is highly recommended that students complete a programming course prior to taking the last two courses of this program. The BTE core course may be taken concurrently with either the Foundations course or the Design course.

The Programming (8208330) and Multiuser Programming (8208340) courses should be offered with a concentration on one programming language to ensure students are prepared for industry certifications.

The Game/Simulation/Animation Advanced Applications program (8208400) is an appropriate follow-on capstone program.

The Game/Simulation/Animation Programming program lends itself to integration of the core academic subjects of language arts, math, science, visual arts, and social studies into project activities. It is through a balanced and integrated curriculum that students attain the attitudes, skills, and knowledge needed to compete successfully in today's work force. To achieve total curriculum integration, academic and career and technical education teachers should be scheduled with common planning times.

This program emphasizes the development of technical abilities as well as ethical and societal awareness necessary to function in a highly technological society. The use of cooperative learning groups is recommended. By learning and practicing group process skills, students will be prepared to work "together" in real work situations. Program graduates will develop enhanced self-esteem as well as the problem solving and teamwork skills necessary to succeed in careers and postsecondary education.

The Game/Simulation/Animation Programming program places a strong emphasis on workplace learning. Job shadowing and mentoring experiences with game and simulation professionals along with on-site trips to local businesses connect classroom learning to the workplace. In-class guest speakers bring the real world into the classroom.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills to secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10.0, Language 10.0, and Reading 10.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game.
- 02.0 Design and create a playable game.
- 03.0 Categorize the different gaming genres.
- 04.0 Categorize different gaming systems.
- 05.0 Understand the historical significance of electronic and non-electronic games.

- 06.0 Describe the trends in current and next-generation game development.
- 07.0 Understand the role of play in human culture.
- 08.0 Understand the psychological impact of games on individuals and groups.
- 09.0 Understand the business model commonly used in the game development industry.
- 10.0 Examine and categorize the significant processes in the production of interactive games.
- 11.0 Understand the core tasks and challenges that face a video game design team.
- 12.0 Understand legal issues that affect games, developers and players.
- 13.0 Describe the impact of the video game industry on the economy.
- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace.
- 16.0 Investigate career opportunities in the game industry.
- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow, and game design.
- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game.
- 20.0 Understand the general procedure and requirements of game design.
- 21.0 Explore the methods used to create and sustain player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMax, and different gaming engines.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices.
- 24.0 Create a working game or simulation individually or as part of a team.
- 25.0 Describe the game development life cycle.
- 26.0 Identify hardware constraints on video games including processors and I/O devices.
- 27.0 Identify non-hardware development constraints.
- 28.0 Understand the general principles of storytelling.
- 29.0 Understand the use of storyboarding in game design.
- 30.0 Develop a game design document or blueprint.
- 31.0 Understand strategic outlining in game designs.
- 32.0 Explore elements of puzzle design.
- 33.0 Discuss key strategic considerations in game design.
- 34.0 Understand the process of creating and designing player actions.
- 35.0 Create and design the game flow as it relates to story and plot.
- 36.0 Assess common principles and procedures in game flow design.
- 37.0 Describe rule creation elements of player challenge.
- 38.0 Identify tools and software commonly used in game development.
- 39.0 Understand the methodologies for integrating digital media into a game or simulation.
- 40.0 Identify commonly used art and animation production tools in the game design industry.
- 41.0 Understand the general concepts of environmental design.
- 42.0 Describe how environmental design is used in conjunction with game level design.
- 43.0 Define the meaning of simulation and pertinent issues facing game designers.
- 44.0 Describe applied event modeling as it relates to game design.
- 45.0 Understand basic HCI principles.
- 46.0 Discuss the eight golden rules of HCI.
- 47.0 Understand the use of inventory systems in game design.
- 48.0 Identify functions of information processing.
- 49.0 Test programs.
- 50.0 Plan program design.
- 51.0 Code programs.

- 52.0 Perform program maintenance.
- 53.0 Create and maintain documentation.
- 54.0 Evaluate assigned game programming tasks.
- 55.0 Implement enhanced program structures.
- 56.0 Identify and describe basic network terminology and network security.
- 57.0 Game configuration.
- 58.0 Test programs.
- 59.0 Plan program design.
- 60.0 Create and maintain documentation.
- 61.0 Code programs.
- 62.0 Demonstrate an understanding of operating systems, environments, and platforms.
- 63.0 Implement enhanced program structures.
- 64.0 Implement multimedia programming.
- 65.0 Develop an understanding of programming techniques and concepts.
- 66.0 Demonstrate language arts knowledge and skills.
- 67.0 Demonstrate mathematics knowledge and skills.
- 68.0 Demonstrate science knowledge and skills.
- 69.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 70.0 Solve problems using critical thinking skills, creativity and innovation.
- 71.0 Use information technology tools.
- 72.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 73.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 74.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 75.0 Describe the importance of professional ethics and legal responsibilities.
- 76.0 Explain the importance of employability skill and entrepreneurship skills.
- 77.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Game, Simulation, Animation Programming  
**PSAV Number:** B082300

**Course Number:** DIG0070  
**Occupational Completion Point:** A  
**Game/Simulation Designer – 300 Hours – SOC Code 15-1099.13**

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

- 01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:
- 01.01 Use industry standard game design production documents to create a game design production plan.
- 02.0 Design and create a playable game. – The student will be able to:
- 02.01 Use a number of computer tools to enhance and ease game programming and artistry.
  - 02.02 Use a game engine to create a playable game.
  - 02.03 Use animated objects.
  - 02.04 Program sound and music to enhance the game experience.
  - 02.05 Test and debug the completed game.

**Critical Game & Simulation Studies**

- 03.0 Categorize the different gaming genres. – The student will be able to:
- 03.01 Research, compare and categorize the different gaming genres.
  - 03.02 Analyze examples of different gaming genres.
  - 03.03 Define and use the necessary vocabulary related to gaming and the different genres.
- 04.0 Categorize different gaming systems. – The student will be able to:
- 04.01 Research, compare and categorize different gaming systems.
  - 04.02 Analyze the distinctive features of each system.
  - 04.03 Define the target audience for different systems based on features, available games, and price of system and games.
  - 04.04 Define and use the necessary vocabulary related to gaming hardware.
- 05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:

- 05.01 Discuss the history of non-electronic games.
  - 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
  - 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.
- 06.0 Describe the trends in current and next-generation game development. – The student will be able to:
- 06.01 Determine and analyze the significant trends in game development in the past two decades.
  - 06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

- 07.0 Understand the role of play in human culture. – The student will be able to:
- 07.01 Discuss the word “play” and its many definitions.
  - 07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.
  - 07.03 Describe the history of play and its importance in developing societies and cultures.
  - 07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.
  - 07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.
- 08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:
- 08.01 Investigate studies that discuss the impact of violent games on children and adults.
  - 08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.
  - 08.03 Research and discuss differing opinions on video game addiction and what would define addiction.
  - 08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

- 09.0 Understand the business model commonly used in the game development industry. – The student will be able to:
- 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
  - 09.02 Identify and describe licensing management for different gaming platforms.
  - 09.03 Discuss the product value and business differences between major game platforms.

- 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.
- 10.0 Examine and categorize the significant processes in the production of interactive games.
  - The student will be able to:
    - 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
    - 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
    - 10.03 Explore and describe the effects of globalization on the design and production of video games.
- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:
  - 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
  - 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
  - 11.03 Explore and discuss methods of communications and scheduling for design teams.
  - 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.
- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:
  - 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
  - 12.02 Describe legal and liability issues that could affect online communities.
  - 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.
- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:
  - 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
  - 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
  - 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
  - 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

### **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:
- 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
  - 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.
- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:
- 15.01 Solicit and accept constructive criticism.
  - 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
  - 15.03 Collaborate with individuals and teams to complete tasks and solve problems.
- 16.0 Investigate career opportunities in the game industry. – The student will be able to:
- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  - 16.03 Describe job requirements for a variety of occupations within the game development industry.

### **Game & Simulation Analysis**

- 17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:
- 17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.
  - 17.02 Identify and define the vocabulary used by game players and online gaming communities.
- 18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:
- 18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.
  - 18.02 Research and evaluate the game analysis techniques used by the video game industry.
  - 18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.
  - 18.04 Evaluate professional reviews and write a critical analysis of a current video game.

- 19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:
- 19.01 Analyze and deconstruct game environments and interactions.
  - 19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

### **Game & Simulation Design**

- 20.0 Understand the general procedure and requirements of game design. – The student will be able to:
- 20.01 Describe the design process from conception to production.
  - 20.02 Discuss the iterative nature of game and simulation design.
  - 20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.
- 21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:
- 21.01 Research and define the term “player immersion”.
  - 21.02 Explore and explain the factors that create player immersion in a game.
  - 21.03 Examine popular games and explain the methods each game uses to increase player immersion.
- 22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:
- 22.01 Identify and discuss the popular game development tools currently used in the industry.
  - 22.02 Identify and discuss popular gaming engines.
  - 22.03 Research and analyze the uses for different game development tools.
- 23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:
- 23.01 Identify the different control systems for video games.
  - 23.02 Compare and contrast personal computer and video game console hardware.
  - 23.03 Explain the factors that can limit the game playing ability of personal computers.
  - 23.04 Chart the evolution of video game hardware over the past 20 years.

### **Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

- 24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:

- 24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.
- 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
- 24.03 Using a simple game development tool, create a game or simulation.
- 24.04 Present the game or simulation.

### **Design Essentials**

- 25.0 Describe the game development life cycle. – The student will be able to:
  - 25.01 Identify steps in the pre-production process including the proof of concept and market research.
  - 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
  - 25.03 Determine scripting requirements.
  - 25.04 Implement techniques of scenario development, levels, and missions.
  - 25.05 Discuss game testing requirements and methods.
  - 25.06 Identify and describe maintenance, upgrade and sequel issues.
- 26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:
  - 26.01 Identify the different control systems for video games.
  - 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
  - 26.03 Explain the factors that can limit the game-playing ability of personal computers.
- 27.0 Identify non-hardware development constraints. – The student will be able to:
  - 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
  - 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
  - 27.03 Describe societal and legal constraints affecting game and simulation design.

### **Game Design Documentation**

- 28.0 Understand the general principles of storytelling. – The student will be able to:
  - 28.01 Identify the essential elements of a story.
  - 28.02 Describe how creative writing is used as a game design tool.
  - 28.03 Compare and contrast methods of delivering a story in a game.
- 29.0 Understand the use of storyboarding in game design. – The student will be able to:
  - 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.
  - 29.02 Describe how game layout charts are used in game design.
  - 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.

- 29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.
- 30.0 Develop a game design document or blueprint. – The student will be able to:
  - 30.01 Evaluate and discuss the choice of delivery system.
  - 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
  - 30.03 Create a game strategy overview, character overview, and storyboard overview.
  - 30.04 Define the rules of play and multi-player options.
  - 30.05 Create the layout and interfaces overview and digital media overview.
  - 30.06 Determine the event modeling requirements and create the progression levels overview.
  - 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
  - 30.08 Identify hardware and software constraints.

### **Game Strategy**

- 31.0 Understand strategic outlining in game designs. – The student will be able to:
  - 31.01 Assess techniques of goal design in gaming.
  - 31.02 Describe the concept of nested victories.
  - 31.03 Discuss the use of players as agents of change.
  - 31.04 Compare and contrast examples of understandable context in gaming.
  - 31.05 Discuss the principles underlying the creation of understandable rules.
  - 31.06 Describe how skill building is used in game design.
  - 31.07 Describe conventional techniques of positive feedback.
  - 31.08 Discuss functional consistency as it relates to the use of interfaces.
- 32.0 Explore elements of puzzle design. – The student will be able to:
  - 32.01 Describe the essential elements of a puzzle.
  - 32.02 Identify the different types of puzzles.
  - 32.03 Describe the basic principles of high-level puzzle design.
  - 32.04 Describe the basic principles of low-level puzzle design.
- 33.0 Discuss key strategic considerations in game design. – The student will be able to:
  - 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
  - 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
  - 33.03 Identify techniques used in the industry to help the player to navigate.
  - 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
  - 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.
  - 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.
  - 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

## **Rules of Play**

- 34.0 Understand the process of creating and designing player actions. – The student will be able to:
- 34.01 Discuss the principles of player-centric design.
  - 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
  - 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
  - 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
  - 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.
- 35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:
- 35.01 Identify techniques of introducing the story plot and beginning play.
  - 35.02 Describe story plot development techniques for the middle of play in game design.
  - 35.03 Analyze and discuss planning techniques for climax and finale of games.
- 36.0 Assess common principles and procedures in game flow design. – The student will be able to:
- 36.01 Assess missions and scenarios game flow techniques.
  - 36.02 Describe common use of mission design and campaigns.
  - 36.03 Evaluate usage of static versus dynamic campaigns.
- 37.0 Describe rule creation elements of player challenge. – The student will be able to:
- 37.01 Research common design methods for clearing obstacles or series of obstacles.
  - 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
  - 37.03 Identify common design elements used to vary weapons, characters and tools.
  - 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
  - 37.05 Evaluate industry use of boss encounters in games.
  - 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

## **Game Development Tools**

- 38.0 Identify tools and software commonly used in game development. – The student will be able to:
- 38.01 Identify and discuss the popular game development tools currently used in the industry.
  - 38.02 Identify and discuss popular gaming engines.
  - 38.03 Identify and discuss popular world building tools.

## **Music, Sound, Art & Animation**

- 39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:
- 39.01 Survey and discuss the use of naming conventions and temp sounds.
  - 39.02 Analyze and discuss methods of matching sound effects to art assets.
  - 39.03 Identify and categorize commonly used technology sound engine integration equipment.
  - 39.04 Identify and discuss resources such as sound effects libraries.
  - 39.05 Examine methods of sound implementation and associated software.
  - 39.06 Describe how and why digital video may be integrated into a game or simulation design.
  - 39.07 Describe how special effects differ from animation.
- 40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:
- 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

## **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
- 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
- 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

## **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:
- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.

- 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
- 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:
  - 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
  - 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
  - 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.
  - 44.04 Discuss the process of designing entities including behavior and entity graphics.
  - 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
  - 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
  - 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
  - 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
  - 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
  - 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
  - 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

### **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
  - 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.
  - 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:

- 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
- 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
- 47.01 Discuss the various methods of describing items in player’s inventory in contemporary game design.
- 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 66.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 66.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 66.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 66.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 67.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 67.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 67.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 67.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 68.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 68.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 68.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 69.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 69.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 69.02 Locate, organize and reference written information from various sources. CM 3.0
- 69.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 69.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 69.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 69.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 69.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 70.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:

- 70.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 70.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 70.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 70.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 71.0 Use information technology tools. – The student will be able to:
- 71.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 71.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 71.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 71.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 72.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 72.01 Describe the nature and types of business organizations. SY 1.0
- 72.02 Explain the effect of key organizational systems on performance and quality.
- 72.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 72.04 Explain the impact of the global economy on business organizations.
- 75.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 75.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 75.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 75.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 75.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: DIG0075**  
**Occupational Completion Point – B**  
**Game/Simulation Programmer – 150 Hours – SOC Code 15-1021**

- 48.0 Identify functions of information processing. – The student will be able to:
- 48.01 Identify characteristics of high-level languages.
- 48.02 Identify characteristics of operating systems.
- 48.03 Identify characteristics of a network.
- 48.04 Identify needs for software development in the game/simulation industry.
- 48.05 Identify causes of software development problems in the game/simulation industry.
- 48.06 Identify most appropriate languages for solving game/simulation industry

problems.

- 48.07 Manipulate data between numbering systems.
- 48.08 Identify how numeric and non-numeric data are represented in memory.
- 48.09 Distinguish among integer, fixed-point, and floating-point calculations.

49.0 Test programs. – The student will be able to:

- 49.01 Develop a plan for testing programs.
- 49.02 Develop test harnesses for use in program testing.
- 49.03 Perform debugging activities.
- 49.04 Distinguish among the different types of program and design errors.
- 49.05 Evaluate program test results.
- 49.06 Execute programs and subroutines as they relate to the total application.
- 49.07 Use trace routines of compilers to assist in program debugging.
- 49.08 Compile and run programs.
- 49.09 Create a stable code base.

50.0 Plan program design. – The student will be able to:

- 50.01 Formulate a plan to determine program specifications individually or in groups.
- 50.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
- 50.03 Design programs to solve problems using problem-solving strategies.
- 50.04 Prepare proper input/output layout specifications.
- 50.05 Examine existing utility programs and subroutines for use with other programs.
- 50.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.

51.0 Code programs. – The student will be able to:

- 51.01 Utilize reference manuals.
- 51.02 Write programs according to recognized programming standards.
- 51.03 Write internal documentation statements as needed in the program source code.
- 51.04 Code programs in high-level languages for game/simulation applications.
- 51.05 Write code that accesses sequential, random, and direct files.
- 51.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).
- 51.07 Enter and modify source code using a program language editor.
- 51.08 Code routines within programs that validate input data.
- 51.09 Use the rounding function in calculations within programs.
- 51.10 Write programs as part of a development team.
- 51.11 Write event-driven programs.
- 51.12 Write programs using timed-event strategies and methodologies.
- 51.13 Write programs that include score keeping.

52.0 Perform program maintenance. – The student will be able to:

- 52.01 Review requested modification of programs and establish a plan of action.
- 52.02 Design needed modifications in conformance with established standards.
- 52.03 Code, test, and debug modifications prior to updating production code.
- 52.04 Update production programs and documentation with changes.
- 52.05 Analyze output to identify and annotate errors or enhancements.

- 53.0 Create and maintain documentation. – The student will be able to:
- 53.01 Write documentation to assist operators and end-users.
  - 53.02 Follow established documentation standards.
  - 53.03 Update existing documentation to reflect program changes.
- 54.0 Evaluate assigned game programming tasks. – The student will be able to:
- 54.01 Estimate the time necessary to write a program.
- 55.0 Implement enhanced program structures. – The student will be able to:
- 55.01 Write programs that include tables or arrays and routines for data entry and lookup.
  - 55.02 Write programs to import/export data from external sources.
  - 55.03 Write programs that use iteration.
  - 55.04 Write routines that incorporate “help” text.
  - 55.05 Write programs that read and write random files.
  - 55.06 Write interactive programs.
  - 55.07 Design screen layouts for use in interactive programs.
  - 55.08 Write programs using object-oriented languages.
  - 55.09 Write programs that include data structures (e.g., stacks, queues, trees, linked lists).
  - 55.10 Write programs that are event-driven to support player goals and actions.
- 73.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 73.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 73.02 Explain emergency procedures to follow in response to workplace accidents.
  - 73.03 Create a disaster and/or emergency response plan. SHE 2.0
- 74.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 74.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
  - 74.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
  - 74.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 74.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 76.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 76.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 76.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 76.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 76.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0

- |       |  |          |
|-------|--|----------|
| 76.05 | Evaluate and compare employment opportunities that match career goals.           | ECD 6.0  |
| 76.06 | Identify and exhibit traits for retaining employment.                            | ECD 7.0  |
| 76.07 | Identify opportunities and research requirements for career advancement.         | ECD 8.0  |
| 76.08 | Research the benefits of ongoing professional development.                       | ECD 9.0  |
| 76.09 | Examine and describe entrepreneurship opportunities as a career planning option. | ECD 10.0 |
- 77.0 Demonstrate personal money-management concepts, procedures, and strategies. –  
The student will be able to:
- |       |  |        |
|-------|--|--------|
| 77.01 | Identify and describe the services and legal responsibilities of financial institutions. | FL 2.0 |
| 77.02 | Describe the effect of money management on personal and career goals.                    | FL 3.0 |
| 77.03 | Develop a personal budget and financial goals.   | FL 3.1 |
| 77.04 | Complete financial instruments for making deposits and withdrawals.                      | FL 3.2 |
| 77.05 | Maintain financial records.  | FL 3.3 |
| 77.06 | Read and reconcile financial statements.   | FL 3.4 |
| 77.07 | Research, compare and contrast investment opportunities.                                 |        |

**Course Number: DIG0076****Occupational Completion Point – C****Game/Simulation Software Developer – 150 Hours – SOC Code 15-1021**

- 56.0 Identify and describe basic network terminology and network security. – The student will be able to:
- |       |   |
|-------|---|
| 56.01 | Define networking and describe the purpose of a network.  |
| 56.02 | Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards). |
| 56.03 | Describe the various types of network topologies.   |
| 56.04 | Describe the various types of game protocols  |
| 56.05 | Demonstrate knowledge of general security concepts.   |
| 56.06 | Develop an awareness of communication security concepts.  |
| 56.07 | Develop an awareness of network infrastructure security.  |
| 56.08 | Describe the various types of multiplayer game architectures  |
| 56.09 | Identify networking and server design requirements for multi-player games   |
| 56.10 | List and describe performance metrics for networked games   |
- 57.0 Game configuration. – The student will be able to:
- |       |  |
|-------|--|
| 57.01 | Create a window to run a game.   |
| 57.02 | Describe and use appropriate game libraries to run a windowed game.                                    |
| 57.03 | Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available |
| 57.04 | Troubleshoot problems with computer hardware based on different graphic modes of the game              |
| 57.05 | Describe ethical issues and problems associated with computer games.                                   |

- 57.06 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 57.07 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
  - 57.08 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 57.09 Identify characteristics of operating systems and graphics pipeline
  - 57.10 Distinguish among integer and floating-point bounding box collision calculations...
  - 57.11 Illustrate various configurations of software libraries.
- 58.0 Test programs. – The student will be able to:
- 58.01 Develop data for use in program testing.
  - 58.02 Perform debugging activities.
  - 58.03 Distinguish among the different types of program and design errors.
  - 58.04 Evaluate program test results.
  - 58.05 Execute programs and subroutines as they relate to the total application.
  - 58.06 Use trace routines of compilers to assist in program debugging.
  - 58.07 Compile and run programs.
- 59.0 Plan program design. – The student will be able to:
- 59.01 Formulate a plan to determine program specifications individually or in groups.
  - 59.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
  - 59.03 Design programs to solve problems using problem-solving strategies.
  - 59.04 Prepare proper input/output layout specifications.
  - 59.05 Examine existing utility programs and subroutines for use with other programs.
  - 59.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 60.0 Create and maintain documentation. – The student will be able to:
- 60.01 Write documentation to assist operators and end-users.
  - 60.02 Follow established documentation standards.
  - 60.03 Update existing documentation to reflect program changes.
- 61.0 Code programs. – The student will be able to:
- 61.01 Utilize reference manuals.
  - 61.02 Write programs according to recognized programming standards.
  - 61.03 Write internal documentation statements as needed in the program source code.
  - 61.04 Code programs in high-level languages for gaming and simulation applications.
  - 61.05 Write code that accesses sequential, indexed sequential, random, and direct files.
  - 61.06 Code programs using logical statements (e.g., if-then-else, do...while).
  - 61.07 Enter and modify source code using a program language editor.
  - 61.08 Code routines within programs that validate input data.
  - 61.09 Use the rounding function in calculations within programs.

- 61.10 Write programs that display text
  - 61.11 Demonstrate proficiency in drawing lines using graphic primitive functions.
  - 61.12 Demonstrate proficiency in drawing rectangles using graphic primitive functions.
  - 61.13 Demonstrate proficiency in drawing circles using graphic primitive functions.
  - 61.14 Demonstrate proficiency in drawing ellipses using graphic primitive functions.
  - 61.15 Demonstrate proficiency in drawing polygons using graphic primitive functions.
  - 61.16 Write programs that use composite graphic objects
  - 61.17 Write programs that load a bitmap for background
  - 61.18 Write programs that use a sprite handler
  - 61.19 Write programs that use animation
  - 61.20 Write programs that use scrolling
  - 61.21 Write programs that use transparency
- 62.0 Demonstrate an understanding of operating systems, environments, and platforms. – The student will be able to:
- 62.01 Identify various types of operating systems/environments for different computer hardware platforms.
  - 62.02 Assess and analyze the functions of different operating systems.
  - 62.03 Distinguish between different types of computer hardware platforms.
- 63.0 Implement enhanced program structures. – The student will be able to:
- 63.01 Write programs that include tables or arrays and routines for data entry and lookup.
  - 63.02 Write routines to sort arrays.
  - 63.03 Write programs that sort records in files.
  - 63.04 Write programs to process transactions.
  - 63.05 Write programs that use iteration.
  - 63.06 Write programs that read and write sequential files.
  - 63.07 Write programs that read and write random files.
- 64.0 Implement multimedia programming. – The student will be able to:
- 64.01 Demonstrate proficiency in creating multiple composite objects.
  - 64.02 Demonstrate proficiency in moving composite graphics objects.
  - 64.03 Demonstrate proficiency in rotating composite graphics objects by hand.
  - 64.04 Distinguish between flock and flee artificial intelligence algorithms.
  - 64.05 Write programs that use blitting.
  - 64.06 Simulate circular game board.
  - 64.07 Demonstrate proficiency in creating a firing simulation.
  - 64.08 Identify the basic constructs used in bounding box collision algorithm.
  - 64.09 Identify the basic constructs used in truer bounding box collision.
  - 64.10 Demonstrate proficiency in creating a creating a bouncing simulation.
  - 64.11 Simulate pattern based movement.
  - 64.12 Simulate multiple sprites movement.
  - 64.13 Identify the basic constructs used in keyboard input.
  - 64.14 Identify the basic constructs used in mouse input.
  - 64.15 Identify the basic constructs used in double buffering.

65.0 Develop an understanding of programming techniques and concepts. – The student will be able to:

- 65.01 Identify the basic constructs used in structured programming.
- 65.02 Distinguish between top-down and bottom-up design.
- 65.03 Distinguish between iteration and recursion.
- 65.04 Evaluate Boolean expressions.
- 65.05 Distinguish between interpreters and compilers.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Foundations  
**Course Number:** 8208110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to game and simulation concepts and careers, the impact game and simulation has on society and industry, and basic game/simulation design concepts such as rule design, play mechanics, and media integration. This course compares and contrasts games and simulations, key development methodologies and tools, careers, and industry-related information. This course also covers strategies, processes, and methods for conceptualizing a game or simulation application; storyboarding techniques; and development tools.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. **Regardless of topic sequencing, the culminating activity is the creation of a playable game.**

**Game & Simulation Creation**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	12/36 33%	<b>Biology 1</b>	3/56 5%	<b>Anatomy/Physiology Honors</b>	1/53 2%	<b>Astronomy Solar/Galactic Honors</b>	13/52 25%
<b>Algebra 2</b>	3/41 7%	<b>Chemistry 1</b>	17/55 31%	<b>Genetics</b>	3/35 9%	<b>Marine Science 1 Honors</b>	14/42 33%
<b>Geometry</b>	#	<b>Physics 1</b>	24/53 45%	<b>Earth-Space Science</b>	14/58 24%	<b>Physical Science</b>	21/56 38%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Create a game design production plan that describes the game play, outcomes, controls, interface and artistic style of a video game. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.D.5.1; MA.912.D.5.2.

01.01 Use industry standard game design production documents to create a game design production plan.

02.0 Design and create a playable game. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.5.1; MA.912.D.5.2; SC.912.P.10.1; SC.912.P.10.2; SC.912.P.10.5;  
SC.912.P.10.16; SC.912.P.12.2.

- 02.01 Use a number of computer tools to enhance and ease game programming and artistry.
- 02.02 Use a game engine to create a playable game.
- 02.03 Use animated objects.
- 02.04 Program sound and music to enhance the game experience.
- 02.05 Test and debug the completed game.

**Critical Game & Simulation Studies**

03.0 Categorize the different gaming genres. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.7.2.

- 03.01 Research, compare and categorize the different gaming genres.
- 03.02 Analyze examples of different gaming genres.
- 03.03 Define and use the necessary vocabulary related to gaming and the different genres.

04.0 Categorize different gaming systems. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.2.13; MA.912.A.3.15; MA.912.F.5.1; MA.912.F.5.2.

- 04.01 Research, compare and categorize different gaming systems.
- 04.02 Analyze the distinctive features of each system.
- 04.03 Define the target audience for different systems based on features, available games, and price of system and games.
- 04.04 Define and use the necessary vocabulary related to gaming hardware.

05.0 Understand the historical significance of electronic and non-electronic games. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.P.10.18; SC.912.P.10.20.

- 05.01 Discuss the history of non-electronic games.
- 05.02 Describe the history and theory of mainstream and experimental media including radio, movies, television, art, and theatre.
- 05.03 Explain the historical timeline of electronic games, marking the significant highlights in their evolution.

06.0 Describe the trends in current and next-generation game development. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.3.10; MA.912.A.3.11; MA.912.A.3.12; MA.912.A.3.13; MA.912.A.3.14; MA.912.A.3.15; MA.912.A.10.1; SC.912.N.1.7; SC.912.N.3.5; SC.912.P.10.2; SC.912.P.10.10; SC.912.P.12.2; SC.912.P.12.3; SC.912.P.12.5; SC.912.P.12.6.

06.01 Determine and analyze the significant trends in game development in the past two decades.

06.02 Research and brainstorm the possibilities for the next generation of electronic games based on current and emerging technologies and future predictions.

### **Societal Impact**

07.0 Understand the role of play in human culture. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.10.2.

07.01 Discuss the word “play” and its many definitions.

07.02 Discuss the effect of play on today’s culture, specifically why it is important and what it provides in terms of balance in our lives.

07.03 Describe the history of play and its importance in developing societies and cultures.

07.04 Investigate and discuss how play can help humans, particularly children, acquire knowledge.

07.05 Describe the benefits of role-playing games and simulations, including online economies and community-building.

08.0 Understand the psychological impact of games on individuals and groups. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.10.1; SC.912.N.2.3; SC.912.N.2.4; SC.912.N.2.5; SC.912.N.4.2; SC.912.N.3.1.

08.01 Investigate studies that discuss the impact of violent games on children and adults.

08.02 Compare and contrast the different opinions on the effects of games on behavior, cognitive development, and motor skills.

08.03 Research and discuss differing opinions on video game addiction and what would define addiction.

08.04 Examine online digital worlds such as Second Life and the impact these worlds have on individuals and groups.

### **Management & Industry**

09.0 Understand the business model commonly used in the game development industry. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.F.5.1; MA.912.F.5.2; MA.912.A.3.11; MA.912.A.2.13; MA.912.A.3.15;  
MA.912.A.10.1; MA.912.D.6.6; MA.912.D.4.1; MA.912.D.7.2.

- 09.01 Identify, define and discuss the different ways games are funded, marketed and sold.
- 09.02 Identify and describe licensing management for different gaming platforms.
- 09.03 Discuss the product value and business differences between major game platforms.
- 09.04 Identify successful business models and analyze various facets of those models, such as market analysis, marketing strategy, and product value.

- 10.0 Examine and categorize the significant processes in the production of interactive games.  
– The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.10.1; SC.912.N.1.1; SC.912.N.1.5.

- 10.01 Discuss the relationships between publishers, developers, distributors, marketers, and retailers.
- 10.02 Identify processes of development including content creation, team roles, design documentation, and process management.
- 10.03 Explore and describe the effects of globalization on the design and production of video games.

- 11.0 Understand the core tasks and challenges that face a video game design team. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; MA.912.D.4.1; MA.912.A.10.1.

- 11.01 Identify and define the roles and responsibilities of team members on a video game design team.
- 11.02 Describe the effects of group dynamics and the importance of team building for a design team.
- 11.03 Explore and discuss methods of communications and scheduling for design teams.
- 11.04 Describe the importance and interrelationship between development schedule and budget constraints in video game design.

- 12.0 Understand legal issues that affect games, developers and players. – The student will be able to:

- 12.01 Define and discuss intellectual property and contract law as it relates to the gaming industry.
- 12.02 Describe legal and liability issues that could affect online communities.
- 12.03 Compare and contrast government and industry content regulation and industry ratings of video games.

- 13.0 Describe the impact of the video game industry on the economy. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.4.1; MA.912.A.10.1; SC.912.N.2.1.

- 13.01 Explore and discuss the impact of video games on the economy including domestic sales, foreign exports, and video game rentals.
- 13.02 Research and describe the effect of game software in driving new technologies and the purchases of video game hardware, gaming PCs, and complementary technologies such as high-definition televisions.
- 13.03 Analyze the technological transfers from video games to other industries, such as education, medical, corporate training, and military simulation technologies that were developed by the video game industry, as well as 3D "gaming" graphics cards that have found use for other applications.
- 13.04 Describe how frequent exposure and/or access to video games has reshaped the level of technical proficiency of our work force.

### **Job Readiness & Career Development**

- 14.0 Demonstrate the professional level of written and oral communication required in the game development industry. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: SC.912.N.1.1.

- 14.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 14.02 Organize ideas and communicate oral and written messages appropriate for the game development industry environment
- 14.03 Identify, define, and discuss terminology appropriate for both internal and external communications in the game development industry environment.

- 15.0 Demonstrate human relations/interpersonal skills for the workplace. – The student will be able to:

- 15.01 Solicit and accept constructive criticism.
- 15.02 Demonstrate personal and interpersonal skills appropriate for the workplace such as responsibility, dependability, punctuality, positive attitude, initiative, respect for self and others, and professional dress.
- 15.03 Collaborate with individuals and teams to complete tasks and solve problems.

- 16.0 Investigate career opportunities in the game industry. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: SC.912.N.4.2.

- 16.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
- 16.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 16.03 Describe job requirements for a variety of occupations within the game development industry.

## **Game & Simulation Analysis**

17.0 Demonstrate an understanding of the vocabulary for discussing games and play. – The student will be able to:

17.01 Identify, define, and discuss professional game design and analysis terminology appropriate for internal and external communications in a game design environment.

17.02 Identify and define the vocabulary used by game players and online gaming communities.

18.0 Demonstrate an understanding of the techniques used to evaluate game mechanics, game play, flow and game design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.5.1; MA.912.D.5.2.

18.01 Test and analyze games to determine the quality of rules, interfaces, navigation, performance, play, artistry and longevity in design and structure.

18.02 Research and evaluate the game analysis techniques used by the video game industry.

18.03 Identify the key elements in a game and make intelligent judgments about whether the game succeeded or failed in its objectives.

18.04 Evaluate professional reviews and write a critical analysis of a current video game.

19.0 Describe the complex interaction between video games and players and the role it plays in the popularity of a game. – The student will be able to:

19.01 Analyze and deconstruct game environments and interactions.

19.02 Compare and contrast the top selling video games in terms of player interaction, plot complexity, and reward.

## **Game & Simulation Design**

20.0 Understand the general procedure and requirements of game design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.7.

20.01 Describe the design process from conception to production.

20.02 Discuss the iterative nature of game and simulation design.

20.03 Develop design plans, character sketches, documentation and storyboards for proposed games.

21.0 Explore the methods used to create and sustain player immersion. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.5.1; MA.912.A.5.4.

- 21.01 Research and define the term “player immersion”.
- 21.02 Explore and explain the factors that create player immersion in a game.
- 21.03 Examine popular games and explain the methods each game uses to increase player immersion.

22.0 Become familiar with popular game tools such as DirectX, 3DMAX, and different gaming engines. – The student will be able to:

- 22.01 Identify and discuss the popular game development tools currently used in the industry.
- 22.02 Identify and discuss popular gaming engines.
- 22.03 Research and analyze the uses for different game development tools.

23.0 Demonstrate an understanding of interface design and hardware constraints on video games including processors and I/O devices. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.P.10.13; SC.912.P.10.14; SC.912.P.10.15; SC.912.P.10.16; SC.912.P.10.17;  
SC.912.P.10.18; SC.912.P.12.9; SC.912.L.17.15; SC.912.L.17.16; SC.912.L.17.17;  
SC.912.L.17.18.

- 23.01 Identify the different control systems for video games.
- 23.02 Compare and contrast personal computer and video game console hardware.
- 23.03 Explain the factors that can limit the game playing ability of personal computers.
- 23.04 Chart the evolution of video game hardware over the past 20 years.

66.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0

- 66.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
- 66.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
- 66.03 Present information formally and informally for specific purposes and audiences. AF 2.9

67.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0

- 67.01 Demonstrate knowledge of arithmetic operations. AF 3.2
- 67.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
- 67.03 Construct charts/tables/graphs using functions and data. AF 3.5

68.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0

- 68.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
- 68.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Design  
**Course Number:** 8208120  
**Course Credit:** 1

**Course Description:**

This course covers fundamental principles of designing a game or a simulation application, in particular Human Computer Interface (HCI) principles, rules and strategies of play, conditional branching, design and development constraints, use of sound and animation, design tools, and implementation issues. The content includes market research, product design documentation, storyboarding, proposal development, and presentation of a project report. Emphasis is placed on the techniques needed to develop well-documented, structured game or simulation programs. Extensive use is made of evaluating and analyzing existing games or simulations.

Hands-on activities using an entry-level game development tool such as Game Maker or Alice should be integrated into the curriculum. **Regardless of topic sequencing, the culminating activity is the creation and presentation of a playable game with design documentation.**

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	2/36 6%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	8/52 15%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	9/55 16%	<b>Genetics</b>	1/35 3%	<b>Marine Science 1 Honors</b>	3/42 7%
<b>Geometry</b>	5/45 11%	<b>Physics 1</b>	15/53 28%	<b>Earth-Space Science</b>	6/58 10%	<b>Physical Science</b>	14/56 25%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

**Game/Simulation Project**

Instruction relating to the standards in this section should be interspersed throughout the entire course with the other standards taught progressively in the context of game design and development.

24.0 Create a working game or simulation individually or as part of a team. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.D.5.1; MA.912.D.5.2; SC.912.N.1.1.

- 24.01 Create a storyboard describing the essential elements, plot, flow, and functions of the game/simulation.
- 24.02 Create a design specification document to include interface and delivery choices, rules of play, navigation functionality, scoring, media choices, start and end of play, special features, and development team credits.
- 24.03 Using a simple game development tool, create a game or simulation.
- 24.04 Present the game or simulation.

### **Design Essentials**

25.0 Describe the game development life cycle. – The student will be able to:

- 25.01 Identify steps in the pre-production process including the proof of concept and market research.
- 25.02 Describe the iterative prototyping process – Alpha, Beta, RTM.
- 25.03 Determine scripting requirements.
- 25.04 Implement techniques of scenario development, levels, and missions.
- 25.05 Discuss game testing requirements and methods.
- 25.06 Identify and describe maintenance, upgrade and sequel issues.

26.0 Identify hardware constraints on video games including processors and I/O devices. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.2.13; MA.912.A.4.1; SC.912.P.10.13; SC.912.P.10.14; SC.912.P.10.15;  
SC.912.P.10.18.

- 26.01 Identify the different control systems for video games.
- 26.02 Compare and contrast personal computer and video game console hardware, including display systems.
- 26.03 Explain the factors that can limit the game-playing ability of personal computers.

27.0 Identify non-hardware development constraints. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.4.1.

- 27.01 Identify and discuss software integration issues relating to scripting, sound, art animation, game engine and world design software integration.
- 27.02 Describe constraints such as development time, personnel, talent acquisition, financial/budget constraints, and schedule.
- 27.03 Describe societal and legal constraints affecting game and simulation design.

### **Game Design Documentation**

28.0 Understand the general principles of storytelling. – The student will be able to:

- 28.01 Identify the essential elements of a story.
- 28.02 Describe how creative writing is used as a game design tool.
- 28.03 Compare and contrast methods of delivering a story in a game.

29.0 Understand the use of storyboarding in game design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.8.6; MA.912.G.1.1.

- 29.01 Assess the techniques used in the gaming industry for rendering basic Game Design Art.
- 29.02 Describe how game layout charts are used in game design.
- 29.03 Describe how storyboards in the game design process can be used as a pre-development sales tool.
- 29.04 Analyze and compare the use of storyboards in the game design industry with regard to environmental illustrations, level designs, character designs, model sheets and GUI Designs.

30.0 Develop a game design document or blueprint. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.8.6; MA.912.G.1.1.

- 30.01 Evaluate and discuss the choice of delivery system.
- 30.02 Evaluate and discuss choices of genre, game design software, art, digital media, and animation software.
- 30.03 Create a game strategy overview, character overview, and storyboard overview.
- 30.04 Define the rules of play and multi-player options.
- 30.05 Create the layout and interfaces overview and digital media overview.
- 30.06 Determine the event modeling requirements and create the progression levels overview.
- 30.07 Define strategic positioning of game immersion dynamics and psychological effect.
- 30.08 Identify hardware and software constraints.

**Game Strategy**

31.0 Understand strategic outlining in game designs. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1.

- 31.01 Assess techniques of goal design in gaming.
- 31.02 Describe the concept of nested victories.
- 31.03 Discuss the use of players as agents of change.
- 31.04 Compare and contrast examples of understandable context in gaming.
- 31.05 Discuss the principles underlying the creation of understandable rules.
- 31.06 Describe how skill building is used in game design.
- 31.07 Describe conventional techniques of positive feedback.
- 31.08 Discuss functional consistency as it relates to the use of interfaces.

32.0 Explore elements of puzzle design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.P.10.14; SC.912.P.10.15.

- 32.01 Describe the essential elements of a puzzle.
- 32.02 Identify the different types of puzzles.
- 32.03 Describe the basic principles of high-level puzzle design.
- 32.04 Describe the basic principles of low-level puzzle design.

33.0 Discuss key strategic considerations in game design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.P.1.1; MA.912.P.1.2; MA.912.P.2.1; MA.912.P.2.2; MA.912.P.2.3;  
MA.912.P.3.1; SC.912.L.17.15.

- 33.01 Describe the use of artificial intelligence challenges in game design and the need for giving the player rest time between challenges.
- 33.02 Evaluate the impact of randomness in game design especially as it pertains to pattern recognition.
- 33.03 Identify techniques used in the industry to help the player to navigate.
- 33.04 Explain the use of “just barely” victories as an exciting and immersive technique.
- 33.05 Assess techniques used to provide a range of challenges and appeal to a wide range of abilities.
- 33.06 Describe the psychological cost of failure in games as it pertains to immersion and psychological effect.
- 33.07 Identify methods of preparing the player for greater challenge while allowing for plot development as the story serves the game.

### **Rules of Play**

34.0 Understand the process of creating and designing player actions. – The student will be able to:

- 34.01 Discuss the principles of player-centric design.
- 34.02 Research and correlate game complexity level to appropriate age group such that content matches user skill set required.
- 34.03 Examine and discuss design elements that encourage continuous active engagement both mental and physical.
- 34.04 Analyze design elements that maintain player interest and vary the degree of challenge.
- 34.05 Discuss the need for a balance of design elements for the purpose of rewarding and frustrating players.

35.0 Create and design the game flow as it relates to story and plot. – The student will be able to:

- 35.01 Identify techniques of introducing the story plot and beginning play.
- 35.02 Describe story plot development techniques for the middle of play in game design.
- 35.03 Analyze and discuss planning techniques for climax and finale of games.

36.0 Assess common principles and procedures in game flow design. – The student will be able to:

- 36.01 Assess missions and scenarios game flow techniques.
- 36.02 Describe common use of mission design and campaigns.
- 36.03 Evaluate usage of static versus dynamic campaigns.

37.0 Describe rule creation elements of player challenge. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.6.3; MA.912.D.6.4.

- 37.01 Research common design methods for clearing obstacles or series of obstacles.
- 37.02 Describe common design elements introducing skill, luck and combinations including escalating challenges to games.
- 37.03 Identify common design elements used to vary weapons, characters and tools.
- 37.04 Discuss the incorporation of risk reward and adaptive challenges (AI).
- 37.05 Evaluate industry use of boss encounters in games.
- 37.06 Analyze and discuss design considerations from the perspective of other players and multi-player environments.

### **Game Development Tools**

38.0 Identify tools and software commonly used in game development. – The student will be able to:

- 38.01 Identify and discuss the popular game development tools currently used in the industry.
- 38.02 Identify and discuss popular gaming engines.
- 38.03 Identify and discuss popular world building tools.

### **Music, Sound, Art & Animation**

39.0 Understand the methodologies for integrating digital media into a game or simulation. – The student will be able to:

- 39.01 Survey and discuss the use of naming conventions and temp sounds.
- 39.02 Analyze and discuss methods of matching sound effects to art assets.
- 39.03 Identify and categorize commonly used technology sound engine integration equipment.
- 39.04 Identify and discuss resources such as sound effects libraries.
- 39.05 Examine methods of sound implementation and associated software.
- 39.06 Describe how and why digital video may be integrated into a game or simulation design.
- 39.07 Describe how special effects differ from animation.

40.0 Identify commonly used art and animation production tools in the game design industry. – The student will be able to:

- 40.01 Identify, categorize and discuss art and animation tools commonly used in game design.

### **Environmental Design**

- 41.0 Understand the general concepts of environmental design. – The student will be able to:
- 41.01 Survey and evaluate commonly used concept art.
  - 41.02 Create a world sketch with particular attention to maintaining continuity of style.
  - 41.03 Describe the emotional/psychological aspects of environmental design that signify mood, façade of freedom, and resource struggling.
- 42.0 Describe how environmental design is used in conjunction with game level design. – The student will be able to:
- 42.01 Examine and evaluate examples of focus on a theme.
  - 42.02 Describe methods of creating a purposeful architecture giving consideration to continuity and themes and taking advantage of revisiting.
  - 42.03 Consider and discuss environmental design elements for multi-player or single player games.
  - 42.04 Describe the history of creating shifts in game design environments and embracing novel ideas.
  - 42.05 Identify and discuss environmental design pitfalls such as red herrings and cookie-cutter layouts.

### **Event Modeling in Game Design**

- 43.0 Define the meaning of simulation and pertinent issues facing game designers. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.2.4.

- 43.01 Discuss the meaning of simulation and give examples of simulation and complexity including architecture, exposure, concealment and heuristics.
  - 43.02 Describe applied event modeling including goal discovery, map making, event exploration, developing incentives and learning in event modeling for games.
  - 43.03 Explain the concepts of modes of understanding, inductive and iconic logic, significance and saturation in event modeling for game design.
- 44.0 Describe applied event modeling as it relates to game design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.2.4; SC.912.P.8.7; SC.912.P.10.1; SC.912.P.10.2; SC.912.P.10.4;  
SC.912.P.10.5; SC.912.P.10.10; SC.912.P.12.3; SC.912.P.12.4; SC.912.P.12.5;  
SC.912.P.12.6; SC.912.L.14.16; SC.912.L.17.5; SC.912.L.17.15; SC.912.N.1.7

- 44.01 Discuss the process of specifying events including contexts of simulation, translating event models to simulations, formalizing thematic objectives, prototyping, interface design and use cases with modeling.
- 44.02 Describe the design of an application framework including extensible frameworks, software design, configuration, encapsulation, windows and message loops.
- 44.03 Describe the implementation of an application framework including adding graphics, GUI events and controls, and creating a console.

- 44.04 Discuss the process of designing entities including behavior and entity graphics.
- 44.05 Describe the implementation of entities including enumerating animations, playing with time, creating events, adding an entity class, and creating entity events and behaviors.
- 44.06 Analyze event modeling in creating a world including the creation of a world class, adding and removing entities, accessing entities, updating and rendering, adding scene hierarchies and handling world events.
- 44.07 Assess and discuss AI and physics issues for simulation including AI event contexts, adding intelligence and gravity, adding collision detection, updating for collisions and applying mass and force.
- 44.08 Discuss environmental elements of simulation including logic, cognitive saturation, systems and interpretation, context of reality, shadows and lighting.
- 44.09 Discuss the simulation of physical systems such as trees and forests and related events such as fires, or insect swarms such as beehives, bird flocks or anthills.
- 44.10 Describe the simulation of social and economic systems including practical applications, historical precedents, modeling for community events, creation of communities including structures, states events and rendering and altering building states, population behaviors, and controlling influences.
- 44.11 Describe the process of testing simulations and event models including effectiveness, diagrammatic systems evaluation, context influence, path transitions and assessing messages.

### **Interface Design**

- 45.0 Understand basic HCI principles. – The student will be able to:
  - 45.01 Define and give examples of how HCI principles are considered in designing a game or simulation.
  - 45.02 Describe how client user background, education, goals, motivation, training, culture, age, gender, physical abilities and client sophistication affect interface design.
- 46.0 Discuss the eight golden rules of HCI. – The student will be able to:
  - 46.01 Discuss the need for functional consistency, shortcuts, feedback, closure, error prevention, easy reversal of actions, feeling in control, and avoiding memory overload.
  - 46.02 Identify game design enhancements that could make better use of HCI Principles.
- 47.0 Understand the use of inventory systems in game design. – The student will be able to:
  - 47.01 Discuss the various methods of describing items in player's inventory in contemporary game design.
  - 47.02 Review and discuss industry methods of communicating how inventory items can have an effect on game play.
- 69.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:

- 69.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 69.02 Locate, organize and reference written information from various sources. CM 3.0
- 69.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 69.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 69.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 69.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 69.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 70.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 70.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 70.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 70.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 70.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 71.0 Use information technology tools. – The student will be able to:
- 71.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 71.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 71.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 71.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 72.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 72.01 Describe the nature and types of business organizations. SY 1.0
- 72.02 Explain the effect of key organizational systems on performance and quality.
- 72.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 72.04 Explain the impact of the global economy on business organizations.
- 75.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 75.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 75.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 75.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 75.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game & Simulation Programming  
**Course Number:** 8208330  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring the appropriate programming skills for rendering a game or simulation product, including program control, conditional branching, memory management, score-keeping, timed event strategies and methodologies, and implementation issues.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	2/36 6%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	4/45 9%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

48.0 Identify functions of information processing. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.S.3.2; MA.912.A.1.2; MA.912.A.1.1.

- 48.01 Identify characteristics of high-level languages.
- 48.02 Identify characteristics of operating systems.
- 48.03 Identify characteristics of a network.
- 48.04 Identify needs for software development in the game/simulation industry.
- 48.05 Identify causes of software development problems in the game/simulation industry.
- 48.06 Identify most appropriate languages for solving game/simulation industry problems.
- 48.07 Manipulate data between numbering systems.
- 48.08 Identify how numeric and non-numeric data are represented in memory.
- 48.09 Distinguish among integer, fixed-point, and floating-point calculations.

49.0 Test programs. – The student will be able to:

- 49.01 Develop a plan for testing programs.

- 49.02 Develop test harnesses for use in program testing.
- 49.03 Perform debugging activities.
- 49.04 Distinguish among the different types of program and design errors.
- 49.05 Evaluate program test results.
- 49.06 Execute programs and subroutines as they relate to the total application.
- 49.07 Use trace routines of compilers to assist in program debugging.
- 49.08 Compile and run programs.
- 49.09 Create a stable code base.

50.0 Plan program design. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1.

- 50.01 Formulate a plan to determine program specifications individually or in groups.
- 50.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
- 50.03 Design programs to solve problems using problem-solving strategies.
- 50.04 Prepare proper input/output layout specifications.
- 50.05 Examine existing utility programs and subroutines for use with other programs.
- 50.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.

51.0 Code programs. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.A.3.1; MA.912.A.3.12; MA.912.G.8.2; MA.912.G.8.3.

- 51.01 Utilize reference manuals.
- 51.02 Write programs according to recognized programming standards.
- 51.03 Write internal documentation statements as needed in the program source code.
- 51.04 Code programs in high-level languages for game/simulation applications.
- 51.05 Write code that accesses sequential, random, and direct files.
- 51.06 Code programs using logical statements (e.g., If-Then-Else, Do...While).
- 51.07 Enter and modify source code using a program language editor.
- 51.08 Code routines within programs that validate input data.
- 51.09 Use the rounding function in calculations within programs.
- 51.10 Write programs as part of a development team.
- 51.11 Write event-driven programs.
- 51.12 Write programs using timed-event strategies and methodologies.
- 51.13 Write programs that include score keeping.

52.0 Perform program maintenance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1.

- 52.01 Review requested modification of programs and establish a plan of action.
- 52.02 Design needed modifications in conformance with established standards.
- 52.03 Code, test, and debug modifications prior to updating production code.
- 52.04 Update production programs and documentation with changes.

52.05 Analyze output to identify and annotate errors or enhancements.

53.0 Create and maintain documentation. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1.

53.01 Write documentation to assist operators and end-users.

53.02 Follow established documentation standards.

53.03 Update existing documentation to reflect program changes.

54.0 Evaluate assigned game programming tasks. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.8.2.

54.01 Estimate the time necessary to write a program.

55.0 Implement enhanced program structures. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.8.1; MA.912.D.8.2; MA.912.G.9.1; MA.912.G.7.1; MA.912.G.2.4

55.01 Write programs that include tables or arrays and routines for data entry and lookup.

55.02 Write programs to import/export data from external sources.

55.03 Write programs that use iteration.

55.04 Write routines that incorporate “help” text.

55.05 Write programs that read and write random files.

55.06 Write interactive programs.

55.07 Design screen layouts for use in interactive programs.

55.08 Write programs using object-oriented languages.

55.09 Write programs that include data structures (e.g., stacks, queues, trees, linked lists).

55.10 Write programs that are event-driven to support player goals and actions.

73.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:

73.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0

73.02 Explain emergency procedures to follow in response to workplace accidents.

73.03 Create a disaster and/or emergency response plan. SHE 2.0

74.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:

74.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0

74.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0

- 74.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 74.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 76.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 76.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 76.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 76.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 76.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 76.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 76.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 76.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 76.08 Research the benefits of ongoing professional development. ECD 9.0
- 76.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 77.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 77.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 77.02 Describe the effect of money management on personal and career goals. FL 3.0
- 77.03 Develop a personal budget and financial goals. FL 3.1
- 77.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 77.05 Maintain financial records. FL 3.3
- 77.06 Read and reconcile financial statements. FL 3.4
- 77.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Multi-User Game & Simulation Programming  
**Course Number:** 8208340  
**Course Credit:** 1

**Course Description:**

This course is focused on students acquiring the appropriate programming skills for rendering a game or simulation product, including program control, conditional branching, score-keeping, timed event strategies and methodologies, and implementation issues specific to multi-user game/simulation products.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	1/36 2%	<b>Biology 1</b>	3/56 5%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	12/52 23%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	11/55 20%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	9/42 21%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

56.0 Identify and describe basic network terminology and network security. – The student will be able to:

- 56.01 Define networking and describe the purpose of a network.
- 56.02 Identify the purposes and interrelationships among the major components of networks (e.g., servers, clients, transmission media, network operating system, network boards).
- 56.03 Describe the various types of network topologies.
- 56.04 Describe the various types of game protocols
- 56.05 Demonstrate knowledge of general security concepts.
- 56.06 Develop an awareness of communication security concepts.
- 56.07 Develop an awareness of network infrastructure security.
- 56.08 Describe the various types of multiplayer game architectures
- 56.09 Identify networking and server design requirements for multi-player games
- 56.10 List and describe performance metrics for networked games

57.0 Game configuration. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 SC.912.N.1.1; SC.912.N.1.2; SC.912.N.1.4; SC.912.N.4.1; SC.912.N.4.2.

- 57.01 Create a window to run a game.
  - 57.02 Describe and use appropriate game libraries to run a windowed game.
  - 57.03 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available
  - 57.04 Troubleshoot problems with computer hardware based on different graphic modes of the game
  - 57.05 Describe ethical issues and problems associated with computer games.
  - 57.06 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 57.07 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
  - 57.08 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 57.09 Identify characteristics of operating systems and graphics pipeline
  - 57.10 Distinguish among integer and floating-point bounding box collision calculations...
  - 57.11 Illustrate various configurations of software libraries.
- 58.0 Test programs. – The student will be able to:
- 58.01 Develop data for use in program testing.
  - 58.02 Perform debugging activities.
  - 58.03 Distinguish among the different types of program and design errors.
  - 58.04 Evaluate program test results.
  - 58.05 Execute programs and subroutines as they relate to the total application.
  - 58.06 Use trace routines of compilers to assist in program debugging.
  - 58.07 Compile and run programs.
- 59.0 Plan program design. – The student will be able to:
- This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.3; SC.912.N.1.7.
- 59.01 Formulate a plan to determine program specifications individually or in groups.
  - 59.02 Use a graphical representation or pseudo code to represent the structure in a program or subroutine.
  - 59.03 Design programs to solve problems using problem-solving strategies.
  - 59.04 Prepare proper input/output layout specifications.
  - 59.05 Examine existing utility programs and subroutines for use with other programs.
  - 59.06 Manually trace the execution of programs and verify that programs follow the logic of their design as documented.
- 60.0 Create and maintain documentation-The student will be able to:
- 60.01 Write documentation to assist operators and end-users.
  - 60.02 Follow established documentation standards.
  - 60.03 Update existing documentation to reflect program changes.
- 61.0 Code programs. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.D.8.1; MA.912.D.8.2; MA.912.D.8.4; MA.912.D.8.5; MA.912.A.10.1;  
 MA.912.G.2.4; MA.912.G.8.6; SC.912.P.12.1; SC.912.P.12.2; SC.912.P.12.3;  
 SC.912.P.12.5; SC.912.P.12.6; SC.912.P.10.18; SC.912.P.10.20; SC.912.P.10.22.

- 61.01 Utilize reference manuals.
- 61.02 Write programs according to recognized programming standards.
- 61.03 Write internal documentation statements as needed in the program source code.
- 61.04 Code programs in high-level languages for gaming and simulation applications.
- 61.05 Write code that accesses sequential, indexed sequential, random, and direct files.
- 61.06 Code programs using logical statements (e.g., if-then-else, do...while).
- 61.07 Enter and modify source code using a program language editor.
- 61.08 Code routines within programs that validate input data.
- 61.09 Use the rounding function in calculations within programs.
- 61.10 Write programs that display text
- 61.11 Demonstrate proficiency in drawing lines using graphic primitive functions.
- 61.12 Demonstrate proficiency in drawing rectangles using graphic primitive functions.
- 61.13 Demonstrate proficiency in drawing circles using graphic primitive functions.
- 61.14 Demonstrate proficiency in drawing ellipses using graphic primitive functions.
- 61.15 Demonstrate proficiency in drawing polygons using graphic primitive functions.
- 61.16 Write programs that use composite graphic objects
- 61.17 Write programs that load a bitmap for background
- 61.18 Write programs that use a sprite handler
- 61.19 Write programs that use animation
- 61.20 Write programs that use scrolling
- 61.21 Write programs that use transparency

62.0 Demonstrate an understanding of operating systems, environments, and platforms. –  
 The student will be able to:

- 62.01 Identify various types of operating systems/environments for different computer hardware platforms.
- 62.02 Assess and analyze the functions of different operating systems.
- 62.03 Distinguish between different types of computer hardware platforms.

63.0 Implement enhanced program structures. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 SC.912.N.1.1.

- 63.01 Write programs that include tables or arrays and routines for data entry and lookup.
- 63.02 Write routines to sort arrays.
- 63.03 Write programs that sort records in files.
- 63.04 Write programs to process transactions.
- 63.05 Write programs that use iteration.
- 63.06 Write programs that read and write sequential files.
- 63.07 Write programs that read and write random files.

64.0 Implement multimedia programming. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.G.2.4; MA.912.D.1.1; MA.912.D.1.2; MA.912.D.1.3; SC.912.P.10.1;  
SC.912.P.10.2; SC.912.P.10.5; SC.912.P.12.4; SC.912.P.12.5; SC.912.P.12.6.

- 64.01 Demonstrate proficiency in creating multiple composite objects.
- 64.02 Demonstrate proficiency in moving composite graphics objects.
- 64.03 Demonstrate proficiency in rotating composite graphics objects by hand.
- 64.04 Distinguish between flock and flee artificial intelligence algorithms.
- 64.05 Write programs that use blitting.
- 64.06 Simulate circular game board.
- 64.07 Demonstrate proficiency in creating a firing simulation.
- 64.08 Identify the basic constructs used in bounding box collision algorithm.
- 64.09 Identify the basic constructs used in truer bounding box collision.
- 64.10 Demonstrate proficiency in creating a creating a bouncing simulation.
- 64.11 Simulate pattern based movement.
- 64.12 Simulate multiple sprites movement.
- 64.13 Identify the basic constructs used in keyboard input.
- 64.14 Identify the basic constructs used in mouse input.
- 64.15 Identify the basic constructs used in double buffering.

65.0 Develop an understanding of programming techniques and concepts. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
MA.912.D.1.1; MA.912.D.2.1; MA.912.D.1.3; MA.912.D.6.1; SC.912.N.1.1.

- 65.01 Identify the basic constructs used in structured programming.
- 65.02 Distinguish between top-down and bottom-up design.
- 65.03 Distinguish between iteration and recursion.
- 65.04 Evaluate Boolean expressions.
- 65.05 Distinguish between interpreters and compilers.

2012 – 2013

### **Purpose**

This program is designed to prepare students for employment as a Game/Simulation Project Manager.

The content includes but is not limited to a capstone opportunity for students to learn and apply principles of project management, team-building, scheduling, coordination and budgeting to create a complete game or simulation product.

## Program Structure

This program is a planned sequence of instruction consisting of a single capstone course with one Occupational Completion Point. A student who completes the applicable competencies may exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	DIG0077	Game, Simulation, & Animation Advanced Applications	150 hours	15-1099.13

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8208400	Game, Simulation, & Animation Advanced Applications	1 credit	15-1099.13	2

The Game, Simulation, & Animation Advanced Applications program **must** include the following components:

**Pre-Project Planning Conference:** The teacher and all team members must participate in a pre-project planning conference, which is essential to designing advanced learning experiences that are appropriate for each individual's learning needs and career interests. It is critical that all parties involved understand and agree on time schedules, expectations, advanced learning applications and evaluation criteria.

**Project Criteria:** The following criteria shall be met when choosing the Game, Simulation, & Animation Advanced Applications project:

The project must allow experiences that utilize both skills and knowledge directly related to the student's career interests and the Game, Simulation, & Animation Education program in which the student is enrolled or has completed.

The project must provide opportunities for members to experience a high level of interactivity related to the challenges of learning and applying advanced skills.

The project must provide a safe and ethically sound environment with up-to-date facilities and equipment.

Each student must maintain a journal with daily entries describing:

- (a) Time spent on the project (log in and log out)
- (b) Description of the activity for the period(s)
- (c) Materials/equipment/fixtures used

- (d) Problems identified
- (e) Possible solutions to problems identified
- (f) Work accomplished
- (g) Solutions attempted
- (h) Solutions that failed
- (i) Which led to a new problem statement
- (j) Video or Still Images of the project as it progresses.
- (k) Plans, sketches, drawings, patterns, fixtures or other documentation of components designed or created

Each student will be expected to maintain a portfolio of the project according to the standards contained in this curriculum framework.

A progress report at mid-term will be given by each student to include a written research paper, that describes the area of investigation and an oral presentation to the remainder of the class and instructor or supervising faculty team, on the progress of the project, and all work accomplished. The progress report will be the basis for the mid-term evaluation grade.

A final oral progress report presentation at the end of the course will be given by each student or team that includes:

- (a) a review of the portfolio and the journal,
- (b) a demonstration of the project's final product
- (c) results
- (d) problems identified and solutions that worked or did not work, and
- (e) a conclusion.

The final progress report will be the basis for the final exam evaluation grade.

When offered for multiple credits, the student should have varied learning experiences in order to provide maximum education exposure.

The course may be supervised by a faculty team consisting of the members of the faculty who will be granting the multiple credit(s) if that is the case.

**Project Experience:** This component shall provide a match between the student's career interests and a project based situation that will provide exposure to the broad aspects of the selected industry. The assigned tasks should allow a progression and rotation through experiences requiring a variety of knowledge, skills and abilities at increasingly higher levels related to the student's studies and career interests.

**Supervision:** Teacher-coordinators of the Game, Simulation, & Animation Advanced Applications project must monitor and support learning. Students must also be evaluated a minimum of once per grading period by the teacher-coordinator. The evaluation should assess how well the student is progressing toward goals established by the teacher-coordinator. Portfolio assessment, orchestrated by the teacher-coordinator, is a recommended method of student assessment.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

### **Career and Technical Student Organization (CTSO)**

Florida Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Complete a skills inventory.
- 02.0 Demonstrate acceptable work values.
- 03.0 Demonstrate the ability to identify and solve problems.
- 04.0 Successfully work as a member of a team.
- 05.0 Manage time according to a plan.
- 06.0 Keep acceptable records of progress, problems and solutions.
- 07.0 Plan, organize and carry out a project plan.
- 08.0 Manage resources.
- 09.0 Use tools, materials, and processes in an appropriate and safe manner.
- 10.0 Demonstrate an understanding of the game and simulation development process.
- 11.0 Demonstrate appropriate scientific content related to the project.
- 12.0 Demonstrate appropriate mathematics content related to the project.
- 13.0 Research content related to the project and document the results.

- 14.0 Use presentation skills, and appropriate media to describe the progress, results and outcome of the experience.
- 15.0 Demonstrate competency in the area of expertise related to the Game, Simulation & Animation education program previously completed, that this project is based upon.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Game/Simulation/Animation Advanced Applications**  
**PSAV Number: B082400**

**Course Number: DIG0077**  
**Occupational Completion Point – A**  
**Video Game Designer – 150 Hours – SOC Code 15-1099.13**

- 01.0 Complete a safety skills inventory. – The student will be able to:
- 01.01 Practice safety procedures while enrolled in this course.
  - 01.02 Demonstrate an understanding of safety and general policies and procedures.
- 02.0 Demonstrate acceptable project values. – The student will be able to:
- 02.01 Maintain a positive relationship with peers and
  - 02.02 Demonstrate adaptive self-management skills.
  - 02.03 Rotate through a wide variety of increasingly responsible experiences.
  - 02.04 Apply basic skills in communications, mathematics, and science appropriate to technological content and learning activities.
- 03.0 Demonstrate the ability to identify and solve problems. – The student will be able to:
- 03.01 Prepare a design brief for each step in the project plan to identify constraints or design boundaries.
  - 03.02 Identify possible solutions for each design brief.
  - 03.03 Complete research and development activities associated with each design brief.
  - 03.04 Document problems as they arise.
  - 03.05 Prepare a problem statement for any activity that is not successful.
  - 03.06 Identify possible solutions for the new problem statement.
  - 03.07 Continue the R & D process until workable solutions are found to each problem stated.
- 04.0 Successfully work as a member of a team. – The student will be able to:
- 04.01 Accept responsibility for specific tasks in a given situation.
  - 04.02 Document progress, and provide feedback on work accomplished in a timely manner.
  - 04.03 Complete assigned tasks in a timely and professional manner.
  - 04.04 Reassign responsibilities when the need arises.
  - 04.05 Complete daily tasks as assigned on one's own initiative.
- 05.0 Manage time according to a plan. – The student will be able to:
- 05.01 Set realistic time frames and schedules.
  - 05.02 Keep a written time sheet of work accomplished on a daily basis.
  - 05.03 Meet goals and objectives set by the team.
  - 05.04 Identify individual priorities.

- 05.05 Complete a weekly evaluation of accomplishments, and reevaluate goals, objectives and priorities as needed.
- 06.0 Keep acceptable records of progress problems and solutions. – The student will be able to:
  - 06.01 Develop a record keeping system in the form of a log book to record daily progress.
  - 06.02 Use a project journal to identify problem statement
  - 06.03 Develop a portfolio of work accomplished to include design drawings, research, drawings and plans, storyboards, models, mock-ups and prototypes.
- 07.0 Plan, organize, and carry out a project plan. – The student will be able to:
  - 07.01 Determine the scope of a project.
  - 07.02 Organize the team according to individual strengths.
  - 07.03 Assign specific tasks within a team.
  - 07.04 Determine project priorities.
  - 07.05 Identify required resources.
  - 07.06 Plan research, design, development, and evaluation activities as required.
  - 07.07 Carry out the project plan to successful completion.
- 08.0 Manage resources. – The student will be able to:
  - 08.01 Identify required resources for each stage of the project plan.
  - 08.02 Determine the methods needed to acquire needed resources.
  - 08.03 Demonstrate good judgment in the use of resources.
  - 08.04 Recycle and reuse resources where appropriate.
  - 08.05 Demonstrate an understanding of proper legal and ethical treatment of copyrighted material.
- 09.0 Use tools, materials, and processes in an appropriate and safe manner. – The student will be able to:
  - 09.01 Identify the proper tool for a given job.
  - 09.02 Use tools and machines in a safe manner.
  - 09.03 Adhere to laboratory or job site safety rules and procedures.
  - 09.04 Identify the application of processes appropriate to the task at hand.
  - 09.05 Identify materials appropriate to their application.
- 10.0 Demonstrate an understanding of the game and simulation development process. – The student will be able to:
  - 10.01 State the goals of the game or simulation clearly.
  - 10.02 Identify and write a plan to achieve each goal.
  - 10.03 Develop a list of materials and content required for each goal.
  - 10.04 Develop a step by step procedure for developing the game or simulation.
  - 10.05 Follow a written procedure.
  - 10.06 Record data from evaluation activities.
  - 10.07 Document conclusions and solutions based on evaluation results, observations and data.

- 10.08 Document progress using a project log.
- 10.09 Write an abstract describing the project plan.
- 11.0 Demonstrate appropriate scientific content related to the project. – The student will be able to:
  - 11.01 Document how types of motion may be described, measured, and predicted.
  - 11.02 Demonstrate how types of force that act on an object and the effect of that force can be described, measured, and predicted.
  - 11.03 Document how the principles of Human Computer Interface (HCI) are incorporated into the project design.
  - 11.04 Demonstrate how science, technology, and society are interwoven and interdependent.
- 12.0 Demonstrate appropriate mathematics content related to the project. – The student will be able to:
  - 12.01 Identify different ways numbers are represented and used.
  - 12.02 Demonstrate proper use of the number systems.
  - 12.03 Develop effective operations on numbers and the relationships among these operations.
  - 12.04 Use estimation in problem solving and computation.
  - 12.05 Apply theories used in the solution to numbers.
  - 12.06 Use quantities in the real world and uses the measures to solve problems.
  - 12.07 Compare data within systems of measurement (both standard/nonstandard and metric/customary).
  - 12.08 Solve mathematical problems using length, time, weight/mass, temperature, money, perimeter, area, and volume, and estimate the effects of measurement errors on calculations.
  - 12.09 Apply appropriate units and instruments for measurement to achieve the degree of precision and accuracy required in real-world situations.
  - 12.10 Describe, draw, Identify, and analyzes two-and three-dimensional shapes.
  - 12.11 Visualize and illustrate ways in which shapes can be combined, subdivided, and changed.
  - 12.12 Coordinate geometry to locate objects in both two and three dimensions and to describe objects algebraically.
  - 12.13 Describe, analyze, and generalize a wide variety of patterns, relations, and functions.
  - 12.14 Uses expressions, equations, inequalities, graphs, and formulas to represent and interpret situations.
  - 12.15 Uses the tools of data analysis for managing information.
  - 12.16 Identify patterns and makes predictions from an orderly display of data using concepts of probability and statistics.
  - 12.17 Uses statistical methods to make inferences and valid arguments about real-world situations.
- 13.0 Research content related to the project and document the results. – The student will be able to:
  - 13.01 Identify the basic research needed to develop the project plan.

- 13.02 Identify available resources for completing background research required in the project plan.
  - 13.03 Demonstrate the ability to locate resource materials in a library, data base, internet and other research resources.
  - 13.04 Demonstrate the ability to organize information retrieval.
  - 13.05 Demonstrate the ability to prepare a topic outline.
  - 13.06 Write a draft of the research report.
  - 13.07 Edit and proof the research report. Use proper form for a bibliography, footnotes, quotations, and references.
  - 13.08 Prepare an electronically composed research paper in proper form.
  - 13.09 Conduct an alpha and beta evaluation of the project's product.
  - 13.10 Write a report on the evaluations, documenting results, data, observations, and design changes based on the results.
- 14.0 Use presentation skills, and appropriate media to describe the progress, results and outcomes of the experience. – The student will be able to:
- 14.01 Prepare a multi-media presentation on the completed project.
  - 14.02 Make an oral presentation, using multi-media materials.
  - 14.03 Review the presentation, and make changes in the delivery method(s) to improve presentation skills.
- 15.0 Demonstrate competency in the area of expertise related to the Game, Simulation & Animation education program previously completed that this project is based upon. – The student will be able to:
- 15.01 Demonstrate a mastery of the content of the selected subject area.
  - 15.02 Demonstrate the ability to use related technological tools, materials and processes related to the specific program area.
  - 15.03 Demonstrate the ability to apply the knowledge, experience and skill developed in the previous program completion to the successful completion of this demonstration.
  - 15.04 Demonstrate the acquisition of additional knowledge, skill and experience in one area of the selected field of study beyond the performance standards of the initial program standards.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Game, Simulation, & Animation Advanced Applications  
**Course Number:** 8208400  
**Course Credit:** 1

**Course Description:**

This is a project-based capstone course to provide Game, Simulation & Animation students with the opportunity to develop a project from vision to reality. Students work in teams to research, plan, design, create, test, redesign, test again, and then produce a finished game or simulation product.

16.0 Complete a safety skills inventory. – The student will be able to:

- 01.03 Practice safety procedures while enrolled in this course.
- 01.04 Demonstrate an understanding of safety and general policies and procedures.

17.0 Demonstrate acceptable project values. – The student will be able to:

- 02.05 Maintain a positive relationship with peers and
- 02.06 Demonstrate adaptive self-management skills.
- 02.07 Rotate through a wide variety of increasingly responsible experiences.
- 02.08 Apply basic skills in communications, mathematics, and science appropriate to technological content and learning activities.

18.0 Demonstrate the ability to identify and solve problems. – The student will be able to:

- 03.08 Prepare a design brief for each step in the project plan to identify constraints or design boundaries.
- 03.09 Identify possible solutions for each design brief.
- 03.10 Complete research and development activities associated with each design brief.
- 03.11 Document problems as they arise.
- 03.12 Prepare a problem statement for any activity that is not successful.
- 03.13 Identify possible solutions for the new problem statement.
- 03.14 Continue the R & D process until workable solutions are found to each problem stated.

19.0 Successfully work as a member of a team. – The student will be able to:

- 04.06 Accept responsibility for specific tasks in a given situation.
- 04.07 Document progress, and provide feedback on work accomplished in a timely manner.
- 04.08 Complete assigned tasks in a timely and professional manner.
- 04.09 Reassign responsibilities when the need arises.
- 04.10 Complete daily tasks as assigned on one's own initiative.

20.0 Manage time according to a plan. – The student will be able to:

- 05.06 Set realistic time frames and schedules.
  - 05.07 Keep a written time sheet of work accomplished on a daily basis.
  - 05.08 Meet goals and objectives set by the team.
  - 05.09 Identify individual priorities.
  - 05.10 Complete a weekly evaluation of accomplishments, and reevaluate goals, objectives and priorities as needed.
- 21.0 Keep acceptable records of progress problems and solutions. – The student will be able to:
- 06.04 Develop a record keeping system in the form of a log book to record daily progress.
  - 06.05 Use a project journal to identify problem statement
  - 06.06 Develop a portfolio of work accomplished to include design drawings, research, drawings and plans, storyboards, models, mock-ups and prototypes.
- 22.0 Plan, organize, and carry out a project plan. – The student will be able to:
- 07.08 Determine the scope of a project.
  - 07.09 Organize the team according to individual strengths.
  - 07.10 Assign specific tasks within a team.
  - 07.11 Determine project priorities.
  - 07.12 Identify required resources.
  - 07.13 Plan research, design, development, and evaluation activities as required.
  - 07.14 Carry out the project plan to successful completion.
- 23.0 Manage resources. – The student will be able to:
- 08.06 Identify required resources for each stage of the project plan.
  - 08.07 Determine the methods needed to acquire needed resources.
  - 08.08 Demonstrate good judgment in the use of resources.
  - 08.09 Recycle and reuse resources where appropriate.
  - 08.10 Demonstrate an understanding of proper legal and ethical treatment of copyrighted material.
- 24.0 Use tools, materials, and processes in an appropriate and safe manner. – The student will be able to:
- 09.06 Identify the proper tool for a given job.
  - 09.07 Use tools and machines in a safe manner.
  - 09.08 Adhere to laboratory or job site safety rules and procedures.
  - 09.09 Identify the application of processes appropriate to the task at hand.
  - 09.10 Identify materials appropriate to their application.
- 25.0 Demonstrate an understanding of the game and simulation development process. – The student will be able to:
- 10.10 State the goals of the game or simulation clearly.
  - 10.11 Identify and write a plan to achieve each goal.
  - 10.12 Develop a list of materials and content required for each goal.
  - 10.13 Develop a step by step procedure for developing the game or simulation.

- 10.14 Follow a written procedure.
  - 10.15 Record data from evaluation activities.
  - 10.16 Document conclusions and solutions based on evaluation results, observations and data.
  - 10.17 Document progress using a project log.
  - 10.18 Write an abstract describing the project plan.
- 26.0 Demonstrate appropriate scientific content related to the project. – The student will be able to:
- 11.05 Document how types of motion may be described, measured, and predicted.
  - 11.06 Demonstrate how types of force that act on an object and the effect of that force can be described, measured, and predicted.
  - 11.07 Document how the principles of Human Computer Interface (HCI) are incorporated into the project design.
  - 11.08 Demonstrate how science, technology, and society are interwoven and interdependent.
- 27.0 Demonstrate appropriate mathematics content related to the project. – The student will be able to:
- 12.18 Identify different ways numbers are represented and used.
  - 12.19 Demonstrate proper use of the number systems.
  - 12.20 Develop effective operations on numbers and the relationships among these operations.
  - 12.21 Use estimation in problem solving and computation.
  - 12.22 Apply theories used in the solution to numbers.
  - 12.23 Use quantities in the real world and uses the measures to solve problems.
  - 12.24 Compare data within systems of measurement (both standard/nonstandard and metric/customary).
  - 12.25 Solve mathematical problems using length, time, weight/mass, temperature, money, perimeter, area, and volume, and estimate the effects of measurement errors on calculations.
  - 12.26 Apply appropriate units and instruments for measurement to achieve the degree of precision and accuracy required in real-world situations.
  - 12.27 Describe, draw, Identify, and analyzes two-and three-dimensional shapes.
  - 12.28 Visualize and illustrate ways in which shapes can be combined, subdivided, and changed.
  - 12.29 Coordinate geometry to locate objects in both two and three dimensions and to describe objects algebraically.
  - 12.30 Describe, analyze, and generalize a wide variety of patterns, relations, and functions.
  - 12.31 Uses expressions, equations, inequalities, graphs, and formulas to represent and interpret situations.
  - 12.32 Uses the tools of data analysis for managing information.
  - 12.33 Identify patterns and makes predictions from an orderly display of data using concepts of probability and statistics.
  - 12.34 Uses statistical methods to make inferences and valid arguments about real-world situations.

28.0 Research content related to the project and document the results. – The student will be able to:

- 13.11 Identify the basic research needed to develop the project plan.
- 13.12 Identify available resources for completing background research required in the project plan.
- 13.13 Demonstrate the ability to locate resource materials in a library, data base, internet and other research resources.
- 13.14 Demonstrate the ability to organize information retrieval.
- 13.15 Demonstrate the ability to prepare a topic outline.
- 13.16 Write a draft of the research report.
- 13.17 Edit and proof the research report. Use proper form for a bibliography, footnotes, quotations, and references.
- 13.18 Prepare an electronically composed research paper in proper form.
- 13.19 Conduct an alpha and beta evaluation of the project's product.
- 13.20 Write a report on the evaluations, documenting results, data, observations, and design changes based on the results.

29.0 Use presentation skills, and appropriate media to describe the progress, results and outcomes of the experience. – The student will be able to:

- 14.04 Prepare a multi-media presentation on the completed project.
- 14.05 Make an oral presentation, using multi-media materials.
- 14.06 Review the presentation, and make changes in the delivery method(s) to improve presentation skills.

30.0 Demonstrate competency in the area of expertise related to the Game, Simulation & Animation education program previously completed that this project is based upon. – The student will be able to:

- 15.05 Demonstrate a mastery of the content of the selected subject area.
- 15.06 Demonstrate the ability to use related technological tools, materials and processes related to the specific program area.
- 15.07 Demonstrate the ability to apply the knowledge, experience and skill developed in the previous program completion to the successful completion of this demonstration.
- 15.08 Demonstrate the acquisition of additional knowledge, skill and experience in one area of the selected field of study beyond the performance standards of the initial program standards.

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in digital media, new media, and multimedia positions in the Information Technology career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Information Technology career cluster.

The content includes but is not limited to practical experiences in Web page design, interactive presentation development, testing and production. Specialized skills in multimedia presentations such as video editing, audio features, and simple animation and authoring software are used to produce a variety of interactive multimedia presentations.

### Program Structure

This program is a planned sequence of instruction consisting of five Occupational Completion Points in the program when implemented at the postsecondary level. At the secondary level, there are two Occupational Completion Points. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	OTA0040*	Information Technology Assistant*	150	27-1014
	GRA0005	Multimedia Production Assistant	150	
B	GRA0006	Multimedia Junior Designer	450	27-1014
C	GRA0007	Multimedia Designer	150	27-1014
D	GRA0008	Multimedia Producer	300	27-1014
E	GRA0009	Multimedia Specialist	150	27-1014

\* Note: OTA0040 is a core.

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8200320	Keyboarding and Business Skills	.5 credit	27-1014	2
		AND			
	8200330	Computer and Business Skills	.5 credit		2
		OR			
	8209020	Computing for College and Careers	1 credit		2
		OR			
	8207310	Introduction to Information Technology	1 credit		2
	8212430	Multimedia Foundations 1	1 credit	2	
B	8212440	Multimedia Foundations 2	1 credit	27-1014	2
	8212450	Multimedia Foundations 3	1 credit		2
	8207110	Web Design 1	1 credit		2

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to IT	6/36 17%	2/41 5%	1/45 2%	2/53 4%	2/52 4%	2/56 4%	2/55 4%	2/58 3%	2/35 6%	2/42 5%	2/56 4%	2/53 4%
Keyboarding and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computer and Business Skills	**	**	**	**	**	**	**	**	**	**	**	**
Computing for College and Careers	**	**	**	**	**	**	**	**	**	**	**	**
Multimedia Foundations 1	**	**	**	**	**	**	**	**	**	**	**	**
Multimedia Foundations 2	**	**	**	**	**	**	**	**	**	**	**	**
Multimedia Foundations 3	**	**	**	**	**	**	**	**	**	**	**	**
Web Design 1	**	**	**	**	**	**	**	**	**	**	**	**

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential

Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10.0, Language 10.0, and Reading 10.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the

student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (B070200) has a statewide articulation agreement approved by the Florida State Board of Education:

Graphics Technology AS/AAS (1611080300/0611080300) – 9 credits

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

#### **Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong

- learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
  - 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use Technology to apply and enhance communications skills in technical reading, writing.
- 04.0 Practice quality performance in the learning environment and the workplace.
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc.
- 09.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance.
- 11.0 Perform e-mail activities.
- 12.0 Demonstrate operating systems.
- 13.0 Develop an awareness of emerging technologies.

**OR**

**Computing for College and Careers competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication.
- 05.0 Use database and spreadsheet applications.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.

- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace.
- 10.0 Perform e-mail activities.
- 11.0 Demonstrate proficiency using slide presentation software.

**OR**

**Introduction to IT Competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance.
- 02.0 Demonstrate Comprehension and communication skills.
- 03.0 Use technology to enhance the effectiveness of communication skills.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles.
- 05.0 Practice quality performance in the learning environment and the workplace.
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance.
- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace.
- 11.0 Participate in work-based learning experiences.
- 12.0 Perform e-mail activities.
- 13.0 Demonstrate knowledge of different operating systems.
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW.
- 15.0 Demonstrate proficiency using HTML commands.
- 16.0 Demonstrate proficiency in page design applicable to the WWW.
- 17.0 Demonstrate proficiency using specialized web design software.
- 18.0 Develop an awareness of the information technology industry.
- 19.0 Develop an awareness of microprocessors and digital computers.
- 20.0 Develop an awareness of programming languages.
- 21.0 Develop an awareness of emerging technologies.
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model.
- 23.0 Demonstrate proficiency using common software applications.
- 24.0 Demonstrate proficiency using specialized software applications.

**Program Standards**

- 25.0 Demonstrate knowledge of presentation production issues.
- 26.0 Demonstrate proficiency in using presentation software and equipment.
- 27.0 Demonstrate proficiency in Web page design applicable to the WWW.
- 28.0 Demonstrate an understanding of HTML commands.
- 29.0 Demonstrate proficiency in using a WYSIWG editor, Web design, or Web animation for Web page design.
- 30.0 Demonstrate proficiency in using presentation software and equipment to produce a complex presentation.
- 31.0 Demonstrate proficiency using video editing software and equipment.
- 32.0 Demonstrate Proficiency in using presentation software and equipment to produce a presentation suitable for streaming via the Web.
- 33.0 Develop proficiency in using authoring software.
- 34.0 Participate in work-based learning experiences.
- 35.0 Apply job readiness, career planning and job seeking skills to obtain personal and professional goals.
- 36.0 Demonstrate language arts knowledge and skills.
- 37.0 Demonstrate mathematics knowledge and skills.
- 38.0 Demonstrate science knowledge and skills.
- 39.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 40.0 Solve problems using critical thinking skills, creativity and innovation.
- 41.0 Use information technology tools.
- 42.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 43.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 44.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 45.0 Describe the importance of professional ethics and legal responsibilities.
- 46.0 Explain the importance of employability skill and entrepreneurship skills.
- 47.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title:                   Multimedia Design Technology**  
**PSAV Number:                 B070200**

**Course Number: OTA0040**  
**Occupational Completion Point – A**  
**Multimedia Production Assistant – 150 Hours – SOC Code 15-1041**

**Keyboarding and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Demonstrate basic file management skills.
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 02.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
  - 02.02 Write clear and well-organized research papers, integrating a variety of information.
  - 02.03 Prepare and deliver an oral report with appropriate materials to the class
  - 02.04 Participate in large group discussions as a member and/or a leader.
  - 02.05 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.06 Accurately follow written and oral instructions.
  - 02.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 06.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 06.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 07.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 07.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 07.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 07.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
  - 07.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 08.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:

- 08.01 Accept constructive criticism.
  - 08.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 08.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 09.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 09.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 09.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

**AND**

**Computer and Business Skills competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Demonstrate basic file management skills.
  - 01.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 01.07 Describe ethical issues and problems associated with computers and information systems.
  - 01.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 02.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 02.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 02.02 Accurately follow written and oral instructions.
  - 02.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 03.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 03.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 03.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 04.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 04.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 05.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 05.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 05.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 05.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 06.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 06.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 06.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 07.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 07.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 07.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 07.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
  
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
  - 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Build mentor relationships with local professionals in the industry.
  
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 09.01 Accept constructive criticism.
  - 09.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
  
- 10.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 10.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
  
- 11.0 Perform e-mail activities. – The student will be able to:
  - 11.01 Describe e-mail capabilities and functions.
  - 11.02 Use the Internet to perform e-mail activities.
  
- 12.0 Demonstrate operating systems. – The student will be able to:
  - 12.01 Identify operating system file naming conventions.

- 12.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
- 12.03 Demonstrate a working knowledge of standard file formats.
- 12.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

13.0 Develop an awareness of emerging technologies. – The student will be able to:

- 13.01 Compare and contrast various methods of evaluation for emerging technologies.
- 13.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
- 13.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

OR

**Computing for College and Careers competencies:**

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
- 01.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
- 01.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
- 01.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
- 01.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
- 01.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
- 01.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 02.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
- 02.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
- 02.03 Prepare and deliver a report using appropriate presentation software.
- 02.04 Select a team leader to facilitate large group discussions with team members.

- 02.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 02.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 03.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 03.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 03.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 03.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 03.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 03.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 03.08 Perform various mail merge options.
- 04.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 04.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 04.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 04.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 04.04 Demonstrate proficiency using search engines and search tools.
  - 04.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 04.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 04.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.
  - 04.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.

- 05.0 Use database and spreadsheet applications. The student will be able to:
- 05.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 05.02 Create cell data, apply auto fill and hyperlinks.
  - 05.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 05.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 05.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 05.06 Demonstrate data visually by creating and modifying charts and images.
  - 05.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 05.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 06.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 06.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 06.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 06.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 08.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 08.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 08.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 08.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 08.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 08.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 08.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 08.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 08.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 09.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 09.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 09.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 09.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 10.0 Perform e-mail activities. – The student will be able to:
- 10.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 10.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 10.03 Manage tasks and organize information.
- 11.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 11.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 11.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.
  - 11.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.

- 11.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 11.05 Explore various design tools and applications.
- 11.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 11.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 11.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 11.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

**OR**

**Introduction to Information Technology competencies:**

- 01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 01.03 Identify and describe communications and networking systems used in workplace environments.
  - 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
  - 01.06 Describe ethical issues and problems associated with computers and information systems.
  
- 02.0 Demonstrate comprehension and communication skills. – The student will be able to:
  - 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
  - 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
  - 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
  - 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
  - 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
  - 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
  - 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
  - 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).
  - 05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.
- 07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

- 08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.
  - 08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).
  - 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.

- 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 14.0 Demonstrate proficiency navigating the internet, intranet, and the www. – The student will be able to:
- 14.01 Identify and describe Web terminology.
  - 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
  - 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
  - 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
  - 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
  - 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
  - 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
  - 14.08 Identify effective Boolean search strategies.
- 15.0 Demonstrate proficiency using html commands. – The student will be able to:
- 15.01 Identify elements of a Web page.
  - 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
  - 15.03 Define basic HTML terminology.
  - 15.04 Analyze HTML source code developed by others.
  - 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
  - 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
  - 15.07 Edit and test HTML documents for accuracy and validity.
  - 15.08 Use basic functions of WYSIWYG editors.
  - 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
  - 15.10 Enhance web pages through the addition of images and graphics including animation.

- 16.0 Demonstrate proficiency in page design applicable to the www. – The student will be able to:
- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
  - 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
  - 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
  - 16.04 Use image design software to create and edit images.
  - 16.05 Demonstrate proficiency in publishing to the Internet.
  - 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
  - 16.07 Explain the need for web-based applications.
- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).

- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the open systems interface (osi) model . – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.
  - 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

**Course Number: GRA0005**

**Occupational Completion Point – A**

**Multimedia Production Assistant – 150 Hours – SOC Code 27-1014**

- 25.0 Demonstrate knowledge of presentation production issues. – The student will be able to:
- 25.01 Identify characteristics of various types of presentations (informing, selling, teaching, entertaining)
  - 25.02 Identify presentation materials (e.g.. handouts, seminar notebooks, business cards, coupons, etc.) and presentation marketing mediums (ex. print media such as newspaper, magazines; TV; movies; computer presentations; interactive CD ROM; kiosks, and Web pages, etc.)
  - 25.03 Identify design characteristics (fonts, size and styles, backgrounds, etc.) that are suited for each type of presentation format and material.
  - 25.04 Demonstrate knowledge of copyright laws including copyright statue, disclaimers, and filing procedures.
  - 25.05 Research and identify skills needed for career positions in multimedia
  - 25.06 Demonstrate an understanding of graphic and other file formats (e.g., EPS, TIFF, JPEG, ASCII, MPEG, MIDI, AVI, WAV, etc.) and knowledge of image size when scanning and saving files for use in different presentation types (Web, computer, print, etc.)
  - 25.07 Demonstrate knowledge of presentation vocabulary/terms.
- 26.0 Demonstrate proficiency in using presentation software and equipment. – The student will be able to:
- 26.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.
- 36.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 36.01 Locate, comprehend and evaluate key elements of oral and written information. AF2.4
  - 36.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF2.5
  - 36.03 Present information formally and informally for specific purposes and audiences. AF2.9
- 37.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF3.0
- 37.01 Demonstrate knowledge of arithmetic operations. AF3.2
  - 37.02 Analyze and apply data and measurements to solve problems and interpret documents. AF3.4
  - 37.03 Construct charts/tables/graphs using functions and data. AF3.5
- 38.0 Demonstrate science knowledge and skills. – The student will be able to: AF4.0
- 38.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF4.1
  - 38.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF4.3

**Course Number: GRA0006**  
**Occupational Completion Point – B**  
**Multimedia Junior Designer – 450 Hours – SOC Code 27-1014**

27.0 Demonstrate proficiency in web page design applicable to the WWW. – The student will be able to:

- 27.01 Determine the objectives and the audience for Web pages.
- 27.02 Identify design strategies to reach and keep an audience
- 27.03 Use storyboarding to plan a Web site.
- 27.04 Create styles and other design elements (e.g. backgrounds, colors, fonts, buttons, etc.)

28.0 Demonstrate an understanding of HTML commands. – The student will be able to:

- 28.01 Compare WYSIWG editors to non-WYSIWG coding.
- 28.02 Interpret HTML coding on an existing Web page.
- 28.03 Use HTML commands to write a Web page.

29.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design. – The student will be able to:

- 29.01 Create Web pages for publication.
- 29.02 Apply style sheets for consistent Web site design.
- 29.03 Format text for Web pages (e.g., font families, sizes)
- 29.04 Create and edit images, photographs for Web pages using digital imaging software (e.g. ImageReady in Photoshop).
- 29.05 Insert created buttons into a Web page and test for accuracy
- 29.06 Create navigational links.
- 29.07 Insert audio files into a Web page.
- 29.08 Create, edit and integrate video files into a Web page.
- 29.09 Create, edit and integrate animation files into a Web page.
- 29.10 Create Meta commands and key words for search engines.
- 29.11 Optimize page size for effective downloading to browsers.
- 29.12 Create and incorporate a form in a Web page.
- 29.13 Edit and test links for accuracy and validity.
- 29.14 Optimize images to make them “Web ready”.
- 29.15 Demonstrate knowledge of image formats related to photos and graphics on the Internet (e.g. Graphic formats (Tiff & EPS), Web formats (JPEG, GIF, PNG), etc.
- 29.16 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
- 29.17 Save and export a photograph to the Web in the format best for image quality and file size.
- 29.18 Demonstrate knowledge of the terms and vocabulary used with the animation process, animation software, and types of animation (e.g. 2D vs. 3D, Cel and Keyframe animation).

39.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:

- 39.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 39.02 Locate, organize and reference written information from various sources. CM 3.0

- 39.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 39.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 39.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 39.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 39.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 40.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 40.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 40.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 40.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 40.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 41.0 Use information technology tools. – The student will be able to:
- 41.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 41.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 41.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 41.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 42.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 42.01 Describe the nature and types of business organizations. SY 1.0
- 42.02 Explain the effect of key organizational systems on performance and quality.
- 42.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 42.04 Explain the impact of the global economy on business organizations.
- 43.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 43.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 43.02 Explain emergency procedures to follow in response to workplace accidents.
- 43.03 Create a disaster and/or emergency response plan. SHE 2.0
- 44.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 44.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0

- 44.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 44.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
- 44.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 45.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 45.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 45.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1
- 45.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 45.04 Interpret and explain written organizational policies and procedures. ELR 2.0
- 46.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 46.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
- 46.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
- 46.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
- 46.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
- 46.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
- 46.06 Identify and exhibit traits for retaining employment. ECD 7.0
- 46.07 Identify opportunities and research requirements for career advancement. ECD 8.0
- 46.08 Research the benefits of ongoing professional development. ECD 9.0
- 46.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 47.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 47.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
- 47.02 Describe the effect of money management on personal and career goals. FL 3.0
- 47.03 Develop a personal budget and financial goals. FL 3.1
- 47.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
- 47.05 Maintain financial records. FL 3.3
- 47.06 Read and reconcile financial statements. FL 3.4
- 47.07 Research, compare and contrast investment opportunities.

**Course Number: GRA0007**  
**Occupational Completion Point – C**  
**Multimedia Designer – 150 Hours – SOC Code 27-1014**

- 30.0 Demonstrate proficiency in using presentation software and equipment to produce a complex presentation. – The student will be able to:

- 30.01 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.
  - 30.02 Demonstrate knowledge of the roles and responsibilities of a multimedia production team (e.g. project manager, creative or design director, content experts, writers, graphic designers, animators, sound designers, videographer, interface designers/programmers, etc.)
  - 30.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation.
- 31.0 Demonstrate proficiency using video editing software and equipment. – The student will be able to:
- 31.01 Demonstrate knowledge of video and sound editing vocabulary, terms, and acronyms.
  - 31.02 Demonstrate knowledge of non-linear editing software (NLEs) and compare the strengths and weaknesses of these programs.
  - 31.03 Identify components of non-linear video editing equipment
  - 31.04 Set-up non-linear video editing equipment
  - 31.05 Compare offline to “real time” video editing
  - 31.06 Use storyboarding to plan a short nonlinear video project that includes existing video footage with a title, transitions, background sound, voice-over, animation, and rolling credits.
  - 31.07 Create and edit a movie using video editing software that includes existing video footage with a title, transitions, background sound, voice-over, and rolling credits and output to video.
  - 31.08 Collaborate with team members to create a short movie utilizing good lighting and sound: plan, shoot, and edit video footage as a team.
  - 31.09 Using a video editor, create animated GIFs.
  - 31.10 Collaborate with team members to plan, edit, and shoot video footage utilizing advanced video editing techniques and output to video.
  - 31.11 Discuss the use of batch processing and project trimming
  - 31.12 Plan, create, edit and present a short nonlinear QuickTime movie with title, transitions, sub and virtual clips, sound, background music, voice-over, and credits.

**Course Number: GRA0008**  
**Occupational Completion Point – D**  
**Multimedia Producer – 300 Hours – SOC Code 27-1014**

- 32.0 Demonstrate proficiency in using presentation software and equipment to create a presentation suitable for streaming via the Web. – The student will be able to:
- 32.01 Create a self-running presentation with synchronized audio, convert presentation slides into streaming ASF files for use on the Web.
- 33.0 Develop proficiency in using authoring software. – The student will be able to:
- 33.01 Plan interactive projects for use in a kiosk, CD, DVD, E-merchandizing, computer-based presentation or training or corporate presentation

- 33.02 Use authoring software to create an interactive project for use in a kiosk, CD, DVD, merchandizing application, computer-based training or corporate presentation.
  - 33.03 Have the created interactive project evaluated and tested by users and make modifications to improve the project.
  - 33.04 Collaborate with team members to plan, edit, evaluate, and present a multimedia interactive presentation or product.
- 34.0 Participate in work-based learning experiences. – The student will be able to:
- 34.01 Participate in work-based learning experiences in a multimedia environment.

**Course Number: GRA0009**

**Occupational Completion Point – E**

**Multimedia Specialist – 150 Hours – SOC Code 27-1014**

- 35.0 Apply job readiness, career planning and job seeking skills to obtain personal and professional goals. – The student will be able to:
- 35.01 Create a digital resume
  - 35.02 Create a digital portfolio
  - 35.03 Market multimedia production skills for employment

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**            **Keyboarding and Business Skills**  
**Course Number:**       **8200320**  
**Course Credit:**         **.5**

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends and to introduce students to the basics and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental word processing applications, so that they may be used as communication tools for enhancing personal and work place proficiency in an information-based society.

This course, along with Computer and Business Skills is equivalent to Computing for College and Careers. Students should complete this course before enrolling in Computer and Business Skills.

10.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:

- 10.01 Develop keyboarding skills to enter and manipulate text and data.
- 10.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 10.03 Demonstrate basic file management skills.

11.0 Demonstrate comprehension and communication skills. – The student will be able to:

- 11.01 Read and comprehend technical and non-technical reading assignments related to course content including trade journals, books, magazines and electronic sources.
- 11.02 Write clear and well-organized research papers, integrating a variety of information.
- 11.03 Prepare and deliver an oral report with appropriate materials to the class
- 11.04 Participate in large group discussions as a member and/or a leader.
- 11.05 Take notes, organize, summarize, and paraphrase ideas and details.
- 11.06 Accurately follow written and oral instructions.
- 11.07 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.

12.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 12.01 Select and use word processing software and accompanying features to enhance written business communications.
- 12.02 Use the writing process to create/edit business documents appropriate to the subject matter, purpose, and audience.

- 12.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 13.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/employee roles. Demonstrate initiative, courtesy, loyalty, honesty, cooperation and punctuality as a team member. – The student will be able to:
- 13.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 13.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 13.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 14.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 14.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 14.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 15.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 15.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 15.02 Identify, analyze, and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 15.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 16.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 16.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 16.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.

- 16.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow up.)
- 16.04 Design, initiate, refine, and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
- 17.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
  - 17.01 Accept constructive criticism.
  - 17.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 17.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 18.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
  - 18.01 Perform business tasks (e.g., filing and records management, scheduling, reprographics, mail handling, etc.).
  - 18.02 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computer and Business Skills  
**Course Number:** 8200330  
**Course Credit:** .5

**Course Description:**

This course is designed to introduce students to the basic skills and foundations required for today's business environments. Emphasis is placed on developing proficiency with touch keyboarding and fundamental computer applications using databases, spreadsheets, presentation applications, and the integration of these programs using software that meets industry standards.

This course, along with Keyboarding and Business Skills is equivalent to Computing for College and Careers. Students should complete Keyboarding and Business Skills before enrolling in this course.

- 14.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. Apply ergonomic principles applicable to the configuration of computer workstations. – The student will be able to:
- 14.01 Develop keyboarding skills to enter and manipulate text and data.
  - 14.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
  - 14.03 Identify and describe communications and networking systems used in workplace environments.
  - 14.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 14.05 Demonstrate basic file management skills.
  - 14.06 Troubleshoot problems with computer software, hardware, peripherals, and other office equipment.
  - 14.07 Describe ethical issues and problems associated with computers and information systems.
  - 14.08 Apply ergonomic principles applicable to the configuration of computer workstations.
- 15.0 Use technology to apply and enhance communication skills in technical reading, writing, speaking, listening, and viewing. – The student will be able to:
- 15.01 Take notes, organize, summarize, and paraphrase ideas and details.
  - 15.02 Accurately follow written and oral instructions.
  - 15.03 Interpret data on graphs, charts, diagrams, and tables commonly used in this industry/occupation.
- 16.0 Use technology to apply and enhance communication skills in technical reading, writing. – The student will be able to:

- 16.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communications.
  - 16.02 Use computer networks (e.g., Internet, on-line databases, e-mail) to facilitate collaborative or individual learning and communication.
  - 16.03 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.
- 17.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:
- 17.01 Assess personal, peer, and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving and decision-making skills).
  - 17.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).
- 18.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Demonstrate an awareness of quality service and the personal and professional standards required to establish an effective service-based culture in the workplace, business, or learning environment.
  - 18.02 Identify, analyze and implement managerial skills necessary for maintaining a high quality work environment, goals, and strategic planning in business settings.
  - 18.03 Follow accepted rules, regulations, policies, procedures, processes, and workplace safety.
- 19.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace and to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 19.01 Analyze, interpret, compile and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.
  - 19.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 19.03 Select and use the correct mathematical processes and tools to solve complex problem settings that are typical of business settings and use formulas when appropriate.
- 20.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:
- 20.01 Assess, analyze, and reassess individual talents, aptitudes, interests, and personal characteristics as they relate to potential future careers in business environments.
  - 20.02 Use personal assessment tools to identify personal strengths and weaknesses

related to learning and work environments.

- 20.03 Analyze job and career requirements and relate career interests to opportunities in the global economy.
- 21.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. Experience work-based learning through job shadowing, mentoring, e-coaching, etc. – The student will be able to:
- 21.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 21.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 21.03 Demonstrate job-seeking skills required for entry-level employment (e.g., resume, application, interview, follow-up).
  - 21.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 21.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 21.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 21.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 21.08 Build mentor relationships with local professionals in the industry.
- 22.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 22.01 Accept constructive criticism.
  - 22.02 Apply appropriate strategies to manage and resolve conflict in work situations.
  - 22.03 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, and respect for self and others, professional dress, etc.).
- 23.0 Perform office functions and responsibilities to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 23.01 Demonstrate knowledge of ethical behavior in a business environment (e.g., confidentiality of information, employee right to know, hiring practices, plagiarism, copyright violations, sexual harassment, mission statement, code of ethics, etc.).
- 24.0 Perform e-mail activities. – The student will be able to:
- 24.01 Describe e-mail capabilities and functions.
  - 24.02 Use the Internet to perform e-mail activities.
- 25.0 Demonstrate operating systems. – The student will be able to:
- 25.01 Identify operating system file naming conventions.

- 25.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 25.03 Demonstrate a working knowledge of standard file formats.
  - 25.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).
- 26.0 Develop an awareness of emerging technologies. – The student will be able to:
- 26.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 26.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 26.03 Compare and contrast emerging technologies (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Computing for College and Careers  
**Course Number:** 8209020  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of current business and information systems and trends, and to introduce students to fundamental skills required for today's business and academic environments. Emphasis is placed on developing proficient fundamental computer skills. The intention of this course is to prepare students to be successful both personally and professionally in an information based society. Computing for College and Careers includes proficiency with computers in the exploration and use of: databases, the internet, spreadsheets, presentation applications, management of personal information and email, word processing and document manipulation, and the integration of these programs using software that meets industry standards.

- 12.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 12.01 Develop keyboarding skills to enter and manipulate text and data.
  - 12.02 Describe and use current computer technology and software to perform personal and business related tasks in the workplace by establishing digital calendars, meetings, appointments, and create and manipulate e-mail contacts.
  - 12.03 Identify and describe types of file systems and classify common file extensions based on software application programs used in the workplace environment.
  - 12.04 Use reference materials such as on-line help, tutorials, and manuals available for application software.
  - 12.05 Demonstrate basic computer file management skills and file naming conventions to accurately organize files into hierarchies by labeling file folders for easy accessibility.
  - 12.06 Discuss the process of troubleshooting problems with computer hardware peripherals, including input and output devices in the workplace environment.
  - 12.07 Describe ethical issues and problems associated with computers and information systems, including federal laws against anti-piracy with computers and PC software security protection.
  - 12.08 Apply ergonomic principles and view devices applicable to computer workstation and the workplace environment.
- 13.0 Demonstrate comprehension and communication skills. – The student will be able to:
- 13.01 Read and comprehend technical and non-technical reading assignments related to course content, including, books, magazines and electronic sources.
  - 13.02 Write clear and well-organized research papers using MLA or APA documentation formats, integrating software applications for documentation setup. Demonstrate knowledge of ethical behavior regarding plagiarism and copyright violations.
  - 13.03 Prepare and deliver a report using appropriate presentation software.

- 13.04 Select a team leader to facilitate large group discussions with team members.
  - 13.05 Take notes, organize, summarize, and paraphrase main ideas and details using various note taking systems and reading strategies.
  - 13.06 Interpret data on line graphs, pie charts, diagrams, and tables commonly used in spreadsheet software applications that incorporate industry data.
- 14.0 Use technology to enhance the effectiveness of communication skills. – The student will be able to:
- 14.01 Select and use word processing software and accompanying features to enhance written business communications.
  - 14.02 Share and maintain documents by applying different views and protection to a document and manage document versions. Share and save a document and apply a template.
  - 14.03 Format content to a document by applying font, paragraph attributes, indent and tab settings to text and paragraphs. Apply spacing settings to text and paragraphs. Navigate and search through a document, create and manipulate tables.
  - 14.04 Apply page layout and reusable content by editing and manipulating page setup settings and applying themes. Construct content by using the building blocks tools. Create and manipulate page backgrounds, headers and footers.
  - 14.05 Use image design theory and software to create illustrations, shapes, and graphics and include a selection in a document. Insert and format pictures, shapes, and clipart. Apply and manipulate text boxes.
  - 14.06 Proofread documents by validating content through the use of spell and grammar check. Configure autocorrect settings, insert and modify comments in a document.
  - 14.07 Apply references and hyperlinks, create end and footnotes, and create a table of contents in a document.
  - 14.08 Perform various mail merge options.
- 15.0 Use computer networks, internet and online databases to facilitate collaborative or individual learning and communication. The student will be able to:
- 15.01 Demonstrate how to connect to the Internet and use appropriate Internet protocol. Identify and describe web terminology, addresses and how browsers work.
  - 15.02 Demonstrate proficiency using basic features of GUI browsers, including: bookmarks, basic configurations, e-mail configurations, and address books. Describe appropriate browser security configurations.
  - 15.03 Describe information technology terminology, including Internet, intranet, ethics, copyright laws, and regulatory control.
  - 15.04 Demonstrate proficiency using search engines and search tools.
  - 15.05 Use various web tools, including: downloading files, transfer of files, telnet, PDF, plug-ins, and data compression. Identify Boolean search strategies.
  - 15.06 Use computer networks, including on-line databases and resources to facilitate collaborative or individual learning and communication.
  - 15.07 Describe how business transactions and academic applications are supported by interactive web applications, including sharing photos and video clips, messaging, chatting and collaborating.

- 15.08 Describe appropriate use of social networking sites and applications, blogs and collaborative tools for file sharing and using listservers.
- 16.0 Use database and spreadsheet applications. The student will be able to:
- 16.01 Manage the worksheet environment by navigating through and printing a worksheet. Personalize the environment by manipulating the ribbon tabs, group settings, importing data, manipulating properties, files and folders.
  - 16.02 Create cell data, apply auto fill and hyperlinks.
  - 16.03 Format cells and worksheets by applying cell formats, merging and splitting cells, create row and column titles, hide and unhide column titles, rows and columns. Manipulate page set up options. Create and apply cell styles.
  - 16.04 Manage worksheets and workbooks by creating and formatting worksheets and manipulating views.
  - 16.05 Apply formulas and functions by creating formulas, enforcing precedence and cell formula references. Apply conditional formula logic, name and cell ranges.
  - 16.06 Demonstrate data visually by creating and modifying charts and images.
  - 16.07 Share worksheet data through email, changing file type and different versions. Manage comments.
  - 16.08 Analyze and organize data through filters, sorting and applying conditional formatting.
- 17.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:
- 17.01 Explore, design, implement, and evaluate organizational structures and cultures for managing project teams.
  - 17.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
  - 17.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.
- 18.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:
- 18.01 Analyze, interpret, compile, and demonstrate the ability to present and communicate data in understandable and measurable terms using common statistical procedures using charts and graphs.
  - 18.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).
  - 18.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas and spreadsheets when appropriate.
- 19.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

- 19.01 Analyze personal skills and aptitudes in comparison with various business related job and career options.
  - 19.02 Use career resources to develop an information base that reflects local and global business related occupations and opportunities for continuing education and workplace experience.
  - 19.03 Demonstrate job-seeking skills required for entry-level employment, including resume, cover letter, thank you letter, online/hard copy application, mock interview, and follow-up call.
  - 19.04 Design and initiate a plan to facilitate growth and skill development related to anticipated job requirements and career expectations.
  - 19.05 Refine and implement a plan to facilitate personal growth and skill development related to anticipated job requirements and career expectations.
  - 19.06 Demonstrate an awareness of specific job requirements and career paths (e.g., requirements, characteristics needed) in business environments.
  - 19.07 Demonstrate an awareness of the potential impact of local and global trends on career plans and life goals.
  - 19.08 Describe the importance of building community and mentor relationships in a variety of professional and workplace situations.
- 20.0 Demonstrate personal and interpersonal skills appropriate for the workplace. – The student will be able to:
- 20.01 Demonstrate ways of accepting constructive criticism on team projects within the workplace.
  - 20.02 Apply appropriate strategies to manage and resolve conflicts in work situations.
  - 20.03 Demonstrate personal and interpersonal skills appropriate for the workplace, including: responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, and professional dress.
- 21.0 Perform e-mail activities. – The student will be able to:
- 21.01 Describe and perform e-mail capabilities and functions. Create and send messages, manage signature and automated messages. Save, send, schedule, and manage junk mail, e-mail and spam. Configure message sensitivity, security and delivery options.
  - 21.02 Use the Internet to perform e-mail activities, including: attaching external files, saving e-mail attachments, viewing mailbox details, establishing appointments, creating contact groups, and sending a meeting to a contact group to communicate in the workplace.
  - 21.03 Manage tasks and organize information.
- 22.0 Demonstrate proficiency using slide presentation software. – The student will be able to:
- 22.01 Manage and configure the presentation software environment, including: adjusting views, manipulating window, configuring toolbar and file options.
  - 22.02 Create slide presentations utilizing various project development elements, including: adding and removing slides, slide layouts, format slide design, insert or format placeholders.

- 22.03 Locate, create and incorporate graphical and multimedia elements, including: shapes, graphics, images, bullets, hyperlinks, video, and audio into a slide presentation appropriate for the project.
- 22.04 Explore and apply design and color theory to create dynamic and appealing visuals.
- 22.05 Explore various design tools and applications.
- 22.06 Create and manipulate graphical and multimedia elements to improve or develop new contacts appropriate for the project, including: creation of images, color selections, tone, hue and contrast.
- 22.07 Demonstrate various business-related elements that can be created, embedded and manipulated in a slide presentation, including: charts, graphs, tables, spreadsheets, flowcharts, and organizational charts.
- 22.08 Apply slide transitions and create custom animations to slide presentations appropriate for the target audience.
- 22.09 Demonstrate different delivery methods for slide presentations, including: packaging for CD delivery, video projection – on mouse click, rehearsed timings, printing options - outlines, handouts, slides and notes.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Introduction to Information Technology  
**Course Number:** 8207310  
**Course Credit:** 1

**Course Description:**

This course is designed to provide an introduction to information technology concepts and careers as well as the impact information technology has on the world, people, and industry and basic web design concepts. The content includes information technology career research; operating systems and software applications; electronic communications including e-mail and Internet services; basic HTML, DHTML, and XML web commands and design; emerging technologies, and Web page design.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	6/36 17%	<b>Biology 1</b>	2/56 4%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	2/41 5%	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	2/35 6%	<b>Marine Science 1 Honors</b>	2/42 5%
<b>Geometry</b>	1/45 2%	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Demonstrate knowledge, skill, and application of information systems to accomplish job objectives and enhance workplace performance. – The student will be able to:

- 01.01 Develop keyboarding skills to enter and manipulate text and data.
- 01.02 Describe and use current and emerging computer technology and software to perform personal and business related tasks.
- 01.03 Identify and describe communications and networking systems used in workplace environments.
- 01.04 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.05 Troubleshoot problems with computer hardware peripherals and other office equipment.
- 01.06 Describe ethical issues and problems associated with computers and information systems.

02.0 Demonstrate comprehension and communication skills. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2; MA.912.D.8.1; MA.912.A.3.15; MA.912.G.8.2.

- 02.01 Use listening, speaking, telecommunication and nonverbal skills and strategies to communicate effectively with supervisors, co-workers, and customers.
- 02.02 Organize ideas and communicate oral and written messages appropriate for information technology environments.
- 02.03 Collaborate with individuals and teams to complete tasks and solve information technology problems.
- 02.04 Identify, define, and discuss professional information technology terminology appropriate for internal and external communications in an information technology environment.
- 02.05 Apply the writing process to the creation of appropriate documents following designated business formats.
- 02.06 Demonstrate an awareness of project management concepts and tools (e.g., timelines, deadlines, resource allocation, time management, delegation of tasks, collaboration, etc.).

- 03.0 Use technology to enhance the effectiveness of communication skills —The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.2.12.

- 03.01 Use database, spreadsheet, presentation software, scheduling, and integrated software packages to enhance communication.
- 03.02 Respond to and utilize information derived from multiple sources (e.g., written documents, instructions, e-mail, voice mail) to solve business problems and complete business tasks.

- 04.0 Develop an awareness of management functions and organizational structures as they relate to today's workplace and employer/ employee roles. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.2.13; MA.912.A.3.15.

- 04.01 Explore, design, implement, and evaluate organizational structures and cultures.
- 04.02 Explore and demonstrate an awareness of current trends in business and the employee's role in maintaining productive business environments in today's global workplace.
- 04.03 Collaborate with individuals and teams to complete tasks and solve business-related problems and demonstrate initiative, courtesy, loyalty, honesty, cooperation, and punctuality as a team member.

- 05.0 Practice quality performance in the learning environment and the workplace. – The student will be able to:

- 05.01 Assess personal, peer and group performance and identify and implement strategies for improvement (e.g., organizational skills, note taking/outlining, advance organizers, reasoning skills, problem-solving skills, and decision-making skills).

05.02 Develop criteria for assessing products and processes that incorporate effective business practices (e.g., time management, productivity, total quality management).

06.0 Incorporate appropriate leadership and supervision techniques, customer service strategies, and standards of personal ethics to accomplish job objectives and enhance workplace performance. – The student will be able to:

06.01 Demonstrate awareness of the following workplace essentials: Quality customer service; business ethics; confidentiality of information; copyright violations; accepted workplace rules, regulations, policies, procedures, processes, and workplace safety, and appropriate attire and grooming.

07.0 Apply mathematical operations and processes as well as financial planning strategies to commonly occurring situations in the workplace to accomplish job objectives and enhance workplace performance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.A.5.7; MA.912.F.5.2; MA.912.A.10.1; MA.912.A.10.2; MA.912.S.1.2; MA.912.S.3.2; MA.912.A.3.5; MA.912.G.8.2.

07.01 Analyze, interpret, compile, and demonstrate the ability to present/communicate data in understandable and measurable terms using common statistical procedures.

07.02 Use common standards of measurement including the metric system in solving work-related or business problems (e.g., length, weight, currency, time).

07.03 Select and use the correct mathematical processes and tools to solve complex problem situations that are typical of business settings and use formulas when appropriate.

08.0 Assess personal strengths and weaknesses as they relate to job objectives, career exploration, personal development, and life goals. – The student will be able to:

08.01 Use personal assessment tools to identify personal strengths and weaknesses related to learning and work environments.

08.02 Analyze job and career requirements and relate career interests to opportunities in the global economy.

09.0 Incorporate knowledge gained from individual assessment and job/career exploration to design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.2.

09.01 Research, compare, and contrast information technology career clusters (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of information technology careers, the need for information technology workers, etc.).

- 09.02 Describe the variety of occupations and professions within the world of information technology including those where information technology is either in a primary focus or in a supportive role.
  - 09.03 Describe job requirements for the variety of occupations and professions within the global world of information technology.
  - 09.04 Analyze personal skills and aptitudes in comparison with information technology career opportunities.
  - 09.05 Refine and implement a plan to facilitate personal growth and skill development related to information technology career opportunities.
  - 09.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 10.0 Demonstrate human relations/interpersonal skills appropriate for the workplace. – The student will be able to:
- 10.01 Accept constructive criticism.
  - 10.02 Demonstrate personal and interpersonal skills appropriate for the workplace (e.g., responsibility, dependability, punctuality, integrity, positive attitude, initiative, respect for self and others, professional dress, etc.).
- 11.0 Participate in work-based learning experiences. – The student will be able to:
- 11.01 Participate in work-based learning experiences in an information technology environment.
  - 11.02 Discuss the use of technology in an information technology environment.
- 12.0 Perform e-mail activities. – The student will be able to:
- 12.01 Describe e-mail capabilities and functions.
  - 12.02 Identify components of an e-mail message.
  - 12.03 Identify the components of an e-mail address.
  - 12.04 Identify when to use different e-mail options.
  - 12.05 Attach a file to an e-mail message.
  - 12.06 Forward an e-mail message.
  - 12.07 Use an address book.
  - 12.08 Reply to an e-mail message.
  - 12.09 Use the Internet to perform e-mail activities.
  - 12.10 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.
  - 12.11 Identify when to include information from an original e-mail message in a response.
  - 12.12 Identify common problems associated with widespread use of e-mail.
- 13.0 Demonstrate knowledge of different operating systems. – The student will be able to:
- 13.01 Identify operating system file naming conventions.
  - 13.02 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 13.03 Demonstrate a working knowledge of standard file formats.
  - 13.04 Explain the history and purpose of various operating systems (e.g., DOS, Windows, Mac, and Unix/Linux).

14.0 Demonstrate proficiency navigating the internet, intranet, and the WWW. – The student will be able to:

- 14.01 Identify and describe Web terminology.
- 14.02 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
- 14.03 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
- 14.04 Describe and observe Internet/Intranet ethics and copyright laws and regulatory control.
- 14.05 Trace the evolution of the Internet from its inception to the present and into the future.
- 14.06 Demonstrate proficiency using search engines (e.g., Yahoo!, Google, Northern Light, Lycos, Excite, etc.).
- 14.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
- 14.08 Identify effective Boolean search strategies.

15.0 Demonstrate proficiency using html commands. – The student will be able to:

- 15.01 Identify elements of a Web page.
- 15.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
- 15.03 Define basic HTML terminology.
- 15.04 Analyze HTML source code developed by others.
- 15.05 Create Web pages using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 15.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 15.07 Edit and test HTML documents for accuracy and validity.
- 15.08 Use basic functions of WYSIWYG editors.
- 15.09 Use basic functions of HTML, DHTML, and XML editors and converters.
- 15.10 Enhance web pages through the addition of images and graphics including animation.

16.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 16.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
- 16.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
- 16.03 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
- 16.04 Use image design software to create and edit images.
- 16.05 Demonstrate proficiency in publishing to the Internet.
- 16.06 Demonstrate proficiency in adding downloadable forms to web pages.
- 16.07 Explain the need for web-based applications.

- 17.0 Demonstrate proficiency using specialized web design software. – The student will be able to:
- 17.01 Compare and contrast various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
  - 17.02 Demonstrate proficiency using use of various specialized web design software (e.g., Flash, Shockwave, GoLive, Director, etc.).
- 18.0 Develop an awareness of the information technology industry. – The student will be able to:
- 18.01 Explain how information technology impacts the operation and management of business and society.
  - 18.02 Explain the emergence of e-commerce and e-government and the potential impact on business and society.
  - 18.03 Explain the emergence of a paperless society.
- 19.0 Develop an awareness of microprocessors and digital computers. – The student will be able to:
- 19.01 Describe the evolution of the digital computer.
  - 19.02 Explain the general architecture of a microcomputer system.
  - 19.03 Explain the evolution of microprocessors.
  - 19.04 Explain software hierarchy and its impact on microprocessors.
  - 19.05 Explain the need for and use of peripherals.
  - 19.06 Demonstrate proficiency using peripherals.
  - 19.07 Identify the basic concepts of computer maintenance and upgrades.
  - 19.08 Differentiate between diagnosing and troubleshooting.
- 20.0 Develop an awareness of programming languages. – The student will be able to:
- 20.01 Explain the history of programming languages.
  - 20.02 Explain the need for and use of compilers.
  - 20.03 Explain how compilers work.
  - 20.04 Identify the three types of programming design approaches (e.g., top-down, structured, and object-oriented).
- 21.0 Develop an awareness of emerging technologies. – The student will be able to:
- 21.01 Compare and contrast various methods of evaluation for emerging technologies.
  - 21.02 Demonstrate knowledge of the process of planning upgrades and changeovers.
  - 21.03 Compare and contrast emerging technologies and describe how they impact business in the global marketplace (e.g., wireless, wireless web, cell phones, portables/handhelds, smart appliances, home networks, peer-to-peer, etc.).
- 22.0 Demonstrate an understanding of the seven layers of the Open Systems Interface (OSI) model. – The student will be able to:
- 22.01 Identify how types of networks and how they work.
  - 22.02 Identify the role of servers and clients on a network.
  - 22.03 Identify benefits and risks of networked computing.

- 22.04 Identify the relationship between computer networks and other communications networks (i.e. telephone systems).
  - 22.05 Identify Intranets, Extranets and how they relate to the Internet.
  - 22.06 Demonstrate basic understanding of network administration.
  - 22.07 Describe the evolution of OSI from its inception to the present and into the future.
  - 22.08 Explain the interrelations of the seven layers of the Open Systems Interface (OSI) as it relates to hardware and software.
- 23.0 Demonstrate proficiency using common software applications. – The student will be able to:
- 23.01 Compare and contrast the appropriate use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
  - 23.02 Demonstrate proficiency in the use of various software applications (e.g., word processing, desktop publishing, graphics design, web browser, e-mail, presentation, database, scheduling, financial management, Java applet, music, etc.).
- 24.0 Demonstrate proficiency using specialized software applications. – The student will be able to:
- 24.01 Compare and contrast the appropriate use of specialized software applications (e.g., (OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation process control, materials management, etc.).
  - 24.02 Demonstrate awareness of specialized software applications (e.g., OLTP, Computer Aided Design, Computer Aided Manufacturing, 3D animation, process control, materials management, etc.)
  - 24.03 Demonstrate the ability to incorporate digital sound.

- 37.03 Construct charts/tables/graphs using functions and data. AF3.5
- 38.0 Demonstrate science knowledge and skills. – The student will be able to: AF4.0
  - 38.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF4.1
  - 38.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**           **Multimedia Foundations 2**  
**Course Number:**       **8212440**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to provide a basic understanding of Web page layout and integration of video and animation into Web pages. Special emphasis is placed on good design, proper usage of typography and images for delivery on the Internet.

27.0 Demonstrate proficiency in web page design applicable to the WWW. – The student will be able to:

- 27.01 Determine the objectives and the audience for Web pages.
- 27.02 Identify design strategies to reach and keep an audience
- 27.03 Use storyboarding to plan a Web site.
- 27.04 Create styles and other design elements (e.g. backgrounds, colors, fonts, buttons, etc.)

28.0 Demonstrate an understanding of HTML commands. – The student will be able to:

- 28.01 Compare WYSIWG editors to non-WYSIWG coding.
- 28.02 Interpret HTML coding on an existing Web page.
- 28.03 Use HTML commands to write a Web page.

29.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design. – The student will be able to:

- 29.01 Create Web pages for publication.
- 29.02 Apply style sheets for consistent Web site design.
- 29.03 Format text for Web pages (e.g., font families, sizes)
- 29.04 Create and edit images, photographs for Web pages using digital imaging software (e.g. ImageReady in Photoshop).
- 29.05 Insert created buttons into a Web page and test for accuracy.
- 29.06 Create navigational links.
- 29.07 Insert audio files into a Web page.
- 29.08 Create, edit and integrate video files into a Web page.
- 29.09 Create, edit and integrate animation files into a Web page.

39.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:

- 39.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace.
- 39.02 Locate, organize and reference written information from various sources.

CM 1.0  
CM 3.0

- 39.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 39.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 39.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 39.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 39.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 40.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 40.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS1.0
- 40.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 40.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 40.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 41.0 Use information technology tools. – The student will be able to:
- 41.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 41.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 41.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 41.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 42.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 42.01 Describe the nature and types of business organizations. SY 1.0
- 42.02 Explain the effect of key organizational systems on performance and quality.
- 42.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
- 42.04 Explain the impact of the global economy on business organizations.
- 45.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 45.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
- 45.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR1.1
- 45.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR1.2
- 45.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:**           **Multimedia Foundations 3**  
**Course Number:**       **8212450**  
**Course Credit:**         **1**

**Course Description:**

This course is designed to FURTHER provide a basic understanding of Web page layout and integration of video and animation into Web pages. Special emphasis is placed on good design, proper usage of typography and images for delivery on the Internet.

29.0 Demonstrate proficiency in using a WYSIWG editor, web design, or web animation software for web page design. – The student will be able to:

- 29.10 Create Meta commands and key words for search engines.
- 29.11 Optimize page size for effective downloading to browsers.
- 29.12 Create and incorporate a form in a Web page.
- 29.13 Edit and test links for accuracy and validity.
- 29.14 Optimize images to make them “Web ready”.
- 29.15 Demonstrate knowledge of image formats related to photos and graphics on the Internet (e.g. Graphic formats (Tiff & EPS), Web formats (JPEG, GIF, PNG), etc.).
- 29.16 Demonstrate an understanding of photograph compression factors such as transmission speed, color reduction, and browser support.
- 29.17 Save and export a photograph to the Web in the format best suited for image quality and file size.
- 29.18 Demonstrate knowledge of the terms and vocabulary used with the animation process, animation software, and types of animation (e.g. 2D vs. 3D, Cel and Keyframe animation).

43.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:

- 43.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 43.02 Explain emergency procedures to follow in response to workplace accidents.
- 43.03 Create a disaster and/or emergency response plan. SHE 2.0

44.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:

- 44.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 44.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 44.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0

- 44.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 46.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 46.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 46.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 46.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 46.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 46.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 46.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 46.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 46.08 Research the benefits of ongoing professional development. ECD 9.0
  - 46.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 47.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 47.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 47.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 47.03 Develop a personal budget and financial goals. FL 3.1
  - 47.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 47.05 Maintain financial records. FL 3.3
  - 47.06 Read and reconcile financial statements. FL 3.4
  - 47.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Web Design 1  
**Course Number:** 8207110  
**Course Credit:** 1

**Course Description:**

This course is designed to provide a basic overview of the Internet, Intranet, and WWW. The content includes operating systems; basic HTML commands; navigation of the Internet, Intranet, and Web; and Web page design.

- 01.0 Participate in work-based learning experiences. – The student will be able to:
- 01.01 Participate in work-based learning experiences in a Web Design environment.
  - 01.02 Discuss the use of technology in a Web Design Services (Web Design) environment.
  - 01.03 Compare and contrast the software applications used in a Web Design Services (Web Design) environment.
- 02.0 Perform e-mail activities. – The student will be able to:
- 02.01 Describe e-mail capabilities and functions.
  - 02.02 Create and send e-mail messages with attachments.
  - 02.03 Reply to and forward e-mail messages.
  - 02.04 Organize and manage e-mail messages.
  - 02.05 Utilize all applicable e-mail options and functions.
  - 02.06 Use the Internet to perform e-mail activities.
  - 02.07 Define the standards used by Internet/Intranet e-mail (e.g., pop3, mime).
  - 02.08 Describe the issues involved in sending and receiving documents as e-mail attachments.
  - 02.09 Identify privacy issues in the employee/employer relationship (e.g., avoid libel, spam, personal usage).
- 03.0 Demonstrate proficiency using operating systems. – The student will be able to:
- 03.01 Demonstrate proficiency with file management and structure (e.g., folder creation, file creation, backup, copy, delete, open, save).
  - 03.02 Describe the difference between relative and absolute path commands.
  - 03.03 Demonstrate a working knowledge of standard file formats.
  - 03.04 Demonstrate proficiency with help references.
- 04.0 Perform decision making activities. – The student will be able to:
- 04.01 Determine work priorities.
  - 04.02 Evaluate and select appropriate software packages to complete assigned tasks.
  - 04.03 Evaluate information to be used and choose relevant material.
  - 04.04 Determine the audience.
  - 04.05 Compare and select appropriate multimedia tools.

05.0 Demonstrate proficiency navigating the Internet, intranet, and the WWW. – The student will be able to:

- 05.01 Identify and describe Web terminology.
- 05.02 Describe the history of the Internet and intranet.
- 05.03 Describe the difference between a client and a server.
- 05.04 Describe the difference between the Internet, intranet, and WWW.
- 05.05 Describe the different methods by which information may be accessed on the Internet/intranet (e.g., browser, FTP, gopher, telnet, veronica).
- 05.06 List the available resources and services on the Internet (e.g., electronic commerce, personal, government, business, etiquette, education, distance learning).
- 05.07 Locate information on the Internet/intranet using a Web browser.
- 05.08 Copy information from the Internet/intranet, save, and print using a Web browser.
- 05.09 Demonstrate proficiency in using the basic features of GUI browsers (e.g., setting bookmarks, basic configurations, e-mail configurations, address book).
- 05.10 Define Universal Resource Locators (URLs) and associated protocols (e.g., .com, .org, .edu, .gov, .net, .mil).
- 05.11 Identify and use search engines to locate information.
- 05.12 Describe the various ways of communicating on the Internet/Intranet (e.g., e-mail, forums, IRC, CHAT, Listserv, Usenet, MOOs, etc.).
- 05.13 Describe and observe Internet/intranet ethics and copyright laws.
- 05.14 Identify methods to protect personal copyright.

06.0 Demonstrate proficiency using HTML commands. – The student will be able to:

- 06.01 Identify elements of a Web page.
- 06.02 Describe individual Web page layouts and content (e.g., writing for the Web, Web structure).
- 06.03 Define basic HTML terminology.
- 06.04 Analyze HTML source code developed by others.
- 06.05 Create a Web page using basic HTML tags (e.g., links, lists, character styles, text alignment, tables).
- 06.06 Use storyboarding techniques for subsequent Web pages (e.g., linear, hierarchical).
- 06.07 Add graphics to Web pages.
- 06.08 Edit and test HTML documents for accuracy and validity.
- 06.09 Use basic functions of HTML editors and converters.
- 06.10 Use basic functions of WYSIWYG editors.

07.0 Demonstrate proficiency in page design applicable to the WWW. – The student will be able to:

- 07.01 Develop an awareness of acceptable Web page design, including index pages in relation to the rest of the Web site.
- 07.02 Describe and apply color theory as it applies to Web page design (e.g., background and text color).
- 07.03 Identify and convert graphic formats.
- 07.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD ROMS).

07.05 Use image design software to create and edit images.

08.0 Develop an awareness of Internet/intranet tools. – The student will be able to:

08.01 Describe the various hardware components used on the Internet/Intranet.

08.02 Demonstrate the use of compression programs.

08.03 Demonstrate the use of backups.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Geospatial/Geographic Information Systems (GIS) Technology  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	Secondary	PSAV
Program Number	8600200	T860020
CIP Number	0545070214	0545070214
Grade Level	9-12, 30, 31	30, 31
Standard Length	4 credits	600 hours
Teacher Certification	BUS ED 1 @2 COMPU SCI 6 TEC ED 1 @2 TEC EN AID @7 G <b>* See Note Below</b>	BUS ED @2 COMPU SCI 6 TEC ED @2 TEC EN AID @7 G <b>* See Note Below</b>
CTSO	Florida Technology Student Association (FL-TSA)	SkillsUSA
SOC Codes (all applicable)	15-1099.07	15-1099.07
Facility Code	[212], <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)	
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	
Industry Certifications	<a href="http://www.fldoe.org/workforce/fcpea/default.asp">http://www.fldoe.org/workforce/fcpea/default.asp</a>	
Statewide Articulation	<a href="http://www.fldoe.org/workforce/dwdframe/artic_frame.asp">http://www.fldoe.org/workforce/dwdframe/artic_frame.asp</a>	
Basic Skills Level		Math 10 Language 10 Reading 10

**\*Special Note--** Any Vocational Coverage suitable for Secondary or PSAV implementation accompanied by industry-recognized GIS Technician certification in accordance with FS 1012.39

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic benchmarks and relevant technical knowledge and skills needed to prepare for further education and careers in the Government and Public Administration career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills,

work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Government and Public Administration career cluster.

This program is designed to prepare students for employment as a GIS Technology Assistant or a GIS Technician. Students are introduced to the concepts of Geospatial/Geographic Information System (GIS) and Remote Sensing (RS) Technology — an organized collection of computer hardware, specialized software, and geographic data designed to efficiently capture, store, update, manipulate, analyze, and display all forms of geographically referenced (spatial) information. Students will research and learn detailed information about global and local matters related to political, environmental, commercial, and other areas, through the use of specialized geospatial tools and products.

This program offers a broad foundation of core knowledge, transferable skills, and applications to prepare students for future careers as skilled GIS/RS professionals. As GIS is a rapidly developing field, GIS professionals are in high demand and this program will prepare students for entry into the field. The content of this program includes the development of the following computer skills and concepts: computer application skills (e.g., word processing, spreadsheet, presentation, and desktop publishing), Internet browser applications, computer programming, advanced web tools, and basic concepts of relational databases and the tools to use them. Additionally, this program stresses understanding and demonstration of GIS and RS concepts, project management strategies, applications of geographic data elements and remotely sensed data, visualizations of spatial data, data inventory management, demographic and economic data analysis, data collection methods and techniques, and extensive exploration of GIS/RS careers and job opportunities.

### Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points.

When offered at the postsecondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

This program is a planned sequence of instruction meant to complement other information technology and technology education frameworks. The program consists of four courses, offering two Occupational Completion Points (OCPs). Students enrolling in this program must be computer literate. This literacy can be achieved by completing one credit of the Business Technology Education core. This includes Computing for College & Careers (8209020) or Introduction to Information Technology (8207310). A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	GIS0090	GIS Technician Assistant	300 Hours	15-1099.07
B	GIS0091	GIS Technician	300 Hours	15-1099.07

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8600260	Introduction to GIS/RS Technology	1 credit	15-1099.07	2
	8600270	Essential GIS/RS Tools & Processes	1 credit		
B	8600280	GIS/RS Analysis & Modeling	1 credit	15-1099.07	2
	8600290	Advanced GIS/RS Applications	1 credit		

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Laboratory activities are an integral part of this program and include the use of keyboarding systems, computers, and peripheral equipment.

### Special Notes

#### Academic Alignment

Some or all of the courses in this program have been aligned to the Next Generation Sunshine State Standards contained in specific math and science core academic courses. This alignment resulted from a collaborative review by Career and Technical Education (CTE) teachers and core academic teachers. The table below contains the results of the alignment efforts. Data shown in the table includes the number of academic standards in the CTE course, the total number of math and science standards contained in the academic course, and the percentage of alignment to the CTE course. The following academic courses were included in the alignment (see code for use in table).

Academic Subject Area	Academic Course
Math	Algebra 1 (ALG1) Algebra 2 (ALG2) Geometry (GEO)
Science	Anatomy/Physiology Honors (APH) Astronomy Solar/Galactic Honors (ASGH) Biology 1 (BIO1) Chemistry 1 (CHM1) Earth-Space Science (ESS) Genetics (GEN) Marine Science 1 Honors (MS1H) Physical Science (PS) Physics 1 (PHY1)

Course	Math			Science								
	ALG1	ALG2	GEO	APH	ASGH	BIO1	CHM1	ESS	GEN	MS1H	PS	PHY1
Introduction to GIS/RS Technology	5/36 14%	#	5/45 11%	4/53 8%	16/52 31%	6/56 11%	8/55 15%	14/58 24%	5/35 14%	5/42 12%	9/56 16%	10/53 19%
Essential GIS/RS Tools & Processes	3/36 8%	#	6/45 13%	3/53 6%	7/52 13%	7/56 13%	5/55 9%	14/58 24%	5/35 14%	14/42 33%	8/56 14%	6/53 11%
GIS/RS Analysis & Modeling	9/36 25%	7/41 17%	5/45 11%	3/53 6%	9/52 17%	3/56 5%	5/55 9%	10/58 17%	5/35 14%	8/42 19%	5/56 9%	7/53 13%
Advanced GIS/RS Applications	3/36 8%	#	#	2/53 4%	2/52 4%	1/56 2%	2/55 4%	2/58 3%	3/35 9%	4/42 10%	2/56 4%	2/53 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

### **Program Implementation**

This program emphasizes the development of abilities and/or awareness necessary to function in a highly technological society. The use of cooperative learning groups is recommended. By learning and practicing group process skills, students will be prepared to work "together" in real work situations. Program graduates will develop enhanced self-esteem as well as the problem-solving and teamwork skills necessary to succeed in careers and postsecondary education. Students will gain knowledge about career paths, have access to business role models, and have choices they would not otherwise have.

The Geospatial/Geographic Information Systems (GIS) Technology program places a strong emphasis on workplace learning. Shadowing and mentoring experiences with GIS professionals along with on-site trips to local businesses connect classroom learning to the workplace. In-class guest speakers bring the real world into the classroom.

Although a variety of GIS software applications and utilities are available in industry, the standards specified in this program focus on the underlying functions and associated competencies in alignment with the STARS program ([www.digitalquest.com](http://www.digitalquest.com)).

### **Career and Technical Student Organization (CTSO)**

Florida Technology Student Association (FL-TSA) and SkillsUSA are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 10, and Reading 10. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rff/basicskills-License-exempt.rff>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

- 01.0 Perform general computer application activities.
- 02.0 Understand the history, societal implications, underlying theories, and industry applications of GIS technology.
- 03.0 Understand map types, purposes, and information they depict.
- 04.0 Demonstrate an understanding of coordinate systems, projections, scale, multi-spectral imagery, and other concepts integral to geographic information systems.
- 05.0 Create, change, and manipulate data used to create a map.
- 06.0 Layout and print maps.

- 07.0 Design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals
- 08.0 Customize the display of geospatial data.
- 09.0 Manage, query, and symbolize geospatial data.
- 10.0 Create a geospatial model.
- 11.0 Create, change, and manipulate remotely sensed image data.
- 12.0 Create surface models of spatial data to map distance.
- 13.0 Demonstrate density models of spatial data.
- 14.0 Demonstrate different surface interpolation methods.
- 15.0 Demonstrate different surface analysis methods.
- 16.0 Use different statistical methods in raster analysis.
- 17.0 Interpret different types of spatial data used in 3D visualization and analysis.
- 18.0 Create network datasets using existing shapefiles and geodatabases.
- 19.0 Create a 3D map using a GPS unit for use in a class wide project.
- 20.0 Create an extensive campus-based geospatial project.
- 21.0 Demonstrate language arts knowledge and skills.
- 22.0 Demonstrate mathematics knowledge and skills.
- 23.0 Demonstrate science knowledge and skills.
- 24.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 25.0 Solve problems using critical thinking skills, creativity and innovation.
- 26.0 Use information technology tools.
- 27.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 28.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 29.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 30.0 Describe the importance of professional ethics and legal responsibilities.
- 31.0 Explain the importance of employability skill and entrepreneurship skills.
- 32.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Benchmarks**

**Program Title: Geospatial/Geographic Information Systems (GIS) Technology**  
**PSAV Number: T860020**

**Course Number: GIS0090**  
**Occupational Completion Point: A**  
**GIS Technician Assistant – 300 Hours – SOC Code 15-1099.07**

- 01.0 Perform general computer application activities. – The student will be able to:
- 01.01 Develop keyboarding skills to enter and manipulate text and data.
  - 01.02 Demonstrate basic computer file management skills.
  - 01.03 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
  - 01.04 Use spreadsheet, presentation software, and integrated software packages to enhance communication.
  - 01.05 Use computer networks (e.g., Internet, on-line databases) to facilitate collaborative or individual learning and communication.
  - 01.06 Use computers to access, retrieve, organize, process, maintain, interpret, and evaluate data and information.
- 02.0 Understand the history, societal implications, underlying theories, and industry applications of GIS technology. – The student will be able to:
- 02.01 Discuss the history and societal implications of mapping, GIS, and remote sensing.
  - 02.02 Describe the underlying theories of GIS and remote sensing technologies.
  - 02.03 Identify industry applications for GIS technology.
- 03.0 Understand map types, purposes, and information they depict. – The student will be able to:
- 03.01 Compare and contrast various forms of maps in terms of purpose, information, and application.
  - 03.02 Convert latitude and longitude information between DMS and DD forms.
  - 03.03 Identify sources of GIS information and their applicability to GIS projects.
  - 03.04 Demonstrate how to read a topographical map
- 04.0 Demonstrate an understanding of coordinate systems, projections, scale, multi-spectral imagery, and other concepts integral to geographic information systems. – The student will be able to:
- 04.01 Identify terminology associated with map coordinate systems and location
  - 04.02 Interpret location using the Geographic Coordinate System to identify absolute location
  - 04.03 Identify terminology associated with maps, map scale, map projections, and orienteering

- 04.04 Explain the Universe Transverse Mercator (UTM) coordinate system
  - 04.05 Interpret locations using the UTM coordinate system
  - 04.06 Demonstrate an understanding of how maps are created using aerial photography.
- 05.0 Create, change, and manipulate data used to create a map. – The student will be able to:
- 05.01 Identify the primary components of the GIS Project Management Model
  - 05.02 Utilize a GPS unit to collect waypoints, measure distance, and calculate area.
  - 05.03 Create and customize a localized satellite map scenario using an appropriate GIS software application.
  - 05.04 Demonstrate the use of zooming, identifying, bookmarks, selecting, and panning tools.
  - 05.05 Explain the components of the map display and the tools in the tool bars of common mapping software.
  - 05.06 Explain the need for and uses of metadata.
  - 05.07 Demonstrate geocoding addresses, heads-up digitizing, editing symbols, clipping data layers, and creating buffers.
  - 05.08 Demonstrate various styles of displaying symbols of data, sorting querying, and selection techniques
  - 05.09 Demonstrate editing feature data
  - 05.10 Explain spatial reference
  - 05.11 Demonstrate how to georeference an Image Data Layer and add Control Points
- 06.0 Layout and print maps. – The student will be able to:
- 06.01 Demonstrate the ability to define page margins and parameters for printing a specific size
  - 06.02 Demonstrate effective use of map elements that must be included in a map including title, author, data, legend, scale bar, north arrow
  - 06.03 Demonstrate effective use of page space through map scale and frame size
  - 06.04 Demonstrate process of creating digital archives of maps utilizing the export command
- 07.0 Design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:
- 07.01 Research, compare, and contrast GIS technology careers (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of GIS technology careers, the need for GIS technology workers, etc.).
  - 07.02 Describe the variety of occupations and professions within the world of GIS technology including those where information technology is either in a primary focus or in a supportive role.
  - 07.03 Describe job requirements for the variety of occupations and professions within the global world of GIS technology.
  - 07.04 Analyze personal skills and aptitudes in comparison with GIS technology career opportunities.
  - 07.05 Refine and implement a plan to facilitate personal growth and skill development related to GIS technology career opportunities.

- 07.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 08.0 Customize the display of geospatial data. – The student will be able to:
  - 08.01 Edit Layer Properties.
  - 08.02 Create Layer Files.
  - 08.03 Edit an attribute table by adding a new field with calculating values.
  - 08.04 Perform relates and joins with data tables.
- 09.0 Manage, query, and symbolize geospatial data. – The student will be able to:
  - 09.01 Label features.
  - 09.02 Insert, copy, and paste data into new data frames.
  - 09.03 Create graphs and reports from data.
  - 09.04 Demonstrate how to analyze land use, population, and flood zone data.
  - 09.05 Create geospatial data.
  - 09.06 Symbolize a raster layer.
  - 09.07 Resolve unmatched addresses while geocoding addresses.
  - 09.08 Use dissolve features, hyperlink, spatially join data, and create buffer functions.
- 10.0 Create a geospatial model. – The student will be able to:
  - 10.01 Create a geodatabase, import existing feature classes into a geodatabase, and import multiple feature classes to a geodatabase.
  - 10.02 Plan and build a local data inventory.
- 11.0 Create, change, and manipulate remotely sensed image data. – The student will be able to:
  - 11.01 View single band and multispectral images.
  - 11.02 Perform various manipulations to an image including creating a subset of an image, mosaic two georeferenced images, and orthorectification.
  - 11.03 Perform image analysis by orthorectifying non-georeferenced digital images to existing map features.
  - 11.04 Use various tools in image analysis to extract land features from imagery data.
  - 11.05 Categorize land cover types using image analysis tools.
  - 11.06 Conduct vegetation analysis on imagery using image analysis tools
  - 11.07 Evaluate areas of change in images.
  - 11.08 Enhance an image by adjusting the brightness and contrast, adjusting the histogram, applying custom histogram stretches, sharpening and smoothing its appearance.
  - 11.09 Convert an image from color IR to natural color by performing a resolution merge.
- 21.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
  - 21.01 Locate, comprehend and evaluate key elements of oral and written information. AF2.4
  - 21.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF2.5
  - 21.03 Present information formally and informally for specific purposes and audiences. AF2.9

- 22.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF3.0
- 22.01 Demonstrate knowledge of arithmetic operations. AF3.2
- 22.02 Analyze and apply data and measurements to solve problems and interpret documents. AF3.4
- 22.03 Construct charts/tables/graphs using functions and data. AF3.5
- 23.0 Demonstrate science knowledge and skills. – The student will be able to: AF4.0
- 23.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF4.1
- 23.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF4.3
- 24.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 24.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
- 24.02 Locate, organize and reference written information from various sources. CM 3.0
- 24.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
- 24.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
- 24.05 Apply active listening skills to obtain and clarify information. CM 7.0
- 24.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
- 24.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 25.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 25.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS1.0
- 25.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 25.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 25.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 26.0 Use information technology tools. – The student will be able to:
- 26.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 26.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 26.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 26.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0

- 27.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 27.01 Describe the nature and types of business organizations. SY 1.0
  - 27.02 Explain the effect of key organizational systems on performance and quality.
  - 27.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 27.04 Explain the impact of the global economy on business organizations.
- 30.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 30.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 30.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR1.1
  - 30.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR1.2
  - 30.04 Interpret and explain written organizational policies and procedures. ELR 2.0

**Course Number: GIS0091**  
**Occupational Completion Point: B**  
**GIS Technician – 300 Hours – SOC Code 15-1099.07**

- 12.0 Create surface models of spatial data to map distance. – The student will be able to:
- 12.01 Create a straight line distance calculation.
  - 12.02 Create a cost weighted distance calculation based on multiple inputs (costs).
  - 12.03 Analyze an allocation grid created from a distance analysis calculation.
- 13.0 Demonstrate density models of spatial data. – The student will be able to:
- 13.01 Identify different distance density calculation techniques.
  - 13.02 Calculate density using both the kernel and simple calculation methods.
- 14.0 Demonstrate different surface interpolation methods. – The student will be able to:
- 14.01 Create a surface from a set of features using the Inverse Distance Weighted interpolation method.
  - 14.02 Create a surface from a set of features using the Spline interpolation method.
  - 14.03 Create a surface from a set of features using the Kriging interpolation method.
- 15.0 Demonstrate different surface analysis methods. – The student will be able to:
- 15.01 Create elevation contour data from an elevation raster.
  - 15.02 Calculate and display slope derived from an elevation raster.
  - 15.03 Determine and display aspect from an elevation raster.
  - 15.04 Create a hillshade surface from an elevation raster.
  - 15.05 Calculate the viewshed of a surface to determine visible objects.
  - 15.06 Calculate the cut/fill of a surface to estimate volume changes.

- 16.0 Use different statistical methods in raster analysis. – The student will be able to:
- 16.01 Calculate cell statistics using temporal raster grid data.
  - 16.02 Calculate neighborhood statistics and zonal statistics using raster grid data
- 17.0 Interpret different types of spatial data used in 3D visualization and analysis. – The student will be able to:
- 17.01 Navigate various types of surfaces.
  - 17.02 Explore methods of obtaining, downloading, and extracting free data using the Internet.
  - 17.03 Build 3D datasets.
  - 17.04 Display 2D features onto a 3D surface.
  - 17.05 Create shapefiles to view in a 3D environment.
  - 17.06 Construct a 3D model of an urban environment.
  - 17.07 Display georeferenced data measurements in 3D.
  - 17.08 Apply Interpolation methods.
  - 17.09 Utilize georeferenced 2D data in a 3D environment to provide valuable information.
  - 17.10 Create contour lines in a 3D environment
- 18.0 Create network datasets using existing shapefiles and geodatabases. – The student will be able to:
- 18.01 Find the most efficient routes for multiple stops on a complex street network.
  - 18.02 Generate directions from one location to another using a street network.
  - 18.03 Find the closest facility from a location on a complex street network.
  - 18.04 Define service areas using a street network based on travel time.
  - 18.05 Create an Origin-Destination Cost Matrix to communicate costs associated with travel from facilities to destinations in a geospatial network.
  - 18.06 Demonstrate modeling of real world traffic flow.
  - 18.07 Create a 3D map using a GPS unit for use in a class wide project.
- 19.0 Create a 3D map using a GPS unit for use in a class wide project.
- 20.0 Create an extensive campus-based geospatial project. The student will be able to:
- 20.01 Create a campus inventory.
  - 20.02 Plan a complete geospatial project.
  - 20.03 Implement a campus-based geospatial project.
  - 20.04 Organize project into an effective report including map layouts.
  - 20.05 Present project using a written and/or oral report.
- 28.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:
- 28.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
  - 28.02 Explain emergency procedures to follow in response to workplace accidents.
  - 28.03 Create a disaster and/or emergency response plan. SHE 2.0

- 29.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:
- 29.01 Employ leadership skills to accomplish organizational goals and objectives. LT1.0
  - 29.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT3.0
  - 29.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0
  - 29.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 31.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 31.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 31.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 31.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 31.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 31.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 31.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 31.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 31.08 Research the benefits of ongoing professional development. ECD 9.0
  - 31.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 32.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 32.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 32.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 32.03 Develop a personal budget and financial goals. FL3.1
  - 32.04 Complete financial instruments for making deposits and withdrawals. FL3.2
  - 32.05 Maintain financial records. FL3.3
  - 32.06 Read and reconcile financial statements. FL3.4
  - 32.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Benchmarks**

**Course Title:** Introduction to GIS/RS Technology  
**Course Number:** 8600260  
**Course Credit:** 1

**Course Description:**

While learning about the basics from the evolution of maps and projections, to learning about the modern uses of a geographic information system, students will complete many “hands-on” activities such as creating their own maps using compasses, rulers and tape measures. Specific areas of focus for this course include fundamental GIS and remote sensing concepts, project management strategies, and essential basic computer skills. Students will acquire a basic understanding of geographic terms and concepts necessary for the appropriate use of GIS, including concepts of spatial variables, scale, map projection, and map coordinate systems. Students will also be exposed to the history of GIS, how GIS fits into overall information management systems, and a variety of applications in which GIS can contribute to analysis and decision-making. They will also use a software application used to simulate satellite movements and utilize data, imagery, and GIS software to study their state, county, and school campus.

This hands-on course provides step by step instructions that will take you from learning the basics of these programs; like launching a map, viewing and editing metadata, to creating new shapefiles, and eventually to building a local map with data that you download from the Internet. While learning these valuable skills, students will be using the same geospatial tools that GIS Technicians in the industry are using.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	5/36 14%	<b>Biology 1</b>	6/56 11%	<b>Anatomy/Physiology Honors</b>	4/53 8%	<b>Astronomy Solar/Galactic Honors</b>	16/52 31%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	8/55 15%	<b>Genetics</b>	5/35 14%	<b>Marine Science 1 Honors</b>	5/42 12%
<b>Geometry</b>	5/45 11%	<b>Physics 1</b>	10/53 19%	<b>Earth-Space Science</b>	14/58 24%	<b>Physical Science</b>	9/56 16%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

01.0 Perform general computer application activities. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.S.1.2; MA.912.S.3.2; SC.912.N.1.1.

01.01 Develop keyboarding skills to enter and manipulate text and data.

- 01.02 Demonstrate basic computer file management skills.
- 01.03 Use reference materials such as on-line help, vendor bulletin boards, tutorials, and manuals available for application software.
- 01.04 Use spreadsheet, presentation software, and integrated software packages to enhance communication.
- 01.05 Use computer networks (e.g., Internet, on-line databases) to facilitate collaborative or individual learning and communication.
- 01.06 Use computers to access, retrieve, organize, process, maintain, interpret, and evaluate data and information.

02.0 Understand the history, societal implications, underlying theories, and industry applications of GIS technology. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: SC.912.N2.2; SC.912.N3.2; SC.912.E.5.7; SC.912.E.5.8; SC.912.E.5.9; SC.912.P.10.16; SC.912.P.10.17; SC.912.P.10.18; SC.912.P.10.19; SC.912.N.12.17; SC.912.P.10.20; SC.912.P.10.21; SC.912.E.5.10; SC.912.E.5.8; SC.912.E.5.9.

- 02.01 Discuss the history and societal implications of mapping, GIS, and remote sensing.
- 02.02 Describe the underlying theories of GIS and remote sensing technologies.
- 02.03 Identify industry applications for GIS technology.

03.0 Understand map types, purposes, and information they depict. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: SC.912.N.1.1; SC.912.E.5.10; SC.912.E.6.2; SC.912.L.14.53; MA.912.D.7.1; MA.912.D.7.2; MA.912.A.1.5; MA.912.A.5.1; MA.912.A.5.4; MA.912.G.8.3; MA.912.D.8.6.

- 03.01 Compare and contrast various forms of maps in terms of purpose, information, and application.
- 03.02 Convert latitude and longitude information between DMS and DD forms.
- 03.03 Identify sources of GIS information and their applicability to GIS projects.
- 03.04 Demonstrate how to read a topographical map

04.0 Demonstrate an understanding of coordinate systems, projections, scale, multi-spectral imagery, and other concepts integral to geographic information systems. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: SC.912.N.1.1; SC.912.E.5.10; MA.912.G.1.1, MA.912.G.1.4; MA.912.A.1.5; MA.912.A.5.1; MA.912.A.5.4.

- 04.01 Identify terminology associated with map coordinate systems and location
- 04.02 Interpret location using the Geographic Coordinate System to identify absolute location
- 04.03 Identify terminology associated with maps, map scale, map projections, and orienteering
- 04.04 Explain the Universe Transverse Mercator (UTM) coordinate system

- 04.05 Interpret locations using the UTM coordinate system
- 04.06 Demonstrate an understanding of how maps are created using aerial photography.

05.0 Create, change, and manipulate data used to create a map. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; SC.912.N.1.2; MA.912.S.1.2; MA.912.G.4.2; MA.912.S.3.2;  
MA.912.G.7.5; MA.912.D.7.1; MA.912.D.7.2; SC.912.P.12.9.

- 05.01 Identify the primary components of the GIS Project Management Model
- 05.02 Utilize a GPS unit to collect waypoints, measure distance, and calculate area.
- 05.03 Create and customize a localized satellite map scenario using an appropriate GIS software application.
- 05.04 Demonstrate the use of zooming, identifying, bookmarks, selecting, and panning tools.
- 05.05 Explain the components of the map display and the tools in the tool bars of common mapping software.
- 05.06 Explain the need for and uses of metadata.
- 05.07 Demonstrate geocoding addresses, heads-up digitizing, editing symbols, clipping data layers, and creating buffers.
- 05.08 Demonstrate various styles of displaying symbols of data, sorting querying, and selection techniques
- 05.09 Demonstrate editing feature data
- 05.10 Explain spatial reference
- 05.11 Demonstrate how to georeference an Image Data Layer and add Control Points

06.0 Layout and print maps. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1.

- 06.01 Demonstrate the ability to define page margins and parameters for printing a specific size
- 06.02 Demonstrate effective use of map elements that must be included in a map including title, author, data, legend, scale bar, north arrow
- 06.03 Demonstrate effective use of page space through map scale and frame size
- 06.04 Demonstrate process of creating digital archives of maps utilizing the export command

07.0 Design an individual career plan that reflects the transition from school to work, lifelong learning, and personal and professional goals. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; MA.912.D.7.1; MA.912.D.7.2; SC.912.L.17.13; SC.912.L.17.20.

- 07.01 Research, compare, and contrast GIS technology careers (e.g., characteristics needed, skills required, education required, industry certifications, advantages and disadvantages of GIS technology careers, the need for GIS technology workers, etc.).

- 07.02 Describe the variety of occupations and professions within the world of GIS technology including those where information technology is either in a primary focus or in a supportive role.
  - 07.03 Describe job requirements for the variety of occupations and professions within the global world of GIS technology.
  - 07.04 Analyze personal skills and aptitudes in comparison with GIS technology career opportunities.
  - 07.05 Refine and implement a plan to facilitate personal growth and skill development related to GIS technology career opportunities.
  - 07.06 Develop and maintain an electronic career portfolio, to include, but not limited to the Resume and Letter of Application.
- 21.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 21.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 21.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 21.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 22.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 22.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 22.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 22.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 23.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 23.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 23.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Essential GIS/RS Tools & Processes  
**Course Number:** 8600270  
**Course Credit:** 1

**Course Description:**

Students in this course will use their knowledge of mapping and cataloging to complete numerous geospatial applications. They will learn techniques in displaying, managing, querying, symbolizing, and Create geospatial data. Students will learn the skills required to work on and/or build advanced GIS/RS projects.

Students will follow a course of hands-on instruction to learn advanced skills ranging from introductory spatial analysis to examining spatial relationships within a specified area. Additionally, they will study site suitability to using three-dimensional generating software to gain a different perspective of their environment by modeling surfaces. Students will use scenarios to map features and study relationships that exist in their local community.

Students will use remote sensing applications and data to develop skills that will allow them to take images and convert them to data that they will use for different types of analyses. The types of analyses will include using data in image analysis, feature extraction, vegetation mapping and change detection, and image enhancement.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	3/36 8%	<b>Biology 1</b>	7/56 13%	<b>Anatomy/Physiology Honors</b>	3/53 6%	<b>Astronomy Solar/Galactic Honors</b>	7/52 13%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	5/55 9%	<b>Genetics</b>	5/35 14%	<b>Marine Science 1 Honors</b>	14/42 33%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

08.0 Customize the display of geospatial data. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 SC.912.N.1.1; MA.912.D.7.1; MA.912.D.7.2; SC.912.E.6.6; SC.912.E.5.10.

08.01 Edit Layer Properties.

08.02 Create Layer Files.

08.03 Edit an attribute table by adding a new field with calculating values.

08.04 Perform relates and joins with data tables.

09.0 Manage, query, and symbolize geospatial data. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.E.6.2; SC.912.E.6.3; SC.912.E.6.4; SC.912.E.6.5; SC.912.L.17.2;  
MA.912.S.1.2; SC.912.E.6.6; SC.912.E.7.1; SC.912.E.7.2; SC.912.E.7.8; MA.912.S.4.4;  
MA.912.A.2.13; MA.912.D.7.1; MA.912.D.7.2.

- 09.01 Label features.
- 09.02 Insert, copy, and paste data into new data frames.
- 09.03 Create graphs and reports from data.
- 09.04 Demonstrate how to analyze land use, population, and flood zone data.
- 09.05 Create geospatial data.
- 09.06 Symbolize a raster layer.
- 09.07 Resolve unmatched addresses while geocoding addresses.
- 09.08 Use dissolve features, hyperlink, spatially join data, and create buffer functions.

10.0 Create a geospatial model. The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; MA.912.D.7.1; MA.912.D.7.2; SC.912.L.17.13; SC.912.L.17.20.

- 10.01 Create a geodatabase, import existing feature classes into a geodatabase, and import multiple feature classes to a geodatabase.
- 10.02 Plan and build a local data inventory.

11.0 Create, change, and manipulate remotely sensed image data. The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; MA.912.G.2.4; MA.912.G.2.7; MA.912.G.7.5; MA.912.G.7.6;  
MA.912.G.7.7; SC.912.P.10.18; SC.912.E.6.4; SC.912.L.17.1; SC.912.L.17.3;  
SC.912.L.17.7; SC.912.L.14.53; SC.912.E.7.4; SC.912.E.6.2; SC.912.E.6.3;  
SC.912.L.17.4; SC.912.E.6.6; SC.912.L.16.10; SC.912.P.10.17; SC.912.P.10.18.

- 11.01 View single band and multispectral images.
- 11.02 Perform various manipulations to an image including creating a subset of an image, mosaic two georeferenced images, and orthorectification.
- 11.03 Perform image analysis by orthorectifying non-georeferenced digital images to existing map features.
- 11.04 Use various tools in image analysis to extract land features from imagery data.
- 11.05 Categorize land cover types using image analysis tools.
- 11.06 Conduct vegetation analysis on imagery using image analysis tools
- 11.07 Evaluate areas of change in images.
- 11.08 Enhance an image by adjusting the brightness and contrast, adjusting the histogram, applying custom histogram stretches, sharpening and smoothing its appearance.
- 11.09 Convert an image from color IR to natural color by performing a resolution merge.

- 24.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 24.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 24.02 Locate, organize and reference written information from various sources. CM 3.0
  - 24.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 24.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 24.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 24.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0
  - 24.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 25.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 25.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
  - 25.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
  - 25.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
  - 25.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 26.0 Use information technology tools. – The student will be able to:
- 26.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
  - 26.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
  - 26.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
  - 26.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
- 27.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment. – The student will be able to:
- 27.01 Describe the nature and types of business organizations. SY 1.0
  - 27.02 Explain the effect of key organizational systems on performance and quality.
  - 27.03 List and describe quality control systems and/or practices common to the workplace. SY 2.0
  - 27.04 Explain the impact of the global economy on business organizations.
- 30.0 Describe the importance of professional ethics and legal responsibilities. – The student will be able to:
- 30.01 Evaluate and justify decisions based on ethical reasoning. ELR 1.0
  - 30.02 Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies. ELR 1.1

- 30.03 Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace. ELR 1.2
- 30.04 Interpret and explain written organizational policies and procedures. ELR 2.0

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** GIS/RS Analysis & Modeling  
**Course Number:** 8600280  
**Course Credit:** 1

**Course Description:**

This course covers Surface Analysis, 3D modeling, and working with street networks.

This course directs students through five types of applications in Surface Analysis. It focuses on the various methods and uses of displaying continuous, or grid, data over a surface. Students will be expected to map data such as elevation, rainfall and temperature – data that differs from one location to the next on the surface of the earth. The five types of analyses used in this course are: mapping distance, density, interpolation, surface analysis, and statistics. This course will conclude with a short project where student will use their newly acquired skills to perform surface analysis tasks to their local area.

There is a strong emphasis on students viewing their local area and the world in three dimensions. Students will learn skills such as viewing and displaying data, acquiring and processing data from online resources, displaying non-elevation data in 3D, applying surface analysis to 3D, adding raster and vector data, animating data, and exporting projects.

Students will also explore in greater depth data layers previously studied in order to analyze the flow or navigation of networked data. They will also delve into the specifics of network analysis and examine how problems dealing with geospatial networks and routing may be found in the business world and in communities. The five types of network analyses covered in this course include Exploring Geospatial Networks, Finding the Best Route, Finding the Closest Facility, Determining Service Areas, and Modeling Real World Traffic Flow.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	9/36 25%	<b>Biology 1</b>	3/56 5%	<b>Anatomy/Physiology Honors</b>	3/53 6%	<b>Astronomy Solar/Galactic Honors</b>	9/52 17%
<b>Algebra 2</b>	7/41 17%	<b>Chemistry 1</b>	5/55 9%	<b>Genetics</b>	5/35 14%	<b>Marine Science 1 Honors</b>	8/42 19%
<b>Geometry</b>	5/45 11%	<b>Physics 1</b>	7/53 13%	<b>Earth-Space Science</b>	10/58 17%	<b>Physical Science</b>	5/56 9%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

12.0 Create surface models of spatial data to map distance. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.E.5.11; SC.912.N.3.5; SC.912.P.12.1; SC.912.P.12.9; MA.912.A.10.1;  
MA.912.A.10.2; MA.912.A.10.3; MA.912.G.1.1; MA.912.G.2.4; MA.912.A.3.14;  
MA.912.A.3.15.

- 12.01 Create a straight line distance calculation.
- 12.02 Create a cost weighted distance calculation based on multiple inputs (costs).
- 12.03 Analyze an allocation grid created from a distance analysis calculation.

13.0 Demonstrate density models of spatial data. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.3.5; SC.912.P.12.9; MA.912.D.9.1; MA.912.S.1.2; MA.912.S.3.2.

- 13.01 Identify different distance density calculation techniques.
- 13.02 Calculate density using both the kernel and simple calculation methods.

14.0 Demonstrate different surface interpolation methods. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.N.1.1; MA.912.S.1.2; MA.912.G.8.6; MA.912.S.3.2; MA.912.S.4.5;  
SC.912.E.7.3; SC.912.E.7.4; SC.912.E.6.2.

- 14.01 Create a surface from a set of features using the Inverse Distance Weighted interpolation method.
- 14.02 Create a surface from a set of features using the Spline interpolation method.
- 14.03 Create a surface from a set of features using the Kriging interpolation method.

15.0 Demonstrate different surface analysis methods. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.E.6.3; SC.912.P.12.1; SC.912.E.12.9; MA.912.C.5.7; MA.912.C.5.8;  
MA.912.A.3.9; MA.912.A.3.11; MA.912.G.7.5; MA.912.G.7.7.

- 15.01 Create elevation contour data from an elevation raster.
- 15.02 Calculate and display slope derived from an elevation raster.
- 15.03 Determine and display aspect from an elevation raster.
- 15.04 Create a hillshade surface from an elevation raster.
- 15.05 Calculate the viewshed of a surface to determine visible objects.
- 15.06 Calculate the cut/fill of a surface to estimate volume changes.

16.0 Use different statistical methods in raster analysis. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
SC.912.P.12.9; SC.912.N.4.2; MA.912.S.1.2; MA.912.S.3.2; SC.912.L.17.1.

- 16.01 Calculate cell statistics using temporal raster grid data.
- 16.02 Calculate neighborhood statistics and zonal statistics using raster grid data

17.0 Interpret different types of spatial data used in 3d visualization and analysis. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 SC.912.P.12.9; MA.912.A.4.5; MA.912.A.4.9; MA.912.A.4.10; MA.912.C.5.5;  
 MA.912.C.5.7; MA.912.C.3.2.

- 17.01 Navigate various types of surfaces.
- 17.02 Explore methods of obtaining, downloading, and extracting free data using the Internet.
- 17.03 Build 3D datasets.
- 17.04 Display 2D features onto a 3D surface.
- 17.05 Create shapefiles to view in a 3D environment.
- 17.06 Construct a 3D model of an urban environment.
- 17.07 Display georeferenced data measurements in 3D.
- 17.08 Apply Interpolation methods.
- 17.09 Utilize georeferenced 2D data in a 3D environment to provide valuable information.
- 17.10 Create contour lines in a 3D environment

- 18.0 Create network datasets using existing shapefiles and geodatabases. The student will be able to:

This standard supports the following Next Generation Sunshine State Standards:  
 MA.912.D.2.2; MA.912.D.7.1; MA.912.D.7.2; MA.912.D.4.1; MA.912.A.7.9;  
 MA.912.C.3.8; MA.912.D.8.1; MA.912.D.8.2; MA.912.F.5.1; MA.912.F.5.2;  
 MA.912.S.5.1.

- 18.01 Find the most efficient routes for multiple stops on a complex street network.
- 18.02 Generate directions from one location to another using a street network.
- 18.03 Find the closest facility from a location on a complex street network.
- 18.04 Define service areas using a street network based on travel time.
- 18.05 Create an Origin-Destination Cost Matrix to communicate costs associated with travel from facilities to destinations in a geospatial network.
- 18.06 Demonstrate modeling of real world traffic flow.
- 18.07 Create a 3D map using a GPS unit for use in a class wide project.

- 28.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance. – The student will be able to:

- 28.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments. SHE 1.0
- 28.02 Explain emergency procedures to follow in response to workplace accidents.
- 28.03 Create a disaster and/or emergency response plan. SHE 2.0

- 29.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives. – The student will be able to:

- 29.01 Employ leadership skills to accomplish organizational goals and objectives. LT 1.0
- 29.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks. LT 3.0
- 29.03 Conduct and participate in meetings to accomplish work tasks. LT 4.0

- 29.04 Employ mentoring skills to inspire and teach others. LT 5.0
- 31.0 Explain the importance of employability skill and entrepreneurship skills. – The student will be able to:
- 31.01 Identify and demonstrate positive work behaviors needed to be employable. ECD 1.0
  - 31.02 Develop personal career plan that includes goals, objectives, and strategies. ECD 2.0
  - 31.03 Examine licensing, certification, and industry credentialing requirements. ECD 3.0
  - 31.04 Maintain a career portfolio to document knowledge, skills, and experience. ECD 5.0
  - 31.05 Evaluate and compare employment opportunities that match career goals. ECD 6.0
  - 31.06 Identify and exhibit traits for retaining employment. ECD 7.0
  - 31.07 Identify opportunities and research requirements for career advancement. ECD 8.0
  - 31.08 Research the benefits of ongoing professional development. ECD 9.0
  - 31.09 Examine and describe entrepreneurship opportunities as a career planning option. ECD 10.0
- 32.0 Demonstrate personal money-management concepts, procedures, and strategies. – The student will be able to:
- 32.01 Identify and describe the services and legal responsibilities of financial institutions. FL 2.0
  - 32.02 Describe the effect of money management on personal and career goals. FL 3.0
  - 32.03 Develop a personal budget and financial goals. FL 3.1
  - 32.04 Complete financial instruments for making deposits and withdrawals. FL 3.2
  - 32.05 Maintain financial records. FL 3.3
  - 32.06 Read and reconcile financial statements. FL 3.4
  - 32.07 Research, compare and contrast investment opportunities.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Advanced GIS/RS Applications  
**Course Number:** 8600290  
**Course Credit:** 1

**Course Description:**

This project-based, capstone course challenges students to apply all skills and techniques learned in the previous three courses to create their first extensive GIS and Remote Sensing project. In this project, students will work in teams to create a three-dimensional map of their campus using GIS and RS tools. Once the base map is completed, each student selects one of the designated campus-based projects to complete. Students will be involved with all parts of the process including problem identification, data collection using GPS units, determining the appropriate type of analysis to be conducted or type of product to address the problem statement, performing the analysis, Create their solution, and formally presenting the project to interested stakeholders. Each project integrates project planning, geographic problem solving, GIS/RS tools and software applications, project management, data creation, data manipulation, data analysis, report, and presentations.

Standards included in this course of instruction have been aligned to the academic courses shown below. This table shows the number of aligned benchmarks, the total number of academic benchmarks, and the percentage of alignment.

Math		Science					
<b>Algebra 1</b>	3/36 8%	<b>Biology 1</b>	1/56 2%	<b>Anatomy/Physiology Honors</b>	2/53 4%	<b>Astronomy Solar/Galactic Honors</b>	2/52 4%
<b>Algebra 2</b>	#	<b>Chemistry 1</b>	2/55 4%	<b>Genetics</b>	3/35 9%	<b>Marine Science 1 Honors</b>	4/42 10%
<b>Geometry</b>	#	<b>Physics 1</b>	2/53 4%	<b>Earth-Space Science</b>	2/58 3%	<b>Physical Science</b>	2/56 4%

\*\* Alignment pending

# Alignment attempted, but no correlation to academic course.

19.0 Create a 3D map using a GPS unit for use in a class wide project.

This standard supports the following Next Generation Sunshine State Standards: MA.912.D.7.1; MA.912.D.7.2; MA.912.A.10.1; MA.912.C.5.8.

20.0 Create an extensive campus-based geospatial project. – The student will be able to:

This standard supports the following Next Generation Sunshine State Standards: MA.912.S.2.1; SC.912.N.1.1, SC.912.N.1.2; SC.912.L.17.1; SC.912.L.17.18.

20.01 Create a campus inventory.

20.02 Plan a complete geospatial project.

20.03 Implement a campus-based geospatial project.

- 20.04 Organize project into an effective report including map layouts.
- 20.05 Present project using a written and/or oral report.

2012 – 2013

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Computer Systems Technology  
**Program Type:** Career Preparatory  
**Career Cluster:** Information Technology

	<b>Secondary</b>	<b>PSAV</b>

Basic Skills Level	N/A	Mathematics: 10 Language: 9 Reading: 9

### **Purpose**

The purpose of this program is to prepare students for employment or advanced training in a variety of occupations in the information technology industry.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the information technology industry; technical and

product skills, underlying principles of technology , planning, management, finance, labor issues, community issues and health, safety, and environmental issues.

The course content includes, but is not limited to, communication, leadership skills, human relations and employability skills; and safe, efficient work practices.

### Program Structure

This program is a planned sequence of instruction consisting of five occupational completion points. When the recommended sequence is followed, the structure will allow students to complete specified portions of the program for employment or to remain for advanced training certifications. A student who completes the applicable competencies at any occupational completion point may either continue with the training or become an occupational completer.

When offered at the post secondary level, this program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44 (3)(b), F.S.

The following table illustrates the **PSAV** program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
A	EEV0501	End User Support Technician	450	15-1041
B	EEV0502	PC Electronics Installer	150	49-2011
C	EEV0503	Computer Support Specialist – LAN Technician	300	15-1041
D	EEV0506	Field Service Technician	300	15-1071
E	EEV0508	Digital Electronics Technician	450	15-1071

The following table illustrates the **Secondary** program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
A	8732110	Computer Systems Technology 1	1 credit	15-1041	3
	8732120	Computer Systems Technology 2	1 credit		3
	8732130	Computer Systems Technology 3	1 credit		3
B	8732140	Computer Systems Technology 4	1 credit	49-2011	3
C	8732150	Computer Systems Technology 5	1 credit	15-1041	3
	8732160	Computer Systems Technology 6	1 credit		3
D	8732170	Computer Systems Technology 7	1 credit	15-1071	3
	8732180	Computer Systems Technology 8	1 credit		3
E	8732190	Computer Systems Technology 9	1 credit	15-1071	3
	8732191	Computer Systems Technology 10	1 credit		3
	8732192	Computer Systems Technology 11	1 credit		3

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

### **Career and Technical Student Organization (CTSO)**

Future Business Leaders of America (FBLA) and Business Professionals of America (BPA) are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills for secondary students. For postsecondary students, Phi Beta Lambda and BPA are the appropriate student organizations. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

There is a **Cooperative Education Manual** available on-line that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at <http://www.fldoe.org/workforce/programs/doc/coopm.doc>.

### **Essential Skills**

Essential skills identified by the Division of Career and Adult Education have been integrated into the standards and benchmarks of this program. These skills represent the general knowledge and skills considered by industry to be essential for success in careers across all career clusters. Students preparing for a career served by this program at any level should be able to demonstrate these skills in the context of this program. A complete list of Essential Skills and links to instructional resources in support of these Essential Skills are published on the CTE Essential Skills page of the FL-DOE website ([http://www.fldoe.org/workforce/dwdframe/essential\\_skills.asp](http://www.fldoe.org/workforce/dwdframe/essential_skills.asp)).

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10.0, Language 9.0, and Reading 9.0. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills

requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at <http://www.fldoe.org/workforce/dwdframe/rtf/basicskills-License-exempt.rtf>.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an Individual Educational Plan (IEP) served in Exceptional Student Education or ESE) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Articulation**

The PSAV component of this program (I470104) has a statewide articulation agreement approved by the Florida State Board of Education:

Computer Engineering Technology AS/AAS (1615120100/0615120100) – 9 credits (For PSAV programs including the 4-course Cisco Networking Academy, this program articulates an additional 12 credits.)

For details on articulation agreements which correlate to programs and industry certifications refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Bright Futures/Gold Seal Scholarship**

Course substitutions as defined in the Comprehensive Course Table for this program area may be used to qualify a student for Florida's Gold Seal Vocational Scholarship, providing all other eligibility requirements are met. Eligibility requirements are available online at [https://www.osfaffelp.org/bfiehs/fnbpcm02\\_CCTMain.aspx](https://www.osfaffelp.org/bfiehs/fnbpcm02_CCTMain.aspx).

### **Fine Arts/Practical Arts Credit**

Many courses in CTE programs meet the Fine Arts/Practical Arts credit for high school graduation. For additional information refer to <http://www.fldoe.org/schools/pdf/ListPracticalArtsCourses.pdf>.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate proficiency in software/hardware fundamentals.
- 02.0 Demonstrate proficiency in customer relations.
- 03.0 Demonstrate appropriate communication skills.
- 04.0 Demonstrate employability skills.
- 05.0 Demonstrate proficiency in basic laboratory practices.
- 06.0 Demonstrate proficiency in electronic fundamentals.
- 07.0 Demonstrate appropriate understanding of basic math.
- 08.0 Demonstrate appropriate understanding of basic science.
- 09.0 Demonstrate proficiency in computer systems.
- 10.0 Demonstrate proficiency in peripheral equipment.
- 11.0 Demonstrate proficiency in network fundamentals
- 12.0 Demonstrate proficiency in network equipment and physical site requirements and considerations.
- 13.0 Demonstrate proficiency in advanced computer concepts.
- 14.0 Demonstrate proficiency in advanced operating systems.
- 15.0 Demonstrate an understanding of entrepreneurship.
- 16.0 Demonstrate language arts knowledge and skills.
- 17.0 Demonstrate mathematics knowledge and skills.
- 18.0 Demonstrate science knowledge and skills.
- 19.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 20.0 Solve problems using critical thinking skills, creativity and innovation.
- 21.0 Use information technology tools.
- 22.0 Describe the roles within teams, work units, departments, organizations, inter-organizational systems, and the larger environment.
- 23.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 24.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 25.0 Describe the importance of professional ethics and legal responsibilities.
- 26.0 Explain the importance of employability skill and entrepreneurship skills.
- 27.0 Demonstrate personal money-management concepts, procedures, and strategies.

2012 – 2013

**Florida Department of Education  
Student Performance Standards**

**Program Title: Computer Systems Technology**  
**PSAV Number: I470104**

**Course: EEV0501**

**Occupational Completion Point - A (450 Hours)**

**End User Support Technician - Level I Support Technician**

**Help Desk Specialist - (SOC 15-1041)**

01.0 Demonstrate proficiency in software/hardware fundamentals. – The student will be able to:

- 01.01 Apply OS commands, syntax usage and parameters.
- 01.02 Demonstrate knowledge of OS file systems.
- 01.03 Demonstrate basic command-line/GUI OS navigation
- 01.04 Demonstrate basic operation and usage of common applications.
- 01.05 Demonstrate operation and usage of fundamental OS utilities
- 01.06 Demonstrate operation and usage of virus protection software.
- 01.07 Demonstrate operation and usage of browser software and the internet.
- 01.08 Locate and install device drivers.
- 01.09 Understand compression technologies.
- 01.10 Identify PC/server front panel controls, indicators, rear case connectors and indicators.
- 01.11 Demonstrate an understanding of the boot process.

02.0 Demonstrate proficiency in customer relations. – The student will be able to:

- 02.01 Describe and demonstrate appropriate personal hygiene and professional attire.
- 02.02 Describe and demonstrate effective listening techniques.
- 02.03 Describe and apply techniques for instilling customer confidence and satisfaction.
- 02.04 Describe and apply techniques for keeping the customer informed.
- 02.05 Describe and apply effective follow-up techniques.
- 02.06 Demonstrate discretion in interacting with customers in field and business environments.
- 02.07 Demonstrate an understanding of basic conflict resolution.

03.0 Demonstrate appropriate communication skills. – The student will be able to:

- 03.01 Write logical and understandable statements, or phrases, to accurately fill out forms and invoices commonly used in business and industry.
- 03.02 Read and use graphs, charts, diagrams, tables, parts manuals, and information sources commonly used in this industry/occupational area.
- 03.03 Read and follow written and oral instructions.
- 03.04 Answer and ask questions coherently and concisely.
- 03.05 Read critically by recognizing assumptions and implications and by evaluating ideas.
- 03.06 Demonstrate appropriate telephone/communication skills.

- 04.0 Demonstrate employability skills. – The student will be able to:
- 04.01 Prepare a resume.
  - 04.02 Conduct a job search.
  - 04.03 Secure information about a job.
  - 04.04 Identify and provide documents, which may be required when interviewing for a job.
  - 04.05 Complete a job application form correctly and completely.
  - 04.06 Demonstrate competence in job interview techniques.
  - 04.07 Identify and demonstrate appropriate responses to criticism from employer, supervisor or other employees.
  - 04.08 Identify and demonstrate acceptable work habits.
  - 04.09 Demonstrate knowledge of how to make job changes appropriately.
  - 04.10 Demonstrate knowledge of employee health issues.
  - 04.11 Demonstrate efficient organizational skills.
  - 04.12 Demonstrate knowledge of the “Right-To-Know Law” as recorded in (29 CFR-1910.1200).
- 16.0 Demonstrate language arts knowledge and skills. – The student will be able to: AF 2.0
- 16.01 Locate, comprehend and evaluate key elements of oral and written information. AF 2.4
  - 16.02 Draft, revise, and edit written documents using correct grammar, punctuation and vocabulary. AF 2.5
  - 16.03 Present information formally and informally for specific purposes and audiences. AF 2.9
- 17.0 Demonstrate mathematics knowledge and skills. – The student will be able to: AF 3.0
- 17.01 Demonstrate knowledge of arithmetic operations. AF 3.2
  - 17.02 Analyze and apply data and measurements to solve problems and interpret documents. AF 3.4
  - 17.03 Construct charts/tables/graphs using functions and data. AF 3.5
- 18.0 Demonstrate science knowledge and skills. – The student will be able to: AF 4.0
- 18.01 Discuss the role of creativity in constructing scientific questions, methods and explanations. AF 4.1
  - 18.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings. AF 4.3
- 19.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas. – The student will be able to:
- 19.01 Select and employ appropriate communication concepts and strategies to enhance oral and written communication in the workplace. CM 1.0
  - 19.02 Locate, organize and reference written information from various sources. CM 3.0
  - 19.03 Design, develop and deliver formal and informal presentations using appropriate media to engage and inform diverse audiences. CM 5.0
  - 19.04 Interpret verbal and nonverbal cues/behaviors that enhance communication. CM 6.0
  - 19.05 Apply active listening skills to obtain and clarify information. CM 7.0
  - 19.06 Develop and interpret tables and charts to support written and oral communications. CM 8.0

- 19.07 Exhibit public relations skills that aid in achieving customer satisfaction. CM 10.0
- 20.0 Solve problems using critical thinking skills, creativity and innovation. – The student will be able to:
- 20.01 Employ critical thinking skills independently and in teams to solve problems and make decisions. PS 1.0
- 20.02 Employ critical thinking and interpersonal skills to resolve conflicts. PS 2.0
- 20.03 Identify and document workplace performance goals and monitor progress toward those goals. PS 3.0
- 20.04 Conduct technical research to gather information necessary for decision-making. PS 4.0
- 21.0 Use information technology tools. – The student will be able to:
- 21.01 Use personal information management (PIM) applications to increase workplace efficiency. IT 1.0
- 21.02 Employ technological tools to expedite workflow including word processing, databases, reports, spreadsheets, multimedia presentations, electronic calendar, contacts, email, and internet applications. IT 2.0
- 21.03 Employ computer operations applications to access, create, manage, integrate, and store information. IT 3.0
- 21.04 Employ collaborative/groupware applications to facilitate group work. IT 4.0
