Florida Department of Education Curriculum Framework

Program Title: Air Conditioning, Refrigeration and Heating Systems Technology

Career Cluster: Architecture and Construction

	AAS
CIP Number	0615050100
Program Type	College Credit
Standard Length	64 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for employment as air conditioning and heating technicians or to provide supplemental training for persons previously or currently employed in these occupations. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 64 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industry.
- 03.0 Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipment.
- 04.0 Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their components.
- 05.0 Select and test electrical generation and distribution components for commercial heating and air conditioning systems.
- 06.0 Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systems.
- 07.0 Troubleshoot and wire electrical motors and their components.
- 08.0 Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems.
- 09.0 Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems.
- 10.0 Explain the function of basic electronics.
- 11.0 Read construction documents.
- 12.0 Describe the history and concepts of heating, air-conditioning and refrigeration,
- 13.0 Explain the properties of matter and heat behavior.
- 14.0 Analyze fluids, pressures, refrigerants and related codes.
- 15.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 16.0 Select appropriate commercial compressors.
- 17.0 Test and adjust commercial evaporative condensers.
- 18.0 Maintain, test and troubleshoot commercial evaporators.
- 19.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 20.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.
- 21.0 Demonstrate employability skills.
- 22.0 Utilize and operate mechanical refrigeration servicing and testing equipment.
- 23.0 Assist in the installation of a residential heating and air-conditioning system and determine start-up procedures.
- 24.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 25.0 Demonstrate a working knowledge of refrigerants and oils.
- 26.0 Interpret, use and modify construction drawings and specifications.
- 27.0 Conduct system startup and shutdown.
- 28.0 Design heating and cooling systems.
- 29.0 Use combustion-type heating servicing and testing equipment.
- 30.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 31.0 Maintain, test and adjust commercial heating and air-conditioning accessories.
- 32.0 Maintain, troubleshoot and repair commercial heating systems.
- 33.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.
- 34.0 Demonstrate knowledge of retail refrigeration systems.
- 35.0 Demonstrate knowledge of commercial and industrial refrigeration systems.

- 36.0 Develop an understanding of hydronic systems.
- 37.0 Develop an understanding of steam systems.
- 38.0 Determine the properties of air.
- 39.0 Use a pressure enthalpy chart to diagram refrigerant cycles.
- 40.0 Explain the standards for and ways to measure indoor-air quality.
- 41.0 Operate environmental control systems as used in commercial heating and air-conditioning systems.
- 42.0 Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applications.
- 43.0 Maintain and repair thermal storage systems.
- 44.0 Maintain, troubleshoot and repair commercial heating and air-conditioning systems.
- 45.0 Calculate commercial heating and air-conditioning loads.
- 46.0 Install air distribution systems.
- 47.0 Evaluate commercial airside systems.
- 48.0 Balance an air distribution system.
- 49.0 Select energy conservation equipment.
- 50.0 Analyze building management systems.
- 51.0 Recommend alternative heating and cooling systems for various case studies.

Florida Department of Education Student Performance Standards

Program Title: CIP Number: Air Conditioning, Refrigeration and Heating Systems Technology

0615050100 Program Length: SOC Code(s): **64 Credit Hours**

49-9021

Comple	etion of this program, the student will be able to:
	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	01.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	01.02 Explain the reasons for regular safety meetings and for company safety policies.
	01.03 Explain the need for employee-background checks and medical examinations.
	01.04 Identify and use appropriate fire extinguishers and other such safety devices.
	01.05 Identify and follow emergency and rescue procedures.
	01.06 Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.
	01.07 Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.
ı	01.08 Apply specific safety and recovery practices for refrigerants used in the industry.
	01.09 Apply specific safety practices as they relate to handling and storing cylinders and materials.
	01.10 Select and wear proper protective clothing and equipment.
	01.11 Identify and use specific safety practices when using soldering and brazing skills.
	01.12 Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.
	01.13 Follow safety precautions when using hand and power tools.
	01.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.
	01.15 Explain emergency procedures to follow in response to workplace accidents.

	01.16 Create a disaster and/or emergency response plan.
02.0	Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	02.01 Identify and use basic hand tools and tool accessories; power tools (electric, mechanical and pneumatic, if available); pipe and tube-working tools; and specialized tools of the trade.
	02.02 Apply appropriate care and maintenance procedures for tools and tool accessories, following the directions in the tool-equipment manufacturer's manual.
03.0	Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipmentThe student will be able to:
	03.01 Explain the principles of electricity.
	03.02 Explain single- and three-phase power distribution.
	03.03 Define and explain watts, ohms, volts and amps.
	03.04 Identify and explain electrical measuring tools and devices.
	03.05 Explain the standards for and ways to measure watts, resistance, voltage and amperage, using appropriate instruments or devices.
	03.06 Identify and explain appropriate electrical wiring symbols.
	03.07 Draw and explain a wiring schematic diagram for a control system.
	03.08 Create a wiring schematic for an air conditioner an electric furnace, a heat pump, an oil furnace (optional) and a gas furnace.
	03.09 Explain codes and standards and safety requirements for working with the electrical components used in heating, air conditioning and refrigeration.
	03.10 Troubleshoot protection devices, such as fuses and breakers.
	03.11 Interpret tables and charts from the National Electrical Codes (NEC).
04.0	Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their componentsThe student will be able to:
	04.01 Identify and explain the operations of electrical control systems and their components (zone damper motors, duel fuel lock out controls, outdoor thermostats/low ambient controls, defrost controls/timers and auxiliary heating controls).
	04.02 Identify, install and troubleshoot controls for heating, air-conditioning and refrigeration systems.
	04.03 Explain the operation of different types of electromechanical thermostats.
	04.04 Wire basic heating, air-conditioning and refrigeration systems.
	04.05 Troubleshoot operational problems for different types of electromechanical thermostats.

	04.06 Explain the electrical and mechanical operations of the basic heat pump.
05.0	Select and test electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	05.01 Determine wire sizes and voltage drops.
	05.02 Describe the operation of various types of transformers.
	05.03 Draw and identify various power-transformers.
	05.04 Test, size and replace protection devices such as fuses and breakers, motor starters and overloads.
06.0	Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systemsThe student will be able to:
	06.01 Explain how alternating current is developed and draw a sine wave.
	06.02 Identify single-phase and three-phase wiring arrangements.
	06.03 Explain how phase shift occurs in inductors and capacitors.
	06.04 Describe the types of capacitors and their applications.
	06.05 Explain the operation of single-phase and three-phase induction motors.
	06.06 Identify the various types of single-phase motors and their applications.
	06.07 State and demonstrate the safety precautions, such as lock out / tag out, which must be followed when working with electrical equipment.
	06.08 Explain how the electric company uses a demand meter.
	06.09 Identify and explain the operations and applications of various types of electrical motors and their components as used in commercial heating and air-conditioning systems.
	06.10 Maintain, test and troubleshoot various types of commercial electrical motors and their components as used in commercial heating and air-conditioning systems.
	06.11 Demonstrate the proper use of motor testing equipment.
07.0	Troubleshoot and wire electrical motors and their componentsThe student will be able to:
	07.01 Identify and explain the functions of various types of motors and their components.
	07.02 Troubleshoot, test and analyze motors, using various methods.
	07.03 Identify, troubleshoot and wire various types of electric motors.
	07.04 Reverse the rotation of a motor.

0.80	Operate solid-state electronics as used in heating, air-conditioning and refrigeration systemsThe student will be able to:
	08.01 Explain the basic principles and functions of Direct Digital Control (DDC).
	08.02 Explain basic solid-state circuits and boards.
	08.03 Identify, test and replace circuits and boards.
	08.04 Identify and explain the functions of a building-management system.
	08.05 Program a programmable thermostat.
09.0	Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems The student will be able to:
	09.01 Explain how the principles of designing an electrical system for residential heating and air-conditioning systems apply to commercial heating and air-conditioning systems.
	09.02 Define and compare single- and multiphase voltage and current related to commercial heating and air-conditioning systems.
	09.03 Calculate various circuit loads in commercial heating and air-conditioning applications using Ohm's law.
	09.04 Troubleshoot electrical circuits for commercial heating and air-conditioning systems
10.0	Explain the function of basic electronicsThe student will be able to:
	10.01 Explain the basic theory of electronics and semiconductors.
	10.02 Explain how various semiconductor devices such as diodes, LEDs and photo diodes work and how they are used in power and control circuits.
	10.03 Identify different types of resistors and explain how their resistance values can be determined.
	10.04 Describe the operation and function of thermistors and cad cells.
	10.05 Test semiconductor components.
	10.06 Identify the connectors on a personal computer.
11.0	Read construction documentsThe student will be able to:
	11.01 Recognize and identify basic construction drawing terms, components and symbols.
	11.02 Relate information on construction drawings to actual locations on the print.
	11.03 Recognize different classifications of construction drawings.
	11.04 Interpret and use drawing dimensions.

40.0	Describe the history and concents of heating air conditioning and refrigeration. The student will be able to:
12.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:
	12.01 Explain the basic principles of heating, ventilation and air-conditioning.
	12.02 Identify educational paths to career opportunities in the HVAC profession.
	12.03 Identify and explain the four major refrigeration components.
	12.04 Identify and explain the characteristics of a compression-cycle refrigerant system.
	12.05 Differentiate between air-conditioning and refrigeration.
	12.06 Differentiate between split systems and package systems.
	12.07 Describe the benefits of conditioned air and environments.
	12.08 Discuss the impact of heating, air-conditioning and refrigeration on society.
	12.09 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, airconditioning and refrigeration industry and in the environment and explain their future ramifications.
	12.10 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as
	well as the manufacturer's installation instructions.
	12.11 Identify various professional organizations, associations and societies and explain their purposes.
13.0	Explain the properties of matter and heat behaviorThe student will be able to:
	13.01 Describe and explain freezing point, critical temperature and absolute zero.
	13.02 Describe matter, heat and heat transfer.
	13.03 Differentiate between heat and temperature.
	13.04 Explain and distinguish among the characteristics of the three states of matter.
	13.05 Explain the relationship between temperature and humidity.
	13.06 Differentiate between latent heat and sensible heat.
14.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	14.01 Identify the refrigeration cycle.
	14.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	14.03 Define and explain pressure, fluid and temperature.

	14.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	14.05 Identify and explain the classifications, properties and uses of different refrigerants.
	14.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	14.07 Define and identify "color-coding" of refrigerant cylinders.
	14.08 Compare Pressure and Temperature (P/T) charts.
	14.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	14.10 Explain the effects of an improper refrigerant and contaminants in a system.
15.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	15.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 c. Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	15.02 Evaluate metering-device performance.
	15.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	15.04 Analyze the operating condition of a compressor.
	15.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	15.06 Identify the location and explain the uses of refrigerant flow accessories.
	15.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	15.08 Evaluate system performance.
16.0	Select appropriate commercial compressorsThe student will be able to:
	16.01 Compare commercial-compressor requirements with those for residential and light commercial heating and air-conditioning systems.
	16.02 Select appropriate commercial compressors for cooling requirements.

	16.03 Describe the mechanical operation for each type of compressor.
	16.04 Explain compressor lubrication methods.
	16.05 Explain methods used to control compressor capacity.
	16.06 Describe how compressor protection devices operate.
	16.07 Perform the common procedures used when field servicing open and semi-hermetic compressors.
17.0	Test and adjust commercial evaporative condensersThe student will be able to:
	17.01 Determine the proper air and fluid flow for commercial evaporative condensers.
	17.02 Test and adjust the airflow for proper temperature difference.
	17.03 Test and adjust the water flow for proper GPM and temperature difference.
	17.04 Check for proper water treatment.
18.0	Maintain, test and troubleshoot commercial evaporatorsThe student will be able to:
	18.01 Determine the operational requirements for evaporators used in commercial heating and air-conditioning applications.
	18.02 Select appropriate evaporators for commercial heating and air-conditioning systems.
	18.03 Maintain, test and adjust various commercial heating and air-conditioning accessories.
19.0	Demonstrate employability skillsThe student will be able to:
	19.01 Conduct a job search.
	19.02 Secure information about a job.
	19.03 Identify documents which may be required when applying for a job interview.
	19.04 Complete a job application form correctly.
	19.05 Demonstrate competence in job interview techniques.
	19.06 Identify or demonstrate appropriate responses to criticism from employer, supervisor or other employees.
	19.07 Identify acceptable work habits.
	19.08 Demonstrate knowledge of how to make appropriate job changes.

	19.09 Demonstrate acceptable employee health habits.
20.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	20.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	20.02 Bend tubing, using tube benders.
	20.03 Connect tubing using flared fittings and compression fittings.
	20.04 Connect tubing, using solderless connectors.
	20.05 Connect tubing, using a swaged-joint connection.
	20.06 Identify and use various types of torches.
	20.07 Identify, select and use appropriate brazing alloys, materials and skills.
	20.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products from heat.
	20.09 Braze tubing.
	20.10 Silver-braze brass, steels and copper.
	20.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	20.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	20.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	20.14 Maintain project time and materials lists.
	20.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
21.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	21.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	21.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	21.03 Explain pressure and temperature drops.
22.0	Utilize and operate mechanical refrigeration servicing and testing equipmentThe student will be able to:
	22.01 Identify the effects of superheat and sub-cooling on a system.

	22.02 Identify and explain the functions of servicing and testing equipment (such as vacuum pumps, micron gauges, EPA-approved equipment, leak detectors and charging systems).
	22.03 Operate a refrigerant recovery system.
	22.04 Explain the standards for and ways to measure, test, maintain and evacuate a mechanical heating, air-conditioning and refrigeration system.
	22.05 Evacuate the refrigerant system with various vacuum methods.
	22.06 Demonstrate compliance with Environmental Protection Agency (EPA) rules and regulations and if possible, take the EPA test.
	22.07 Charge various air-conditioning and mechanical refrigeration systems by various methods.
	22.08 Demonstrate the effects of superheat and sub-cooling on a system utilizing test equipment (such as thermometers and gages)
23.0	Assist in the installation of a residential heating and air-conditioning system and determine start-up proceduresThe student will be able to:
	23.01 Read and comply with dispatch orders.
	23.02 Explain local codes and ordinances.
	23.03 Select and use appropriate tools and safety practices to test equipment.
	23.04 Determine the electrical requirements of equipment.
	23.05 Assist in the installation of a heating and air-conditioning system to the manufacturer's installation and operation specifications, using a practical knowledge of duct fabrication methods.
	23.06 Determine the proper charge in a residential air-conditioning unit and adjust superheat.
	23.07 Determine the temperature drop across the evaporator.
	23.08 Determine the temperature rise across the condenser.
	23.09 Write a service report.
	23.10 Apply good customer-relations skills.
24.0	Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to:
	24.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.
	24.02 Determine the start-up and checkout procedures recommended by different manufacturers.
	24.03 Determine the electrical requirements of equipment.
	24.04 Select and use appropriate tools, instruments and test equipment following safety precautions.

	24.05 Determine the temperature drop across the outdoor coil on a heat pump.
	24.06 Determine the temperature rise across the indoor coil on a heat pump.
	24.07 Test for a proper refrigerant charge in a residential heat pump.
	24.08 Apply good customer-relations skills.
25.0	Demonstrate a working knowledge of refrigerants and oilsThe student will be able to:
	25.01 Identify the refrigerants in common use and state the types of applications in which each is used.
	25.02 Explain the effects of releasing refrigerants into the atmosphere.
	25.03 Explain how refrigerants are classified by their chemical composition.
	25.04 Describe the color-coding scheme used to identify refrigerant cylinders.
	25.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.
	25.06 Interpret a P-T chart for an azeotrope refrigerant.
	25.07 Calculate superheat and subcooling.
	25.08 Demonstrate refrigerant leak detecting methods.
	25.09 Identify the different types of oils used in refrigeration systems and explain their relationships to the various refrigerants.
	25.10 Explain how to add and remove oil from a system.
	25.11 Describe how to test oil for contamination.
26.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	26.01 Read mechanical plans within a set of construction drawings explain their relationship.
	26.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	26.03 Interpret specification documents and apply them to the plans.
	26.04 Interpret shop drawings and apply them to the plans and specifications.
	26.05 Develop a field set of as-built drawings.
	26.06 Identify the steps required for transferring design information to component production.

	26.07 List and classify materials most commonly used in HVAC systems.
27.0	Conduct system startup and shutdownThe student will be able to:
	27.01 Start up and shut down an air handler and related forced-air distribution system.
	27.02 Test compressor oil for acid contamination.
	27.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.
28.0	Design heating and cooling systemsThe student will be able to:
	28.01 Identify and describe the steps in the system design process.
	28.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.
	28.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.
	28.04 Complete a load estimate to determine the heating and/or cooling load of a building.
	28.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.
	28.06 Select heating and/or cooling equipment using manufacturers' product data following design principles.
	28.07 Identify the various types of duct systems and explain why and where each type is used.
	28.08 Demonstrate the effect of fittings and transitions on duct system design.
	28.09 Use a friction loss chart and duct sizing table to size duct.
	28.10 Install insulation and vapor barriers used in duct systems.
	28.11 Following proper design principles select and install refrigerant and condensate piping.
29.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:
	29.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.
	29.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).
	29.03 Use the servicing and testing equipment.
	29.04 Test, analyze and troubleshoot combustion-type-heating systems.
30.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:

-	
	30.01 Identify and discuss the safety and regulation issues and concerns.
	30.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).
	30.03 Identify and size various types of gas valves and regulators.
	30.04 Determine the application of gas valves and regulators.
	30.05 Troubleshoot gas valves and regulators.
31.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to
	31.01 Compare commercial accessories with residential and light- commercial-heating and air-conditioning accessories.
	31.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.
	31.03 Maintain, test and adjust commercial heating and air-conditioning accessories.
32.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:
	32.01 Identify the components of various commercial heating systems.
	32.02 Explain the operational principles of various commercial heating systems.
	32.03 Test and analyze heating air-distribution systems.
	32.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.
33.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:
	33.01 Follow safety precautions.
	33.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.
	33.03 Lay out, construct and troubleshoot comfort systems.
	33.04 Test and analyze systems.
	33.05 Test and analyze heat-recovery systems.
34.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:
	34.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.
	34.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.

	34.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.
	34.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.
	34.05 Describe the various methods of defrost used in retail refrigeration systems.
	34.06 Identify and describe the applications for the various types of retail refrigeration systems.
	34.07 Describe the control system components used in retail refrigeration systems.
	34.08 Explain the operating sequence of a retail refrigeration system.
	34.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.
35.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:
	35.01 Identify different types of refrigerated coolers and display cases and describe each one's common application.
	35.02 Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.
	35.03 Identify single, multiple and satellite compressor systems. Describe the applications, installation considerations and advantages and disadvantages of each type.
	35.04 Identify packaged condensing units and unit coolers. Describe their applications, operation and installation considerations.
	35.05 Identify two-stage compressors and explain their operation and applications.
	35.06 Identify the various accessories used in commercial refrigeration systems and explain why each is used and where it should be installed in the system.
	35.07 Identify the various refrigeration control devices and explain the purpose of each type and how it works.
	35.08 Compare the components used in ammonia systems with those used in halocarbon-based refrigerant systems.
36.0	Develop an understanding of hydronic systemsThe student will be able to:
	36.01 Explain the terms and concepts used when working with hot-water heating and chilled-water cooling systems.
	36.02 Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water systems.
	36.03 Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperature water systems.
	36.04 Describe the safety precautions used when working with hot-water/chilled-water systems.
	36.05 Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.
	36.06 Identify the common piping configurations used with hot-water heating and chilled-water cooling systems.

	36.07 Explain the principles involved and describe the procedures used, in balancing hydronic systems.
	36.08 Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.
	36.09 Read the pressure across a water system circulating pump.
37.0	Develop an understanding of steam systemsThe student will be able to:
	37.01 Explain the terms and concepts used when working with steam-heating systems.
	37.02 Identify major components of steam heating systems and explain the purpose of each.
	37.03 Describe the basic steam-heating cycle.
	37.04 Safely perform selected operating procedures on low-pressure steam boilers and systems.
	37.05 Install and maintain selected steam traps.
	37.06 Identify the common piping configurations used with steam-heating systems.
38.0	Determine the properties of airThe student will be able to:
	38.01 Explain the principles of psychrometrics.
	38.02 Identify and explain the components and uses of a psychrometric meter.
	38.03 Identify indoor-air-quality concerns as related to psychrometrics.
	38.04 Determine the properties of air, using a psychrometric chart.
	38.05 Follow safety precautions.
	38.06 Identify and explain the different types and benefits of air-filtration systems, air-handling systems and ventilation systems.
	38.07 Fabricate, operate, maintain and troubleshoot air-filtration systems, air-handling systems and ventilation systems.
39.0	Use a pressure enthalpy chart to diagram refrigerant cyclesThe student will be able to:
	39.01 Identify all components of the pressure enthalpy chart.
	39.02 Define enthalpy and entropy.
	39.03 Diagram several refrigerant cycles, using the pressure enthalpy chart.
40.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:

	40.01 Define indoor-air quality.
	40.02 Identify and explain the codes and standards regarding indoor-air quality.
	40.03 Select and use indoor-air-quality measuring devices.
	40.04 Explain the standards for and ways to measure indoor-air quality using various methods.
41.0	Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:
	41.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.
	41.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.
42.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:
	42.01 Identify pneumatic control systems.
	42.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.
43.0	Maintain and repair thermal storage systemsThe student will be able to:
	43.01 Apply appropriate codes, standards and safety practices.
	43.02 Describe the benefits and limitations of each type.
	43.03 Explain the operational principles of a thermal storage system.
	43.04 Identify and explain various types of thermal storage systems.
	43.05 Maintain, troubleshoot and test various types of thermal storage systems.
44.0	Maintain, troubleshoot and repair commercial heating and air-conditioning systemsThe student will be able to:
	44.01 Keep a record of the installation, maintenance and repair of commercial heating and air-conditioning systems.
	44.02 Apply local and national codes and safety practices.
	44.03 Lay out a commercial heating and air-conditioning system.
	44.04 Lay out a typical split commercial air-conditioning system.
	44.05 Lay out a typical split commercial heating system.
	44.06 Maintain, test, analyze and repair various types of commercial heating and air-conditioning systems.

	44.07 Maintain, troubleshoot and repair water-cooled condensers
45.0	Calculate commercial heating and air-conditioning loadsThe student will be able to:
	45.01 Explain conduction as a heat-load source.
	45.02 Describe the implications of conducting and the resistance values for different types of construction materials.
	45.03 Interpret heat-transfer tables and define values U, K, C and R.
	45.04 Locate the total heat-transfer value of any surface.
	45.05 Explain infiltration and exfiltration/ventilation as a heat-load source.
	45.06 Explain a product heat-load source.
	45.07 Explain miscellaneous loads (people, motors and equipment) as heat-load sources.
	45.08 Explain the purpose of vapor barriers.
	45.09 Interpret tables of specific heat values as applied to commercial heating and air-conditioning systems.
	45.10 Calculate and design systems.
	45.11 Calculate cooling and heating equipment sizes.
	45.12 Design and identify methods of installing air-movement systems.
46.0	Install air distribution systemsThe student will be able to:
	46.01 Describe airflow and pressures in a basic forced-air distribution system.
	46.02 Explain the differences between propeller and centrifugal fans and blowers.
	46.03 Identify the various types of duct systems and explain why and where each type is used.
	46.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.
	46.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.
	46.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
	46.07 Demonstrate or explain the use and installation of dampers used in duct systems.
	46.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.

	46.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.
	46.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.
47.0	Evaluate commercial airside systemsThe student will be able to:
	47.01 Identify the differences in various types of commercial all-air systems.
	47.02 Identify the type of building in which a particular type of system is used.
	47.03 Explain the typical range of capacities for a commercial air system.
48.0	Balance an air distribution systemThe student will be able to:
	48.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.
	48.02 Explain the fan and pump laws.
	48.03 Use a psychrometric chart to evaluate air properties and changes in air properties.
	48.04 Explain the principles involved in the balancing of air and water distribution systems.
	48.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.
	48.06 Identify and use the tools and instruments needed to balance air distribution systems.
	48.07 Change the speed of an air distribution system supply fan.
49.0	Select energy conservation equipmentThe student will be able to:
	49.01 Identify and explain the operation of energy conservation equipment.
	49.02 Operate selected energy conservation equipment.
50.0	Analyze building management systemsThe student will be able to:
	50.01 Identify the major components of a building management system and describe how they fit together.
	50.02 Operate a basic direct digital controller.
51.0	Recommend alternative heating and cooling systems for various case studiesThe student will be able to:
	51.01 Describe alternative technologies for heating such as in-floor, direct-fired makeup unit (DFMU), solar, air turnover, corn or wood pellet burners, waste oil/multi-fuel and fireplace inserts.
	51.02 Describe alternative technologies for heating such as ductless systems, computer rooms, chilled beams and multi-zone.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Certificate Programs

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AAS degree program includes the following College Credit Certificates:

Residential Air Conditioning, Refrigeration, and Heating Systems Assistant (CCC- 0615050101) – 12 Credit Hours Residential Air Conditioning, Refrigeration, and Heating Systems Technician (CCC- 0615050102) – 24 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

Florida Department of Education Curriculum Framework

Program Title: Residential Air Conditioning, Refrigeration and Heating Systems Assistant

Career Cluster: Architecture and Construction

	CCC
CIP Number	0615050101
Program Type	College Credit Certificate (CCC)
Program Length	12 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for employment as air conditioning and heating technicians or to provide supplemental training for persons previously or currently employed in these occupations.

This certificate program is part of the Air Conditioning, Refrigeration, and Heating Systems Technology AAS degree program (0615050100).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, and safe and efficient work practices. The program prepares students to assist in engineering departments or work independently, capable of designing, installing, maintaining and operating small or medium air conditioning, heating or refrigerating systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Read construction documents.
- 03.0 Describe the history and concepts of heating, air-conditioning and refrigeration.
- 04.0 Explain the properties of matter and heat behavior.
- 05.0 Analyze fluids, pressures, refrigerants and related codes.
- 06.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 07.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 08.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.
- 09.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 10.0 Interpret, use and modify construction drawings and specifications.
- 11.0 Conduct system startup and shutdown.
- 12.0 Install air distribution systems.

Florida Department of Education Student Performance Standards

Program Title: Residential Air Conditioning, Refrigeration and Heating Systems Assistant 0615050101

CIP Number: 0615050101 Program Length: 12 Credit Hours

SOC Code(s): 49-9021

	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
(01.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
(01.02 Explain the reasons for regular safety meetings and for company safety policies.
(01.03 Explain the need for employee-background checks and medical examinations.
(01.04 Identify and use appropriate fire extinguishers and other such safety devices.
(01.05 Identify and follow emergency and rescue procedures.
(01.06 Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.
(01.07 Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.
(01.08 Apply specific safety and recovery practices for refrigerants used in the industry.
(01.09 Apply specific safety practices as they relate to handling and storing cylinders and materials.
(01.10 Select and wear proper protective clothing and equipment.
(01.11 Identify and use specific safety practices when using soldering and brazing skills.
(01.12 Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.
(01.13 Follow safety precautions when using hand and power tools.
(01.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.
(01.15 Explain emergency procedures to follow in response to workplace accidents.

_	
	01.16 Create a disaster and/or emergency response plan.
02.0	Read construction documentsThe student will be able to:
	02.01 Recognize and identify basic construction drawing terms, components and symbols.
	02.02 Relate information on construction drawings to actual locations on the print.
	02.03 Recognize different classifications of construction drawings.
	02.04 Interpret and use drawing dimensions.
03.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:
	03.01 Explain the basic principles of heating, ventilation and air-conditioning.
	03.02 Identify educational paths to career opportunities in the HVAC profession.
	03.03 Identify and explain the four major refrigeration components.
	03.04 Identify and explain the characteristics of a compression-cycle refrigerant system.
	03.05 Differentiate between air-conditioning and refrigeration.
	03.06 Differentiate between split systems and package systems.
	03.07 Describe the benefits of conditioned air and environments.
	03.08 Discuss the impact of heating, air-conditioning and refrigeration on society.
	03.09 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, air-conditioning and refrigeration industry and in the environment and explain their future ramifications.
	03.10 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as well as the manufacturer's installation instructions.
	03.11 Identify various professional organizations, associations and societies and explain their purposes.
04.0	Explain the properties of matter and heat behaviorThe student will be able to:
	04.01 Describe and explain freezing point, critical temperature and absolute zero.
	04.02 Describe matter, heat and heat transfer.
	04.03 Differentiate between heat and temperature.
	04.04 Explain and distinguish among the characteristics of the three states of matter.

	04.05 Explain the relationship between temperature and humidity.
	04.06 Differentiate between latent heat and sensible heat.
05.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	05.01 Identify the refrigeration cycle.
	05.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	05.03 Define and explain pressure, fluid, and temperature.
	05.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	05.05 Identify and explain the classifications, properties and uses of different refrigerants.
	05.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	05.07 Define and identify color-coding of refrigerant cylinders.
	05.08 Compare Pressure and Temperature (P/T) charts.
	05.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	05.10 Explain the effects of an improper refrigerant and contaminants in a system.
06.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	06.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	06.02 Evaluate metering-device performance.
	06.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	06.04 Analyze the operating condition of a compressor.
	06.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	06.06 Identify the location and explain the uses of refrigerant flow accessories.

	06.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	06.08 Evaluate system performance.
07.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	07.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	07.02 Bend tubing, using tube benders.
	07.03 Connect tubing using flared fittings and compression fittings.
	07.04 Connect tubing, using solderless connectors.
	07.05 Connect tubing, using a swaged-joint connection.
	07.06 Identify and use various types of torches.
	07.07 Identify, select and use appropriate brazing alloys, materials and skills.
	07.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products, from heat.
	07.09 Braze tubing.
	07.10 Silver-braze brass, steels and copper.
	07.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	07.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	07.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	07.14 Maintain project time and materials lists.
	07.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
08.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	08.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	08.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	08.03 Explain pressure and temperature drops.

09.0	Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to:
	09.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.
	09.02 Determine the start-up and checkout procedures recommended by different manufacturers.
	09.03 Determine the electrical requirements of equipment.
	09.04 Select and use appropriate tools, instruments and test equipment following safety precautions.
	09.05 Determine the temperature drop across the outdoor coil on a heat pump.
	09.06 Determine the temperature rise across the indoor coil on a heat pump.
	09.07 Test for a proper refrigerant charge in a residential heat pump.
	09.08 Apply good customer-relations skills.
10.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	10.01 Read mechanical plans within a set of construction drawings explain their relationship.
	10.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	10.03 Interpret specification documents and apply them to the plans.
	10.04 Interpret shop drawings and apply them to the plans and specifications.
	10.05 Develop a field set of as-built drawings.
	10.06 Identify the steps required for transferring design information to component production.
	10.07 List and classify materials most commonly used in HVAC systems.
11.0	Conduct system startup and shutdownThe student will be able to:
	11.01 Start up and shut down an air handler and related forced-air distribution system.
	11.02 Test compressor oil for acid contamination.
	11.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.
12.0	Install air distribution systemsThe student will be able to:
	12.01 Describe airflow and pressures in a basic forced-air distribution system.

12.02	Explain the differences between propeller and centrifugal fans and blowers.
12.03	Identify the various types of duct systems and explain why and where each type is used.
12.04	Demonstrate or explain the installation of metal, fiberboard and flexible duct.
12.05	Demonstrate or explain the installation of fittings and transitions used in duct systems.
12.06	Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
12.07	Demonstrate or explain the use and installation of dampers used in duct systems.
12.08	Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.
12.09	Identify instruments used to make measurements in air systems and explain the use of each instrument.
12.10	Make basic temperature, air pressure and velocity measurements in an air distribution system.

	01.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.
	01.15 Explain emergency procedures to follow in response to workplace accidents.

I r.	
	01.16 Create a disaster and/or emergency response plan.
02.0	Read construction documentsThe student will be able to:
	02.01 Recognize and identify basic construction drawing terms, components and symbols.
	02.02 Relate information on construction drawings to actual locations on the print.
	02.03 Recognize different classifications of construction drawings.
	02.04 Interpret and use drawing dimensions.
03.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	03.01 Identify the refrigeration cycle.
	03.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	03.03 Define and explain pressure, fluid and temperature.
	03.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	03.05 Identify and explain the classifications, properties and uses of different refrigerants.
	03.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	03.07 Define and identify "color-coding" of refrigerant cylinders.
	03.08 Compare Pressure and Temperature (P/T) charts.
	03.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	03.10 Explain the effects of an improper refrigerant and contaminants in a system.
04.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	04.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	04.02 Evaluate metering-device performance.

	04.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	04.04 Analyze the operating condition of a compressor.
	04.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	04.06 Identify the location and explain the uses of refrigerant flow accessories.
	04.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	04.08 Evaluate system performance.
05.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	05.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	05.02 Bend tubing, using tube benders.
	05.03 Connect tubing using flared fittings and compression fittings.
	05.04 Connect tubing, using solderless connectors.
	05.05 Connect tubing, using a swaged-joint connection.
	05.06 Identify and use various types of torches.
	05.07 Identify, select and use appropriate brazing alloys, materials and skills.
	05.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products, from heat.
	05.09 Braze tubing.
	05.10 Silver-braze brass, steels and copper.
	05.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	05.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	05.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	05.14 Maintain project time and materials lists.
	05.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
L	

06.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	06.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	06.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	06.03 Explain pressure and temperature drops.
07.0	Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to:
	07.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.
	07.02 Determine the start-up and checkout procedures recommended by different manufacturers.
	07.03 Determine the electrical requirements of equipment.
	07.04 Select and use appropriate tools, instruments and test equipment following safety precautions.
	07.05 Determine the temperature drop across the outdoor coil on a heat pump.
	07.06 Determine the temperature rise across the indoor coil on a heat pump.
	07.07 Test for a proper refrigerant charge in a residential heat pump.
	07.08 Apply good customer-relations skills.
08.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	08.01 Read mechanical plans within a set of construction drawings explain their relationship.
	08.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	08.03 Interpret specification documents and apply them to the plans.
	08.04 Interpret shop drawings and apply them to the plans and specifications.
	08.05 Develop a field set of as-built drawings.
	08.06 Identify the steps required for transferring design information to component production.
	08.07 List and classify materials most commonly used in HVAC systems.
09.0	Design heating and cooling systemsThe student will be able to:
	09.01 Identify and describe the steps in the system design process.

	09.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.	
	09.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.	
	09.04 Complete a load estimate to determine the heating and/or cooling load of a building.	
	09.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.	
	09.06 Select heating and/or cooling equipment using manufacturers' product data.	
	09.07 Identify the various types of duct systems and explain why and where each type is used.	
	09.08 Demonstrate the effect of fittings and transitions on duct system design.	
	09.09 Use a friction loss chart and duct sizing table to size duct.	
	09.10 Install insulation and vapor barriers used in duct systems.	
	09.11 Select and install refrigerant and condensate piping following design principles.	
10.0	10.0 Conduct system startup and shutdownThe student will be able to:	
	10.01 Start up and shut down an air handler and related forced-air distribution system.	
	10.02 Test compressor oil for acid contamination.	
	10.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.	
11.0 Design heating and cooling systemsThe student will be able to:		
	11.01 Identify and describe the steps in the system design process.	
	11.02 From construction drawings or an actual job site, obtain information needed to complete heating and cooling load estimates.	
	11.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.	
11.04 With instructor supervision, complete a load estimate to determine the heating and/or cooling load of a building.		
	11.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.	
	11.06 With instructor supervision, select heating and/or cooling equipment using manufacturers' product data.	
	11.07 Identify the various types of duct systems and explain why and where each type is used.	
	11.08 Demonstrate the effect of fittings and transitions on duct system design.	
_		

	11.09 Use a friction loss chart and duct sizing table to size duct.	
	11.10 Install insulation and vapor barriers used in duct systems.	
	11.11 Following proper design principles select and install refrigerant and condensate piping.	
12.0 Use combustion-type heating servicing and testing equipmentThe student will be able to:		
	12.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.	
	12.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).	
	12.03 Use the servicing and testing equipment.	
	12.04 Test, analyze and troubleshoot combustion-type-heating systems.	
13.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:	
	13.01 Define indoor-air quality.	
	13.02 Identify and explain the codes and standards regarding indoor-air quality.	
	13.03 Select and use indoor-air-quality measuring devices.	
	13.04 Explain the standards for and ways to measure indoor-air quality using various methods.	
14.0	4.0 Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:	
	14.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.	
	14.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.	
15.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:	
	15.01 Identify pneumatic control systems.	
	15.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.	
16.0	Maintain and repair thermal storage systemsThe student will be able to:	
	16.01 Apply appropriate codes, standards and safety practices.	
	16.02 Describe the benefits and limitations of each type.	
	16.03 Explain the operational principles of a thermal storage system.	

	16.04 Identify and explain various types of thermal storage systems.	
	16.05 Maintain, troubleshoot and test various types of thermal storage systems.	
17.0	Install air distribution systemsThe student will be able to:	
	17.01 Describe airflow and pressures in a basic forced-air distribution system.	
	17.02 Explain the differences between propeller and centrifugal fans and blowers.	
	17.03 Identify the various types of duct systems and explain why and where each type is used.	
	17.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.	
	17.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.	
	17.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.	
	17.07 Demonstrate or explain the use and installation of dampers used in duct systems.	
	17.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.	
	17.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.	
	17.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.	
18.0	0 Evaluate commercial airside systemsThe student will be able to:	
	18.01 Identify the differences in various types of commercial all-air systems.	
	18.02 Identify the type of building in which a particular type of system is used.	
	18.03 Explain the typical range of capacities for a commercial air system.	
19.0	Balance an air distribution systemThe student will be able to:	
	19.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.	
	19.02 Explain the fan and pump laws.	
	19.03 Use a psychrometric chart to evaluate air properties and changes in air properties.	
	19.04 Explain the principles involved in the balancing of air and water distribution systems.	
	19.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.	

	19.06 Identify and use the tools and instruments needed to balance air distribution systems.	
	19.07 Change the speed of an air distribution system supply fan.	
20.0	0.0 Select energy conservation equipmentThe student will be able to:	
	20.01 Identify and explain the operation of energy conservation equipment.	
	20.02 Operate selected energy conservation equipment.	
21.0	Analyze building management systemsThe student will be able to:	
	21.01 Identify the major components of a building management system and describe how they fit together.	
	21.02 Operate a basic direct digital controller.	

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Program Title: Building Construction Specialist Career Cluster: Architecture and Construction

	CCC
CIP Number	0615100103
Program Type	College Credit Certificate (CCC)
Program Length	18 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	11-9021 - Construction Managers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as Construction Specialists, Construction Managers, Construction and Building Inspectors, Quality Control Assistant; Scheduler; Materials Tester in the areas of estimating, scheduling, and interpreting plans or to provide supplemental training for persons previously or currently employed in these occupations. It provides a foundation in pursuing a career in building inspection and quality control.

This certificate program is part of the Building Construction Technology (60) AS degree program (1615100102).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

- 01.0 Communicate effectively.
- 02.0 Identify issues to look for in order to supervise application of construction materials.
- 03.0 Draw, read and interpret drawings and specifications.
- 04.0 Interpret basic designs and apply construction principles.
- 05.0 Take off quantities and estimate costs.
- 06.0 Plan, coordinate, schedule and control projects.
- 07.0 Perform tests and inspections.
- 08.0 Demonstrate efficient office procedures.
- 09.0 Demonstrate appropriate math skills.
- 10.0 Demonstrate appropriate understanding of basic science.
- 11.0 Demonstrate employability skills.

Building Construction Specialist 0615100103 Program Title: CIP Number:

Program Length: SOC Code(s): 18 Credit Hours

11-9021

	This certificate program is part of the Building Construction Technology (60) AS degree program (1615100102). At the completion of this program, the student will be able to:		
01.0	Communicate effectivelyThe student will be able to:		
	01.01 Prepare business correspondence.		
	01.02 Prepare daily project report.		
	01.03 Prepare requisitions for equipment and materials.		
	01.04 Prepare minutes from job-site meetings.		
01.05 Write logical and understandable statements or phrases to accurately fill out forms/invoices commonly used in b industry.			
	01.06 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.		
	01.07 Read and follow written and oral instructions.		
	01.08 Answer and ask questions coherently and concisely.		
02.0	Identify issues to look for in order to supervise application of construction materialsThe student will be able to:		
	02.01 Identify appropriate grade of materials.		
	02.02 Identify mechanical components and equipment.		
03.0	Draw, read and interpret drawings and specificationsThe student will be able to:		
	03.01 Take site notes and measurements.		
	03.02 Interpret structural drawings and specifications.		
	03.03 Interpret reinforcing steel drawings and bar list.		

	03.04 Interpret and apply ASTM standards.
	03.05 Interpret and apply CSA standards.
	03.06 Evaluate shop drawings prior to review by architect or engineer of record.
04.0	Interpret basic designs and apply construction principlesThe student will be able to:
	04.01 Plan and coordinate excavation and foundation work.
	04.02 Coordinate and supervise concrete and formwork.
	04.03 Coordinate and supervise staging, scaffolding and falsework.
	04.04 Coordinate and supervise the erection of walls with the rough opening sizes for windows and doors.
	04.05 Coordinate and supervise masonry work.
	04.06 Coordinate and supervise miscellaneous roofing and sheet metal.
	04.07 Coordinate and supervise miscellaneous metal.
	04.08 Coordinate and supervise structural steel work.
	04.09 Coordinate and supervise mechanical work.
	04.10 Coordinate and supervise elevator installation.
	04.11 Coordinate and supervise electrical installation.
	04.12 Coordinate and supervise lath and plaster and dry wall.
	04.13 Coordinate and supervise painting and finishes.
	04.14 Coordinate and supervise tile and terrazzo.
	04.15 Coordinate and supervise the installation of flooring.
	04.16 Coordinate and supervise the installation of carpentry and millwork.
05.0	Take off quantities and estimate costsThe student will be able to:
	05.01 Make calculations.
	05.02 Estimate quantities of concrete.
·	

	05.03 Compile lists of sub-trades for project.
	05.04 Take off quantities of paving.
	05.05 Estimate quantities of rough carpentry.
	05.06 Obtain and build up material costs.
	05.07 Interpret contract document.
	05.08 Estimate quantities of framework.
	05.09 Estimate quantities of excavation and fill.
	05.10 Contact sub trade tenders.
	05.11 Take off quantities of miscellaneous metals.
	05.12 Take off quantities of millwork.
	05.13 Take off quantities of structural steel.
	05.14 Take off quantities of manufactured specialties.
	05.15 Analyze and project general condition costs.
	05.16 Analyze and project labor unit costs.
	05.17 Estimate quantities of reinforcing steel.
	05.18 Estimate quantities of masonry.
	05.19 Analyze and project site overhead costs.
	05.20 Evaluate sub trade bids.
	05.21 Summarize project cost and complete tenders prices.
06.0	Plan, coordinate, schedule and control projectsThe student will be able to:
	06.01 Prepare daily time sheets.
	06.02 Record and control materials received.
	06.03 Allocate efficient use of site space.

	06.04 Maintain a clean and orderly construction site.	
	06.05 Store materials and equipment.	
	06.06 Coordinate and control use of construction tools and equipment.	
	06.07 Prepare progress billing.	
	06.08 Store chemicals and paints.	
	06.09 Prepare work schedules.	
	06.10 Prepare material delivery schedules.	
	06.11 Expedite delivery of manufactured materials.	
	06.12 Analyze productivity.	
	06.13 Record deficiencies as a result of project inspections.	
	06.14 Prepare coded cost break downs.	
	06.15 Take appropriate action to correct project deficiencies.	
	06.16 Prepare cash flow schedules.	
	06.17 Monitor schedule to control project.	
	06.18 Prepare cost reports.	
07.0	Perform tests and inspectionsThe student will be able to:	
	07.01 Check concrete placing and consolidation procedures.	
	07.02 Check form work.	
	07.03 Check reinforcing steel and placing.	
	07.04 Inspect placing of fill and compaction procedures.	
	07.05 Verify data from tests conducted by independent testing companies.	
08.0	Demonstrate efficient office proceduresThe student will be able to:	
	08.01 Organize work area.	

	08.02 Select and use appropriate forms.
08.03 Develop and maintain filing system.	
	08.04 Maintain inventory of physical assets.
	08.05 Set up and maintain technical reference library.
	08.06 Maintain a system for field work authorizations.
	08.07 Maintain a system for back charges.
	08.08 Interpret basic company accounting procedures.
09.0	Demonstrate appropriate math skillsThe student will be able to:
	09.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	09.02 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	09.03 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	09.04 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	09.05 Demonstrate an understanding of federal, state and local taxes and their computation.
10.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:
	10.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.
	10.02 Draw conclusions or make inferences from data.
	10.03 Understand pressure measurement in terms of PSI.
11.0	Demonstrate employability skillsThe student will be able to:
	11.01 Conduct a job search.
	11.02 Secure information about a job.
	11.03 Identify documents which may be required when applying for a job interview.
	11.04 Complete a job application.
	11.05 Demonstrate competence in job interview techniques.

- 11.06 Identify or demonstrate appropriate responses to criticism in the workplace.
- 11.07 Identify acceptable work habits.

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Purpose

This certificate program is part of the Building Construction Technology AS (60) degree program (1615100102).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, math skills, human relations and employability skills, safe and efficient construction practices, building materials, interpreting plans, and estimating and planning of residential and commercial structures. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

- 01.0 Communicate effectively.
- 02.0 Identify issues to look for in order to supervise application of construction materials.
- 03.0 Produce, read and interpret drawings and specifications.
- 04.0 Interpret basic designs and apply sound construction principles.
- 05.0 Take off quantities and estimate costs.
- 06.0 Plan, coordinate, schedule and control projects.
- 07.0 Perform tests and inspections.
- 08.0 Demonstrate appropriate math skills.
- 09.0 Demonstrate appropriate understanding of basic science.
- 10.0 Demonstrate employability skills.

Program Title: Green Building Construction Technology CIP Number: 0615100104

CIP Number: 0615100104 Program Length: 24 Credit Hours

SOC Code(s): 11-9021

	This certificate program is part of the Building Construction Technology AS (60) degree program (1615100102). At the completion of this program, the student will be able to:	
01.0	Communicate effectivelyThe student will be able to:	
	01.01 Prepare business correspondence.	
	01.02 Set-up surveyors field book.	
	01.03 Prepare daily project report.	
	01.04 Prepare requisitions for equipment and materials.	
	01.05 Prepare minutes from job-site meetings.	
	01.06 Write logical and understandable statements or phrases to accurately fill out forms/invoices commonly used in business and industry.	
	01.07 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.	
	01.08 Read and follow written and oral instructions.	
	01.09 Answer and ask questions coherently and concisely.	
	01.10 Read critically by recognizing assumptions and implications and by evaluating ideas.	
02.0	Identify issues to look for in order to supervise application of construction materialsThe student will be able to:	
	02.01 Identify appropriate grade of materials.	
	02.02 Identify mechanical components and equipment.	
03.0	Draw, read and interpret drawings and specificationsThe student will be able to:	
	03.01 Identify, select and use drafting instruments.	

	03.02 Identify architectural symbols.
	03.03 Use drafting reproduction equipment.
	03.04 Take site notes and measurements.
	03.05 Identify electrical symbols.
	03.06 Prepare site sketches.
	03.07 Identify mechanical symbols.
	03.08 Identify topographical symbols.
	03.09 Interpret land surveyor's notes.
	03.10 Read and understand topographic drawings.
	03.11 Prepare working sketches and "as built" drawings.
	03.12 Interpret architectural drawings and specifications.
	03.13 Evaluate finishing hardware schedules.
	03.14 Interpret structural drawings and specifications.
	03.15 Evaluate shop drawings prior to review by architect or engineer of record.
	03.16 Interpret mechanical drawings and specifications.
	03.17 Interpret electrical drawings and specifications.
04.0	Interpret basic designs and apply construction principlesThe student will be able to:
	04.01 Plan and coordinate excavation and foundation work.
	04.02 Coordinate and supervise concrete and formwork.
	04.03 Coordinate and supervise staging, scaffolding and falsework.
	04.04 Coordinate and supervise the erection of walls with the rough opening sizes for windows and doors.
	04.05 Coordinate and supervise masonry work.
	04.06 Coordinate and supervise miscellaneous roofing and sheet metal.

	04.07 Coordinate and supervise miscellaneous metal.
	04.08 Coordinate and supervise structural steel work.
	04.09 Coordinate and supervise mechanical work.
	04.10 Coordinate and supervise electrical installation.
	04.11 Coordinate and supervise lath and plaster and dry wall.
	04.12 Coordinate and supervise painting and finishes.
	04.13 Coordinate and supervise tile and terrazzo.
	04.14 Coordinate and supervise the installation of flooring.
	04.15 Coordinate and supervise the installation of carpentry and millwork.
05.0	Take off quantities and estimate costsThe student will be able to:
	05.01 Make calculations.
	05.02 Estimate quantities of concrete.
	05.03 Compile lists of sub-trades for project.
	05.04 Take off quantities of paving.
	05.05 Estimate quantities of rough carpentry.
	05.06 Obtain and build up material costs.
	05.07 Interpret contract document.
	05.08 Estimate quantities of framework.
	05.09 Estimate quantities of excavation and fill.
	05.10 Estimate quantities of landscaping.
	05.11 Contact sub trade tenders.
	05.12 Take off quantities of miscellaneous metals.
	05.13 Take off quantities of millwork.

	05.14 Take off quantities of structural steel.
05.15 Take off quantities of manufactured specialties.	
05.16 Analyze and project plant and equipment costs.	
	05.17 Analyze and project general condition costs.
	05.18 Analyze and project labor unit costs.
	05.19 Estimate quantities of reinforcing steel.
	05.20 Estimate quantities of masonry.
	05.21 Analyze and project site overhead costs.
	05.22 Evaluate sub trade bids.
	05.23 Summarize project cost and complete tenders prices.
	05.24 Estimate floor covering in square yards, square feet, square inches, etc.
	05.25 Estimate products and quantities for painting.
	05.26 Determine testing requirements based on architectural and engineering plans and specifications.
06.0	Plan, coordinate, schedule and control projectsThe student will be able to:
	06.01 Prepare daily time sheets.
	06.02 Record and control materials received.
	06.03 Allocate efficient use of site space.
	06.04 Maintain a clean and orderly construction site.
	06.05 Store materials and equipment.
	06.06 Coordinate and control use of construction tools and equipment.
	06.07 Prepare progress billing.
	06.08 Store chemicals and paints.
	06.09 Prepare work schedules.

	06.10 Prepare material delivery schedules.	
	06.11 Expedite delivery of manufactured materials.	
06.12 Analyze productivity.		
06.13 Record deficiencies as a result of project inspections.		
	06.14 Prepare coded cost break downs.	
	06.15 Take appropriate action to correct project deficiencies.	
	06.16 Prepare cash flow schedules.	
	06.17 Monitor schedule to control project.	
	06.18 Prepare cost reports.	
07.0	Perform tests and inspectionsThe student will be able to:	
	07.01 Arrange for soundness test.	
	07.02 Calculate air voids and viscosity modifying admixtures (VMA) values.	
	07.03 Arrange for permeability test.	
08.0	Demonstrate appropriate math skillsThe student will be able to:	
	08.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.	
	08.02 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.	
	08.03 Add, subtract, multiply and divide using fractions, decimals and whole numbers.	
	08.04 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.	
	08.05 Demonstrate an understanding of federal, state and local taxes and their computation.	
09.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:	
	09.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.	
	09.02 Draw conclusions or make inferences from data.	
	09.03 Identify health related problems which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.	

	09.04 Understand pressure measurement in terms of PSI.	
10.0	0.0 Demonstrate employability skillsThe student will be able to:	
	10.01 Conduct a job search.	
	10.02 Secure information about a job.	
	10.03 Identify documents which may be required when applying for a job interview.	
	10.04 Complete a job application.	
	10.05 Demonstrate competence in job interview techniques.	
	10.06 Identify or demonstrate appropriate responses to criticism in the workplace.	
	10.07 Identify acceptable work habits.	

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Program Title: Drafting Design

Career Cluster: Architecture and Construction

	ccc	
CIP Number	0615130101	
Program Type	College Credit Certificate (CCC)	
Program Length	22 Credit Hours (Primary), 24 Credit Hours (Secondary)	
CTSO	SkillsUSA	
SOC Codes (all applicable)	17-3011 – Architectural and Civil Drafters	
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml	

Purpose

The purpose of this program is to prepare students for employment as construction planners, or to provide supplemental training for persons previously or currently employed in these occupations.

This certificate program is part of the Drafting and Design Technology AS degree program (1615020200).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, assisting architects and architectural engineers in planning and designing structures, using construction materials, and dealing with contracts and specifications.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

- O1.0 Apply basic drafting skills.O8.0 Apply technical mathematics.O9.0 Prepare architectural drawings.
- 10.0 Prepare computer aided drawings.

Program Title: CIP Number: Drafting Design 0615130101 Program Length: SOC Code(s): 22 Credit Hours

17-3011

	This certificate program is part of the Drafting and Design Technology AS degree program (1615020200). At the completion of this program, the student will be able to:		
01.0	Apply basic drafting skillsThe student will be able to:		
	01.01 Apply safety practices.		
	01.02 Operate drafting instruments.		
	01.03 Perform lettering techniques.		
	01.04 Prepare multi-view drawings.		
	01.05 Prepare sectional views.		
	01.06 Prepare auxiliary views.		
	01.07 Prepare dimension drawings.		
	01.08 Prepare pictorial drawings.		
	01.09 Prepare sketches.		
	01.10 Prepare title blocks and other formats.		
	01.11 Compile a portfolio.		
08.0	Apply technical mathematicsThe student will be able to:		
	08.01 Solve arithmetic problems.		
	08.02 Solve algebra problems.		
	08.03 Solve geometry problems.		
09.0	Prepare architectural drawingsThe student will be able to:		

	09.01 Prepare floor plan drawings.
	09.02 Prepare foundation plan and detail drawings.
	09.03 Prepare elevation drawings.
	09.04 Prepare landscape layouts.
	09.05 Prepare schedules.
	09.06 Prepare sections.
	09.08 Prepare truss drawings.
	09.09 Prepare stairway drawings.
	09.10 Prepare fireplace drawings.
	09.11 Prepare plot plan drawings.
	09.12 Prepare plumbing plan drawings.
	09.13 Prepare climate control drawings.
	09.14 Prepare electrical plan drawings.
10.0	Prepare computer aided drawingsThe student will a able to:
	10.01 Use system commands.
	10.02 Perform drafting procedures.
	10.03 Operate peripheral equipment.
	10.04 Apply specialized computer aided drafting (CAD) functions.

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml	

Purpose

The purpose of this program is to prepare students for employment as drafters or chief design drafters, or to provide supplemental training for persons previously or currently employed in these occupations. The training will be technologically advanced, thus meeting the current needs of the industry.

This certificate program is part of the Drafting and Design Technology AS degree program (1615130102).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to, communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, drafting standards, math skills, and drafting office practices to assist mathematical, electrical and electronic, architectural, chemical, civil, or other engineers in the design and drafting of electrical circuits, machines, structures, weldments, or architectural plans. It also includes

instruction in the preparation of engineering plans, layouts, and detailed drawings according to conventional projection principles, preparation of charts, graphs or diagrams, and the use of handbook data germane to design and drafting in various fields.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

- O1.0 Apply basic drafting skills.O8.0 Apply technical mathematics.O9.0 Prepare architectural drawings.
- 10.0 Prepare computer aided drawings.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

- 01.0 Communicate effectively.
- 02.0 Identify, select, apply and maintain drafting and graphic materials and equipment, including both table top and Computer Aided Drafting (CAD).
- 03.0 Identify construction materials and their application.
- 04.0 Interpret drawings and documents.
- 05.0 Interpret and apply basic principles of architectural and engineering design.
- 06.0 Interpret and apply codes, regulations and technical literature.
- 07.0 Produce architectural working drawings using both table top and Computer Aided Drafting (CAD).
- 08.0 Prepare subcontractor shop drawings using both table top and Computer Aided Drafting (CAD).
- 09.0 Estimate basic quantities of materials.
- 10.0 Demonstrate appropriate communication skills.
- 11.0 Demonstrate appropriate math skills.
- 12.0 Explain sustainability issues related to the design, construction and maintenance of the built environment.

Program Title: CIP Number: Sustainable Design 0630330106

Program Length: SOC Code(s): 19 Credit Hours

17-3011

	certificate program is part of the Architectural Design and Construction Technology AS degree program (1604090100). At the letion of this program, the student will be able to:
01.0	Communicate effectivelyThe student will be able to:
	01.01 Identify communication channels in organizations.
	01.02 Develop and use effective means of communications.
	01.03 Develop an effective working relationship with others.
	01.04 Prepare business correspondence, memos and reports.
	01.05 Compose clear and concise oral and written technical reports and presentations.
	01.06 Participate in technical discussion and meetings.
02.0	Identify, select, apply and maintain drafting and graphic materials and equipment, including both table top and Computer Aided Drafting (CAD)The student will be able to:
	02.01 Use architectural and engineering scales.
	02.02 Select, apply and maintain basic drawing instruments including both table top tools (triangles, compass, etc.) and computer hardware devices and software programs.
	02.03 Identify and select leads, lead holders, sharpeners and erasers for table top drafting.
	02.04 Identify and select reproduction materials including plotters, laser printers, inkjet printers and blueprint machines.
	02.05 Set up and maintain drafting machine, T square and parallel rule.
	02.06 Identify, select and apply color markers and pencils.
	02.07 Operate calculators.
	02.08 Identify, operate and maintain photography equipment.

	02.09 Apply photographic techniques.
	02.10 Apply and develop lettering and drawing techniques.
03.0	Identify construction materials and their application The student will be able to:
	01.01 Identify paving materials and applications.
	01.02 Identify formwork materials and methods.
	01.03 Identify concrete materials and applications.
	01.04 Identify reinforcing steel and applications.
	01.05 Identify masonry materials and applications.
	01.06 Identify structural steel shapes and applications.
	01.07 Identify miscellaneous metals and applications.
	01.08 Identify wood construction materials and applications.
	01.09 Identify millwork, finished carpentry and trim, cabinets, etc. and applications.
	01.10 Identify adhesives and sealants and applications.
	01.11 Identify plastic materials and applications.
	01.12 Identify waterproofing materials and vapor barriers and applications.
	01.13 Identify insulation materials and applications.
	01.14 Identify roofing materials and applications.
	01.15 Identify flashings and applications.
	01.16 Identify glass and glazing materials and applications.
	01.17 Identify exterior finishes and applications.
	01.18 Identify floor finish materials and applications.
	01.19 Identify wall finish materials and applications.
	01.20 Identify ceiling finish materials and applications.

	01.21 Identify fire proofing materials and applications.
	01.22 Identify finish hardware and applications.
	01.23 Identify manufactured specialties and applications.
	01.24 Identify applications of pre-engineered and prefabricated structures.
	01.25 Identify basic plumbing components.
	01.26 Identify basic HVAC components.
	01.27 Identify basic electrical components.
04.0	Interpret drawings and documents The student will be able to:
	04.01 Interpret technical symbols.
	04.02 Interpret topographical drawings.
	04.03 Interpret aerial photographs and maps.
	04.04 Interpret site drawings.
	04.05 Interpret architectural drawings.
	04.06 Interpret specifications.
	04.07 Interpret addendums.
	04.08 Interpret shop drawings.
	04.09 Interpret mechanical drawings.
	04.10 Interpret electrical drawings.
	04.11 Interpret master and development plans and documents
05.0	Interpret and apply basic principles of architectural and engineering design The student will be able to:
	05.01 Interpret soil analysis reports.
	05.02 Interpret compaction test reports.
	05.03 Interpret and apply fundamentals of site requirements.

	05.04 Determine and apply space relationships.
06.0	Interpret and apply codes, regulations and technical literature The student will be able to:
	06.01 Use appropriate time-saving reference materials.
	06.02 Interpret and apply local, state, national and international building codes including the Florida Building Codes, the Life Safety Code (NFPA 101), the National Electric Code (NFPA 70), the International Building Code (IBC), etc.
	06.03 Interpret and apply municipal codes and regulations.
	06.04 Interpret zoning bylaws and regulations.
	06.05 Interpret zoning maps.
	06.06 Read and interpret trade magazines and catalogs.
	06.07 Read and interpret trade manuals.
	06.08 Interpret yardstick costing manual.
	06.09 Interpret and apply construction association regulations.
07.0	Produce architectural working drawings using both table top and Computer Aided Drafting (CAD) The student will be able to:
	07.01 Prepare floor plan drawings.
	07.02 Prepare elevation drawings.
	07.03 Prepare landscape layouts.
	07.04 Prepare schedules.
	07.05 Prepare sections.
	07.06 Build architectural models.
	07.07 Prepare plot plan drawings.
08.0	Prepare subcontractor shop drawings using both table top and Computer Aided Drafting (CAD) The student will be able to:
	08.01 Prepare plumbing plan drawings.
	08.02 Prepare climate control drawings.
	08.03 Prepare electrical plan drawings.

09.0	Estimate basic quantities of materials The student will be able to:
	09.01 Compute area and volume of buildings.
	09.02 Estimate quantities of excavation and fill.
	09.03 Take off quantities of form work.
	09.04 Take off quantities of concrete.
	09.05 Take off quantities of lumber.
	09.06 Take off quantities of masonry.
	09.07 Interpret and complete standard estimator's form.
	09.08 Apply the use of computer estimating software.
10.0	Demonstrate appropriate communication skills The student will be able to:
	10.01 Write logical and understandable statements, or phrases, to accurately fill out forms/invoices commonly used in business and industry.
	10.02 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.
	10.03 Read and follow written and oral instructions.
	10.04 Answer and ask questions coherently and concisely.
	10.05 Read critically by recognizing assumptions and implications and by evaluating ideas.
11.0	Demonstrate appropriate math skills The student will be able to:
	11.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	11.02 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	11.03 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
12.0	Explain sustainability issues related to the design, construction and maintenance of the built environmentThe student will be able to:
	12.01 Describe the impact of the construction industry on the natural environment.
	12.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	12.03 Identify and analyze sustainable alternatives to conventional construction practices.

12.04	Identify specific practices that can lessen adverse impacts on the environment.
12.05	Describe the building assessment tools such as Leadership in Energy and Environmental Design (LEED) and Green Globes.
12.06	Identify design features, construction activities and maintenance practices that contribute to a project's overall sustainability.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Florida Department of Education Curriculum Framework

Program Title: Architectural Design and Construction Technology

Career Cluster: Architecture and Construction

	AS
CIP Number	1604090100
Program Type	College Credit
Standard Length	66 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3011 – Architectural and Civil Drafters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as construction planners, or to provide supplemental training for persons previously or currently employed in these occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to, communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, assisting architects and architectural engineers in planning and designing structures, using construction materials, and dealing with contracts and specifications. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 66 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Communicate effectively.
- 02.0 Identify, select, apply and maintain drafting and graphic materials and equipment, including both table top and Computer Aided Drafting (CAD).
- 03.0 Identify construction materials and their application.
- 04.0 Interpret drawings and documents.
- 05.0 Interpret and apply basic principles of architectural and engineering design.
- 06.0 Interpret and apply codes, regulations and technical literature.
- 07.0 Produce architectural working drawings using both table top and Computer Aided Drafting (CAD).
- 08.0 Produce structural drawings using both table top and Computer Aided Drafting (CAD) for steel and concrete structures.
- 09.0 Prepare subcontractor shop drawings using both table top and Computer Aided Drafting (CAD).
- 10.0 Survey and assess construction sites.
- 11.0 Estimate basic quantities of materials.
- 12.0 Perform office and administrative procedures.
- 13.0 Demonstrate appropriate communication skills.
- 14.0 Demonstrate appropriate math skills.
- 15.0 Demonstrate appropriate understanding of basic science.
- 16.0 Demonstrate employability skills.
- 17.0 Demonstrate an understanding of entrepreneurship.
- 18.0 Explain sustainability issues related to the design, construction and maintenance of the built environment.

Program Title: CIP Number: **Architectural Design and Construction Technology**

1604090100 Program Length: SOC Code(s): 66 Credit Hours

17-3011

01.0	Communicate effectivelyThe student will be able to:
	01.01 Identify communication channels in organizations.
	01.02 Develop and use effective means of communications.
	01.03 Develop an effective working relationship with others.
	01.04 Prepare business correspondence, memos and reports.
	01.05 Use electronic communication technologies such as email, text messaging and social networking appropriately.
	01.06 Compose clear and concise oral and written technical reports and presentations.
	01.07 Participate in technical discussion and meetings.
02.0	Identify, select, apply and maintain drafting and graphic materials and equipment, including both table top and Computer Aided Drafting (CAD)The student will be able to:
	02.01 Apply functions of light table.
	02.02 Use architectural and engineering scales.
	02.03 Identify and select drawing materials.
	02.04 Select, apply and maintain basic drawing instruments including both table top tools (triangles, compass, etc.) and computer hardware devices and software programs.
	02.05 Identify, apply and maintain lettering instruments.
	02.06 Identify and select leads, lead holders, sharpeners and erasers for table top drafting.
	02.07 Identify and select reproduction materials including plotters, laser printers, inkjet printers and blueprint machines.

	02.08 Identify, operate and maintain reproduction equipment including plotters, laser printers, inkjet printers and blueprint machines.
	02.09 Select and apply architectural and engineering curves and templates.
	02.10 Set up and maintain drafting machine, T square and parallel rule.
	02.11 Identify, select and apply commercial press on graphic materials.
	02.12 Operate and maintain inking equipment and materials.
	02.13 Identify, select and apply color markers and pencils.
	02.14 Identify, select and apply water base colors.
	02.15 Select and apply scribing materials and instruments.
	02.16 Operate calculators.
	02.17 Measure area using planimeter.
	02.18 Identify and apply metric system.
	02.19 Identify, operate and maintain photography equipment.
	02.20 Apply photographic techniques.
	02.21 Apply and develop drawing techniques using both table top drafting and Computer-Aided Drafting (CAD).
	02.22 Apply and develop freehand lettering techniques.
03.0	Identify construction materials and their applicationThe student will be able to:
	03.01 Identify paving materials and applications.
	03.02 Identify formwork materials and methods.
	03.03 Identify concrete materials and applications.
	03.04 Identify reinforcing steel and applications.
	03.05 Identify masonry materials and applications.
	03.06 Identify structural steel shapes and applications.
	03.07 Identify miscellaneous metals and applications.

	03.08 Identify wood construction materials and applications.
	03.09 Identify millwork, finished carpentry and trim, cabinets, etc. and applications.
	03.10 Identify adhesives and sealants and applications.
	03.11 Identify plastic laminates and applications.
	03.12 Identify waterproofing materials and vapor barriers and applications.
	03.13 Identify insulation materials and applications.
	03.14 Identify roofing materials and applications.
	03.15 Identify flashings and applications.
	03.16 Identify glass and glazing materials and applications.
	03.17 Identify exterior finishes and applications.
	03.18 Identify floor finish materials and applications.
	03.19 Identify wall finish materials and applications.
	03.20 Identify ceiling finish materials and applications.
	03.21 Identify fire proofing materials and applications.
	03.22 Identify finish hardware and applications.
	03.23 Identify manufactured specialties and applications.
	03.24 Identify applications of pre-engineered and prefabricated structures.
	03.25 Identify basic plumbing components.
	03.26 Identify basic HVAC components.
	03.27 Identify basic electrical components.
04.0	Interpret drawings and documentsThe student will be able to:
	04.01 Interpret technical symbols.
	04.02 Interpret topographical drawings.

	04.03 Interpret aerial photographs and maps.
	04.04 Interpret site drawings.
	04.05 Interpret architectural drawings.
	04.06 Interpret specifications.
	04.07 Interpret addendums.
	04.08 Interpret notice of change and change orders.
	04.09 Interpret shop drawings.
	04.10 Interpret structural drawings.
	04.11 Interpret mechanical drawings.
	04.12 Interpret electrical drawings.
	04.13 Interpret modular approach to buildings.
	04.14 Identify and interpret contracts.
	04.15 Identify and interpret liens.
	04.16 Interpret deeds.
	04.17 Interpret master and development plans and documents
05.0	Interpret and apply basic principles of architectural and engineering designThe student will be able to:
	05.01 Conduct and interpret concrete slump test.
	05.02 Take test cylinder and interpret results.
	05.03 Interpret soil analysis reports.
	05.04 Interpret compaction test reports.
	05.05 Interpret theory of loads.
	05.06 Determine effect of loads on materials.
	05.07 Interpret principles of expansion and contraction and control

	05.08 Interpret and apply fundamentals of site requirements.
	05.09 Determine and apply space relationships.
06.0	Interpret and apply codes, regulations and technical literatureThe student will be able to:
	06.01 Use appropriate time-saving reference materials.
	06.02 Interpret and apply local, state, national and international building codes including the Florida Building Codes, the Life Safety Code (NFPA 101), the National Electric Code (NFPA 70), the International Building Code (IBC), etc.
	06.03 Interpret and apply municipal codes and regulations.
	06.04 Interpret zoning bylaws and regulations.
	06.05 Interpret zoning maps.
	06.06 Read and interpret trade magazines and catalogs.
	06.07 Interpret trade manuals.
	06.08 Interpret regional estimating cost manuals.
	06.09 Interpret and apply construction association regulations.
07.0	Produce architectural working drawings using both table top and Computer Aided Drafting (CAD)The student will be able to:
	07.01 Prepare floor plan drawings.
	07.02 Prepare foundation plan and detail drawings.
	07.03 Prepare elevation drawings.
	07.04 Prepare landscape layouts.
	07.05 Prepare schedules.
	07.06 Prepare sections.
	07.07 Build architectural models.
	07.08 Prepare truss drawings.
	07.09 Prepare stairway drawings.
	07.10 Prepare fireplace drawings.

	07.11 Propare plot plan drawings
08.0	O7.11 Prepare plot plan drawings. Produce structural drawings using both table top and Computer Aided Drafting (CAD) for steel and concrete structuresThe student will be able to:
	08.01 Draw beam connections.
	08.02 Draw structural assemblies.
	08.03 Prepare erection plans.
	08.04 Prepare structural drawings.
	08.05 Make take-offs from reinforced concrete engineering drawings.
	08.06 Prepare footing and foundation drawings.
	08.07 Prepare column detail drawings.
	08.08 Prepare floor and roof detail drawings.
	08.09 Prepare special structure detail drawings.
	08.10 Prepare framed beam connection drawings.
	08.11 Prepare stiffened seat connection drawings.
	08.12 Prepare bolted column detail drawings.
	08.13 Prepare gusset plate drawings.
09.0	Prepare subcontractor shop drawings using both table top and Computer Aided Drafting (CAD)The student will be able to:
	09.01 Prepare plumbing plan drawings.
	09.02 Prepare climate control drawings.
	09.03 Prepare electrical plan drawings.
10.0	Survey and assess construction sitesThe student will be able to:
	10.01 Prepare site sketches.
	10.02 Select and apply methods of on-site measuring including traditional chains and tapes and current satellite Global Positioning Systems (GPS).
	10.03 Interpret survey books, logs and electronic records including County Tax Assessor, American Land Title Association (ALTA), the United States Geological Survey (USGS), Terra Server, etc.

	10.04 Identify and apply basic principles of levels and rods.
	10.05 Identify and apply basic principles of transits.
	10.06 Interpret angular and distance measurements to bearings and azimuth.
	10.07 Outline basics of site meetings and inspection.
11.0	Estimate basic quantities of materialsThe student will be able to:
	11.01 Compute area and volume of buildings.
	11.02 Estimate quantities of excavation and fill.
	11.03 Take off quantities of form work.
	11.04 Take off quantities of concrete.
	11.05 Take off quantities of lumber.
	11.06 Take off quantities of masonry.
	11.07 Interpret and complete standard estimator's form.
	11.08 Apply the use of computer estimating software.
12.0	Perform office and administrative proceduresThe student will be able to:
	12.01 Organize and maintain personal work area.
	12.02 Operate office equipment.
	12.03 Estimate, order and maintain office and drafting supplies.
	12.04 Maintain drawing file systems.
	12.05 Maintain record of building costs.
	12.06 Develop and maintain technical reference library.
	12.07 Identify basic project management systems.
	12.08 Use project management and scheduling software.
13.0	Demonstrate appropriate communication skillsThe student will be able to:

	13.01 Write logical and understandable statements, or phrases, to accurately fill out forms/invoices commonly used in business and industry.
	13.02 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.
	13.03 Read and follow written and oral instructions.
	13.04 Answer and ask questions coherently and concisely.
	13.05 Read critically by recognizing assumptions and implications and by evaluating ideas.
	13.06 Demonstrate appropriate communication skills including speaking, telephone, email, social networking, etc.
14.0	Demonstrate appropriate math skillsThe student will be able to:
	14.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	14.02 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	14.03 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	14.04 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	14.05 Demonstrate an understanding of federal, state and local taxes and their computation.
15.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:
	15.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.
	15.02 Draw conclusions or make inferences from data.
	15.03 Identify health related problems which may result from exposure to work related chemicals and hazardous materials and know the proper precautions required for handling such materials.
	15.04 Understand pressure measurement in terms of PSI, inches of mercury and KPA.
16.0	Demonstrate employability skillsThe student will be able to:
	16.01 Conduct a job search.
	16.02 Secure information about a job.
	16.03 Identify documents which may be required when applying for a job interview.
	16.04 Write a resume, cover letter and fill out a typical job application form.
	16.05 Demonstrate competence in job interview techniques.

	16.06 Identify or demonstrate appropriate responses to criticism from employer, supervisor or other employees.
	16.07 Identify acceptable work habits.
	16.08 Demonstrate knowledge of how to make job changes appropriately.
	16.09 Demonstrate acceptable employee health habits.
17.0	Demonstrate an understanding of entrepreneurshipThe student will be able to:
	17.01 Define entrepreneurship.
	17.02 Describe the importance of entrepreneurship to the American economy.
	17.03 List the advantages and disadvantages of business ownership.
	17.04 Identify the risks involved in ownership of a business.
	17.05 Identify the necessary personal characteristics of a successful entrepreneur.
	17.06 Identify the business skills needed to operate a small business efficiently and effectively.
18.0	Explain sustainability issues related to the design, construction and maintenance of the built environmentThe student will be able to:
	18.01 Describe the impact of the construction industry on the natural environment.
	18.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	18.03 Identify and analyze sustainable alternatives to conventional construction practices.
	18.04 Identify specific practices that can lessen adverse impacts on the environment.
	18.05 Describe the building assessment tools such as Leadership in Energy and Environmental Design (LEED) and Green Globes.
	18.06 Identify design features, construction activities and maintenance practices that contribute to a project's overall sustainability.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Certificate Programs

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AAS degree program includes the following College Credit Certificates:

Sustainable Design (0630330106) – 19 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

Additional Resources

For additional information regarding articulation agreements, Bright Futures Scholarships, Fine Arts/Practical Arts Credit and Equivalent Mathematics and Equally Rigorous Science Courses please refer to: http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Florida Department of Education Curriculum Framework

Program Title: Building Construction Technology (60)

Career Cluster: Architecture and Construction

	AS
CIP Number	1615100102
Program Type	College Credit
Standard Length	60 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	11-9021 - Construction Managers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as a construction manager, or to provide supplemental training for persons previously or currently employed in these occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, construction practices, building codes, blueprint reading, personnel and resource management skills, safety, site selection and planning and building residential and commercial structures. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Communicate effectively.
- 02.0 Identify issues to look for in order to supervise application of construction materials.
- 03.0 Draw, read and interpret drawings and specifications.
- 04.0 Apply laws, codes, regulations and contract documents.
- 05.0 Survey and investigate construction sites.
- 06.0 Select and maintain construction site tools and equipment.
- 07.0 Interpret basic designs and apply sound construction principles.
- 08.0 Take off quantities and estimate costs.
- 09.0 Plan, coordinate, schedule and control projects.
- 10.0 Perform tests and inspections.
- 11.0 Select, train and supervise personnel.
- 12.0 Demonstrate efficient office and administrative procedures.
- 13.0 Demonstrate appropriate math skills.
- 14.0 Demonstrate appropriate understanding of basic science.
- 15.0 Demonstrate employability skills.
- 16.0 Demonstrate an understanding of entrepreneurship.
- 17.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.

Program Title: Building Construction Technology (60) CIP Number: 1615100102

CIP Number: 1615100102 Program Length: 60 Credit Hours

SOC Code(s): 11-9021

	The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:		
01.0	Communicate effectivelyThe student will be able to:		
	01.01 Understand Federal and State laws applicable to the construction industry.		
	01.02 Prepare business correspondence.		
	01.03 Set-up surveyors field book.		
	01.04 Prepare daily project report.		
	01.05 Prepare requisitions for equipment and materials.		
	01.06 Prepare minutes from job-site meetings.		
	01.07 Write logical and understandable statements or phrases to accurately fill out forms/invoices commonly used in business and industry.		
	01.08 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.		
	01.09 Read and follow written and oral instructions.		
	01.10 Answer and ask questions coherently and concisely.		
	01.11 Read critically by recognizing assumptions and implications and by evaluating ideas.		
	01.12 Demonstrate appropriate telephone and verbal communication skills.		
	01.13 Demonstrate appropriate email writing skills and etiquette.		
	01.14 Demonstrate proper communication.		
	01.15 Prepare and deliver a presentation on project status/updates.		

02.0	Identify issues to look for in order to supervise application of construction materialsThe student will be able to:
	02.01 Identify appropriate grade of materials.
	02.02 Identify mechanical components and equipment.
03.0	Draw, read and interpret drawings and specificationsThe student will be able to:
	03.01 Identify, select and use drafting instruments.
	03.02 Use technical lettering.
	03.03 Identify architectural symbols.
	03.04 Use drafting reproduction equipment.
	03.05 Take site notes and measurements.
	03.06 Identify electrical symbols.
	03.07 Prepare site sketches.
	03.08 Identify mechanical symbols.
	03.09 Identify topographical symbols.
	03.10 Interpret land surveyor's notes.
	03.11 Read and understand topographic drawings.
	03.12 Prepare working sketches and "as built" drawings.
	03.13 Interpret architectural drawings and specifications.
	03.14 Evaluate finishing hardware schedules.
	03.15 Interpret structural drawings and specifications.
	03.16 Interpret reinforcing steel drawings and bar list.
	03.17 Interpret and apply ASTM standards.
	03.18 Interpret and apply CSA standards.
	03.19 Evaluate shop drawings prior to review by architect or engineer of record.

	03.20 Interpret mechanical drawings and specifications.
	03.21 Interpret electrical drawings and specifications.
04.0	Apply laws, codes, regulations and contract documents-The student will be able to:
	04.01 Apply federal and state safety codes.
	04.02 Interpret pre-qualification documents.
	04.03 Interpret, apply and control addenda.
	04.04 Interpret bonding insurance procedures.
	04.05 Interpret, apply and control change orders.
	04.06 Apply state and local building code.
	04.07 Interpret and apply worker's compensation requirements.
	04.08 Interpret and apply standard form of tender.
	04.09 Compile a complete set of contract documents.
	04.10 Interpret Construction Lien Act.
05.0	Survey and investigate construction sitesThe student will be able to:
	05.01 Lay out and measure site.
	05.02 Use surveying rods.
	05.03 Make measurements utilizing surveying rods and levels.
	05.04 Make measurement using transit.
	05.05 Survey construction sites.
	05.06 Evaluate site and existing services for services required.
	05.07 Survey and lay out building lines and levels.
	05.08 Use digital and electronic survey equipment.
	05.09 Identify types of sub surface investigations.

	05.10 Conduct soil test.
	05.11 Interpret soil reports.
06.0	Select and maintain construction site tools and equipment—The student will be able to:
	06.01 Select fire equipment.
	06.02 Select and maintain safety equipment.
	06.03 Select cleaning equipment.
	06.04 Select miscellaneous small tools.
	06.05 Select and maintain shop and power tools.
	06.06 Select surveying equipment.
	06.07 Select concrete finishing equipment.
	06.08 Select plaster and mortar mixing equipment.
	06.09 Select and maintain temporary site offices, storage and restroom facilities.
	06.10 Select temporary building enclosures.
	06.11 Select concrete placing equipment.
	06.12 Prepare equipment service schedules.
	06.13 Evaluate type and size of earth moving equipment needed for the project.
	06.14 Select and maintain construction site communication equipment.
	06.15 Select concrete batching and mixing equipment.
	06.16 Select compaction equipment.
	06.17 Identify pile driving and earth boring equipment.
	06.18 Select and maintain temporary power and lighting equipment.
	06.19 Select and maintain temporary water services.
	06.20 Select demolition equipment.

-	
	06.21 Confirm proper safety and protection.
	06.22 Select balance of power and plant equipment.
07.0	Interpret basic designs and apply construction principlesThe student will be able to:
	07.01 Plan and coordinate excavation and foundation work.
	07.02 Coordinate and supervise concrete and formwork.
	07.03 Coordinate and supervise staging, scaffolding and falsework.
	07.04 Coordinate and supervise the erection of walls with the rough opening sizes for windows and doors.
	07.05 Coordinate and supervise masonry work.
	07.06 Coordinate and supervise miscellaneous roofing and sheet metal.
	07.07 Coordinate and supervise miscellaneous metal.
	07.08 Coordinate and supervise structural steel work.
	07.09 Coordinate and supervise mechanical work.
	07.10 Coordinate and supervise elevator installation.
	07.11 Coordinate and supervise electrical installation.
	07.12 Coordinate and supervise lath and plaster and dry wall.
	07.13 Coordinate and supervise painting and finishes.
	07.14 Coordinate and supervise tile and terrazzo.
	07.15 Coordinate and supervise the installation of flooring.
	07.16 Coordinate and supervise the installation of carpentry and millwork.
08.0	Take off quantities and estimate costsThe student will be able to:
	08.01 Make calculations.
	08.02 Estimate quantities of concrete.
	08.03 Compile lists of sub-trades for project.

08.04	Take off quantities of paving.
08.05	Estimate quantities of rough carpentry.
08.06	Obtain and build up material costs.
08.07	Interpret contract document.
08.08	Estimate quantities of framework.
08.09	Estimate quantities of excavation and fill.
08.10	Estimate quantities of landscaping.
08.11	Contact sub trade tenders.
08.12	Take off quantities of miscellaneous metals.
08.13	Take off quantities of millwork.
08.14	Take off quantities of structural steel.
08.15	Take off quantities of manufactured specialties.
08.16	Analyze and project plant and equipment costs.
08.17	Analyze and project general condition costs.
08.18	Analyze and project labor unit costs.
08.19	Estimate quantities of reinforcing steel.
08.20	Estimate quantities of masonry.
08.21	Analyze and project site overhead costs.
08.22	Evaluate sub trade bids.
08.23	Summarize project cost and complete tenders prices.
08.24	Estimate floor covering in square yards, square feet, square inches, etc.
08.25	Estimate products and quantities for painting.
08.26	Determine testing requirements based on architectural and engineering plans and specifications.

09.0	Plan, coordinate, schedule and control projectsThe student will be able to:
	09.01 Prepare daily time sheets.
	09.02 Record and control materials received.
	09.03 Allocate efficient use of site space.
	09.04 Maintain a clean and orderly construction site.
	09.05 Store materials and equipment.
	09.06 Coordinate and control use of construction tools and equipment.
	09.07 Prepare progress billing.
	09.08 Store chemicals and paints.
	09.09 Prepare work schedules.
	09.10 Prepare material delivery schedules.
	09.11 Expedite delivery of manufactured materials.
	09.12 Analyze productivity.
	09.13 Record deficiencies as a result of project inspections.
	09.14 Prepare coded cost break downs.
	09.15 Take appropriate action to correct project deficiencies.
	09.16 Prepare cash flow schedules.
	09.17 Monitor schedule to control project.
	09.18 Prepare cost reports.
10.0	Perform tests and inspectionsThe student will be able to:
	10.01 Arrange for concrete impact hammer test.
	10.02 Arrange for concrete slump test.
	10.03 Arrange for concrete air content test.

10.04	Arrange for sieve and hydrometer analysis test.
10.05	Arrange for concrete unit weight test.
10.06	Arrange for unit weight of aggregate test.
10.07	Calculate fineness modules.
10.08	Arrange for lumber moisture content test.
10.09	Arrange for liquid and plastics limits tests.
10.10	Check concrete placing and consolidation procedures.
10.11	Arrange for moisture content test on soil.
10.12	Check form work.
10.13	Arrange for moisture density test.
10.14	Calculate percentage of compaction.
10.15	Arrange for density of material in place tests.
10.16	Sample, make, cure and test concrete compressive strength specimen.
10.17	Arrange for chemical analysis of water.
10.18	Check reinforcing steel and placing.
10.19	Inspect placing of fill and compaction procedures.
10.20	Arrange for compressive strength test on concrete blocks.
10.21	Arrange for roofing test.
10.22	Make mortar cubes and perform compressive strength test.
10.23	Arrange for soundness test.
10.24	Arrange for specific gravity tests.
10.25	Sample, make, cure and test flexural strength specimen.
10.26	Prepare Marshall Test specimens.

	10.27 Arrange for unconfined compression test.
	10.28 Arrange for density test of Marshall Test specimens.
	10.29 Calculate air voids and viscosity modifying admixtures (VMA) values.
	10.30 Calculate bitumen extraction test.
	10.31 Arrange for California Bearing Ratio (CBR) test.
	10.32 Arrange for California sand equivalent test.
	10.33 Arrange for Rice specific gravity tests.
	10.34 Arrange for Marshall Stability and Flow tests.
	10.35 Check asphalt mixing plant.
	10.36 Arrange for abrasion test.
	10.37 Arrange for permeability test.
	10.38 Arrange for triaxial compression test.
	10.39 Verify data from tests conducted by independent testing companies.
11.0	Select, train and supervise personnelThe student will be able to:
	11.01 Apply CPR and first aid.
	11.02 Instruct new employee on company safety regulations.
	11.03 Interpret basic company policies.
	11.04 Select and hire employees.
	11.05 Interview and evaluate prospective employees.
	11.06 Evaluate employee performance.
	11.07 Write job description.
	11.08 Evaluate employee grievance.
	11.09 Interpret labor contracts.

12.0	Demonstrate efficient office proceduresThe student will be able to:
	12.01 Organize work area.
	12.02 Select and use appropriate forms.
	12.03 Develop and maintain filing system.
	12.04 Maintain inventory of physical assets.
	12.05 Set up and maintain technical reference library.
	12.06 Maintain a system for field work authorizations.
	12.07 Maintain a system for back charges.
	12.08 Interpret basic company accounting procedures.
13.0	Demonstrate appropriate math skillsThe student will be able to:
	13.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	13.02 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	13.03 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	13.04 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	13.05 Demonstrate an understanding of federal, state and local taxes and their computation.
14.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:
	14.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.
	14.02 Draw conclusions or make inferences from data.
	14.03 Identify health related problems which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.
	14.04 Understand pressure measurement in terms of PSI.
15.0	Demonstrate employability skillsThe student will be able to:
	15.01 Conduct a job search.
	15.02 Secure information about a job.
	<u> </u>

	15.03 Identify documents which may be required when applying for a job interview.
	15.04 Complete a job application.
	15.05 Demonstrate competence in job interview techniques.
	15.06 Identify or demonstrate appropriate responses to criticism in the workplace.
	15.07 Identify acceptable work habits.
16.0	Demonstrate an understanding of entrepreneurshipThe student will be able to:
	16.01 Define entrepreneurship.
	16.02 Describe the importance of entrepreneurship to the American economy.
	16.03 List the advantages and disadvantages of business ownership.
	16.04 Identify the risks involved in ownership of a business.
	16.05 Explain various types of company structure, i.e.: limited liability corporation, corporation, sole proprietorship, etc.
	16.06 Identify the necessary personal characteristics of a successful entrepreneur.
	16.07 Identify the business skills needed to operate a small business efficiently and effectively.
17.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	17.01 Comply with all applicable Occupational Safety and Health Administration (OSHA) rules and regulations.
	17.02 Identify and locate the Material Safety Data Sheets (MSDS) and follow the procedures as necessary.
	17.03 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
	17.04 Identify and use safety equipment.
	17.05 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	17.06 Explain emergency procedures to follow in response to workplace accidents.
	17.07 Create a disaster and/or emergency response plan.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Certificate Programs

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS degree program includes the following College Credit Certificates:

Building Construction Specialist (0615100103) – 18 Credit Hours Green Building Construction Technology (0615100104) – 24 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

Additional Resources

For additional information regarding articulation agreements, Bright Futures Scholarships, Fine Arts/Practical Arts Credit and Equivalent Mathematics and Equally Rigorous Science Courses please refer to:

Florida Department of Education Curriculum Framework

Program Title: Building Construction Technology (60)

Career Cluster: Architecture and Construction

	AS
CIP Number	1615100102
Program Type	College Credit
Standard Length	60 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	11-9021 - Construction Managers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as a construction manager, or to provide supplemental training for persons previously or currently employed in these occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, construction practices, building codes, blueprint reading, personnel and resource management skills, safety, site selection and planning and building residential and commercial structures. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Communicate effectively.
- 02.0 Identify issues to look for in order to supervise application of construction materials.
- 03.0 Draw, read and interpret drawings and specifications.
- 04.0 Apply laws, codes, regulations and contract documents.
- 05.0 Survey and investigate construction sites.
- 06.0 Select and maintain construction site tools and equipment.
- 07.0 Interpret basic designs and apply sound construction principles.
- 08.0 Take off quantities and estimate costs.
- 09.0 Plan, coordinate, schedule and control projects.
- 10.0 Perform tests and inspections.
- 11.0 Select, train and supervise personnel.
- 12.0 Demonstrate efficient office and administrative procedures.
- 13.0 Demonstrate appropriate math skills.
- 14.0 Demonstrate appropriate understanding of basic science.
- 15.0 Demonstrate employability skills.
- 16.0 Demonstrate an understanding of entrepreneurship.
- 17.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.

Program Title: Building Construction Technology (60) CIP Number: 1615100102

CIP Number: 1615100102 Program Length: 60 Credit Hours

SOC Code(s): 11-9021

	The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:		
01.0	Communicate effectivelyThe student will be able to:		
	01.01 Understand Federal and State laws applicable to the construction industry.		
	01.02 Prepare business correspondence.		
	01.03 Set-up surveyors field book.		
	01.04 Prepare daily project report.		
	01.05 Prepare requisitions for equipment and materials.		
	01.06 Prepare minutes from job-site meetings.		
	01.07 Write logical and understandable statements or phrases to accurately fill out forms/invoices commonly used in business and industry.		
	01.08 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.		
	01.09 Read and follow written and oral instructions.		
	01.10 Answer and ask questions coherently and concisely.		
	01.11 Read critically by recognizing assumptions and implications and by evaluating ideas.		
	01.12 Demonstrate appropriate telephone and verbal communication skills.		
	01.13 Demonstrate appropriate email writing skills and etiquette.		
	01.14 Demonstrate proper communication.		
	01.15 Prepare and deliver a presentation on project status/updates.		

02.0	Identify issues to look for in order to supervise application of construction materialsThe student will be able to:	
	02.01 Identify appropriate grade of materials.	
	02.02 Identify mechanical components and equipment.	
03.0	O3.0 Draw, read and interpret drawings and specificationsThe student will be able to:	
	03.01 Identify, select and use drafting instruments.	
	03.02 Use technical lettering.	
	03.03 Identify architectural symbols.	
	03.04 Use drafting reproduction equipment.	
	03.05 Take site notes and measurements.	
	03.06 Identify electrical symbols.	
	03.07 Prepare site sketches.	
	03.08 Identify mechanical symbols.	
	03.09 Identify topographical symbols.	
	03.10 Interpret land surveyor's notes.	
	03.11 Read and understand topographic drawings.	
	03.12 Prepare working sketches and "as built" drawings.	
	03.13 Interpret architectural drawings and specifications.	
	03.14 Evaluate finishing hardware schedules.	
	03.15 Interpret structural drawings and specifications.	
	03.16 Interpret reinforcing steel drawings and bar list.	
	03.17 Interpret and apply ASTM standards.	
	03.18 Interpret and apply CSA standards.	
	03.19 Evaluate shop drawings prior to review by architect or engineer of record.	

	03.20 Interpret mechanical drawings and specifications.	
	03.21 Interpret electrical drawings and specifications.	
04.0	4.0 Apply laws, codes, regulations and contract documents-The student will be able to:	
	04.01 Apply federal and state safety codes.	
	04.02 Interpret pre-qualification documents.	
	04.03 Interpret, apply and control addenda.	
	04.04 Interpret bonding insurance procedures.	
	04.05 Interpret, apply and control change orders.	
	04.06 Apply state and local building code.	
	04.07 Interpret and apply worker's compensation requirements.	
	04.08 Interpret and apply standard form of tender.	
	04.09 Compile a complete set of contract documents.	
	04.10 Interpret Construction Lien Act.	
05.0	Survey and investigate construction sitesThe student will be able to:	
	05.01 Lay out and measure site.	
	05.02 Use surveying rods.	
	05.03 Make measurements utilizing surveying rods and levels.	
	05.04 Make measurement using transit.	
	05.05 Survey construction sites.	
	05.06 Evaluate site and existing services for services required.	
	05.07 Survey and lay out building lines and levels.	
	05.08 Use digital and electronic survey equipment.	
	05.09 Identify types of sub surface investigations.	

	05.10 Conduct soil test.	
	05.11 Interpret soil reports.	
06.0	06.0 Select and maintain construction site tools and equipment—The student will be able to:	
	06.01 Select fire equipment.	
	06.02 Select and maintain safety equipment.	
	06.03 Select cleaning equipment.	
	06.04 Select miscellaneous small tools.	
	06.05 Select and maintain shop and power tools.	
	06.06 Select surveying equipment.	
	06.07 Select concrete finishing equipment.	
	06.08 Select plaster and mortar mixing equipment.	
	06.09 Select and maintain temporary site offices, storage and restroom facilities.	
	06.10 Select temporary building enclosures.	
	06.11 Select concrete placing equipment.	
06.12 Prepare equipment service schedules.		
	06.13 Evaluate type and size of earth moving equipment needed for the project.	
	06.14 Select and maintain construction site communication equipment.	
	06.15 Select concrete batching and mixing equipment.	
	06.16 Select compaction equipment.	
	06.17 Identify pile driving and earth boring equipment.	
	06.18 Select and maintain temporary power and lighting equipment.	
	06.19 Select and maintain temporary water services.	
	06.20 Select demolition equipment.	

-		
	06.21 Confirm proper safety and protection.	
	06.22 Select balance of power and plant equipment.	
07.0	7.0 Interpret basic designs and apply construction principlesThe student will be able to:	
	07.01 Plan and coordinate excavation and foundation work.	
	07.02 Coordinate and supervise concrete and formwork.	
	07.03 Coordinate and supervise staging, scaffolding and falsework.	
	07.04 Coordinate and supervise the erection of walls with the rough opening sizes for windows and doors.	
	07.05 Coordinate and supervise masonry work.	
	07.06 Coordinate and supervise miscellaneous roofing and sheet metal.	
	07.07 Coordinate and supervise miscellaneous metal.	
	07.08 Coordinate and supervise structural steel work.	
	07.09 Coordinate and supervise mechanical work.	
	07.10 Coordinate and supervise elevator installation.	
	07.11 Coordinate and supervise electrical installation.	
	07.12 Coordinate and supervise lath and plaster and dry wall.	
	07.13 Coordinate and supervise painting and finishes.	
	07.14 Coordinate and supervise tile and terrazzo.	
	07.15 Coordinate and supervise the installation of flooring.	
	07.16 Coordinate and supervise the installation of carpentry and millwork.	
08.0	Take off quantities and estimate costsThe student will be able to:	
	08.01 Make calculations.	
	08.02 Estimate quantities of concrete.	
	08.03 Compile lists of sub-trades for project.	

08.04	Take off quantities of paving.
08.05	Estimate quantities of rough carpentry.
08.06	Obtain and build up material costs.
08.07	Interpret contract document.
08.08	Estimate quantities of framework.
08.09	Estimate quantities of excavation and fill.
08.10	Estimate quantities of landscaping.
08.11	Contact sub trade tenders.
08.12	Take off quantities of miscellaneous metals.
08.13	Take off quantities of millwork.
08.14	Take off quantities of structural steel.
08.15	Take off quantities of manufactured specialties.
08.16	Analyze and project plant and equipment costs.
08.17	Analyze and project general condition costs.
08.18	Analyze and project labor unit costs.
08.19	Estimate quantities of reinforcing steel.
08.20	Estimate quantities of masonry.
08.21	Analyze and project site overhead costs.
08.22	Evaluate sub trade bids.
08.23	Summarize project cost and complete tenders prices.
08.24	Estimate floor covering in square yards, square feet, square inches, etc.
08.25	Estimate products and quantities for painting.
08.26	Determine testing requirements based on architectural and engineering plans and specifications.
	·

09.0	Plan, coordinate, schedule and control projectsThe student will be able to:	
	09.01 Prepare daily time sheets.	
	09.02 Record and control materials received.	
	09.03 Allocate efficient use of site space.	
	09.04 Maintain a clean and orderly construction site.	
	09.05 Store materials and equipment.	
	09.06 Coordinate and control use of construction tools and equipment.	
	09.07 Prepare progress billing.	
	09.08 Store chemicals and paints.	
	09.09 Prepare work schedules.	
	09.10 Prepare material delivery schedules.	
	09.11 Expedite delivery of manufactured materials.	
	09.12 Analyze productivity.	
	09.13 Record deficiencies as a result of project inspections.	
	09.14 Prepare coded cost break downs.	
	09.15 Take appropriate action to correct project deficiencies.	
	09.16 Prepare cash flow schedules.	
	09.17 Monitor schedule to control project.	
	09.18 Prepare cost reports.	
10.0	Perform tests and inspectionsThe student will be able to:	
	10.01 Arrange for concrete impact hammer test.	
	10.02 Arrange for concrete slump test.	
	10.03 Arrange for concrete air content test.	

10.04	Arrange for sieve and hydrometer analysis test.
10.05	Arrange for concrete unit weight test.
10.06	Arrange for unit weight of aggregate test.
10.07	Calculate fineness modules.
10.08	Arrange for lumber moisture content test.
10.09	Arrange for liquid and plastics limits tests.
10.10	Check concrete placing and consolidation procedures.
10.11	Arrange for moisture content test on soil.
10.12	Check form work.
10.13	Arrange for moisture density test.
10.14	Calculate percentage of compaction.
10.15	Arrange for density of material in place tests.
10.16	Sample, make, cure and test concrete compressive strength specimen.
10.17	Arrange for chemical analysis of water.
10.18	Check reinforcing steel and placing.
10.19	Inspect placing of fill and compaction procedures.
10.20	Arrange for compressive strength test on concrete blocks.
10.21	Arrange for roofing test.
10.22	Make mortar cubes and perform compressive strength test.
10.23	Arrange for soundness test.
10.24	Arrange for specific gravity tests.
10.25	Sample, make, cure and test flexural strength specimen.
10.26	Prepare Marshall Test specimens.

	10.27 Arrange for unconfined compression test.	
	10.28 Arrange for density test of Marshall Test specimens.	
	10.29 Calculate air voids and viscosity modifying admixtures (VMA) values.	
10.30 Calculate bitumen extraction test.		
10.31 Arrange for California Bearing Ratio (CBR) test.		
10.32 Arrange for California sand equivalent test.		
	10.33 Arrange for Rice specific gravity tests.	
	10.34 Arrange for Marshall Stability and Flow tests.	
	10.35 Check asphalt mixing plant.	
	10.36 Arrange for abrasion test.	
	10.37 Arrange for permeability test.	
	10.38 Arrange for triaxial compression test.	
	10.39 Verify data from tests conducted by independent testing companies.	
11.0	Select, train and supervise personnelThe student will be able to:	
	11.01 Apply CPR and first aid.	
	11.02 Instruct new employee on company safety regulations.	
	11.03 Interpret basic company policies.	
	11.04 Select and hire employees.	
	11.05 Interview and evaluate prospective employees.	
	11.06 Evaluate employee performance.	
	11.07 Write job description.	
	11.08 Evaluate employee grievance.	
	11.09 Interpret labor contracts.	

12.0	Demonstrate efficient office proceduresThe student will be able to:		
	12.01 Organize work area.		
	12.02 Select and use appropriate forms.		
	12.03 Develop and maintain filing system.		
	12.04 Maintain inventory of physical assets.		
	12.05 Set up and maintain technical reference library.		
	12.06 Maintain a system for field work authorizations.		
	12.07 Maintain a system for back charges.		
	12.08 Interpret basic company accounting procedures.		
13.0	Demonstrate appropriate math skillsThe student will be able to:		
	13.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.		
	13.02 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.		
	13.03 Add, subtract, multiply and divide using fractions, decimals and whole numbers.		
	13.04 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.		
	13.05 Demonstrate an understanding of federal, state and local taxes and their computation.		
14.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:		
	14.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	14.02 Draw conclusions or make inferences from data.		
	14.03 Identify health related problems which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.		
	14.04 Understand pressure measurement in terms of PSI.		
15.0	Demonstrate employability skillsThe student will be able to:		
	15.01 Conduct a job search.		
	15.02 Secure information about a job.		
	<u> </u>		

	15.03 Identify documents which may be required when applying for a job interview.		
	15.04 Complete a job application.		
	15.05 Demonstrate competence in job interview techniques.		
	15.06 Identify or demonstrate appropriate responses to criticism in the workplace.		
	15.07 Identify acceptable work habits.		
16.0	.0 Demonstrate an understanding of entrepreneurshipThe student will be able to:		
	16.01 Define entrepreneurship.		
	16.02 Describe the importance of entrepreneurship to the American economy.		
	16.03 List the advantages and disadvantages of business ownership.		
	16.04 Identify the risks involved in ownership of a business.		
16.05 Explain various types of company structure, i.e.: limited liability corporation, corporation, sole proprietorship, etc.			
	16.06 Identify the necessary personal characteristics of a successful entrepreneur.		
	16.07 Identify the business skills needed to operate a small business efficiently and effectively.		
17.0	7.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:		
	17.01 Comply with all applicable Occupational Safety and Health Administration (OSHA) rules and regulations.		
	17.02 Identify and locate the Material Safety Data Sheets (MSDS) and follow the procedures as necessary.		
	17.03 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)		
	17.04 Identify and use safety equipment.		
	17.05 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	17.06 Explain emergency procedures to follow in response to workplace accidents.		
	17.07 Create a disaster and/or emergency response plan.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Certificate Programs

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS degree program includes the following College Credit Certificates:

Building Construction Specialist (0615100103) – 18 Credit Hours Green Building Construction Technology (0615100104) – 24 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

Florida Department of Education Curriculum Framework

Program Title: Drafting and Design Technology Career Cluster: Architecture and Construction

	AS
CIP Number	1615130102
Program Type	College Credit
Standard Length	62 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3011 – Architectural and Civil Drafters, 17-3013 – Mechanical Drafters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for employment as drafters or chief design drafters for employment and/or career advancement in the design, construction and manufacturing industries.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to, communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, drafting standards, math skills, and drafting office practices to assist mathematical, electrical and electronic, architectural, chemical, civil, or other engineers in the design and drafting of electrical circuits, machines, structures, weldments, or architectural plans. It also includes instruction in the preparation of engineering plans, layouts, and detailed drawings according to conventional projection principles, preparation of charts, graphs or diagrams, and the use of handbook data germane to design and drafting in various fields.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 62 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply basic drafting skills.
- 02.0 Prepare mechanical drawings.
- 03.0 Prepare electrical/electronic drawings.
- 04.0 Prepare civil drafting drawings.
- 05.0 Prepare advanced civil drafting drawings.
- 06.0 Demonstrate understanding of geographic information system (GIS).
- 07.0 Prepare pneumatic/hydraulic drawings (optional).
- 08.0 Apply technical mathematics.
- 09.0 Prepare architectural drawings.
- 10.0 Prepare computer-aided drawings.
- 11.0 Demonstrate appropriate communication skills.
- 12.0 Demonstrate appropriate understanding of basic science.
- 13.0 Demonstrate employability skills.
- 14.0 Demonstrate an understanding of entrepreneurship (optional).
- 15.0 Convert computer aided drafting (CAD) drawings to web format (optional).

CIP Number: 1615130102 Program Length: 62 Credit Hours

SOC Code(s): 17-3011

	The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:	
01.0	Apply basic drafting skills—The	
	01.01 Apply safety practices.	
	01.02 Operate drafting instruments.	
	01.03 Perform lettering techniques.	
	01.04 Prepare multi-view drawings.	
	01.05 Prepare advanced civil drawings.	
	01.06 Prepare sectional views.	
	01.07 Prepare auxiliary views.	
	01.08 Prepare dimension drawings.	
	01.09 Prepare pictorial drawings.	
	01.10 Prepare sketches.	
	01.11 Prepare title blocks and other formats.	
	01.12 Compile a portfolio.	
	01.13 Read and understand fire sprinkler system blueprints (optional).	
	01.14 Demonstrate an understanding of basic fire sprinkler design (optional).	
02.0	Prepare mechanical drawings The student should be able to:	
	02.01 Prepare fastener drawings.	

	02.02 Prepare cam drawings (optional).
	02.03 Prepare gear drawings (optional).
	02.04 Prepare assembly drawings.
	02.05 Prepare detail drawings.
	02.06 Prepare surface developments.
	02.07 Prepare technical drawings.
	02.08 Prepare welding drawings.
	02.09 Prepare bearing drawings (optional).
	02.10 Prepare spring drawings.
	02.11 Prepare casting drawings.
	02.12 Prepare forging drawings (optional).
	02.13 Prepare tool drawings (optional).
	02.14 Prepare molding diagrams (optional).
	02.15 Prepare stamping drawings (optional).
	02.16 Prepare numerical-control drawings (optional).
	02.17 Prepare computer-aided drawings.
	02.18 Modify drawings to include material specifications and parts list.
	02.19 Identify geometric tolerances and dimensioning of specific machined surfaces.
03.0	Prepare electrical/electronic drawings The student should be able to:
	03.01 Prepare schematic drawings.
	03.02 Prepare printed circuit board assembly drawing packages.
	03.03 Prepare connection drawings.
	03.04 Prepare interconnection drawings.

	03.05 Prepare wiring drawings.
	03.06 Prepare cable drawings and/ or harness drawings.
	03.07 Prepare component drawings.
	03.08 Prepare logic diagrams.
04.0	Prepare civil drawings The student should be able to:
	04.01 Demonstrate an understanding of civil drafting.
	04.02 Demonstrate knowledge of surveying fundamentals.
	04.03 Demonstrate an understanding of mapping scales.
	04.04 Demonstrate knowledge of legal descriptions and plot plans.
	04.05 Demonstrate an understanding of contour lines.
	04.06 Demonstrate knowledge of profiles.
	04.07 Demonstrate knowledge of highway layouts.
	04.08 Demonstrate an understanding of earth work.
05.0	Prepare advanced civil drafting drawings The student should be able to:
	05.01 Demonstrate an understanding of curve data.
	05.02 Demonstrate an understanding of parcels.
	05.03 Demonstrate an understanding of surfaces.
	05.04 Demonstrate an understanding of basic structural drawings and detailing conventions.
	05.05 Demonstrate an understanding of basic fastening systems used with common materials and manufacturing (metals and wood).
06.0	Demonstrate understanding of geographic information system (GIS) The student should be able to:
	06.01 Demonstrate a basic knowledge of GIS.
	06.02 Demonstrate an understanding of global positioning systems (GPS).
	06.03 Demonstrate an understanding of remote sensing.

Prepare pneumatic/hydraulic drawings (optional) The student should be able to:
07.01 Prepare piping drawings.
07.02 Prepare pump and motor drawings.
07.03 Prepare cylinder and piston diagrams.
07.04 Prepare valve drawings.
07.05 Prepare pump section drawings.
07.06 Prepare pulley and chain-drive drawings.
07.07 Understand the requirements of spacing, location and position of sprinkler heads (optional).
07.08 Design a fire sprinkler system in high-rise building (optional).
07.09 Design a fire sprinkler system for water tanks, aircraft hangers and standpipe systems (optional).
07.10 Design a fire sprinkler system for a high-pile storage area and a rack storage area (optional).
07.11 Design a fire sprinkler system for a fire pump and identify its use (optional).
Apply technical mathematics The student should be able to:
08.01 Solve arithmetic problems.
08.02 Solve algebra problems.
08.03 Solve trigonometry problems.
08.04 Solve geometry problems.
08.05 Solve surveying problems.
08.06 Read and understand hydraulic calculations as applied to fire sprinkler systems (optional).
08.07 Learn the basic principles of hydraulics (optional).
08.08 Calculate the required gallons per minute (GPM) required for fire sprinkler systems (optional).
08.09 Incorporate hydraulic calculations into the design of a sprinkler system (optional).
08.10 Understand different pipe size and connection points (optional).

09.0	Prepare architectural drawings The student should be able to:
	09.01 Prepare floor plan drawings.
_	09.02 Prepare foundation plan and detail drawings.
	09.03 Prepare elevation drawings.
	09.04 Prepare landscape layouts (optional).
_	09.05 Prepare schedules.
	09.06 Prepare sections.
_	09.07 Build architectural models (optional).
_	09.08 Prepare truss drawings (optional).
	09.09 Prepare stairway drawings (optional).
_	09.10 Prepare fireplace drawings (optional).
	09.11 Prepare plot plan drawings.
	09.12 Prepare plumbing plan drawings (optional).
	09.13 Prepare climate-control drawings (optional).
	09.14 Prepare electrical plan drawings (optional).
	09.15 Prepare perspective and isometric drawings (optional).
10.0	Prepare computer-aided drawings The student should be able to:
	10.01 Use system commands.
	10.02 Perform drafting procedures.
	10.03 Operate peripheral equipment.
	10.05 Apply specialized CAD functions.
	10.06 Apply computer aided drafting (CAD) drawing standards as established and updated by the industry.
	10.07 Construct geometric figures of lines, splines, circles, and arcs.

	10.08 Create and edit text using appropriate style and size to annotate drawings.
	10.09 Use and control accuracy-enhancement tools for entity-positioning methods, such as snap and XYZ.
	10.10 Identify, create, store, and use standard part symbols and libraries.
	10.11 Use editing commands.
	10.12 Control entity properties by layer, color, and line type.
	10.13 Use viewing commands to perform zooming and panning.
	10.14 Plot drawings on media using layout and scale.
	10.15 Minimize file size.
	10.16 Use query commands to interrogate database for entity characteristics, distance, area, and status.
	10.17 Apply standard dimensioning rules.
	10.18 Export computer aided drafting (CAD) drawings to Web format.
	10.19 Demonstrate an understanding of point sources in 3-D.
11.0	Demonstrate appropriate communication skills The student should be able to:
	11.01 Write logical and understandable statements or phrases to accurately fill out forms/invoices commonly used in business and industry.
	11.02 Read and understand graphs, charts, diagrams, and tables commonly used in this industry/occupation area.
	11.03 Read and follow written and oral instructions.
	11.04 Answer and ask questions coherently and concisely.
	11.05 Read critically by recognizing assumptions and implications and by evaluating ideas.
	11.06 Demonstrate appropriate telephone/communication skills.
12.0	Demonstrate appropriate understanding of basic science The student should be able to:
	12.01 Understand molecular action as a result of temperature extremes, chemical reaction, and moisture content.
	12.02 Draw conclusions or make inferences from data.
	12.03 Identify health-related problems, which may result from exposure to work-related chemicals and hazardous materials, and know the proper precautions required for handling such materials.

	12.04 Understand pressure measurement in terms of PSI, inches of mercury, and KPA (optional).	
13.0	.0 Demonstrate employability skills The student should be able to:	
	13.01 Conduct a job search.	
	13.02 Secure information about a job.	
	13.03 Identify documents that may be required when applying for a job interview.	
	13.04 Complete a job application form correctly.	
	13.05 Demonstrate competence in job interview techniques.	
	13.06 Identify or demonstrate appropriate responses to criticism from employer, supervisor, or other employees.	
	13.07 Identify acceptable work habits.	
	13.08 Demonstrate knowledge of how to make job changes appropriately.	
	13.09 Demonstrate acceptable employee health habits.	
	13.10 Prepare a work portfolio and resume.	
14.0	Demonstrate an understanding of entrepreneurship (optional) The student should be able to:	
	14.01 Define entrepreneurship.	
	14.02 Describe the importance of entrepreneurship to the American economy.	
	14.03 List the advantages and disadvantages of business ownership.	
	14.04 Identify the risks involved in ownership of a business.	
	14.05 Identify the necessary personal characteristics of a successful entrepreneur.	
	14.06 Identify the business skills needed to operate a small business	
	14.07 Efficiently in a professional manner.	
15.0	Convert computer aided drafting (CAD) drawings to web format (optional) The student should be able to:	
	15.01 Export computer aided drafting (CAD) drawings to digital imaging software.	
	15.02 Demonstrate an understanding of image retouching of portraits by producing digital images to incorporate those features.	

15.03	Demonstrate knowledge of photo-masked type by producing digital images to incorporate those features.
15.04	Illustrate web page design procedures.
15.05	Explain web page building procedures.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Certificate Programs

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS degree program includes the following College Credit Certificates:

AutoCAD Foundations (0615130204) – 14 Credit Hours Drafting Design (0615130101) -- 22 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

Florida Department of Education Curriculum Framework

Program Title: Construction Management Technology (60)

Career Cluster: Architecture and Construction

	AS
CIP Number	1646041201
Program Type	College Credit
Standard Length	60 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	11-9021 – Construction Managers 13-1051 – Cost Estimators
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as Construction Project Manager/Engineer, Estimator, Superintendent, Scheduler, Expeditor, or Purchasing Agent

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations, employability skills, safe and efficient work practices, project planning and design, using construction materials, dealing with contracts and specifications.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate effective communication, both orally and in writing.
- 02.0 Interpret drawings and documents.
- 03.0 Demonstrate knowledge of materials and methods of construction.
- 04.0 Recognize basic safety hazards on a construction site and standard prevention measures.
- 05.0 Interpret and apply basic principles of Architectural Engineering and Design.
- 06.0 Interpret and apply codes, regulations and technical literature.
- 07.0 Survey and assess construction sites.
- 08.0 Estimate basic quantities and costs for the bidding process in a construction project.
- 09.0 Perform office and administrative procedures.
- 10.0 Discuss basic principles of ethics in the construction industry.
- 11.0 Demonstrate appropriate math skills.
- 12.0 Demonstrate appropriate understanding of basic science.
- 13.0 Demonstrate employability skills.
- 14.0 Demonstrate an understanding of entrepreneurship.
- 15.0 Schedule and coordinate work sequence.
- 16.0 Learn to effectively manage a workforce.
- 17.0 Learn to manage subcontract and material supplier contracts.
- 18.0 Learn to effectively "buy out" a project as required.
- 19.0 Demonstrate the ability to use current technology related to the construction process.

Florida Department of Education Student Performance Standards

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be

Program Title: Construction Management Technology (60)

transf	ferable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:
01.0	Demonstrate effective communication, both orally and in writing The student will be able to:
	01.01 Create written communications appropriate to the construction discipline.
	01.02 Identify communication channels in organizations.
	01.03 Develop and use effective means of communication.
	01.04 Develop an effective working relationship with others.
	01.05 Prepare business correspondence, memos and reports.
	01.06 Compose clear and concise oral and written technical reports and presentations.
	01.07 Participate in technical discussions and meetings.
	01.08 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.
	01.09 Read critically by recognizing assumptions and implications and by evaluating ideas.
	01.10 Edit effectively all assignments, including informal media (such as email messages).
	01.11 Employ appropriate discussion, negotiation, conflict resolution and cooperation skills to work with people from a variety of experiences and backgrounds to promote learning in class activities and group work.
02.0	Interpret drawings and documents The student will be able to:
	02.01 Interpret technical symbols.
	02.02 Interpret topographical drawings.
	02.03 Interpret aerial photographs and maps.
02.0	01.09 Read critically by recognizing assumptions and implications and by evaluating ideas. 01.10 Edit effectively all assignments, including informal media (such as email messages). 01.11 Employ appropriate discussion, negotiation, conflict resolution and cooperation skills to work with people from a variety of experiences and backgrounds to promote learning in class activities and group work. Interpret drawings and documents The student will be able to: 02.01 Interpret technical symbols. 02.02 Interpret topographical drawings.

02.04 Interpret site drawings. 02.05 Interpret architectural, structural, mechanical and electrical drawings. 02.06 Interpret specifications, relating specifications to the construction drawings. 02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.06 Interpret specifications, relating specifications to the construction drawings. 02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.16 Use construction drawings in support of the construction professional's needs, such as the preparation of schedules, estimates, constructability, safety, risk, etc.
03.0 Demonstrate knowledge of materials and methods of constructionThe student will be able to:
03.01 Understand the materials and methods of construction identified with the Construction Specification Institute 16 division format: Bidding Documents; General Conditions; Site Work; Concrete; Masonry; Metals; Wood; Thermal and Moisture; Doors and Hardware Finishes; Specialties; Equipment; Furnishings; Special Construction; Conveying System; Mechanical; and Electrical.
03.02 Examine construction techniques associated with wood, steel, masonry and reinforced concrete framing systems, roof systems, and interior and exterior finishes.
03.03 Examine the properties, mechanical tests and quality control tests of common construction materials and their behaviors under different environments, short- or long-term.
03.04 Appraise appropriateness and sustainability of materials for construction projects.
03.05 Appraise appropriateness of construction equipment for hoisting materials, erecting structures and earth moving.
03.06 Understand the basic principles of soil mechanics including soil classification, soil compaction, soil testing and reading soil borehole logs.
03.07 Develop a construction logistics plan (parking and access routes, storage areas, project limit fencing, etc.).
03.08 Relate the sequence of construction activities and importance of safety and constructability issues.

	03.09 Extract and interpret information from building codes and standards.
04.0	Recognize basic safety hazards on a construction site and standard prevention measures The student will be able to:
	04.01 Evaluate a construction project to assure a safe working environment
	04.02 Locate appropriate Code of Federal Regulations (CFR) references for various construction hazards.
	04.03 Visually recognize compliance and non-compliance issues and situations.
	04.04 Produce summaries that reflect current accident causes and discuss violations, preventive measures and ethical issues.
	04.05 Give presentations related to construction safety hazards and jobsite toolbox meetings.
	04.06 Identify health related problems which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.
05.0	Interpret and apply basic principles of Architectural Engineering and DesignThe student will be able to:
	05.01 Conduct and interpret concrete slump test.
	05.02 Take test cylinder and interpret results.
	05.03 Interpret soil analysis reports.
	05.04 Interpret compaction test reports.
	05.05 Interpret theory of loads.
	05.06 Determine effect of loads on materials.
	05.07 Interpret principles of expansion and contraction and control.
	05.08 Interpret and apply fundamentals of site requirements.
	05.09 Determine and apply space relationships.
	05.10 Demonstrate basic understanding of force systems.
	05.11 Demonstrate basic understanding of energy systems.
	05.12 Identify basic structural load paths in buildings and other structures to include vertical and lateral load paths.
	05.13 Recognize basic structural loads and stresses in existing buildings.
	05.14 Describe the basic elements of mechanical, plumbing and heating, ventilation and air conditioning (HVAC) systems.

	05.15 Recognize purpose of these basic elements in relation to the system.
	05.16 Identify the positioning of such elements relative to each other and to the overall system.
06.0	Interpret and apply codes, regulations and technical literatureThe student will be able to:
	06.01 Interpret and apply graphic and time saver standards.
	06.02 Interpret and apply national building codes.
	06.03 Interpret and apply municipal codes and regulations.
	06.04 Interpret zoning bylaws and regulations.
	06.05 Interpret zoning maps.
	06.06 Interpret trade magazines and catalogs.
	06.07 Interpret trade manuals.
	06.08 Interpret and apply construction association regulations.
07.0	Survey and assess construction sitesThe student will be able to:
	07.01 Select and apply measuring tapes and chains.
	07.02 Prepare site sketches.
	07.03 Apply methods of site measuring.
	07.04 Interpret survey books and logs.
	07.05 Identify and apply basic principles of levels and rods.
	07.06 Interpret angular and distance measurements to bearings and azimuth.
	07.07 Outline basics of site meetings and inspection.
	07.08 Apply basic surveying techniques for construction activities
	07.09 Use the transit and level to establish and control horizontal and vertical placement of elements.
	07.10 Recognize use of modern surveying equipment in construction industry (Total Station, GPS, etc.).
08.0	Estimate basic quantities and costs for the bidding process in a construction project The student will be able to:

	08.01 Compute area and volume of buildings.
08.02 Estimate quantities of excavation and fill.	
	08.03 Take off quantities of form work.
08.04 Take of quantities of concrete.	
08.05 Take off quantities of lumber.	
08.06 Take off quantities of masonry.	
08.07 Interpret and complete standard estimator forms.	
	08.08 Recognize different types of estimates and their uses.
	08.09 Perform quantity takeoffs based on the contract documents and generate detailed estimates.
	08.10 Determine labor and equipment costs considering productivity factors.
	08.11 Prepare and use construction cost databases.
	08.12 Prepare the scope of subcontractor work, solicit quotations and bids for procurement of products and services, develop the evaluation criteria and select a source.
	08.13 Prepare a formal bid package.
	08.14 Use the state-of-the-art information technology-to assist in the preparation of the estimate.
09.0 Perform office and administrative procedures The student will be able to:	
	09.01 Maintain record of building costs.
	09.02 Develop and maintain technical reference library.
	09.03 Identify basic project management systems.
	09.04 Understand the project engineer's function on the jobsite with respect to construction documentation and review of submittals and shop drawings.
	09.05 Schedule and purchase materials and equipment.
	09.06 Maintain RFI and submittal logs.
10.0	Discuss basic principles of ethics in the construction industry The student will be able to:
	10.01 Identify ethical issues in construction.

	10.02 Demonstrate an understanding of professional and ethical responsibilities.		
	10.03 Apply ethical principles appropriate to the professional to make informed and principled choices.		
11.0	Demonstrate appropriate math skills The student will be able to:		
	11.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.		
	11.02 Measure tolerance (s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.		
	11.03 Demonstrate application of applied mathematics (geometry, basic trigonometry, or statistics) to a variety of applied technical problems.		
	11.04 Demonstrate application of basic principles of accounting as needed on construction projects and in the construction industry.		
12.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:		
	12.01 Demonstrate basic understanding of the scientific method		
	12.02 Demonstrate basic understanding of instrumentation and measurement.		
	12.03 Demonstrate basic understanding in at least one science area to include environmental, earth, physical or chemical sciences.		
13.0	Demonstrate employability skillsThe student will be able to:		
	13.01 Conduct a thorough job search.		
	13.02 Identify documents which may be required when applying for a job interview.		
	13.03 Create an effective resume.		
	13.04 Demonstrate competence in job interview techniques.		
	13.05 Identify or demonstrate appropriate responses to criticism from employer, supervisor or other employees.		
	13.06 Identify acceptable work habits.		
	13.07 Demonstrate knowledge of how to make job changes appropriately.		
14.0	Demonstrate an understanding of entrepreneurshipThe student will be able to:		
	14.01 Define entrepreneurship.		
	14.02 List the advantages and disadvantages of business ownership.		
	14.03 Identify the risks involved in ownership of a business		
L			

	14.04 Identify the business skills needed to operate a small business efficiently and effectively.		
	14.05 Demonstrate application of basic management principles (e.g., principles of management, business management, industrial management, organizational behavior).		
	14.06 Demonstrate application of economics (macro or micro).		
14.07 Demonstrate application of industrial relations (e.g., personnel management, labor relations, supervision and prod			
	14.08 Demonstrate application of basic principles of business law.		
15.0	Schedule and coordinate work sequenceThe student will be able to:		
	15.01 Identify the work activities associated with a construction schedule.		
	15.02 Identify the critical time required for each activity of work.		
	15.03 Identify the logical sequence required to perform the work.		
	15.04 Incorporate estimated activity cost into the proposed CPM schedule.		
	15.05 Assign and analyze resource requirements of a project.		
	15.06 Prepare oral presentations of construction schedules.		
	15.07 Prepare various construction scheduling reports.		
	15.08 Apply state-of-the-art information technology for project planning, design, scheduling, monitoring and controlling.		
16.0	Learn to effectively manage a workforceThe student will be able to:		
	16.01 Interpret construction documents to determine the required staffing to perform the work.		
	16.02 Identify the equipment required for a specific workforce.		
	16.03 Understand and guide the workforce in proper and safe methods of construction.		
	16.04 Effectively track and document time associated with each task so that actual costs can be assigned against budgeted costs to determine profit or loss.		
17.0	Learn to manage subcontract and material supplier contractsThe student will be able to:		
	17.01 Identify the different types of contracts that might be involved on a particular project (AIA General Contract, Subcontracts, Material Purchase Order, Field Purchase Order, etc.)		
	17.02 Interpret construction documents and identify scope of work within the contract format.		
	17.03 Interpret construction documents and identify contract cost within the contract format.		

	17.04 Interpret construction documents and identify contract schedule within contract format.		
18.0	18.0 Learn to effectively "buy out" a project as requiredThe student will be able to:		
	18.01 Interpret drawings and identify the different categories of work specified within the CSI specification format.		
	18.02 Identify the specific areas of work and contract the scope of work accordingly.		
	18.03 Effectively package the scope of work within a contract format.		
	18.04 Identify the cost of each scope of work and compare to budget.		
19.0 Demonstrate the ability to use current technology related to the construction processThe student will be able to:			
	19.01 Demonstrate a functional (operating) understanding of basic office computer applications.		
	19.02 Demonstrate a functional (operating) understanding of construction-specific applications of scheduling, estimating and project control typically used in construction industry.		
	19.03 Demonstrate a basic understanding of Building Information Modeling (BIM) as it pertains to design/build and construction management.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Program Length

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The standard length of this program is 60 credit hours according to Rule 6A-14.030, F.A.C.

Additional Resources

For additional information regarding articulation agreements, Bright Futures Scholarships, Fine Arts/Practical Arts Credit and Equivalent Mathematics and Equally Rigorous Science Courses please refer to:

Florida Department of Education Curriculum Framework

Program Title: Construction Management Technology (60)

Career Cluster: Architecture and Construction

	AS
CIP Number	1646041201
Program Type	College Credit
Standard Length	60 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	11-9021 – Construction Managers 13-1051 – Cost Estimators
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment as Construction Project Manager/Engineer, Estimator, Superintendent, Scheduler, Expeditor, or Purchasing Agent

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations, employability skills, safe and efficient work practices, project planning and design, using construction materials, dealing with contracts and specifications.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate effective communication, both orally and in writing.
- 02.0 Interpret drawings and documents.
- 03.0 Demonstrate knowledge of materials and methods of construction.
- 04.0 Recognize basic safety hazards on a construction site and standard prevention measures.
- 05.0 Interpret and apply basic principles of Architectural Engineering and Design.
- 06.0 Interpret and apply codes, regulations and technical literature.
- 07.0 Survey and assess construction sites.
- 08.0 Estimate basic quantities and costs for the bidding process in a construction project.
- 09.0 Perform office and administrative procedures.
- 10.0 Discuss basic principles of ethics in the construction industry.
- 11.0 Demonstrate appropriate math skills.
- 12.0 Demonstrate appropriate understanding of basic science.
- 13.0 Demonstrate employability skills.
- 14.0 Demonstrate an understanding of entrepreneurship.
- 15.0 Schedule and coordinate work sequence.
- 16.0 Learn to effectively manage a workforce.
- 17.0 Learn to manage subcontract and material supplier contracts.
- 18.0 Learn to effectively "buy out" a project as required.
- 19.0 Demonstrate the ability to use current technology related to the construction process.

Florida Department of Education Student Performance Standards

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be

Program Title: Construction Management Technology (60)

CIP Numbers: 1646041201 Program Length: 60 Credit Hours SOC Code(s): 11-9021, 13-1051

erable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:		
Demonstrate effective communication, both orally and in writing The student will be able to:		
01.01 Create written communications appropriate to the construction discipline.		
01.02 Identify communication channels in organizations.		
01.03 Develop and use effective means of communication.		
01.04 Develop an effective working relationship with others.		
01.05 Prepare business correspondence, memos and reports.		
01.06 Compose clear and concise oral and written technical reports and presentations.		
01.07 Participate in technical discussions and meetings.		
01.08 Read and understand graphs, charts, diagrams and tables commonly used in this industry/occupation area.		
01.09 Read critically by recognizing assumptions and implications and by evaluating ideas.		
01.10 Edit effectively all assignments, including informal media (such as email messages).		
01.11 Employ appropriate discussion, negotiation, conflict resolution and cooperation skills to work with people from a variety of experiences and backgrounds to promote learning in class activities and group work.		
Interpret drawings and documents The student will be able to:		
02.01 Interpret technical symbols.		
02.02 Interpret topographical drawings.		
02.03 Interpret aerial photographs and maps.		

02.04 Interpret site drawings. 02.05 Interpret architectural, structural, mechanical and electrical drawings. 02.06 Interpret specifications, relating specifications to the construction drawings. 02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.06 Interpret specifications, relating specifications to the construction drawings. 02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.07 Interpret addendums. 02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.08 Interpret notice of change and change orders. 02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.09 Interpret shop drawings. 02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.10 Interpret modular approach to buildings. 02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.11 Identify and interpret contracts. 02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.12 Identify and interpret liens. 02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.13 Interpret deeds. 02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.14 Interpret master and development plans and documents. 02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.15 Recognize the industry graphic standards as needed by the construction profession such as detailing and note placement.
02.16 Use construction drawings in support of the construction professional's needs, such as the preparation of schedules, estimates, constructability, safety, risk, etc.
03.0 Demonstrate knowledge of materials and methods of constructionThe student will be able to:
03.01 Understand the materials and methods of construction identified with the Construction Specification Institute 16 division format: Bidding Documents; General Conditions; Site Work; Concrete; Masonry; Metals; Wood; Thermal and Moisture; Doors and Hardware Finishes; Specialties; Equipment; Furnishings; Special Construction; Conveying System; Mechanical; and Electrical.
03.02 Examine construction techniques associated with wood, steel, masonry and reinforced concrete framing systems, roof systems, and interior and exterior finishes.
03.03 Examine the properties, mechanical tests and quality control tests of common construction materials and their behaviors under different environments, short- or long-term.
03.04 Appraise appropriateness and sustainability of materials for construction projects.
03.05 Appraise appropriateness of construction equipment for hoisting materials, erecting structures and earth moving.
03.06 Understand the basic principles of soil mechanics including soil classification, soil compaction, soil testing and reading soil borehole logs.
03.07 Develop a construction logistics plan (parking and access routes, storage areas, project limit fencing, etc.).
03.08 Relate the sequence of construction activities and importance of safety and constructability issues.

	03.09 Extract and interpret information from building codes and standards.
04.0	Recognize basic safety hazards on a construction site and standard prevention measures The student will be able to:
	04.01 Evaluate a construction project to assure a safe working environment
	04.02 Locate appropriate Code of Federal Regulations (CFR) references for various construction hazards.
	04.03 Visually recognize compliance and non-compliance issues and situations.
	04.04 Produce summaries that reflect current accident causes and discuss violations, preventive measures and ethical issues.
	04.05 Give presentations related to construction safety hazards and jobsite toolbox meetings.
	04.06 Identify health related problems which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.
05.0	Interpret and apply basic principles of Architectural Engineering and DesignThe student will be able to:
	05.01 Conduct and interpret concrete slump test.
	05.02 Take test cylinder and interpret results.
	05.03 Interpret soil analysis reports.
	05.04 Interpret compaction test reports.
	05.05 Interpret theory of loads.
	05.06 Determine effect of loads on materials.
	05.07 Interpret principles of expansion and contraction and control.
	05.08 Interpret and apply fundamentals of site requirements.
	05.09 Determine and apply space relationships.
	05.10 Demonstrate basic understanding of force systems.
	05.11 Demonstrate basic understanding of energy systems.
	05.12 Identify basic structural load paths in buildings and other structures to include vertical and lateral load paths.
	05.13 Recognize basic structural loads and stresses in existing buildings.
	05.14 Describe the basic elements of mechanical, plumbing and heating, ventilation and air conditioning (HVAC) systems.

	05.15 Recognize purpose of these basic elements in relation to the system.
	05.16 Identify the positioning of such elements relative to each other and to the overall system.
06.0	Interpret and apply codes, regulations and technical literatureThe student will be able to:
	06.01 Interpret and apply graphic and time saver standards.
	06.02 Interpret and apply national building codes.
	06.03 Interpret and apply municipal codes and regulations.
	06.04 Interpret zoning bylaws and regulations.
	06.05 Interpret zoning maps.
	06.06 Interpret trade magazines and catalogs.
	06.07 Interpret trade manuals.
	06.08 Interpret and apply construction association regulations.
07.0	Survey and assess construction sitesThe student will be able to:
	07.01 Select and apply measuring tapes and chains.
	07.02 Prepare site sketches.
	07.03 Apply methods of site measuring.
	07.04 Interpret survey books and logs.
	07.05 Identify and apply basic principles of levels and rods.
	07.06 Interpret angular and distance measurements to bearings and azimuth.
	07.07 Outline basics of site meetings and inspection.
	07.08 Apply basic surveying techniques for construction activities
	07.09 Use the transit and level to establish and control horizontal and vertical placement of elements.
	07.10 Recognize use of modern surveying equipment in construction industry (Total Station, GPS, etc.).
08.0	Estimate basic quantities and costs for the bidding process in a construction project The student will be able to:

	08.01 Compute area and volume of buildings.
	08.02 Estimate quantities of excavation and fill.
	08.03 Take off quantities of form work.
	08.04 Take of quantities of concrete.
	08.05 Take off quantities of lumber.
	08.06 Take off quantities of masonry.
	08.07 Interpret and complete standard estimator forms.
	08.08 Recognize different types of estimates and their uses.
	08.09 Perform quantity takeoffs based on the contract documents and generate detailed estimates.
	08.10 Determine labor and equipment costs considering productivity factors.
	08.11 Prepare and use construction cost databases.
	08.12 Prepare the scope of subcontractor work, solicit quotations and bids for procurement of products and services, develop the evaluation criteria and select a source.
	08.13 Prepare a formal bid package.
	08.14 Use the state-of-the-art information technology-to assist in the preparation of the estimate.
09.0	Perform office and administrative procedures The student will be able to:
	09.01 Maintain record of building costs.
	09.02 Develop and maintain technical reference library.
	09.03 Identify basic project management systems.
	09.04 Understand the project engineer's function on the jobsite with respect to construction documentation and review of submittals and shop drawings.
	09.05 Schedule and purchase materials and equipment.
	09.06 Maintain RFI and submittal logs.
10.0	Discuss basic principles of ethics in the construction industry The student will be able to:
	10.01 Identify ethical issues in construction.

	10.02 Demonstrate an understanding of professional and ethical responsibilities.
	10.03 Apply ethical principles appropriate to the professional to make informed and principled choices.
11.0	Demonstrate appropriate math skills The student will be able to:
	11.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	11.02 Measure tolerance (s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	11.03 Demonstrate application of applied mathematics (geometry, basic trigonometry, or statistics) to a variety of applied technical problems.
	11.04 Demonstrate application of basic principles of accounting as needed on construction projects and in the construction industry.
12.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:
	12.01 Demonstrate basic understanding of the scientific method
	12.02 Demonstrate basic understanding of instrumentation and measurement.
	12.03 Demonstrate basic understanding in at least one science area to include environmental, earth, physical or chemical sciences.
13.0	Demonstrate employability skillsThe student will be able to:
	13.01 Conduct a thorough job search.
	13.02 Identify documents which may be required when applying for a job interview.
	13.03 Create an effective resume.
	13.04 Demonstrate competence in job interview techniques.
	13.05 Identify or demonstrate appropriate responses to criticism from employer, supervisor or other employees.
	13.06 Identify acceptable work habits.
	13.07 Demonstrate knowledge of how to make job changes appropriately.
14.0	Demonstrate an understanding of entrepreneurshipThe student will be able to:
	14.01 Define entrepreneurship.
	14.02 List the advantages and disadvantages of business ownership.
	14.03 Identify the risks involved in ownership of a business

	14.04 Identify the business skills needed to operate a small business efficiently and effectively.
	14.05 Demonstrate application of basic management principles (e.g., principles of management, business management, industrial management, organizational behavior).
	14.06 Demonstrate application of economics (macro or micro).
	14.07 Demonstrate application of industrial relations (e.g., personnel management, labor relations, supervision and productivity).
	14.08 Demonstrate application of basic principles of business law.
15.0	Schedule and coordinate work sequenceThe student will be able to:
	15.01 Identify the work activities associated with a construction schedule.
	15.02 Identify the critical time required for each activity of work.
	15.03 Identify the logical sequence required to perform the work.
	15.04 Incorporate estimated activity cost into the proposed CPM schedule.
	15.05 Assign and analyze resource requirements of a project.
	15.06 Prepare oral presentations of construction schedules.
	15.07 Prepare various construction scheduling reports.
	15.08 Apply state-of-the-art information technology for project planning, design, scheduling, monitoring and controlling.
16.0	Learn to effectively manage a workforceThe student will be able to:
	16.01 Interpret construction documents to determine the required staffing to perform the work.
	16.02 Identify the equipment required for a specific workforce.
	16.03 Understand and guide the workforce in proper and safe methods of construction.
	16.04 Effectively track and document time associated with each task so that actual costs can be assigned against budgeted costs to determine profit or loss.
17.0	Learn to manage subcontract and material supplier contractsThe student will be able to:
	17.01 Identify the different types of contracts that might be involved on a particular project (AIA General Contract, Subcontracts, Material Purchase Order, Field Purchase Order, etc.)
	17.02 Interpret construction documents and identify scope of work within the contract format.
	17.03 Interpret construction documents and identify contract cost within the contract format.

	17.04 Interpret construction documents and identify contract schedule within contract format.
18.0	Learn to effectively "buy out" a project as requiredThe student will be able to:
	18.01 Interpret drawings and identify the different categories of work specified within the CSI specification format.
	18.02 Identify the specific areas of work and contract the scope of work accordingly.
	18.03 Effectively package the scope of work within a contract format.
	18.04 Identify the cost of each scope of work and compare to budget.
19.0	Demonstrate the ability to use current technology related to the construction process The student will be able to:
	19.01 Demonstrate a functional (operating) understanding of basic office computer applications.
	19.02 Demonstrate a functional (operating) understanding of construction-specific applications of scheduling, estimating and project control typically used in construction industry.
	19.03 Demonstrate a basic understanding of Building Information Modeling (BIM) as it pertains to design/build and construction management.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Program Length

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The standard length of this program is 60 credit hours according to Rule 6A-14.030, F.A.C.

	AS
CIP Number	1715020101
Program Type	College Credit
Standard Length	63 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3022 - Civil Engineering Technicians
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for employment as surveyors, civil engineering technicians, or surveyor helpers or to provide supplemental training for persons previously or currently employed in these occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to surveying, highway design, soils and foundations, photogrammetry, asphalt design, drainage and geology, concrete design, orientation to utilities, structural design, estimating, drafting, legal and ethical considerations, employability skills, leadership and human relations skills, health and safety, and supportive general education. Computer use is essential. Technical report writing, record keeping and mathematical computations are important aspects of this occupation. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of 63 credit hours.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Solve general, technical and engineering type problems.
- 02.0 Use the computer aided drafting (CAD).
- 03.0 Use instruments to construct engineering, mechanical and geometrical type drawings.
- 04.0 Sketch, letter and generate line-work to describe various objects.
- 05.0 Read and produce drawings involving orthographic projection, sections, pictorial and auxiliary views.
- 06.0 Solve typical engineering strength of materials problems using a standard scientific calculator.
- 07.0 Recognize the use of the various materials in the construction industry.
- 08.0 Utilize standard surveying equipment to make measurements and calculations to run a traverse, establish levels, keep notes and produce required drawings.
- 09.0 Recognize the use of the various materials of selected industries.
- 10.0 Produce drawings using computer aided drafting (CAD) software.
- 11.0 Solve engineering graphics problems using standard techniques and reference materials.
- 12.0 Analyze physical and mechanical properties of soil and concrete.
- 13.0 Solve basic hydraulic problems using the theory of incompressible fluids.
- 14.0 Solve problems using theories learned in engineering mechanics.
- 15.0 Establish grades, locate property lines and utilities; and produce plots and calculate cut and fill by average-end-area.
- 16.0 Demonstrate employability skills.

Program Title: CIP Number: Program Length: SOC Code(s): **63 Credit Hours**

17-3022

	S degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be ferable according to Rule 6A-14.030 (2), F.A.C. At the completion of this program, the student will be able to:
01.0	Solve general, technical and engineering type problemsThe student will be able to:
	01.01 Given two pieces of data concerning a right triangle, compute the missing sides and/or angles.
	01.02 Given necessary data concerning polygons, compute the area.
	01.03 Given three pieces of data concerning an oblique triangle, compute the missing sides and angles.
	01.04 Given necessary data concerning an oblique triangle, compute the area.
	01.05 Given a line graph and one piece of data (ordinate or abscissa), solve for missing ordinate or abscissa data.
	01.06 Read and interpret engineering related graphs.
02.0	Use the computer aided drafting (CAD)The student will be able to:
	02.01 Use COGO programs to plot surveying/engineering problems.
	02.02 Use coordinate data generated from data collectors and computers to plot topographic maps, plats, roadway alignments, parking lots, subdivisions and other appropriate civil engineering projects.
	02.03 Using a desktop computer and surveying/engineering software, solve engineering and surveying type problems, such as plats and direction traverses with corrections.
03.0	Use instruments to construct engineering, mechanical and geometrical type drawingsThe student will be able to:
	03.01 Use curve sets and templates to draw plans and profiles.
	03.02 Demonstrate correct use of appropriate drafting instruments in given situations.
04.0	Sketch, letter and generate line-work to describe various objectsThe student will be able to:
	04.01 Prepare sketches and descriptions of real property.

	04.02 Use topographic map symbols including line-work to enhance topographic maps.
	04.03 Use proper line symbols and notes from road design standards to prepare plans and profiles.
05.0	Read and produce drawings involving orthographic projection, sections, pictorial and auxiliary viewsThe student will be able to:
	05.01 Produce orthographic projections.
	05.02 Produce typical road cross section drawings.
	05.03 Produce auxiliary view drawings of utility conflicts.
06.0	Solve typical engineering strength of materials problems using a standard scientific calculator The student will be able to:
	06.01 Calculate forces and stresses in various structural members as determined by the material(s) used.
	06.02 Calculate the stresses in bolts and rivets and determine the number needed in different types of connections.
	06.03 Determine the centroid location of different cross-sectional shapes.
	06.04 Calculate the moment of inertia, radius of gyration and the bending moments of beams.
	06.05 Draw a stress-strain diagram.
	06.06 Understand the appropriate engineering vocabulary and terminology.
	06.07 Have a basic knowledge of the strengths of various engineering materials used in the design of machines and structures.
	06.08 Understand the use of the universal testing machine.
07.0	Recognize the use of the various materials in the construction industryThe student will be able to:
	07.01 Understand placement and testing of storm sewer drainage pipe and gravity sewer pipe.
	07.02 Understand placement and test pressure pipe systems.
	07.03 Understand standard ASTM tests and compute results for the following: deformed steel bars, flat stock, standard 505, shear, compressive strength, air entrainment, and volume.
	07.04 Understand standard Rockwell hardness test.
08.0	Utilize standard surveying equipment to make measurements and calculations to run a traverse, establish levels, keep notes and produce required drawingsThe student will be able to:
	08.01 Use engineers tape.
	08.02 Use plumb bobs.

	08.03 Use lock hand level.
	08.04 Use total station (engineering data management (EDM) and data collector) equipment.
	08.05 Use automatic level.
	08.06 Use field book to keep field notes.
	08.07 Use a standard scientific calculator to solve surveying problems.
09.0	Recognize the use of the various materials of selected industriesThe student will be able to:
	09.01 Identify and explain the uses for the following pipe types: clay, polyvinyl chloride (PVC), cast iron, reinforced concrete pipe (RCP) and pre-stressed concrete cylinder.
	09.02 Identify reinforcing steel and give use.
	09.03 Identify concrete structures.
	09.04 Identify asphalt types and uses.
	09.05 Identify corrosion preventing coatings.
10.0	Produce drawings using computer aided drafting (CAD) softwareThe student will be able to:
	10.01 Draw large-scale civil drawings.
	10.02 Draw details.
11.0	Solve engineering graphics problems using standard techniques and reference materialsThe student will be able to:
	11.01 Reference appropriate resources including the following: Location Survey Manual, Florida Department of Transportation manuals, Public Works Manuals, and the manual of standard practice for detailing reinforced concrete structure (ACI 315-99).
	11.02 Use typical design standards.
	11.03 Use current software for the hydrology of small watersheds.
	11.04 Use county soil survey by soil conservation service –USDA assisted by GIS data.
	11.05 Prepare a topographic map of a subdivision with standard soil types.
	11.06 Using current software and the prepared soils type map, compute peak run off.
12.0	Analyze physical and mechanical properties of soil and concreteThe student will be able to:
	12.01 Understand the process and importance of running standard ASTM soil test and compute results for the following:

	a. gradation analysis
	b. Limits – liquid and plastic
	c. modified proctor
	d. moisture content-oven and/or speedy
	e. nuclear density
	2.02 Make a trial batch and run a standard ASTM concrete test and compute results for the following:
	a. Slump
	b. air entrainment
	c. compressive strength
13.0	Solve basic hydraulic problems using the theory of incompressible fluidsThe student will be able to:
	3.01 Compute peak discharge.
	3.02 Compute discharge due to developed condition of project.
	3.03 Compute quantity of water and wastewater flow and size pressure pipes.
	3.04 Size pipes for gravity flow of storm waters.
14.0	Solve problems using theories learned in engineering mechanicsThe student will be able to:
	4.01 Solve vector addition problems by the component method.
	4.02 Given two coordinates, calculate length of line and reference angle.
	4.03 Convert from polar to rectangular coordinates and its inverse.
	4.04 Compute resultant of concurrent force systems.
	4.05 Compute moments about a given point.
	4.06 Compute the resultant force from several given couples.
	4.07 Compute resultant of plane parallel force systems.
	4.08 Compute resultant of nonparallel non-concurrent force systems.
-	

	14.09 Replace a force by a force and a couple.
	14.10 Construct free body diagrams.
	14.11 Solve concurrent coplanar force systems (two equations and two unknowns).
	14.12 Solve coplanar nonparallel force systems.
	14.13 Analyze frame and truss problems.
15.0	Establish grades, locate property lines and utilities; and produce plots and calculate cut and fill by average-end-areaThe student will be able to:
	15.01 Calculate horizontal alignment for civil engineering structures.
	15.02 Calculate vertical alignment for civil engineering structures.
	15.03 Plot and draft maps, plats, plans and profiles, charts and graphs.
	15.04 Calculate cuts and fills using average-end-area method.
	15.05 Calculate borrow pit quantities.
16.0	Demonstrate employability skillsThe student will be able to:
	16.01 Conduct a job search.
	16.02 Secure information about a job.
	16.03 Identify documents that may be required when applying for a job.
	16.04 Complete a job application.
	16.05 Demonstrate competence in job interview techniques.
	16.06 Identify or demonstrate appropriate responses to criticism from employer, supervisor, or other persons.
	16.07 Identify acceptable work habits.
	16.08 Demonstrate knowledge of how to make job changes appropriately.
	16.09 Demonstrate acceptable employee health habits.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Florida Department of Education Curriculum Framework

Program Title: Architectural Drafting Secondary

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	Secondary – Career Preparatory				
Program Number	8101100				
CIP Number	0615130111				
Grade Level	9-12, 30, 31				
Standard Length	6 Credits				
Teacher Certification	BLDG CONSTR @7 7G DRAFTING @7 7G TEC DRAFT 7G TEC CONSTR @7 7G				
CTSO	SkillsUSA				
SOC Codes (all applicable)	17-3011 - Architectural and Civil Drafters				
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml				

Purpose

The purpose of this program is to prepare students for employment or advanced training in the architectural drafting industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to freehand sketching, drafting by hand and computer and 3D modeling specific to architectural drafting. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation
						Requirement
Α	8725010	Drafting 1	1 Credit	17-3011	3	PA
	8725020	Drafting 2	1 Credit		3	PA
В	8725030	Drafting 3	1 Credit		3	PA
	8725040	Drafting 4	1 Credit	17-3011	3	PA
C	8725450	Architectural Drafting 5	1 Credit		3	PA
	8725460	Architectural Drafting 6	1 Credit	17-3011	3	PA

Graduation Requirement Abbreviations- EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Drafting.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Drafting.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Drafting.
- 04.0 Apply basic drafting skills.
- 05.0 Design and prepare multi-view drawings.
- 06.0 Prepare sectional views.
- 07.0 Prepare auxiliary drawings.
- 08.0 Apply basic dimensioning.
- 09.0 Prepare pictorial drawings.
- 10.0 Prepare surface developments.
- 11.0 Design and prepare basic architectural drawings.
- 12.0 Perform basic computer aided drafting functions.
- 13.0 Demonstrate understanding of basic civil drawings.
- 14.0 Prepare computer aided drawings (CAD).
- 15.0 Research the history of the built environment.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Drafting.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Drafting.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Drafting.
- 19.0 Perform computer aided drafting functions.
- 20.0 Describe the importance of professional ethics and legal responsibilities in the design and construction industry.
- 21.0 Examine career opportunities in drafting and related fields to determine requisite skills, qualifications, supply and demand, market location and potential earnings.
- 22.0 Apply three-dimensional modeling concepts.
- 23.0 Explain three-dimensional modeling.
- 24.0 Investigate sustainability issues related to the design, construction and maintenance of the built environment.
- 25.0 Prepare computer aided three-dimensional architectural drawings.
- 26.0 Design and draft architectural multi-level residential drawings.
- 27.0 Prepare a basic plot plan drawing.
- 28.0 Design and draft a basic landscape plan drawing.
- 29.0 Prepare typical wall section.
- 30.0 Prepare a basic foundation plan drawing.
- 31.0 Prepare a basic electrical plan drawing.
- 32.0 Prepare a basic heating, ventilation and air-conditioning (HVAC) plan drawing.
- 33.0 Prepare a basic plumbing plan drawing.
- 34.0 Design and draft architectural drawings for a commercial building.

- Draft basic mechanical, electrical and plumbing (MEP) drawings. Prepare presentation drawings. 35.0 36.0

Florida Department of Education Student Performance Standards

Course Title: Drafting 2 Course Number: 8725020

Course Credit: 1

Course Description:

This course provides competencies in basic architectural and civil computer-aided drafting and design, as well as an overview of the history of the built environment.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student si	es for using Florida Standards for grades 09-10 reading in Technical uccess in Drafting.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question

Course Title: Drafting 3
Course Number: 8725030

Course Credit: 1

Course Description:

This course provides instruction in computer aided drafting skills, professional ethics and career and education planning.

Florid	la Standa	ards		Correlation to CTE Program Standard #
16.0			es for using Florida Standards for grades 11-12 reading in Technical uccess in Drafting.	
	16.01 l	Key Ideas and	Details	
		16.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		16.01.2	Determine the central ideas or conclusions of a text; trace the text's	
			explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		16.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	16.02	Craft and Struc	cture	
		16.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		16.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		16.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved. LAFS.1112.RST.2.6	

Floric	la Stanc	dards		Correlation to CTE Program Standard #
1 10110			Knowledge and Ideas	
	10.00	16.03.1	Integrate and evaluate multiple sources of information presented in	
		.0.0011	diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		16.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		16.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon,	
			or concept, resolving conflicting information when possible.	
			LAFS.1112.RST.3.9	
	16.04		ading and Level of Text Complexity	
		16.04.1	By the end of grade 11, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			11-CCR text complexity band proficiently, with scaffolding as needed at	
			the high end of the range.	
		16.04.2	By the end of grade 12, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 11–CCR text complexity band independently and	
			proficiently.	
1= 0			LAFS.1112.RST.4.10	
17.0			ies for using Florida Standards for grades 11-12 writing in Technical	
			success in Drafting.	
	17.01	Text Types a		
		17.01.1	Write arguments focused on discipline-specific content.	
		17.01.0	LAFS.1112.WHST.1.1	
		17.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
	17.00	Draduation	LAFS.1112.WHST.1.2	
	17.02		nd Distribution of Writing	
		17.02.1	Produce clear and coherent writing in which the development,	
			organization, and style are appropriate to task, purpose, and audience.	
		17.02.2	LAFS.1112.WHST.2.4	
		17.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
			rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.	
			LAFS.1112.WHST.2.5	
		17.02.3	Use technology, including the Internet, to produce, publish, and update	
		17.02.3	ose technology, including the internet, to produce, publish, and update	

Florid	la Stand	dards		Correlation to CTE Program Standard #
Horic	ia Starit	aaius	individual or shared writing products in response to ongoing feedback,	Correlation to CTE i Togram Standard #
			including new arguments or information.	
			LAFS.1112.WHST.2.6	
	17.03	Research to F	Build and Present Knowledge	
	17.03	17.03.1	Conduct short as well as more sustained research projects to answer a	
		17.03.1	question (including a self-generated question) or solve a problem; narrow	
			or broaden the inquiry when appropriate; synthesize multiple sources on	
			the subject, demonstrating understanding of the subject under	
			investigation.	
			LAFS.1112.WHST.3.7	
		17.03.2	Gather relevant information from multiple authoritative print and digital	
		17.100.2	sources, using advanced searches effectively; assess the strengths and	
			limitations of each source in terms of the specific task, purpose, and	
			audience; integrate information into the text selectively to maintain the	
			flow of ideas, avoiding plagiarism and overreliance on any one source	
			and following a standard format for citation.	
			LAFS.1112.WHST.3.8	
		17.03.3	Draw evidence from informational texts to support analysis, reflection,	
			and research.	
			LAFS.1112.WHST.3.9	
	17.04	Range of Writ	ing	
		17.04.1	Write routinely over extended time frames (time for reflection and	
			revision) and shorter time frames (a single sitting or a day or two) for a	
			range of discipline-specific tasks, purposes, and audiences.	
			LAFS.1112.WHST.4.10	
18.0			es for using Florida Standards for grades 11-12 Mathematical Practices in	
			r student success in Drafting.	
	18.01	Make sense o	f problems and persevere in solving them.	
		<u>_</u>	MAFS.K12.MP.1.1	
	18.02	Reason abstra	actly and quantitatively.	
	10.00		MAFS.K12.MP.2.1	
	18.03	Construct vial	ole arguments and critique the reasoning of others.	
	40.04	NA 1 1 141	MAFS.K12.MP.3.1

Course Title: Drafting 4
Course Number: 8725040

Course Credit: 1

Course Description:

This course is designed to provide instruction in three dimensional modeling and sustainability issues related to the design, construction and maintenance of the built environment.

orid	a Stanc			Correlation to CTE Program Standar
6.0	Metho	ds and strategi	es for using Florida Standards for grades 11-12 reading in Technical	
			success in Drafting.	
	16.01	Key Ideas and	d Details	
		16.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account.	
		40.04.0	LAFS.1112.RST.1.1	
		16.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		16.01.3		
		10.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	16.02	Craft and Stru	ucture	
		16.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		16.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		16.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved. LAFS.1112.RST.2.6	

16.03. Integration of Knowledge and Ideas 16.03.1 Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem. LAFS.1112.RST.3.7 16.03.2 Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information. LAFS.1112.RST.3.8 16.03.3 Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible. LAFS.1112.RST.3.9 16.04 Range of Reading and Level of Text Complexity 16.04.1 By the end of grade 11, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] in the grades 11—CCR text complexity band proficiently, with scaffolding as needed at the high end of the range. 16.04.2 By the end of grade 12, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end of the range. 16.04.2 By the end of grade 12, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end of the grades 11—CCR text complexity band independently and proficiently. 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Drafting. 17.01.1 Write arguments focused on discipline-specific content. LAFS.1112.RST.4.10 17.02.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. LAFS.1112.WHST.1.2 17.02.1 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. LAFS.1112.WHST.2.4 17.02.2 Develop and strengthen writing as needed by plannin	Floric	la Stanc	dards		Correlation to CTE Program Standard #

Course Title: Architectural Drafting 5

Course Number: 8725450

Course Credit: 1

Course Description:

This course focuses on three-dimensional architectural drawings and residential architectural drafting and design.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

Note: This course is pending alignment in the following categories: NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA NGSSS-Sci

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the structural drafting industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation
						Requirement
Α	8725010	Drafting 1	1 Credit	17-3011	3	PA
	8725020	Drafting 2	1 Credit		3	PA
	8725030	Drafting 3	1 Credit		3	PA
В	8725040	Drafting 4	1 Credit	17-3011	3	PA
	8725550	Structural Drafting 5	1 Credit		3	PA
С	8725560	Structural Drafting 6	1 Credit	17-3019	3	PA

Graduation Requirement Abbreviations- EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Drafting.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Drafting.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Drafting.
- 04.0 Apply basic drafting skills.
- 05.0 Design and prepare multi-view drawings.
- 06.0 Prepare sectional views.
- 07.0 Prepare auxiliary drawings.
- 08.0 Apply basic dimensioning.
- 09.0 Prepare pictorial drawings.
- 10.0 Prepare surface developments.
- 11.0 Design and prepare basic architectural drawings.
- 12.0 Perform basic computer aided drafting functions.
- 13.0 Prepare basic civil drawings.
- 14.0 Prepare computer aided drawings (CAD).
- 15.0 Research the history of the built environment.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Drafting.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Drafting.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Drafting.
- 19.0 Perform computer aided drafting functions.
- 20.0 Describe the importance of professional ethics and legal responsibilities in the design and construction industry.
- 21.0 Examine career opportunities in drafting and related fields to determine requisite skills, qualifications, supply and demand, market location and potential earnings
- 22.0 Apply three-dimensional modeling concepts.
- 23.0 Explain three-dimensional modeling.
- 24.0 Investigate sustainability issues related to the design, construction and maintenance of the built environment.
- 25.0 Investigate the surveying and mapping profession.
- 26.0 Conduct survey measurements.
- 27.0 Design and draft map drawings.
- 28.0 Design and draft computer aided map details.
- 29.0 Prepare surveying and mapping drawings.
- 30.0 Investigate the use of aerial photography in surveying and mapping.
- 31.0 Conduct surveying and mapping procedures.
- 32.0 Design and draft basic civil drawings.
- 33.0 Prepare presentation drawings.

Florida Department of Education Student Performance Standards

Course Title: Drafting 1 Course Number: 8725010

Course Credit: 1

Course Description:

This course provides instruction in basic drawing and drafting skills, applied mathematics, multi-view and sectional drawings.

Florida Department of Education Student Performance Standards

Course Title: Drafting 2 Course Number: 8725020

Course Credit: 1

Course Description:

This course provides competencies in basic architectural and civil computer-aided drafting and design, as well as an overview of the history of the built environment.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student si	es for using Florida Standards for grades 09-10 reading in Technical uccess in Drafting.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question	

Florida Standard	s		Correlation to CTE Program Standard #
Trorrad Starrad d		the author seeks to address.	ornolation to or a rogram otanidata "
		LAFS.910.RST.2.6	
01.03 Inte	egration of K	(nowledge and Ideas	
	03.1	Translate quantitative or technical information expressed in words in a	
		text into visual form (e.g., a table or chart) and translate information	
		expressed visually or mathematically (e.g., in an equation) into words.	
		LAFS.910.RST.3.7	
01.0	03.2	Assess the extent to which the reasoning and evidence in a text support	
		the author's claim or a recommendation for solving a scientific or	
		technical problem.	
		LAFS.910.RST.3.8	
01.0	03.3	Compare and contrast findings presented in a text to those from other	
		sources (including their own experiments), noting when the findings	
		support or contradict previous explanations or accounts. LAFS.910.RST.3.9	
01.04 Par	ngo of Poad	ling and Level of Text Complexity	
	04.1	By the end of grade 9, read and comprehend literature [informational	
01.0		texts, history/social studies texts, science/technical texts] in the grades	
		9–10 text complexity band proficiently, with scaffolding as needed at the	
		high end of the range.	
01.0	04.2	By the end of grade 10, read and comprehend literature [informational	
		texts, history/social studies texts, science/technical texts] at the high end	
		of the grades 9–10 text complexity band independently and proficiently.	
		LAFS.910.RST.4.10	
		s for using Florida Standards for grades 09-10 writing in Technical	
		uccess in Drafting.	
	kt Types and		
02.0	01.1	Write arguments focused on discipline-specific content.	
00.4	01.2	LAFS.910.WHST.1.1	
02.0	01.2	Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.	
		LAFS.910.WHST.1.2	
02.02 Pro	duction and	I Distribution of Writing	
		Produce clear and coherent writing in which the development,	
02.0		organization, and style are appropriate to task, purpose, and audience.	
		LAFS.910.WHST.2.4	
02.0	02.2	Develop and strengthen writing as needed by planning, revising, editing,	
		rewriting, or trying a new approach, focusing on addressing what is most	
		significant for a specific purpose and audience.	
		LAFS.910.WHST.2.5	

Florida	a Stanc	dards			Correlation to CTE Program Standard #
		02.02.3	Use technology, including the Internet, to produce,	oublish, and update	
			individual or shared writing products, taking advanta		
			capacity to link to other information and to display in	formation flexibly	
			and dynamically.		
	00.00	D 1 (D		LAFS.910.WHST.2.6

Florida Department of Education Student Performance Standards

Course Title: Drafting 3
Course Number: 8725030

Course Credit: 1

Course Description:

This course provides instruction in computer aided drafting skills, professional ethics and career and education planning.

Florid	a Standards		Correlation to CTE Program Standard #
16.0	Methods and str	ategies for using Florida Standards for grades 11-12 reading in Technical	
		dent success in Drafting.	
	16.01 Key Idea	s and Details	
	16.01.1	Cite specific textual evidence to support analysis of science and	
		technical texts, attending to important distinctions the author makes and	
		to any gaps or inconsistencies in the account.	
		LAFS.1112.RST.1.1	
	16.01.2	Determine the central ideas or conclusions of a text; trace the text's	
		explanation or depiction of a complex process, phenomenon, or	
		concept; provide an accurate summary of the text.	
	10.04.0	LAFS.1112.RST.1.2	
	16.01.3	Follow precisely a complex multistep procedure when carrying out	
		experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.	
		LAFS.1112.RST.1.3	
	16.02 Craft and	I Structure	
	16.02.1	Determine the meaning of symbols key terms, and other domain-specific	
		words and phrases as they are used in a specific scientific or technical	
		context relevant to grades 11-12 texts and topics.	
		LAFS.1112.RST.2.4	
	16.02.2	Analyze how the text structures information or ideas into categories or	
		hierarchies, demonstrating understanding of the information or ideas.	
		LAFS.1112.RST.2.5	
	16.02.3	Analyze the author's purpose in providing an explanation, describing a	
		procedure, or discussing an experiment in a text, identifying important	
		issues that remain unresolved.	
		LAFS.1112.RST.2.6	

Florid	da Stand	dards		Correlation to CTE Program Standard #
1 10/10			f Knowledge and Ideas	Correlation to OTE 1 regram Standard #
	10.00	16.03.1	Integrate and evaluate multiple sources of information presented in	
		1010011	diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		16.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		16.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon,	
			or concept, resolving conflicting information when possible.	
			LAFS.1112.RST.3.9	
	16.04		ading and Level of Text Complexity	
		16.04.1	By the end of grade 11, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			11-CCR text complexity band proficiently, with scaffolding as needed at	
			the high end of the range.	
		16.04.2	By the end of grade 12, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 11–CCR text complexity band independently and	
			proficiently.	
47.0	N.A. (1	1 1 1	LAFS.1112.RST.4.10	
17.0			gies for using Florida Standards for grades 11-12 writing in Technical	
			success in Drafting.	
	17.01	Text Types a		
		17.01.1	Write arguments focused on discipline-specific content. LAFS.1112.WHST.1.1	
		17.01.2		
		17.01.2	Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes.	
			LAFS.1112.WHST.1.2	
	17.02	Production a	nd Distribution of Writing	
	17.02	17.02.1	Produce clear and coherent writing in which the development,	
		17.02.1	organization, and style are appropriate to task, purpose, and audience.	
			LAFS.1112.WHST.2.4	
		17.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
			rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
			LAFS.1112.WHST.2.5	
		17.02.3	Use technology, including the Internet, to produce, publish, and update	

Florid	la Stand	dards		Correlation to CTE Program Standard #

Course Title: Drafting 4 Course Number: 8725040

Course Credit: 1

Course Description:

This course is designed to provide instruction in three dimensional modeling and sustainability issues related to the design, construction and maintenance of the built environment.

Florid	a Stand	dards		Correlation to CTE Program Standard #
16.0	Subjec	cts for student s	es for using Florida Standards for grades 11-12 reading in Technical uccess in Drafting.	
	16.01	Key Ideas and	Details	
		16.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		16.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		16.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	16.02	Craft and Struc	cture	
		16.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		16.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		16.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

orida Standards		Correlation to CTE Program Standar
	LAFS.1112.RST.2.6	_
16.03 Integration	n of Knowledge and Ideas	
16.03.1	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g. quantitative data, video, multimedia) in order to address a question or solve a problem. LAFS.1112.RST.3.7	
16.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information. LAFS.1112.RST.3.8	
16.03.3	Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible. LAFS.1112.RST.3.9	
	Reading and Level of Text Complexity	
16.04.1	By the end of grade 11, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] in the grades 11–CCR text complexity band proficiently, with scaffolding as needed at the high end of the range.	
16.04.2	By the end of grade 12, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end of the grades 11–CCR text complexity band independently and proficiently. LAFS.1112.RST.4.10	
0 Methods and stra	ategies for using Florida Standards for grades 11-12 writing in Technical	
	lent success in Drafting.	
•	es and Purposes	
17.01.1	Write arguments focused on discipline-specific content. LAFS.1112.WHST.1.1	
17.01.2	Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. LAFS.1112.WHST.1.2	
17.02 Production	on and Distribution of Writing	
17.02.1	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. LAFS.1112.WHST.2.4	
17.02.2	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience. LAFS.1112.WHST.2.5	

Florida	a Stand	lards		Correlation to CTE Program Standard #
Torrac	a Otaliic	17.02.3	Use technology, including the Internet, to produce, publish, and update	
		1710210	individual or shared writing products in response to ongoing feedback,	
			including new arguments or information.	
			LAFS.1112.WHST.2.6	
	17.03		Build and Present Knowledge	
		17.03.1	Conduct short as well as more sustained research projects to answer a	
			question (including a self-generated question) or solve a problem; narrow	
			or broaden the inquiry when appropriate; synthesize multiple sources on	
			the subject, demonstrating understanding of the subject under	
			investigation.	
		47.00.0	LAFS.1112.WHST.3.7	
		17.03.2	Gather relevant information from multiple authoritative print and digital	
			sources, using advanced searches effectively; assess the strengths and	
			limitations of each source in terms of the specific task, purpose, and	
			audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source

Course Title: Structural Drafting 6

Course Number: 8725560

Course Credit: 1

Course Description:

This course focuses on the use of aerial photography, surveying and mapping procedures, civil drafting and design, and presentation drawings.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

Note: This course is pending alignment in the following categories: NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
30.0	Investigate the use of aerial photography in surveying and mapping The student will be able to:		
	30.01 Demonstrate knowledge of aerial imagery use and interpretation.	LAFS.1112.L.3.6 LAFS.1112.W.2.6 LAFS.1112.W.4.10	
	30.02 Demonstrate knowledge of jurisdictional wetland mapping using aerial photography.	LAFS.1112.RI.3.8 LAFS.1112.SL.1.2 LAFS.1112.SL.2.4,5,6 LAFS.1112.W.3.7,8

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Cabinetmaking Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	Secondary – Career Preparatory				
Program Number	8104400				
CIP Number	0648070304				
Grade Level	9-12, 30, 31				
Standard Length	5 Credits				
Teacher Certification	CAB WOODWK @7 7G CARPENTRY @7 7G BLDG CONSTR @7 7G TEC CONSTR @7 7G				
CTSO	SkillsUSA				
SOC Codes (all applicable)	47-3012 - Helpers—Carpenters 51-7011 - Cabinetmakers and Bench Carpenters				
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml				

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the cabinetmaking industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to developing carpentry and cabinetmaking skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for additional training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8104410	Cabinetmaking 1	1 Credit		2	VO
Α	8104420	Cabinetmaking 2	1 Credit	47-3012	2	VO
В	8104430	Cabinetmaking 3	1 Credit	51-7011	3	VO
	8720140	Cabinetmaking 4	1 Credit		2	VO
С	8720150	Cabinetmaking 5	1 Credit	51-7011	2	VO

Graduation Requirement Abbreviations- EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Cabinetmaking.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Cabinetmaking.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Cabinetmaking.
- 04.0 Apply shop safety skills.
- 05.0 Utilize manual and power tools relevant to the cabinetmaking profession.
- 06.0 Demonstrate mathematics knowledge and skills relevant to the cabinetmaking field.
- 07.0 Create basic construction drawings and/or sketches.
- 08.0 Recommend appropriate building materials for specific scenarios.
- 09.0 Select appropriate fasteners and hardware for specific scenarios.
- 10.0 Apply occupational safety skills.
- 11.0 Select and use hand and power tools relevant to the cabinetmaking profession.
- 12.0 Fasten stock and joints.
- 13.0 Read and design construction documents.
- 14.0 Install cabinets and components.
- 15.0 Investigate sustainability issues related to the cabinetmaking profession.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Cabinetmaking.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Cabinetmaking.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Cabinetmaking.
- 19.0 Identify and describe interior and exterior doors (wood and/or metal).
- 20.0 Install trim and finish carpentry using plans and specifications.
- 21.0 Assemble cabinet doors.
- 22.0 Install ceramic tile.
- 23.0 Install various countertop surfaces.
- 24.0 Explain the importance of employability and entrepreneurship skills.
- 25.0 Prepare cabinets for finish.
- 26.0 Apply finishes.
- 27.0 Install cabinets.
- 28.0 Apply laminates.

Course Title: Cabinetmaking 1

Course Number: 8104410

Course Credit:

Course Description:

The purpose of this course is for the student to develop competencies essential to the carpentry and cabinetmaking industry. These competencies include safety, use of manual and power tools, applied math, plan reading, building materials, fasteners and hardware.

	10.04 Describe the proper precautions for handling hazardous materials.	LAFS.910.W.2.4	
	10.05 Explain eligibility and the procedures for obtaining worker's compensation.	LAFS.910.W.2.4	
	10.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.	LAFS.910.W.2.4	
11.0	Select and use hand and power tools relevant to the cabinetmaking professionThe student will be able to:		
	11.01 Identify the hand tools commonly used by carpenters and describe their uses.		SC.912.N.1.1
	11.02 Use hand tools in a safe and appropriate manner.		SC.912.N.1.1
	11.03 State the general safety rules for operating all power tools, regardless of type.	LAFS.910.SL.2.4	
	11.04 State the general rules for properly maintaining all power tools, regardless of type.	LAFS.910.SL.2.4	
	11.05 Identify the portable power tools commonly used by carpenters and describe their uses.		SC.912.N.1.1
	11.06 Use portable power tools in a safe and appropriate manner.		SC.912.N.1.1
12.0	Fasten stock and jointsThe student will be able to:		
	12.01 Identify types of glues and fasteners and describe their applications.	LAFS.910.W.2.4	SC.912.N.1.1
	12.02 Fasten stock with glue and clamps.		

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
	12.03 Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.		SC.912.N.1.1
	12.04 Fill and finish nail and screw holes with fillers and plugs.		
	12.05 Glue and clamp stock using various techniques.		SC.912.N.1.1
13.0	Read and design construction documentsThe student will be able to:		
	13.01 Explain the types of drawings usually included in a set of plans and list the information found on each type.	LAFS.910.W.2.4 LAFS.910.SL.2.4	SC.912.N.3.5
	13.02 Identify the different types of lines used on construction drawings.		SC.912.L.15.4
	13.03 Identify selected abbreviations commonly used on plans.	LAFS.910.RI.2.4	SC.912.N.1.1 SC.912.N.3.5
	13.04 Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.	MAFS.912.NQ.1.1,2,3 LAFS.910.RI.1.1,3	
	13.05 State the purpose of written specifications.	LAFS.910.SL.2.4	
	13.06 Identify and describe the parts of a specification.	LAFS.910.W.2.4 LAFS.910.SL.2.4	SC.912.N.1.1
	13.07 Conduct quantity takeoff for materials.	MAFS.912.NQ.1.1,2,3 MAFS.912.G-MG.1.3	
	13.08 Design millwork and draw details in construction documents for a given scenario.		SC.912.N.1.1
14.0	Install cabinets and componentsThe student will be able to:		
	14.01 Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.		
	14.02 Install fasteners.		
	14.03 Install drawers.		
	14.04 Install various types of doors including overlay, lipped and flush.		
	14.05 Install adjustable shelving.		
	14.06 Install glass panels and metal grills.		
	14.07 Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".		
	14.08 Install sliding doors and track.		
15.0	Investigate sustainability issues related to the cabinetmaking professionsThe student will be able to:		

CTE Standard	ds and Benchmarks	FS-M/LA	NGSSS-Sci
15.01	Describe the impact of the construction industry on the natural environment.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.L.17.8, SC.912.L.17.20
15.02	Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.L.17.8, SC.912.L.17.20
15.03	Recommend sustainable alternatives to conventional cabinetmaking practices.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1, SC.912.L.17.20
15.04	Identify specific practices that can lessen adverse impacts on the environment.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1 SC.912.L.17.8 SC.912.L.17.20
15.05	Investigate building assessment tools such as Leadership in Energy and Environmental Design (LEED).	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1
15.06	Assess construction activities pertaining to the cabinetmaking profession that contribute to a project's overall sustainability.	LAFS.910.SL.1.1	SC.912.N.1.1 SC.912.L.17.20

Course Title: Cabinetmaking 3

Course Number: 8104430

Course Credit: 1

Course Description:

This course provides students with a more in-depth knowledge of trim and finish carpentry/ cabinetmaking. Students will further their understanding of plan and specifications, assemble cabinet doors and install ceramic tile and countertop surfaces..

Florid	a Standaı	ds	Correlation to CTE Program Standard #
16.0	Subjects	and strategies for using Florida Standards for grades 11-12 reading in Technical for student success in Cabinetmaking.	
	16.01 K	ey Ideas and Details	
	а	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
	b		
	С	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	16.02 C	raft and Structure	
	а	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
	b	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
	С	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

Florida Stand	dards	Correlation to CTE Program Standard #
	LAFS.1112.RST.2.6	J
16.03	Integration of Knowledge and Ideas	
	 a. Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g. quantitative data, video, multimedia) in order to address a question or solve a problem. 	
	LAFS.1112.RST.3.7	
	b. Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information.	
	LAFS.1112.RST.3.8	
	 c. Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible. 	
	LAFS.1112.RST.3.9	
16.04	Range of Reading and Level of Text Complexity	
	 a. By the end of grade 11, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] in the grades 11–CCR text complexity band proficiently, with scaffolding as needed at the high end of the range. 	
	b. By the end of grade 12, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end of the grades 11– CCR text complexity band independently and proficiently. LAFS.1112.RST.4.10	
17.0 Metho	ods and strategies for using Florida Standards for grades 11-12 writing in Technical	
	ects for student success in Cabinetmaking.	
	Text Types and Purposes

	26.02	Apply the types of finishes that the local market demands.		
	26.03	Observe safety precautions when applying finishes, including wearing respirator and protective clothing approved by National Institute of Occupational Safety and Health (NIOSH)		

Course Title: Cabinetmaking 5

Course Number: 8720150

Course Credit: 1

Course Description:

This course is designed to provide students with the competencies needed and provides students with the in-depth training in the installation and lamination of cabinets.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
27.0	Install cabinetsThe student will be able to:		
	27.01 Load and secure casework for hauling.		
	27.02 Check walls and floors for level and plumb.		
	27.03 Determine fasteners for block or walls.		
	27.04 Install upper and lower cabinets and other casework.		
	27.05 Fasten a suspended cabinet unit to ceiling.		
	27.06 Install countertops, including sink cutouts and back splash.		
	27.07 Cut and install molding and trim.		
	27.08 Adjust doors and drawers.		
	27.09 Clean work site.		
28.0	Apply laminatesThe student will be able to:		
	28.01 Lay out and cut core stock to specifications.		
	28.02 Lay out and cut laminate to specification.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
28.03 Apply adhesive.		
28.04 Apply laminate to core stock.		
28.05 Trim and file plastic laminate edges.		
28.06 Clean laminated surfaces.		
28.07 Laminate a curved surface.		
28.08 Repair laminate defects.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly

indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the carpentry industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster. The content includes but is not limited to developing cabinetmaking skills, as well as rough and finish carpentry skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for additional training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8104510	Carpentry 1	1 Credit		2	VO
Α	8104520	Carpentry 2	1 Credit	47-3012	2	VO
	8104530	Carpentry 3	1 Credit		3	VO
В	8722140	Carpentry 4	1 Credit	47-2031	3	VO
	8722150	Carpentry 5	1 Credit		3	VO
	8722160	Carpentry 6	1 Credit		3	VO

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Carpentry.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Carpentry.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Carpentry.
- 04.0 Apply shop safety skills.
- 05.0 Utilize manual and power tools relevant to the carpentry profession.
- 06.0 Demonstrate mathematics knowledge and skills relevant to the carpentry field.
- 07.0 Create basic construction drawings and/or sketches.
- 08.0 Recommend appropriate building materials for specific scenarios.
- 09.0 Select appropriate fasteners and hardware for specific scenarios.
- 10.0 Apply occupational safety skills.
- 11.0 Select and use hand and power tools relevant to the carpentry profession.
- 12.0 Fasten stock and joints.
- 13.0 Read and design construction documents.
- 14.0 Install cabinets and components.
- 15.0 Investigate sustainability issues related to the carpentry professions.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Carpentry.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Carpentry.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Carpentry.
- 19.0 Identify and describe interior and exterior doors (wood and/or metal).
- 20.0 Install trim and finish carpentry using plans and specifications.
- 21.0 Cut and install framing members for a floor (wood and/or metal).
- 22.0 Cut and install a wall and partition framing (wood and/or metal).
- 23.0 Install an interior wall and ceiling materials.
- 24.0 Lay out and construct an interior-stair system.
- 25.0 Comply with hurricane codes.
- 26.0 Frame a roof.
- 27.0 Apply roofing applications.
- 28.0 Apply thermal and moisture protection.
- 29.0 Frame walls using cold-formed steel.
- 30.0 Perform site-preparation and layout activities.
- 31.0 Explain the importance of employability and entrepreneurship skills.
- 32.0 Perform concrete tests.
- 33.0 Lay foundations.
- 34.0 Construct vertical formwork.
- 35.0 Construct horizontal formwork.

- 36.0 Erect and properly align tilt-up wall panels.
- 37.0 Install drywall.
- 38.0 Install a suspended ceiling.
- 39.0 Interpret door and door hardware requirements based on plans and specifications.
- 40.0 Install windows and exterior doors.
- 41.0 Apply interior trim.
- 42.0 Lay out and construct an exterior stair system.
- 43.0 Apply exterior finishing.
- 44.0 Set up and install basic rigging and scaffolding.
- 45.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 46.0 Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabs.
- 47.0 Explain the transport and placement of concrete.
- 48.0 Demonstrate an understanding of trenching and excavation.

Course Title: Carpentry 1 Course Number: 8104510

Course Credit: 1

Course Description:

The purpose of this course is for the student to develop competencies essential to the carpentry industry. These competencies include safety, use of manual and power tools, applied math, plan reading, building materials, fasteners and hardware.

Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
10.0	Apply occupational safety skillsThe student will be able to:		
	10.01 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)	LAFS.910.W.2.4	
	10.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA).	LAFS.910.W.2.4	
	10.03 Identify health-related problems that may result from exposure to hazardous materials.	LAFS.910.W.2.4	
	10.04 Describe the proper precautions for handling hazardous materials.	LAFS.910.W.2.4	
	10.05 Explain eligibility and the procedures for obtaining worker's compensation.	LAFS.910.W.2.4	
	10.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.	LAFS.910.W.2.4	
11.0	Select and use hand and power tools relevant to the carpentry professionThe student will be able to:		
	11.01 Identify the hand tools commonly used by carpenters and describe their uses.		SC.912.N.1.1
	11.02 Use hand tools in a safe and appropriate manner.		SC.912.N.1.1
	11.03 State the general safety rules for operating all power tools, regardless of type.	LAFS.910.SL.2.4	
	11.04 State the general rules for properly maintaining all power tools, regardless of type.	LAFS.910.SL.2.4	
	11.05 Identify the portable power tools commonly used by carpenters and describe their uses.		SC.912.N.1.1
	11.06 Use portable power tools in a safe and appropriate manner.		SC.912.N.1.1
12.0	Fasten stock and jointsThe student will be able to:		
	12.01 Identify types of glues and fasteners and describe their applications.	LAFS.910.W.2.4	SC.912.N.1.1

CTE S	tandar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	12.02	Fasten stock with glue and clamps.		
	12.03	Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.		SC.912.N.1.1
	12.04	Fill and finish nail and screw holes with fillers and plugs.		
	12.05	Glue and clamp stock using various techniques.		SC.912.N.1.1
13.0	Read	and design construction documentsThe student will be able to:		
	13.01	Explain the types of drawings usually included in a set of plans and list the information found on each type.	LAFS.910.W.2.4 LAFS.910.SL.2.4	SC.912.N.3.5
	13.02	Identify the different types of lines used on construction drawings.		SC.912.L.15.4
	13.03	Identify selected abbreviations commonly used on plans.	LAFS.910.RI.2.4	SC.912.N.1.1 SC.912.N.3.5
	13.04	Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.	MAFS.912.NQ.1.1,2,3 LAFS.910.RI.1.1,3	
	13.05	State the purpose of written specifications.	LAFS.910.SL.2.4	
	13.06	Identify and describe the parts of a specification.	LAFS.910.W.2.4 LAFS.910.SL.2.4	SC.912.N.1.1
	13.07	Conduct quantity takeoff for materials.	MAFS.912.NQ.1.1,2,3 MAFS.912.G-MG.1.3	
	13.08	Design millwork and draw details in construction documents for a given scenario.		SC.912.N.1.1
14.0	Install	cabinets and componentsThe student will be able to:		
	14.01	Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.		
	14.02	Install fasteners.		
	14.03	Install drawers.		
	14.04	Install various types of doors including overlay, lipped and flush.		
	14.05	Install adjustable shelving.		
	14.06	Install glass panels and metal grills.		
	14.07	Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".		
	14.08	Install sliding doors and track.		

CTE S	tandar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
15.0	Investi to:	gate sustainability issues related to the carpentry professionsThe student will be able		
	15.01	Describe the impact of the construction industry on the natural environment.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.L.17.8, SC.912.L.17.20
	15.02	Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.L.17.8, SC.912.L.17.20
	15.03	Recommend sustainable alternatives to conventional carpentry practices.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1, SC.912.L.17.20
	15.04	Identify specific practices that can lessen adverse impacts on the environment.	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1 SC.912.L.17.8 SC.912.L.17.20
	15.05	Investigate building assessment tools such as Leadership in Energy and Environmental Design (LEED).	LAFS.910.W.3.7 LAFS.910.W.1.2	SC.912.N.1.1
	15.06	Assess construction activities pertaining to the carpentry profession that contribute to a project's overall sustainability.	LAFS.910.SL.1.1	SC.912.N.1.1 SC.912.L.17.20

Course Title: Carpentry 3 Course Number: 8104530

Course Credit: 1

Course Description:

This course provides students with a more in-depth knowledge of trim and finish carpentry, as well as an introduction to rough carpentry. Students will further their understanding of plan and specifications, assemble and install cabinetry, install doors, frame floors and walls and construct stairs.

Florid	la Standar	ds	Correlation to CTE Program Standard #
16.0		and strategies for using Florida Standards for grades 11-12 reading in Technical for student success in Carpentry.	
	16.01 Ke	ey Ideas and Details	
	a.	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
	b.		
	C.		
	16.02 C	raft and Structure	
	a.	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
	b.	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
	C.	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

Florida	Stand	ards Correlation to CTE Program Standard #
Tiorida	Otaria	LAFS.1112.RST.2.6
	16.03	Integration of Knowledge and Ideas
		a. Integrate and evaluate multiple sources of information presented in diverse formats
		and media (e.g. quantitative data, video, multimedia) in order to address a question
		or solve a problem.
		LAFS.1112.RST.3.7
		b. Evaluate the hypotheses, data, analysis, and conclusions in a science or technical
		text, verifying the data when possible and corroborating or challenging conclusions
		with other sources of information.
		LAFS.1112.RST.3.8
		c. Synthesize information from a range of sources (e.g., texts, experiments,
		simulations) into a coherent understanding of a process, phenomenon, or concept,
		resolving conflicting information when possible.
<u> </u>	16.04	LAFS.1112.RST.3.9
		Range of Reading and Level of Text Complexity a. By the end of grade 11, read and comprehend literature [informational texts,
		history/social studies texts, science/technical texts] in the grades 11–CCR text
		complexity band proficiently, with scaffolding as needed at the high end of the range.
		b. By the end of grade 12, read and comprehend literature [informational texts,
		history/social studies texts, science/technical texts] at the high end of the grades 11–
		CCR text complexity band independently and proficiently.
		LAFS.1112.RST.4.10
17.0 I	Method	s and strategies for using Florida Standards for grades 11-12 writing in Technical
;	Subjec	s for student success in Carpentry.
•	17.01	Text Types and Purposes
		a. Write arguments focused on discipline-specific content.
		LAFS.1112.WHST.1.1
		b. Write informative/explanatory texts, including the narration of historical events,
		scientific procedures/experiments, or technical processes.
	47.00	LAFS.1112.WHST.1.2
		Production and Distribution of Writing
		a. Produce clear and coherent writing in which the development, organization, and style
		are appropriate to task, purpose, and audience. LAFS.1112.WHST.2.4
		b. Develop and strengthen writing as needed by planning, revising, editing, rewriting, or
		trying a new approach, focusing on addressing what is most significant for a specific
		purpose and audience.
		LAFS.1112.WHST.2.5
		c. Use technology, including the Internet, to produce, publish, and update individual or
		shared writing products in response to ongoing feedback, including new arguments

or information. LAFS.1112.WHST.2.6 17.03 Research to Build and Present Knowledge a. Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. LAFS.1112.WHST.3.7 b. Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation. LAFS.1112.WHST.3.8 c. Draw evidence from informational texts to support analysis, reflection, and research. LAFS.1112.WHST.3.9 17.04 Range of Writing a. Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences. LAFS.1112.WHST.4.10 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Carpentry. 18.01 Make sense of problems and persevere in solving them. Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
19.0	Identify and describe interior and exterior doors (wood and/or metal)The student will be able to:		
	19.01 Identify the types and parts of door systems.		SC.912.N.1.1 SC.912.L.15.4
	19.02 Identify door jamb components.		SC.912.N.1.1
	19.03 Identify door hardware.		
20.0	Install trim and finish carpentry using plans and specifications The student will be able to:		
	20.01 Read an architect's scale to determine measurements for a trim and finish carpentry job.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	SC.912.N.3.5
	20.02 Cut and apply trim such as crown molding, baseboard, door and window molding, wainscoting and chair rail.		
21.0	Cut and install framing members for a floor (wood and/or metal)The student will be able to:		
	21.01 Identify and describe floor-framing members including subfloor.	LAFS.1112.W.2.4 LAFS.1112.SL.2.4	SC.912.N.3.5
	21.02 Identify supports for structures (e.g., sills, columns, beams and girders).	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	SC.912.N.1.1
	21.03 Identify various types of joists and openings, including joists for a cantilevered floor.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	SC.912.N.1.1
	21.04 Identify various types of bridging.		
	21.05 Identify various types of subfloors, applying fastening techniques.	LAFS.1112.W.2.4 LAFS.1112.SL.2.4	SC.912.N.3.5
22.0	Cut and install a wall and partition framing (wood and/or metal)The student will be able to:		
	22.01 Identify framing members used in wall and partition construction.		SC.912.L.15.4
	22.02 Lay out wall lines and partition locations on a floor.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	
	22.03 Lay out walls for studs, doors and windows.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	
	22.04 Identify studs, trimmers, cripples, headers and fire stops to length.	MAFS.912.N-Q.1.1,2,3	

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	22.05 Identify T's, corners and headers.		
	22.06 Identify wall layout.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	
	22.07 Identify wall sheathing and/or diagonal bracing.		
	22.08 Identify and describe insulation materials and a vapor barrier.		
23.0	Install an interior wall and ceiling materialsThe student will be able to:		
	23.01 Identify and describe furring strips.		
	23.02 Identify and describe drywall materials.		
	23.03 Identify paneling and trim.		
	23.04 Identify ceiling materials and systems.		
24.0	Lay out and construct an interior-stair systemThe student will be able to:		
	24.01 Identify the types and styles of interior-stair systems.		SC.912.N.3.5 SC.912.N.15.4 SC.912.N.1.1
	24.02 Identify the components of an interior-stair system.		SC.912.N.3.5
	24.03 Calculate the number of risers and treads for an interior-stair system.	MAFS.912.N-Q.1.1,2,3 MAFS.912.S-ID.3.7 MAFS.912.G-SRT.3.8 MAFS.912.G-SRT.2.4	
	24.04 Describe an interior-stair system (rough and finish).	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	SC.912.N.1.1

Course Title: Carpentry 4 Course Number: 8722140

Course Credit: 1

Course Description:

This course provides students with knowledge and skills pertaining to codes, roof framing and applications, wall framing and site preparation.

Florid	a Stand	ards		Correlation to CTE Program Standard #
17.0			es for using Florida Standards for grades 11-12 reading in Technical uccess in Carpentry.	
	17.01	Key Ideas and	Details	
		17.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		17.01.2	Determine the central ideas or conclusions of a text; trace the text's	
		17.01.2	explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		17.01.3	Follow precisely a complex multistep procedure when carrying out	
		17.01.3	experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	17.02	Craft and Struc	cture	
		17.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		17.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		17.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved. LAFS.1112.RST.2.6	

Florid	la Stand	dards		Correlation to CTE Program Standard #
			f Knowledge and Ideas	
		17.03.1	Integrate and evaluate multiple sources of information presented in	
			diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		17.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		17.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon,	
			or concept, resolving conflicting information when possible.	
			LAFS.1112.RST.3.9	
	17.04		ading and Level of Text Complexity	
		17.04.1	By the end of grade 11, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			11-CCR text complexity band proficiently, with scaffolding as needed at	
			the high end of the range.	
		17.04.2	By the end of grade 12, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 11–CCR text complexity band independently and	
			proficiently.	
10.0			LAFS.1112.RST.4.10	
18.0			gies for using Florida Standards for grades 11-12 writing in Technical	
			success in Carpentry.	
	18.01	Text Types a	•	
		18.01.1	Write arguments focused on discipline-specific content.	
		40.04.0	LAFS.1112.WHST.1.1	
		18.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
	19.02	Droduction o	nd Distribution of Writing	
	10.02	18.02.1	<u> </u>	
		10.UZ. I	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.	
		18.02.2	LAFS.1112.WHST.2.4 Develop and strengthen writing as needed by planning, revising, editing,	
		10.02.2	rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
			LAFS.1112.WHST.2.5	
		18.02.3	Use technology, including the Internet, to produce, publish, and update	
L		10.02.3	030 teormology, including the internet, to produce, publish, and update	<u>l</u>

Florid	la Stand	dards		Correlation to CTE Program Standard #
Horic	ia Starit	aaius	individual or shared writing products in response to ongoing feedback,	Correlation to CTE i Togram Standard #
			including new arguments or information.	
			LAFS.1112.WHST.2.6	
	18.03	Research to F	Build and Present Knowledge	
	10.00	18.03.1	Conduct short as well as more sustained research projects to answer a	
		10.03.1	question (including a self-generated question) or solve a problem; narrow	
			or broaden the inquiry when appropriate; synthesize multiple sources on	
			the subject, demonstrating understanding of the subject under	
			investigation.	
			LAFS.1112.WHST.3.7	
		18.03.2	Gather relevant information from multiple authoritative print and digital	
		1010012	sources, using advanced searches effectively; assess the strengths and	
			limitations of each source in terms of the specific task, purpose, and	
			audience; integrate information into the text selectively to maintain the	
			flow of ideas, avoiding plagiarism and overreliance on any one source	
			and following a standard format for citation.	
			LAFS.1112.WHST.3.8	
		18.03.3	Draw evidence from informational texts to support analysis, reflection,	
			and research.	
			LAFS.1112.WHST.3.9	
	18.04	Range of Writ	ing	
		18.04.1	Write routinely over extended time frames (time for reflection and	
			revision) and shorter time frames (a single sitting or a day or two) for a	
			range of discipline-specific tasks, purposes, and audiences.	
			LAFS.1112.WHST.4.10	
19.0			es for using Florida Standards for grades 11-12 Mathematical Practices in	
			r student success in Carpentry.	
	19.01	Make sense o	f problems and persevere in solving them.	
		<u>_</u>	MAFS.K12.MP.1.1	
	19.02	Reason abstra	actly and quantitatively.	
	10.00		MAFS.K12.MP.2.1

Abbreviations:

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
25.0	Comply with hurricane codesthe student will be able to:		
	25.01 Install hurricane anchors.		
	25.02 Install hurricane clips.		
	25.03 Install hurricane straps.		
	25.04 Explain the purpose and importance of the codes relating to hurricanes.	LAFS.1112.RI.1.1 LAFS.1112.W.2.4 LAFS.1112.SL.2.4	SC.912.L.17.8
26.0	Frame a roofThe student will be able to:		
	26.01 Understand the terms associated with roof framing.	LAFS.1112.RI.2.4	
	26.02 Identify the roof framing members used in gable and hip roofs.		
	26.03 Identify the methods used to calculate the length of a rafter.		
	26.04 Identify the various types of trusses used in roof framing.		
	26.05 Use a rafter framing square, speed square and calculator in laying out a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.S-ID.3.7	
	26.06 Identify various types of sheathing used in roof construction.		
	26.07 Frame a gable roof with vent openings.		
	26.08 Frame a roof opening.		
	26.09 Erect a gable roof using trusses.		
	26.10 Estimate the materials used in framing and sheathing a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
27.0	Apply roofing applicationsThe student will be able to:		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	27.01 Identify the materials and methods used in roofing.		SC.912.N.1.1 SC.912.L.15.4
	27.02 Explain the safety requirements for roof jobs.	LAFS.1112.W.2.4	
	27.03 Install fiberglass shingles on gable and hip roofs.		
	27.04 Close up a valley using fiberglass shingles.		
	27.05 Explain how to make various roof projections watertight when using fiberglass shingles.	LAFS.1112.SL.2.4	
	27.06 Complete the proper cuts and install the main and hip ridge caps using fiberglass shingles.		
	27.07 Lay out, cut and install a cricket or saddle.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
	27.08 Install wood shingles and shakes on roofs.		
	27.09 Describe how to close up a valley using wood shingles and shakes.	LAFS.1112.SL.2.4	
	27.10 Explain how to make roof projections watertight when using wood shakes and shingles.	LAFS.1112.SL.2.4	
	27.11 Complete the cuts and install the main and hip ridge caps using wood shakes/shingles.		
	27.12 Demonstrate the techniques for installing other selected types of roofing materials.		
28.0	Apply thermal and moisture protectionThe student will be able to:		
	28.01 Research the requirements for insulation.	LAFS.1112.W.3.7	SC.912.N.1.1
	28.02 Identify the characteristics of various types of insulation material.	LAFS.1112.W.3.7	SC.912.N.1.1
	28.03 Calculate the required amounts of insulation for a structure.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.1	
	28.04 Install selected insulation materials.		
	28.05 Describe the requirements for moisture control and ventilation.	LAFS.1112.SL.2.4	SC.912.N.1.1 SC.912.L.18.12
	28.06 Install selected vapor barriers.		
	28.07 Describe various methods of waterproofing.	LAFS.1112.SL.2.4	
	28.08 Describe air infiltration control requirements.	LAFS.1112.SL.2.4	
	28.09 Install selected building wraps.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
29.0	Frame walls using cold-formed steelThe student will be able to:		
	29.01 Identify the components of a steel framing system.		
	29.02 Identify and select the tools and fasteners used in a steel framing system.		
	29.03 Identify applications for steel framing systems.		
	29.04 Demonstrate the ability to build back-to-back, box and L-headers.		
	29.05 Lay out and install a steel stud structural wall with openings to include bracing and blocking.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
	29.06 Lay out and install a steel stud non-structural wall with openings to include blocking and bracing.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
0.0	Perform site-preparation and layout activitiesThe student will be able to:		
	30.01 Identify building layout from plans and specifications using math skills.		
	30.02 Set up and adjust a transit and builder's level over one point and establish lines over two points.	MAFS.912.N-Q.1.1,2,3 MAFS.912.A-REI.4.10	
	30.03 Erect batter boards and locate building lines.		
	30.04 Locate building line points on batter boards using a builder's level.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.3.8	
	30.05 Locate building lines on a plot plan.		
	30.06 Square a building, using the 3-4-5-triangle method and the diagonal method.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.2.4 MAFS.912.G-SRT.3.8	
1.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:		
	31.01 Identify and demonstrate positive work behaviors needed to be employable.		
	31.02 Develop personal career plan that includes goals, objectives and strategies.		
	31.03 Examine licensing, certification and industry credentialing requirements.	LAFS.1112.W.3.7	
	31.04 Maintain a career portfolio to document knowledge, skills and experience.	LAFS.1112.W.3.7 LAFS.1112.RI.1.1	SC.912.N.1.1
	31.05 Evaluate and compare employment opportunities that match career goals.		SC.912.N.1.1
	31.06 Identify and exhibit traits for retaining employment.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
31.07 Identify opportunities and research requirements for career advancement.		SC.912.N.1.1
31.08 Research the benefits of ongoing professional development.	LAFS.1112.W.3.7	SC.912.N.1.1
31.09 Examine and describe entrepreneurship opportunities as a career planning option.	LAFS.1112.W.3.7	SC.912.N.1.1

Course Title: Carpentry 5
Course Number: 8722150

Course Credit: 1

Course Description:

This course provides students with knowledge and skills pertaining to concrete, foundations, forms and tilt-up construction.

Abbreviations:

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
32.0	Perform concrete testsThe student will be able to:		
	32.01 Identify various types of cement and describe their uses.		SC.912.L.15.4
	32.02 Identify types and sizes of concrete aggregates.		SC.912.N.1.1 SC.912.P.8.2 SC.912.P.10.4
	32.03 Research types of concrete admixtures and describe their uses.	LAFS.1112.W.3.7	SC.912.N.1.1
	32.04 Research special types of concrete and describe their uses.	LAFS.1112.W.3.7	
	32.05 Calculate concrete volume requirements for rectangular, cylindrical, or other geometric structures using formulas, concrete tables and/or concrete calculators, as applicable.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- GMD.1.1,3	SC.912.P.8.2 SC.912.P.10.4
	32.06 Identify concrete curing methods and materials.		SC.912.P.8.2
	32.07 Identify concrete testing methods.		SC.912.P.8.2
	32.08 Mix concrete using different aggregates and admixtures.		SC.912.P.8.2 SC.912.N.1.1
	32.09 Conduct concrete slump test.		SC.912.P.8.2 SC.912.N.1.1
33.0	Lay foundationsThe student will be able to:		

CTE S	Standard	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	33.01	Establish elevations.		
	33.02	Identify various types of footing and foundations.	MAFS.912.G- CO.1.4,5 MAFS.912.G- CO.2.6	SC.912.L.15.4
	33.03	Select the appropriate footing for a foundation.		SC.912.N.1.1
	33.04	Lay out and construct a selected footing and foundation using an established gridline.		SC.912.N.1.1
	33.05	Install templates, keyways and embedments.	MAFS.912.G- CO.1.4,5 MAFS.912.G- CO.2.6	
	33.06	Form and strip pier foundation forms and prepare for resetting at another location.		
	33.07	Identify the different classes of slabs-on-grade.		SC.912.L.15.4
	33.08	Identify edge forms and explain their purpose.		SC.912.L.15.4
	33.09	Construct and disassemble edge forms.		
	33.10	Install vapor barrier, reinforcement and control joints.	MAFS.912.G- C.2.5	
	33.11	Establish finish grade and fill requirements.		
34.0	Constr	uct vertical formworkThe student will be able to:		
	34.01	Explain safety procedures associated with using concrete wall forms.	LAFS.1112.SL.2.4	SC.912.L.15.4
	34.02	Identify the various types of concrete wall forms.		
	34.03	Identify the components of each type of vertical forming system.		
	34.04	Erect, plumb and brace a selected wall.		
	34.05	Recognize various types of manufactured forms.		
	34.06	State the differences in construction and use among different types of forms.	LAFS.1112.SL.2.4	
	34.07	Erect, plumb and brace a column form.		
	34.08	Erect, plumb and brace a stair form.		SC.912.N.1.1
	34.09	Locate and install bulkheads and embedded forms.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
35.0	Construct horizontal formworkThe student will be able to:		
	35.01 Identify the safety hazards associated with elevated deck formwork and explain how to eliminate them.		SC.912.L.15.4
	35.02 Identify the different types of elevated decks.		SC.912.L.15.4
	35.03 Identify the different types of flying form systems.		SC.912.L.15.4
	35.04 Identify different types of handset form systems.		
	35.05 Erect, plumb, brace and level different types of handset deck form systems.		
	35.06 Distinguish characteristics of joints: control, expansion and construction.		
	35.07 Install edge forms, blockouts, embedments and construction joints.		SC.912.L.15.4
	35.08 Identify typical bridge and culvert form systems.		
36.0	Erect and properly align tilt-up wall panelsThe student will be able to:		
	36.01 Describe the different processes used in installing tilt-up wall panels.	LAFS.1112.SL.2.4	SC.912.N.1.1
	36.02 Explain the importance of the casting bed.	LAFS.1112.SL.2.4	SC.912.N.1.1
	36.03 Identify and install the various types of lifting eyes used in forming tilt-up panels.		SC.912.N.1.1
	36.04 Identify the special rigging requirements for tilt-up wall panels.		SC.912.N.1.1
	36.05 Identify the different methods of forming tilt-up wall panels.		SC.912.N.1.1
	36.06 Demonstrate the different methods of forming tilt-up wall panels.		SC.912.N.1.1
	36.07 Prepare for the erection of tilt-up wall panels.		SC.912.N.1.1
	36.08 Install proper bracing for tilt-up wall panels.		SC.912.N.1.1
	36.09 Install embedments, blockouts, architectural finishes, lifting devices and reinforcing materials using a set of construction drawings.		SC.912.N.1.1
	36.10 Describe the final grouting procedure.	LAFS.1112.SL.2.4	SC.912.L.15.4

Course Title: Carpentry 6 Course Number: 8722160

Course Credit: 1

Course Description:

This course provides students interior and exterior finish carpentry skills. The content deals with the installation of drywall, doors and hardware, windows, trim, exterior stairs and exterior finishes.

Abbreviations:

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
37.0	Install drywallThe student will be able to:		
	37.01 Identify the different types of drywall and their uses.		SC.912.L.15.4
	37.02 Select the type and thickness of drywall required for specific installations.		SC.912.N.1.1
	37.03 Select fasteners for drywall installation.		
	37.04 Explain the fastener schedules for different types of drywall installations.	LAFS.1112.SL.2.4	
	37.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives.		
	37.06 Install gypsum drywall on steel studs.		
	37.07 Explain how soundproofing is achieved in drywall installations.	LAFS.1112.SL.2.4	SC.912.P.10.20
	37.08 Estimate material quantities for a drywall installation.	MAFS.912.N- Q.1.1,2,3	
38.0	Install a suspended ceilingThe student will be able to:		
	38.01 Establish a level line.		
	38.02 Explain the common terms related to sound waves and acoustical ceiling materials.	LAFS.910.RI.2.4 LAFS.1112.RI.2.4	SC.912.P.10.20

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	38.03 Identify the different types of suspended ceilings.		SC.912.L.15.4
	38.04 Interpret plans related to ceiling layout.		SC.912.N.1.1
	38.05 Sketch the ceiling layout for a basic suspended ceiling.		
	38.06 Perform a material takeoff for a suspended ceiling.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- MG.1.3 MAFS.912.G- GMD.2.4	
	38.07 Install selected suspended ceilings.		
39.0	Interpret door and door hardware requirements based on plans and specificationsThe student will be able to:		
	39.01 Identify various types of door jambs and frames and demonstrate the installation procedures for placing selected door jambs and frames in different types of interior partitions.		SC.912.L.15.4
	39.02 Identify different types of interior doors.		SC.912.L.15.4
	39.03 Identify different types of interior door hardware and demonstrate the installation procedures for selected types.		SC.912.L.15.4
	39.04 List and identify specific items included on a typical door schedule.	LAFS.1112.W.2.4	
	39.05 Explain the procedure for placing and hanging a specified door.	LAFS.1112.SL.2.4	
40.0	Install windows and exterior doorsThe student will be able to:		
	40.01 Identify various types of fixed, sliding and swinging windows.		SC.912.L.15.4
	40.02 Identify the parts of a window installation.		SC.912.L.15.4
	40.03 State the requirements for a proper window installation.	LAFS.910.SL.2.4 LAFS.1112.SL.2.4	
	40.04 Install a pre-hung window.		
	40.05 Identify the common types of exterior doors and explain how they are constructed.		SC.912.L.15.4
	40.06 Identify the parts of a door installation.		SC.912.L.15.4
	40.07 Identify the types of thresholds used with exterior doors.		SC.912.L.15.4
	40.08 Install a pre-hung exterior door.		

CTE S	standards and Benchmarks	FS-M/LA	NGSSS-Sci
	40.09 Identify the various types of locksets used on exterior doors and explain how they are installed.		SC.912.L.15.4
	40.10 Install a lockset.		
41.0	Apply interior trimThe student will be able to:		
	41.01 Identify the different types of standard moldings and describe their uses.		SC.912.L.15.4
	41.02 Make square and miter cuts using a saw buck or power miter saw.		
	41.03 Select and properly use fasteners to install trim.		
	41.04 Install interior trim including door, window, base and ceiling trim.		
	41.05 Estimate the quantities of different trim materials required for selected rooms.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- MG.1.3 MAFS.912.G- GMD.2.4	
42.0	Lay out and construct an exterior stair systemThe student will be able to:		
	42.01 Identify the types of exterior stair systems.		SC.912.L.15.4
	42.02 Identify the parts of an exterior stair system.		SC.912.L.15.4
	42.03 Calculate the number of treads and risers for an exterior stair system.	MAFS.912.N- Q.1.1,2,3 MAFS.912.S- ID.3.7 MAFS.912.G- SRT.3.8 MAFS.912.G- SRT.2.4	
	42.04 Lay out, cut and assemble an exterior stair system.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- SRT.1.1	
43.0	Apply exterior finishingThe student will be able to:		
	43.01 Describe the purpose of wall insulation and flashing.	LAFS.1112.SL.2.4	SC.912.P.10.20 SC.912.P.10.4
	43.02 Install selected common cornices.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
43.03 Demonstrate lap and panel siding estimating methods.		
43.04 Describe the types and applications of common wood siding.	LAFS.1112.SL.1.1	
43.05 Describe fiber-cement siding and its uses.	LAFS.1112.SL.1.1	
43.06 Describe the types and styles of vinyl and metal siding.	LAFS.1112.SL.1.1	
43.07 Describe the types and applications of stucco and masonry veneer finishes.	LAFS.1112.SL.1.1	
43.08 Describe the types and applications of special exterior finish systems.		
43.09 Install three types of siding commonly used in your area.		

Course Title: Carpentry 7
Course Number: 8722170

Course Credit: 1

Course Description:

This course provides students with knowledge of rigging, scaffolding, concrete and trenching and excavation.

Abbreviations:

CTE S	CTE Standards and Benchmarks FS-M/LA				
44.0	44.0 Set up and install basic rigging and scaffoldingThe student will be able to:				
	44.01 Identify and explain rigging equipment.	LAFS.1112.SL.2.4	SC.912.L.15.4		
	44.02 Inspect rigging equipment, following safety precautions.		SC.912.N.1.1		
	44.03 Estimate size, weight and center of gravity.		SC.912.N.1.1 SC.912.P.12.4		
	44.04 Tie knots.		SC.912.N.1.1		
	44.05 Identify and explain types of cranes.	LAFS.1112.SL.2.4	SC.912.L.15.4		
	44.06 Rig and move materials and equipment, following safety precautions.				
	44.07 Set up and install scaffolds, following safety precautions.				
	44.08 Inspect various types of ladders and scaffolds, following safety precautions.		SC.912.N.1.1		
45.0	Erect, plumb and brace a simple concrete form with reinforcementThe student will be able to:				
	45.01 Identify the properties of cement.		SC.912.P.8.2		
	45.02 Describe the composition of concrete.	LAFS.1112.SL.2.4	SC.912.P.8.2		
	45.03 Estimate volumes of concrete.	MAFS.912.N- Q.1.1,2,3			

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
		MAFS.912.G- GMD.2.4	
		MAFS.912.G-	
		MG.1.1,3	
		MAFS.912.G- GMD.1.3	
	45.04 Identify types of concrete reinforcement materials and describe their uses.	LAFS.1112.SL.2.4	SC.912.L.15.4
	45.05 Identify various types of footings and explain their uses.	LAFS.1112.SL.2.4	SC.912.L.15.4
	45.06 Identify the parts of various types of forms.		SC.912.L.15.4
	45.07 Explain the safety procedures associated with the construction and use of concrete forms.	LAFS.1112.SL.1.1	
46.0	Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabsThe student will be able to:		
	46.01 Describe the applications of reinforcing bars, the uses of reinforced structural concrete and the basic processes involved in placing reinforcing bars.	LAFS.1112.SL.1.2	
	46.02 Recognize and identify the bar bends standardized by the American Concrete Institution (ACI).		SC.912.L.15.4
	46.03 Read and interpret bar lists and describe the information found on a bar list.	LAFS1112.RI.1.3	
	46.04 List the types of ties used in securing reinforcing bars.	LAFS.1112.W.2.4	
	46.05 State the tolerances allowed in the fabrication of reinforcing bars.	LAFS.1112.SL.1.1	
	46.06 Demonstrate the proper use of common ties for reinforcing bars.		
	46.07 Describe methods by which reinforcing bars may be cut and bent in the field.	LAFS.1112.SL.1.1	
	46.08 Use the tools and equipment needed for installing reinforcing bars.		
	46.09 Safely use selected tools and equipment to cut, bend and install reinforcing materials.		SC.912.N.1.1
	46.10 Explain the necessity of concrete cover in placing reinforcing bars.	LAFS.1112.SL.1.1	
	46.11 Identify lapped splices.		
47.0	Explain the transport and placement of concreteThe student will be able to:		
	47.01 List various types of equipment used to transport and place concrete.	LAFS.1112.W.2.4	
	47.02 Describe the factors that contribute to the quality of concrete placement.		

CTE S	Standards and Benchmarks		FS-M/LA	NGSSS-Sci
	47.03 Demonstrate the correct methods for placing and of	consolidating concrete into forms.	LAFS.1112.SL.1.1	
	47.04 Use a screed to strike off and level concrete to the	proper grade in a form.		
	47.05 Use tools for placing, floating and finishing concret	e.		SC.912.N.1.1
	47.06 Determine when conditions permit the concrete fin	ishing operation to start.		SC.912.P.8.2
	47.07 Name the factors that affect the curing of concrete proper curing.	and describe the methods used to achieve	LAFS.1112.SL.1.1	SC.912.P.8.2
	47.08 Properly care for and safely use hand and power to	ools used when working with concrete.		SC.912.N.1.1
48.0	Demonstrate an understanding of trenching and excavation	onThe student will be able to:		
	48.01 Identify the different types, bearing capacities and	classifications of soils.		SC.912.L.15.4
	48.02 Identify ways to increase soil density.			SC.912.N.1.1 SC.912.P.8.2
	48.03 State the purpose of soil density (compaction) test	S.	LAFS.1112.SL.1.1	
	48.04 Explain the safety considerations for trenches and	deep excavations.	LAFS.1112.SL.1.1	SC.912.E.6.2
	48.05 Identify and describe groundwater mitigation method	ods.		SC.912.E.6.2
	48.06 Identify and describe rock mitigation techniques.			SC.912.E.6.2

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Course Title: Introduction to Architecture & Construction

Course Type: Orientation/Exploratory
Career Cluster: Architecture & Construction

Secondary – Middle School		
Program Number	8109350	
CIP Number	148109350M	
Grade Level	6-8	
Standard Length	Semester	
Teacher Certification	TEC ED 1@2 BLDG CONST @7 7G BLDG MAINT @7 7G DRAFTING @7 7G	
CTSO	SkillsUSA	
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml	

Purpose

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Architecture & Construction career cluster. The content includes but is not limited to careers in designing, planning, managing, building and maintaining the built environment. Reinforcement of academic skills occurs through classroom instruction and applied laboratory procedures.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the Design/ Pre-Construction career pathway.
- 02.0 Demonstrate an understanding of the Construction career pathway.
- 03.0 Demonstrate an understanding of the Maintenance/ Operation career pathway.
- 04.0 Apply leadership and communication skills.
- 05.0 Describe how information technology is used in the Architecture and Construction career cluster.
- 06.0 Use information technology tools.

Course Title: Introduction to Architecture & Construction

Course Number: 8109350 Course Length: Semester

Course Description:

Beginning with a broad overview of the Architecture & Construction career cluster, students are introduced to the terminology, careers, history, required skills, and technologies associated with each pathway in the Architecture & Construction career cluster. Additionally, they will be provided with opportunities to acquire and demonstrate beginning leadership skills.

CTE S	CTE Standards and Benchmarks		
01.0	Demonstrate an understanding of the Design/ Pre-Construction career pathwayThe student will be able to:		
	01.01 Define and use proper terminology associated with the Design/ Pre-Construction career pathway.		
	01.02 Describe some of the careers available in the Design/ Pre-Construction career pathway.		
	01.03 Identify common characteristics of the careers in the Design/ Pre-Construction career pathway.		
	01.04 Research the history of the Design/ Pre-Construction career pathway and describe how the associated careers have evolved and impacted society.		
	01.05 Identify skills required to successfully enter any career in the Design/Pre-Construction career pathway.		
	01.06 Describe technologies associated in careers within the Design/ Pre-Construction career pathway.		
02.0	Demonstrate an understanding of the Construction career pathwayThe student will be able to:		
	02.01 Define and use proper terminology associated with the Construction career pathway.		
	02.02 Describe some of the careers available in the Construction career pathway.		
	02.03 Identify common characteristics of the careers in the Construction career pathway.		
	02.04 Research the history of the Construction career pathway and describe how the careers have evolved and impacted society.		
	02.05 Identify skills required to successfully enter any career in the Construction career pathway.		
	02.06 Describe technologies associated in careers within the Construction career pathway.		

CTE S	Standards and Benchmarks
03.0	Demonstrate an understanding of the Maintenance/ Operation career pathwayThe student will be able to:
	03.01 Define and use proper terminology associated with the Maintenance/ Operation career pathway.
	03.02 Describe some of the careers available in the Maintenance/ Operation career pathway.
	03.03 Identify common characteristics of the careers in the Maintenance/ Operation career pathway.
	03.04 Research the history of the Maintenance/ Operation career pathway and describe how the careers have evolved and impacted society.
	03.05 Identify skills required to successfully enter any career in the Maintenance/ Operation career pathway.
	03.06 Describe technologies associated in careers within the Maintenance/ Operation career pathway.
04.0	Apply leadership and communication skillsThe student will be able to:
	04.01 Discuss the establishment and history of the SkillsUSA organization.
	04.02 Identify the characteristics and responsibilities of organizational leaders.
	04.03 Demonstrate parliamentary procedure skills during a meeting.
	04.04 Participate in a committee which has an assigned task and report to the class.
	04.05 Demonstrate effective communication skills through delivery of a speech, a slide presentation, or conducting a demonstration.
	04.06 Use a computer to assist in the completion of a project related to the Architecture & Construction career cluster.
05.0	Describe how information technology is used in the Architecture and Construction career cluster. – The student will be able to:
	05.01 Identify information technology (IT) careers in the Architecture and Construction career cluster, including the responsibilities, tasks and skills they require.
	05.02 Relate information technology project management concepts and terms to careers in the Architecture and Construction career cluster.
	05.03 Manage information technology components typically used in professions of the Architecture and Construction career cluster.
	05.04 Identify security-related ethical and legal IT issues faced by professionals in the Architecture and Construction career cluster.
06.0	Use information technology tools. – The student will be able to:
	06.01 Identify the functions of web browsers, and use them to access the World Wide Web and other computer resources typically used in the Architecture and Construction career cluster.
	06.02 Use e-mail clients to send simple messages and files to other Internet users.

CTE Standards and Benchmarks

- 06.03 Demonstrate ways to communicate effectively using Internet technology.
- 06.04 Use different types of web search engines effectively to locate information relevant to the Architecture and Construction career cluster.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The length of this course is one semester. It may be offered for two semesters when appropriate. When offered for one semester, it is recommended that it be at the exploratory level and more in-depth when offered for two semesters.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

For additional information regarding articulation agreements, Bright Futures Scholarships, Fine Arts/Practical Arts Credit and Equivalent Mathematics and Equally Rigorous Science Courses please refer to: http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Architecture & Construction career cluster. The content includes but is not limited to careers in designing, planning, managing, building and maintaining the built environment. Reinforcement of academic skills occurs through classroom instruction and applied laboratory procedures.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the Design/ Pre-Construction career pathway.
- 02.0 Demonstrate an understanding of the Construction career pathway.
- 03.0 Demonstrate an understanding of the Maintenance/ Operation career pathway.
- 04.0 Apply leadership and communication skills.
- 05.0 Describe how information technology is used in the Architecture and Construction career cluster.
- 06.0 Use information technology tools.

Listed below are the standards that must be met to satisfy the requirements of Section 1003.4156, Florida Statutes--The student will be able to:

- 07.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 08.0 Develop skills to locate, evaluate, and interpret career information.
- 09.0 Identify and demonstrate processes for making short and long term goals.
- 10.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 11.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 12.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 13.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 14.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Course Title: Introduction to Architecture & Construction and Career Planning

Course Number: 8109360 Course Length: Semester

Course Description:

Beginning with a broad overview of the Architecture & Construction career cluster, students are introduced to the terminology, careers, history, required skills, and technologies associated with each pathway in the Architecture & Construction career cluster. Additionally, they will be provided with opportunities to acquire and demonstrate beginning leadership skills.

CTE Standards and Benchmarks			
01.0	Demonstrate an understanding of the Design/ Pre-Construction career pathwayThe student will be able to:		
	01.01 Define and use proper terminology associated with the Design/ Pre-Construction career pathway.		
	01.02 Describe some of the careers available in the Design/ Pre-Construction career pathway.		
	01.03 Identify common characteristics of the careers in the Design/ Pre-Construction career pathway.		
	01.04 Research the history of the Design/ Pre-Construction career pathway and describe how the associated careers have evolved and impacted society.		
	01.05 Identify skills required to successfully enter any career in the Design/Pre-Construction career pathway.		
	01.06 Describe technologies associated in careers within the Design/ Pre-Construction career pathway.		
02.0	.0 Demonstrate an understanding of the Construction career pathwayThe student will be able to:		
	02.01 Define and use proper terminology associated with the Construction career pathway.		
	02.02 Describe some of the careers available in the Construction career pathway.		
	02.03 Identify common characteristics of the careers in the Construction career pathway.		
	02.04 Research the history of the Construction career pathway and describe how the careers have evolved and impacted society.		
	02.05 Identify skills required to successfully enter any career in the Construction career pathway.		
	02.06 Describe technologies associated in careers within the Construction career pathway.		

CTE Standards and Benchmarks				
03.0	Demonstrate an understanding of the Maintenance/ Operation career pathwayThe student will be able to:			
	03.01 Define and use proper terminology associated with the Maintenance/ Operation career pathway.			
	03.02 Describe some of the careers available in the Maintenance/ Operation career pathway.			
	03.03 Identify common characteristics of the careers in the Maintenance/ Operation career pathway.			
	03.04 Research the history of the Maintenance/ Operation career pathway and describe how the careers have evolved and impacted society.			
	03.05 Identify skills required to successfully enter any career in the Maintenance/ Operation career pathway.			
	03.06 Describe technologies associated in careers within the Maintenance/ Operation career pathway.			
04.0	Apply leadership and communication skillsThe student will be able to:			
	04.01 Discuss the establishment and history of the SkillsUSA organization.			
	04.02 Identify the characteristics and responsibilities of organizational leaders.			
	04.03 Demonstrate parliamentary procedure skills during a meeting.			
	04.04 Participate in a committee which has an assigned task and report to the class.			
	04.05 Demonstrate effective communication skills through delivery of a speech, a slide presentation, or conducting a demonstration.			
	04.06 Use a computer to assist in the completion of a project related to the Architecture & Construction career cluster.			
05.0	Describe how information technology is used in the Architecture and Construction career cluster. – The student will be able to:			
	05.01 Identify information technology (IT) careers in the Architecture and Construction career cluster, including the responsibilities, tasks and skills they require.			
	05.02 Relate information technology project management concepts and terms to careers in the Architecture and Construction career cluster.			
	05.03 Manage information technology components typically used in professions of the Architecture and Construction career cluster.			
	05.04 Identify security-related ethical and legal IT issues faced by professionals in the Architecture and Construction career cluster.			
06.0	Use information technology tools. – The student will be able to:			
	06.01 Identify the functions of web browsers, and use them to access the World Wide Web and other computer resources typically used in the Architecture and Construction career cluster.			
	06.02 Use e-mail clients to send simple messages and files to other Internet users.			

CTE Standards and Benchmarks				
	06.03 Demonstrate ways to communicate effectively using Internet technology.			
	06.04 Use different types of web search engines effectively to locate information relevant to the Architecture and Construction career cluster.			
Listed below are the standards that must be met to satisfy the requirements of Section 1003.4156, Florida StatutesThe student will be able to:				
07.0	Describe the influences that societal, economic, and technological changes have on employment trends and future training.			
08.0	Develop skills to locate, evaluate, and interpret career information.			
09.0	Identify and demonstrate processes for making short and long term goals.			
10.0	Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.			
11.0	Understand the relationship between educational achievement and career choices/postsecondary options.			
12.0	Identify a career cluster and related pathways that match career and education goals.			
13.0	Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.			
14.0	Demonstrate knowledge of technology and its application in career fields/clusters.			

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The length of this course is one semester. It may be offered for two semesters when appropriate. When offered for one semester, it is recommended that it be at the exploratory level and more in-depth when offered for two semesters.

Career Planning

The requirements of section 1003.4156 (1) (e), Florida Statutes, have been integrated into this course. The statute requires that students take a career and education planning course that must result in a completed personalized academic and career plan for the student; must emphasize the importance of entrepreneurship skills; must emphasize technology or the application of technology in career fields; and, beginning in the 2014-2015 academic year, must provide information from the Department of Economic Opportunity's economic security report as described in section 445.07, Florida Statutes. For additional information on the Middle School Career and Education Planning course requirements, go to http://www.fldoe.org/workforce/ced/.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

<u>Purpose</u>

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Architecture and Construction career cluster. The content includes but is not limited to investigating careers, reading and drawing plans and constructing models. Instruction and learning activities are provided in a laboratory setting using hands-on experiences with the equipment, materials and technology appropriate to the course content and in accordance with current practices.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Investigate careers and entry requirements within the design/ preconstruction pathway.
- 02.0 Use safe work practices.
- 03.0 Read and interpret basic construction documents and specifications.
- 04.0 Draw basic plans by hand.
- 05.0 Read civil, architectural and mechanical, electrical and plumbing (MEP) drawings.
- 06.0 Investigate careers and entry requirements within the construction pathway.
- 07.0 Plan the construction of a model or architectural detail from a set of plans.
- 08.0 Construct a model or architectural detail from plans and specifications.
- 09.0 Investigate careers and entry requirements within the operation and maintenance pathway.
- 10.0 Analyze the impact of design decisions on building operations and maintenance.
- 11.0 Explain sustainability issues related to the design, construction and maintenance of the built environment.
- 12.0 Identify components of network systems.
- 13.0 Describe and use communication features of information technology.

Course Title: Fundamentals of Architecture and Construction

Course Number: 8130300 Course Length: Year

Course Description:

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Architecture and Construction career cluster. The content includes but is not limited to investigating careers, reading and drawing plans and constructing models.

CTE S	CTE Standards and Benchmarks			
01.0	Investigate careers and entry requirements within the design/ preconstruction pathwayThe student will be able to:			
	01.01 Describe careers in design/preconstruction (e.g. architects, interior designers, drafters, engineers - civil, MEP and structural, urban and regional planners, etc.)			
	01.02 Explain educational and training pathways necessary for these careers.			
	01.03 Research and present information on a design / preconstruction career including roles and responsibilities, opportunities for employment and the requirements for education and training.			
02.0	Use safe work practicesThe student will be able to:			
	02.01 Comply with all applicable basic Occupational Safety and Health Administration (OSHA) rules and regulations.			
	02.02 Use appropriate safety equipment.			
	02.03 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments and work ethics.			
03.0	Read and interpret basic construction documents and specificationsThe student will be able to:			
	03.01 Name various types of drawings used in construction documents and explain their purpose.			
	03.02 Locate sections, elevations and details indicated on the floor plan within the set of construction documents.			
	03.03 Select and use appropriate architectural scales for various drawings.			
	03.04 Identify various symbols and terminology used in construction documents.			

CTE S	Standards and Benchmarks
	03.05 Read and interpret specifications.
	03.06 Explain the scope and purpose on building codes and regulations.
04.0	Draw basic plans by handThe student will be able to:
	04.01 Draw plans and corresponding elevations, sections and details.
	04.02 Apply appropriate architectural scales to drawings.
	04.03 Apply basic building codes in drawings.
	04.04 Create door, window and finish schedules.
05.0	Read civil, architectural and mechanical, electrical and plumbing (MEP) drawingsThe student will be able to:
	05.01 Locate civil plans within a construction documents set, identify defining features and state the importance of these plans.
	05.02 Locate architectural plans within a construction documents set, identify defining features and state the importance of these plans.
	05.03 Locate mechanical plans within a construction documents set, identify defining features and state the importance of these plans.
	05.04 Locate electrical plans within a construction documents set, identify defining features and state the importance of these plans.
	05.05 Locate plumbing plans within a construction documents set, identify defining features and state the importance of these plans.
	05.06 Name types of careers associated with the development of civil, architectural and mechanical, electrical and plumbing (MEP) drawings.
06.0	Investigate careers and entry requirements within the construction pathwayThe student will be able to:
	06.01 Describe careers in design/preconstruction (e.g. managers - project managers, project engineers, estimators, superintendents; subcontractors and tradespersons - carpenters, masons, electricians, plumbers, HVAC technicians; etc.)
	06.02 Explain educational and training pathways available for these careers.
	06.03 Research and present information on a construction career including roles and responsibilities, opportunities for employment and the requirements for education and training.
07.0	Plan the construction of a model or architectural detail from a set of plansThe student will be able to:
	07.01 Calculate material quantities and costs.
	07.02 Determine the critical path as a progression of construction activities.
	07.03 Draw a bar chart depicting construction schedule.

CTE S	Standards and Benchmarks
08.0	Construct a model or architectural detail from plans and specificationsThe student will be able to:
	08.01 Use appropriate tools while demonstrating safe work practices.
	08.02 Apply proper cutting and fastening techniques for basic model materials.
09.0	Investigate careers and entry requirements within the operation and maintenance pathwayThe student will be able to:
	09.01 Describe careers in operation and maintenance (energy auditors; building inspectors; system installers - HVAC, telecommunications, security/fire, solar, etc.; maintenance technicians; hazardous materials removers; environmental engineers).
	09.02 Explain educational and training pathways necessary for these careers.
	09.03 Research and present information on an operation and maintenance career including roles and responsibilities, opportunities for employment and the requirements for education and training.
10.0	Analyze the impact of design decisions on building operations and maintenanceThe student will be able to:
	10.01 Compare life-cycle costs for various building materials and/ or systems within the built environment.
	10.02 Explain maintenance procedures for specific products or materials.
11.0	Explain sustainability issues related to the design, construction and maintenance of the built environmentThe student will be able to:
	11.01 Describe the impact of the construction industry on the natural environment.
	11.02 Identify sustainable alternatives to conventional practices.
	11.03 Identify specific practices that can lessen adverse impacts on the environment.
12.0	Identify components of network systems related to the Architecture and Construction industryThe student will be able to:
	12.01 Identify structure to access internet, including hardware and software components.
	12.02 Identify and configure user customization features in web browsers, including preferences, caching, and cookies.
	12.03 Recognize essential database concepts.
	12.04 Define and use additional networking and internet services.
13.0	Describe and use communication features of information technologyThe student will be able to:
	13.01 Define important internet communications protocols and their roles in delivering basic Internet services.
	13.02 Identify basic principles of the Domain Name System (DNS).

CTE Standards and Benchmarks				
13.03	Identify security issues related to Internet clients.			
13.04	Identify and use principles of Personal Information Management (PIM), including common applications.			
13.05	Efficiently transmit text and binary files using popular Internet services.			
13.06	Conduct a webcast and related services.			
13.07	Represent technical issues to a non technical audience.			

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The length of this course is one semester. It may be offered for two semesters when appropriate. When offered for one semester, it is recommended that it be at the exploratory level and more in-depth when offered for two semesters.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

Florida Department of Education Curriculum Framework

Course Title: Architecture and Construction Directed Study

Career Cluster: Architecture and Construction

Secondary – Career Preparatory			
Course Number	8700100		
CIP Number	0647999901		
Grade Level	11-12, 30, 31		
Standard Length	Multiple credits		
Teacher Certification	Any Certification appropriate to the students' chosen career field		
CTSO	SkillsUSA		
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml		

Purpose

The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Architecture and Construction cluster that will enhance opportunities for employment in the career field chosen by the student.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Course Structure

The content is prescribed by the instructor based upon the individual student's assessed needs for directed study.

This course may be taken only by a student who has completed or is currently completing a specific secondary job preparatory program or occupational completion point for additional study in this career cluster. A student may earn multiple credits in this course.

The selected standards and benchmarks, which the student must master to earn credit, must be outlined in an instructional plan developed by the instructor.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate expertise in a specific occupation contained within the career cluster.
- 02.0 Conduct investigative research on a selected topic related to the career cluster using approved research methodology, interpret findings, and prepare presentation to defend results.
- 03.0 Apply enhanced leadership and professional career skills.
- 04.0 Demonstrate higher order critical thinking and reasoning skills appropriate for the selected program of study.

Course Title: Architecture and Construction Directed Study

Course Number: 8700100
Course Credit: 1 credit

CTE S	Standards and Benchmarks
01.0	Demonstrate expertise in a specific occupation within the career clusterThe student will be able to:
	01.01 The benchmarks will be selected from the appropriate curriculum frameworks and determined by the instructor based upon the individual students assessed needs.
02.0	Conduct investigative research on a selected topic related to the career cluster using approved research methodology, interpret findings, and prepare presentation to defend resultsThe student will be able to:
	02.01 Select investigative study referencing prior research and knowledge.
	02.02 Collect, organize and analyze data accurately and precisely.
	02.03 Design procedures to test the research.
	02.04 Report, display and defend the results of investigations to audiences that may include professionals and technical experts.
03.0	Apply enhanced leadership and professional career skillsThe student will be able to:
	03.01 Develop and present a professional presentation offering potential solutions to a current issue.
	03.02 Enhance leadership and career skills through work-based learning including job placement, job shadowing, entrepreneurship, internship, or a virtual experience.
	03.03 Participate in leadership development opportunities available through the appropriate student organization and/or other professional organizations.
	03.04 Enhance written and oral communications through the development of presentations, public speaking, and live and/or virtual interviews.
04.0	Demonstrate higher order critical thinking and reasoning skills appropriate for the selected program of studyThe student will be able to:
	04.01 Use mathematical and/or scientific skills to solve problems encountered in the chosen occupation.
	04.02 Read and interpret information relative to the chosen occupation.
	04.03 Locate and evaluate key elements of oral and written information.
	04.04 Analyze and apply data and/or measurements to solve problems and interpret documents.

04.05 Construct charts/tables/graphs using functions and data.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Course Title: Architecture and Construction Cooperative Education OJT

Course Type: Career Preparatory

Career Cluster: Architecture and Construction

Secondary – Cooperative Education - OJT		
Course Number 8700400		
CIP Number 06469999CP		
Grade Level 9-12, 30, 31		
Standard Length	Multiple credits	
Teacher Certification Any Certification appropriate to the students' chosen career field		
CTSO SkillsUSA		
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml	

<u>Purpose</u>

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction cluster.

Each student job placement must be related to the job preparatory program in which the student is enrolled or has completed.

The purpose of this course is to provide the on-the-job training component when the **cooperative method of instruction** is appropriate. Whenever the cooperative method is offered, the following is required for each student: a training agreement; a training plan signed by the student, teacher and employer, including instructional objectives; a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks which are relevant to the occupation which the student has chosen as a career goal; and a site supervisor with a working knowledge of the selected occupation. The workstation may be in an industry setting or in a virtual learning environment. The student **must be compensated** for work performed.

The teacher/coordinator must meet with the site supervisor a minimum of once during each grading period for the purpose of evaluating the student's progress in attaining the competencies listed in the training plan.

Architecture and Construction Cooperative Education OJT may be taken by a student for one or more semesters. A student may earn multiple credits in this course. The specific student performance standards which the student must achieve to earn credit are specified in the Cooperative Education - OJT Training Plan.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- Perform designated job skills. Demonstrate work ethics. 01.0
- 02.0

Program Title: Architect Secondary Number: 8700400 **Architecture and Construction Cooperative Education OJT**

Stand	tandards and Benchmarks			
01.0	Perform designated job skillsThe student will be able to:			
	01.01 Perform tasks as outlined in the training plan.			
	01.02 Demonstrate job performance skills.			
	01.03 Demonstrate safety procedures on the job.			
	01.04 Maintain appropriate records.			
	01.05 Attain an acceptable level of productivity.			
	01.06 Demonstrate appropriate dress and grooming habits.			
02.0	Demonstrate work ethicsThe student will be able to:			
	02.01 Follow directions.			
	02.02 Demonstrate good human relations skills on the job.			
	02.03 Demonstrate good work habits.			
	02.04 Demonstrate acceptable business ethics.			

Additional Information

Special Notes

The **Cooperative Education Manual** is available on-line and has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE Website at http://www.fldoe.org/core/fileparse.php/3/urlt/steps-manual.pdf.

The occupational standards and benchmarks outlined in this secondary course correlate to the standards and benchmarks of the postsecondary course with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization(s) for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities may need additional time (beyond the regular school year) to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students.

CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml		

Purpose

The purpose of this program is to prepare students for employment or advanced training in a variety of construction electrical industries.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to planning and installing electrical wiring systems according to local codes. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of a program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8706310	Industrial Electricity 1	1 Credit		2	VO
Α	8706320	Industrial Electricity 2	1 Credit	47-3013	2	VO
	8706330	Industrial Electricity 3	1 Credit		2	VO
В	8706340	Industrial Electricity 4	1 Credit	47-2111	2	VO
	8706350	Industrial Electricity 5	1 Credit		2	VO
С	8706360	Industrial Electricity 6	1 Credit	47-2111	2	VO

Graduation Requirement Abbreviations- EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Industrial Electricity.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Industrial Electricity.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Industrial Electricity.
- 04.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 05.0 Identify, use and maintain the tools and accessories used in the electrical industry.
- 06.0 Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skills.
- 07.0 Demonstrate mathematics knowledge and skills.
- 08.0 Demonstrate an understanding of basic electricity.
- 09.0 Read and interpret basic electric codes.
- 10.0 Apply mathematics knowledge and skills to electricity.
- 11.0 Demonstrate further understanding of electricity.
- 12.0 Demonstrate science knowledge and skills.
- 13.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Industrial Electricity.
- 14.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Industrial Electricity.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Industrial Electricity.
- 16.0 Demonstrate competency in industrial wiring.
- 17.0 Demonstrate competency in transformers.
- 18.0 Demonstrate competency in Alternating-Current (AC) and Direct-Current (DC) motors.
- 19.0 Demonstrate competency in electrical and electronic control circuits and equipment.
- 20.0 Demonstrate competency in electronic circuits and devices.
- 21.0 Demonstrate competency in Programmable Logic Controllers (PLCs).

Course Title: Industrial Electricity 1

Course Number: 8706310

Course Credit:

Course Description:

This course enables students to develop the essential competencies for working in the electrical industry. These competencies include safety practices, direct-current electrical-circuit skills, appropriate communication and math skills, basic electricity and electric codes.

Florid	la Stanc	dards	Correlation to CTE Program Standard #

Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
04.0	Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance—The student will be able to:		
	04.01 Clean the work area and maintain it in a safe condition.		
	04.02 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	04.03 Identify and operate workplace-safety electrical devices.		
	04.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and know the proper precautions required for handling such materials.		
	04.05 Explain emergency procedures to follow in response to workplace accidents.		
	04.06 Create a disaster and/or emergency response plan.		
	04.07 Demonstrate knowledge of CPR (cardiopulmonary resuscitation) and first aid.		
	04.08 Describe "Right-to-Know" Law as recorded in (29 CFR.1910.1200)		
05.0	Identify, use and maintain the tools and accessories used in the electrical industryThe student will be able to:		
	05.01 Identify and select tools, equipment, materials, and wires to complete a job.		
	05.02 Drill holes in metal, wood, and concrete for electrical wiring.		
	05.03 Lay out electrical devices, complying with regulations.		
	05.04 Install the following, complying with the appropriate local, state, or national electric codes:		

CTE S	a. Conductors and cable b. Standard outlets and switch boxes c. Explain cord connections on major appliances d. Cords switches, receptacles, and dimmers, including a single-pole switched lighting circuit, a three-way switched lighting circuit, and a four-way combination circuit.	FS-M/LA	NGSSS-Sci
06.0	Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skillsThe student will be able to:		
	06.01 Define the terms "voltage," "current," "resistance," "power," and "energy."		
	06.02 Measure voltage, amperage, and resistance, using a Volt-Ohm Meter (VOM) and a Digital Volt-Ohm Meter (DVM).		
	06.03 Analyze, and explain a series, series-parallel, and parallel circuit.		
	06.04 Draw each type of circuit and calculate the circuit values.		
	06.05 Explain and apply Ohm's Law.		
	06.06 Compute conductance and resistance of conductors and insulators.		
07.0	Demonstrate mathematics knowledge and skillsThe student will be able to:		
	07.01 Demonstrate knowledge of arithmetic operations.		
	07.02 Analyze and apply data and measurements to solve problems and interpret documents.		
	07.03 Construct charts/tables/graphs using functions and data.		
08.0	Demonstrate an understanding of basic electricityThe student will be able to:		
	08.01 Explain the principles of electromagnetism.		
	08.02 Explain the magnetic properties of circuits and devices.		
	08.03 Relate electricity to the nature of matter.		
	08.04 Describe various ways that electricity is produced.		
09.0	Read and interpret basic electric codesThe student will be able to:		
	09.01 Describe the importance of following the local, state and national electric codes.		
	09.02 Read and interpret basic electric codes, wiring plans and specifications.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
09.03 Identify licensure requirements for electrical occupations.		
09.04 Demonstrate knowledge of National Fire Protection Agency (NFPA) 70E and how it relates to job safety.		

Course Title: Industrial Electricity 2

Course Number: 8706320

Course Credit: 1

Course Description:

This course enables students to develop competencies related to math and science applications in electricity.

Florid	la Stand	dards		Correlation to CTE Program Standard #
Horic	a Otalii	aar ao	LAFS.910.RST.2.6	
	01.03	Integration o	f Knowledge and Ideas	
		01.03.1	Translate quantitative or technical information expressed in words in a	
			text into visual form (e.g., a table or chart) and translate information	
			expressed visually or mathematically (e.g., in an equation) into words.	
			LAFS.910.RST.3.7	
		01.03.2	Assess the extent to which the reasoning and evidence in a text support	
			the author's claim or a recommendation for solving a scientific or	
			technical problem.	
			LAFS.910.RST.3.8	
		01.03.3	Compare and contrast findings presented in a text to those from other	
			sources (including their own experiments), noting when the findings	
			support or contradict previous explanations or accounts.	
	04.04	D (D	LAFS.910.RST.3.9	
	01.04		eading and Level of Text Complexity	
		01.04.1	By the end of grade 9, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			9–10 text complexity band proficiently, with scaffolding as needed at the	
		01.04.2	high end of the range. By the end of grade 10, read and comprehend literature [informational	
		01.04.2	texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 9–10 text complexity band independently and proficiently.	
			LAFS.910.RST.4.10	
02.0	Metho	ds and strated	gies for using Florida Standards for grades 09-10 writing in Technical	
02.0			success in Industrial Electricity.	
		Text Types a		
		02.01.1	Write arguments focused on discipline-specific content.	
			LAFS.910.WHST.1.1	
		02.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
			LAFS.910.WHST.1.2	
	02.02		and Distribution of Writing	
		02.02.1	Produce clear and coherent writing in which the development,	
			organization, and style are appropriate to task, purpose, and audience.	
			LAFS.910.WHST.2.4	
		02.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
			rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
		00.00.0	LAFS.910.WHST.2.5	
		02.02.3	Use technology, including the Internet, to produce, publish, and update	

Florid	a Stanc	lards		Correlation to CTE Program Standard #
rioria	a Otarre	iarao	individual or shared writing products, taking advantage of technology's	
			capacity to link to other information and to display information flexibly	
			and dynamically.	
			LAFS.910.WHST.2.6	
	02.03		Build and Present Knowledge	
		02.03.1	Conduct short as well as more sustained research projects to answer a	
			question (including a self-generated question) or solve a problem; narrow	
			or broaden the inquiry when appropriate; synthesize multiple sources on	
			the subject, demonstrating understanding of the subject under investigation.	
			LAFS.910.WHST.3.7	
		02.03.2	Gather relevant information from multiple authoritative print and digital	
		02.00.2	sources, using advanced searches effectively; assess the usefulness of	
			each source in answering the research question; integrate information	
			into the text selectively to maintain the flow of ideas, avoiding plagiarism	
			and following a standard format for citation.	
			LAFS.910.WHST.3.8	
		02.03.3	Draw evidence from informational texts to support analysis, reflection,	
			and research.	
	02.04	Range of Writ	LAFS.910.WHST.3.9	
	02.04	02.04.1	Write routinely over extended time frames (time for reflection and

Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
10.0	Apply mathematics knowledge and skills to electricityThe student will be able to:		
	10.01 Demonstrate Solve basic algebraic formulas related to electricity.		
	10.02 Solve basic trigonometric functions related to electrical theory.		
	10.03 Explain basic AC theory and solve related mathematical problems using appropriate test equipment.		
	10.04 Solve math-related problems from measurements on training aids. (Optional)		
11.0	Demonstrate further understanding of electricityThe student will be able to:		
	11.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	11.02 Explain how voltage is produced by chemical, mechanical, thermal, photoelectric and piezo electric means.		
	11.03 Identify electrical symbols in construction documents.		
12.0	Demonstrate science knowledge and skillsThe students will be able to:		
	12.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	12.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
18.0	Demonstrate competency in Alternating-Current (AC) and Direct-Current (DC) motorsThe student will be able to:		
	18.01 Install and connect the following types of DC motors:		
	a. Series		
	b. Shunt		
	c. Compound		
	18.02 Install and connect the following types of single phase AC motors:		
	a. Capacitor-start		
	b. Capacitor-start and run		
	c. Split-phase inductor		
	d. Universal		
	e. Repulsion-start, induction-run		
	18.03 Install and connect the following types of three phase AC motors:		
	a. Squirrel-cage induction		
	b. Wound-rotor		
	c. Synchronous		
	18.04 Demonstrate the ability to select and connect a three-phase induction motor for either		
	high or low voltage requirements.		
19.0	Demonstrate competency in electrical and electronic control circuits and equipmentThe		
	student will be able to:		
	19.01 Draw an elementary motor control ladder diagram.		
	19.02 Interpret symbols, read and troubleshoot from schematics and ladder diagrams.		
	19.03 Describe the operation of the following overload relays:		
	a. Thermal		
	b. Magnetic		

CTE Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	c. Thermal-magnetic		
19.04	Install a manual single phase and three phase control station.		
19.05	Install a three-phase magnetic starter.		
19.06	Install the following control devices: a. Start/stop station b. Forward/reverse/stop station c. Hands/off/auto station d. Start/jog/stop station e. Limit switches f. Pressure, temperature, level, and float switches g. Pilot, run, and stop indicator lights h. Control relay, and timing relays i. Multi-motor push-button station		
19.07	Install, operate, and troubleshoot the following relay control circuits: a. Start/stop b. Forward/reverse c. Hands-off-auto d. Start/jog e. Automatic timed sequence, "ON" and "OFF" delays f. Manually timed sequence, "ON" and "OFF" delays g. Plugging		

Course Title: Industrial Electricity 5

Course Number: 8706350

Course Credit: 1

Course Description:

This course enables student to develop competencies related to electronic circuits and devices.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
20.0	Demonstrate competency in electronic circuits and devicesThe student will be able to:		
	20.01 Explain the principles of operation of the following devices: a. Rectifiers and diodes b. Transistors, PNP and NPN c. Operational amplifiers d. Logic gates e. 555 timers f. DC power supplies g. Inductive, capacitive and magnetic proximity switches h. Photoelectric-eyes i. Infrared scanners (bar-code) j. Ultra-sonic sensors		
	20.02 Demonstrate competency in using the following test equipment: a. Oscilloscope b. True RMS voltmeter c. Signal generator d. LCR meter e. Logic probe f. Function generator g. Frequency counter		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
 20.03 Conduct, test and troubleshoot the following: a. Half and full-wave DC power supplies b. A filtered full-wave regulated DC power supply c. Logic circuits (e.g. and, or, not, exclusive or, exclusive nor) d. Operational amplifier circuit e. Timing circuit using a 555 timer f. Common base, common collector, and common emitter transistor circuits for both NPN and PNP transistors 		
20.04 Describe and write a simple Boolean equation.		
20.05 Explain and demonstrate proper shielding and grouping methods.		

Course Title: Industrial Electricity 6

Course Number: 8706360

Course Credit:

Course Description:

This course enables students to develop competencies related to programmable logic controllers.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

Note: This course is pending alignment in the following categories: FS-M/LA and NGSSS-Sci.

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
21.0	Demonstrate competency in Programmable Logic Controllers (PLCs)The student will be able to:		
	21.01 Name the basic components of a PLC.		
	21.02 Explain the operation of the following: a. Input modules b. Output modules c. Power supply d. Central Processing Unit (CPU) e. Programming device		
	21.03 Explain typical memory structure and the terms, ROM, RAM, EEPROM, Bit, Byte, Word and Double-word.		
	21.04 Explain the following numbering systems and demonstrate ability to convert from one to another. a. Decimal b. Binary c. Octal d. Hexadecimal		
	21.05 Explain how digital logic gate devices are used in programming.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
21.06 Connect, test and operate the following input devices to the PLC: a. Pushbuttons (NC and NO) b. Proximity switches (capacitive and inductive) c. Photo-eyes (NC and NO) d. On/off switches e. Analog (4-20 ma and 0-10v) devices		
21.07 Connect, test and operate the following output devices: a. Indicator lights b. Magnetic motor contractors c. Solenoid operated valves		
21.08 Demonstrate the ability to access the PLC software and monitor an operating program.		
21.09 Write, debug, download and run the following application programs: a. Basic start/stop operation b. Forward/reverse operation c. Timed sequence operation d. Counting operation e. Shift register operation f. Word transfer operation g. Analog input/output operation h. Jump instruction operation i. Set-reset operation j. Compare values operation k. Compute values operation		
21.10 Demonstrate the ability to address inputs and outputs in programming language.		
21.11 Demonstrate the ability to edit and existing operational program, document changes and save changes to a file.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml		

Purpose

The purpose of this program is to prepare students for employment in the carpentry and cabinetmaking industry with a stress on basic cabinet making skills.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to developing carpentry and cabinetmaking skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for additional training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
	8722110	Carpentry & Cabinetmaking 1	1 Credit		2
Α	8722120	Carpentry & Cabinetmaking 2	1 Credit	47-3012	2
В	8722130	Carpentry & Cabinetmaking 3	1 Credit	51-7011	3
	8720140	Cabinetmaking 4	1 Credit		2
С	8720150	Cabinetmaking 5	1 Credit	51-7011	2

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 04.0 Apply shop safety skills.
- 05.0 Utilize manual and power tools relevant to the carpentry and cabinetmaking professions.
- 06.0 Demonstrate mathematics knowledge and skills relevant to the carpentry and cabinetmaking field.
- 07.0 Create basic construction drawings and/or sketches.
- 08.0 Recommend appropriate building materials for specific scenarios.
- 09.0 Select appropriate fasteners and hardware for specific scenarios.
- 10.0 Apply occupational safety skills.
- 11.0 Select and use hand and power tools relevant to the carpentry and cabinetmaking profession.
- 12.0 Fasten stock and joints.
- 13.0 Read and design construction documents.
- 14.0 Install cabinets and components.
- 15.0 Investigate sustainability issues related to the carpentry and cabinetmaking professions.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 19.0 Identify and describe interior and exterior doors (wood and/or metal).
- 20.0 Install trim and finish carpentry using plans and specifications.
- 21.0 Cut and install framing members for a floor (wood and/or metal).
- 22.0 Cut and install a wall and partition framing (wood and/or metal).
- 23.0 Install an interior wall and ceiling materials.
- 24.0 Lay out and construct an interior-stair system.
- 25.0 Explain the importance of employability and entrepreneurship skills.
- 26.0 Prepare cabinets for finish.
- 27.0 Apply finishes.
- 28.0 Install cabinets.
- 29.0 Apply laminates.

Course Title: Carpentry and Cabinetmaking 1

Course Number: 8722110

Course Credit: 1

Course Description:

The purpose of this course is for the student to develop competencies essential to the carpentry and cabinetmaking industry. These competencies include safety, use of manual and power tools, applied math, plan reading, building materials, fasteners and hardware.

Course Title: Carpentry and Cabinetmaking 3

Course Number: 8722130

Course Credit: 1

Course Description:

This course provides students with a more in-depth knowledge of trim and finish carpentry, as well as an introduction to rough carpentry. Students will further their understanding of plan and specifications, assemble and install cabinetry, install doors, frame floors and walls and construct stairs.

	25.04 Maintain a career portfolio to document knowledge, skills and experience.		
	25.05 Evaluate and compare employment opportunities that match career goals.		
	25.06 Identify and exhibit traits for retaining employment.		
	25.07 Identify opportunities and research requirements for career advancement.	LAFS.1112.W.3.7	
	25.08 Research the benefits of ongoing professional development.	LAFS.1112.W.3.7	
	25.09 Examine and describe entrepreneurship opportunities as a career planning option.	LAFS.1112.W.3.7 LAFS.1112.RI.1.1	
26.0	Prepare cabinets for finishThe student will be able to:		
	26.01 Fill nail and screw holes.		
	26.02 Install wood plugs in prepared holes.		
	26.03 Sand a cabinet and joints for finish.		
	26.04 Select and apply proper filler.		
	26.05 Sand wood surfaces for finishing.		
	26.06 Stain, bleach, fill and seal wood surfaces as needed.		

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
27.0	Apply	finishesThe student will be able to:		
	27.01	Apply various types of finishes including lacquer-based, water-based, oil-based, enamel and polyurethane.		
	27.02	Apply the types of finishes that the local market demands.		
	27.03	Observe safety precautions when applying finishes, including wearing respirator and protective clothing approved by National Institute of Occupational Safety and Health (NIOSH)		

Course Title: Cabinetmaking 5

Course Number: 8720150

Course Credit: 1

Course Description:

This course is designed to provide students with the competencies needed and provides students with the in-depth training in the installation and lamination of cabinets.

Abbreviations:

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
28.0	Install cabinetsThe student will be able to:		
	28.01 Load and secure casework for hauling.		
	28.02 Check walls and floors for level and plumb.		
	28.03 Determine fasteners for block or walls.		
	28.04 Install upper and lower cabinets and other casework.		
	28.05 Fasten a suspended cabinet unit to ceiling.		
	28.06 Install countertops, including sink cutouts and back splash.		
	28.07 Cut and install molding and trim.		
	28.08 Adjust doors and drawers.		
	28.09 Clean work site.		
29.0	Apply laminatesThe student will be able to:		
	29.01 Lay out and cut core stock to specifications.		
	29.02 Lay out and cut laminate to specification.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
29.03 Apply adhesive.		
29.04 Apply laminate to core stock.		
29.05 Trim and file plastic laminate edges.		
29.06 Clean laminated surfaces.		
29.07 Laminate a curved surface.		
29.08 Repair laminate defects.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly

indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

<u>Purpose</u>

The purpose of this program is to prepare students for employment or advanced training in the building construction industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster.

The content includes but is not limited to developing skills in various construction trades, as well as providing a foundation in construction management. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at the first occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation
						Requirement
	8720310	Building Construction Technologies 1	1 Credit		2	VO

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Building Construction Technologies.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Building Construction Technologies.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Building Construction Technologies.
- 04.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 05.0 Investigate the construction industry and explore related occupations.
- 06.0 Select and use basic hand tools.
- 07.0 Select and use power tools and describe their proper operation.
- 08.0 Demonstrate mathematics knowledge and skills relevant to the construction industry.
- 09.0 Demonstrate carpentry skills.
- 10.0 Read and interpret construction drawings.
- 11.0 Frame floor systems based on drawing and specification requirements.
- 12.0 Frame walls and ceilings based on drawing and specification requirements.
- 13.0 Frame a roof based on drawing and specification requirements.
- 14.0 Analyze construction components, materials, hardware and characteristics.
- 15.0 Demonstrate masonry skills.
- 16.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 17.0 Place concrete.
- 18.0 Lay masonry units.
- 19.0 Demonstrate science knowledge and skills.
- 20.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Building Construction Technologies.
- 21.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Building Construction Technologies.
- 22.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Building Construction Technologies.
- 23.0 Create construction documents, contract documents and specifications.
- 24.0 Select the appropriate heavy equipment for a given task.
- 25.0 Identify local, state and federal codes and regulations.
- 26.0 Perform site preparation and maintenance.
- 27.0 Estimate project costs and schedule construction activities for a specific job.
- 28.0 Investigate sustainability issues related to the design, construction and maintenance of the built environment.
- 29.0 Install roofing materials.
- 30.0 Install exterior finishes.

- 31.0 Explain the importance of employability and entrepreneurship skills.
- 32.0 Demonstrate interior carpentry skill.
- 33.0 Install cabinets.
- 34.0 Prepare and apply finishes to surfaces.
- 35.0 Build stairs.
- 36.0 Troubleshoot, repair and install plumbing systems.
- 37.0 Demonstrate knowledge of drain, waste and vent (DWV) systems.
- 38.0 Measure, cut and join plastic piping.
- 39.0 Properly measure, ream, cut and join copper piping.
- 40.0 Troubleshoot, repair and install electrical systems.
- 41.0 Demonstrate electrical safety.
- 42.0 Research the heating, ventilation and air-cooling (HVAC) profession.
- 43.0 Maintain, repair and install heating, ventilation and air-cooling (HVAC) systems.

Course Title: Building Construction Technologies 1

Course Number: 8720310

Course Credit: 1

Course Description:

The purpose of this course is to develop the competencies essential to the building construction industry. These competencies include skills and knowledge related to safety practices, the proper use of hand and power tools, plan reading, basic rough carpentry and framing.

Florid	a Stanc	lards		Correlation to CTE Program Standard #

10.0	Read and interpret construction drawingsThe student will be able to:		
	10.01 Identify basic construction drawing terms, components and symbols.		
	10.02 Locate sections, elevations and details to their location on the plan view.		
	10.03 Use drawing dimensions to layout a construction project,	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.1.1	
	10.04 Read architectural scales.		
11.0	Frame floor systems based on drawing and specification requirementsThe student will be able to:		
	11.01 Identify floor and sill framing and support members.		
	11.02 Name the methods used to fasten sills to the foundation.		
	11.03 Select the proper girder/beam and joist size from a list, given specific floor load and span data.		
	11.04 Identify different types of floor joists.		
	11.05 Identify different types of bridging.		
	11.06 Identify different types of flooring materials.		
	11.07 Explain the purposes of subflooring and underlayment.	LAFS.910.W.2.4 LAFS.910.SL.2.4 LAFS.910.RI.1.3	
	11.08 Match selected fasteners used in floor framing to their correct uses.		
	11.09 Estimate the amount of material needed to frame a floor assembly.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
	11.10 Demonstrate the ability to:		

CTE Standards and Benchmarks	FS-M/LA NGSSS-Sci
a. Lay out and construct a floor assembly	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
b. Install bridging	MAFS.912.N-Q.1.1,2,3
c. Install joists for a cantilever floor	MAFS.912.N-Q.1.1,2,3
d. Install a subfloor using butt-joint plywood/OSB panels	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
e. Install a single floor system using tongue-and-groove plywood/OSB panel	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
12.0 Frame walls and ceilings based on drawing and specification requirementsThe studable to:	dent will be
12.01 Identify the components of a wall and ceiling layout.	
12.02 Lay out a wood frame wall, including plates, corner posts, door and window o partition Ts, bracing and firestops.	ppenings, MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
12.03 Describe the correct procedure for assembling and erecting an exterior wall.	LAFS.910.W.2.4 LAFS.910.SL.2.4
12.04 Identify the common materials and methods used for installing sheathing on v	walls.
12.05 Lay out, assemble, erect and brace exterior walls for a frame building.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
12.06 Describe wall framing techniques used in masonry construction.	LAFS.910.W.2.4 LAFS.910.SL.2.4 LAFS.910.RI.1.3
12.07 Explain the use of metal studs in wall framing.	LAFS.910.W.2.4 LAFS.910.SL.2.4 LAFS.910.RI.1.3
12.08 Demonstrate correct procedure for laying out ceiling joists.	
12.09 Cut and install ceiling joists on a wood frame building.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
12.10 Estimate the materials required to frame walls and ceilings.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3
13.0 Frame a roof based on drawing and specification requirementsThe student will be a	able to:

CTE Standard	ds and Benchmarks	FS-M/LA	NGSSS-Sci
13.01	Define the terms associated with roof framing.	LAFS.910.RI.2.4	
13.02	Identify the roof framing members used in gable and hip roofs.		
13.03	Calculate the length of a rafter using various methods.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3	
13.04	Identify the various types of trusses used in roof framing.		
13.05	Use a rafter framing square, speed square and calculator in laying out a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GMD.1.1 MAFS.912.G-GMD.2.4 MAFS.912.G-CO.4.12	
13.06	Identify various types of sheathing used in roof construction.		
13.07	Frame a gable roof with vent openings.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3	
13.08	Frame a roof opening.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-GPE.2.6 MAFS.912.G-MG.1.3	
13.09	Erect a gable roof using trusses.		
13.10	Estimate the materials used in framing and sheathing a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	

Course Title: Building Construction Technologies 2

Course Number: 8720320

Course Credit: 1

Course Description:

The purpose of this course is to develop the competencies necessary for the building, construction and repair industry. These competencies relate to construction components, materials and hardware, concrete and masonry skills.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student si	es for using Florida Standards for grades 09-10 reading in Technical uccess in Building Construction Technologies.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question

	chemicals and hazardous materials, and demonstrate knowledge of the proper precautions required for handling such materials.		
19.05	Explain pressure measurement in terms of PSI and inches of mercury.	MAFS.912.G-MG.1.2	
19.06	Explain and demonstrate the use of electrical-system testing devices.		

Course Title: Building Construction Technologies 3

Course Number: 8720330

Course Credit: 1

Course Description:

This course is designed to provide students with a more in-depth knowledge of construction documents, as well as competencies in construction management. These include heavy equipment selection, knowledge of codes and regulations, site preparation, estimating, scheduling and knowledge of sustainability issues relevant to the construction industry.

Floric	da Standar	ds	Correlation to CTE Program Standard #
20.0		and strategies for using Florida Standards for grades 11-12 reading in Technical	
		for student success in Building Construction Technologies.	
	20.01 K	ey Ideas and Details	
	a.	Cite specific textual evidence to support analysis of science and technical texts,	
		attending to important distinctions the author makes and to any gaps or	
		inconsistencies in the account.	
		LAFS.1112.RST.1.1	
	b.	Determine the central ideas or conclusions of a text; trace the text's explanation or	
		depiction of a complex process, phenomenon, or concept; provide an accurate	
		summary of the text.	
		LAFS.1112.RST.1.2	
	C.	Follow precisely a complex multistep procedure when carrying out experiments,	
		taking measurements, or performing technical tasks, attending to special cases or	
		exceptions defined in the text.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training - OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Painting and Decorating Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	Secondary – Career Preparatory		
Program Number	8721500		
CIP Number	0646040800		
Grade Level	9-12, 30, 31		
Standard Length	4 Credits		
Teacher Certification	TEC CONSTR ¶ 7 ¶ G BLDG CONST ¶ 7 ¶ G PAINTING 7G		
CTSO	SkillsUSA		
SOC Codes (all applicable)	47-2141 - Painters, Construction and Maintenance		
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml		

<u>Purpose</u>

The purpose of this program is to prepare students for employment as painters.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to safe and efficient work practices, materials and cost estimates, surface preparation, paint mixing and matching, application procedures, special effects, wall covering application, blueprint reading, ladder and scaffold erection and use, selection, application and care of materials, use of hand and power tools, and use of current industry standards, practices and techniques.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of one occupational completion point (OCP).

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8721510	Painting 1	1 Credit		2	VO
	8721520	Painting 2	1 Credit		2	VO
	8721530	Painting and Decorating 3	1 Credit		2	PA
Α	8721540	Painting and Decorating 4	1 Credit	47-2141	2	VO

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Painting and Decorating.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Painting and Decorating.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Painting and Decorating.
- 04.0 Work safely.
- 05.0 Select, use and care for tools, equipment, scaffolding and ladders.
- 06.0 Prepare surfaces.
- 07.0 Select materials and products for a painting/ decorating project.
- 08.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 09.0 Use chemical stripping and cleaning solutions.
- 10.0 Estimate cost and provide quotations.
- 11.0 Demonstrate mathematics knowledge and skills.
- 12.0 Demonstrate proper application of materials used in painting using brushes, rollers and sprayers.
- 13.0 Mix colors and match samples.
- 14.0 Demonstrate science knowledge and skills.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Painting and Decorating.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Painting and Decorating.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Painting and Decorating.
- 18.0 Apply stains, varnishes, lacquers and acrylics.
- 19.0 Advise on suitability of different materials.
- 20.0 Fit and apply wallpaper.
- 21.0 Explain the importance of employability and entrepreneurship skills.

Course Title: Painting 1 Course Number: 8721510

Course Credit: 1

Course Description:

This course focuses on safety, surface preparation, estimating and selection of appropriate tools and materials.

	06.08 Prepare masonry surfaces for coatings.		
	06.09 Review, discuss, and demonstrate the proper applications and safety procedures for hazardous chemicals and equipment.		
07.0	Select materials and products for a painting/ decorating projectThe student will be able to:		
	07.01 Explain the criteria for selection and use of water and chemical based coatings.		
	07.02 Select brushes, roller covers and spray equipment for coatings to be used.		
	07.03 Apply various finishes to drywall including faux finishes, textures and popcorn.		
	07.04 Use and maintain tools and equipment to facilitate the creative process.		
	07.05 Assess the challenges and outcomes associated with the media used in a variety of one's own works.		
08.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance-The students will be able to:		
	08.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	08.02 Explain emergency procedures to follow in response to workplace accidents.		
	08.03 Create a disaster and/or emergency response plan.		
	08.04 Demonstrate knowledge of the "Right-To-Know Law" as recorded in (29 CFR-1910.1200).		
09.0	Use chemical stripping and cleaning solutionsThe student will be able to:		
	09.01 Remove a finish or coating from a surface using a chemical solution.		
	09.02 Use prepared solutions to clean a surface.		
	09.03 Apply rust inhibitors to metal surfaces.		
	09.04 Apply the critical-thinking and problem-solving skills to develop creative solutions for projects.		
10.0	Estimate cost and provide quotationsThe student will be able to:		
	10.01 Compute number of rolls of wallpaper required for a specified job.		

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	10.02	Compute amount of paint for a specified job.		
	10.03	Work in a team to develop and revise job estimates for clients while showing artistic cohesiveness, team-building, respectful compromise, and time-management skills.		
11.0	Demo	nstrate mathematics knowledge and skillsThe students will be able to:		
	11.01	Demonstrate knowledge of arithmetic operations.		
	11.02	Analyze and apply data and measurements to solve problems and interpret documents.		
	11.03	Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.		
	11.04	Measure tolerance(s) on horizontal and vertical surfaces using feet and inches.		
	11.05	Add, subtract, multiply and divide using fractions, decimals and whole numbers.		
	11.06	Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.		
	11.07	Demonstrate an understanding of federal, state and local taxes and their computation.		
	11.08	Investigate the use of space, scale, and environmental features of a structure to create three-dimensional form or the illusion of depth and form.		
	11.09	Analyze challenges and identify solutions for three-dimensional structural problems.

12.0	Demonstrate proper application of materials used in painting using brushes, rollers and		
	sprayersThe student will be able to:		
	12.01 Paint a surface using a brush.		
	12.02 Paint trim with a brush.		
	12.03 Paint a surface with a roller.		
	12.04 Spray paint a surface.		
13.0	Mix colors and match samplesThe student will be able to:		
	13.01 Identify fundamental colors.		
	13.02 Explain the process of mixing to arrive at custom colors or tints.		
	13.03 Mix paint to match a given sample.		
	13.04 Develop color-mixing skills and techniques through application of the principles of heat properties and color and light theory.		
	13.05 Use critical-thinking skills for various contexts to develop, refine, and reflect on a theme.		
14.0	Demonstrate science knowledge and skillsThe student will be able to:		
	14.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	14.02 Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	14.03 Demonstrate visual-thinking skills to process the challenges and execution of a creative endeavor.		

CTE Standard	ds and Benchmarks	FS-M/LA	NGSSS-Sci
14.04	Incorporate skills, concepts, and media to create images from ideation to resolution.		
14.05	Formulate scientifically investigable questions, construct investigations, collect and evaluate data, and develop scientific recommendations based on findings.		
14.06	Identify health-related problems, which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.		
14.07	Understand pressure measurement in terms of PSI and KPA.		

Course Title: Painting and Decorating 3

Course Number: 8721530

Course Credit: 1

Course Description:

This course focuses on determining the suitability for various finish materials as well as the application of stains, varnishes, lacquers and acrylics.

earnings.			

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Program Title: Plumbing Technology Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	Secondary – Career Preparatory
Program Number	8721600
CIP Number	0646050302
Grade Level	9-12, 30, 31
Standard Length	7 Credits
Teacher Certification	PLUMBIN @7 7G BLDG CONST ¶ 7 ¶ G TEC CONSTR ¶ 7 ¶ G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-3015 - Helpers—Pipelayers, Plumbers, Pipefitters, and Steamfitters 47-2152 - Plumbers, Pipefitters, and Steamfitters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of the programs in this cluster is to prepare students for employment or advanced training in a variety of pipe occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to reading construction documents, understanding building codes in the pipe trades, plumbing pipe-cutting-and-joining skills and plumbing layout and installation. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8721610	Plumbing Technology 1	1 Credit		2	VO
		, ,				_
Α	8721620	Plumbing Technology 2	1 Credit	47-3015	2	VO
	8721630	Plumbing Technology 3	1 Credit		2	VO
В	8721640	Plumbing Technology 4	1 Credit	47-2152	2	VO
	8721650	Plumbing Technology 5	1 Credit		2	VO
С	8721660	Plumbing Technology 6	1 Credit	47-2152	2	VO
D	8721670	Plumbing Technology 7	1 Credit	47-2152	2	VO

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

[#] Alignment attempted, but no correlation to academic course

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Plumbing.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Plumbing.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Plumbing.
- 04.0 Describe career and training opportunities in the pipe-trade industry.
- 05.0 Demonstrate a basic knowledge of the pipe-trade industry.
- 06.0 Identify the use and care of basic tools in the pipe-trade industry.
- 07.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 08.0 Demonstrate mathematics knowledge and skills.
- 09.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 10.0 Read and interpret construction documents.
- 11.0 Read and interpret basic pipe-trade codes.
- 12.0 Demonstrate knowledge of basic plumbing skills.
- 13.0 Cut and join pipes.
- 14.0 Demonstrate knowledge of plumbing codes.
- 15.0 Read and interpret construction documents and specifications.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Plumbing.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Plumbing.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Plumbing.
- 19.0 Lay out and coordinate a job.
- 20.0 Install first rough (underground).
- 21.0 Install second rough (first floor and above).
- 22.0 Trim out plumbing.
- 23.0 Explain the importance of employability and entrepreneurship skills.
- 24.0 Install hot-water-heating and circulating-systems.
- 25.0 Install interceptors and separators.
- 26.0 Install a storm drainage system.
- 27.0 Explain the principles of backflow cross and connection control.
- 28.0 Explain the process of installing a medical gas system. (optional)
- 29.0 Explain how Liquid Propane Gas (LPG) system works.
- 30.0 Repair, service and maintain plumbing systems.
- 31.0 Explain how to connect residential plumbing to a municipal sewer line. (optional)

Course Title: Plumbing Technology 1

Course Number: 8721610

Course Credit: 1

Course Description:

The purpose of this course is to develop the competencies essential to pipe trades. These competencies relate to career and training opportunities, the use and care of tools and safety precautions.

15.0	Demonstrate knowledge of basic plumbing skillsThe student will be able to:		
	15.01 Explain the basic theory and principles of plumbing.		
	15.02 Identify:		
	a. Pipe and fitting		
	b. Pipe-joining methods		
	c. Plumbing fixtures, appliances, materials and equipment		
	d. Valves by type, size, materials and application		
16.0	Cut and join pipesThe student will be able to:		
	16.01 Join different types of pipes (including PVC, galvanized, steel, plastic, copper and castiron pipes) according to plumbing codes and specifications using various methods including brazing, clamping, compression, threading, flange, flaring, gasket joint, gluing, soldering and welding.		
	16.02 Measure, mark and cut different types of pipes using various pipe cutters including one- and four-wheel steel pipe cutters, hack saw, tubing cutter and cutting torch.		
	16.03 Thread a steel pipe with a power-driven vise stand or a pipe-threading machine.		
	16.04 Demonstrate proficiency in using the tools, following safety practices and procedures.		
17.0	Demonstrate knowledge of plumbing codesThe student will be able to:		
	17.01 Describe and explain the purpose of plumbing codes.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	17.02 Apply the basic theory and principles of plumbing in relation to the codes.		
	17.03 Read and locate information in the applicable plumbing codes.		
	17.04 Define and explain the terms used in the plumbing codes.		
	17.05 Explain why the code may supersede the manufacturer's specifications.		
18.0	Read and interpret construction documents and specificationsThe student will be able to:		
	18.01 Recognize and identify plumbing symbols.		
	18.02 Identify basic plumbing systems from the blueprint.		
	18.03 From the blueprints and specifications, identify the plumbing fixtures and materials required for the plumbing job.		
	18.04 Relate the blueprint to all applicable (local, state and federal) plumbing codes.		
	18.05 Cross-reference all working drawings to determine the location and elevation of the piping system and duct work.		
	18.06 Demonstrate trade-related computer skills for blueprints and specifications.		
19.0	Lay out and coordinate a jobThe student will be able to:		
	19.01 Identify specifications.		
	19.02 Make a list of materials required to lay out a job.

Course Title: Plumbing Technology 5

Course Number: 8721650

Course Credit: 1

Course Description:

This course is designed to provide students with competencies relating to installing hot water heating, interceptors and separators.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
24.0	Install hot-water-heating and circulating systems The student will be able to:		
	24.01 Explain the basic theory of domestic hot-water-heating.		
	24.02 Design, size and lay out a system.		
	24.03 Identify the equipment and materials needed for the job in accordance with job specifications and plumbing codes.		
	24.04 Test and inspect the system.		
25.0	Install interceptors and separatorsThe student will be able to:		
	25.01 Identify and explain various types of interceptors and separators.		
	25.02 Explain the theory and function of various interceptors and separators.		
	25.03 Install and maintain lint and grease traps, gas and oil separators, sand and sediment interceptors.		

Course Title: Plumbing Technology 6

Course Number: 8721660

Course Credit: 1

Course Description:

This course is designed to provide students with competencies in installing storm drainage, backflow and cross connection control.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
26.0	Install a storm-drainage systemThe student will be able to:		
	26.01 Explain the theory of roof drains, leaders and the storm-drainage system.		
	26.02 Size and lay out a storm-drainage system.		
	26.03 Identify and select the materials needed to install a storm-drainage system in accordance with job specifications and plumbing codes.		
	26.04 Lay out a job on site according to job specifications and plumbing codes, coordinating with other trades.		
	26.05 Install distribution systems.		
	26.06 Illustrate roof drains, leaders and drainage systems.		
	26.07 Test and inspect the systems.		
27.0	Explain the principles of backflow and cross-connection controlThe student will be able to:		
	27.01 Define backflow and cross-connection control.		
	27.02 Describe the importance of backflow and cross-connection control to the health of the public.		
	27.03 Identify the proper devices and assemblies for individual applications.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
27.04 Explain the "degree of hazard" principle and how it relates to the installation of devices		
and assemblies.		

Course Title: Plumbing Technology 7

Course Number: 8721670

Course Credit: 1

Course Description:

This course is designed to provide students with more in-depth study of trimming out plumbing and developing positive customer-relations skills.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
28.0	Explain the process of installing a medical gas system (optional)The student will be able to:		
	28.01 Explain procedures for:		
	 a. Installing a medical gas system in a health-care facility according to applicable plumbing codes 		
	b. Connecting medical equipment, safety devices and controls		
	 Testing and inspecting medical gas systems to make sure there is no cross connection and the system is pure 		
29.0	Explain how a Liquid Propane Gas (LPG) system worksThe student will be able to:		
	29.01 Identify materials required for LPG installation.		
	29.02 Explain how to size and lay out a job on site according to plumbing codes and specifications codes.		
	29.03 Explain distribution systems, including equipment, safety devices and controls.		
	29.04 Explain how to inspect the systems.		
30.0	Repair, service and maintain plumbing systemsThe student will be able to:		
	30.01 Troubleshoot and diagnose plumbing systems.		

CTE S	andards and Benchmarks	FS-M/LA	NGSSS-Sci
	30.02 Repair and replace water service and sanitary lines.		
	30.03 Repair and replace water closets, ball cocks, flush valves, floats, lift rods, ball stoppers and trip levers.		
	30.04 Repair leaks in traps and faucets.		
	30.05 Repair and replace sink strainers.		
	30.06 Repair and replace water heaters.		
	30.07 Replace and repair fixture water-supply pipes.		
	30.08 Reseal water closets to flanges.		
	30.09 Test and inspect repaired systems.		
	30.10 Clear obstructions from kitchen sink, water closet, bathtub, lavatory and sewer lines, using chemicals and tools.		
31.0	Demonstrate how to connect residential plumbing to a municipal sewer line (optional)The student will be able to:		
	31.01 Describe who is allowed (according to municipal codes) to tap into a sewer line.		
	31.02 Excavate from the house drain to a sewer main.		
	31.03 Connect the house drain to the sewer main.		
	31.04 Test and inspect the system.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly

indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

<u>Purpose</u>

The purpose of this program is to prepare students for employment or advanced training in the building construction industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to applying construction techniques; reading plans and specifications; and developing trade skills in carpentry, masonry, electricity, plumbing and air conditioning.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at each occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8722010	Building Trades and Construction Design Technology 1	1 Credit		2	VO
	8722020	Building Trades and Construction Design Technology 2	1 Credit		2	VO
Α	8722030	Building Trades and Construction Design Technology 3	1 Credit	49-9071	3	PA
В	8722040	Building Trades and Construction Design Technology 4	1 Credit	49-9071	2	VO
С	8722050	Building Trades and Construction Design Technology 5	1 Credit	49-9071	2	VO
D	8722060	Building Trades and Construction Design Technology 6	1 Credit	49-9071	3	PA

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 04.0 Demonstrate safety practices and follow disaster plans.
- 05.0 Identify and use basic hand tools.
- 06.0 Identify power tools and describe their proper operation.
- 07.0 Research and present construction components, materials, hardware and characteristics.
- 08.0 Demonstrate an understanding of the construction industry and related occupations.
- 09.0 Explain the importance of employability and entrepreneurship skills.
- 10.0 Demonstrate rough and finish carpentry skills.
- 11.0 Demonstrate masonry skills.
- 12.0 Demonstrate painting and decorating skills.
- 13.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 14.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Building Trades and Construction Design Technology.
- 16.0 Demonstrate science knowledge and skills.
- 17.0 Demonstrate mathematics knowledge and skills.
- 18.0 Demonstrate an understanding of the built environment.
- 19.0 Demonstrate an understanding of the green environment.
- 20.0 Research laws applicable to the construction industry.
- 21.0 Read construction contracts, documents, specifications, building codes and regulations and explain how they apply to the construction process.
- 22.0 Demonstrate electrical rough in skills.
- 23.0 Demonstrate finish electrical skills.
- 24.0 Demonstrate plumbing rough in skills.
- 25.0 Demonstrate finish plumbing skills.
- 26.0 Demonstrate air conditioning rough in skills.
- 27.0 Demonstrate finish air conditioning skills.
- 28.0 Design a capstone project using skills learned throughout the program

Course Title: Building Trades and Construction Design Technology 1

Course Number: 8722010

Course Credit: 1

Course Description:

The purpose of this course is to provide students with competencies in safety practices; the use of hand and power tools; construction components, materials and hardware; construction industry occupations and employability skills.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student si	es for using Florida Standards for grades 09-10 reading in Technical uccess in Building Trades and Construction Design Technology.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question	

Florida	Stand	dards		Correlation to CTE Program Standard #
			the author seeks to address.	
			LAFS.910.RST.2.6	
	01.03	Integration of	Knowledge and Ideas	
		01.03.1	Translate quantitative or technical information expressed in words in a	
			text into visual form (e.g., a table or chart) and translate information	
			expressed visually or mathematically (e.g., in an equation) into words.	
			LAFS.910.RST.3.7	
		01.03.2	Assess the extent to which the reasoning and evidence in a text support	
			the author's claim or a recommendation for solving a scientific or	
			technical problem. LAFS.910.RST.3.8	
		01.03.3	Compare and contrast findings presented in a text to those from other	
		01.00.0	sources (including their own experiments), noting when the findings	
			support or contradict previous explanations or accounts.	
			LAFS.910.RST.3.9	
	01.04	Range of Rea	ading and Level of Text Complexity	
		01.04.1	By the end of grade 9, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			9–10 text complexity band proficiently, with scaffolding as needed at the	
		04.04.0	high end of the range.	
		01.04.2	By the end of grade 10, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 9–10 text complexity band independently and proficiently.	
			LAFS.910.RST.4.10	
02.0	Method	ds and strated	ies for using Florida Standards for grades 09-10 writing in Technical	
0			success in Building Trades and Construction Design Technology.	
		Text Types a	<u> </u>	
		02.01.1	Write arguments focused on discipline-specific content.	
			LAFS.910.WHST.1.1	
		02.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
	00.00	Duo di instituto e	LAFS.910.WHST.1.2	
	02.02		nd Distribution of Writing	
		02.02.1	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.	
			LAFS.910.WHST.2.4	
		02.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
		JUL	rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
			LAFS.910.WHST.2.5	

O2.02.3 Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically. and textures.		

Course Title: Building Trades and Construction Design Technology 3

Course Number: 8722030

Course Credit: 1

Course Description:

The purpose of this course is to develop student competencies in construction related math and science, the built environment and the green environment.

Florid	a Stand	lards		Correlation to CTE Program Standard #
13.0			gies for using Florida Standards for grades 11-12 reading in Technical success in Building Trades and Construction Design Technology.	
	13.01	Key Ideas ar	nd Details	
		13.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		13.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		13.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
		13.02	Craft and Structure	
		13.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		13.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		13.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

Floric	la Stanc	lards		Correlation to CTE Program Standard #
			LAFS.1112.RST.2.6	
	13.03	Integration of	of Knowledge and Ideas	
		13.03.1	Integrate and evaluate multiple sources of information presented in	
			diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		13.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		13.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon, or	
			concept, resolving conflicting information when possible.	
	40.04	Danse of Da	LAFS.1112.RST.3.9	
	13.04		eading and Level of Text Complexity	
		13.04.1	By the end of grade 11, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			11–CCR text complexity band proficiently, with scaffolding as needed at	
		13.04.2	the high end of the range. By the end of grade 12, read and comprehend literature [informational

18.0	Demoi	nstrate an understanding of the built environmentThe student will be able to:		
	18.01	Research the development of construction technology, its impact on the built environment and the impact of growth on the construction industry.	LAFS.1112.W.3.7,8,9	SC.912.N.1.1 SC.912.L.17.12,13, 14,15,16,17,18
	18.02	Describe and give examples of the benefits of the construction industry on health and safety, communication, transportation and the economy.	LAFS.1112.SL.1.1 LAFS.1112.W.2.4	SC.912.N.1.1 SC.912.L.14.6 SC.912.L.17.12,13, 14,15,16,17,18
	18.03	Examine and compare the relationship between the built environment and the natural environment.	LAFS.1112.SL.1.1	SC.912.N.1.1 SC.912.L.17.12,13, 14,15,16,17,18
	18.04	Compare architectural designs and/or models to understand how technical and utilitarian components impact aesthetic qualities.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	SC.912.N.1.1 SC.912.N.3.5
	18.05	Analyze changes in architectural styles and construction practices over time.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	SC.912.N.1.1
	18.06	Describe the significance of major architects, engineers or inventors to understand their historical influences.	LAFS.1112.SL.1.1	SC.912.N.1.1 SC.912.N.2.5

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
		Research innovative historical architectural and/or engineering works and examine the significance of their legacy for the future.	LAFS.1112.W.3.7,8,9	SC.912.N.1.1 SC.912.N.2.5
	18.08	Identify transitions in design media, technique and focus to explain how technology has changed design throughout history.	LAFS.1112.RI.1.2	SC.912.N.1.1
19.0	Demor	nstrate an understanding of the green environmentThe student will be able to:		
	19.01	Recognize and analyze the development of the built environment and its impacts on the natural environment such as pollution, deforestation, climate change, health and disease.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.RI.1.2,3	SC.912.N.1.1 SC.912.L.17.1 SC.912.L.17.10,11, 12,13,14,15,16,17, 18,19,20 SC.912.L.17.7,8,9
	19.02	Describe and give examples of how a green built environment creates growth for the construction industry, and the economy such as health and safety, transportation and natural resources.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.SL.1.1 LAFS.1112.RI.1.1,2	SC.912.N.1.1 SC.912.L.17.1,7,8, 9, 10,11,12,13,14,15, 16,17,18,19,20
	19.03	Examine and compare the relationship between a green built environment and the natural environment.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	SC.912.N.1.1 SC.912.L.17.1,7,8, 9, 10,11,12,13,14,15, 16,17,18,19,20
	19.04	Explain the purpose of the United States Green Building Council (USGBC), the Green Building Certification Institute (GBCI) and Leadership for Energy and Environmental Design (LEED) are and how they create growth for the construction industry and the economy.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	SC.912.N.1.1 SC.912.N.4.1
	19.05	Research sustainable building design and its relationship between health, energy efficiency and money savings for government, businesses and individuals.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7	SC.912.N.1.1 SC.912.N.4.1,2 SC.912.L.17.1,7,8, 9, 10,11,12,13,14,15, 16,17,18,19,20

CTE Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
		LAFS.1112.W.3.7,8,9	
19.06	Research the effects of building science on construction and energy efficiency.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.W.3.7,8,9	SC.912.N.1.1 SC.912.N.4.2 SC.912.L.17.11
19.07	Research renewable fuels and energy.	MAFS.912.S-ID.2.5 MAFS.912.S-CP.1.4,5 MAFS.912.S- MD.1.1,2,3,4 MAFS.912.S- MD.2.5,6,7 LAFS.1112.W.3.7,8,9	SC.912.N.1.1 SC.912.L.17.11,19

Course Title: Building Trades and Construction Design Technology 4

Course Number: 8722040

Course Credit: 1

Course Description:

This course provides students with competencies in construction laws, contracts, documents specifications, building codes and regulations.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
13.0	Subjec	cts for student	ies for using Florida Standards for grades 11-12 reading in Technical success in Building Trades and Construction Design Technology.	
	13.01	Key Ideas and	d Details	
		13.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		13.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		13.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	13.02	Craft and Stru	ucture	
		13.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.	
		10.00.0	LAFS.1112.RST.2.4	
		13.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		13.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

Florida	Stand	ards		Correlation to CTE Program Standard #
			LAFS.1112.RST.2.6	
	13.03	Integration of	Knowledge and Ideas	
		13.03.1	Integrate and evaluate multiple sources of information presented in	
			diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		13.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		13.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon, or	
			concept, resolving conflicting information when possible.	
	40.04	D (D -	LAFS.1112.RST.3.9	
			ading and Level of Text Complexity	
		13.04.1	By the end of grade 11, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			11–CCR text complexity band proficiently, with scaffolding as needed at the high end of the range.	
		13.04.2	By the end of grade 12, read and comprehend literature [informational	
		13.04.2	texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 11–CCR text complexity band independently and	
			proficiently.	
			LAFS.1112.RST.4.10	
14.0	Method	ds and strated	ies for using Florida Standards for grades 11-12 writing in Technical	
			success in Building Trades and Construction Design Technology.	
		Text Types a		
		14.01.1	Write arguments focused on discipline-specific content.	
			LAFS.1112.WHST.1.1	
		14.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
			LAFS.1112.WHST.1.2	
	14.02		nd Distribution of Writing	
		14.02.1	Produce clear and coherent writing in which the development,	
			organization, and style are appropriate to task, purpose, and audience.	
			LAFS.1112.WHST.2.4	
		14.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
			rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
			LAFS.1112.WHST.2.5	

Florida Standards	Correlation to CTE Program Standard #
14.02.3 Use technology, including the Internet, to produce, publish, and update	3 5 3
individual or shared writing products in response to ongoing feedback,	
including new arguments or information.	
LAFS.1112.WHST.2	6
14.03 Research to Build and Present Knowledge	
14.03.1 Conduct short as well as more sustained research projects to answer a	
question (including a self-generated question) or solve a problem; narro	
or broaden the inquiry when appropriate; synthesize multiple sources or	
the subject, demonstrating understanding of the subject under	
investigation.	7
LAFS.1112.WHST.3	<i>l</i>
14.03.2 Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and	
limitations of each source in terms of the specific task, purpose, and	
audience; integrate information into the text selectively to maintain the	
flow of ideas, avoiding plagiarism and overreliance on any one source	
and following a standard format for citation.	
LAFS.1112.WHST.3.	3
14.03.3 Draw evidence from informational texts to support analysis, reflection,	
and research.	
LAFS.1112.WHST.3.	
14.04 Range of Writing	
14.04.1 Write routinely over extended time frames (time for reflection and	
revision) and shorter time frames (a single sitting or a day or two) for a range of	
discipline-specific tasks, purposes, and audiences.	
LAFS.1112.WHST.4.1	
15.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices i	
Technical Subjects for student success in Building Trades and Construction Design Technolog	у.
15.01 Make sense of problems and persevere in solving them. MAFS.K12.MP.1.	
15.02 Reason abstractly and quantitatively.	<u> </u>
MAFS.K12.MP.2.	
15.03 Construct viable arguments and critique the reasoning of others.	
MAFS.K12.MP.3.	
15.04 Model with mathematics.	'
MAFS.K12.MP.4.	
15.05 Use appropriate tools strategically.	-
MAFS.K12.MP.5.	
15.06 Attend to precision.	
MAFS.K12.MP.6.	

Florida Standards		Correlation to CTE Program Standard #
15.07 Look for and make use of structure.		
	MAFS.K12.MP.7.1	
15.08 Look for and express regularity in repeated reasoning.		
	MAFS.K12.MP.8.1	

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
20.0	Resea	arch laws applicable to the construction industryThe student will be able to:		
	20.01	Discuss and analyze the governmental law process and its impact on the construction industry and construction education.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.3	SC.912.N.1.1 SC.912.N.4.1,2
	20.02	Analyze the Codes of Federal Regulations (CFR) pertaining to the construction industry.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	
	20.03	Analyze the Florida State Statues pertaining to the construction industry.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	
	20.04	Compare and contrast trade union and trade non-union workers in terms of health and safety, communication, transportation and the economy.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	SC.912.N.1.1
	20.05	Debate the roles of trade unions in the construction industry and their impact on training.	LAFS.1112.SL.1.1	
	20.06	Examine the role of apprenticeship in the construction industry and its impact on education.	LAFS.1112.SL.1.1	
	20.07	Locate and assess the Florida Department of Professional Regulation.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	
	20.08	Locate and assess the Construction Industry Licensing Board, its structure, polices and requirements.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	
	20.09	Research various construction occupations and explain the requirements for becoming licensed.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.9 LAFS.1112.RI.4.10	
	20.10	Compare and contrast the roles and responsibilities of the engineers, architects/ designers and the general contractor.	LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	
	20.11		LAFS.1112.SL.1.1 LAFS.1112.RI.3.7	
	20.12	Identify and differentiate the roles and responsibilities of building construction firms and classifications of construction projects.	LAFS.1112.SL.1.1	

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	20.13	Define entrepreneurship and give examples pertaining to the construction industry.	LAFS.1112.L.3.6	
	20.14	Assess the relationship between the Department of Labor and new construction projects, new permits and new business start-ups.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.2	
	20.15	Assess the need for and impact of zoning requirements on construction projects.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.2	SC.912.N.1.1 SC.912.N.4.1,2 SC.912.L.17.1,8,12,13, 14,15,16,20
		Examine and analyze the process of applying for building permits and variances.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.2	SC.912.N.1.1 SC.912.L.17.1,8,12,13, 14,15,16,20
21.0		construction contracts, documents, specifications, building codes and regulations and n how they apply to the construction process—The student will be able to:		
	21.01	Explain the purpose and components of contracts, drawings, documents and specifications.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.1,2	
	21.02	Analyze the importance of building codes and zoning regulations on the development of drawings and specifications.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.1,2 LAFS.1112.RI.3.7	SC.912.N.1.1 SC.912.N.4.1,2 SC.912.L.17.1,8,12,13, 14,15,16,20
	21.03	Identify and interpret the analogy of a full set of drawings including architectural (site plans, foundation plans, floor plans, interior/exterior elevations, sections, details and schedules), structural, plumbing, mechanical and electrical drawings.	LAFS.1112.SL.1.1 LAFS.1112.RI.1.1,2 LAFS.1112.RI.3.7	
	21.04	Utilize building symbols in the development of blueprints.	LAFS.1112.L.3.6	
	21.05	Prepare lists of materials and specifications.	LAFS.1112.W.2.4	
	21.06	Use architectural and engineering scales.	MAFS.912.G- CO.4.12 MAFS.912.N- Q.1.1,2,3 LAFS.1112.W.2.4	
	21.07	Demonstrate the basic use of computer-aided design software.	LAFS.1112.W.2.6	
	21.08	Demonstrate the use of computer aided drafting (CAD) software to prepare project drawings.	MAFS.912.G- CO.4.12 MAFS.912.N- Q.1.1,2,3 LAFS.1112.W.2.6	
	21.09	Write specifications for a project.	LAFS.1112.W.2.4 LAFS.1112.W.3.7	
	21.10	Prepare construction documents for a project.	LAFS.1112.W.2.4	

Course Title: Building Trades and Construction Design Technology 5

Course Number: 8722050

Course Credit: 1

Course Description:

This course provides students with competencies in electrical, plumbing and air conditioning.

Abbreviations:

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
22.0	Demo	nstrate electrical rough in skillsThe student will be able to:		
	22.01	Identify and apply electrical safety practices and procedures when working with electrical systems.	LAFS.1112.SL.1.1	SC.912.N.1.1 SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
	22.02	Explain and describe various phases of electrical generation and the transportation and distribution of electricity to sub stations for industrial, business and residential uses.	MAFS.912.N- Q.1.1,2,3 MAFS.912.N- CN.1.1,2,3 LAFS.1112.SL.1.1 LAFS.1112.RI.1.2	SC.912.N.1.1 SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
	22.03	Design and calculate electrical loads using ohms law to determine power, American wire gauge (AWG) and electrical equipment sizes.	MAFS.912.N- Q.1.1,2,3 LAFS.1112.RI.3.7 LAFS.1112.W.2.4	SC.912.N.1.1
	22.04	Apply basic electrical theory to wiring a project.	MAFS.912.N- CN.1.1,2,3	SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
	22.05	Design and install a branch circuit system in a project.	MAFS.912.N- Q.1.1,2,3 LAFS.1112.RI.3.7 LAFS.1112.W.2.4	SC.912.N.1.1
	22.06	Install Ground Fault Circuit Interrupter (GFCI) circuitry.	MAFS.912.N- CN.1.1,2,3	SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
	22.07	Troubleshoot electrical systems, using testing and metering devices.	MAFS.912.N- Q.1.1,2,3	SC.912.N.1.1

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	22.08 Install a meter, distribution panel and breaker panel for a project.		SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
	22.09 Identify types of wiring raceways.	LAFS.1112.SL.1.1	SC.912.N.1.1
	22.10 Install conduit, pipe, shielded electrical cable and electrical boxes in a project.		SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
23.0	Demonstrate finish electrical skillsThe student will be able to:		
	23.01 Install electrical breakers, outlets, switches and light fixtures.		
	23.02 Wire an air conditioning system into an electrical supply.		
	23.03 Test and inspect electrical systems.		SC.912.N.1.1 SC.912.P.10.1,13,1 4, 15,16,17,18,19,21
24.0	Demonstrate plumbing rough in skillsThe student will be able to:		
	24.01 Identify, select and install various pipes, tubing, fittings and connectors used in the plumbing trade for a specific project.	MAFS.912.G-CO.4.12 MAFS.912.G-C.1.1 MAFS.912.G-C.2.5 LAFS.1112.L.3.6	SC.912.N.1.1 SC.912.L.17.14,19
	24.02 Layout and install a water distribution system for a project.	MAFS.912.G-CO.4.12 MAFS.912.G-C.1.1 MAFS.912.G-C.2.5	SC.912.N.1.1 SC.912.L.17.14,19
	24.03 Layout and install a drain-waste-and-vent system for a project.	MAFS.912.G-CO.4.12 MAFS.912.G-C.1.1 MAFS.912.G-C.2.5	SC.912.N.1.1 SC.912.L.17.14,19
	24.04 Test and inspect plumbing systems.		SC.912.N.1.1 SC.912.L.17.14,19
25.0	Demonstrate finish plumbing skillsThe student will be able to:		
	25.01 Install bathroom fixtures and hardware such as lavatories, water closets, urinals, showers, bathtubs and traps.		SC.912.N.1.1
	25.02 Install kitchen fixtures and hardware such as sinks, garbage disposals, faucets and hotwater-heater tanks.		SC.912.N.1.1
26.0	Demonstrate air conditioning rough in skillsThe student will be able to:		
	26.01 Explain heating and cooling principles and code requirements.	LAFS.1112.SL.1.1 LAFS.1112.W.2.4	SC.912.N.1.1 SC.912.P.10.4,7,14
	26.02 Perform basic calculations for heating and cooling loads.	MAFS.912.A- REI.1.1,2 MAFS.912.S-IC.2.4	SC.912.P.10.4,7,14
	26.03 Select and install the components of an air conditioning system for a project including ductwork, coolant lines, compressor packages and coil packages.	MAFS.912.A- REI.1.1,2	SC.912.N.1.1 SC.912.P.10.4,7,14

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
		MAFS.912.S-IC.2.4	
		LAFS.1112.L.3.6	
		LAFS.1112.RI.3.7	
	26.04 Identify and select refrigerants according to their properties.	LAFS.1112.L.3.6 LAFS.1112.RI.3.7	SC.912.P.10.4,7,14
27.0	Demonstrate finish air conditioning skillsThe student will be able to:		
	27.01 Determine a refrigerant level.	LAFS.1112.RI.3.7	SC.912.N.1.1 SC.912.P.10.4,7,14
	27.02 Install a control system for a project.		SC.912.N.1.1
	27.03 Install registers for a project.		SC.912.N.1.1
	27.04 Examine computer-monitoring systems associated with Heating, Ventilation and Air-Conditioning (HVAC) control systems and air-quality management.	LAFS.1112.RI.3.7	SC.912.N.1.1

Course Title: Building Trades and Construction Design Technology 6

Course Number: 8722060

Course Credit: 1

Course Description:

The purpose of this course is to allow students to apply skills learned throughout the program through a capstone project.

Abbreviations:

CTE S	tandar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
28.0	Desigr to:	a capstone project using skills learned throughout the programThe student will be able		
	28.01	Solve design and construction problems, through convergent and divergent thinking, to gain new perspectives.		
	28.02	Apply critical-thinking and problem solving skills used in design to develop solutions for real-life issues.		
	28.03	Use critical thinking skills for various contexts to develop, refine and reflect on a design theme.		
	28.04	Use and maintain tools and equipment to facilitate design and construction process.		
	28.05	Work in a project team to show creative cohesiveness, team building, respectful compromise and time-management skills.		
	28.06	Apply carpentry skills.		
	28.07	Apply masonry skills.		
	28.08	Apply mechanical, electrical and plumbing (MEP) skills.		
	28.09	Apply construction safety.		
	28.10	Apply sustainable construction practices.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Additional Resources

Purpose

The purpose of this program is to prepare students for employment in the carpentry and cabinetmaking industry with a stress on basic carpentry/cabinet making skills.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster. The content includes but is not limited to developing cabinetmaking skills, as well as rough and finish carpentry skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for additional training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level
	8722110	Carpentry and Cabinetmaking 1	1 Credit		2
Α	8722120	Carpentry and Cabinetmaking 2	1 Credit	47-3012	2

	8722160	Carpentry 6	1 Credit		3
С	8722170	Carpentry 7	1 Credit	47-2031	3

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 04.0 Apply shop safety skills.
- 05.0 Utilize manual and power tools relevant to the carpentry and cabinetmaking professions.
- 06.0 Demonstrate mathematics knowledge and skills relevant to the carpentry and cabinetmaking field.
- 07.0 Create basic construction drawings and/ or sketches.
- 08.0 Recommend appropriate building materials for specific scenarios.
- 09.0 Select appropriate fasteners and hardware for specific scenarios.
- 10.0 Apply occupational safety skills.
- 11.0 Select and use hand and power tools relevant to the carpentry and cabinetmaking profession.
- 12.0 Fasten stock and joints.
- 13.0 Read and design construction documents.
- 14.0 Assemble and install cabinets and components.
- 15.0 Investigate sustainability issues related to the carpentry and cabinetmaking professions.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Carpentry and Cabinetmaking.
- 19.0 Identify and describe interior and exterior doors (wood and/or metal).
- 20.0 Install trim and finish carpentry using plans and specifications.
- 21.0 Cut and install framing members for a floor (wood and/or metal).
- 22.0 Cut and install a wall and partition framing (wood and/or metal).
- 23.0 Install an interior wall and ceiling materials.
- 24.0 Lay out and construct an interior-stair system.
- 25.0 Comply with hurricane codes.
- 26.0 Frame a roof.
- 27.0 Apply roofing applications.
- 28.0 Apply thermal and moisture protection.
- 29.0 Frame walls using cold-formed steel.
- 30.0 Perform site-preparation and layout activities.
- 31.0 Explain the importance of employability and entrepreneurship skills.

- 32.0 Perform concrete tests.
- 33.0 Lay foundations.
- 34.0 Construct vertical formwork.
- 35.0 Construct horizontal formwork.
- 36.0 Erect and properly align tilt-up wall panels.
- 37.0 Install drywall.
- 38.0 Install a suspended ceiling.
- 39.0 Interpret door and door hardware requirements based on plans and specifications.
- 40.0 Install windows and exterior doors.
- 41.0 Apply interior trim.
- 42.0 Lay out and construct an exterior stair system.
- 43.0 Apply exterior finishing.
- 44.0 Set up and install basic rigging and scaffolding.
- 45.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 46.0 Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabs.
- 47.0 Explain the transport and placement of concrete.
- 48.0 Demonstrate an understanding of trenching and excavation.

Course Title: Carpentry and Cabinetmaking 1

Course Number: 8722110

Course Credit:

Course Description:

The purpose of this course is for the student to develop competencies essential to the carpentry and cabinetmaking industry. These competencies include safety, use of manual and power tools, applied math, plan reading, building materials, fasteners and hardware.

Florid	a Stand	dards		Correlation to CTE Program Standard #
01.0			es for using Florida Standards for grades 09-10 reading in Technical uccess in Carpentry and Cabinetmaking.

Course Title: Carpentry and Cabinetmaking 2

Course Number: 8722120

Course Credit: 1

Course Description:

The purpose of this course is for the student to continue developing competencies essential to the carpentry and cabinetmaking professions. These competencies include safety, hand and power tools, fastening methods, cabinet assembly and plan reading.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student s	es for using Florida Standards for grades 09-10 reading in Technical uccess in Carpentry and Cabinetmaking.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question

Course Title: Carpentry and Cabinetmaking 3

Course Number: 8722130

Course Credit: 1

Course Description:

This course provides students with a more in-depth knowledge of trim and finish carpentry, as well as an introduction to rough carpentry. Students will further their understanding of plan and specifications, assemble and install cabinetry, install doors, frame floors and walls and construct stairs.

25.0	Comply with hurricane codesthe student will be able to:		
	25.01 Install hurricane anchors.		
	25.02 Install hurricane clips.		
	25.03 Install hurricane straps.		
	25.04 Explain the purpose and importance of the codes relating to hurricanes.	LAFS.1112.RI.1.1 LAFS.1112.W.2.4 LAFS.1112.SL.2.4	SC.912.L.17.8
26.0	Frame a roofThe student will be able to:		
	26.01 Understand the terms associated with roof framing.	LAFS.1112.RI.2.4	
	26.02 Identify the roof framing members used in gable and hip roofs.		
	26.03 Identify the methods used to calculate the length of a rafter.		
	26.04 Identify the various types of trusses used in roof framing.		
	26.05 Use a rafter framing square, speed square and calculator in laying out a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.S-ID.3.7	
	26.06 Identify various types of sheathing used in roof construction.		
	26.07 Frame a gable roof with vent openings.		
	26.08 Frame a roof opening.		
	26.09 Erect a gable roof using trusses.		
	26.10 Estimate the materials used in framing and sheathing a roof.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
27.0	Apply roofing applicationsThe student will be able to:		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	27.01 Identify the materials and methods used in roofing.		SC.912.N.1.1 SC.912.L.15.4
	27.02 Explain the safety requirements for roof jobs.	LAFS1112.W.2.4	
	27.03 Install fiberglass shingles on gable and hip roofs.		
	27.04 Close up a valley using fiberglass shingles.		
	27.05 Explain how to make various roof projections watertight when using fiberglass shingles.	LAFS.1112.SL.2.4	
	27.06 Complete the proper cuts and install the main and hip ridge caps using fiberglass shingles.		
	27.07 Lay out, cut and install a cricket or saddle.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
	27.08 Install wood shingles and shakes on roofs.		
	27.09 Describe how to close up a valley using wood shingles and shakes.	LAFS.1112.SL.2.4	
	27.10 Explain how to make roof projections watertight when using wood shakes and shingles.	LAFS.1112.SL.2.4	
	27.11 Complete the cuts and install the main and hip ridge caps using wood shakes/shingles.		
	27.12 Demonstrate the techniques for installing other selected types of roofing materials.		
28.0	Apply thermal and moisture protectionThe student will be able to:		
	28.01 Research the requirements for insulation.	LAFS.1112.W.3.7	SC.912.N.1.1
	28.02 Research the characteristics of various types of insulation material.	LAFS.1112.W.3.7	SC.912.N.1.1
	28.03 Calculate the required amounts of insulation for a structure.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.1	
	28.04 Install selected insulation materials.		
	28.05 Describe the requirements for moisture control and ventilation.	LAFS.1112.SL.2.4	SC.912.N.1.1 SC.912.L.18.12
	28.06 Install selected vapor barriers.		
	28.07 Describe various methods of waterproofing.	LAFS.1112.SL.2.4	
	28.08 Describe air infiltration control requirements.	LAFS.1112.SL.2.4	
	28.09 Install selected building wraps.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
29.0	Frame walls using cold-formed steelThe student will be able to:		
	29.01 Identify the components of a steel framing system.		
	29.02 Identify and select the tools and fasteners used in a steel framing system.		
	29.03 Identify applications for steel framing systems.		
	29.04 Demonstrate the ability to build back-to-back, box and L-headers.		
	29.05 Lay out and install a steel stud structural wall with openings to include bracing and blocking.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
	29.06 Lay out and install a steel stud non-structural wall with openings to include blocking and bracing.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-MG.1.3	
30.0	Perform site-preparation and layout activitiesThe student will be able to:		
	30.01 Identify building layout from plans and specifications using math skills.		
	30.02 Set up and adjust a transit and builder's level over one point and establish lines over two points.	MAFS.912.N-Q.1.1,2,3 MAFS.912.A-REI.4.10	
	30.03 Erect batter boards and locate building lines.		
	30.04 Locate building line points on batter boards using a builder's level.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.3.8	
	30.05 Locate building lines on a plot plan.		
	30.06 Square a building, using the 3-4-5-triangle method and the diagonal method.	MAFS.912.N-Q.1.1,2,3 MAFS.912.G-SRT.2.4 MAFS.912.G-SRT.3.8	
31.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:		
	31.01 Identify and demonstrate positive work behaviors needed to be employable.		
	31.02 Develop personal career plan that includes goals, objectives and strategies.		
	31.03 Examine licensing, certification and industry credentialing requirements.	LAFS.1112.W.3.7	
	31.04 Maintain a career portfolio to document knowledge, skills and experience.	LAFS.1112.W.3.7 LAFS.1112.RI.1.1	SC.912.N.1.1
	31.05 Evaluate and compare employment opportunities that match career goals.		SC.912.N.1.1
	31.06 Identify and exhibit traits for retaining employment.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
31.07 Identify opportunities and research requirements for career advancement.		SC.912.N.1.1
31.08 Research the benefits of ongoing professional development.	LAFS.1112.W.3.7	SC.912.N.1.1
31.09 Examine and describe entrepreneurship opportunities as a career planning option.	LAFS.1112.W.3.7	SC.912.N.1.1

Course Title: Carpentry 5

Course Credit: 1

Course Description:

This course provides students with knowledge and skills pertaining to concrete, foundations, forms and tilt-up construction.

Abbreviations:

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
32.0	Perform concrete testsThe student will be able to:		SC.912.L.15.4
	32.01 Identify various types of cement and describe their uses.		SC.912.L.15.4
	32.02 Identify types and sizes of concrete aggregates.		SC.912.N.1.1 SC.912.P.8.2 SC.912.P.10.4
	32.03 Research types of concrete admixtures and describe their uses.	LAFS.1112.W.3.7	SC.912.N.1.1
	32.04 Research special types of concrete and describe their uses.	LAFS.1112.W.3.7	
	32.05 Calculate concrete volume requirements for rectangular, cylindrical, or other geometric structures using formulas, concrete tables and/or concrete calculators, as applicable.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- GMD.1.1,3	SC.912.P.8.2 SC.912.P.10.4
	32.06 Identify concrete curing methods and materials.		SC.912.P.8.2
	32.07 Identify concrete testing methods.		SC.912.P.8.2
	32.08 Mix concrete using different aggregates and admixtures.		SC.912.P.8.2 SC.912.N.1.1
	32.09 Sample concrete using a test cylinder.		SC.912.P.8.2 SC.912.N.1.1
	32.10 Perform slump testing of concrete.		SC.912.P.8.2 SC.912.N.1.1

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	32.11 Set up a curing box.		
33.0	Lay foundationsThe student will be able to:		
	33.01 Establish elevations.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- CO.1.4,5,6	SC.912.L.15.4
	33.02 Identify various types of footing and foundations.		SC.912.N.1.1
	33.03 Select the appropriate footing for a foundation.		SC.912.N.1.1
	33.04 Lay out and construct a selected footing and foundation using an established gridline.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- CO.1.4,5,6	
	33.05 Install templates, keyways and embedments.		
	33.06 Form and strip pier foundation forms and prepare for resetting at another location.		SC.912.L.15.4
	33.07 Identify the different classes of slabs-on-grade.		SC.912.L.15.4
	33.08 Identify edge forms and explain their purpose.		
	33.09 Construct and disassemble edge forms.	MAFS.912.G- C.2.5	
	33.10 Install vapor barrier, reinforcement and control joints.		
	33.11 Establish finish grade and fill requirements.		
34.0	Construct vertical formworkThe student will be able to:		
	34.01 Explain safety procedures associated with using concrete wall forms.	LAFS.1112.SL.2.4	SC.912.L.15.4
	34.02 Identify the various types of concrete wall forms.		
	34.03 Identify the components of each type of vertical forming system.		
	34.04 Erect, plumb and brace a selected wall.		
	34.05 Recognize various types of manufactured forms.		
	34.06 State the differences in construction and use among different types of forms.	LAFS.1112.SL.2.4	
	34.07 Erect, plumb and brace a column form.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	34.08 Erect, plumb and brace a stair form.		SC.912.N.1.1
	34.09 Locate and install bulkheads and embedded forms.		
35.0	Construct horizontal formworkThe student will be able to:		
	35.01 Identify the safety hazards associated with elevated deck formwork and explain how to eliminate them.		SC.912.L.15.4
	35.02 Identify the different types of elevated decks.		SC.912.L.15.4
	35.03 Identify the different types of flying form systems.		SC.912.L.15.4
	35.04 Identify different types of handset form systems.		
	35.05 Erect, plumb, brace and level different types of handset deck form systems.		
	35.06 Install edge forms, blockouts, embedments and construction joints.		SC.912.L.15.4
	35.07 Identify typical bridge and culvert form systems.		
36.0	Erect and properly align tilt-up wall panelsThe student will be able to:		SC.912.N.1.1
	36.01 Describe the different processes used in installing tilt-up wall panels.	LAFS.1112.SL.2.4	SC.912.N.1.1
	36.02 Explain the importance of the casting bed.	LAFS.1112.SL.2.4	SC.912.N.1.1
	36.03 Identify and install the various types of lifting eyes used in forming tilt-up panels.		SC.912.N.1.1
	36.04 Identify the special rigging requirements for tilt-up wall panels.		SC.912.N.1.1
	36.05 Identify the different methods of forming tilt-up wall panels.		SC.912.N.1.1
	36.06 Demonstrate the different methods of forming tilt-up wall panels.		SC.912.N.1.1
	36.07 Prepare for the erection of tilt-up wall panels.		SC.912.N.1.1
	36.08 Install proper bracing for tilt-up wall panels.		SC.912.N.1.1
	36.09 Install embedments, blockouts, architectural finishes, lifting devices and reinforcing materials using a set of construction drawings.		SC.912.N.1.1
	36.10 Describe the final grouting procedure.	LAFS.1112.SL.2.4	SC.912.L.15.4

Course Title: Carpentry 6 Course Number: 8722160

Course Credit:

Course Description:

This course provides students interior and exterior finish carpentry skills. The content deals with the installation of drywall, doors and hardware, windows, trim, exterior stairs and exterior finishes.

Abbreviations:

Standards and Benchmarks	FS-M/LA	NGSSS-Sci
Install drywallThe student will be able to:		
37.01 Identify the different types of drywall and their uses.		SC.912.L.15.4
37.02 Select the type and thickness of drywall required for specific installations.		SC.912.N.1.1
37.03 Select fasteners for drywall installation.		
37.04 Explain the fastener schedules for different types of drywall installations.	LAFS.1112.SL.2.4	
37.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives.		
37.06 Install gypsum drywall on steel studs.		
37.07 Explain how soundproofing is achieved in drywall installations.	LAFS.1112.SL.2.4	SC.912.P.10.2 0
37.08 Estimate material quantities for a drywall installation.	MAFS.912.N- Q.1.1,2,3	
Install a suspended ceilingThe student will be able to:		
38.01 Establish a level line.		
38.02 Explain the common terms related to sound waves and acoustical ceiling materials.	LAFS.1112.RI.2.4	SC.912.P.10.2 0
38.03 Identify the different types of suspended ceilings.		SC.912.L.15.4
	37.01 Identify the different types of drywall and their uses. 37.02 Select the type and thickness of drywall required for specific installations. 37.03 Select fasteners for drywall installation. 37.04 Explain the fastener schedules for different types of drywall installations. 37.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives. 37.06 Install gypsum drywall on steel studs. 37.07 Explain how soundproofing is achieved in drywall installations. 37.08 Estimate material quantities for a drywall installation. Install a suspended ceilingThe student will be able to: 38.01 Establish a level line. 38.02 Explain the common terms related to sound waves and acoustical ceiling materials.	Install drywallThe student will be able to: 37.01 Identify the different types of drywall and their uses. 37.02 Select the type and thickness of drywall required for specific installations. 37.03 Select fasteners for drywall installation. 37.04 Explain the fastener schedules for different types of drywall installations. LAFS.1112.SL.2.4 37.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives. 37.06 Install gypsum drywall on steel studs. 37.07 Explain how soundproofing is achieved in drywall installations. LAFS.1112.SL.2.4 37.08 Estimate material quantities for a drywall installation. Install a suspended ceilingThe student will be able to: 38.01 Establish a level line. 38.02 Explain the common terms related to sound waves and acoustical ceiling materials. LAFS.1112.RI.2.4

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	38.04 Interpret plans related to ceiling layout.		SC.912.N.1.1
	38.05 Sketch the ceiling layout for a basic suspended ceiling.		
	38.06 Perform a material takeoff for a suspended ceiling.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- MG.1.3 MAFS.912.G- GMD.2.4	
	38.07 Install selected suspended ceilings.		
39.0	Interpret door and door hardware requirements based on plans and specificationsThe student will be able to:		
	39.01 Identify various types of door jambs and frames and demonstrate the installation procedures for placing selected door jambs and frames in different types of interior partitions.		SC.912.L.15.4
	39.02 Identify different types of interior doors.		SC.912.L.15.4
	39.03 Identify different types of interior door hardware and demonstrate the installation procedures for selected types.		SC.912.L.15.4
	39.04 List and identify specific items included on a typical door schedule.	LAFS.1112.W.2.4	
	39.05 Explain the procedure for placing and hanging a specified door.	LAFS.1112.SL.2.4	
40.0	Install windows and exterior doorsThe student will be able to:		
	40.01 Identify various types of fixed, sliding and swinging windows.		SC.912.L.15.4
	40.02 Identify the parts of a window installation.		SC.912.L.15.4
	40.03 State the requirements for a proper window installation.	LAFS.1112.SL.2.4	
	40.04 Install a pre-hung window.		
	40.05 Identify the common types of exterior doors and explain how they are constructed.		SC.912.L.15.4
	40.06 Identify the parts of a door installation.		SC.912.L.15.4
	40.07 Identify the types of thresholds used with exterior doors.		SC.912.L.15.4
	40.08 Install a pre-hung exterior door.		
	40.09 Identify the various types of locksets used on exterior doors and explain how they are installed.		SC.912.L.15.4

CTE S	standards and Benchmarks	FS-M/LA	NGSSS-Sci
	40.10 Install a lockset.		
41.0	Apply interior trimThe student will be able to:		
	41.01 Identify the different types of standard moldings and describe their uses.		SC.912.L.15.4
	41.02 Make square and miter cuts using a miter box or power miter saw.		
	41.03 Make coped joint cuts using a coping saw.		
	41.04 Select and properly use fasteners to install trim.		
	41.05 Install interior trim including door, window, base and ceiling trim.		
	41.06 Estimate the quantities of different trim materials required for selected rooms.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- MG.1.3 MAFS.912.G- GMD.2.4	
42.0	Lay out and construct an exterior stair systemThe student will be able to:		
	42.01 Identify the types of exterior stair systems.		SC.912.L.15.4
	42.02 Identify the parts of an exterior stair system.		SC.912.L.15.4
	42.03 Calculate the number of treads and risers for an exterior stair system.	MAFS.912.N- Q.1.1,2,3 MAFS.912.S- ID.3.7 MAFS.912.G- SRT.3.8 MAFS.912.G- SRT.2.4	
	42.04 Lay out, cut and assemble an exterior stair system.	MAFS.912.N- Q.1.1,2,3 MAFS.912.G- SRT.1.1	
43.0	Apply exterior finishingThe student will be able to:		
	43.01 Describe the purpose of wall insulation and flashing.	LAFS.1112.SL.2.4	SC.912.P.10.2 0 SC.912.P.10.4
	43.02 Install selected common cornices.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
43.03 Demonstrate lap and panel siding estimating methods.		
43.04 Describe the types and applications of common wood siding.	LAFS.1112.SL.1.1	
43.05 Describe fiber-cement siding and its uses.	LAFS.1112.SL.1.1	
43.06 Describe the types and styles of vinyl and metal siding.	LAFS.1112.SL.1.1	
43.07 Describe the types and applications of stucco and masonry veneer finishes.	LAFS.1112.SL.1.1	
43.08 Describe the types and applications of special exterior finish systems.		
43.09 Install three types of siding commonly used in your area.		

Course Title: Carpentry 7
Course Number: 8722170

Course Credit: 1

Course Description:

This course provides students with knowledge of rigging, scaffolding, concrete and trenching and excavation.

Abbreviations:

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
44.0	Set up and install basic rigging and scaffoldingThe student will be able to:		
	44.01 Identify and explain rigging equipment.	LAFS.1112.SL2.4	SC.912.L.15.4
	44.02 Inspect rigging equipment, following safety precautions.		SC.912.N.1.1

	47.03 Demonstrate the correct methods for placing and consolidating concrete into forms.	LAFS.1112.SL.1.1	
	47.04 Use a screed to strike off and level concrete to the proper grade in a form.		
	47.05 Use tools for placing, floating and finishing concrete.		SC.912.N.1.1
	47.06 Determine when conditions permit the concrete finishing operation to start.		SC.912.P.8.2
	47.07 Name the factors that affect the curing of concrete and describe the methods used to achieve proper curing.	LAFS.1112.SL.1.1	SC.912.P.8.2
	47.08 Properly care for and safely use hand and power tools used when working with concrete.		SC.912.N.1.1
48.0	Demonstrate an understanding of trenching and excavationThe student will be able to:		
	48.01 Identify the different types, bearing capacities and classifications of soils.		SC.912.L.15.4
	48.02 Identify ways to increase soil density.		SC.912.N.1.1 SC.912.P.8.2
	48.03 State the purpose of soil density (compaction) tests.	LAFS.1112.SL.1.1	
	48.04 Explain the safety considerations for trenches and deep excavations.	LAFS.1112.SL.1.1	SC.912.E.6.2
	48.05 Identify and describe groundwater mitigation methods.		SC.912.E.6.2
	48.06 Identify and describe rock mitigation techniques.		SC.912.E.6.2

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Brick and Block Masonry

Program Type: Career Preparatory

Career Cluster: Architectural and Construction

	Secondary – Career Preparatory				
Program Number	8722900				
CIP Number	0646010103				
Grade Level	9-12, 30, 31				
Standard Length	5 Credits				
Teacher Certification	BLDG CONST ¶ 7 ¶G TEC CONSTR ¶ 7 ¶ G TROWEL TR 7G				
CTSO	SkillsUSA				
SOC Codes (all applicable)	47-3011- Helpers—Brickmasons, Blockmasons, Stonemasons, and Tile and Marble Setters 47-2021- Brickmasons and Blockmasons				
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml				

Purpose

The purpose of this program is to prepare students for employment in the brick, block, and concrete masonry industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to selecting and mixing mortars, laying bricks and blocks, and interpreting construction documents. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8722610	Masonry 1	1 Credit		2	VO
	8722620	Masonry 2	1 Credit		2	VO

	8722640	Masonry 4	1 Credit		2	VO
В	8722650	Masonry 5	1 Credit	47-3011	2	VO

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Brick and Block Masonry.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Brick and Block Masonry.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Brick and Block Masonry.
- 04.0 Investigate the masonry industry.
- 05.0 Follow safety practices relevant to the masonry industry.
- 06.0 Describe the properties, characteristics and uses of brick.
- 07.0 Describe the properties, characteristics and uses of concrete block.
- 08.0 Use hand tools relevant to the masonry industry.
- 09.0 Read measurements, drawings and specifications.
- 10.0 Demonstrate mathematics knowledge and skills.
- 11.0 Lay brick and/or block to the line.
- 12.0 Describe the various types and uses of bonding.
- 13.0 Select and mix mortars and concrete.
- 14.0 Demonstrate science knowledge and skills.
- 15.0 Clean masonry.
- 16.0 Identify the various methods of masonry practices.
- 17.0 Erect and disassemble basic scaffolds.
- 18.0 Research sustainability issues related to the masonry profession.
- 19.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Brick and Block Masonry.
- 20.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Brick and Block Masonry.
- 21.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Brick and Block Masonry.
- 22.0 Read construction drawings and specifications.
- 23.0 Construct residential masonry projects.
- 24.0 Apply grout and other reinforcement.
- 25.0 Install metals used in masonry.
- 26.0 Explain the importance of employability and entrepreneurship skills.
- 27.0 Perform building layout.
- 28.0 Demonstrate advanced laying techniques.
- 29.0 Apply construction techniques and moisture control.
- 30.0 Apply quality control measures.
- 31.0 Build foundations.

- 32.0 Estimate materials and cost.33.0 Operate and maintain power equipment.

Course Title: Masonry 1 Course Number: 8722610

Course Credit: 1

Course Description:

This course provides students with the competencies essential to the masonry industry. These competencies include knowledge and skills related to safety practices, the use of hand tools, the selection and mixing of mortars and concrete, and brick and block laying.

Florid	a Stand	dards		Correlation to CTE Program Standard #

04.0	Investigate the masonry industryThe student will be able to:		
	04.01 Summarize the history of the masonry industry.		
	04.02 Explain the importance of the masonry industry to the local, state and national economy.		
	04.03 Identify employment and advancement opportunities in the masonry industry.		
	04.04 Explain the factors involved in good-quality work.		
	04.05 Describe modern masonry and materials.		
05.0	Follow safety practices relevant to the masonry industryThe student will be able to:		
	05.01 Identify causes and types of accidents.		
	05.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA) in jobsite safety.		
	05.03 Describe the OSHA "Right-to-Know" Law as recorded in (29 CFR-1910.1200)		
	05.04 Recognize jobsite hazards and risk assessment techniques.		
	05.05 Describe first-aid procedures.		
	05.06 Follow safety practices when using tools and equipment.		
	05.07 Explain the importance of hazard communications (HazCom) and Material Safety Data Sheets (MSDSs).		
	05.08 Demonstrate the use of and care of appropriate personal protective equipment (PPE).		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
06.0	Describe the properties, characteristics and uses of brickThe student will be able to:		
	06.01 Explain the brick-manufacturing process.		
	06.02 Identify the properties and characteristics of brick.		
	06.03 Distinguish between standard and modular bricks.		
	06.04 Describe the different types of bricks and their principal uses.		
	06.05 Identify brick positioning in a wall.		
	06.06 Build 4" corner return leads and a wall 4 feet high and 12 feet long.		
07.0	Describe the properties, characteristics and uses of concrete blockThe student will be able to:		
	07.01 Explain the manufacturing process of concrete block.		
	07.02 Identify the properties and characteristics of concrete block.		
	07.03 Describe the different types, including shapes and sizes, of concrete blocks and their principal uses.		
	07.04 Build an 8" block corner return lead 7 courses high.		
08.0	Use hand tools relevant to the masonry industryThe student will be able to:		
	08.01 Identify, care for and use basic hand tools.		
	08.02 Select hand tools for specific jobs.		
	08.03 Identify power tools.		
	08.04 Read ruler to the 1/16".		
	08.05 Read brick-spacing rules and brick modular rules.		
	08.06 Course brick to a given height with the brick spacing rule and the modular rule.		
09.0	Demonstrate understanding of measurements, drawings and specificationsThe student will be able to:		
	09.01 Work with denominate numbers.		
	09.02 Identify the ingredients and properties of mortars.		
	09.03 Read a mason's measure.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	09.04 Convert measurements in the U.S. Customary (English) system into metric equivalents.		
	09.05 Read construction documents and identify basic parts of a drawing set.		
	09.06 Discuss the different types of specifications used in the building industry and the sections that pertain to masonry.		
10.0	Demonstrate mathematics knowledge and skillsThe students will be able to:		
	10.01 Demonstrate knowledge of arithmetic operations.		
	10.02 Analyze and apply data and measurements to solve problems and interpret documents.		
	10.03 Construct charts/tables/graphs using functions and data.		
11.0	Lay brick and/or block to the lineThe student will be able to:		
	11.01 Set up masonry materials.		
	11.02 Temper mortar.		
	11.03 Spread mortar for brick.		
	11.04 Pull a line from established leads.		
	11.05 Butter head joints.		
	11.06 Lay brick to the line.		
	11.07 Maintain proper spacing of head and bed joints.		
	11.08 Cut brick with a hammer, a brick set and a trowel.		
	11.09 Point and tool joints in brick walls.		
	11.10 Repeat the above nine tasks with 8" concrete block.		
	11.11 Demonstrate proper handling of materials to prevent damage.		
12.0	Describe the various types and uses of bondingThe student will be able to:		
	12.01 Define and describe pattern, structural, layout and adhesive bonding.		
	12.02 Differentiate among and use stretcher, common, English, English cross, Flemish and stack bonds.		

Course Title: Masonry 2 Course Number: 8722620

Course Credit: 1

Course Description:

This course is to develop the competencies necessary to the masonry industry. These competencies include knowledge and skills related to the properties, characteristics, and uses of brick and concrete block, bonding, methods of masonry practices, masonry cleaning and scaffolding.

Florid	a Stanc	lards		Correlation to CTE Program Standard #
01.0	Metho	ds and strategie	es for using Florida Standards for grades 09-10 reading in Technical	
	Subjec	cts for student s	uccess in Brick and Block Masonry.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and	
			technical texts, attending to the precise details of explanations or	
			descriptions.	
			LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's	
			explanation or depiction of a complex process, phenomenon, or	
			concept; provide an accurate summary of the text.	
		04.04.0	LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out	
			experiments, taking measurements, or performing technical tasks,	
			attending to special cases or exceptions defined in the text.	
	01.02	Craft and Strue	LAFS.910.RST.1.3	
	01.02			
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific	
			words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.	
			LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text,	
		01.02.2	including relationships among key terms (e.g., force, friction, reaction	
			force, energy).	
			LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a	
			,	l .

Florida Standards		Correlation to CTE Program Standard #
Tioriaa Gtaridaras	procedure, or discussing an experiment in a text, defining the question	on old of to of the folding of the first of
	the author seeks to address.	
	LAFS.910.RST.2.6	
01.03 Integration	of Knowledge and Ideas	
01.03.1	Translate quantitative or technical information expressed in words in a	
	text into visual form (e.g., a table or chart) and translate information	
	expressed visually or mathematically (e.g., in an equation) into words.	
	LAFS.910.RST.3.7	
01.03.2	Assess the extent to which the reasoning and evidence in a text support	
	the author's claim or a recommendation for solving a scientific or	
	technical problem.	
	LAFS.910.RST.3.8	
01.03.3	Compare and contrast findings presented in a text to those from other	
	sources (including their own experiments), noting when the findings	
	support or contradict previous explanations or accounts.	
	LAFS.910.RST.3.9	
	Reading and Level of Text Complexity	
01.04.1	By the end of grade 9, read and comprehend literature [informational	
	texts, history/social studies texts, science/technical texts] in the grades	
	9–10 text complexity band proficiently, with scaffolding as needed at the	
01.04.2	high end of the range.	
01.04.2	By the end of grade 10, read and comprehend literature [informational texts, history/social studies texts, science/technical texts] at the high end	
	of the grades 9–10 text complexity band independently and proficiently.	
	LAFS.910.RST.4.10	
02.0 Methods and stra	tegies for using Florida Standards for grades 09-10 writing in Technical	
	ent success in Brick and Block Masonry.	
02.01 Text Type:		
02.01.1	Write arguments focused on discipline-specific content.	
	LAFS.910.WHST.1.1	
02.01.2	Write informative/explanatory texts, including the narration of historical	
	events, scientific procedures/experiments, or technical processes.	
	LAFS.910.WHST.1.2	
02.02 Production	and Distribution of Writing	
02.02.1	Produce clear and coherent writing in which the development,	
	organization, and style are appropriate to task, purpose, and audience.	
	LAFS.910.WHST.2.4	
02.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
	rewriting, or trying a new approach, focusing on addressing what is most	
	significant for a specific purpose and audience.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
13.0	Select and mix mortars and concreteThe student will be able to:		
	13.01 Identify types of mortars and identify types to use on various concrete masonry units (CMU).		
	13.02 Identify the ingredients and properties of mortars.		
	13.03 Identify the properties and characteristics of concrete.		
	13.04 Identify common admixtures and their uses.		
	13.05 Identify the types and purposes of grouts.		
	13.06 Store and place materials.		
	13.07 Select mortars and concrete.		
	13.08 Mix mortars by hand and by machine.		
	13.09 Mix concrete by hand and by machine.		
	13.10 Clean up tools, equipment and the work site.		
	13.11 Build a brick 4" corner return lead.		
	13.12 Identify common problems found in mortar application and their uses.		
14.0	Demonstrate science knowledge and skillsThe students will be able to:		
	14.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.		

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	14.02	Explain pressure measurement in terms of Pounds per Square Inch (PSI) and inches of		
	44.00	mercury.		
	14.03	Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	14.04	Formulate scientifically investigable questions, construct investigations, collect and		
		evaluate data and develop scientific recommendations based on findings.		
	14.05	Identify health-related problems caused by exposure to work-related chemicals and hazardous materials.		
	14.06	Describe proper precautions for handling work-related chemicals and hazardous materials.		
15.0	Clean	masonryThe student will be able to:		
	15.01	Follow safety practices when cleaning masonry.		
	15.02	Identify reasons for cleaning.		
	15.03	Identify and select cleaning materials and equipment for brick and concrete block.		
	15.04	Prepare cleaning solutions.		
	15.05	Point new and old work.		
	15.06	Prepare the area and protect surrounding area from masonry cleaning solutions.		
	15.07	Clean the wall using various methods.		
16.0	Identify	the various methods of masonry practicesThe student will be able to:		
	16.01	Identify the methods of basic building layouts.		
	16.02	Identify the methods of digging and pouring footings.		
	16.03	Identify the methods of forming, grading and pouring concrete slabs.		
	16.04	Identify the different types of reinforced masonry, flashing, wall reinforcement and ties and use proper technique for installation.		
	16.05	Identify measuring tools.		
	16.06	Identify power equipment.		
17.0	Erect a	and disassemble basic scaffoldsThe student will be able to:		
	17.01	Follow safety practices when working with ladders and scaffolds.		

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
	17.02 Erect and disassemble basic scaffolds.		
18.0	Research sustainability issues related to the masonry professionThe student will be able to:		
	18.01 Describe the impact of the construction industry on the natural environment.		
	18.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.		
	18.03 Identify and analyze sustainable alternatives to conventional masonry practices.		
	18.04 Identify specific practices that can lessen adverse impacts on the environment.		
	18.05 Describe the building assessment tools such as Leadership in Energy and Environmental Design (LEED) and Green Globes.		
	18.06 Identify construction activities pertaining to the masonry profession that contribute to a project's overall sustainability.		

Course Title: Masonry 3

Standards and Benchmarks	FS-M/LA	NGSSS-Sci
Explain the importance of employability and entrepreneurship skillsThe students will be able to:		
26.01 Identify and demonstrate positive work behaviors needed to be employable.		
26.02 Develop personal career plan that includes goals, objectives and strategies.		
26.03 Examine licensing, certification and industry credentialing requirements.		
26.04 Maintain a career portfolio to document knowledge, skills and experience.		
26.05 Evaluate and compare employment opportunities that match career goals.		
26.06 Demonstrate ability to complete job applications and make a resume.		
26.07 Identify and exhibit traits for retaining employment.		
26.08 Identify opportunities and research requirements for career advancement.		
26.09 Research the benefits of ongoing professional development.		
26.10 Examine and describe entrepreneurship opportunities as a career planning option.		
Perform building layoutThe student will be able to:		
27.01 Read and interpret plot plans.		
27.02 Establish building corners.		
27.03 Check and/or establish 90-degree angles using the 3-4-5 rule.		
27.04 Use optical and leaser leveling instruments, transit and leveling rod.		
	to: 26.01 Identify and demonstrate positive work behaviors needed to be employable. 26.02 Develop personal career plan that includes goals, objectives and strategies. 26.03 Examine licensing, certification and industry credentialing requirements. 26.04 Maintain a career portfolio to document knowledge, skills and experience. 26.05 Evaluate and compare employment opportunities that match career goals. 26.06 Demonstrate ability to complete job applications and make a resume. 26.07 Identify and exhibit traits for retaining employment. 26.08 Identify opportunities and research requirements for career advancement. 26.09 Research the benefits of ongoing professional development. 26.10 Examine and describe entrepreneurship opportunities as a career planning option. Perform building layoutThe student will be able to: 27.01 Read and interpret plot plans. 27.02 Establish building corners.	Explain the importance of employability and entrepreneurship skillsThe students will be able to: 26.01 Identify and demonstrate positive work behaviors needed to be employable. 26.02 Develop personal career plan that includes goals, objectives and strategies. 26.03 Examine licensing, certification and industry credentialing requirements. 26.04 Maintain a career portfolio to document knowledge, skills and experience. 26.05 Evaluate and compare employment opportunities that match career goals. 26.06 Demonstrate ability to complete job applications and make a resume. 26.07 Identify and exhibit traits for retaining employment. 26.08 Identify opportunities and research requirements for career advancement. 26.09 Research the benefits of ongoing professional development. 26.10 Examine and describe entrepreneurship opportunities as a career planning option. CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	27.05 Build batter boards and establish building lines and elevations.		
	27.06 Dig, prepare and pour footings to local codes and standards.		
28.0	Demonstrate advanced laying techniques—The student will be able to:		
	28.01 Recognize the structural principles and fundamental uses of basic types of walls.		
	28.02 Recognize the requirement for and function of control joints and expansion joints.		
	28.03 Build various types of walls using proper reinforcement, jointing and bonding techniques.		
	28.04 Lay out specialty structures such as maintenance holes, segmented block walls and screens.		
	28.05 Identify and explain the different types of masonry arches used today.		
	28.06 Lay out a semicircular arch and a jack arch.		
29.0	Apply construction techniques and moisture control—The student will be able to:		
	29.01 Construct masonry around windows, doors and other openings.		
	29.02 Construct pilasters and other types of bracing.		
	29.03 Install various types of insulation used in conjunction with masonry construction.		
	29.04 Identify the need for moisture control in various types of masonry construction, and demonstrate the techniques used to eliminate moisture problems.		
	29.05 Construct corbelling in a double-wythe wall.		
	29.06 Join intersecting walls.		
	29.07 Install flashing.		
30.0	Apply quality control measures—The student will be able to:		
	30.01 Describe industry standards for quality control.		
	30.02 Describe how to build masonry sample panels and prisms.		
	30.03 Perform a slump test.		
	30.04 Describe and perform field inspections.

Course Title: 8722650
Course Number: Masonry 5

Course Credit: 1

Course Description:

This course provides students with an in-depth study of foundation building, materials and cost estimations and power-equipment operation.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
31.0	Build foundationsThe student will be able to:		
	31.01 Build an 8" block corner 7 courses high.		
	31.02 Build an 8" block corner to the correct height and range of a given foundation batter board line.		
	31.03 Bond and build an 8" block corner to the correct height and range on the opposite corner of a given foundation batter board line.		
	31.04 Pull a line and build an 8" block wall between the block corners.		
	31.05 Establish and build the other corner leads.		
	31.06 Build foundation walls to floor elevations.		
	31.07 Make foundation walls waterproof, if required.		
	31.08 Install flashing, anchor bolts, termite shields and weep holes; install vents (if a wooden floor system is used).		
32.0	Estimate materials and costThe student will be able to:		
	32.01 Estimate the materials needed for a specific job.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	32.02 Estimate the cost of the materials, labor, unit/ labor costs and sales tax.		
33.0	Operate and maintain power equipmentThe student will be able to:		
	33.01 Follow safety practices when using and maintaining power equipment.		
	33.02 Use masonry saw with an abrasive blade to cut masonry units.		
	33.03 Use masonry saw with a diamond blade to cut masonry units.		
	33.04 Set up, operate and maintain power tools and equipment.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Air Conditioning, Refrigeration and Heating Technology

Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	Secondary – Career Preparatory
Program Number	8723000
CIP Number	0647020303
Grade Level	9-12, 30, 31
Standard Length	7 Credits
Teacher Certification	AC HEAT ME @7 7G REFRG MECH 7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning and refrigeration and ventilation industry. The student should obtain EPA certification prior to leaving school in order to be employed in any job that requires work with refrigerants.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8713010	Air Conditioning, Refrigeration &	1 Credit		2	VO
		Heating Technology 1				
	8713020	Air Conditioning, Refrigeration &	1 Credit	49-9021	2	VO

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

[#] Alignment attempted, but no correlation to academic course

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 04.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 05.0 Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industry.
- 06.0 Demonstrate mathematics knowledge and skills.
- 07.0 Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipment.
- 08.0 Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their components.
- 09.0 Select and test electrical generation and distribution components for commercial heating and air conditioning systems.
- 10.0 Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systems.
- 11.0 Troubleshoot and wire electrical motors and their components.
- 12.0 Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems.
- 13.0 Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems.
- 14.0 Explain the function of basic electronics.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Air Conditioning, Refrigeration and Heating Technology.
- 18.0 Read construction documents.
- 19.0 Describe the history and concepts of heating, air-conditioning and refrigeration.
- 20.0 Demonstrate science knowledge and skills.
- 21.0 Explain the properties of matter and heat behavior.
- 22.0 Analyze fluids, pressures, refrigerants and related codes.
- 23.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 24.0 Select appropriate commercial compressors.
- 25.0 Test and adjust commercial evaporative condensers.
- 26.0 Maintain, test and troubleshoot commercial evaporators.
- 27.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 28.0 Explain the importance of employability and entrepreneurship skills.
- 29.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.

- 30.0 Utilize and operate mechanical refrigeration servicing and testing equipment.
- 31.0 Assist in the installation of a residential heating and air-conditioning system and determine start-up procedures.
- 32.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 33.0 Demonstrate a working knowledge of refrigerants and oils.
- 34.0 Interpret, use and modify construction drawings and specifications.
- 35.0 Conduct system startup and shutdown.
- 36.0 Design heating and cooling systems.
- 37.0 Use combustion-type heating servicing and testing equipment.
- 38.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 39.0 Maintain, test and adjust commercial heating and air-conditioning accessories.
- 40.0 Maintain, troubleshoot and repair commercial heating systems.
- 41.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.
- 42.0 Demonstrate knowledge of retail refrigeration systems.
- 43.0 Demonstrate knowledge of commercial and industrial refrigeration systems.
- 44.0 Develop an understanding of hydronic systems.
- 45.0 Develop an understanding of steam systems.

Course Title: Air Conditioning, Refrigeration and Heating Technology 1

Course Number: 8713010

Course Credit: 1

Course Description:

This course provides students with competencies essential to the air conditioning, refrigeration and heating industry. These competencies include knowledge and skills related to safety practices, history and concepts, materials and tools, and troubleshooting electrical control systems.

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
04.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance - The student will be able to:	-	
	04.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	04.02 Explain the reasons for regular safety meetings and for company safety policies.		
	04.03 Explain the need for employee-background checks and medical examinations.		
	04.04 Identify and use appropriate fire extinguishers and other such safety devices.		
	04.05 Identify and follow emergency and rescue procedures.		
	04.06 Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.		
	04.07 Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.		
	04.08 Apply specific safety and recovery practices for refrigerants used in the industry.		
	04.09 Apply specific safety practices as they relate to handling and storing cylinders and materials.		
	04.10 Select and wear proper protective clothing and equipment.		
	04.11 Identify and use specific safety practices when using soldering and brazing skills.		
	04.12 Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	04.13 Follow safety precautions when using hand and power tools.		
	04.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.		
	04.15 Explain emergency procedures to follow in response to workplace accidents.		
	04.16 Create a disaster and/or emergency response plan.		
05.0	Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industryThe student will be able to:		
	05.01 Identify and use basic hand tools and tool accessories; power tools (electric, mechanical and pneumatic, if available); pipe and tube-working tools; and specialized tools of the trade.		
	05.02 Apply appropriate care and maintenance procedures for tools and tool accessories, following the directions in the tool-equipment manufacturer's manual.		
06.0	Demonstrate mathematics knowledge and skillsThe student will be able to:		
	06.01 Demonstrate knowledge of arithmetic operations.		
	06.02 Analyze and apply data and measurements to solve problems and interpret documents.		
	06.03 Construct charts/tables/graphs using functions and data.		
07.0	Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipmentThe student will be able to:		
	07.01 Explain the principles of electricity.		
	07.02 Explain single- and three-phase power distribution.		
	07.03 Define and explain watts, ohms, volts and amps.		
	07.04 Identify and explain electrical measuring tools and devices.		
	07.05 Explain the standards for and ways to measure watts, resistance, voltage and amperage using appropriate instruments or devices.		
	07.06 Identify and explain appropriate electrical wiring symbols.		
	07.07 Draw and explain a wiring schematic diagram for a control system.		
	07.08 Create a wiring schematic for an air conditioner an electric furnace, a heat pump, an oil furnace (optional) and a gas furnace.		
	07.09 Explain codes and standards and safety requirements for working with the electrical components used in heating, air conditioning and refrigeration.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	07.10 Troubleshoot protection devices, such as fuses and breakers.		
	07.11 Interpret tables and charts from the National Electrical Codes (NEC).		
08.0	Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their componentsThe student will be able to:		
	08.01 Identify and explain the operations of electrical control systems and their components (zone damper motors, duel fuel lock out controls, outdoor thermostats/low ambient controls, defrost controls/timers and auxiliary heating controls).		
	08.02 Identify, install and troubleshoot controls for heating, air-conditioning and refrigeration systems.		
	08.03 Explain the operation of different types of electromechanical thermostats.		
	08.04 Wire basic heating, air-conditioning and refrigeration systems.		
	08.05 Troubleshoot operational problems for different types of electromechanical thermostats.		
	08.06 Explain the electrical and mechanical operations of the basic heat pump.		
09.0	Select and test electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:		
	09.01 Determine wire sizes and voltage drops.		
	09.02 Describe the operation of various types of transformers.		
	09.03 Draw and identify various power-transformers.		
	09.04 Test, size and replace protection devices such as fuses and breakers, motor starters and overloads.

10.0	Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systemsThe student will be able to:		
	10.01 Explain how alternating current is developed and draw a sine wave.		
	10.02 Identify single-phase and three-phase wiring arrangements.		
	10.03 Explain how phase shift occurs in inductors and capacitors.		
	10.04 Describe the types of capacitors and their applications.		
	10.05 Explain the operation of single-phase and three-phase induction motors.		
	10.06 Identify the various types of single-phase motors and their applications.		
	10.07 State and demonstrate the safety precautions, such as lock out / tag out, which must be followed when working with electrical equipment.		
	10.08 Explain how the electric company uses a demand meter.		
	10.09 Identify and explain the operations and applications of various types of electrical motors and their components as used in commercial heating and air-conditioning systems.		
	10.10 Maintain, test and troubleshoot various types of commercial electrical motors and their components as used in commercial heating and air-conditioning systems.		
	10.11 Demonstrate the proper use of motor testing equipment.		
11.0	Troubleshoot and wire electrical motors and their componentsThe student will be able to:		
	11.01 Identify and explain the functions of various types of motors and their components.		
	11.02 Troubleshoot, test and analyze motors, using various methods.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	11.03 Identify, troubleshoot and wire various types of electric motors.		
	11.04 Reverse the rotation of a motor.		
12.0	Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems The student will be able to:		
	12.01 Explain the basic principles and functions of Direct Digital Control (DDC).		
	12.02 Explain basic solid-state circuits and boards.		
	12.03 Identify, test and replace circuits and boards.		
	12.04 Identify and explain the functions of a building-management system.		
	12.05 Program a programmable thermostat.		
13.0	Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systemsThe student will be able to:		
	13.01 Explain how the principles of designing an electrical system for residential heating and air-conditioning systems apply to commercial heating and air-conditioning systems.		
	13.02 Define and compare single- and multiphase voltage and current related to commercial heating and air-conditioning systems.		
	13.03 Calculate various circuit loads in commercial heating and air-conditioning applications using Ohm's law.		
	13.04 Troubleshoot electrical circuits for commercial heating and air-conditioning systems		
14.0	Explain the function of basic electronicsThe student will be able to:		
	14.01 Explain the basic theory of electronics and semiconductors.		
	14.02 Explain how various semiconductor devices such as diodes, LEDs and photo diodes work and how they are used in power and control circuits.		
	14.03 Identify different types of resistors and explain how their resistance values can be determined.		
	14.04 Describe the operation and function of thermistors and cad cells.		
	14.05 Test semiconductor components.		
	14.06 Identify the connectors on a personal computer.

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
18.0	Read construction documentsThe student will be able to:		
	18.01 Recognize and identify basic construction drawing terms, components and symbols.		
	18.02 Relate information on construction drawings to actual locations on the print.		
	18.03 Recognize different classifications of construction drawings.		
	18.04 Interpret and use drawing dimensions.		
19.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:		
	19.01 Identify educational paths to career opportunities in the HVAC profession.		
	19.02 Identify and explain the four major refrigeration components.		
	19.03 Identify and explain the characteristics of a compression-cycle refrigerant system.		
	19.04 Differentiate between air-conditioning and refrigeration.		
	19.05 Differentiate between split systems and package systems.		
	19.06 Describe the benefits of conditioned air and environments.		
	19.07 Discuss the impact of heating, air-conditioning and refrigeration on society.		
	19.08 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, air-conditioning and refrigeration industry and in the environment and explain their future ramifications.		
	19.09 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as well as the manufacturer's installation instructions.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	19.10 Identify various professional organizations, associations and societies, and explain the purposes.	ir	
20.0	Demonstrate science knowledge and skillsThe student will be able to:		
	20.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	20.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.		
21.0	Explain the properties of matter and heat behaviorThe student will be able to:		
	21.01 Describe and explain freezing point, critical temperature and absolute zero.		
	21.02 Describe matter, heat and heat transfer.		
	21.03 Differentiate between heat and temperature.		
	21.04 Explain and distinguish among the characteristics of the three states of matter.		
	21.05 Explain the relationship between temperature and humidity.		
	21.06 Differentiate between latent heat and sensible heat.		
22.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:		
	22.01 Identify the refrigeration cycle.		
	22.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.		
	22.03 Define and explain pressure, fluid, and temperature.		
	22.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.		
	22.05 Identify and explain the classifications, properties and uses of different refrigerants.		
	22.06 Explain how fluids react and flow in a closed versus an open environment or vessel.		
	22.07 Define and identify "color-coding" of refrigerant cylinders.		
	22.08 Compare Pressure and Temperature (P/T) charts.		
	22.09 Explain the proper methods of transferring, storing and recovering refrigerants.		
	22.10 Explain the effects of an improper refrigerant and contaminants in a system.		

CTE S	tandar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
23.0		ate heating, air-conditioning and refrigeration system components and accessoriesThe at will be able to:		
	23.01	Explain the types, operation, use and maintenance requirements of		
		a. Compressors (such as reciprocating, rotary, screw and scroll)		
		b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube, and fin and tube)		
		 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market) 		
	23.02	Evaluate metering-device performance.		
	23.03	Explain the methods of compression, lubrication and compressor loading and unloading.		
	23.04	Analyze the operating condition of a compressor.		
	23.05	Test, troubleshoot and correct the causes of mechanical problems in a heating, airconditioning and refrigeration system.		
	23.06	Identify the location and explain the uses of refrigerant flow accessories.		
	23.07	Identify the location and explain the uses of heating, air-conditioning and refrigeration- system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).		
	23.08	Evaluate system performance.		

Course Title: Air Conditioning, Refrigeration and Heating Technology 4

Course Number: 8713040

Course Credit: 1

Course Description:

This course covers competencies in commercial compressors, condensers and evaporators; piping, tubing and fittings; and employability skills.

Florid	a Stand	lards		Correlation to CTE Program Standard #
15.0			es for using Florida Standards for grades 11-12 reading in Technical	
			uccess in Air Conditioning, Refrigeration and Heating Technology.	
	15.01	Key Ideas and		
		15.01.1	Cite specific textual evidence to support analysis of science and	
			technical texts, attending to important distinctions the author makes and	
			to any gaps or inconsistencies in the account.	
		45.04.0	LAFS.1112.RST.1.1	
		15.01.2	Determine the central ideas or conclusions of a text; trace the text's	
			explanation or depiction of a complex process, phenomenon, or	
			concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		15.01.3		
		15.01.5	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks,	
			attending to special cases or exceptions defined in the text.	
			LAFS.1112.RST.1.3	
	15.02	Craft and Strue		
		15.02.1	Determine the meaning of symbols key terms, and other domain-specific	
			words and phrases as they are used in a specific scientific or technical	
			context relevant to grades 11–12 texts and topics.	
			LAFS.1112.RST.2.4	
		15.02.2	Analyze how the text structures information or ideas into categories or	
			hierarchies, demonstrating understanding of the information or ideas.	
			LAFS.1112.RST.2.5	
		15.02.3	Analyze the author's purpose in providing an explanation, describing a	
			procedure, or discussing an experiment in a text, identifying important	
			issues that remain unresolved.

24.0	Select appropriate commercial compressorsThe student will be able to:		
	24.01 Compare commercial-compressor requirements with those for residential and light commercial heating and air-conditioning systems.		
	24.02 Select appropriate commercial compressors for cooling requirements.		
	24.03 Describe the mechanical operation for each type of compressor.		
	24.04 Explain compressor lubrication methods.		
	24.05 Explain methods used to control compressor capacity.		
	24.06 Describe how compressor protection devices operate.		
	24.07 Perform the common procedures used when field servicing open and semi-hermetic compressors.		
25.0	Test and adjust commercial evaporative condensersThe student will be able to:		
	25.01 Determine the proper air and fluid flow for commercial evaporative condensers.		
	25.02 Test and adjust the airflow for proper temperature difference.		
	25.03 Test and adjust the water flow for proper GPM and temperature difference.		
	25.04 Check for proper water treatment.		
26.0	Maintain, test and troubleshoot commercial evaporatorsThe student will be able to:		
	26.01 Determine the operational requirements for evaporators used in commercial heating and air-conditioning applications.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	26.02 Select appropriate evaporators for commercial heating and air-conditioning systems.		
	26.03 Maintain, test and adjust various commercial heating and air-conditioning accessories.		
27.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:		
	27.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.		
	27.02 Bend tubing, using tube benders.		
	27.03 Connect tubing using flared fittings and compression fittings.		
	27.04 Connect tubing, using solderless connectors.		
	27.05 Connect tubing, using a swaged-joint connection.		
	27.06 Identify and use various types of torches.		
	27.07 Identify, select and use appropriate brazing alloys, materials and skills.		
	27.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products from heat.		
	27.09 Braze tubing.		
	27.10 Silver-braze brass, steels and copper.		
	27.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.		
	27.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.		
	27.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.		
	27.14 Maintain project time and materials lists.		
	27.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.		
28.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:		
	28.01 Identify and demonstrate positive work behaviors needed to be employable.		
	28.02 Develop personal career plan that includes goals, objectives and strategies.		
	28.03 Examine licensing, certification and industry credentialing requirements.		

CTE Standards and Benchmarks	FS-M/LA	NGSSS-Sci
28.04 Maintain a career portfolio to document knowledge, skills and experience.		
28.05 Evaluate and compare employment opportunities that match career goals.		
28.06 Identify and exhibit traits for retaining employment.		
28.07 Identify opportunities and research requirements for career advancement.		
28.08 Research the benefits of ongoing professional development.		
28.09 Examine and describe entrepreneurship opportunities as a career planning option.		

Course Title: Air Conditioning, Refrigeration and Heating Technology 5

Course Number: 8713050

Course Credit: 1

Course Description:

This course covers competencies in ventilation pipe sizing; refrigeration servicing and testing; installation; startup and check out; and refrigerants and oils.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	standards and Benchmarks	FS-M/LA	NGSSS-Sci
29.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing The student will be able to:		
	29.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.		
	29.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.		
	29.03 Explain pressure and temperature drops.		
30.0	Utilize and operate mechanical refrigeration servicing and testing equipmentThe student will be able to:		
	30.01 Identify the effects of superheat and sub-cooling on a system.		
	30.02 Identify and explain the functions of servicing and testing equipment (such as vacuum pumps, micron gauges, EPA-approved equipment, leak detectors and charging systems).		
	30.03 Operate a refrigerant recovery system.		
	30.04 Explain the standards for and ways to measure, test, maintain and evacuate a mechanical heating, air-conditioning and refrigeration system.		
	30.05 Evacuate the refrigerant system with various vacuum methods.		
	30.06 Demonstrate compliance with Environmental Protection Agency (EPA) rules and		

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
		regulations and if possible, take the EPA test.		
	30.07	Charge various air-conditioning and mechanical refrigeration systems by various methods.		
		Demonstrate the effects of superheat and sub-cooling on a system utilizing test equipment (such as thermometers and gages)		
31.0		in the installation of a residential heating and air-conditioning system and determine start- ceduresThe student will be able to:		
	31.01	Read and comply with dispatch orders.		
	31.02	Explain local codes and ordinances.		
	31.03	Select and use appropriate tools and safety practices to test equipment.		
	31.04	Determine the electrical requirements of equipment.		
	31.05	Assist in the installation of a heating and air-conditioning system to the manufacturer's installation and operation specifications using a practical knowledge of duct fabrication methods.		
	31.06	Determine the proper charge in a residential air-conditioning unit and adjust superheat.		
	31.07	Determine the temperature drop across the evaporator.		
	31.08	Determine the temperature rise across the condenser.		
	31.09	Write a service report.		
	31.10	Apply good customer-relations skills.		
32.0		ict start-up and check-out procedures for mechanical heating and air-conditioning systems- student will be able to:		
	32.01	Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.		
	32.02	Determine the start-up and checkout procedures recommended by different manufacturers.		
	32.03	Determine the electrical requirements of equipment.		
	32.04	Select and use appropriate tools, instruments and test equipment following safety precautions.		
	32.05	Determine the temperature drop across the outdoor coil on a heat pump.		
	32.06	Determine the temperature rise across the indoor coil on a heat pump.		

CTE S	Standar	ds and Benchmarks	FS-M/LA	NGSSS-Sci
	32.07	Test for a proper refrigerant charge in a residential heat pump.		
	32.08	Apply good customer-relations skills.		
33.0	Demo	nstrate a working knowledge of refrigerants and oilsThe student will be able to:		
	33.01	Identify the refrigerants in common use and state the types of applications in which each are used.		
	33.02	Explain the effects of releasing refrigerants into the atmosphere.		
	33.03	Explain how refrigerants are classified by their chemical composition.		
	33.04	Describe the color-coding scheme used to identify refrigerant cylinders.		
	33.05	Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.		
	33.06	Interpret a P-T chart for an azeotrope refrigerant.		
	33.07	Calculate superheat and sub cooling.		
	33.08	Demonstrate refrigerant leak detecting methods.		
	33.09	Identify the different types of oils used in refrigeration systems and explain their relationships to the various refrigerants.		
	33.10	Explain how to add and remove oil from a system.		
	33.11	Describe how to test oil for contamination.		

Course Title: Air Conditioning, Refrigeration and Heating Technology 6

Course Number: 8713060

Course Credit: 1

Course Description:

This course covers competencies in construction drawings and specifications; startup and shutdown; system design; combustion-type heating servicing and testing; troubleshooting; and installation.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
34.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:		
	34.01 Read mechanical plans within a set of construction drawings explain their relationship.		
	34.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.		
	34.03 Interpret specification documents and apply them to the plans.		
	34.04 Interpret shop drawings and apply them to the plans and specifications.		
	34.05 Develop a field set of as-built drawings.		
	34.06 Identify the steps required for transferring design information to component production.		
	34.07 List and classify materials most commonly used in HVAC systems.		
35.0	Conduct system startup and shutdownThe student will be able to:		
	35.01 Start up and shut down an air handler and related forced-air distribution system.		
	35.02 Test compressor oil for acid contamination.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	35.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.		
36.0	Design heating and cooling systemsThe student will be able to:		
	36.01 Identify and describe the steps in the system design process.		
	36.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.		
	36.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.		
	36.04 Complete a load estimate to determine the heating and/or cooling load of a building.		
	36.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.		
	36.06 Select heating and/or cooling equipment using manufacturers' product data.		
	36.07 Identify the various types of duct systems and explain why and where each type is used.		
	36.08 Demonstrate the effect of fittings and transitions on duct system design.		
	36.09 Use a friction loss chart and duct sizing table to size duct.		
	36.10 Install insulation and vapor barriers used in duct systems.		
	36.11 Select and install refrigerant and condensate piping following design principles.		
37.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:		
	37.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.		
	37.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).		
	37.03 Use the servicing and testing equipment.		
	37.04 Test, analyze and troubleshoot combustion-type-heating systems.		
38.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:		
	38.01 Identify and discuss the safety and regulation issues and concerns.		
	38.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	38.03 Identify and size various types of gas valves and regulators.		
	38.04 Determine the application of gas valves and regulators.		
	38.05 Troubleshoot gas valves and regulators.		
39.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to		
	39.01 Compare commercial accessories with residential and light- commercial-heating and airconditioning accessories.		
	39.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.		
	39.03 Maintain, test and adjust commercial heating and air-conditioning accessories.		
40.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:		
	40.01 Identify the components of various commercial heating systems.		
	40.02 Explain the operational principles of various commercial heating systems.		
	40.03 Test and analyze heating air-distribution systems.		
	40.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.		
41.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:		
	41.01 Follow safety precautions.		
	41.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.		
	41.03 Lay out, construct and troubleshoot comfort systems.		
	41.04 Test and analyze systems.		
	41.05 Test and analyze heat-recovery systems.		

Course Title: Air Conditioning, Refrigeration and Heating Technology 7

Course Number: 8713070

Course Credit: 1

Course Description:

This course covers competencies in retail, commercial and industrial refrigeration systems; hydronic systems; and steam systems.

Abbreviations:

FS-M/LA = Florida Standards for Math/Language Arts NGSSS-Sci = Next Generation Sunshine State Standards for Science

CTE S	CTE Standards and Benchmarks		NGSSS-Sci
42.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:		
	42.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.		
	42.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.		
	42.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.		
	42.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.		
	42.05 Describe the various methods of defrost used in retail refrigeration systems.		
	42.06 Identify and describe the applications for the various types of retail refrigeration systems.		
	42.07 Describe the control system components used in retail refrigeration systems.		
	42.08 Explain the operating sequence of a retail refrigeration system.		
	42.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.		
43.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:		

CTE S		ds and Benchmarks	FS-M/LA	NGSSS-Sci
	43.01	Identify different types of refrigerated coolers and display cases and describe each one's common application.		
	43.02	Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.		
	43.03			
	43.04	Identify packaged condensing units and unit coolers. Describe their applications, operation and installation considerations.		
	43.05	Identify two-stage compressors and explain their operation and applications.		
	43.06	Identify the various accessories used in commercial refrigeration systems and explain why each is used and where it should be installed in the system.		
	43.07	and how it works.		
	43.08	Compare the components used in ammonia systems with those used in halocarbon-based refrigerant systems.		
44.0	Develo	pp an understanding of hydronic systemsThe student will be able to:		
	44.01	Explain the terms and concepts used when working with hot-water heating and chilled-water cooling systems.		
	44.02	Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water systems.		
	44.03	Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperature water systems.		
	44.04	Describe the safety precautions used when working with hot-water/chilled-water systems.		
	44.05	Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.		
	44.06	Identify the common piping configurations used with hot-water heating and chilled-water cooling systems.		
	44.07	Explain the principles involved and describe the procedures used in balancing hydronic systems.		
	44.08	Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.		
	44.09	Read the pressure across a water system circulating pump.		
45.0	Develo	op an understanding of steam systemsThe student will be able to:		
	45.01	Explain the terms and concepts used when working with steam-heating systems.		

CTE Standard	ds and Benchmarks	FS-M/LA	NGSSS-Sci
45.02	Identify major components of steam heating systems and explain the purpose of each.		
45.03	Describe the basic steam-heating cycle.		
45.04	Safely perform selected operating procedures on low-pressure steam boilers and systems.		
45.05	Install and maintain selected steam traps.		
45.06	Identify the common piping configurations used with steam-heating systems.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Tile Setting

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

Secondary – Career Preparatory				
Program Number	8723100			
CIP Number	0646010106			
Grade Level	9-12,30,31			
Standard Length	3 Credits			
Teacher Certification	TEC CONSTR ¶ 7 ¶ G BLDG CONST ¶ 7 ¶ G TILE SET 7G			
CTSO	SkillsUSA			
SOC Codes (all applicable)	47-2044 - Tile and Marble Setters			
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml			

Purpose

The purpose of this program is to prepare students for work as tile setters.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, proper care and use of hand tools and equipment, tile setting materials, basic blueprint reading, trade math and estimating materials for tile setting. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of one Occupational Completion Point (OCP).

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation
						Requirement
	8723110	Tile Setting 1	1 Credit		2	VO
	8723120	Tile Setting 2	1 Credit		2	VO
Α	8723130	Tile Setting 3	1 Credit	47-2044	2	VO

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Courses	Anatomy/ Physiology Honors	Astronomy Solar/Galactic Honors	Biology 1	Chemistry 1	Earth- Space Science	Environmental Science	Genetics	Integrated Science	Marine Science 1 Honors	Physical Science	Physics 1

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

[#] Alignment attempted, but no correlation to academic course

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Tile Setting.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Tile Setting.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Tile Setting.
- 04.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 05.0 Prepare walls for drywall application of ceramic tile.
- 06.0 Prepare walls using wire lathe, scratch coat and screed coat for wet wall application of ceramic tile.
- 07.0 Apply tile and grout utilizing drywall techniques.
- 08.0 Apply tile and grout utilizing wet wall techniques.
- 09.0 Layout, cut and install ceramic tile on walls and floors.
- 10.0 Interpret blueprints and estimate materials for tile work.
- 11.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Tile Setting.
- 12.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Tile Setting.
- 13.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Tile Setting.
- 14.0 Demonstrate mathematics knowledge and skills.
- 15.0 Proportion and mix mortar for tile installation.
- 16.0 Demonstrate appropriate understanding of basic science.
- 17.0 Explain the importance of employability and entrepreneurship skills.

Florida Department of Education Student Performance Standards

Course Title: Tile Setting 1
Course Number: 8723110

Course Credit: 1

Course Description:

This course is designed to provide instruction in adhesives, bedding materials, clay wall applications, masonry bed application, layout, setting, cutting and grouting of ceramic tile.

14.0	Demonstrate mathematics knowledge and skillsThe students will be able to:		
	14.01 Demonstrate knowledge of arithmetic operations.		
	14.02 Analyze and apply data and measurements to solve problems and interpret documents.		
	14.03 Construct charts/tables/graphs using functions and data.		
	14.04 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.		
	14.05 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.		
	14.06 Add, subtract, multiply and divide using fractions, decimals and whole numbers.		
	14.07 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.		
	14.08 Demonstrate an understanding of federal, state and local taxes and their computation.		
15.0	Proportion and mix mortar for tile installationThe student will be able to:		
	15.01 Mix setting materials manually with hand tools and equipment.		
	15.02 Mix setting materials with a power mixer.		
	15.03 Follow safety practices when mixing setting materials.		
	15.04 Follow manufacturer directions.		
	15.05 Select and mix adhesives to set tile.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	15.06 Determine quantity and type of setting materials needed.		
	15.07 Proportion setting materials ingredients for specific uses.		
16.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:		
	16.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	16.02 Draw conclusions or make inferences from data.		
	16.03 Identify health-related problems, which may result from exposure to work related chemicals and hazardous materials and know the proper precautions required for handling such materials.		
	16.04 Understand pressure measurement in terms of PSI, inches of mercury and KPA.		
17.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:		
	17.01 Identify and demonstrate positive work behaviors needed to be employable.		
	17.02 Develop personal career plan that includes goals, objectives and strategies.		
	17.03 Examine licensing, certification and industry credentialing requirements.		
	17.04 Maintain a career portfolio to document knowledge, skills and experience.		
	17.05 Evaluate and compare employment opportunities that match career goals.		
	17.06 Identify and exhibit traits for retaining employment.		
	17.07 Identify opportunities and research requirements for career advancement.		
	17.08 Research the benefits of ongoing professional development.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If

needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Drafting

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	Secondary – Career Preparatory
Program Number	8725000
CIP Number	0648010102
Grade Level	9-12, 30, 31
Standard Length	4 Credits
Teacher Certification	BLDG CONSTR @7 7G DRAFTING @7 7G TEC DRAFT 7G TEC CONSTR @7 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3011 - Architectural and Civil Drafters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

Purpose

The purpose of this program is to prepare students for employment or advanced training in the drafting industry. After completing courses in this program, students may elect to continue their studies through courses offered in the Architectural Drafting, Mechanical Drafting or Structural Drafting programs.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to freehand sketching, drafting by hand and computer and 3D modeling. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points. The four courses Drafting 1, 2, 3, 4, under the drafting program are considered core courses. When the recommended sequence is followed, the structure will allow students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or become an occupational completer.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
Α	8725010	Drafting 1	1 Credit	17-3011	3	PA
	8725020	Drafting 2	1 Credit		3	PA
	8725030	Drafting 3	1 Credit		3	PA
В	8725040	Drafting 4	1 Credit	17-3011	3	PA

EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Drafting.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Drafting.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Drafting.
- 04.0 Apply basic drafting skills.
- 05.0 Design and prepare multi-view drawings.
- 06.0 Prepare sectional views.
- 07.0 Prepare auxiliary drawings.
- 08.0 Apply basic dimensioning.
- 09.0 Prepare pictorial drawings.
- 10.0 Prepare surface developments.
- 11.0 Design and prepare basic architectural drawings.
- 12.0 Perform basic computer aided drafting functions.
- 13.0 Prepare basic civil drawings.
- 14.0 Prepare computer aided drawings (CAD).
- 15.0 Research the history of the built environment.
- 16.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Drafting.
- 17.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Drafting.
- 18.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Drafting.
- 19.0 Perform computer aided drafting functions.
- 20.0 Describe the importance of professional ethics and legal responsibilities in the design and construction industry.
- 21.0 Examine career opportunities in drafting and related fields to determine requisite skills, qualifications, supply and demand, market location and potential earnings
- 22.0 Apply three-dimensional modeling concepts.
- 23.0 Explain three-dimensional modeling.
- 24.0 Investigate sustainability issues related to the design, construction and maintenance of the built environment.

			ccess in Drafting.	
	01.01 Key	Ideas and	Details	
	01.0	1.1	Cite specific textual evidence to support analysis of science and	
			technical texts, attending to the precise details of explanations or	
			descriptions.	
			LAFS.910.RST.1.1	
	01.0		Determine the central ideas or conclusions of a text; trace the text's	
			explanation or depiction of a complex process, phenomenon, or	
			concept; provide an accurate summary of the text.	
			LAFS.910.RST.1.2	
	01.0		Follow precisely a complex multistep procedure when carrying out	
			experiments, taking measurements, or performing technical tasks,	
			attending to special cases or exceptions defined in the text.	
	04.00 0 (LAFS.910.RST.1.3	
	01.02 Craf			
	01.0		Determine the meaning of symbols, key terms, and other domain-specific	
			words and phrases as they are used in a specific scientific or technical	
			context relevant to grades 9–10 texts and topics.	
	04.0	2.2	LAFS.910.RST.2.4	
	01.0		Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction	
			force, energy).	
			LAFS.910.RST.2.5	
	01.0	12.3	Analyze the author's purpose in providing an explanation, describing a	
	01.0	2.5	procedure, or discussing an experiment in a text, defining the question	
			the author seeks to address.	
			the author seeks to address.

	a Otani	aar ao	LAFS.910.RST.2.6	oon olation to or a rogitain olandara "
	01.03	Integration of	f Knowledge and Ideas	
		01.03.1	Translate quantitative or technical information expressed in words in a	
			text into visual form (e.g., a table or chart) and translate information	
			expressed visually or mathematically (e.g., in an equation) into words.	
			LAFS.910.RST.3.7	
		01.03.2	Assess the extent to which the reasoning and evidence in a text support	
			the author's claim or a recommendation for solving a scientific or	
			technical problem.	
			LAFS.910.RST.3.8	
		01.03.3	Compare and contrast findings presented in a text to those from other	
			sources (including their own experiments), noting when the findings	
			support or contradict previous explanations or accounts.	
	04.04	D (D	LAFS.910.RST.3.9	
	01.04		ading and Level of Text Complexity	
		01.04.1	By the end of grade 9, read and comprehend literature [informational	
			texts, history/social studies texts, science/technical texts] in the grades	
			9–10 text complexity band proficiently, with scaffolding as needed at the	
		01.04.2	high end of the range. By the end of grade 10, read and comprehend literature [informational]	
		01.04.2	texts, history/social studies texts, science/technical texts] at the high end	
			of the grades 9–10 text complexity band independently and proficiently.	
			LAFS.910.RST.4.10	
02.0	Metho	ds and strated	gies for using Florida Standards for grades 09-10 writing in Technical	
02.0			success in Drafting.	
		Text Types a		
		02.01.1	Write arguments focused on discipline-specific content.	
			LAFS.910.WHST.1.1	
		02.01.2	Write informative/explanatory texts, including the narration of historical	
			events, scientific procedures/experiments, or technical processes.	
			LAFS.910.WHST.1.2	
	02.02		nd Distribution of Writing	
		02.02.1	Produce clear and coherent writing in which the development,	
			organization, and style are appropriate to task, purpose, and audience.	
			LAFS.910.WHST.2.4	
		02.02.2	Develop and strengthen writing as needed by planning, revising, editing,	
			rewriting, or trying a new approach, focusing on addressing what is most	
			significant for a specific purpose and audience.	
		00.00.0	LAFS.910.WHST.2.5	
		02.02.3	Use technology, including the Internet, to produce, publish, and update	

Florid	a Stanc	lards		Correlation to CTE Program Standard #
T TO T TO	a Otalie	iai ao	individual or shared writing products, taking advantage of technology's	
			capacity to link to other information and to display information flexibly	
			and dynamically.	
			LAFS.910.WHST.2.6	
	02.03		Build and Present Knowledge	
		02.03.1	Conduct short as well as more sustained research projects to answer a	
			question (including a self-generated question) or solve a problem; narrow	
			or broaden the inquiry when appropriate; synthesize multiple sources on	
			the subject, demonstrating understanding of the subject under investigation.	
			LAFS.910.WHST.3.7	
		02.03.2	Gather relevant information from multiple authoritative print and digital	
		02.00.2	sources, using advanced searches effectively; assess the usefulness of	
			each source in answering the research question; integrate information	
			into the text selectively to maintain the flow of ideas, avoiding plagiarism	
			and following a standard format for citation.	
			LAFS.910.WHST.3.8	
		02.03.3	Draw evidence from informational texts to support analysis, reflection,	
			and research.	
	02.04	Range of Writ	LAFS.910.WHST.3.9	
	02.04	02.04.1	Write routinely over extended time frames (time for reflection and	
		02.04.1	revision) and shorter time frames (a single sitting or a day or two) for a	
			range of discipline-specific tasks, purposes, and audiences.	
			LAFS.910.WHST.4.10	
03.0	Metho	ds and strategi	es for using Florida Standards for grades 09-10 Mathematical Practices in

Florida Department of Education Student Performance Standards

Course Title: Drafting 2 Course Number: 8725020

Course Credit: 1

Course Description:

This course provides competencies in basic architectural and civil computer-aided drafting and design, as well as an overview of the history of the built environment.

Florid	la Stanc	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student si	es for using Florida Standards for grades 09-10 reading in Technical uccess in Drafting.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question	

Florida Standards		Correlation to CTE Program Standard #
Torrad Starradias	the author seeks to address.	oon olation to or a rogitalli olandara "
	LAFS.910.RST.2.6	
01.03 Integration	of Knowledge and Ideas	
01.03.1	Translate quantitative or technical information expressed in words in a	
	text into visual form (e.g., a table or chart) and translate information	
	expressed visually or mathematically (e.g., in an equation) into words.	
	LAFS.910.RST.3.7	
01.03.2	Assess the extent to which the reasoning and evidence in a text support	
	the author's claim or a recommendation for solving a scientific or	
	technical problem.	
	LAFS.910.RST.3.8	
01.03.3	Compare and contrast findings presented in a text to those from other	
	sources (including their own experiments), noting when the findings	
	support or contradict previous explanations or accounts. LAFS.910.RST.3.9	
01.04 Pango of P	eading and Level of Text Complexity	
01.04 Range of R	By the end of grade 9, read and comprehend literature [informational	
01.04.1	texts, history/social studies texts, science/technical texts] in the grades	
	9–10 text complexity band proficiently, with scaffolding as needed at the	
	high end of the range.	
01.04.2	By the end of grade 10, read and comprehend literature [informational	
	texts, history/social studies texts, science/technical texts] at the high end	
	of the grades 9-10 text complexity band independently and proficiently.

Florida Department of Education Student Performance Standards

Course Title: Drafting 3
Course Number: 8725030

Course Credit: 1

Course Description:

This course provides instruction in computer aided drafting skills, professional ethics and career and education planning.

Florid	a Standards		Correlation to CTE Program Standard #
16.0	Methods and str	ategies for using Florida Standards for grades 11-12 reading in Technical	
		dent success in Drafting.	
	16.01 Key Idea	s and Details	
	16.01.1	Cite specific textual evidence to support analysis of science and	
		technical texts, attending to important distinctions the author makes and	
		to any gaps or inconsistencies in the account.	
		LAFS.1112.RST.1.1	
	16.01.2	Determine the central ideas or conclusions of a text; trace the text's	
		explanation or depiction of a complex process, phenomenon, or	
		concept; provide an accurate summary of the text.	
	40.04.0	LAFS.1112.RST.1.2	
	16.01.3	Follow precisely a complex multistep procedure when carrying out	
		experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.	
		LAFS.1112.RST.1.3	
	16.02 Craft and	I Structure	
	16.02.1	Determine the meaning of symbols key terms, and other domain-specific	
		words and phrases as they are used in a specific scientific or technical	
		context relevant to grades 11-12 texts and topics.	
		LAFS.1112.RST.2.4	
	16.02.2	Analyze how the text structures information or ideas into categories or	
		hierarchies, demonstrating understanding of the information or ideas.	
		LAFS.1112.RST.2.5	
	16.02.3	Analyze the author's purpose in providing an explanation, describing a	
		procedure, or discussing an experiment in a text, identifying important	
		issues that remain unresolved.	
		LAFS.1112.RST.2.6

Course Title: Drafting 4 Course Number: 8725040

Course Credit: 1

Course Description:

This course is designed to provide instruction in three dimensional modeling and sustainability issues related to the design, construction and maintenance of the built environment.

Florid	a Stanc	dards		Correlation to CTE Program Standard #
16.0	Subjec	cts for student s	es for using Florida Standards for grades 11-12 reading in Technical uccess in Drafting.	
	16.01	Key Ideas and	Details	
		16.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		16.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		16.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	16.02	Craft and Struc	cture	
		16.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		16.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		16.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Electricity

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	Secondary – Career Preparatory		
Program Number	8727200		
CIP Number	0646030202		
Grade Level	9-12, 30, 31		
Standard Length	8 Credits		
Teacher Certification	ELECTRICAL @7 7G		
CTSO	SkillsUSA		
SOC Codes (all applicable)	47-3013 - HelpersElectricians 47-2111 - Electricians		
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml		

Purpose

The purpose of this program is to prepare students for employment or advanced training in a variety of construction electrical industries.

This program focuses on broad, transferable skills, stresses the understanding of all aspects of the electricity industry, and demonstrates such elements of the industry as planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	L	Length	SOC Code	Level	Graduation Requirement
	8727210	Electricity 1		1 Credit		2	VO
Α	8727220	Electricity 2		1 Credit	47-3013	2	VO
	8727230	Electricity 3		1 Credit		3	VO
	8727240	Electricity 4		1 Credit		3	VO
В	8727250	Electricity 5		1 Credit	47-2111	3	VO
	8727260	Electricity 6		1 Credit		3	VO
	8727270	Electricity 7		1 Credit		3	VO
С	8727280	Electricity 8		1 Credit	47-2111	3	VO

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Electricity.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Electricity.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Electricity.
- 04.0 Explain the importance of health, safety, environmental stewardship and related regulatory compliance.
- 05.0 Identify, use and maintain the tools and accessories used in the electrical industry.
- 06.0 Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skills.
- 07.0 Apply mathematics knowledge and skills to electricity.
- 08.0 Demonstrate an understanding of basic electricity.
- 09.0 Read and interpret basic electric codes.
- 10.0 Apply mathematics knowledge and skills to electricity.
- 11.0 Demonstrate further understanding of electricity.
- 12.0 Demonstrate science knowledge and skills related to electrical principles.
- 13.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Electricity.
- 14.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Electricity.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Electricity.
- 16.0 Demonstrate proficiency in electrical math problems and skills.
- 17.0 Demonstrate Alternating-Current (AC) circuit skills.
- 18.0 Explain the importance of employability and entrepreneurship skills.
- 19.0 Install residential wiring.
- 20.0 Install residential wiring systems.
- 21.0 Demonstrate proficiency in commercial wiring.
- 22.0 Demonstrate specialized electrical skills.

Course Title: Electricity 1 Course Number: 8727210

Course Credit: 1

Course Description:

This course enables students to develop the essential competencies for working in the electrical industry. These competencies include safety practices, direct-current electrical-circuit skills, appropriate communication and math skills, basic electricity and electric codes.

	04.08 Describe "Right-to-Know" Law as recorded in (29 CFR.1910.1200).	LAFS.910.SL.2.4 LAFS.910.W.2.4	
05.0	Identify, use and maintain the tools and accessories used in the electrical industryThe student will be able to:		SC.912.P.10.1,2,3,12, 21
	05.01 Identify and select tools, equipment, materials and wires to complete a job.		
	05.02 Drill holes in metal, wood and concrete for electrical wiring.		

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
	05.03 Lay out electrical devices, complying with regulations.		
	 05.04 Install the following, complying with the appropriate local, state or national electric codes: a. Conductors and cable b. Standard outlets and switch boxes c. Explain cord connections on equipment. d. Cords switches, receptacles and dimmers, including a single-pole switched lighting circuit, a three-way switched lighting circuit and a four-way combination circuit. 		
06.0	Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skillsThe student will be able to:		SC.912.P.8.3 SC.912.P.10.4,5,10, 13,15,18 SC.912.P.12.5,9
	06.01 Define the following terms: voltage, current, resistance and power.	LAFS.910.RI.2.4	
	06.02 Measure voltage, amperage and resistance using industry standard electrical measuring devices.		
	06.03 Analyze and explain a series, series-parallel and parallel circuit.	LAFS.910.RI.1.3 LAFS.910.W.2.4 LAFS.910.SL.2.4	
	06.04 Draw each type of circuit and calculate the circuit values.		
	06.05 Explain and apply Ohm's Law.	MAFS.912.A- CED.1.4 LAFS.910.SL.2.4	
	06.06 Compute conductance and resistance of conductors and insulators.	MAFS.912.A- CED.1.4	
07.0	Apply mathematics knowledge and skills to electricityThe student will be able to:		SC.912.P.10.1,2,20 SC.912.P.12.1,2,5,9
	07.01 Demonstrate knowledge of arithmetic operations.		
	07.02 Analyze and apply data and measurements to solve problems and interpret documents.	MAFS.912.A- CED.1.4	
	07.03 Construct charts/tables/graphs using functions and data.	MAFS.912.A- CED.1.2	
08.0	Demonstrate an understanding of basic electricityThe student will be able to:		SC.912.E.5.2,6 SC.912.L.17.10,11, 13,15,19 SC.912.P.8.1,3 SC.912.P.10.18,21 SC.912.P.12.5,7,9
	08.01 Explain the principles of electromagnetism.	LAFS.910.RI.1.3 LAFS.910.W.2.4	

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
		LAFS.910.SL.2.4	
	08.02 Explain the magnetic properties of circuits and devices.	LAFS.910.RI.1.3 LAFS.910.W.2.4 LAFS.910.SL.2.4	
	08.03 Relate electricity to the nature of matter.		
	08.04 Describe various ways that electricity is produced.	LAFS.910.SL.2.4 LAFS.910.W.2.4	
09.0	Read and interpret basic electric codesThe student will be able to:		
	09.01 Describe the importance of following the local, state and national electric codes.	LAFS.910.SL.2.4 LAFS.910.W.2.4	
	09.02 Read and interpret basic electric codes, wiring plans and specifications.	LA.910.RI.1.3m	
	09.03 Identify licensure requirements for electrical occupations.		
	09.04 Demonstrate knowledge of National Fire Protection Association (NFPA) 70E and how it relates to job safety.	LAFS.910.W.2.4	

Course Title: Electricity 2 Course Number: 8727220

Course Credit: 1

Course Description:

This course enables students to develop competencies related to math and science applications in electricity.

Florid	a Stand	ards		Correlation to CTE Program Standard #
01.0	Method	ds and strategie	es for using Florida Standards for grades 09-10 reading in Technical	
			uccess in Electricity.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and	
			technical texts, attending to the precise details of explanations or	
			descriptions.	
			LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's	
			explanation or depiction of a complex process, phenomenon or concept;	
			provide an accurate summary of the text.	
		0.1.0.1.0	LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out	
			experiments, taking measurements or performing technical tasks,	
			attending to special cases or exceptions defined in the text.	
	04.00	Croft and Church	LAFS.910.RST.1.3	
		Craft and Struc		
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific	
			words and phrases as they are used in a specific scientific or technical	
			context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		04.00.0		
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction	
			force, energy).	
			LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a	
		01.02.3	procedure or discussing an experiment in a text, defining the question	
			the author seeks to address.	
L			the dutilor seeks to dudiess.

10.0	Apply mathematics knowledge and skills to electricityThe student will be able to:		SC.912.P.10.26
	10.01 Solve basic algebraic formulas related to electricity.	MAFS.912.A- CED.1.4	
	10.02 Solve basic trigonometric functions related to electrical theory.		
	10.03 Explain basic AC theory and solve related mathematical problems using appropriate test equipment.	MAFS.912.A- CED.1.4	
	10.04 Solve math-related problems from measurements on training aids. (Optional)	MAFS.912.A- CED.1.4	
11.0	Demonstrate further understanding of electricityThe student will be able to:		SC.912.P.10.3,4
	11.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	11.02 Explain how voltage is produced by chemical, mechanical, thermal, photoelectric and piezo electric means.	LAFS.910.W.2.4 LAFS.910.SL.1.1	
	11.03 Identify electrical symbols in construction documents.		
12.0	Demonstrate science knowledge and skills related to electrical principlesThe student will be able to:		SC.912.L.17.8,10,11, 13,15,17,19,20
	12.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.	LAFS.910.SL.1.1	
	12.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.	LAFS.910.W.2.4	

Course Title: Electricity 3
Course Number: 8727230

Course Credit: 1

Course Description:

This course provides students with electrical math skills.

Florid	la Standards		Correlation to CTE Program Standard #
13.0	Methods and strate	gies for using Florida Standards for grades 11-12 reading in Technical	
		t success in Electricity.	
	13.01 Key Ideas a		
	13.01.1	Cite specific textual evidence to support analysis of science and	
		technical texts, attending to important distinctions the author makes and	
		to any gaps or inconsistencies in the account.	
		LAFS.1112.RST.1.1	
	13.01.2	Determine the central ideas or conclusions of a text; trace the text's	
		explanation or depiction of a complex process, phenomenon or concept;	
		provide an accurate summary of the text.	
		LAFS.1112.RST.1.2	
	13.01.3	Follow precisely a complex multistep procedure when carrying out	
		experiments, taking measurements or performing technical tasks,	
		attending to special cases or exceptions defined in the text.	
	12.02 Croft and Ct	LAFS.1112.RST.1.3	
	13.02 Craft and St		
	13.02.1	Determine the meaning of symbols key terms, and other domain-specific	
		words and phrases as they are used in a specific scientific or technical	
		context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
	13.02.2		
	13.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas.	
		LAFS.1112.RST.2.5	
	13.02.3	Analyze the author's purpose in providing an explanation, describing a	
	13.02.3	procedure or discussing an experiment in a text, identifying important	
		issues that remain unresolved.	
		LAFS.1112.RST.2.6	
L			

Floric	da Stand	dards		Correlation to CTE Program Standard #
1 10110			f Knowledge and Ideas	
	10.00	13.03.1	Integrate and evaluate multiple sources of information presented in	
		10.00.1	diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		13.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
		. 0.00.1	technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		13.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon or	
			concept, resolving conflicting information when possible.

22.0	Demonstrate specialized electrical skillsThe student will be able to:		
	22.01 Explain solid-state control devices.	LAFS.1112.SL.2.4	
	22.02 Explain data cable installation according to the plan and specifications.	LAFS.1112.SL.2.4	

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

The occupational standards and benchmarks outlined in this secondary program correlate to the standards and benchmarks of the postsecondary program with the same Classification of Instructional Programs (CIP) number.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is intercurricular but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Florida Department of Education Curriculum Framework

Program Title: Civil Engineering Aide Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	Secondary – Career Preparatory
Program Number	8915000
CIP Number	0715029901
Grade Level	9-12, 30, 31
Standard Length	4 Credits
Teacher Certification	TEC CONSTR @7 7G SURVEY 7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3031 - Surveying and Mapping Technicians
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml

<u>Purpose</u>

The purpose of this program is to prepare students for entry level employment as surveying technicians, mapping technicians, and surveyor's helpers assisting civil engineers, surveyors, urban planners or civil engineering aides.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to surveying, drafting, model building and performing engineering tests. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of one occupational completion point.

The following table illustrates the secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code	Level	Graduation Requirement
	8915010	Civil Engineering Aide 1	1 Credit		2	PA
	8915020	Civil Engineering Aide 2	1 Credit		2	PA
	8915030	Civil Engineering Aide 3	1 Credit		3	VO
Α	8915040	Civil Engineering Aide 4	1 Credit	17-3031	3	VO

Graduation Requirement Abbreviations- EQ= Equally Rigorous Science, PA= Practical Arts, EC= Economics, VO= Career and Technical Education)

Academic Alignment Tables

Academic alignment is an ongoing, collaborative effort of professional educators specializing in the fields of science, mathematics, English/language arts, and Career and Technical Education (CTE). This initiative supports CTE programs by improving student performance through the integration of academic content within CTE courses. Career and Technical Education courses that have been aligned to the Next Generation Sunshine State Standards for Science and the Florida Standards for Mathematics and English/Language Arts will show the following data: the quantity of academic standards in the CTE course; the total number of standards contained in the academic course; and the percentage of alignment to the CTE course.

Florida Standards for Technical Subjects

Florida Standards (FS) for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects are the critical reading and writing literacy standards designed for grade 6 and above. These standards are predicated on teachers of history/social studies, science, and technical subjects using their content area expertise to help students meet the particular challenges of reading, writing, speaking, listening, and language in their respective fields. It is important to note that the 6-12 literacy standards in history/social studies, science, and technical subjects are not meant to replace content standards in those areas but rather to supplement them.

[#] Alignment attempted, but no correlation to academic course

This curriculum framework incorporates the grades 9-10 reading and writing literacy standards in the first two courses of this CTE program and grade 11-12 reading and writing literacy standards in the third and fourth courses of this CTE program. The standards for Mathematical Practices describe varieties of expertise that educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. This curriculum framework incorporates the appropriate mathematical practices in the first four courses of this CTE program.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Methods and strategies for using Florida Standards for grades 09-10 reading in Technical Subjects for student success in Civil Engineering Aide.
- 02.0 Methods and strategies for using Florida Standards for grades 09-10 writing in Technical Subjects for student success in Civil Engineering Aide.
- 03.0 Methods and strategies for using Florida Standards for grades 09-10 Mathematical Practices in Technical Subjects for student success in Civil Engineering Aide.
- 04.0 Demonstrate algebraic and geometric math skills using concrete and graphic models.
- 05.0 Assist civil engineers in collecting and analyzing soil samples.
- 06.0 Demonstrate the use of survey and mapping instruments to perform level surveys.
- 07.0 Create drawings and sketches.
- 08.0 Identify and understand various fields and careers in engineering.
- 09.0 Demonstrate the use of survey instruments to conduct boundary surveys.
- 10.0 Understand basic concepts of structures.
- 11.0 Demonstrate understanding of water and wastewater systems.
- 12.0 Demonstrate model building, using civil engineering principles.
- 13.0 Methods and strategies for using Florida Standards for grades 11-12 reading in Technical Subjects for student success in Civil Engineering Aide.
- 14.0 Methods and strategies for using Florida Standards for grades 11-12 writing in Technical Subjects for student success in Civil Engineering Aide.
- 15.0 Methods and strategies for using Florida Standards for grades 11-12 Mathematical Practices in Technical Subjects for student success in Civil Engineering Aide.
- 16.0 Use project scheduling software.
- 17.0 Demonstrate beginning knowledge of grading and drainage concepts.
- 18.0 Assist transportation planners in obtaining information for traffic engineering.
- 19.0 Explain the importance of employability and entrepreneurship skills.
- 20.0 Describe the importance of professional ethics and legal responsibilities of the business of civil engineering.
- 21.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 22.0 Identify and demonstrate proper record keeping including plan revisions and management, as well as plan versus specification hierarchy.
- 23.0 Identify the environmental impact of a civil engineering project.
- 24.0 Describe the economics of civil engineering projects.
- 25.0 Identify the required licensing and certifications for civil engineering.

Course Title: Civil Engineering Aide 1

Course Number: 8915010

Course Credit: 1

Course Description:

This course focuses heavily on drawing and sketching for civil engineering and surveying. Content includes the application of algebraic and geometric mathematics skills, collecting and analyzing soil samples, conducting site surveys and exploring careers in engineering.

Florid	a Stand	dards		Correlation to CTE Program Standard #
01.0	Subjec	cts for student s	es for using Florida Standards for grades 09-10 reading in Technical uccess in Civil Engineering Aide.	
	01.01	Key Ideas and	Details	
		01.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions. LAFS.910.RST.1.1	
		01.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.910.RST.1.2	
		01.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.910.RST.1.3	
	01.02	Craft and Struc	cture	
		01.02.1	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics. LAFS.910.RST.2.4	
		01.02.2	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy). LAFS.910.RST.2.5	
		01.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question

04.0	Demonstrate algebraic and geometric math skills using concrete and graphic modelsThe student will be able to:		
	04.01 Calculate missing elements of right triangles using the Pythagorean Theorem and trigonometric functions.		
	04.02 Calculate volume and area of rectangles, squares, triangles, parallelograms, cylinders, cones, and spheres.		
	04.03 Collect, read, analyze, interpret, and report on data in graphs, charts, spreadsheets, and tables.		
	04.04 Measure dimensions of time, temperature, distance, capacity and mass/weight using real life models and computer simulations.		
	04.05 Make and apply measurements to include, but not limited to, distance, perimeter, area, volume, and force in both traditional and metric units.		
	04.06 Make estimates and approximations and judge the feasibility of the result.		
	04.07 Read and use an engineering scale.		
05.0	Assist civil engineers in collecting and analyzing soil samplesThe student will be able to:		
	05.01 Understand why soil samples are collected and tested.		
	05.02 Demonstrate the procedures used to prepare soil samples for testing.		
	05.03 Show ability to take a disturbed soil sample.		
06.0	Demonstrate the use of survey and mapping instruments to perform level surveysThe student will be able to:		
	06.01 Define survey terms by use of structural analysis, decoding, and contextual clues or by using a dictionary.		
	06.02 Demonstrate knowledge and use of survey equipment.		

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
	06.03 Perform a level survey.		
	06.04 Read and analyze a topographic contour map.		
	06.05 Generate topographic contours from field notes.		
07.0	Create drawings and sketchesThe student will be able to:		
	07.01 Create and understand isometric and orthographic views.		
	07.02 Create hand drawn informational sketches.		
	07.03 Create computer-aided drafting (CAD) drawings and understand terminology.		
	07.04 Use digital equipment and peripheral devices to record, create, present, and/or share accurate visual images with others.		
	07.05 Investigate the use of technology and other resources to inspire design-making decisions.		
	07.06 Develop skill in sketching and mark-making to plan, execute, and construct two-dimensional images or three-dimensional models.		
	07.07 Investigate the use of space, scale, and environmental features of a structure to create three-dimensional form or the illusion of depth and form.		
08.0	Identify and understand various fields and careers in engineeringThe student will be able to:		
	08.01 Define engineering.		
	08.02 Describe various fields of engineering.		
	08.03 Differentiate between fields of engineering.

		career goals.		
	19.06	Identify and exhibit traits for retaining employment.		
	19.07	Identify opportunities and research requirements for career advancement.		
	19.08	Research the benefits of ongoing professional development.		
	19.09	Examine and describe entrepreneurship opportunities as a career planning option.		
	19.10	Examine career opportunities in the visual arts to determine requisite skills, qualifications, supply-and-demand, market location, and potential earnings.		
	19.11	Create a body of collaborative work to show artistic cohesiveness, team-building, respectful compromise, and time-management skills.		
		be the importance of professional ethics and legal responsibilities of the business of civil eeringThe student will be able to:		
	20.01	Describe the role and job descriptions of civil engineering staff members.		
	20.02	Describe the roles and responsibilities of various entities involved in a construction project (contractor, supplier, engineer, owner, government and lending agencies).		
	20.03	Describe the roles of agencies and their purposes: OSHA, ASTM, ACI, AASHTO, and FDOT.		
	20.04	Evaluate alternative responses to workplace situations based on personal, professional, ethical, legal responsibilities, and employer policies.		
	20.05	Evaluate and justify decisions based on ethical reasoning.		
	20.06	Identify and explain personal and long-term consequences of unethical or illegal behaviors in the workplace.		

Course Title: Civil Engineering Aide 4

Course Number: 8915040

Course Credit: 1

Course Description:

This course provides practical experience in the civil engineering industry. Content includes safety, recordkeeping, analyzing the environmental impact and economics of civil engineering projects, and required licensing. Civil Engineering Aide 1, 2, and 3 are prerequisites to this course.

Florid	a Stand	dards		Correlation to CTE Program Standard #
13.0	Subjec	cts for student s	es for using Florida Standards for grades 11-12 reading in Technical uccess in Civil Engineering Aide.	
	13.01	Key Ideas and	Details	
		13.01.1	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. LAFS.1112.RST.1.1	
		13.01.2	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text. LAFS.1112.RST.1.2	
		13.01.3	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text. LAFS.1112.RST.1.3	
	13.02	Craft and Struc	cture	
		13.02.1	Determine the meaning of symbols key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics. LAFS.1112.RST.2.4	
		13.02.2	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas. LAFS.1112.RST.2.5	
		13.02.3	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.	

Floric	la Stanc	lards		Correlation to CTE Program Standard #
			LAFS.1112.RST.2.6	3
	13.03	Integration of	f Knowledge and Ideas	
		13.03.1	Integrate and evaluate multiple sources of information presented in	
			diverse formats and media (e.g. quantitative data, video, multimedia) in	
			order to address a question or solve a problem.	
			LAFS.1112.RST.3.7	
		13.03.2	Evaluate the hypotheses, data, analysis, and conclusions in a science or	
			technical text, verifying the data when possible and corroborating or	
			challenging conclusions with other sources of information.	
			LAFS.1112.RST.3.8	
		13.03.3	Synthesize information from a range of sources (e.g., texts, experiments,	
			simulations) into a coherent understanding of a process, phenomenon,	
			or concept, resolving conflicting information when possible.	
	40.04	Danas of Da	LAFS.1112.RST.3.9

CTE S	Standards and Benchmarks	FS-M/LA	NGSSS-Sci
21.0	Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance-The student will be able to:		
	21.01 Identify hazards related to civil engineering and prevention of injury.		
	21.02 Describe and practice safety techniques related to confined entry conditions, handling chemicals and materials, spill controls, etc.		
	21.03 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	21.04 Explain emergency procedures to follow in response to workplace accidents.		
	21.05 Use digital equipment and peripheral devices to record, create, present, and/or share accurate visual images with others.		
	21.06 Apply rules of convention to create purposeful design.		
	21.07 Use technological tools to create design.		
22.0	Identify and demonstrate proper record keeping including plan revisions and management, as well as plan versus specification hierarchyThe student will be able to:		
	22.01 Understand documentation and record-keeping purposes and procedures.		
	22.02 Understand legal, environmental and public relations applications of records.		
	22.03 Demonstrate proper use of photographic equipment.		
23.0	Identify the environmental impact of a civil engineering projectThe student will be able to:		
	23.01 Explain the importance of sustainable design.		

CTE S	tandards and Benchmarks	FS-M/LA	NGSSS-Sci
	23.02 Explain the importance and impact of environmental regulations.		
	23.03 Describe the environmental permitting procedures.		
	23.04 Understand how environmental rules and laws are mandated.		
24.0	Describe the economics of civil engineering projectsThe student will be able to:		
	24.01 Understand basic economic terms.		
	24.02 Understand life cycle of projects.		
25.0	Identify the required licensing and certifications for civil engineeringThe student will be able to:		
	25.01 Identify education, experience and testing requirements.		
	25.02 Understand ramifications of unlicensed engineering.		
	25.03 Understand the need for continuing education.		
	25.04 Discuss the education, experience and certification and/or licensure requirements of various workers of the civil engineering and related fields.		
	25.05 Investigate areas of specialty in civil engineering.		

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Purpose

The purpose of this program is to prepare students for employment or advanced training in the building construction industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to applying construction techniques; reading plans and specifications; and developing trade skills in carpentry, masonry, electricity, plumbing and air conditioning.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV 0080	Building Construction Assistant	450 Hours	49-9071
В	BCV 0081	Carpentry and Masonry Technician	150 Hours	49-9071
С	BCV 0082	Electrical and Plumbing Technician	150 Hours	49-9071
D	BCV 0083	A/C and Painting Technician	150 Hours	49-9071

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate safety practices and follow disaster plans.
- 02.0 Identify and use basic hand tools.
- 03.0 Identify power tools and describe their proper operation.
- 04.0 Research and present construction components, materials, hardware and characteristics.
- 05.0 Demonstrate an understanding of the construction industry and related occupations.
- 06.0 Explain the importance of employability and entrepreneurship skills.
- 07.0 Demonstrate rough and finish carpentry skills.
- 08.0 Demonstrate masonry skills.
- 09.0 Demonstrate painting and decorating skills.
- 10.0 Demonstrate science knowledge and skills.
- 11.0 Demonstrate mathematics knowledge and skills.
- 12.0 Demonstrate an understanding of the built environment.
- 13.0 Demonstrate an understanding of the green environment.
- 14.0 Research laws applicable to the construction industry.
- 15.0 Read construction contracts, documents, specifications, building codes and regulations and explain how they apply to the construction process.
- 16.0 Demonstrate electrical rough in skills.
- 17.0 Demonstrate finish electrical skills.
- 18.0 Demonstrate plumbing rough in skills.
- 19.0 Demonstrate finish plumbing skills.
- 20.0 Demonstrate air conditioning rough in skills.
- 21.0 Demonstrate finish air conditioning skills.
- 22.0 Demonstrate design technology.

Program Title: PSAV Number: **Building Trades and Construction Design Technology** C100100

Occu	se Number: BCV 0080 pational Completion Point: A ing Construction Assistant – 450 Hours – SOC Code 49-9071
01.0	Demonstrate safety practices and follow disaster plansThe student will be able to:
	01.01 Observe and comply with all applicable Occupational Safety and Health Administration (OSHA) rules and regulations.
	01.02 Locate and examine Material Safety Data Sheets (MSDS) and follow the procedures as necessary.
	01.03 Discuss and analyze and discuss the "Right-to-Know" Law as recorded in (29 CFR-1910.1200).
	01.04 Identify and use safety equipment such as fall arrest systems, fire extinguishers, scaffolds and ladders.
	01.05 Identify and interpret follow disaster plans.
	01.06 Describe and demonstrate appropriate safety attitudes and behaviors in the shop and on the job in construction industry.
	01.07 Describe and demonstrate the appropriate safe use and maintenance of portable and stationary power equipment in the shop and on the job in construction industry.
	01.08 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	01.09 Explain emergency procedures to follow in response to workplace accidents.
	01.10 Create a disaster and/or emergency response plan.
02.0	Identify and use basic hand toolsThe student will be able to:
	02.01 Select and utilize appropriate hand tools typically used in the construction industry for specific tasks in accordance with safety guidelines.
03.0	Identify power tools and describe their proper operationThe student will be able to:
	03.01 Select and utilize appropriate power tools and equipment typically used in the construction industry for specific tasks in accordance with safety guidelines.
04.0	Research and present construction components, materials, hardware and characteristicsThe student will be able to:
	04.01 Research and present the various components, materials and hardware used in residential construction applications.

_	
	04.02 Research and present the various components, materials and hardware used in commercial construction applications.
	04.03 Research and present the various components, materials and hardware used in industrial construction applications.
	04.04 Research and present preplanning and procedural steps to accomplish various projects large and small both in the lab and on the job site.
05.0	Demonstrate an understanding of the construction industry and related occupationsThe student will be able to:
	05.01 Identify and distinguish construction trade occupations and the roles and responsibilities of each craft.
	05.02 Identify and distinguish construction project management occupations and the roles and responsibilities of each.
	05.03 Identify and differentiate design and engineering occupations and the roles and responsibilities of each.
	05.04 Assess the relationship between the Department of Labor and the construction industry, economy and employment.
06.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:
	06.01 Identify and demonstrate positive work behaviors needed to be employable.
	06.02 Develop personal career plan that includes goals, objectives and strategies.
	06.03 Examine licensing, certification, and industry credentialing requirements.
	06.04 Maintain a career portfolio to document knowledge, skills and experience.
	06.05 Evaluate and compare employment opportunities that match career goals.
	06.06 Identify and exhibit traits for retaining employment.
	06.07 Identify opportunities and research requirements for career advancement.
	06.08 Research the benefits of ongoing professional development.
	06.09 Examine and describe entrepreneurship opportunities as a career planning option.
	06.10 Conduct a job search and analyze the requirements of the job.
	06.11 Determine the ramifications of a poor-driving record on employability opportunities.
	06.12 Assess the importance of confidentiality in the workplace.
07.0	Demonstrate rough and finish carpentry skillsThe student will be able to:
	07.01 Discuss the carpentry trade.

	07.02 Identify and use building materials, fasteners and adhesives.
	07.03 Use and maintain hand and power tools.
	07.04 Read and interpret approved plans and specifications for residential and commercial drawings.
	07.05 Apply distance measurement and elevation leveling techniques.
	07.06 Survey and develop site layout.
	07.07 Construct and strip concrete forms, handle and place concrete, reinforcing materials and finish concrete.
	07.08 Calculate construct and install floor, wall, ceiling and roof framing.
	07.09 Calculate and construct and install basic stair layout.
	07.10 Understand building science of thermal and moisture protection.
	07.11 Calculate and construct and install roofing applications.
	07.12 Install windows and interior /exterior doors and door hardware.
	07.13 Calculate, construct and install exterior finishing.
	07.14 Construct drywall installation and finishing techniques.
	07.15 Design cabinet installations and fabrications.
	07.16 Calculate and install window, door, floor and ceiling trim.
	07.17 Calculate and construct cold-formed steel framing.
	07.18 Design and layout suspended ceilings.
08.0	Demonstrate masonry skillsThe student will be able to:
	08.01 Describe and discuss orientations to the masonry trade.
	08.02 Identify and select masonry tools and equipment.
	08.03 Use, maintain and store masonry hand tools, power tools and equipment safely and in proper working order.
	08.04 Read and interpret measurements, drawings and specifications for masonry building projects.
	08.05 Demonstrate Safe and proper procedures for set up / tear down and maintaining masonry work sites and projects.

	08.06 Utilize the tools and equipment used for mixing mortar.
	08.07 Analyze the factors that affect the consistency of mortar.
	08.08 Determine masonry ratios, their strengths and applications of mortar mixtures M, S, N, O and K.
	08.09 Mix various types of mortar, considering application and pounds per square inch (PSI) strength.
	08.10 Layout square corners using the 3-4-5 (or Pythagorean Theorem) and building instrument methods for masonry projects.
	08.11 Layout and install dry bonds for masonry block corner leads projects.
	08.12 Layout and build corner leads for masonry block projects.
	08.13 Identify and describe various masonry units and installation techniques.
	08.14 Implement the methods of putting up the line.
	08.15 Utilize pointing tools to strike mortar joints.
	08.16 Identify and use the various types of trowels.
	08.17 Mix and apply stucco to a project.
09.0	Demonstrate painting and decorating skillsThe student will be able to:
	09.01 Identify, describe and use various painting tools and equipment.
	09.02 Erect an extension ladder and a scaffold.
	09.03 Prepare surfaces for application of finishes.
	09.04 Identify and describe various painting and application techniques.
	09.05 Apply finishes to a project including primers, paints, stains varnishes, wall coverings and textures.
	09.06 Use appropriate techniques and materials for clean-up.
10.0	Demonstrate science knowledge and skillsThe students will be able to:
	10.01 Assess molecular action as a result of temperature extremes, chemical reaction and moisture content as it relates to the choice of materials and construction techniques.
	10.02 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	10.03 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.

	10.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and demonstrate knowledge of the proper precautions required for handling such materials.
	10.05 Explain pressure measurement in terms of PSI and inches of mercury.
	10.06 Explore new technology as it applies to the construction industry in terms of materials, processes and the need for continuing education.
	16.01 Compare and analyze traditional and digital media to learn how technology has altered opportunities for innovative responses and results.
	16.02 Investigate the use of technology and other resources to inspire design decisions.
11.0	Demonstrate mathematics knowledge and skillsThe students will be able to:
	11.01 Demonstrate knowledge of arithmetic operations.
	11.02 Solve job-related problems by adding, subtracting, multiplying and dividing numbers using fractions, decimals and whole numbers.
	11.03 Change numbers to percent.
	11.04 Solve job-related problems using a calculator.
	11.05 Read a ruler and a tape measure.
	11.06 Compute feet, inches and yards.
	11.07 Change hours and minutes to decimals, fractions and mixed numbers.
	11.08 Construct charts/tables/graphs using functions and data.
	11.09 Determine ratios and proportions.
	11.10 Convert measurements from the English to the metric system and from the metric to the English system.
	11.11 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	11.12 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	11.13 Analyze and apply data and measurements to solve problems and interpret documents.
	11.14 Calculate work hours and labor costs for a specific job.
12.0	Demonstrate an understanding of the built environmentThe student will be able to:
	12.01 Research the development of construction technology, its impact on the built environment and the impact of growth on the construction industry.
	12.02 Describe and give examples of the benefits of the construction industry on health and safety, communication, transportation and the economy.

	12.03	Examine and compare the relationship between the built environment and the natural environment.
	12.04	Compare architectural designs and/or models to understand how technical and utilitarian components impact aesthetic qualities.
	12.05	Analyze changes in architectural styles and construction practices over time.
	12.06	Describe the significance of major architects, engineers or inventors to understand their historical influences.
	12.07	Research innovative historical architectural and/or engineering works and examine the significance of their legacy for the future.
	12.08	Identify transitions in design media, technique and focus to explain how technology has changed design throughout history.
13.0	Demor	nstrate an understanding of the green environmentThe student will be able to:
	13.01	Recognize and analyze the development of the built environment and its impacts on the natural environment such as pollution, deforestation, climate change, health and disease.
	13.02	Describe and give examples of how a green built environment creates growth for the construction industry, and the economy such as health and safety, transportation and natural resources.
	13.03	Examine and compare the relationship between a green built environment and the natural environment.
	13.04	Explain the purpose of the United States Green Building Council (USGBC), the Green Building Certification Institute (GBCI) and Leadership for Energy and Environmental Design (LEED) are and how they create growth for the construction industry and the economy.
	13.05	Research sustainable building design and its relationship between health, energy efficiency and money savings for government, businesses and individuals.
	13.06	Research the effects of building science on construction and energy efficiency.
	13.07	Research renewable fuels and energy.
		<u></u>

Course Number: BCV 0081 Occupational Completion Point: B Carpentry and Masonry Technician – 150 Hours – SOC Code 49-9071		
14.0	esearch laws applicable to the construction industryThe student will be able to:	
	1.01 Discuss and analyze the governmental law process and its impact on the construction industry and construction education.	
	4.02 Analyze the Codes of Federal Regulations (CFR) pertaining to the construction industry.	
	4.03 Analyze the Florida State Statues pertaining to the construction industry.	
	1.04 Compare and contrast trade union and trade non-union workers in terms of health and safety, communication, transportation and the economy.	
	1.05 Debate the roles of trade unions in the construction industry and their impact on training.	

	14.06 Examine the role of apprenticeship in the construction industry and its impact on education.
	14.07 Locate and assess the Florida Department of Professional Regulation.
	14.08 Locate and assess the Construction Industry Licensing Board, its structure, polices and requirements.
	14.09 Research various construction occupations and explain the requirements for becoming licensed.
	14.10 Compare and contrast the roles and responsibilities of the engineers, architects/ designers and the general contractor.
	14.11 Compare and contrast the roles and responsibilities of the general contractor, subcontractors, specialty contractors and employees of contractors.
	14.12 Identify and differentiate the roles and responsibilities of building construction firms and classifications of construction projects.
	14.13 Define entrepreneurship and give examples pertaining to the construction industry.
	14.14 Assess the relationship between the Department of Labor and new construction projects, new permits and new business start-ups.
	14.15 Assess the need for and impact of zoning requirements on construction projects.
	14.16 Examine and analyze the process of applying for building permits and variances.
15.0	Read construction contracts, documents, specifications, building codes and regulations and explain how they apply to the construction process—The student will be able to:
	15.01 Explain the purpose and components of contracts, drawings, documents and specifications.
	15.02 Analyze the importance of building codes and zoning regulations on the development of drawings and specifications.
	15.03 Identify and interpret the analogy of a full set of drawings including architectural (site plans, foundation plans, floor plans, interior/exterior elevations, sections, details and schedules), structural, plumbing, mechanical and electrical drawings.
	15.04 Utilize building symbols in the development of blueprints.
	15.05 Prepare lists of materials and specifications.
	15.06 Use architectural and engineering scales.
	15.07 Demonstrate the basic use of computer-aided design software.
	15.08 Demonstrate the use of computer aided drafting (CAD) software to prepare project drawings.
	15.09 Write specifications for a project.
	15.10 Prepare construction documents for a project.

Occu	e Number: BCV 0082 pational Completion Point: C ical and Plumbing Technician – 150 Hours – SOC Code 49-9071
16.0	Demonstrate electrical rough in skillsThe student will be able to:
	16.01 Identify and apply electrical safety practices and procedures when working with electrical systems.
	16.02 Explain and describe various phases of electrical generation and the transportation and distribution of electricity to sub stations for industrial, business and residential uses.
	16.03 Design and calculate electrical loads using ohms law to determine power, American wire gauge (AWG) and electrical equipment sizes.
	16.04 Apply basic electrical theory to wiring a project.
	16.05 Design and install a branch circuit system in a project.
	16.06 Install Ground Fault Circuit Interrupter (GFCI) circuitry.
	16.07 Troubleshoot electrical systems, using testing and metering devices.
	16.08 Install a meter, distribution panel and breaker panel for a project.
	16.09 Identify types of wiring raceways.
	16.10 Install conduit, pipe, shielded electrical cable and electrical boxes in a project.
17.0	Demonstrate finish electrical skillsThe student will be able to:
	17.01 Install electrical breakers, outlets, switches and light fixtures.
	17.02 Wire an air conditioning system into an electrical supply.
	17.03 Test and inspect electrical systems.
18.0	Demonstrate plumbing rough in skillsThe student will be able to:
	18.01 Identify, select and install various pipes, tubing, fittings and connectors used in the plumbing trade for a specific project.
	18.02 Layout and install a water distribution system for a project.
	18.03 Layout and install a drain-waste-and-vent system for a project.
	18.04 Test and inspect plumbing systems.
19.0	Demonstrate finish plumbing skillsThe student will be able to:

	19.01 Install bathroom fixtures and hardware such as lavatories, water closets, urinals, showers, bathtubs and traps.
	19.02 Install kitchen fixtures and hardware such as sinks, garbage disposals, faucets and hot-water-heater tanks.
20.0	Demonstrate air conditioning rough in skillsThe student will be able to:
	20.01 Explain heating and cooling principles and code requirements.
	20.02 Perform basic calculations for heating and cooling loads.
	20.03 Select and install the components of an air conditioning system for a project including ductwork, coolant lines, compressor packages and coil packages.
	20.04 Identify and select refrigerants according to their properties.
21.0	Demonstrate finish air conditioning skillsThe student will be able to:
	21.01 Determine a refrigerant level.
	21.02 Install a control system for a project.
	21.03 Install registers for a project.
	21.04 Examine computer-monitoring systems associated with Heating, Ventilation and Air-Conditioning (HVAC) control systems and air-quality management.

Occu	Course Number: BCV 0083 Occupational Completion Point: D A/C and Painting Technician – 150 Hours – SOC Code 49-9071	
22.0	Design a capstone project using skills learned throughout the programThe student will be able to:	
	22.01 Solve design and construction problems, through convergent and divergent thinking, to gain new perspectives.	
	22.02 Apply critical-thinking and problem solving skills used in design to develop solutions for real-life issues.	
	22.03 Use critical thinking skills for various contexts to develop, refine and reflect on a design theme.	
	22.04 Use and maintain tools and equipment to facilitate design and construction process.	
	22.05 Work in a project team to show creative cohesiveness, team building, respectful compromise and time-management skills.	
	22.06 Apply carpentry skills.	
	22.07 Apply masonry skills.	
	22.08 Apply mechanical, electrical and plumbing (MEP) skills.	

22.09	Apply construction safety.
22.10	Apply sustainable construction practices.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

Florida Department of Education Curriculum Framework

Program Title: Drafting PSAV
Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C100200
CIP Number	0615130100
Grade Level	30,31
Standard Length	1500 Hours
Teacher Certification	BLDG CONSTR @7 7G DRAFTING @7 7G TEC DRAFT 7G TEC CONSTR @7 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3011 - Architectural and Civil Drafters; 17-3013 - Mechanical Drafters, 17-3019 - Drafters, All Other
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the drafting industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to freehand sketching, drafting by hand and computer and 3D modeling. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of seven occupational completion points. When the recommended sequence is followed, the structure will allow students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or become an occupational completer.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Course Length	SOC Code
Α	TDR0070	Blueprint Reader	150 Hours	17-3011
В	TDR0370	Drafting Assistant	450 Hours	17-3011
С	TDR0775 TDR0776	Drafting Detailer 1 Drafting Detailer 2	150 Hours 150 Hours	17-3011
D	TDR0570	Architectural Drafter	150 Hours	17-3011
Е	TDR0874	Civil Drafter	150 Hours	17-3011
F	TDR0777	Mechanical Drafter	150 Hours	17-3013
G	TDR0875	Structural Drafter	150 Hours	17-3019

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply basic drafting skills.
- 02.0 Demonstrate mathematics knowledge and skills.
- 03.0 Prepare multi-view drawings.
- 04.0 Prepare sectional views.
- 05.0 Prepare auxiliary drawings.
- 06.0 Apply basic dimensioning.
- 07.0 Prepare pictorial drawings.
- 08.0 Prepare surface developments.
- 09.0 Prepare basic architectural drawings.
- 10.0 Demonstrate understanding of basic civil drawings.
- 11.0 Demonstrate basic electrical/electronic literacy.
- 12.0 Perform basic computer aided drafting functions.
- 13.0 Explain the importance of employability and entrepreneurship skills.
- 14.0 Prepare computer aided 3-D architectural drawings.
- 15.0 Prepare architectural multi-level residential drawings.
- 16.0 Prepare a basic plot plan drawing.
- 17.0 Prepare a basic landscape plan drawing.
- 18.0 Prepare computer aided mechanical working drawings.
- 19.0 Prepare computer aided 3-D mechanical drawings.
- 20.0 Prepare a typical wall section.
- 21.0 Prepare a basic foundation plan drawing.
- 22.0 Prepare a basic electrical plan drawing.
- 23.0 Prepare a basic heating, ventilation and air-conditioning (HVAC) plan drawing.
- 24.0 Prepare a basic plumbing plan drawing.
- 25.0 Prepare architectural drawings for a commercial building.
- 26.0 Prepare basic building utility drawings.
- 27.0 Prepare presentation drawings.
- 28.0 Prepare computer aided map details.
- 29.0 Understand surveying and mapping procedures.
- 30.0 Prepare advanced map drawings.
- 31.0 Prepare advanced civil drawings.
- 32.0 Prepare advanced mechanical drawings.
- 33.0 Prepare production drawings using 3-D CAD techniques.
- 34.0 Prepare pneumatic/hydraulic drawings.
- 35.0 Prepare tool drawings using 3-D CAD techniques.
- 36.0 Prepare structural details.
- 37.0 Prepare structural steel drawings.

- 38.0 Prepare reinforced concrete drawings.
 39.0 Prepare structural wood drawings.
 40.0 Prepare advanced three-dimensional computer aided drawings.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Drafting PSAV C100200

Occu	se Number: TDR0070 pational Completion Point: A print Reader – 150 Hours – SOC Code 17-3011
01.0	Apply basic drafting skillsThe student will be able to:
	01.01 Use drafting equipment, measuring scales and drafting instruments.
	01.02 Identify the various drafting media and techniques.
	01.03 Use various freehand and other lettering techniques
	01.04 Prepare title blocks and other drafting formats.
	01.05 Demonstrate the use of the Alphabet of Lines
	01.06 Prepare axonometric, oblique and multi-view freehand sketches.
	01.07 Prepare charts, graphs and diagrams.
	01.08 Apply geometric construction techniques.
02.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	02.01 Demonstrate knowledge of arithmetic operations.
	02.02 Solve arithmetic problems.
	02.03 Solve algebra problems.
	02.04 Solve right-angle trigonometric problems.
	02.05 Solve geometry problems.
	02.06 Apply multiple discipline calculations.
	02.07 Analyze and apply data and measurements to solve problems and interpret documents.

	02.08 Construct charts/tables/graphs using functions and data.
	02.09 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	02.10 Demonstrate an understanding of federal, state and local taxes and their computation.
	02.11 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	02.12 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
03.0	Prepare multi-view drawingsThe student will be able to:
	03.01 Prepare multi-view scaled drawings.
	03.02 Select proper drawing scale, views and layout.
	03.03 Prepare drawings containing horizontal and vertical surfaces.
	03.04 Prepare drawings containing circles and/or arcs.
	03.05 Prepare drawings incorporating removed details and conventional breaks.
04.0	Prepare sectional viewsThe student will be able to:
	04.01 Prepare drawings containing full sections and half sections
	04.02 Prepare drawings containing offset sections.
	04.03 Prepare drawings containing revolved sections.
	04.04 Prepare drawings containing removed sections and broken-out sections.
	04.05 Prepare a sectional assembly drawing applying material symbols.
05.0	Prepare auxiliary drawingsThe student will be able to:
	05.01 Prepare drawings containing primary auxiliary views.
	05.02 Prepare drawings containing auxiliary views that include curved lines.
06.0	Apply basic dimensioningThe student will be able to:
	06.01 Prepare drawings containing linear, angular and circular standard dimensions.
	06.02 Prepare drawings using metric dimensions.

	06.03 Prepare drawings using general and local notes.
	06.04 Apply basic tolerance techniques.
07.0	Prepare pictorial drawingsThe student will be able to:
	07.01 Prepare isometric and oblique pictorial drawings.
	07.02 Prepare one- and two-point perspectives.
08.0	Prepare surface developmentsThe student will be able to:
	08.01 Prepare developments of a prism, a cylinder, a cone and a pyramid.
	08.02 Prepare developments of a transition piece.
	08.03 Prepare assembly drawing involving intersecting pieces.

Occu	Course Number: TDR0370 Occupational Completion Point: B Drafting Assistant – 450 Hours – SOC Code 17-3011	
09.0	Prepare basic architectural drawingsThe student will be able to:	
	09.01 Prepare site plan.	
	09.02 Prepare floor plan.	
	09.03 Prepare roof plan	
	09.04 Prepare exterior elevations.	
	09.05 Prepare typical wall section.	
10.0	Demonstrate understanding of basic civil drawingsThe student will be able to:	
	10.01 Understand civil terminology.	
	10.02 Read and interpret civil drawings.	
	10.03 Prepare civil plan with topography and profile drawing.	
11.0	Demonstrate basic electrical/electronic literacyThe student will be able to:	
	11.01 Identify electrical/electronic symbols.	

-	
	11.02 Prepare schematic/block diagrams and/or electric plans.
12.0	Perform basic computer aided drafting functionsThe student will be able to:
	12.01 Perform drawing set up.
	12.02 Construct geometric figures of lines, splines, circles and arcs.
	12.03 Create and edit text using appropriate style and size to annotate drawings.
	12.04 Use and control accuracy enhancement tools for entity positioning methods such as snap and XYZ.
	12.05 Identify, create, store and use standard part symbols and libraries.
	12.06 Utilize editing commands.
	12.07 Control entity properties by layer, color and line type.
	12.08 Use viewing commands to perform zooming and panning.
	12.09 Plot or print drawings on media using layout and scale.
	12.10 Understand how to minimize file size.
	12.11 Use query commands to interrogate database for entity characteristics, distance, area and status.
	12.12 Apply standard dimensioning rules.
13.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	13.01 Identify and demonstrate positive work behaviors needed to be employable.
	13.02 Develop personal career plan that includes goals, objectives and strategies.
	13.03 Examine licensing, certification and industry credentialing requirements.
	13.04 Maintain a career portfolio to document knowledge, skills and experience.
	13.05 Evaluate and compare employment opportunities that match career goals.
	13.06 Identify and exhibit traits for retaining employment.
	13.07 Identify opportunities and research requirements for career advancement.
	13.08 Research the benefits of ongoing professional development.

13.09 Examine and describe entrepreneurship opportunities as a career planning option.	
13.10 Demonstrate knowledge of the "Right-To-Know Law" as recorded in (29 CFR-1910.1200).	

Occu	se Number: TDR0775 pational Completion Point: ng Industries 1 – 150 Hours – SOC Code 17-3011
14.0	Prepare computer aided 3-D architectural drawingsThe student will be able to:
	14.01 Draw floor plan.
	14.02 Draw isometric exterior views.
	14.03 Draw perspective exterior views.
15.0	Prepare architectural multi-level residential drawingsThe student will be able to:
	15.01 Prepare first floor plan.
	15.02 Prepare second floor plan.
	15.03 Prepare basic roof framing layout drawing.
	15.04 Prepare two-story elevation drawing.
	15.05 Prepare second floor framing plan.
16.0	Prepare a basic plot plan drawingThe student will be able to:
	16.01 Layout a residential plot.
	16.02 Indicate plot size and limits.
	16.03 Indicate plot orientation.
	16.04 Layout public street and sidewalk.
	16.05 Layout public utility lines.
	16.06 Write a plot legal description.
	16.07 Dimension building location.
	16.08 Layout and label specialty features (patio/ pool/ gazebo).

	16.09 Locate easements and setbacks.
17.0	Prepare a basic landscape plan drawingThe student will be able to:
	17.01 Layout landscape features.
	17.02 Develop a schedule of plants/shrubs.
	17.03 Develop a list of landscape symbols.

Occu	se Number: TDR0776 pational Completion Point: C ng Industries 2 – 150 Hours – SOC Code 17-3011
18.0	Prepare computer aided mechanical working drawingsThe student will be able to:
	18.01 Prepare dimensioned multi-view drawings applying CAD techniques.
19.0	Prepare computer aided 3-D mechanical drawingsThe student will be able to:
	19.01 Prepare a dimensioned pictorial drawing of a mechanical device.
20.0	Prepare typical wall sectionThe student will be able to:
	20.01 Prepare a two-story residential wall section.
	20.02 Apply notes and dimensions to residential wall section.
21.0	Prepare a basic foundation plan drawingThe student will be able to:
	21.01 Prepare a foundation plan drawing for a residence.
	21.02 Prepare foundation detail drawings.
22.0	Prepare a basic electrical plan drawingThe student will be able to:
	22.01 Prepare an electrical plan for a residence.
	22.02 Apply electrical symbols legend to electrical plan.
23.0	Prepare a basic heating, ventilation and air-conditioning (HVAC) plan drawingThe student will be able to:
	23.01 Prepare an HVAC plan for a residence.
	23.02 Prepare HVAC symbols legend for HVAC plan.

24.0	Prepare a basic plumbing plan drawingThe student will be able to:
	24.01 Prepare a plumbing plan for a residence.
	24.02 Prepare plumbing symbols legend for plumbing plan.

Occu	se Number: TDR0570 pational Completion Point: D
25.0	tectural Drafter – 150 Hours – SOC Code 17-3011 Prepare architectural drawings for a commercial buildingThe student will be able to:
	25.01 Interpret catalogs, specifications, technical tables, codes and ordinances for commercial buildings.
	25.02 Prepare a commercial site plan.
	25.03 Prepare floor plan, with dimensions for a commercial building.
	25.04 Prepare foundation plan with dimensions and footing schedule.
	25.05 Prepare roof plan.
	25.06 Prepare elevation drawings.
	25.07 Prepare building section.
	25.08 Prepare door and window schedules.
26.0	Prepare basic building utility drawingsThe student will be able to:
	26.01 Prepare an electrical plan for a commercial building.
	26.02 Prepare heating, ventilation and air-conditioning (HVAC) plan for a commercial building.
	26.03 Prepare a plumbing plan for a commercial building.
27.0	Prepare presentation drawingsThe student will be able to:
	27.01 Produce color pictorial drawings for a commercial building.
	27.02 Prepare a dynamic presentation zoom views or walk-thru.
	27.03 Create a drawing portfolio.

Cours	se Number: TDR0874
Occu Civil I	pational Completion Point: E Drafter – 150 Hours – SOC Code 17-3011
28.0	Prepare computer aided map detailsThe student will be able to:
	28.01 Prepare a map using bearings.
	28.02 Prepare a map using coordinates.
	28.03 Convert map into metric dimensions.
29.0	Understand surveying and mapping proceduresThe student will be able to:
	29.01 Analyze basic mapping specifications.
	29.02 Interpret aerial photogrammetry.
	29.03 Identify horizontal measures.
	29.04 Identify leveling procedures.
	29.05 Interpret angular measurements.
	29.06 Interpret legal descriptions.
30.0	Prepare advanced map drawingsThe student will be able to:
	30.01 Prepare traverse drawings.
	30.02 Prepare street layout drawing.
	30.03 Prepare advanced map drawing.
	30.04 Prepare highway drawings.
	30.05 Prepare topographic drawings.
31.0	Prepare advanced civil drawingsThe student will be able to:
	31.01 Prepare drainage drawing.
	31.02 Prepare plat drawing.
	31.03 Prepare advanced plan and profile drawing.
	31.04 Prepare utility drawing.

Occu	Course Number: TDR0777 Occupational Completion Point: F Mechanical Drafter – 150 Hours – SOC Code 17-3013		
32.0	Prepare advanced mechanical drawingsThe student will be able to:		
	32.01 Analyze problems using the descriptive geometry method of projection.		
	32.02 Identify the various manufacturing methods.		
	32.03 Use precision dimensioning to include geometric dimensioning and tolerancing (GDT) for fits and finishing.		
	32.04 Make engineering changes on drawings.		
	32.05 Prepare fastener drawings.		
	32.06 Prepare cam drawing with dimensions.		
	32.07 Prepare gear drawing with dimensions.		
	32.08 Prepare spring drawing with dimensions.		
33.0	Prepare production drawings using 3-D CAD techniquesThe student will be able to:		
	33.01 Make pattern shop detail drawings.		
	33.02 Make casting drawing.		
	33.03 Make forging detail drawing.		
	33.04 Make machining detail drawing.		
	33.05 Make 3D stamping drawing.		
	33.06 Make 3D welding drawing.		
	33.07 Prepare installation drawing.		
	33.08 Prepare a bill of materials (BOM).		
34.0	Prepare pneumatic/hydraulic drawingsThe student will be able to:		
	34.01 Prepare piping drawing.		
	34.02 Prepare pictorial piping drawing.		

	34.03 Prepare sectional drawing.
	34.04 Prepare diagram.
35.0	Prepare tool drawings using 3-D CAD techniquesThe student will be able to:
	35.01 Prepare 3D jig and fixture drawing.
	35.02 Prepare 3D cutting die drawing.
	35.03 Prepare 3D forming die drawing.

Occu	Course Number: TDR0875 Occupational Completion Point: G Structural Drafter – 150 Hours – SOC Code 17-3019		
36.0	Prepare structural detailsThe student will be able to:		
	36.01 Interpret structural manuals and technical tables.		
	36.02 Draw structural connections.		
37.0	Prepare structural steel drawingsThe student will be able to:		
	37.01 Interpret codes and specifications.		
	37.02 Use the Timber Construction Manual and other technical data.		
	37.03 Calculate reactions and stresses.		
	37.04 Interpret shear and moment diagrams.		
	37.05 Detail bolted connections.		
	37.06 Detail welded connections.		
	37.07 Prepare erection plans and schedules.		
	37.08 Prepare advance bill for ordering materials.		
38.0	Prepare reinforced concrete drawingsThe student will be able to:		
	38.01 Interpret codes and specifications.		
	38.02 Interpret engineering drawings.		

	38.03 Prepare column detail drawings.
	38.04 Prepare footing and foundation drawings.
	38.05 Prepare floor and roof detail drawings.
	38.06 Prepare special structure detail drawings.
	38.07 Prepare bar list and schedule.
39.0	Prepare structural wood drawingsThe student will be able to:
	39.01 Interpret codes and specifications.
	39.02 Prepare fastening and connection details.
	39.03 Prepare framing plans.
40.0	Prepare advanced three-dimensional computer aided drawingsThe student will be able to:
	40.01 Produce structural 3D (steel, wood and reinforced concrete) drawings.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Air-Conditioning, Refrigeration and Heating Technology 1

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C400100
CIP Number	0647020107
Grade Level	30, 31
Standard Length	750 Hours
Teacher Certification	AC HEAT ME @7 7G REFRG MECH 7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning, and refrigeration and ventilation industry. The student should obtain EPA certification prior to leaving school in order to be employed in any job that requires work with refrigerants. This program focuses on broad, transferable skills, stresses the understanding of the heating, air-conditioning, refrigeration and ventilation industry and demonstrates elements of the industry such as planning, management, finance, technical and production skills, the underlying principles of technology, and health, safety and environmental issues.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	ACR0041	Air Conditioning, Refrigeration and Heating Helper	250 Hours	49-9021
В	ACR0043	Air Conditioning, Refrigeration and Heating Mechanic Assistant	250 Hours	49-9021
С	ACR0047	Air Conditioning, Refrigeration and Heating Mechanic 1	250 Hours	49-9021

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industry.
- 03.0 Demonstrate mathematics knowledge and skills.
- 04.0 Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipment.
- 05.0 Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their components.
- 06.0 Select and test electrical generation and distribution components for commercial heating and air conditioning systems.
- 07.0 Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systems.
- 08.0 Troubleshoot and wire electrical motors and their components.
- 09.0 Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems.
- 10.0 Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems.
- 11.0 Explain the function of basic electronics.
- 12.0 Read construction documents.
- 13.0 Describe the history and concepts of heating, air-conditioning and refrigeration.
- 14.0 Demonstrate science knowledge and skills.
- 15.0 Explain the properties of matter and heat behavior.
- 16.0 Analyze fluids, pressures, refrigerants and related codes.
- 17.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 18.0 Select appropriate commercial compressors.
- 19.0 Test and adjust commercial evaporative condensers.
- 20.0 Maintain, test and troubleshoot commercial evaporators.
- 21.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 22.0 Explain the importance of employability and entrepreneurship skills.
- 23.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.
- 24.0 Utilize and operate mechanical refrigeration servicing and testing equipment.
- 25.0 Assist in the installation of a residential heating and air-conditioning system and determine start-up procedures.
- 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 27.0 Demonstrate a working knowledge of refrigerants and oils.
- 28.0 Interpret, use and modify construction drawings and specifications.
- 29.0 Conduct system startup and shutdown.
- 30.0 Design heating and cooling systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Air-Conditioning, Refrigeration and Heating Technology 1 C400100

Occu	Number: ACR0041 ional Completion Point: A rigeration and Heating Helper – 250 Hours – SOC Code 49-9021	
01.0	emonstrate the importance of health, safety and environmental management systems in organizations and their importance to ganizational performance and regulatory complianceThe student will be able to:	
	1.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.	
	1.02 Explain the reasons for regular safety meetings and for company safety policies.	
	1.03 Explain the need for employee-background checks and medical examinations.	
	1.04 Identify and use appropriate fire extinguishers and other such safety devices.	
	1.05 Identify and follow emergency and rescue procedures.	
	1.06 Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.	
	1.07 Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.	
	1.08 Apply specific safety and recovery practices for refrigerants used in the industry.	
	1.09 Apply specific safety practices as they relate to handling and storing cylinders and materials.	
	1.10 Select and wear proper protective clothing and equipment.	
	1.11 Identify and use specific safety practices when using soldering and brazing skills.	
	1.12 Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.	
	1.13 Follow safety precautions when using hand and power tools.	
	1.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.	
	1.15 Explain emergency procedures to follow in response to workplace accidents.	
	1.16 Create a disaster and/or emergency response plan.	

02.0	Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	02.01 Identify and use basic hand tools and tool accessories; power tools (electric, mechanical and pneumatic, if available); pipe and tube-working tools; and specialized tools of the trade.
	02.02 Apply appropriate care and maintenance procedures for tools and tool accessories, following the directions in the tool-equipment manufacturer's manual.
03.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	03.01 Demonstrate knowledge of arithmetic operations.
	03.02 Analyze and apply data and measurements to solve problems and interpret documents.
	03.03 Construct charts/tables/graphs using functions and data.
04.0	Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipmentThe student will be able to:
	04.01 Explain the principles of electricity.
	04.02 Explain single- and three-phase power distribution.
	04.03 Define and explain watts, ohms, volts and amps.
	04.04 Identify and explain electrical measuring tools and devices.
	04.05 Explain the standards for and ways to measure watts, resistance, voltage and amperage, using appropriate instruments or devices.
	04.06 Identify and explain appropriate electrical wiring symbols.
	04.07 Draw and explain a wiring schematic diagram for a control system.
	04.08 Create a wiring schematic for an air conditioner an electric furnace, a heat pump, an oil furnace (optional) and a gas furnace.
	04.09 Explain codes and standards and safety requirements for working with the electrical components used in heating, air conditioning and refrigeration.
	04.10 Troubleshoot protection devices, such as fuses and breakers.
	04.11 Interpret tables and charts from the National Electrical Codes (NEC).
05.0	Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their componentsThe student will be able to:
	05.01 Identify and explain the operations of electrical control systems and their components (zone damper motors, duel fuel lock out controls, outdoor thermostats/low ambient controls, defrost controls/timers and auxiliary heating controls).
	05.02 Identify, install and troubleshoot controls for heating, air-conditioning and refrigeration systems.

1	
	05.03 Explain the operation of different types of electromechanical thermostats.
	05.04 Wire basic heating, air-conditioning and refrigeration systems.
	05.05 Troubleshoot operational problems for different types of electromechanical thermostats.
	05.06 Explain the electrical and mechanical operations of the basic heat pump.
06.0	Select and test electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	06.01 Determine wire sizes and voltage drops.
	06.02 Describe the operation of various types of transformers.
	06.03 Draw and identify various power-transformers.
	06.04 Test, size and replace protection devices such as fuses and breakers, motor starters and overloads.
07.0	Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systemsThe student will be able to:
	07.01 Explain how alternating current is developed and draw a sine wave.
	07.02 Identify single-phase and three-phase wiring arrangements.
	07.03 Explain how phase shift occurs in inductors and capacitors.
	07.04 Describe the types of capacitors and their applications.
	07.05 Explain the operation of single-phase and three-phase induction motors.
	07.06 Identify the various types of single-phase motors and their applications.
	07.07 State and demonstrate the safety precautions, such as lock out / tag out, which must be followed when working with electrical equipment.
	07.08 Explain how the electric company uses a demand meter.
	07.09 Identify and explain the operations and applications of various types of electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.10 Maintain, test and troubleshoot various types of commercial electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.11 Demonstrate the proper use of motor testing equipment.
08.0	Troubleshoot and wire electrical motors and their componentsThe student will be able to:
	08.01 Identify and explain the functions of various types of motors and their components.
_	

	08.02 Troubleshoot, test and analyze motors, using various methods.
	08.03 Identify, troubleshoot and wire various types of electric motors.
	08.04 Reverse the rotation of a motor.
09.0	Operate solid-state electronics as used in heating, air-conditioning and refrigeration systemsThe student will be able to:
	09.01 Explain the basic principles and functions of Direct Digital Control (DDC).
	09.02 Explain basic solid-state circuits and boards.
	09.03 Identify, test and replace circuits and boards.
	09.04 Identify and explain the functions of a building-management system.
	09.05 Program a programmable thermostat.
10.0	Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems The student will be able to:
	10.01 Explain how the principles of designing an electrical system for residential heating and air-conditioning systems apply to commercial heating and air-conditioning systems.
	10.02 Define and compare single- and multiphase voltage and current related to commercial heating and air-conditioning systems.
	10.03 Calculate various circuit loads in commercial heating and air-conditioning applications using Ohm's law.
	10.04 Troubleshoot electrical circuits for commercial heating and air-conditioning systems
11.0	Explain the function of basic electronicsThe student will be able to:
	11.01 Explain the basic theory of electronics and semiconductors.
	11.02 Explain how various semiconductor devices such as diodes, LEDs and photo diodes work and how they are used in power and control circuits.
	11.03 Identify different types of resistors and explain how their resistance values can be determined.
	11.04 Describe the operation and function of thermistors and cad cells.
	11.05 Test semiconductor components.
	11.06 Identify the connectors on a personal computer.

Cours	Course Number: ACR0043	
	Occupational Completion Point: B A/C, Refrigeration and Heating Mechanic Assistant – 250 Hours – SOC Code 49-9021	
12.0	Read construction documentsThe student will be able to:	
	12.01 Recognize and identify basic construction drawing terms, components and symbols.	
	12.02 Relate information on construction drawings to actual locations on the print.	
	12.03 Recognize different classifications of construction drawings.	
	12.04 Interpret and use drawing dimensions.	
13.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:	
	13.01 Explain the basic principles of heating, ventilation and air-conditioning.	
	13.02 Identify educational paths to career opportunities in the HVAC profession.	
	13.03 Identify and explain the four major refrigeration components.	
	13.04 Identify and explain the characteristics of a compression-cycle refrigerant system.	
	13.05 Differentiate between air-conditioning and refrigeration.	
	13.06 Differentiate between split systems and package systems.	
	13.07 Describe the benefits of conditioned air and environments.	
	13.08 Discuss the impact of heating, air-conditioning and refrigeration on society.	
	13.09 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, air-conditioning and refrigeration industry and in the environment and explain their future ramifications.	
	13.10 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as well as the manufacturer's installation instructions.	
	13.11 Identify various professional organizations, associations and societies and explain their purposes.	
14.0	Demonstrate science knowledge and skillsThe student will be able to:	
	14.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.	
	14.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.	
15.0	Explain the properties of matter and heat behaviorThe student will be able to:	

1	
	15.01 Describe and explain freezing point, critical temperature and absolute zero.
	15.02 Describe matter, heat and heat transfer.
	15.03 Differentiate between heat and temperature.
	15.04 Explain and distinguish among the characteristics of the three states of matter.
	15.05 Explain the relationship between temperature and humidity.
	15.06 Differentiate between latent heat and sensible heat.
16.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	16.01 Identify the refrigeration cycle.
	16.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	16.03 Define and explain "pressure," "fluid," and "temperature."
	16.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	16.05 Identify and explain the classifications, properties and uses of different refrigerants.
	16.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	16.07 Define and identify "color-coding" of refrigerant cylinders.
	16.08 Compare Pressure and Temperature (P/T) charts.
	16.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	16.10 Explain the effects of an improper refrigerant and contaminants in a system.
17.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	17.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	17.02 Evaluate metering-device performance.

	17.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	17.04 Analyze the operating condition of a compressor.
	17.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	17.06 Identify the location and explain the uses of refrigerant flow accessories.
	17.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	17.08 Evaluate system performance.
18.0	Select appropriate commercial compressorsThe student will be able to:
	18.01 Compare commercial-compressor requirements with those for residential and light commercial heating and air-conditioning systems.
	18.02 Select appropriate commercial compressors for cooling requirements.
	18.03 Describe the mechanical operation for each type of compressor.
	18.04 Explain compressor lubrication methods.
	18.05 Explain methods used to control compressor capacity.
	18.06 Describe how compressor protection devices operate.
	18.07 Perform the common procedures used when field servicing open and semi-hermetic compressors.
19.0	Test and adjust commercial evaporative condensersThe student will be able to:
	19.01 Determine the proper air and fluid flow for commercial evaporative condensers.
	19.02 Test and adjust the airflow for proper temperature difference.
	19.03 Test and adjust the water flow for proper GPM and temperature difference.
	19.04 Check for proper water treatment.
20.0	Maintain, test and troubleshoot commercial evaporatorsThe student will be able to:
	20.01 Determine the operational requirements for evaporators used in commercial heating and air-conditioning applications.
	20.02 Select appropriate evaporators for commercial heating and air-conditioning systems.
	20.03 Maintain, test and adjust various commercial heating and air-conditioning accessories.

21.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	21.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.02 Bend tubing, using tube benders.
	21.03 Connect tubing using flared fittings and compression fittings.
	21.04 Connect tubing, using solderless connectors.
	21.05 Connect tubing, using a swaged-joint connection.
	21.06 Identify and use various types of torches.
	21.07 Identify, select and use appropriate brazing alloys, materials and skills.
	21.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products, from heat.
	21.09 Braze tubing.
	21.10 Silver-braze brass, steels and copper.
	21.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	21.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	21.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.14 Maintain project time and materials lists.
	21.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
22.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	22.01 Identify and demonstrate positive work behaviors needed to be employable.
	22.02 Develop personal career plan that includes goals, objectives and strategies.
	22.03 Examine licensing, certification and industry credentialing requirements.
	22.04 Maintain a career portfolio to document knowledge, skills and experience.
	22.05 Evaluate and compare employment opportunities that match career goals.
	22.06 Identify and exhibit traits for retaining employment.

22.07	Identify opportunities and research requirements for career advancement.
22.08	Research the benefits of ongoing professional development.
22.09	Examine and describe entrepreneurship opportunities as a career planning option.

Occu	se Number: ACR0047 pational Completion Point:
A/C, F	Refrigeration and Heating Mechanic 1 – 250 Hours – SOC Code 49-9021 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	23.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	23.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	23.03 Explain pressure and temperature drops.
24.0	Utilize and operate mechanical refrigeration servicing and testing equipmentThe student will be able to:
	24.01 Identify the effects of superheat and sub-cooling on a system.
	24.02 Identify and explain the functions of servicing and testing equipment (such as vacuum pumps, micron gauges, EPA-approved equipment, leak detectors and charging systems).
	24.03 Operate a refrigerant recovery system.
	24.04 Explain the standards for and ways to measure, test, maintain and evacuate a mechanical heating, air-conditioning and refrigeration system.
	24.05 Evacuate the refrigerant system with various vacuum methods.
	24.06 Demonstrate compliance with Environmental Protection Agency (EPA) rules and regulations and if possible, take the EPA test.
	24.07 Charge various air-conditioning and mechanical refrigeration systems by various methods.
	24.08 Demonstrate the effects of superheat and sub-cooling on a system utilizing test equipment (such as thermometers and gages)
25.0	Assist in the installation of a residential heating and air-conditioning system and determine start-up proceduresThe student will be able to:
	25.01 Read and comply with dispatch orders.
	25.02 Explain local codes and ordinances.
	25.03 Select and use appropriate tools and safety practices to test equipment.
	25.04 Determine the electrical requirements of equipment.

25.06 Determine the proper charge in a residential air-conditioning unit and adjust superheat. 25.07 Determine the temperature drop across the evaporator. 25.08 Determine the temperature rise across the condenser. 25.09 Write a service report. 25.10 Apply good customer-relations skills. 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to: 26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal) and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants. 27.06 Interpret a P-T chart for an azeotrope refrigerant.	and operation specifications using
25.08 Determine the temperature rise across the condenser. 25.09 Write a service report. 25.10 Apply good customer-relations skills. 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems—The student will be able to: 26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal) and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oils—The student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
25.09 Write a service report. 25.10 Apply good customer-relations skills. 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to: 26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal) and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
25.10 Apply good customer-relations skills. 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems—The student will be able to: 26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal) and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oils—The student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to: 26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal) and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.

and closed-loop. 26.02 Determine the start-up and checkout procedures recommended by different manufacturers. 26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	udent will be able to:
26.03 Determine the electrical requirements of equipment. 26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	-ground (geothermal), open-loop
26.04 Select and use appropriate tools instruments and test equipment following safety precautions. 26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
26.05 Determine the temperature drop across the outdoor coil on a heat pump. 26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
26.06 Determine the temperature rise across the indoor coil on a heat pump. 26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
26.07 Test for a proper refrigerant charge in a residential heat pump. 26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
26.08 Apply good customer-relations skills. 27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
27.0 Demonstrate a working knowledge of refrigerants and oilsThe student will be able to: 27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
27.01 Identify the refrigerants in common use and state the types of applications in which each is used. 27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
27.02 Explain the effects of releasing refrigerants into the atmosphere. 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
 27.03 Explain how refrigerants are classified by their chemical composition. 27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants. 	
27.04 Describe the color-coding scheme used to identify refrigerant cylinders. 27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.	
27.06 Interpret a P-T chart for an azeotrope refrigerant.	rigerants.
27.07 Calculate superheat and subcooling.	

	27.08 Demonstrate refrigerant leak detecting methods.
	27.09 Identify the different types of oils used in refrigeration systems and explain their relationships to the various refrigerants.
	27.10 Explain how to add and remove oil from a system.
	27.11 Describe how to test oil for contamination.
28.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	28.01 Read mechanical plans within a set of construction drawings explain their relationship.
	28.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	28.03 Interpret specification documents and apply them to the plans.
	28.04 Interpret shop drawings and apply them to the plans and specifications.
	28.05 Develop a field set of as-built drawings.
	28.06 Identify the steps required for transferring design information to component production.
	28.07 List and classify materials most commonly used in HVAC systems.
29.0	Conduct system startup and shutdownThe student will be able to:
	29.01 Start up and shut down an air handler and related forced-air distribution system.
	29.02 Test compressor oil for acid contamination.
	29.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.
30.0	Design heating and cooling systemsThe student will be able to:
	30.01 Identify and describe the steps in the system design process.
	30.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.
	30.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.
	30.04 Complete a load estimate to determine the heating and/or cooling load of a building.
	30.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.
	30.06 Select heating and/or cooling equipment using manufacturers' product data.

30.07	Identify the various types of duct systems and explain why and where each type is used.
30.08	Demonstrate the effect of fittings and transitions on duct system design.
30.09	Use a friction loss chart and duct sizing table to size duct.
30.10	Install insulation and vapor barriers used in duct systems.
30.11	Select and install refrigerant and condensate piping following design principles

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Air-Conditioning, Refrigeration and Heating Technology 2

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C400200
CIP Number	0647020108
Grade Level	30, 31
Standard Length	600 Hours
Teacher Certification	AC HEAT ME @7 G REFRG MECH @7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning, and refrigeration and ventilation industry. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer. There are two course options, ACR0044 OR ACR0045, for occupational completion point B.

Air-Conditioning, Refrigeration and Heating Technology 1 is a core program. It is recommended student completes Air-Conditioning, Refrigeration and Heating Technology 1, or demonstrates mastery of the outcomes in that program, prior to enrollment in Air-Conditioning, Refrigeration and Heating Technology 2.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	ACR0049	Air Conditioning, Refrigeration and Heating Mechanic 2	250 Hours	49-9021
	ACR0044	Air Conditioning, Refrigeration and Heating Technician	350 Hours	
В	OR	OR		49-9021
	ACR0045	Refrigeration Mechanic	350 Hours	

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Use combustion-type heating servicing and testing equipment.
- 02.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 03.0 Maintain, test and adjust commercial heating and air-conditioning accessories.
- 04.0 Maintain, troubleshoot and repair commercial heating systems.
- 05.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.
- 06.0 Demonstrate knowledge of retail refrigeration systems.
- 07.0 Demonstrate knowledge of commercial and industrial refrigeration systems.
- 08.0 Develop an understanding of hydronic systems.
- 09.0 Develop an understanding of steam systems.
- 10.0 Determine the properties of air.
- 11.0 Use a pressure enthalpy chart to diagram refrigerant cycles.
- 12.0 Explain the standards for and ways to measure indoor-air quality.
- 13.0 Operate environmental control systems as used in commercial heating and air-conditioning systems.
- 14.0 Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applications.
- 15.0 Maintain and repair thermal storage systems.
- 16.0 Maintain, troubleshoot and repair commercial heating and air-conditioning systems.
- 17.0 Calculate commercial heating and air-conditioning loads.
- 18.0 Install air distribution systems.
- 19.0 Evaluate commercial airside systems.
- 20.0 Balance an air distribution system.
- 21.0 Select energy conservation equipment.
- 22.0 Analyze building management systems.
- 23.0 Recommend alternative heating and cooling systems for various case studies.
- 24.0 Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systems.
- 25.0 Demonstrate a working knowledge of refrigeration-system vibration and insulation.
- 26.0 Apply commercial refrigeration-pipe sizing and troubleshooting procedures.
- 27.0 Use refrigeration-systems skills in commercial applications.
- 28.0 Demonstrate a working knowledge of refrigerated storage systems.
- 29.0 Diagnose, maintain and repair ice-making systems.
- 30.0 Use refrigeration electrical-system skills in commercial applications.
- 31.0 Maintain and troubleshoot commercial refrigeration systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Air-Conditioning, Refrigeration and Heating Technology 2 C400200

Occu	se Number: ACR0049 pational Completion Point: A pnditioning, Refrigeration and Heating Mechanic 2 – 250 Hours – SOC Code 49-9021
01.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:
	01.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.
	01.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).
	01.03 Use the servicing and testing equipment.
	01.04 Test, analyze and troubleshoot combustion-type-heating systems.
02.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:
	02.01 Identify and discuss the safety and regulation issues and concerns.
	02.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).
	02.03 Identify and size various types of gas valves and regulators.
	02.04 Determine the application of gas valves and regulators.
	02.05 Troubleshoot gas valves and regulators.
03.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to
	03.01 Compare commercial accessories with residential and light- commercial-heating and air-conditioning accessories.
	03.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.
	03.03 Maintain, test and adjust commercial heating and air-conditioning accessories.
04.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:
	04.01 Identify the components of various commercial heating systems.

(F.	
	04.02 Explain the operational principles of various commercial heating systems.
	04.03 Test and analyze heating air-distribution systems.
	04.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.
05.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:
	05.01 Follow safety precautions.
	05.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.
	05.03 Lay out, construct and troubleshoot comfort systems.
	05.04 Test and analyze systems.
	05.05 Test and analyze heat-recovery systems.
06.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:
	06.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.
	06.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.
	06.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.
	06.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.
	06.05 Describe the various methods of defrost used in retail refrigeration systems.
	06.06 Identify and describe the applications for the various types of retail refrigeration systems.
	06.07 Describe the control system components used in retail refrigeration systems.
	06.08 Explain the operating sequence of a retail refrigeration system.
	06.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.
07.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:
	07.01 Identify different types of refrigerated coolers and display cases and describe each one's common application.
	07.02 Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.
	07.03 Identify single, multiple and satellite compressor systems. Describe the applications, installation considerations and advantages and disadvantages of each type.

	07.04 Identify packaged condensing units and unit coolers. Describe their applications, operation and installation considerations.
	07.05 Identify two-stage compressors and explain their operation and applications.
	07.06 Identify the various accessories used in commercial refrigeration systems and explain why each is used and where it should be installed in the system.
	07.07 Identify the various refrigeration control devices and explain the purpose of each type and how it works.
	07.08 Compare the components used in ammonia systems with those used in halocarbon-based refrigerant systems.
08.0	Develop an understanding of hydronic systemsThe student will be able to:
	08.01 Explain the terms and concepts used when working with hot-water heating and chilled-water cooling systems.
	08.02 Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water systems.
	08.03 Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperature water systems.
	08.04 Describe the safety precautions used when working with hot-water/chilled-water systems.
	08.05 Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.
	08.06 Identify the common piping configurations used with hot-water heating and chilled-water cooling systems.
	08.07 Explain the principles involved and describe the procedures used, in balancing hydronic systems.
	08.08 Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.
	08.09 Read the pressure across a water system circulating pump.
09.0	Develop an understanding of steam systemsThe student will be able to:
	09.01 Explain the terms and concepts used when working with steam-heating systems.
	09.02 Identify major components of steam heating systems and explain the purpose of each.
	09.03 Describe the basic steam-heating cycle.
	09.04 Safely perform selected operating procedures on low-pressure steam boilers and systems.
	09.05 Install and maintain selected steam traps.
	09.06 Identify the common piping configurations used with steam-heating systems.

Course Number: ACR0044

Occupational Completion Point: B
Air-Conditioning, Refrigeration and Heating Technician – 350 Hours – SOC Code 49-9021

Note: Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning Refrigeration and Heating

	Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning, Refrigeration and Heating nician' – ACR0045.
10.0	Determine the properties of airThe student will be able to:
	10.01 Explain the principles of psychrometrics.
	10.02 Identify and explain the components and uses of a psychrometric meter.
	10.03 Identify indoor-air-quality concerns as related to psychrometrics.
	10.04 Determine the properties of air, using a psychrometric chart.
	10.05 Follow safety precautions.
	10.06 Identify and explain the different types and benefits of air-filtration systems, air-handling systems and ventilation systems.
	10.07 Fabricate, operate, maintain and troubleshoot air-filtration systems, air-handling systems and ventilation systems.
11.0	Use a pressure enthalpy chart to diagram refrigerant cyclesThe student will be able to:
	11.01 Identify all components of the pressure enthalpy chart.
	11.02 Define enthalpy and entropy.
	11.03 Diagram several refrigerant cycles, using the pressure enthalpy chart.
12.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:
	12.01 Define indoor-air quality.
	12.02 Identify and explain the codes and standards regarding indoor-air quality.
	12.03 Select and use indoor-air-quality measuring devices.
	12.04 Explain the standards for and ways to measure indoor-air quality using various methods.
13.0	Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:
	13.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.
	13.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.

14.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:
	14.01 Identify pneumatic control systems.
	14.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.
15.0	Maintain and repair thermal storage systemsThe student will be able to:
	15.01 Apply appropriate codes, standards and safety practices.
	15.02 Describe the benefits and limitations of each type.
	15.03 Explain the operational principles of a thermal storage system.
	15.04 Identify and explain various types of thermal storage systems.
	15.05 Maintain, troubleshoot and test various types of thermal storage systems.
16.0	Maintain, troubleshoot and repair commercial heating and air-conditioning systemsThe student will be able to:
	16.01 Keep a record of the installation, maintenance and repair of commercial heating and air-conditioning systems.
	16.02 Apply local and national codes and safety practices.
	16.03 Lay out a commercial heating and air-conditioning system.
	16.04 Lay out a typical split commercial air-conditioning system.
	16.05 Lay out a typical split commercial heating system.
	16.06 Maintain, test, analyze and repair various types of commercial heating and air-conditioning systems.
	16.07 Maintain, troubleshoot and repair water-cooled condensers
17.0	Calculate commercial heating and air-conditioning loadsThe student will be able to:
	17.01 Explain conduction as a heat-load source.
	17.02 Describe the implications of conducting and the resistance values for different types of construction materials.
	17.03 Interpret heat-transfer tables and define values U, K, C, and R.
	17.04 Locate the total heat-transfer value of any surface.
	17.05 Explain infiltration and exfiltration/ventilation as a heat-load source.

	17.06 Explain a product heat-load source.
	17.07 Explain miscellaneous loads (people, motors and equipment) as heat-load sources.
	17.08 Explain the purpose of vapor barriers.
	17.09 Interpret tables of specific heat values as applied to commercial heating and air-conditioning systems.
	17.10 Calculate and design systems.
	17.11 Calculate cooling and heating equipment sizes.
	17.12 Design and identify methods of installing air-movement systems.
18.0	Install air distribution systemsThe student will be able to:
	18.01 Describe airflow and pressures in a basic forced-air distribution system.
	18.02 Explain the differences between propeller and centrifugal fans and blowers.
	18.03 Identify the various types of duct systems and explain why and where each type is used.
	18.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.
	18.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.
	18.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
	18.07 Demonstrate or explain the use and installation of dampers used in duct systems.
	18.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.
	18.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.
	18.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.
19.0	Evaluate commercial airside systemsThe student will be able to:
	19.01 Identify the differences in various types of commercial all-air systems.
	19.02 Identify the type of building in which a particular type of system is used.
	19.03 Explain the typical range of capacities for a commercial air system.
20.0	Balance an air distribution systemThe student will be able to:

	20.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.
	20.02 Explain the fan and pump laws.
	20.03 Use a psychrometric chart to evaluate air properties and changes in air properties.
	20.04 Explain the principles involved in the balancing of air and water distribution systems.
	20.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.
	20.06 Identify and use the tools and instruments needed to balance air distribution systems.
	20.07 Change the speed of an air distribution system supply fan.
21.0	Select energy conservation equipmentThe student will be able to:
	21.01 Identify and explain the operation of energy conservation equipment.
	21.02 Operate selected energy conservation equipment.
22.0	Analyze building management systemsThe student will be able to:
	22.01 Identify the major components of a building management system and describe how they fit together.
	22.02 Operate a basic direct digital controller.
23.0	Recommend alternative heating and cooling systems for various case studiesThe student will be able to:
	23.01 Describe alternative technologies for heating such as in-floor, direct-fired makeup unit (DFMU), solar, air turnover, corn or wood pellet burners, waste oil/multi-fuel and fireplace inserts.
	23.02 Describe alternative technologies for heating such as ductless systems, computer rooms, chilled beams and multi-zone.
Occup Refriç Note:	se Number: ACR0045 pational Completion Point: B geration Mechanic – 350 Hours – SOC Code 49-9021 Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning, Refrigeration and Heating
24.0	nician' – ACR0044 or 'Refrigeration Technician' – ACR0045. Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	24.01 Calculate loads and design and lay out a commercial refrigeration system.
	24.02 Identify and explain commercial refrigeration-pressure-regulation devices, controls and components.
	24.03 Install, service and repair ice machines and specialty refrigeration systems.

	24.04 Test and troubleshoot refrigerant-pressure-regulating devices, controls and components.
	24.05 Apply local and national codes and mechanical safety practices.
25.0	Demonstrate a working knowledge of refrigeration-system vibration and insulationThe student will be able to:
	25.01 Describe the applications of vibration eliminators.
	25.02 Identify and select the correct insulation for commercial application.
26.0	Apply commercial refrigeration-pipe sizing and troubleshooting proceduresThe student will be able to:
	26.01 Determine the capacities of refrigerant lines, including the amounts they will hold, equivalent lengths of fittings and the total effective length for various pipelines.
	26.02 Identify and apply industry-approved installation procedures.
	26.03 Troubleshoot refrigeration-pipe-sizing problems.
	a. Explain the use of traps in suction-line risers.
	b. Explain pressure drop.
	c. Calculate pressure drop in liquid-line risers.
	d. Size double risers, hot-gas lines and liquid lines from condenser to receiver.
27.0	Use refrigeration-systems skills in commercial applicationsThe student will be able to:
	27.01 Identify and apply the safety practices used with commercial refrigeration systems.
	27.02 Apply refrigeration-systems skills to commercial refrigeration systems.
	a. Perform dehydration, evacuation and recovery procedures.
	b. Interpret blueprints and mechanical drawings.
	c. Service and charge a refrigeration system.
	d. Test, analyze and replace compressors.
	e. Retrofit alternative refrigerants and oils.
28.0	Demonstrate a working knowledge of refrigerated storage systemsThe student will be able to:
	28.01 Identify and differentiate among various types of cases, such as service cases and self-service cases.

	28.02 Explain the operation of air-screen freezers, glass-door freezers, coffin cases and walk-in coolers.
	28.03 Differentiate among medium-temperature, low-temperature and ultralow-temperature systems.
	28.04 Explain various defrost methods.
	28.05 Maintain, test and troubleshoot defrost components.
	28.06 Identify and explain the components of various refrigerated storage systems.
	28.07 Maintain, test and troubleshoot various refrigerated storage system components.
29.0	Diagnose, maintain and repair ice-making systemsThe student will be able to:
	29.01 Identify and explain various types and operations of ice-making systems.
	29.02 Maintain, test, troubleshoot and repair various types of ice-making systems, following the manufacturers' recommendations.
	29.03 Identify and explain the different types of water-treatment methods and systems.
	29.04 Analyze water to identify water problems and the proper treatments.
30.0	Use refrigeration electrical-system skills in commercial applicationsThe student will be able to:
	30.01 Apply electrical safety practices for commercial refrigeration systems.
	30.02 Apply refrigeration electrical-system skills to commercial refrigeration systems:
	a. Interpret symbols of electrical components and diagrams.
	b. Interpret schematics and diagrams.
	c. Apply electrical theory and calculations.
	d. Explain the principles of designing electrical systems.
	e. Test and troubleshoot single- and three-phase motors.
	30.03 Test the solid-state components used in commercial refrigeration systems.
	30.04 Troubleshoot and diagnose the electrical circuits used in commercial refrigeration systems.
	30.05 Test and troubleshoot the thermostatic controls used in commercial refrigeration systems.
31.0	Maintain and troubleshoot commercial refrigeration systemsThe student will be able to:

31.01	Follow appropriate safety precautions for commercial refrigeration systems.
31.02	Identify and explain the operations of various types of commercial refrigeration systems and applications, such as single, multiplex and cascade systems.
31.03	Maintain and troubleshoot various types of commercial refrigeration systems.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Air-Conditioning, Refrigeration and Heating Technology NEW

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C400400
CIP Number	0647020109
Grade Level	30, 31
Standard Length	1700 Hours
Teacher Certification	AC HEAT ME @7 7G REFRG MECH 7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning, and refrigeration and ventilation industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of five occupational completion points. A student is considered a completer after OCP D or E.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	ACR0041	Air-Conditioning, Refrigeration and Heating Helper	250 Hours	49-9021
В	ACR0043	Air-Conditioning, Refrigeration and Heating Mechanic Assistant	250 Hours	49-9021
	ACR0047	Air-Conditioning, Refrigeration and Heating Mechanic 1	250 Hours	
С	ACR0049	Air-Conditioning, Refrigeration and Heating Mechanic 2	250 Hours	49-9021
D	ACR0044	Air-Conditioning, Refrigeration and Heating Technician	350 Hours	49-9021
Е	ACR0045	Refrigeration Mechanic	350 Hours	49-9021

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industry.
- 03.0 Demonstrate mathematics knowledge and skills.
- 04.0 Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipment.
- 05.0 Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their components.
- 06.0 Select and test electrical generation and distribution components for commercial heating and air conditioning systems.
- 07.0 Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systems.
- 08.0 Troubleshoot and wire electrical motors and their components.
- 09.0 Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems.
- 10.0 Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems.
- 11.0 Explain the function of basic electronics.
- 12.0 Read construction documents.
- 13.0 Describe the history and concepts of heating, air-conditioning and refrigeration.
- 14.0 Demonstrate science knowledge and skills.
- 15.0 Explain the properties of matter and heat behavior.
- 16.0 Analyze fluids, pressures, refrigerants and related codes.
- 17.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 18.0 Select appropriate commercial compressors.
- 19.0 Test and adjust commercial evaporative condensers.
- 20.0 Maintain, test and troubleshoot commercial evaporators.
- 21.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 22.0 Explain the importance of employability and entrepreneurship skills.
- 23.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.
- 24.0 Utilize and operate mechanical refrigeration servicing and testing equipment.
- 25.0 Assist in the installation of a residential heating and air-conditioning system and determine start-up procedures.
- 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 27.0 Demonstrate a working knowledge of refrigerants and oils.
- 28.0 Interpret, use and modify construction drawings and specifications.
- 29.0 Conduct system startup and shutdown.
- 30.0 Design heating and cooling systems.
- 31.0 Use combustion-type heating servicing and testing equipment.
- 32.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 33.0 Maintain, test and adjust commercial heating and air-conditioning accessories--The student will be able to
- 34.0 Maintain, troubleshoot and repair commercial heating systems.
- 35.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.

- 36.0 Demonstrate knowledge of retail refrigeration systems.
- 37.0 Demonstrate knowledge of commercial and industrial refrigeration systems.
- 38.0 Develop an understanding of hydronic systems.
- 39.0 Develop an understanding of steam systems.
- 40.0 Determine the properties of air.
- 41.0 Use a pressure enthalpy chart to diagram refrigerant cycles.
- 42.0 Explain the standards for and ways to measure indoor-air quality.
- 43.0 Operate environmental control systems as used in commercial heating and air-conditioning systems.
- 44.0 Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applications.
- 45.0 Maintain and repair thermal storage systems.
- 46.0 Maintain, troubleshoot and repair commercial heating and air-conditioning systems.
- 47.0 Calculate commercial heating and air-conditioning loads.
- 48.0 Install air distribution systems.
- 49.0 Evaluate commercial airside systems.
- 50.0 Balance an air distribution system.
- 51.0 Select energy conservation equipment.
- 52.0 Analyze building management systems.
- 53.0 Recommend alternative heating and cooling systems for various case studies.
- 54.0 Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systems.
- 55.0 Demonstrate a working knowledge of refrigeration-system vibration and insulation.
- 56.0 Apply commercial refrigeration-pipe sizing and troubleshooting procedures.
- 57.0 Use refrigeration-systems skills in commercial applications.
- 58.0 Demonstrate a working knowledge of refrigerated storage systems.
- 59.0 Diagnose, maintain and repair ice-making systems.
- 60.0 Use refrigeration electrical-system skills in commercial applications.
- 61.0 Maintain and troubleshoot commercial refrigeration systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Air Conditioning, Refrigeration and Heating Technology C400400

Course Number: ACR0041 Occupational Completion Point: A Air-Conditioning, Refrigeration and Heating Helper – 250 Hours – SOC Code 49-9021		
01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:		
01.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
01.02 Explain the reasons for regular safety meetings and for company safety policies.		
01.03 Explain the need for employee-background checks and medical examinations.		
01.04 Identify and use appropriate fire extinguishers and other such safety devices.		
01.05 Identify and follow emergency and rescue procedures.		
01.06 Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.		
01.07 Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.		
01.08 Apply specific safety and recovery practices for refrigerants used in the industry.		
01.09 Apply specific safety practices as they relate to handling and storing cylinders and materials.		
01.10 Select and wear proper protective clothing and equipment.		
01.11 Identify and use specific safety practices when using soldering and brazing skills.		
01.12 Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.		
01.13 Follow safety precautions when using hand and power tools.		
01.14 Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.		
01.15 Explain emergency procedures to follow in response to workplace accidents.		
01.16 Create a disaster and/or emergency response plan.		

02.0	Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	02.01 Identify and use basic hand tools and tool accessories; power tools (electric, mechanical and pneumatic, if available); pipe and tube-working tools; and specialized tools of the trade.
	02.02 Apply appropriate care and maintenance procedures for tools and tool accessories, following the directions in the tool-equipment manufacturer's manual.
03.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	03.01 Demonstrate knowledge of arithmetic operations.
	03.02 Analyze and apply data and measurements to solve problems and interpret documents.
	03.03 Construct charts/tables/graphs using functions and data.
04.0	Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipmentThe student will be able to:
	04.01 Explain the principles of electricity.
	04.02 Explain single- and three-phase power distribution.
	04.03 Define and explain watts, ohms, volts and amps.
	04.04 Identify and explain electrical measuring tools and devices.
	04.05 Explain the standards for and ways to measure watts, resistance, voltage and amperage, using appropriate instruments or devices.
	04.06 Identify and explain appropriate electrical wiring symbols.
	04.07 Draw and explain a wiring schematic diagram for a control system.
	04.08 Create a wiring schematic for an air conditioner an electric furnace, a heat pump, an oil furnace (optional) and a gas furnace.
	04.09 Explain codes and standards and safety requirements for working with the electrical components used in heating, air conditioning and refrigeration.
	04.10 Troubleshoot protection devices, such as fuses and breakers.
	04.11 Interpret tables and charts from the National Electrical Codes (NEC).
05.0	Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their componentsThe student will be able to:
	05.01 Identify and explain the operations of electrical control systems and their components (zone damper motors, duel fuel lock out controls, outdoor thermostats/low ambient controls, defrost controls/timers and auxiliary heating controls).
	05.02 Identify, install and troubleshoot controls for heating, air-conditioning and refrigeration systems.
-	

	05.03 Explain the operation of different types of electromechanical thermostats.
	05.04 Wire basic heating, air-conditioning and refrigeration systems.
	05.05 Troubleshoot operational problems for different types of electromechanical thermostats.
	05.06 Explain the electrical and mechanical operations of the basic heat pump.
06.0	Select and test electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	06.01 Determine wire sizes and voltage drops.
	06.02 Describe the operation of various types of transformers.
	06.03 Draw and identify various power-transformers.
	06.04 Test, size and replace protection devices such as fuses and breakers, motor starters and overloads.
07.0	Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systemsThe student will be able to:
	07.01 Explain how alternating current is developed and draw a sine wave.
	07.02 Identify single-phase and three-phase wiring arrangements.
	07.03 Explain how phase shift occurs in inductors and capacitors.
	07.04 Describe the types of capacitors and their applications.
	07.05 Explain the operation of single-phase and three-phase induction motors.
	07.06 Identify the various types of single-phase motors and their applications.
	07.07 State and demonstrate the safety precautions, such as lock out / tag out, which must be followed when working with electrical equipment.
	07.08 Explain how the electric company uses a demand meter.
	07.09 Identify and explain the operations and applications of various types of electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.10 Maintain, test and troubleshoot various types of commercial electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.11 Demonstrate the proper use of motor testing equipment.
08.0	Troubleshoot and wire electrical motors and their componentsThe student will be able to:
	08.01 Identify and explain the functions of various types of motors and their components.

	08.02 Troubleshoot, test and analyze motors, using various methods.
	08.03 Identify, troubleshoot and wire various types of electric motors.
	08.04 Reverse the rotation of a motor.
09.0	Operate solid-state electronics as used in heating, air-conditioning and refrigeration systemsThe student will be able to:
	09.01 Explain the basic principles and functions of Direct Digital Control (DDC).
	09.02 Explain basic solid-state circuits and boards.
	09.03 Identify, test and replace circuits and boards.
	09.04 Identify and explain the functions of a building-management system.
	09.05 Program a programmable thermostat.
10.0	Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems The student will be able to:
	10.01 Explain how the principles of designing an electrical system for residential heating and air-conditioning systems apply to commercial heating and air-conditioning systems.
	10.02 Define and compare single- and multiphase voltage and current related to commercial heating and air-conditioning systems.
	10.03 Calculate various circuit loads in commercial heating and air-conditioning applications using Ohm's law.
	10.04 Troubleshoot electrical circuits for commercial heating and air-conditioning systems
11.0	Explain the function of basic electronicsThe student will be able to:
	11.01 Explain the basic theory of electronics and semiconductors.
	11.02 Explain how various semiconductor devices such as diodes, LEDs and photo diodes work, and how they are used in power and control circuits.
	11.03 Identify different types of resistors and explain how their resistance values can be determined.
	11.04 Describe the operation and function of thermistors and cad cells.
	11.05 Test semiconductor components.
	11.06 Identify the connectors on a personal computer.
-	

Occu	Course Number: ACR0043 Occupational Completion Point: B Air-Conditioning, Refrigeration and Heating Mechanic Assistant – 250 Hours – SOC Code 49-9021		
12.0	Read construction documentsThe student will be able to:		
	12.01 Recognize and identify basic construction drawing terms, components and symbols.		
	12.02 Relate information on construction drawings to actual locations on the print.		
	12.03 Recognize different classifications of construction drawings.		
	12.04 Interpret and use drawing dimensions.		
13.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:		
	13.01 Explain the basic principles of heating, ventilation and air-conditioning.		
	13.02 Identify educational paths to career opportunities in the HVAC profession.		
	13.03 Identify and explain the four major refrigeration components.		
	13.04 Identify and explain the characteristics of a compression-cycle refrigerant system.		
	13.05 Differentiate between air-conditioning and refrigeration.		
	13.06 Differentiate between split systems and package systems.		
	13.07 Describe the benefits of conditioned air and environments.		
	13.08 Discuss the impact of heating, air-conditioning and refrigeration on society.		
	13.09 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, air-conditioning and refrigeration industry and in the environment and explain their future ramifications.		
	13.10 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as well as the manufacturer's installation instructions.		
	13.11 Identify various professional organizations, associations and societies and explain their purposes.		
14.0	Demonstrate science knowledge and skillsThe student will be able to:		
	14.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	14.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.		
15.0	Explain the properties of matter and heat behaviorThe student will be able to:		

1	
	15.01 Describe and explain freezing point, critical temperature and absolute zero.
	15.02 Describe matter, heat and heat transfer.
	15.03 Differentiate between heat and temperature.
	15.04 Explain and distinguish among the characteristics of the three states of matter.
	15.05 Explain the relationship between temperature and humidity.
	15.06 Differentiate between latent heat and sensible heat.
16.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	16.01 Identify the refrigeration cycle.
	16.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	16.03 Define and explain pressure, fluid, and temperature.
	16.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	16.05 Identify and explain the classifications, properties and uses of different refrigerants.
	16.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	16.07 Define and identify "color-coding" of refrigerant cylinders.
	16.08 Compare Pressure and Temperature (P/T) charts.
	16.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	16.10 Explain the effects of an improper refrigerant and contaminants in a system.
17.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	17.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	17.02 Evaluate metering-device performance.

	17.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	17.04 Analyze the operating condition of a compressor.
	17.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	17.06 Identify the location and explain the uses of refrigerant flow accessories.
	17.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	17.08 Evaluate system performance.
18.0	Select appropriate commercial compressorsThe student will be able to:
	18.01 Compare commercial-compressor requirements with those for residential and light commercial heating and air-conditioning systems.
	18.02 Select appropriate commercial compressors for cooling requirements.
	18.03 Describe the mechanical operation for each type of compressor.
	18.04 Explain compressor lubrication methods.
	18.05 Explain methods used to control compressor capacity.
	18.06 Describe how compressor protection devices operate.
	18.07 Perform the common procedures used when field servicing open and semi-hermetic compressors.
19.0	Test and adjust commercial evaporative condensersThe student will be able to:
	19.01 Determine the proper air and fluid flow for commercial evaporative condensers.
	19.02 Test and adjust the airflow for proper temperature difference.
	19.03 Test and adjust the water flow for proper GPM and temperature difference.
	19.04 Check for proper water treatment.
20.0	Maintain, test and troubleshoot commercial evaporatorsThe student will be able to:
	20.01 Determine the operational requirements for evaporators used in commercial heating and air-conditioning applications.
	20.02 Select appropriate evaporators for commercial heating and air-conditioning systems.
	20.03 Maintain, test and adjust various commercial heating and air-conditioning accessories.

21.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	21.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.02 Bend tubing, using tube benders.
	21.03 Connect tubing using flared fittings and compression fittings.
	21.04 Connect tubing, using solderless connectors.
	21.05 Connect tubing, using a swaged-joint connection.
	21.06 Identify and use various types of torches.
	21.07 Identify, select and use appropriate brazing alloys, materials and skills.
	21.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products, from heat.
	21.09 Braze tubing.
	21.10 Silver-braze brass, steels and copper.
	21.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	21.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	21.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.14 Maintain project time and materials lists.
	21.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
22.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	22.01 Identify and demonstrate positive work behaviors needed to be employable.
	22.02 Develop personal career plan that includes goals, objectives and strategies.
	22.03 Examine licensing, certification and industry credentialing requirements.
	22.04 Maintain a career portfolio to document knowledge, skills and experience.
	22.05 Evaluate and compare employment opportunities that match career goals.
	22.06 Identify and exhibit traits for retaining employment.

22.07	Identify opportunities and research requirements for career advancement.
22.08	Research the benefits of ongoing professional development.

Occu	se Number: ACR0047 pational Completion Point: onditioning, Refrigeration and Heating Mechanic 1 – 250 Hours – SOC Code 49-9021
23.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	23.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	23.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	23.03 Explain pressure and temperature drops.
24.0	Utilize and operate mechanical refrigeration servicing and testing equipmentThe student will be able to:
	24.01 Identify the effects of superheat and sub-cooling on a system.
	24.02 Identify and explain the functions of servicing and testing equipment (such as vacuum pumps, micron gauges, EPA-approved equipment, leak detectors and charging systems).
	24.03 Operate a refrigerant recovery system.
	24.04 Explain the standards for and ways to measure, test, maintain and evacuate a mechanical heating, air-conditioning and refrigeration system.
	24.05 Evacuate the refrigerant system with various vacuum methods.
	24.06 Demonstrate compliance with Environmental Protection Agency (EPA) rules and regulations and, if possible, take the EPA test.
	24.07 Charge various air-conditioning and mechanical refrigeration systems by various methods.
	24.08 Demonstrate the effects of superheat and sub-cooling on a system utilizing test equipment (such as thermometers and gages)
25.0	Assist in the installation of a residential heating and air-conditioning system and determine start-up proceduresThe student will be able to:
	25.01 Read and comply with dispatch orders.
	25.02 Explain local codes and ordinances.
	25.03 Select and use appropriate tools and safety practices to test equipment.
	25.04 Determine the electrical requirements of equipment.
	25.05 Assist in the installation of a heating and air-conditioning system to the manufacturer's installation and operation specifications, using a practical knowledge of duct fabrication methods.

	25.06 Determine the proper charge in a residential air-conditioning unit and adjust superheat.
	25.07 Determine the temperature drop across the evaporator.
	25.08 Determine the temperature rise across the condenser.
	25.09 Write a service report.
	25.10 Apply good customer-relations skills.
26.0	Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to:
	26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.
	26.02 Determine the start-up and checkout procedures recommended by different manufacturers.
	26.03 Determine the electrical requirements of equipment.
	26.04 Select and use appropriate tools, instruments and test equipment following safety precautions.
	26.05 Determine the temperature drop across the outdoor coil on a heat pump.
	26.06 Determine the temperature rise across the indoor coil on a heat pump.
	26.07 Test for a proper refrigerant charge in a residential heat pump.
	26.08 Apply good customer-relations skills.
27.0	Demonstrate a working knowledge of refrigerants and oilsThe student will be able to:
	27.01 Identify the refrigerants in common use and state the types of applications in which each is used.
	27.02 Explain the effects of releasing refrigerants into the atmosphere.
	27.03 Explain how refrigerants are classified by their chemical composition.
	27.04 Describe the color-coding scheme used to identify refrigerant cylinders.
	27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.
	27.06 Interpret a P-T chart for an azeotrope refrigerant.
	27.07 Calculate superheat and subcooling.
	27.08 Demonstrate refrigerant leak detecting methods.

	27.09 Identify the different types of oils used in refrigeration systems and explain their relationships to the various refrigerants.
	27.10 Explain how to add and remove oil from a system.
	27.11 Describe how to test oil for contamination.
28.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	28.01 Read mechanical plans within a set of construction drawings explain their relationship.
	28.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	28.03 Interpret specification documents and apply them to the plans.
	28.04 Interpret shop drawings and apply them to the plans and specifications.
	28.05 Develop a field set of as-built drawings.
	28.06 Identify the steps required for transferring design information to component production.
	28.07 List and classify materials most commonly used in HVAC systems.
29.0	Conduct system startup and shutdownThe student will be able to:
	29.01 Start up and shut down an air handler and related forced-air distribution system.
	29.02 Test compressor oil for acid contamination.
	29.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.
30.0	Design heating and cooling systemsThe student will be able to:
	30.01 Identify and describe the steps in the system design process.
	30.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.
	30.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.
	30.04 Complete a load estimate to determine the heating and/or cooling load of a building.
	30.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.
	30.06 Select heating and/or cooling equipment using manufacturers' product data.
	30.07 Identify the various types of duct systems and explain why and where each type is used.

30.08	Demonstrate the effect of fittings and transitions on duct system design.
30.09	Use a friction loss chart and duct sizing table to size duct.
30.10	Install insulation and vapor barriers used in duct systems.
30.11	Select and install refrigerant and condensate piping following proper design principles.

Occu	se Number: ACR0049 pational Completion Point: C pnditioning, Refrigeration and Heating Mechanic 2 – 250 Hours – SOC Code 49-9021
31.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:
	31.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.
	31.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).
	31.03 Use the servicing and testing equipment.
	31.04 Test, analyze and troubleshoot combustion-type-heating systems.
32.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:
	32.01 Identify and discuss the safety and regulation issues and concerns.
	32.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).
	32.03 Identify and size various types of gas valves and regulators.
	32.04 Determine the application of gas valves and regulators.
	32.05 Troubleshoot gas valves and regulators.
33.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to
	33.01 Compare commercial accessories with residential and light- commercial-heating and air-conditioning accessories.
	33.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.
	33.03 Maintain, test and adjust commercial heating and air-conditioning accessories.
34.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:

	34.01 Identify the components of various commercial heating systems.
	34.02 Explain the operational principles of various commercial heating systems.
	34.03 Test and analyze heating air-distribution systems.
	34.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.
35.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:
	35.01 Follow safety precautions.
	35.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.
	35.03 Lay out, construct and troubleshoot comfort systems.
	35.04 Test and analyze systems.
	35.05 Test and analyze heat-recovery systems.
36.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:
	36.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.
	36.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.
	36.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.
	36.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.
	36.05 Describe the various methods of defrost used in retail refrigeration systems.
	36.06 Identify and describe the applications for the various types of retail refrigeration systems.
	36.07 Describe the control system components used in retail refrigeration systems.
	36.08 Explain the operating sequence of a retail refrigeration system.
	36.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.
37.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:
	37.01 Identify different types of refrigerated coolers and display cases and describe each one's common application.
	37.02 Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.
L	

	37.03 Identify single, multiple and satellite compressor systems. Describe the applications, installation cons disadvantages of each type.	siderations and advantages and
	37.04 Identify packaged condensing units and unit coolers. Describe their applications, operation and instal	llation considerations.
	37.05 Identify two-stage compressors and explain their operation and applications.	
	37.06 Identify the various accessories used in commercial refrigeration systems and explain why each is us installed in the system.	sed and where it should be
	37.07 Identify the various refrigeration control devices and explain the purpose of each type and how it work	ks.
	37.08 Compare the components used in ammonia systems with those used in halocarbon-based refrigerant	t systems.
38.0	Develop an understanding of hydronic systemsThe student will be able to:	
	38.01 Explain the terms and concepts used when working with hot-water heating and chilled-water cooling	systems.
	38.02 Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water	r systems.
	38.03 Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperate	ture water systems.
	38.04 Describe the safety precautions used when working with hot-water/chilled-water systems.	
	38.05 Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.	
	38.06 Identify the common piping configurations used with hot-water heating and chilled-water cooling systems	ems.
	38.07 Explain the principles involved and describe the procedures used, in balancing hydronic systems.	
	38.08 Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.	
	38.09 Read the pressure across a water system circulating pump.	
39.0	Develop an understanding of steam systemsThe student will be able to:	
	39.01 Explain the terms and concepts used when working with steam-heating systems.	
	39.02 Identify major components of steam heating systems and explain the purpose of each.	
	39.03 Describe the basic steam-heating cycle.	
	39.04 Safely perform selected operating procedures on low-pressure steam boilers and systems.	
	39.05 Install and maintain selected steam traps.	
	39.06 Identify the common piping configurations used with steam-heating systems.	

Course Number: ACR0044

Occupational Completion Point: D
Air-Conditioning, Refrigeration and Heating Technician – 350 Hours – SOC Code 49-9021

Note: Students may choose one of the following courses for the completion of OCP D: 'Air-Conditioning, Refrigeration and Heating

Techr	nician' – ACR0044 or 'Refrigeration Technician' – ACR0045.
40.0	Determine the properties of airThe student will be able to:
	40.01 Explain the principles of psychrometrics.
	40.02 Identify and explain the components and uses of a psychrometric meter.
	40.03 Identify indoor-air-quality concerns as related to psychrometrics.
	40.04 Determine the properties of air, using a psychrometric chart.
	40.05 Follow safety precautions.
	40.06 Identify and explain the different types and benefits of air-filtration systems, air-handling systems and ventilation systems.
	40.07 Fabricate, operate, maintain and troubleshoot air-filtration systems, air-handling systems and ventilation systems.
41.0	Use a pressure enthalpy chart to diagram refrigerant cyclesThe student will be able to:
	41.01 Identify all components of the pressure enthalpy chart.
	41.02 Define enthalpy and entropy.
	41.03 Diagram several refrigerant cycles, using the pressure enthalpy chart.
42.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:
	42.01 Define indoor-air quality.
	42.02 Identify and explain the codes and standards regarding indoor-air quality.
	42.03 Select and use indoor-air-quality measuring devices.
	42.04 Explain the standards for and ways to measure indoor-air quality using various methods.
43.0	Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:
	43.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.
	43.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.

44.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:		
	44.01 Identify pneumatic control systems.		
	44.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.		
45.0	Maintain and repair thermal storage systemsThe student will be able to:		
	45.01 Apply appropriate codes, standards and safety practices.		
	45.02 Describe the benefits and limitations of each type.		
	45.03 Explain the operational principles of a thermal storage system.		
	45.04 Identify and explain various types of thermal storage systems.		
	45.05 Maintain, troubleshoot and test various types of thermal storage systems.		
46.0	Maintain, troubleshoot and repair commercial heating and air-conditioning systemsThe student will be able to:		
	46.01 Keep a record of the installation, maintenance and repair of commercial heating and air-conditioning systems.		
	46.02 Apply local and national codes and safety practices.		
	46.03 Lay out a commercial heating and air-conditioning system.		
	46.04 Lay out a typical split commercial air-conditioning system.		
	46.05 Lay out a typical split commercial heating system.		
	46.06 Maintain, test, analyze and repair various types of commercial heating and air-conditioning systems.		
	46.07 Maintain, troubleshoot and repair water-cooled condensers		
47.0	Calculate commercial heating and air-conditioning loadsThe student will be able to:		
	47.01 Explain conduction as a heat-load source.		
	47.02 Describe the implications of conducting and the resistance values for different types of construction materials.		
	47.03 Interpret heat-transfer tables and define values U, K, C, and R.		
	47.04 Locate the total heat-transfer value of any surface.		
	47.05 Explain infiltration and exfiltration/ventilation as a heat-load source.		

	47.06 Explain a product heat-load source.
	47.07 Explain miscellaneous loads (people, motors and equipment) as heat-load sources.
	47.08 Explain the purpose of vapor barriers.
	47.09 Interpret tables of specific heat values as applied to commercial heating and air-conditioning systems.
	47.10 Calculate and design systems.
	47.11 Calculate cooling and heating equipment sizes.
	47.12 Design and identify methods of installing air-movement systems.
48.0	Install air distribution systemsThe student will be able to:
	48.01 Describe airflow and pressures in a basic forced-air distribution system.
	48.02 Explain the differences between propeller and centrifugal fans and blowers.
	48.03 Identify the various types of duct systems and explain why and where each type is used.
	48.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.
	48.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.
	48.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
	48.07 Demonstrate or explain the use and installation of dampers used in duct systems.
	48.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.
	48.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.
	48.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.
49.0	Evaluate commercial airside systemsThe student will be able to:
	49.01 Identify the differences in various types of commercial all-air systems.
	49.02 Identify the type of building in which a particular type of system is used.
	49.03 Explain the typical range of capacities for a commercial air system.
50.0	Balance an air distribution systemThe student will be able to:

	50.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.
	50.02 Explain the fan and pump laws.
	50.03 Use a psychrometric chart to evaluate air properties and changes in air properties.
	50.04 Explain the principles involved in the balancing of air and water distribution systems.
	50.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.
	50.06 Identify and use the tools and instruments needed to balance air distribution systems.
	50.07 Change the speed of an air distribution system supply fan.
51.0	Select energy conservation equipmentThe student will be able to:
	51.01 Identify and explain the operation of energy conservation equipment.
	51.02 Operate selected energy conservation equipment.
52.0	Analyze building management systemsThe student will be able to:
	52.01 Identify the major components of a building management system and describe how they fit together.
	52.02 Operate a basic direct digital controller.
53.0	Recommend alternative heating and cooling systems for various case studiesThe student will be able to:
	53.01 Describe alternative technologies for heating such as in-floor, direct-fired makeup unit (DFMU), solar, air turnover, corn or wood pellet burners, waste oil/multi-fuel and fireplace inserts.
	53.02 Describe alternative technologies for heating such as ductless systems, computer rooms, chilled beams and multi-zone.
Occup Refrig	se Number: ACR0045 pational Completion Point: D peration Mechanic – 350 Hours – SOC Code 49-9021 Students may choose one of the following courses for the completion of OCP D: 'Air-Conditioning, Refrigeration and Heating
Techr	nician' – ACR0044 or 'Refrigeration Technician' – ACR0045.
54.0	Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	54.01 Calculate loads and design and lay out a commercial refrigeration system.
	54.02 Identify and explain commercial refrigeration-pressure-regulation devices, controls and components.
	54.03 Install, service and repair ice machines and specialty refrigeration systems.

I.	
	54.04 Test and troubleshoot refrigerant-pressure-regulating devices, controls and components.
	54.05 Apply local and national codes and mechanical safety practices.
55.0	Demonstrate a working knowledge of refrigeration-system vibration and insulationThe student will be able to:
	55.01 Describe the applications of vibration eliminators.
	55.02 Identify and select the correct insulation for commercial application.
56.0	Apply commercial refrigeration-pipe sizing and troubleshooting proceduresThe student will be able to:
	56.01 Determine the capacities of refrigerant lines, including the amounts they will hold, equivalent lengths of fittings and the total effective length for various pipelines.
	56.02 Identify and apply industry-approved installation procedures.
	56.03 Troubleshoot refrigeration-pipe-sizing problems.
	a. Explain the use of traps in suction-line risers.
	b. Explain pressure drop.
	c. Calculate pressure drop in liquid-line risers.
	d. Size double risers, hot-gas lines and liquid lines from condenser to receiver.
57.0	Use refrigeration-systems skills in commercial applicationsThe student will be able to:
	57.01 Identify and apply the safety practices used with commercial refrigeration systems.
	57.02 Apply refrigeration-systems skills to commercial refrigeration systems.
	a. Perform dehydration, evacuation and recovery procedures.
	b. Interpret blueprints and mechanical drawings.
	c. Service and charge a refrigeration system.
	d. Test, analyze and replace compressors.
	e. Retrofit alternative refrigerants and oils.
58.0	Demonstrate a working knowledge of refrigerated storage systemsThe student will be able to:
	58.01 Identify and differentiate among various types of cases, such as service cases and self-service cases.

	58.02 Explain the operation of air-screen freezers, glass-door freezers, coffin cases and walk-in coolers.
	58.03 Differentiate among medium-temperature, low-temperature and ultralow-temperature systems.
	58.04 Explain various defrost methods.
	58.05 Maintain, test and troubleshoot defrost components.
	58.06 Identify and explain the components of various refrigerated storage systems.
	58.07 Maintain, test and troubleshoot various refrigerated storage system components.
59.0	Diagnose, maintain and repair ice-making systemsThe student will be able to:
	59.01 Identify and explain various types and operations of ice-making systems.
	59.02 Maintain, test, troubleshoot and repair various types of ice-making systems, following the manufacturers' recommendations.
	59.03 Identify and explain the different types of water-treatment methods and systems.
	59.04 Analyze water to identify water problems and the proper treatments.
60.0	Use refrigeration electrical-system skills in commercial applicationsThe student will be able to:
	60.01 Apply electrical safety practices for commercial refrigeration systems.
	60.02 Apply refrigeration electrical-system skills to commercial refrigeration systems:
	a. Interpret symbols of electrical components and diagrams.
	b. Interpret schematics and diagrams.
	c. Apply electrical theory and calculations.
	d. Explain the principles of designing electrical systems.
	e. Test and troubleshoot single- and three-phase motors.
	60.03 Test the solid-state components used in commercial refrigeration systems.
	60.04 Troubleshoot and diagnose the electrical circuits used in commercial refrigeration systems.
	60.05 Test and troubleshoot the thermostatic controls used in commercial refrigeration systems.
61.0	Maintain and troubleshoot commercial refrigeration systemsThe student will be able to:

61.01	Follow appropriate safety precautions for commercial refrigeration systems.
61.02	Identify and explain the operations of various types of commercial refrigeration systems and applications, such as single, multiplex and cascade systems.
61.03	Maintain and troubleshoot various types of commercial refrigeration systems.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

Florida Department of Education Curriculum Framework

Program Title: Air-Conditioning, Refrigeration and Heating Technology 2 NEW

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C400500
CIP Number	0647020111
Grade Level	30, 31
Standard Length	950 Hours
Teacher Certification	AC HEAT ME @7 G REFRG MECH @7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning, and refrigeration and ventilation industry. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. A student is considered a completer after OCP B or C.

Air-Conditioning, Refrigeration and Heating Technology 1 is a core program. It is recommended students complete Air-Conditioning, Refrigeration and Heating Technology 1, or demonstrates mastery of the outcomes in that program, prior to enrollment in Air-Conditioning, Refrigeration and Heating Technology 2.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	ACR0049	Air Conditioning, Refrigeration and Heating Mechanic 2	250 Hours	49-9021
В	ACR0044	Air Conditioning, Refrigeration and Heating Technician	350 Hours	49-9021
С	ACR0045	Refrigeration Mechanic	350 Hours	49-9021

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Use combustion-type heating servicing and testing equipment.
- 02.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 03.0 Maintain, test and adjust commercial heating and air-conditioning accessories.
- 04.0 Maintain, troubleshoot and repair commercial heating systems.
- 05.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.
- 06.0 Demonstrate knowledge of retail refrigeration systems.
- 07.0 Demonstrate knowledge of commercial and industrial refrigeration systems.
- 08.0 Develop an understanding of hydronic systems.
- 09.0 Develop an understanding of steam systems.
- 10.0 Determine the properties of air.
- 11.0 Use a pressure enthalpy chart to diagram refrigerant cycles.
- 12.0 Explain the standards for and ways to measure indoor-air quality.
- 13.0 Operate environmental control systems as used in commercial heating and air-conditioning systems.
- 14.0 Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applications.
- 15.0 Maintain and repair thermal storage systems.
- 16.0 Maintain, troubleshoot and repair commercial heating and air-conditioning systems.
- 17.0 Calculate commercial heating and air-conditioning loads.
- 18.0 Install air distribution systems.
- 19.0 Evaluate commercial airside systems.
- 20.0 Balance an air distribution system.
- 21.0 Select energy conservation equipment.
- 22.0 Analyze building management systems.
- 23.0 Recommend alternative heating and cooling systems for various case studies.
- 24.0 Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systems.
- 25.0 Demonstrate a working knowledge of refrigeration-system vibration and insulation.
- 26.0 Apply commercial refrigeration-pipe sizing and troubleshooting procedures.
- 27.0 Use refrigeration-systems skills in commercial applications.
- 28.0 Demonstrate a working knowledge of refrigerated storage systems.
- 29.0 Diagnose, maintain and repair ice-making systems.
- 30.0 Use refrigeration electrical-system skills in commercial applications.
- 31.0 Maintain and troubleshoot commercial refrigeration systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Air-Conditioning, Refrigeration and Heating Technology 2 C400500

Occu	Course Number: ACR0049 Occupational Completion Point: A Air-Conditioning, Refrigeration and Heating Mechanic 2 – 250 Hours – SOC Code 49-9021		
01.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:		
	01.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.		
	01.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).		
	01.03 Use the servicing and testing equipment.		
	01.04 Test, analyze and troubleshoot combustion-type-heating systems.		
02.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:		
	02.01 Identify and discuss the safety and regulation issues and concerns.		
	02.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).		
	02.03 Identify and size various types of gas valves and regulators.		
	02.04 Determine the application of gas valves and regulators.		
	02.05 Troubleshoot gas valves and regulators.		
03.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to		
	03.01 Compare commercial accessories with residential and light- commercial-heating and air-conditioning accessories.		
	03.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.		
	03.03 Maintain, test and adjust commercial heating and air-conditioning accessories.		
04.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:		
	04.01 Identify the components of various commercial heating systems.		

	04.02 Explain the operational principles of various commercial heating systems.
	04.03 Test and analyze heating air-distribution systems.
	04.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.
05.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:
	05.01 Follow safety precautions.
	05.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.
	05.03 Lay out, construct and troubleshoot comfort systems.
	05.04 Test and analyze systems.
	05.05 Test and analyze heat-recovery systems.
06.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:
	06.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.
	06.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.
	06.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.
	06.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.
	06.05 Describe the various methods of defrost used in retail refrigeration systems.
	06.06 Identify and describe the applications for the various types of retail refrigeration systems.
	06.07 Describe the control system components used in retail refrigeration systems.
	06.08 Explain the operating sequence of a retail refrigeration system.
	06.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.
07.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:
	07.01 Identify different types of refrigerated coolers and display cases and describe each one's common application.
	07.02 Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.
	07.03 Identify single, multiple and satellite compressor systems. Describe the applications, installation considerations and advantages and disadvantages of each type.

	07.04 Identify packaged condensing units and unit coolers. Describe their applications, operation and installation considerations.
	07.05 Identify two-stage compressors and explain their operation and applications.
	07.06 Identify the various accessories used in commercial refrigeration systems and explain why each is used and where it should be installed in the system.
	07.07 Identify the various refrigeration control devices and explain the purpose of each type and how it works.
	07.08 Compare the components used in ammonia systems with those used in halocarbon-based refrigerant systems.
08.0	Develop an understanding of hydronic systemsThe student will be able to:
	08.01 Explain the terms and concepts used when working with hot-water heating and chilled-water cooling systems.
	08.02 Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water systems.
	08.03 Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperature water systems.
	08.04 Describe the safety precautions used when working with hot-water/chilled-water systems.
	08.05 Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.
	08.06 Identify the common piping configurations used with hot-water heating and chilled-water cooling systems.
	08.07 Explain the principles involved and describe the procedures used, in balancing hydronic systems.
	08.08 Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.
	08.09 Read the pressure across a water system circulating pump.
09.0	Develop an understanding of steam systemsThe student will be able to:
	09.01 Explain the terms and concepts used when working with steam-heating systems.
	09.02 Identify major components of steam heating systems and explain the purpose of each.
	09.03 Describe the basic steam-heating cycle.
	09.04 Safely perform selected operating procedures on low-pressure steam boilers and systems.
	09.05 Install and maintain selected steam traps.
	09.06 Identify the common piping configurations used with steam-heating systems.

Course Number: ACR0044

Occupational Completion Point: B
Air-Conditioning, Refrigeration and Heating Technician – 350 Hours – SOC Code 49-9021

Note: Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning Refrigeration and Heating

	lote: Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning, Refrigeration and Heating echnician' – ACR0044 or 'Refrigeration Technician' – ACR0045.		
10.0	Determine the properties of airThe student will be able to:		
	10.01 Explain the principles of psychrometrics.		
	10.02 Identify and explain the components and uses of a psychrometric meter.		
	10.03 Identify indoor-air-quality concerns as related to psychrometrics.		
	10.04 Determine the properties of air, using a psychrometric chart.		
	10.05 Follow safety precautions.		
	10.06 Identify and explain the different types and benefits of air-filtration systems, air-handling systems and ventilation systems.		
	10.07 Fabricate, operate, maintain and troubleshoot air-filtration systems, air-handling systems and ventilation systems.		
11.0	Use a pressure enthalpy chart to diagram refrigerant cyclesThe student will be able to:		
	11.01 Identify all components of the pressure enthalpy chart.		
	11.02 Define enthalpy and entropy.		
	11.03 Diagram several refrigerant cycles, using the pressure enthalpy chart.		
12.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:		
	12.01 Define indoor-air quality.		
	12.02 Identify and explain the codes and standards regarding indoor-air quality.		
	12.03 Select and use indoor-air-quality measuring devices.		
	12.04 Explain the standards for and ways to measure indoor-air quality using various methods.		
13.0	Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:		
	13.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.		
	13.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.		

14.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:
	14.01 Identify pneumatic control systems.
	14.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.
15.0	Maintain and repair thermal storage systemsThe student will be able to:
	15.01 Apply appropriate codes, standards and safety practices.
	15.02 Describe the benefits and limitations of each type.
	15.03 Explain the operational principles of a thermal storage system.
	15.04 Identify and explain various types of thermal storage systems.
	15.05 Maintain, troubleshoot and test various types of thermal storage systems.
16.0	Maintain, troubleshoot and repair commercial heating and air-conditioning systemsThe student will be able to:
	16.01 Keep a record of the installation, maintenance and repair of commercial heating and air-conditioning systems.
	16.02 Apply local and national codes and safety practices.
	16.03 Lay out a commercial heating and air-conditioning system.
	16.04 Lay out a typical split commercial air-conditioning system.
	16.05 Lay out a typical split commercial heating system.
	16.06 Maintain, test, analyze and repair various types of commercial heating and air-conditioning systems.
	16.07 Maintain, troubleshoot and repair water-cooled condensers
17.0	Calculate commercial heating and air-conditioning loadsThe student will be able to:
	17.01 Explain conduction as a heat-load source.
	17.02 Describe the implications of conducting and the resistance values for different types of construction materials.
	17.03 Interpret heat-transfer tables and define values U, K, C, and R.
	17.04 Locate the total heat-transfer value of any surface.
	17.05 Explain infiltration and exfiltration/ventilation as a heat-load source.

	17.06 Explain a product heat-load source.
	17.07 Explain miscellaneous loads (people, motors and equipment) as heat-load sources.
	17.08 Explain the purpose of vapor barriers.
	17.09 Interpret tables of specific heat values as applied to commercial heating and air-conditioning systems.
	17.10 Calculate and design systems.
	17.11 Calculate cooling and heating equipment sizes.
	17.12 Design and identify methods of installing air-movement systems.
18.0	Install air distribution systemsThe student will be able to:
	18.01 Describe airflow and pressures in a basic forced-air distribution system.
	18.02 Explain the differences between propeller and centrifugal fans and blowers.
	18.03 Identify the various types of duct systems and explain why and where each type is used.
	18.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.
	18.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.
	18.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
	18.07 Demonstrate or explain the use and installation of dampers used in duct systems.
	18.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.
	18.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.
	18.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.
19.0	Evaluate commercial airside systemsThe student will be able to:
	19.01 Identify the differences in various types of commercial all-air systems.
	19.02 Identify the type of building in which a particular type of system is used.
	19.03 Explain the typical range of capacities for a commercial air system.
20.0	Balance an air distribution systemThe student will be able to:

	20.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.
	20.02 Explain the fan and pump laws.
	20.03 Use a psychrometric chart to evaluate air properties and changes in air properties.
	20.04 Explain the principles involved in the balancing of air and water distribution systems.
	20.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.
	20.06 Identify and use the tools and instruments needed to balance air distribution systems.
	20.07 Change the speed of an air distribution system supply fan.
21.0	Select energy conservation equipmentThe student will be able to:
	21.01 Identify and explain the operation of energy conservation equipment.
	21.02 Operate selected energy conservation equipment.
22.0	Analyze building management systemsThe student will be able to:
	22.01 Identify the major components of a building management system and describe how they fit together.
	22.02 Operate a basic direct digital controller.
23.0	Recommend alternative heating and cooling systems for various case studiesThe student will be able to:
	23.01 Describe alternative technologies for heating such as in-floor, direct-fired makeup unit (DFMU), solar, air turnover, corn or wood pellet burners, waste oil/multi-fuel and fireplace inserts.
	23.02 Describe alternative technologies for heating such as ductless systems, computer rooms, chilled beams and multi-zone.
Occup Refriç Note:	se Number: ACR0045 pational Completion Point: B geration Mechanic – 350 Hours – SOC Code 49-9021 Students may choose one of the following courses for the completion of OCP B: 'Air-Conditioning, Refrigeration and Heating nician' – ACR0044 or 'Refrigeration Technician' – ACR0045.
24.0	Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	24.01 Calculate loads and design and lay out a commercial refrigeration system.
	24.02 Identify and explain commercial refrigeration-pressure-regulation devices, controls and components.
	24.03 Install, service and repair ice machines and specialty refrigeration systems.

	24.04 Test and troubleshoot refrigerant-pressure-regulating devices, controls and components.
	24.05 Apply local and national codes and mechanical safety practices.
25.0	Demonstrate a working knowledge of refrigeration-system vibration and insulationThe student will be able to:
	25.01 Describe the applications of vibration eliminators.
	25.02 Identify and select the correct insulation for commercial application.
26.0	Apply commercial refrigeration-pipe sizing and troubleshooting proceduresThe student will be able to:
	26.01 Determine the capacities of refrigerant lines, including the amounts they will hold, equivalent lengths of fittings and the total effective length for various pipelines.
	26.02 Identify and apply industry-approved installation procedures.
	26.03 Troubleshoot refrigeration-pipe-sizing problems.
	a. Explain the use of traps in suction-line risers.
	b. Explain pressure drop.
	c. Calculate pressure drop in liquid-line risers.
	d. Size double risers, hot-gas lines and liquid lines from condenser to receiver.
27.0	Use refrigeration-systems skills in commercial applicationsThe student will be able to:
	27.01 Identify and apply the safety practices used with commercial refrigeration systems.
	27.02 Apply refrigeration-systems skills to commercial refrigeration systems.
	a. Perform dehydration, evacuation and recovery procedures.
	b. Interpret blueprints and mechanical drawings.
	c. Service and charge a refrigeration system.
	d. Test, analyze and replace compressors.
	e. Retrofit alternative refrigerants and oils.
28.0	Demonstrate a working knowledge of refrigerated storage systemsThe student will be able to:
	28.01 Identify and differentiate among various types of cases, such as service cases and self-service cases.

	28.02 Explain the operation of air-screen freezers, glass-door freezers, coffin cases and walk-in coolers.
	28.03 Differentiate among medium-temperature, low-temperature and ultralow-temperature systems.
	28.04 Explain various defrost methods.
	28.05 Maintain, test and troubleshoot defrost components.
	28.06 Identify and explain the components of various refrigerated storage systems.
	28.07 Maintain, test and troubleshoot various refrigerated storage system components.
29.0	Diagnose, maintain and repair ice-making systemsThe student will be able to:
	29.01 Identify and explain various types and operations of ice-making systems.
	29.02 Maintain, test, troubleshoot and repair various types of ice-making systems, following the manufacturers' recommendations.
	29.03 Identify and explain the different types of water-treatment methods and systems.
	29.04 Analyze water to identify water problems and the proper treatments.
30.0	Use refrigeration electrical-system skills in commercial applicationsThe student will be able to:
	30.01 Apply electrical safety practices for commercial refrigeration systems.
	30.02 Apply refrigeration electrical-system skills to commercial refrigeration systems:
	a. Interpret symbols of electrical components and diagrams.
	b. Interpret schematics and diagrams.
	c. Apply electrical theory and calculations.
	d. Explain the principles of designing electrical systems.
	e. Test and troubleshoot single- and three-phase motors.
	30.03 Test the solid-state components used in commercial refrigeration systems.
	30.04 Troubleshoot and diagnose the electrical circuits used in commercial refrigeration systems.
	30.05 Test and troubleshoot the thermostatic controls used in commercial refrigeration systems.
31.0	Maintain and troubleshoot commercial refrigeration systemsThe student will be able to:

31.01	Follow appropriate safety precautions for commercial refrigeration systems.
31.02	Identify and explain the operations of various types of commercial refrigeration systems and applications, such as single, multiplex and cascade systems.
31.03	Maintain and troubleshoot various types of commercial refrigeration systems.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed at http://www.fldoe.org/core/fileparse.php/5423/urlt/2014-15-basicskills-with-License-exempt.rtf.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment in the carpentry industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to carpentry and cabinetmaking. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0200	Cabinetmaker Helper	300 Hours	47-3012
В	BCV0235	Cabinet Finisher	150 Hours	51-7011
С	BCV0240	Cabinet Assembler	300 Hours	51-7011
D	BCV0243	Cabinetmaker	450 Hours	51-7011

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply shop safety skills.
- 02.0 Utilize manual and power tools relevant to the cabinetmaking profession.
- 03.0 Demonstrate mathematics knowledge and skills relevant to the cabinetmaking field.
- 04.0 Create basic construction drawings.
- 05.0 Recommend appropriate building materials for specific scenarios.
- 06.0 Select appropriate fasteners and hardware for specific scenarios.
- 07.0 Apply occupational safety skills.
- 08.0 Select and use hand and power tools relevant to the cabinetmaking profession.
- 09.0 Fasten stock and joints.
- 10.0 Read and design construction documents.
- 11.0 Install cabinets and components.
- 12.0 Investigate sustainability issues related to the cabinetmaking professions.
- 13.0 Identify and describe interior and exterior doors (wood and/or metal).
- 14.0 Install trim and finish carpentry using plans and specifications.
- 15.0 Assemble cabinet doors.
- 16.0 Install ceramic tile.
- 17.0 Install various countertop surfaces.
- 18.0 Explain the importance of employability and entrepreneurship skills.
- 19.0 Prepare cabinets for finish.
- 20.0 Apply finishes.
- 21.0 Install cabinets.
- 22.0 Apply laminates.
- 23.0 Plan, design and lay out casework.
- 24.0 Utilize power tools specific to cabinet making.
- 25.0 Construct joints.
- 26.0 Cut casework components.
- 27.0 Assemble casework components.
- 28.0 Construct cabinet drawers.
- 29.0 Construct cabinet doors.
- 30.0 Construct curved pieces.
- 31.0 Construct millwork details.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Cabinetmaking 1480704

Occu	se Number: BCV0200 pational Completion Point: A enter Helper – 300 Hours – SOC Code 47-3012
01.0	Apply shop safety skillsThe student will be able to:
	01.01 Maintain a clean, orderly and safe work area.
	01.02 Transport, handle and store materials safely.
	01.03 Operate a fire extinguisher.
	01.04 Qualify in basic first-aid procedures.
	01.05 Identify safety hazards.
	01.06 Demonstrate the use and care of personal protective equipment (PPE).
02.0	Utilize manual and power tools relevant to the cabinetmaking professionsThe student will be able to:
	02.01 Identify various hand and power tools.
	02.02 Select correct tools for specific jobs.
	02.03 Clean and care for tools and equipment.
	02.04 Demonstrate proficiency in the safe use of hand and power tools.
	02.05 Read and use carpenter's measuring tools.
03.0	Demonstrate mathematics knowledge and skills relevant to the cabinetmaking fieldThe student will be able to:
	03.01 Apply geometry and algebra skills to solve math problems related to cabinetmaking with and without a calculator.
	03.02 Demonstrate knowledge of arithmetic operations.
	03.03 Solve problems for distance, area and volume.

	03.04 Analyze and apply data and measurements to solve problems and interpret documents.
	03.05 Construct charts/tables/graphs using functions and data.
04.0	Create basic construction drawings and/ or sketchesThe student will be able to:
	04.01 Recognize and identify basic construction drawing terms, components and symbols.
	04.02 Relate information on construction drawings to actual locations on the print.
	04.03 Recognize different classifications of construction drawings.
	04.04 Interpret and use drawing dimensions and architectural scales.
05.0	Recommend appropriate building materials for specific scenariosThe student will be able to:
	05.01 Identify the grades and species of lumber and their appropriate uses.
	05.02 Identify the actual and nominal sizes of lumber.
	05.03 Identify the grades of plywood and wood products.
	05.04 Identify defects and blemishes that affect the durability and strength of lumber.
	05.05 Explain the effects of temperature extremes, chemical reaction and moisture content on building materials.
	05.06 Explain the uses of various types of engineered lumber.
06.0	Select appropriate fasteners and hardware for specific scenariosThe student will be able to:
	06.01 Identify the fasteners commonly used in cabinetmaking.
	06.02 Identify the hardware commonly used in cabinetmaking.
07.0	Apply occupational safety skillsThe student will be able to:
	07.01 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
	07.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA).
	07.03 Identify health-related problems that may result from exposure to hazardous materials.
	07.04 Describe the proper precautions for handling hazardous materials.
	07.05 Explain eligibility and the procedures for obtaining worker's compensation.

	07.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.
08.0	Select and use hand and power tools relevant to the cabinetmaking professionThe student will be able to:
	08.01 Identify the hand tools commonly used by carpenters and describe their uses.
	08.02 Use hand tools in a safe and appropriate manner.
	08.03 State the general safety rules for operating all power tools, regardless of type.
	08.04 State the general rules for properly maintaining all power tools, regardless of type.
	08.05 Identify the portable power tools commonly used by carpenters and describe their uses.
	08.06 Use portable power tools in a safe and appropriate manner.
09.0	Fasten stock and jointsThe student will be able to:
	09.01 Identify types of glues and fasteners and describe their applications.
	09.02 Fasten stock with glue and clamps.
	09.03 Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.
	09.04 Fill and finish nail and screw holes with fillers and plugs.
	09.05 Glue and clamp stock using various techniques.
10.0	Read and design construction documentsThe student will be able to:
	10.01 Explain the types of drawings usually included in a set of plans and list the information found on each type.
	10.02 Identify the different types of lines used on construction drawings.
	10.03 Identify selected abbreviations commonly used on plans.
	10.04 Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.
	10.05 State the purpose of written specifications.
	10.06 Identify and describe the parts of a specification.
	10.07 Conduct quantity takeoff for materials.
	10.08 Design millwork and draw details in construction documents for a given scenario.

11.0	Install cabinets and componentsThe student will be able to:	
	11.01 Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.	
	11.02 Install fasteners.	
	11.03 Install drawers.	
	11.04 Install various types of doors including overlay, lipped and flush.	
	11.05 Install adjustable shelving.	
	11.06 Install glass panels and metal grills.	
	11.07 Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".	
	11.08 Install sliding doors and track.	
12.0	Investigate sustainability issues related to the cabinetmaking professionThe student will be able to:	
	12.01 Describe the impact of the construction industry on the natural environment.	
	12.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.	
	12.03 Recommend sustainable alternatives to conventional cabinetmaking practices.	
	12.04 Identify specific practices that can lessen adverse impacts on the environment.	

Occu	Course Number: BCV0235 Occupational Completion Point: B Cabinet Finisher – 150 Hours – SOC Code 51-7011		
13.0	Identify and describe interior and exterior doors (wood and/or metal)The student will be able to:		
	13.01 Identify the types and parts of door systems.		
	13.02 Identify door jamb components.		
	13.03 Identify door hardware.		
14.0	Install trim and finish carpentry using plans and specificationsThe student will be able to:		
	14.01 Read an architect's scale to determine measurements for a trim and finish carpentry job.		
	14.02 Cut and apply trim such as crown molding, baseboard, door and window molding, wainscoting and chair rail.		

15.0	Assemble cabinet doorsThe student will be able to:
	15.01 Select appropriate tools and materials for project.
	15.02 Cut and glue rails, stiles and panels.
	15.03 Select appropriate hinges and door pulls for installation.
16.0	Install ceramic tileThe student will be able to:
	16.01 Select appropriate tools and materials for project.
	16.02 Prepare surfaces for tile installation.
	16.03 Layout, cut and install tile backsplash.
	16.04 Patch and repair tile affected by cabinet renovation project.
17.0	Install various countertop surfacesThe student will be able to:
	17.01 Install stone (granite, quartz or marble) countertop.
	17.02 Install solid surface countertop.
	17.03 Install tile countertop.
	17.04 Install wood countertop.
	17.05 Install stainless steel countertop.
	17.06 Install plastic laminate countertop.

Course Number: BCV0240 Occupational Completion Point: C Cabinet Assembler – 300 Hours – SOC Code 51-7011		
18.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:	
	18.01 Identify and demonstrate positive work behaviors needed to be employable.	
	18.02 Develop personal career plan that includes goals, objectives and strategies.	
	18.03 Examine licensing, certification and industry credentialing requirements.	
	18.04 Maintain a career portfolio to document knowledge, skills and experience.	

	18.05 Evaluate and compare employment opportunities that match career goals.
	18.06 Identify and exhibit traits for retaining employment.
	18.07 Identify opportunities and research requirements for career advancement.
	18.08 Research the benefits of ongoing professional development.
	18.09 Examine and describe entrepreneurship opportunities as a career planning option.
19.0	Prepare cabinets for finishThe student will be able to:
	19.01 Fill nail and screw holes.
	19.02 Install wood plugs in prepared holes.
	19.03 Sand a cabinet and joints for finish.
	19.04 Select and apply proper filler.
	19.05 Sand wood surfaces for finishing.
	19.06 Stain, bleach, fill and seal wood surfaces as needed.
20.0	Apply finishesThe student will be able to:
	20.01 Apply various types of finishes including lacquer-based, water-based, oil-based, enamel and polyurethane.
	20.02 Apply the types of finishes that the local market demands.
	20.03 Observe safety precautions when applying finishes, including wearing respirator and protective clothing approved by National Institute of Occupational Safety and Health (NIOSH).
21.0	Install cabinetsThe student will be able to:
	21.01 Load and secure casework for hauling.
	21.02 Check walls and floors for level and plumb.
	21.03 Determine fasteners for block or walls.
	21.04 Install upper and lower cabinets and other casework.
	21.05 Fasten a suspended cabinet unit to ceiling.
	21.06 Install countertops, including sink cutouts and back splash.
-	

	21.07 Cut and install molding and trim.
	21.08 Adjust doors and drawers.
	21.09 Clean work site.
22.0	Apply laminatesThe student will be able to:
	22.01 Lay out and cut core stock to specifications.
	22.02 Lay out and cut laminate to specification.
	22.03 Apply adhesive.
	22.04 Apply laminate to core stock.
	22.05 Trim and file plastic laminate edges.
	22.06 Clean laminated surfaces.
	22.07 Laminate a curved surface.
	22.08 Repair laminate defects.

Occu	se Number: BCV0243 pational Completion Point: D etmaker – 450 Hours – SOC Code 51-7011
23.0	Plan, design and lay out caseworkThe student will be able to:
	23.01 Convert measurements from English to the metric system and from the metric system to the English system.
	23.02 Draw a set of plans to scale.
	23.03 Make a rod layout.
	23.04 Develop a plan or procedure and a cut list for a specific job.
	23.05 Estimate the materials required for the job.
	23.06 Estimate labor and materials cost, using computer-application programs, if available.
	23.07 Select and match wood stock for compatibility of grain and color.
	23.08 Design and layout cabinets, using a Computer-Assisted Design (CAD) program, if available.

24.0	Utilize power tools specific to cabinet makingThe student will be able to:
	24.01 Operate both portable and stationary power tools, observing safety precautions.
	24.02 Maintain power tools according to the manufacturer's specifications.
25.0	Construct jointsThe student will be able to:
	25.01 Construct various types of joints including butt, dado, rabbeted, lap, miter, splined, tongue-and-groove and mortise-and-tenon.
	25.02 Install dowels in common wood joints.
	25.03 Install biscuit spline in common wood joints.
26.0	Cut casework componentsThe student will be able to:
	26.01 Cut frame stiles and rails.
	26.02 Cut end, top and bottom panels.
	26.03 Cut partitions and sleepers.
	26.04 Cut shelf panels.
	26.05 Cut skeleton frame stiles and rails.
	26.06 Cut a toe board and a back panel.
	26.07 Cut a casework top or countertop and a back splash.
	26.08 Cut drawer front, sides, back and bottom.
	26.09 Cut wood drawer guides.
	26.10 Cut solid, flexible and paneled doors.
	26.11 Route or shape casework components.
27.0	Assemble casework componentsThe student will be able to:
	27.01 Assemble face frame, panels, toe boards and skeleton frame.
	27.02 Fasten a top or countertop and a back splash to casework.
	27.03 Assemble drawers.

	27.04 Assemble flexible and paneled doors.
	27.05 Install shelving.
	27.06 Attach trim, molding and edge banding.
28.0	Construct cabinet drawersThe student will be able to:
	28.01 Make various types of drawers including overlay, lipped and flush.
	28.02 Construct drawer guides.
29.0	Construct cabinet doorsThe student will be able to:
	29.01 Make solid and tambour doors.
	29.02 Make a frame and panel door.
	29.03 Cut and set glass in a frame.
	29.04 Band edges of solid doors.
	29.05 Construct wood-door tracks.
30.0	Construct curved piecesThe student will be able to:
	30.01 Cut a curved piece from solid stock.
	30.02 Make a curved piece by saw kerfing.
	30.03 Construct a curved piece, using curved segments.
	30.04 Construct a curved piece by laminating thin strips.
31.0	Construct millwork detailsThe student will be able to:
	31.01 Build shaped moldings to specifications.
	31.02 Cut built-up moldings.
	31.03 Cut a cornice.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Purpose

The purpose of this program is to prepare students for employment in the carpentry industry with a stress on basic carpentry skills. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to developing cabinetmaking skills, as well as rough and finish carpentry skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for additional training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

After completing the core, carpentry students may opt to take either the Trim and Finish Carpentry course or the Frame Carpentry course as exitpoint goals. However, in order to proceed to Carpentry, students must first complete both the Trim and Finish Carpentry course and the Frame Carpentry course in addition to the core or demonstrate mastery of the performance standards contained in those courses.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0107	Carpenter Helper	300 Hours	47-3012
В	BCV0111	Trim & Finish Carpenter	300 Hours	47-2031

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply shop safety skills.
- 02.0 Utilize manual and power tools relevant to the carpentry profession.
- 03.0 Demonstrate mathematics knowledge and skills relevant to the carpentry field.
- 04.0 Create basic construction drawings and/or sketches.
- 05.0 Recommend appropriate building materials for specific scenarios.
- 06.0 Select appropriate fasteners and hardware for specific scenarios.
- 07.0 Apply occupational safety skills.
- 08.0 Select and use hand and power tools relevant to the carpentry profession.
- 09.0 Fasten stock and joints.
- 10.0 Read and design construction documents.
- 11.0 Assemble and install cabinets and components.
- 12.0 Investigate sustainability issues related to the carpentry professions.
- 13.0 Identify and describe interior and exterior doors (wood and/or metal).
- 14.0 Install trim and finish carpentry using plans and specifications.
- 15.0 Cut and install framing members for a floor (wood and/or metal).
- 16.0 Cut and install a wall and partition framing (wood and/or metal).
- 17.0 Install an interior wall and ceiling materials.
- 18.0 Lay out and construct an interior-stair system.
- 19.0 Comply with hurricane codes.
- 20.0 Frame a roof.
- 21.0 Apply roofing applications.
- 22.0 Apply thermal and moisture protection.
- 23.0 Frame walls using cold-formed steel.
- 24.0 Perform site-preparation and layout activities.
- 25.0 Explain the importance of employability and entrepreneurship skills.

Florida Department of Education Student Performance Standards

Program Title: Carpentry 1 PSAV Number: C510100

Occu	se Number: BCV0107 pational Completion Point: A enter Helper – 300 Hours – SOC Code 47-3012
01.0	Apply shop safety skillsThe student will be able to:
	01.01 Maintain a clean, orderly and safe work area.
	01.02 Transport, handle and store materials safely.
	01.03 Operate a fire extinguisher.
	01.04 Qualify in basic first-aid procedures.
	01.05 Identify safety hazards.
	01.06 Demonstrate the use and care of personal protective equipment (PPE).
02.0	Utilize manual and power tools relevant to the carpentry professionThe student will be able to:
	02.01 Identify various hand and power tools.
	02.02 Select correct tools for specific jobs.
	02.03 Clean and care for tools and equipment.
	02.04 Demonstrate proficiency in the safe use of hand and power tools.
	02.05 Read and use carpenter's measuring tools.
03.0	Demonstrate mathematics knowledge and skills relevant to the carpentry fieldThe student will be able to:
	03.01 Apply geometry and algebra skills to solve math problems related to carpentry with and without a calculator.
	03.02 Demonstrate knowledge of arithmetic operations.
	03.03 Solve problems for distance, perimeter, area and volume.

	03.04 Analyze and apply data and measurements to solve problems and interpret documents.
	03.05 Construct charts/tables/graphs using functions and data.
04.0	Create basic construction drawings and/or sketchesThe student will be able to:
	04.01 Recognize and identify basic construction drawing terms, components and symbols.
	04.02 Relate information on construction drawings to actual locations on the print.
	04.03 Recognize different classifications of construction drawings.
	04.04 Interpret and use drawing dimensions and architectural scales.
05.0	Recommend appropriate building materials for specific scenariosThe student will be able to:
	05.01 Identify the grades and species of lumber and their appropriate uses.
	05.02 Identify the actual and nominal sizes of lumber.
	05.03 Identify the grades of plywood and wood products.
	05.04 Identify defects and blemishes that affect the durability and strength of lumber.
	05.05 Explain the effects of temperature extremes, chemical reaction and moisture content on building materials.
	05.06 Explain the uses of various types of engineered lumber.
06.0	Select appropriate fasteners and hardware for specific scenariosThe student will be able to:
	06.01 Identify the fasteners commonly used in carpentry and/or cabinetmaking.
	06.02 Identify the hardware commonly used in carpentry and/or cabinetmaking.
07.0	Apply occupational safety skillsThe student will be able to:
	07.01 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
	07.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA).
	07.03 Identify health-related problems that may result from exposure to hazardous materials.
	07.04 Describe the proper precautions for handling hazardous materials.
	07.05 Explain eligibility and the procedures for obtaining worker's compensation.

	07.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.
08.0	Select and use hand and power tools relevant to the carpentry professionThe student will be able to:
	08.01 Identify the hand tools commonly used by carpenters and describe their uses.
	08.02 Use hand tools in a safe and appropriate manner.
	08.03 State the general safety rules for operating all power tools, regardless of type.
	08.04 State the general rules for properly maintaining all power tools, regardless of type.
	08.05 Identify the portable power tools commonly used by carpenters and describe their uses.
	08.06 Use portable power tools in a safe and appropriate manner.
09.0	Fasten stock and jointsThe student will be able to:
	09.01 Identify types of glues and fasteners and describe their applications.
	09.02 Fasten stock with glue and clamps.
	09.03 Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.
	09.04 Fill and finish nail and screw holes with fillers and plugs.
	09.05 Glue and clamp stock using various techniques.
10.0	Read and design construction documentsThe student will be able to:
	10.01 Explain the types of drawings usually included in a set of plans and list the information found on each type.
	10.02 Identify the different types of lines used on construction drawings.
	10.03 Identify selected abbreviations commonly used on plans.
	10.04 Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.
	10.05 State the purpose of written specifications.
	10.06 Identify and describe the parts of a specification.
	10.07 Conduct quantity takeoff for materials.
	10.08 Design millwork and draw details in construction documents for a given scenario.

11.0	Install cabinets and componentsThe student will be able to:
	11.01 Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.
	11.02 Install fasteners.
	11.03 Install drawers.
	11.04 Install various types of doors including overlay, lipped and flush.
	11.05 Install adjustable shelving.
	11.06 Install glass panels and metal grills.
	11.07 Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".
	11.08 Install sliding doors and track.
12.0	Investigate sustainability issues related to the carpentry and/or cabinetmaking professionsThe student will be able to:
	12.01 Describe the impact of the construction industry on the natural environment.
	12.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	12.03 Recommend sustainable alternatives to conventional carpentry and/or cabinetmaking practices.
	12.04 Identify specific practices that can lessen adverse impacts on the environment.

Occu	Course Number: BCV0111 Occupational Completion Point: B Trim & Finish Carpenter – 300Hours – SOC Code 47-2031		
13.0	Identify and describe interior and exterior doors (wood and/or metal)The student will be able to:		
	13.01 Identify the types and parts of door systems.		
	13.02 Identify door jamb components.		
	13.03 Identify door hardware.		
14.0	Install trim and finish carpentry using plans and specificationsThe student will be able to:		
	14.01 Read an architect's scale to determine measurements for a trim and finish carpentry job.		
	14.02 Cut and apply trim such as crown molding, baseboard, door and window molding, wainscoting and chair rail.		

15.0	Cut and install framing members for a floor (wood and/or metal)The student will be able to:
	15.01 Identify and describe floor-framing members including subfloor.
	15.02 Identify supports for structures (e.g., sills, columns, beams and girders).
	15.03 Identify various types of joists and openings, including joists for a cantilevered floor.
	15.04 Identify various types of bridging.
	15.05 Identify various types of subfloors, applying fastening techniques.
16.0	Cut and install a wall and partition framing (wood and/or metal)The student will be able to:
	16.01 Identify framing members used in wall and partition construction.
	16.02 Lay out wall lines and partition locations on a floor.
	16.03 Lay out walls for studs, doors and windows.
	16.04 Identify studs, trimmers, cripples, headers and fire stops to length.
	16.05 Identify T's, corners and headers.
	16.06 Identify wall layout.
	16.07 Identify wall sheathing and/or diagonal bracing.
	16.08 Identify and describe insulation materials and a vapor barrier.
17.0	Install an interior wall and ceiling materialsThe student will be able to:
	17.01 Identify and describe furring strips.
	17.02 Identify and describe drywall materials.
	17.03 Identify paneling and trim.
	17.04 Identify ceiling materials and systems.
18.0	Lay out and construct an interior-stair systemThe student will be able to:
	18.01 Identify the types and styles of interior-stair systems.
	18.02 Identify the components of an interior-stair system.

	18.03 Calculate the number of risers and treads for an interior-stair system.
	18.04 Describe an interior-stair system (rough and finish).
19.0	Comply with hurricane codesthe student will be able to:
	19.01 Install hurricane anchors.
	19.02 Install hurricane clips.
	19.03 Install hurricane straps.
	19.04 Explain the purpose and importance of the codes relating to hurricanes.
20.0	Frame a roofThe student will be able to:
	20.01 Understand the terms associated with roof framing.
	20.02 Identify the roof framing members used in gable and hip roofs.
	20.03 Identify the methods used to calculate the length of a rafter.
	20.04 Identify the various types of trusses used in roof framing.
	20.05 Use a rafter framing square, speed square and calculator in laying out a roof.
	20.06 Identify various types of sheathing used in roof construction.
	20.07 Frame a gable roof with vent openings.
	20.08 Frame a roof opening.
	20.09 Erect a gable roof using trusses.
	20.10 Estimate the materials used in framing and sheathing a roof.
21.0	Apply roofing applicationsThe student will be able to:
	21.01 Identify the materials and methods used in roofing.
	21.02 Explain the safety requirements for roof jobs.
	21.03 Install fiberglass shingles on gable and hip roofs.
	21.04 Close up a valley using fiberglass shingles.

	21.05 Explain how to make various roof projections watertight when using fiberglass shingles.
	21.06 Complete the proper cuts and install the main and hip ridge caps using fiberglass shingles.
	21.07 Lay out, cut and install a cricket or saddle.
	21.08 Install wood shingles and shakes on roofs.
	21.09 Describe how to close up a valley using wood shingles and shakes.
	21.10 Explain how to make roof projections watertight when using wood shakes and shingles.
	21.11 Complete the cuts and install the main and hip ridge caps using wood shakes/shingles.
	21.12 Demonstrate the techniques for installing other selected types of roofing materials.
22.0	Apply thermal and moisture protectionThe student will be able to:
	22.01 Research the requirements for insulation.
	22.02 Identify the characteristics of various types of insulation material.
	22.03 Calculate the required amounts of insulation for a structure.
	22.04 Install selected insulation materials.
	22.05 Describe the requirements for moisture control and ventilation.
	22.06 Install selected vapor barriers.
	22.07 Describe various methods of waterproofing.
	22.08 Describe air infiltration control requirements.
	22.09 Install selected building wraps.
23.0	Frame walls using cold-formed steelThe student will be able to:
	23.01 Identify the components of a steel framing system.
	23.02 Identify and select the tools and fasteners used in a steel framing system.
	23.03 Identify applications for steel framing systems.
	23.04 Demonstrate the ability to build back-to-back, box and L-headers.

	23.05 Lay out and install a steel stud structural wall with openings to include bracing and blocking.
	23.06 Lay out and install a steel stud non-structural wall with openings to include blocking and bracing.
24.0	Perform site-preparation and layout activitiesThe student will be able to:
	24.01 Identify building layout from plans and specifications using math skills.
	24.02 Set up and adjust a transit and builder's level over one point and establish lines over two points.
	24.03 Erect batter boards and locate building lines.
	24.04 Locate building line points on batter boards using a builder's level.
	24.05 Locate building lines on a plot plan.
	24.06 Square a building, using the 3-4-5-triangle method and the diagonal method.
25.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	25.01 Identify and demonstrate positive work behaviors needed to be employable.
	25.02 Develop personal career plan that includes goals, objectives and strategies.
	25.03 Examine licensing, certification and industry credentialing requirements.
	25.04 Maintain a career portfolio to document knowledge, skills and experience.
	25.05 Evaluate and compare employment opportunities that match career goals.
	25.06 Identify and exhibit traits for retaining employment.
	25.07 Identify opportunities and research requirements for career advancement.
	25.08 Research the benefits of ongoing professional development.
	25.09 Examine and describe entrepreneurship opportunities as a career planning option.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Additional Resources

Florida Department of Education Curriculum Framework

Program Title: Carpentry 2

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	C510200
CIP Number	0646020112
Grade Level	30, 31
Standard Length	600 Hours
Teacher Certification	CAB WOODWK @7 7G CARPENTRY @7 7G BLDG CONST @7 7G TEC CONSTR @7 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-2031 - Carpenters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the carpentry industry with a stress on basic carpentry skills. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes, but is not limited to developing cabinetmaking skills, as well as rough and finish carpentry skills. Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

0	CP	Course Number	Course Title	Length	SOC Code
	Α	BCV0122	Carpenter, Rough	450 Hours	47-2031
	В	BCV0128	Carpenter	150 Hours	47-2031

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Perform concrete tests.
- 02.0 Lay foundations.
- 03.0 Construct vertical formwork.
- 04.0 Construct horizontal formwork.
- 05.0 Erect and properly align tilt-up wall panels.
- 06.0 Install drywall.
- 07.0 Install a suspended ceiling.
- 08.0 Interpret door and door hardware requirements based on plans and specifications.
- 09.0 Install windows and exterior doors.
- 10.0 Apply interior trim.
- 11.0 Lay out and construct an exterior stair system.
- 12.0 Apply exterior finishing.
- 13.0 Set up and install basic rigging and scaffolding.
- 14.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 15.0 Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabs.
- 16.0 Explain the transport and placement of concrete.
- 17.0 Demonstrate an understanding of trenching and excavation.
- 18.0 Identify structural timber.
- 19.0 Use plans and specifications for form carpentry.
- 20.0 Explain or identify various forms.

Florida Department of Education Student Performance Standards

Program Title: Carpentry 2 PSAV Number: C510200

Occu	se Number: BCV0122 pational Completion Point: A enter Rough – 450 Hours – SOC Code 47-2031		
01.0	Perform concrete testsThe student will be able to:		
	01.01 Identify various types of cement and describe their uses.		
	01.02 Identify types and sizes of concrete aggregates.		
	01.03 Research types of concrete admixtures and describe their uses.		
	01.04 Research special types of concrete and describe their uses.		
	01.05 Calculate concrete volume requirements for rectangular, cylindrical, or other geometric structures using formulas, concrete tables and/or concrete calculators, as applicable.		
	01.06 Use concrete curing methods and materials.		
	01.07 Conduct concrete slump test.		
	01.08 Mix concrete using different aggregates and admixtures.		
02.0	Lay foundationsThe student will be able to:		
	02.01 Establish elevations.		
	02.02 Identify various types of footing and foundations.		
	02.03 Select the appropriate footing for a foundation.		
	02.04 Lay out and construct a selected footing and foundation using an established gridline.		
	02.05 Install templates, keyways and embedments.		
	02.06 Form and strip pier foundation forms and prepare for resetting at another location.		
	02.07 Identify the different classes of slabs-on-grade.		

	02.08 Identify edge forms and explain their purpose.
	02.09 Construct and disassemble edge forms.
	02.10 Install vapor barrier, reinforcement and control joints.
	02.11 Establish finish grade and fill requirements.
03.0	Construct vertical formworkThe student will be able to:
	03.01 Explain safety procedures associated with using concrete wall forms.
	03.02 Identify the various types of concrete wall forms.
	03.03 Identify the components of each type of vertical forming system.
	03.04 Erect, plumb and brace a selected wall.
	03.05 Recognize various types of manufactured forms.
	03.06 State the differences in construction and use among different types of forms.
	03.07 Erect, plumb and brace a column form.
	03.08 Erect, plumb and brace a stair form.
	03.09 Locate and install bulkheads and embedded forms.
04.0	Construct horizontal formworkThe student will be able to:
	04.01 Identify the safety hazards associated with elevated deck formwork and explain how to eliminate them.
	04.02 Identify the different types of elevated decks.
	04.03 Identify the different types of flying form systems.
	04.04 Identify different types of handset form systems.
	04.05 Erect, plumb, brace and level different types of handset deck form systems.
	04.06 Distinguish characteristics of joints: control, expansion and construction.
	04.07 Install edge forms, blockouts, embedments and construction joints.
	04.08 Identify typical bridge and culvert form systems.

05.0	Erect and properly align tilt-up wall panelsThe student will be able to:	
	05.01 Describe the different processes used in installing tilt-up wall panels.	
	05.02 Explain the importance of the casting bed.	
	05.03 Identify and install the various types of lifting eyes used in forming tilt-up panels.	
	05.04 Identify the special rigging requirements for tilt-up wall panels.	
	05.05 Identify the different methods of forming tilt-up wall panels.	
	05.06 Demonstrate the different methods of forming tilt-up wall panels.	
	05.07 Prepare for the erection of tilt-up wall panels.	
	05.08 Install proper bracing for tilt-up wall panels.	
	05.09 Install embedments, blockouts, architectural finishes, lifting devices and reinforcing materials using a set of construction drawings.	
	05.10 Describe the final grouting procedure.	
06.0	Install drywallThe student will be able to:	
	06.01 Identify the different types of drywall and their uses.	
	06.02 Select the type and thickness of drywall required for specific installations.	
	06.03 Select fasteners for drywall installation.	
	06.04 Explain the fastener schedules for different types of drywall installations.	
	06.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives.	
	06.06 Install gypsum drywall on steel studs.	
	06.07 Explain how soundproofing is achieved in drywall installations.	
	06.08 Estimate material quantities for a drywall installation.	
07.0	Install a suspended ceilingThe student will be able to:	
	07.01 Establish a level line.	
	07.02 Explain the common terms related to sound waves and acoustical ceiling materials.	

7.03 Identify the different types of suspended ceilings.
7.04 Interpret plans related to ceiling layout.
7.05 Sketch the ceiling layout for a basic suspended ceiling.
7.06 Perform a material takeoff for a suspended ceiling.
7.07 Install selected suspended ceilings.
terpret door and door hardware requirements based on plans and specificationsThe student will be able to:
3.01 Identify various types of door jambs and frames and demonstrate the installation procedures for placing selected door jambs and frames in different types of interior partitions.
3.02 Identify different types of interior doors.
3.03 Identify different types of interior door hardware and demonstrate the installation procedures for selected types.
3.04 List and identify specific items included on a typical door schedule.
3.05 Explain the procedure for placing and hanging a specified door.
stall windows and exterior doorsThe student will be able to:
9.01 Identify various types of fixed, sliding and swinging windows.
9.02 Identify the parts of a window installation.
9.03 State the requirements for a proper window installation.
9.04 Install a pre-hung window.
9.05 Identify the common types of exterior doors and explain how they are constructed.
9.06 Identify the parts of a door installation.
9.07 Identify the types of thresholds used with exterior doors.
9.08 Install a pre-hung exterior door.
9.09 Identify the various types of locksets used on exterior doors and explain how they are installed.
9.10 Install a lockset.
oply interior trimThe student will be able to:
7 7 7 t 3 3 3 3 3 9 9 9 9 9 9 9 9 9

	10.01 Identify the different types of standard moldings and describe their uses.		
	10.02 Make square and miter cuts using a saw buck or power miter saw.		
	10.03 Select and properly use fasteners to install trim.		
	10.04 Install interior trim including door, window, base and ceiling trim.		
	10.05 Estimate the quantities of different trim materials required for selected rooms.		
11.0	Lay out and construct an exterior stair systemThe student will be able to:		
	11.01 Identify the types of exterior stair systems.		
	11.02 Identify the parts of an exterior stair system.		
	11.03 Calculate the number of treads and risers for an exterior stair system.		
	11.04 Lay out, cut and assemble an exterior stair system.		
12.0	Apply exterior finishingThe student will be able to:		
	12.01 Describe the purpose of wall insulation and flashing.		
	12.02 Install selected common cornices.		
	12.03 Demonstrate lap and panel siding estimating methods.		
	12.04 Describe the types and applications of common wood siding.		
	12.05 Describe fiber-cement siding and its uses.		
	12.06 Describe the types and styles of vinyl and metal siding.		
	12.07 Describe the types and applications of stucco and masonry veneer finishes.		
	12.08 Describe the types and applications of special exterior finish systems.		
	12.09 Install three types of siding commonly used in your area.		
13.0	Set up and install basic rigging and scaffoldingThe student will be able to:		
	13.01 Identify and explain rigging equipment.		
	13.02 Inspect rigging equipment, following safety precautions.		

	13.03 Estimate size, weight and center of gravity.		
	13.04 Tie knots.		
	13.05 Identify and explain types of cranes.		
	13.06 Rig and move materials and equipment, following safety precautions.		
	13.07 Set up and install scaffolds, following safety precautions.		
	13.08 Inspect various types of ladders and scaffolds, following safety precautions.		
14.0	Erect, plumb and brace a simple concrete form with reinforcementThe student will be able to:		
	14.01 Identify the properties of cement.		
	14.02 Describe the composition of concrete.		
	14.03 Estimate volumes of concrete.		
	14.04 Identify types of concrete reinforcement materials and describe their uses.		
	14.05 Identify various types of footings and explain their uses.		
	14.06 Identify the parts of various types of forms.		
	14.07 Explain the safety procedures associated with the construction and use of concrete forms.		
15.0	Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabsThe student will be able to:		
	15.01 Describe the applications of reinforcing bars, the uses of reinforced structural concrete and the basic processes involved in placing reinforcing bars.		
	15.02 Recognize and identify the bar bends standardized by the American Concrete Institution (ACI).		
	15.03 Read and interpret bar lists and describe the information found on a bar list.		
	15.04 List the types of ties used in securing reinforcing bars.		
	15.05 State the tolerances allowed in the fabrication of reinforcing bars.		
	15.06 Demonstrate the proper use of common ties for reinforcing bars.		
	15.07 Describe methods by which reinforcing bars may be cut and bent in the field.		
	15.08 Use the tools and equipment needed for installing reinforcing bars.		

	15.09 Safely use selected tools and equipment to cut, bend and install reinforcing materials.	
	15.10 Explain the necessity of concrete cover in placing reinforcing bars.	
	15.11 Identify lapped splices.	
16.0	Explain the transport and placement of concreteThe student will be able to:	
	16.01 List various types of equipment used to transport and place concrete.	
	16.02 Describe the factors that contribute to the quality of concrete placement.	
	16.03 Demonstrate the correct methods for placing and consolidating concrete into forms.	
	16.04 Use a screed to strike off and level concrete to the proper grade in a form.	
	16.05 Use tools for placing, floating and finishing concrete.	
	16.06 Determine when conditions permit the concrete finishing operation to start.	
	16.07 Name the factors that affect the curing of concrete and describe the methods used to achieve proper curing.	
	16.08 Properly care for and safely use hand and power tools used when working with concrete.	
17.0	Demonstrate an understanding of trenching and excavationThe student will be able to:	
	17.01 Identify the different types, bearing capacities and classifications of soils.	
	17.02 Identify ways to increase soil density.	
	17.03 State the purpose of soil density (compaction) tests.	
	17.04 Explain the safety considerations for trenches and deep excavations.	
	17.05 Identify and describe groundwater mitigation methods.	
	17.06 Identify and describe rock mitigation techniques.	

Course Number: BCV0128 Occupational Completion Point: B Carpenter Rough – 150 Hours – SOC Code 47-2031		
18.0	Identify structural timberThe student will be able to:	
	18.01 Identify structural-timber components and heavy structural timber.	

19.0	Use plans and specifications for form carpentryThe student will be able to:	
	19.01 Read an architect's scale for form carpentry job.	
	19.02 Determine dimensions from plans.	
	19.03 Relate information on plans and specifications to real parts, locations, hardware and fasteners.	
20.0	Explain or identify various formsThe student will be able to:	
	20.01 Identify styles of footings.	
	20.02 Explain method for setting a pier footing form.	
	20.03 Explain how to strip a form for reuse.	
	20.04 Explain edge forms for a floor with or without foundation walls and for a stoop.	
	20.05 Explain various types of curb and gutter forms.	
	20.06 Identify various types of beams, columns and slabs with various form systems (Burke, Symons, plywood and 2'x 4').	
	20.07 Identify and explain the different types and uses of flying forms for decks and shear walls.	
	20.08 Explain concrete pressure and its implications for form work routines.	
	20.09 Identify form-work accessories such as snap-ties, wedges, pigs-feet, whalers, and stiffbacks for forming walls, beams and columns with plywood and 2'x 4' material.	

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Surveying and Mapping Technology

Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	PSAV
Program Number	1150203
CIP Number	0615110200
Grade Level	30, 31
Standard Length	1350 Hours
Teacher Certification	TEC CONSTR¶7¶G SURVEY 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	17-3031 - Surveying and Mapping Technicians
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment in surveying and mapping.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to using surveying equipment to perform measurement activities.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	SUR0130	Surveying Rodman	450 Hours	17-3031
В	SUR0132	Survey Assistant, Instrument	450 Hours	17-3031
С	SUR0134	Survey Party Chief	450 Hours	17-3031

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Measure land using chains and tape.
- 02.0 Perform rod and level activities.
- 03.0 Perform angle measurement activities.
- 04.0 Develop sketches and drawings.
- 05.0 Demonstrate mathematics knowledge and skills.
- 06.0 Demonstrate surveying related computer assisted drafting.
- 07.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 08.0 Explain the importance of employability and entrepreneurship skills.
- 09.0 Measure land using chains and tape for verification.
- 10.0 Perform transit/theodolite angle measurement activities.
- 11.0 Perform electronic distance measurement activities.
- 12.0 Perform land-surveying activities.
- 13.0 Perform construction stake out activities.
- 14.0 Determine methods and procedures for establishing survey control.
- 15.0 Develop related sketches and drawing.
- 16.0 Compute volumes and areas.
- 17.0 Prepare charts and tables.
- 18.0 Demonstrate survey related computer assisted drafting skills as listed.
- 19.0 Perform advanced land surveying activities.
- 20.0 Perform advanced construction stake out activities.
- 21.0 Perform supervisory functions.
- 22.0 Determine advanced methods and procedures for establishing survey control.
- 23.0 Develop drawings.
- 24.0 Research previous survey evidence.
- 25.0 Read, interpret and write descriptions of land.
- 26.0 Demonstrate surveying related computer assisted drafting procedure.
- 27.0 Discuss advanced surveying and mapping topics.

Florida Department of Education Student Performance Standards

Surveying and Mapping Technology I150203 Program Title: PSAV Number:

Course Number: SUR0130 Occupational Completion Point: A Surveyor Rodman – 450 Hours – SOC Code 17-3031			
01.0	Measure land using chains and tapeThe student will be able to:		
	01.01 Clear brush to establish line of sight.		
	01.02 Hold the chain/tape over a point.		
	01.03 Pull the chain/tape.		
	01.04 Wind the chain/tape on reel.		
	01.05 Set the marker.		
	01.06 Establish a line perpendicular to an existing line at a given point using a right angle prism.		
	01.07 Establish elevation using a hand (Locke) level.		
02.0	Perform rod and level activitiesThe student will be able to:		
	02.01 Plumb the rod.		
	02.02 Obtain a rod reading using a target.		
	02.03 Obtain a rod reading with using a target.		
	02.04 Establish a turning point/benchmark.		
	02.05 Set up the level.		
	02.06 Set up reflector.		
	02.07 Test the level.		
03.0	Perform angle measurement activitiesThe student will be able to:		

	03.01 Set up a transit/theodolite over a point.
	03.02 Measure a horizontal angle.
	03.03 Measure a vertical angle.
	03.04 Lay out a horizontal angle.
	03.05 Lay out a vertical angle.
	03.06 Read a compass bearing.
04.0	Develop sketches and drawingsThe student will be able to:
	04.01 Make lettering sketches to identify items.
05.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	05.01 Demonstrate knowledge of arithmetic operations.
	05.02 Analyze and apply data and measurements to solve problems and interpret documents.
	05.03 Construct charts/tables/graphs using functions and data.
	05.04 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	05.05 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	05.06 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
06.0	Demonstrate surveying related computer assisted draftingThe student will be able to:
	06.01 Operate computer aided drafting (CAD) equipment and penpheracs.
	06.02 Perform Applied CAD Basic Drafting Skills.
	06.03 Generate simple assemblies, details and schematics.
	06.04 Apply notes and special instructions.
	06.05 Manipulate views.
	06.06 Apply scaling.
	06.07 Apply dimensioning.

06.08	Select appropriate line weight.
06.09	Generate simple layouts.
06.10	Interpret printed output.
06.11	Demonstrate post/processing file management skills.

Occu	se Number: SUR0132 pational Completion Point: B y Assistant – 450 Hours – SOC Code 17-3031
07.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	07.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	07.02 Explain emergency procedures to follow in response to workplace accidents.
	07.03 Create a disaster and/or emergency response plan.
	07.04 Demonstrate knowledge of the "Right-To-Know Law" as recorded in (29 CFR-1910.1200)
08.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	08.01 Identify and demonstrate positive work behaviors needed to be employable.
	08.02 Develop personal career plan that includes goals, objectives and strategies.
	08.03 Examine licensing, certification and industry credentialing requirements.
	08.04 Maintain a career portfolio to document knowledge, skills and experience.
	08.05 Evaluate and compare employment opportunities that match career goals.
	08.06 Identify and exhibit traits for retaining employment.
	08.07 Identify opportunities and research requirements for career advancement.
	08.08 Research the benefits of ongoing professional development.
09.0	Measure land using chains and tape for verificationThe student will be able to:
	09.01 Test and standardize the chain/tape.
10.0	Perform transit/theodolite angle measurement activitiesThe student will be able to:

	10.01 Adjust transit/theodolite leveling bubbles.
	10.02 Adjust transit/theodolite vertical cross-hair by double centering.
	10.03 Adjust transit/theodolite vertical cross-hair for vertical accuracy.
	10.04 Discuss digital technology that has replaced manual transit/theodolite angle measurement activities.
11.0	Perform electronic distance measurement activitiesThe student will be able to:
	11.01 Test accuracy of instrument against a known point.
	11.02 Set up electronic instruments.
	11.03 Obtain scope distance and compute horizontal distance.
	11.04 Use of data collector.
	11.05 Set up reflector.
	11.06 Discuss pressure measurement in terms of PSI, inches of mercury and KPA.
	11.07 Demonstrate the use of Global Positioning System (GPS).
	11.08 Obtain horizontal and vertical distances.
12.0	Perform land-surveying activitiesThe student will be able to:
	12.01 Determine horizontal distance by the stadia method.
	12.02 Determine elevation by the stadia method.
	12.03 Locate detail by angle and distance using a transit/theodolite.
	12.04 Discuss the former method of locating detail by the use of a plane tape and alidade.
13.0	Perform construction stake out activitiesThe student will be able to:
	13.01 Establish horizontal control.
	13.02 Establish vertical control.
	13.03 Stake out horizontal curves.
14.0	Determine methods and procedures for establishing survey controlThe student will be able to:

	14.01 Understand and apply methods of distance measurements.
	14.02 Understand and apply methods of angle measurements.
	14.03 Understand and apply azimuth determination.
15.0	Develop related sketches and drawingThe student will be able to:
	15.01 Demonstrate inking procedures.
	15.02 Identify map symbolism.
	15.03 Define and interpret dimensioning.
	15.04 Write a brief but adequate property description.
16.0	Compute volumes and areasThe student will be able to:
	16.01 Compute volumes of linear dimension surfaces.
	16.02 Compute volumes of curved surfaces.
	16.03 Compute an area by using trapezoids.
	16.04 Compute an area by using coordinates.
	16.05 Compute an area of a curved surface.
17.0	Prepare charts and tablesThe student will be able to:
	17.01 Understand and prepare curve information.
	17.02 Understand and prepare highway design information.
	17.03 Understand and prepare standard control information.
	17.04 Understand and prepare proper field notes.
	17.05 Understand and prepare proper legend information.
18.0	Demonstrate survey related computer assisted drafting skills as listedThe student will be able to:
	18.01 Demonstrate data base management skills.
	18.02 Generate simple isometric views.

18.03	3 Transfer of data collector information.
18.04	Create drawing from data collector information.
18.05	5 Develop execute lists using command language.

Cours	se Number: SUR0134
Occu	pational Completion Point: C by Party Chief – 450 Hours – SOC Code 17-3031
19.0	Perform advanced land surveying activitiesThe student will be able to:
	19.01 Establish property concerns from deed descriptions or plat.
	19.02 Secure a deed from the courthouse.
20.0	Perform advanced construction stake out activitiesThe student will be able to:
	20.01 Determine elevations for vertical curves.
	20.02 Establish slope stakes.
21.0	Perform supervisory functionsThe student will be able to:
	21.01 Demonstrate equipment use.
	21.02 Inventory field supplies and equipment.
	21.03 Select equipment.
	21.04 Evaluate personnel
	21.05 Schedule work.
	21.06 Perform mathematical checks on field work.
	21.07 Keep field notes.
22.0	Determine advanced methods and procedures for establishing survey controlThe student will be able to:
	22.01 Understand and apply closure computations.
	22.02 Understand and apply adjustment of data.
	22.03 Layout of controls for photogramatic procedures.

23.0	Develop drawingsThe student will be able to:
	23.01 Develop drawing from field notes.
24.0	Research previous survey evidenceThe student will be able to:
	24.01 Be familiar with courthouse procedures.
	24.02 Conduct a title search.
	24.03 Demonstrate an understanding of deeds.
	24.04 Search for record evidence.
	24.05 Demonstrate proper resurvey processes.
25.0	Read, interpret and write descriptions of landThe student will be able to:
	25.01 Prepare metes and bounds descriptions.
	25.02 Understand the U.S. Public Land Survey System.
	25.03 Understand and interpret sectionalized surveys.
	25.04 Understand and interpret sectional breakdowns.
	25.05 Understand and interpret standard deed information.
26.0	Demonstrate surveying related computer assisted drafting procedureThe student will be able to:
	26.01 Interpret printed output.
27.0	Discuss advanced surveying and mapping topicsThe student will be able to:
	27.01 Explain the fundamentals of the Global Navigation Satellite System (GNSS) previously called the Global Positioning System (GPS).
	27.02 Explain Real Time Kinematic (RTK) GPS surveying.
	27.03 Explain the fundamentals of hydrographic surveying (sonar) use in terms of surveying applications.
	27.04 Explain the fundamentals of high definition laser scanning as a future goal to achieve and understand.
	27.05 Explain utility designating and utility excavation in terms of how it applies to the modern surveyor.
	27.06 Explain Geographic Information Systems (GIS) technology as it applies to the modern surveyor.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's Individual Educational Plan (IEP) or 504 plan or postsecondary student's accommodations' plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (students with an IEP served in Exceptional Student Education (ESE)) will need modifications to meet their needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular Occupational Completion Point (OCP) or a Modified Occupational Completion Point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number for eligible students with disabilities.

Articulation

This program has no statewide articulation agreement approved by the Florida State Board of Education. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to http://www.fldoe.org/workforce/dwdframe/artic frame.asp.

Florida Department of Education Curriculum Framework

Program Title: Tile Setting

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	1460103
CIP Number	0646010106
Grade Level	30,31
Standard Length	500 Hours
Teacher Certification	TEC CONSTR ¶ 7 ¶ G BLDG CONST ¶ 7 ¶ G TILE SET 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-2044 - Tile and Marble Setters
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

This program prepares students for work as tile setters.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, safe and efficient work practices, proper care and use of hand tools and equipment, tile setting materials, basic blueprint reading, trade math and estimating materials for tile setting. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of one occupational completion point (OCP).

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
	BCV0392	Hard Tile Setter 1	250 Hours	
Α	BCV0393	Hard Tile Setter 2	250 Hours	47-2044

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Prepare walls for drywall application of ceramic tile.
- 03.0 Prepare walls using wire lathe, scratch coat and screed coat for wet wall application of ceramic tile.
- 04.0 Apply tile and grout utilizing drywall techniques.
- 05.0 Apply tile and grout utilizing wet wall techniques.
- 06.0 Layout, cut and install ceramic tile on walls and floors.
- 07.0 Interpret blueprints and estimate materials for tile work.
- 08.0 Demonstrate mathematics knowledge and skills.
- 09.0 Proportion and mix mortar for tile installation.
- 10.0 Demonstrate appropriate understanding of basic science.
- 11.0 Explain the importance of employability and entrepreneurship skills.

Florida Department of Education Student Performance Standards

Program Title: Tile Setting PSAV Number: 1460103

Occu	se Number: BCV0392 pational Completion Point: Tile Setter 1 – 250 Hours – SOC Code 47-2044		
01.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe students will be able to:		
	01.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
	01.02 Explain emergency procedures to follow in response to workplace accidents.		
	01.03 Create a disaster and/or emergency response plan.		
02.0	Prepare walls for drywall application of ceramic tileThe student will be able to:		
	02.01 Determine readiness of subsurface for tile installation.		
	02.02 Repair damaged drywall.		
	02.03 Sand and finish drywall for application of tile.		
03.0	Prepare walls using wire lath, scratch coat and screed coat for wet wall application of ceramic tileThe student will be able to:		
	03.01 Install screed mud over concrete slab to install shower floor.		
	03.02 Measure and cut metal lath to size for walls and ceilings with tin snips.		
	03.03 Tack lath to wall and ceiling surfaces with staple gun or hammer.		
	03.04 Spread plaster base over lath with trowel and level plaster to specified thickness, using screed.		
	03.05 Spread concrete on subfloor with trowel and level it with screed.		
	03.06 Remove and replace existing backing materials in wet area.		
04.0	Apply tile and grout utilizing drywall techniquesThe student will be able to:		
	04.01 Set tile on drywall with thinset.		

	04.02 Set tile using mastic adhesives.
	04.03 Position tile and tap it with trowel handle to affix tile to plaster or adhesive.
	04.04 Install tile over wire mesh and concrete masonry units.
	04.05 Install tile over wood counter top.
	04.06 Install counter top backsplash designs.
	04.07 Layout countertop and backsplash designs.
	04.08 Grout counter top and backsplash.
	04.09 Grout floor tile.
05.0	Apply tile and grout utilizing wet wall techniquesThe student will be able to:
	05.01 Grout tile on walls and floors.
	05.02 Install tile floor over concrete slab using thinset.
	05.03 Replace grout.
	05.04 Grout wet area installation.
	05.05 Install tile in shower stall.
	05.06 Lay out shower.
	05.07 Build a shower curb.
	05.08 Prepare shower floor for tile installation.
	05.09 Install wire mesh mortar units in a shower.
	05.10 Install wire mesh mortar units in a tub surround.

Course Number: BCV0393 Occupational Completion Point: A Hard Tile Setter 2 – 250 Hours – SOC Code 47-2044		
06.0	Layout, cut and install ceramic tile on walls and floorsThe student will be able to:	
	06.01 Select and use tile setting tools.	

06.02	Use tile nippers to nip different types of tile.
06.03	Cut and shape tile with tile cutters and biters.
06.04	Cut different types of tile with tile hand cutters.
06.05	Cut tile with rod saw.
06.06	Use a level.
06.07	Use electric drill.
06.08	Use tile saw.
06.09	Use tile cutter.
06.10	Cut tile with electric saw.
06.11	Clean tools and maintain in working order.
06.12	Smooth cut tile edges with grinding stone.
06.13	Select and use measurement tools.
06.14	Install tile plumb and level using level.
06.15	Square tile layouts using a steel square.
06.16	Maintain true and correct tile work with square.
06.17	Maintain clean, neat and safe work area.
06.18	Practice personal and general job safety procedures of tile setters.
06.19	Miter base tile to fit angles.
06.20	Miter cap tile to fit angles.
06.21	Draw level starting and field lines, and level curbs and door jambs using a level.
06.22	Lay down working, finish, plumb and level lines using a chalk line.
06.23	Butt tile rows using straightedge on starting line.
06.24	Figure layout.

	06.25 Measure, cut and install metal lath for shower pan.
	06.26 Chisel tile and setting related substances.
	06.27 Lay out tile setting jobs.
	06.28 Lay out floor.
	06.29 Install tile over previously poured interior concrete floor.
	06.30 Install tile over wood floor.
	06.31 Install ceramic tile over existing floor covering.
	06.32 Install tile over existing tile.
	06.33 Install tile floor over wood floor using mastic adhesive.
	06.34 Install floor tile over wire mesh mortar units.
	06.35 Install tile on exterior floor.
	06.36 Install ceramic tile over laminated counter top and backsplash.
	06.37 Install ceramic tile over ceramic tile on tub surround
	06.38 Install marble window sills.
	06.39 Install tile window sills.
	06.40 Install a complete shower floor.
	06.41 Clean aged tile.
	06.42 Replace loose or damaged tile.
	06.43 Measure and cut marble window sills.
	06.44 Remove and replace shower floor and base.
	06.45 Install fixtures.
07.0	Interpret blueprints and estimate materials for tile workThe student will be able to:
	07.01 Apply basic math skills to tile setting.

	07.02 Measure floors and walls using steel measuring tapes.
	07.03 Measure tile cuts using wood folding rule.
	07.04 Figure total tile amounts needed for job.
	07.05 Estimate how many square feet of tile needed for bathroom walls.
	07.06 Estimate how many square feet of tile needed for floor areas.
	07.07 Calculate costs.
	07.08 Maintain records of materials used.
	07.09 Read blueprints and specification sheets that apply to tile setting.
	07.10 Examine blueprints, measure and mark surfaces to be covered and lay out work.
	07.11 Prepare list of supplies and tools needed to complete a job.
08.0	Demonstrate mathematics knowledge and skillsThe students will be able to:
	08.01 Demonstrate knowledge of arithmetic operations.
	08.02 Analyze and apply data and measurements to solve problems and interpret documents.
	08.03 Construct charts/tables/graphs using functions and data.
	08.04 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	08.05 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	08.06 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	08.07 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	08.08 Demonstrate an understanding of federal, state and local taxes and their computation.
09.0	Proportion and mix mortar for tile installationThe student will be able to:
	09.01 Mix setting materials manually with hand tools and equipment.
	09.02 Mix setting materials with a power mixer.
	09.03 Follow safety practices when mixing setting materials.

	09.04 Follow manufacturer directions.
	09.05 Select and mix adhesives to set tile.
	09.06 Determine quantity and type of setting materials needed.
	09.07 Proportion setting materials ingredients for specific uses.
10.0	Demonstrate appropriate understanding of basic scienceThe student will be able to:
	10.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.
	10.02 Draw conclusions or make inferences from data.
	10.03 Identify health-related problems, which may result from exposure to work related chemicals and hazardous materials and know the proper precautions required for handling such materials.
	10.04 Understand pressure measurement in terms of PSI, inches of mercury and KPA.
11.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:
	11.01 Identify and demonstrate positive work behaviors needed to be employable.
	11.02 Develop personal career plan that includes goals, objectives and strategies.
	11.03 Examine licensing, certification and industry credentialing requirements.
	11.04 Maintain a career portfolio to document knowledge, skills and experience.
	11.05 Evaluate and compare employment opportunities that match career goals.
	11.06 Identify and exhibit traits for retaining employment.
	11.07 Identify opportunities and research requirements for career advancement.
	11.08 Research the benefits of ongoing professional development.
	11.09 Examine and describe entrepreneurship opportunities as a career planning option.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment in the carpentry industry with a stress on basic carpentry skills. This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to developing rough and finish carpentry skills. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0107	Carpenter Helper	300 Hours	47-3012
В	BCV0111	Trim And Finish Carpenter	300 Hours	47-2031
С	BCV0122	Carpenter, Rough	450 Hours	47-2031
D	BCV0128	Carpenter	150 Hours	47-2031

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply shop safety skills.
- 02.0 Utilize manual and power tools relevant to the carpentry profession.
- 03.0 Demonstrate mathematics knowledge and skills relevant to the carpentry field.
- 04.0 Create basic construction drawings and/or sketches.
- 05.0 Recommend appropriate building materials for specific scenarios.
- 06.0 Select appropriate fasteners and hardware for specific scenarios.
- 07.0 Apply occupational safety skills.
- 08.0 Select and use hand and power tools relevant to the carpentry profession.
- 09.0 Fasten stock and joints.
- 10.0 Read and design construction documents.
- 11.0 Install cabinets and components.
- 12.0 Investigate sustainability issues related to the carpentry professions.
- 13.0 Identify and describe interior and exterior doors (wood and/or metal).
- 14.0 Install trim and finish carpentry using plans and specifications.
- 15.0 Cut and install framing members for a floor (wood and/or metal).
- 16.0 Cut and install a wall and partition framing (wood and/or metal).
- 17.0 Install an interior wall and ceiling materials.
- 18.0 Lay out and construct an interior-stair system.
- 19.0 Comply with hurricane codes.
- 20.0 Frame a roof.
- 21.0 Apply roofing applications.
- 22.0 Apply thermal and moisture protection.
- 23.0 Frame walls using cold-formed steel.
- 24.0 Perform site-preparation and layout activities.
- 25.0 Explain the importance of employability and entrepreneurship skills.
- 26.0 Perform concrete tests.
- 27.0 Lay foundations.
- 28.0 Construct vertical formwork.
- 29.0 Construct horizontal formwork.
- 30.0 Erect and properly align tilt-up wall panels.
- 31.0 Install drywall.
- 32.0 Install a suspended ceiling.
- 33.0 Interpret door and door hardware requirements based on plans and specifications.
- 34.0 Install windows and exterior doors.
- 35.0 Apply interior trim.
- 36.0 Lay out and construct an exterior stair system.
- 37.0 Apply exterior finishing.

- 38.0 Set up and install basic rigging and scaffolding.
- 39.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 40.0 Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabs.
- 41.0 Explain the transport and placement of concrete.
- 42.0 Demonstrate an understanding of trenching and excavation.
- 43.0 Identify structural timber.
- 44.0 Use plans and specifications for form carpentry.
- 45.0 Explain or identify various forms.

Florida Department of Education Student Performance Standards

Program Title: Carpentry PSAV Number: 1460202

Occu	Course Number: BCV0107 Occupational Completion Point: A Carpenter Helper – 300 Hours – SOC Code 47-3012	
01.0	Apply shop safety skillsThe student will be able to:	
	01.01 Maintain a clean, orderly and safe work area.	
	01.02 Transport, handle and store materials safely.	
	01.03 Operate a fire extinguisher.	
	01.04 Qualify in basic first-aid procedures.	
	01.05 Identify and report safety hazards.	
	01.06 Demonstrate the inspection, use and care of personal protective equipment (PPE).	
02.0	Utilize manual and power tools relevant to the carpentry professionThe student will be able to:	
	02.01 Identify various hand and power tools.	
	02.02 Select correct tools for specific jobs.	
	02.03 Clean and care for tools and equipment.	
	02.04 Demonstrate proficiency in the safe use of hand and power tools.	
	02.05 Read and use carpenter's measuring tools.	
03.0	Demonstrate mathematics knowledge and skills relevant to the carpentry fieldThe student will be able to:	
	03.01 Apply geometry and algebra skills to solve math problems related to carpentry with and without a calculator.	
	03.02 Demonstrate knowledge of arithmetic operations.	
	03.03 Solve problems for distance, perimeter, area and volume.	

	03.04 Analyze and apply data and measurements to solve problems and interpret documents.
	03.05 Construct charts/tables/graphs using functions and data.
04.0	Create basic construction drawings and/or sketchesThe student will be able to:
	04.01 Recognize and identify basic construction drawing terms, components and symbols.
	04.02 Relate information on construction drawings to actual locations on the print.
	04.03 Recognize different classifications of construction drawings.
	04.04 Interpret and use drawing dimensions and architectural scales.
05.0	Recommend appropriate building materials for specific scenariosThe student will be able to:
	05.01 Identify the grades and species of lumber and their appropriate uses.
	05.02 Identify the actual and nominal sizes of lumber.
	05.03 Identify the grades of plywood and wood products.
	05.04 Identify defects and blemishes that affect the durability and strength of lumber.
	05.05 Explain the effects of temperature extremes, chemical reaction and moisture content on building materials.
	05.06 Explain the uses of various types of engineered lumber.
06.0	Select appropriate fasteners and hardware for specific scenariosThe student will be able to:
	06.01 Identify the fasteners commonly used in carpentry.
	06.02 Identify the hardware commonly used in carpentry.
07.0	Apply occupational safety skillsThe student will be able to:
	07.01 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
	07.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA).
	07.03 Identify health-related problems that may result from exposure to hazardous materials.
	07.04 Describe the proper precautions for handling hazardous materials.
	07.05 Explain eligibility and the procedures for obtaining worker's compensation.

	07.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.
08.0	Select and use hand and power tools relevant to the carpentry professionThe student will be able to:
	08.01 Identify the hand tools commonly used by carpenters and describe their uses.
	08.02 Use hand tools in a safe and appropriate manner.
	08.03 State the general safety rules for operating all power tools, regardless of type.
	08.04 State the general rules for properly maintaining all power tools, regardless of type.
	08.05 Identify the portable power tools commonly used by carpenters and describe their uses.
	08.06 Use portable power tools in a safe and appropriate manner.
09.0	Fasten stock and jointsThe student will be able to:
	09.01 Identify types of glues and fasteners and describe their applications.
	09.02 Fasten stock with glue and clamps.
	09.03 Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.
	09.04 Fill and finish nail and screw holes with fillers and plugs.
	09.05 Glue and clamp stock using various techniques.
10.0	Read and design construction documentsThe student will be able to:
	10.01 Explain the types of drawings usually included in a set of plans and list the information found on each type.
	10.02 Identify the different types of lines used on construction drawings.
	10.03 Identify selected abbreviations commonly used on plans.
	10.04 Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.
	10.05 State the purpose of written specifications.
	10.06 Identify and describe the parts of a specification.
	10.07 Conduct quantity takeoff for materials.
	10.08 Design millwork and draw details in construction documents for a given scenario.

11.0	Install cabinets and componentsThe student will be able to:		
	11.01 Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.		
	11.02 Install fasteners.		
	11.03 Install drawers.		
	11.04 Install various types of doors including overlay, lipped and flush.		
	11.05 Install adjustable shelving.		
	11.06 Install glass panels and metal grills.		
	11.07 Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".		
	11.08 Install sliding doors and track.		
12.0	Investigate sustainability issues related to the carpentry professionThe student will be able to:		
	12.01 Describe the impact of the construction industry on the natural environment.		
	12.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.		
	12.03 Recommend sustainable alternatives to conventional carpentry practices.		
	12.04 Identify specific practices that can lessen adverse impacts on the environment.		

Occu	se Number: BCV0111 pational Completion Point: B & Finish Carpenter – 300 Hours – SOC Code 47-2031
13.0	Identify and describe interior and exterior doors (wood and/or metal)The student will be able to:
	13.01 Identify the types and parts of door systems.
	13.02 Identify door jamb components.
	13.03 Identify door hardware.
14.0	Install trim and finish carpentry using plans and specificationsThe student will be able to:
	14.01 Read an architect's scale to determine measurements for a trim and finish carpentry job.
	14.02 Cut and apply trim such as crown molding, baseboard, door and window molding, wainscoting and chair rail.

15.0	Cut and install framing members for a floor (wood and/or metal)The student will be able to:
	15.01 Identify and describe floor-framing members including subfloor.
	15.02 Identify supports for structures (e.g., sills, columns, beams and girders).
	15.03 Identify various types of joists and openings, including joists for a cantilevered floor.
	15.04 Identify various types of bridging.
	15.05 Identify various types of subfloors, applying fastening techniques.
16.0	Cut and install a wall and partition framing (wood and/or metal)The student will be able to:
	16.01 Identify framing members used in wall and partition construction.
	16.02 Lay out wall lines and partition locations on a floor.
	16.03 Lay out walls for studs, doors and windows.
	16.04 Identify studs, trimmers, cripples, headers and fire stops to length.
	16.05 Identify T's, corners and headers.
	16.06 Identify wall layout.
	16.07 Identify wall sheathing and/or diagonal bracing.
	16.08 Identify and describe insulation materials and a vapor barrier.
17.0	Install an interior wall and ceiling materialsThe student will be able to:
	17.01 Identify and describe furring strips.
	17.02 Identify and describe drywall materials.
	17.03 Identify paneling and trim.
	17.04 Identify ceiling materials and systems.
18.0	Lay out and construct an interior-stair systemThe student will be able to:
	18.01 Identify the types and styles of interior-stair systems.
	18.02 Identify the components of an interior-stair system.

	18.03 Calculate the number of risers and treads for an interior-stair system.
	18.04 Describe an interior-stair system (rough and finish).
19.0	Comply with hurricane codesthe student will be able to:
	19.01 Install hurricane anchors.
	19.02 Install hurricane clips.
	19.03 Install hurricane straps.
	19.04 Explain the purpose and importance of the codes relating to hurricanes.
20.0	Frame a roofThe student will be able to:
	20.01 Understand the terms associated with roof framing.
	20.02 Identify the roof framing members used in gable and hip roofs.
	20.03 Identify the methods used to calculate the length of a rafter.
	20.04 Identify the various types of trusses used in roof framing.
	20.05 Use a rafter framing square, speed square and calculator in laying out a roof.
	20.06 Identify various types of sheathing used in roof construction.
	20.07 Frame a gable roof with vent openings.
	20.08 Frame a roof opening.
	20.09 Erect a gable roof using trusses.
	20.10 Estimate the materials used in framing and sheathing a roof.
21.0	Apply roofing applicationsThe student will be able to:
	21.01 Identify the materials and methods used in roofing.
	21.02 Explain the safety requirements for roof jobs.
	21.03 Install fiberglass shingles on gable and hip roofs.
	21.04 Close up a valley using fiberglass shingles.

	21.05 Explain how to make various roof projections watertight when using fiberglass shingles.
	21.06 Complete the proper cuts and install the main and hip ridge caps using fiberglass shingles.
	21.07 Lay out, cut and install a cricket or saddle.
	21.08 Install wood shingles and shakes on roofs.
	21.09 Describe how to close up a valley using wood shingles and shakes.
	21.10 Explain how to make roof projections watertight when using wood shakes and shingles.
	21.11 Complete the cuts and install the main and hip ridge caps using wood shakes/shingles.
	21.12 Demonstrate the techniques for installing other selected types of roofing materials.
22.0	Apply thermal and moisture protectionThe student will be able to:
	22.01 Research the requirements for insulation.
	22.02 Identify the characteristics of various types of insulation material.
	22.03 Calculate the required amounts of insulation for a structure.
	22.04 Install selected insulation materials.
	22.05 Describe the requirements for moisture control and ventilation.
	22.06 Install selected vapor barriers.
	22.07 Describe various methods of waterproofing.
	22.08 Describe air infiltration control requirements.
	22.09 Install selected building wraps.
23.0	Frame walls using cold-formed steelThe student will be able to:
	23.01 Identify the components of a steel framing system.
	23.02 Identify and select the tools and fasteners used in a steel framing system.
	23.03 Identify applications for steel framing systems.
	23.04 Demonstrate the ability to build back-to-back, box and L-headers.

	23.05 Lay out and install a steel stud structural wall with openings to include bracing and blocking.
	23.06 Lay out and install a steel stud non-structural wall with openings to include blocking and bracing.
24.0	Perform site-preparation and layout activitiesThe student will be able to:
	24.01 Identify building layout from plans and specifications using math skills.
	24.02 Set up and adjust a transit and builder's level over one point and establish lines over two points.
	24.03 Erect batter boards and locate building lines.
	24.04 Locate building line points on batter boards using a builder's level.
	24.05 Locate building lines on a plot plan.
	24.06 Square a building, using the 3-4-5-triangle method and the diagonal method.
25.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	25.01 Identify and demonstrate positive work behaviors needed to be employable.
	25.02 Develop personal career plan that includes goals, objectives and strategies.
	25.03 Examine licensing, certification and industry credentialing requirements.
	25.04 Maintain a career portfolio to document knowledge, skills and experience.
	25.05 Evaluate and compare employment opportunities that match career goals.
	25.06 Identify and exhibit traits for retaining employment.
	25.07 Identify opportunities and research requirements for career advancement.
	25.08 Research the benefits of ongoing professional development.
	25.09 Examine and describe entrepreneurship opportunities as a career planning option.

Course Number: BCV0122 Occupational Completion Point: C Carpenter Rough – 450 Hours – SOC Code 47-2031	
26.0	Perform concrete testsThe student will be able to:
	26.01 Identify various types of cement and describe their uses.

	26.02 Identify types and sizes of concrete aggregates.
	26.03 Research types of concrete admixtures and describe their uses.
	26.04 Research special types of concrete and describe their uses.
	26.05 Calculate concrete volume requirements for rectangular, cylindrical, or other geometric structures using formulas, concrete tables and/or concrete calculators, as applicable.
	26.06 Use concrete curing methods and materials.
	26.07 Conduct concrete slump test.
	26.08 Mix concrete using different aggregates and admixtures.
	26.09 Collect concrete samples using a test cylinder
27.0	Lay foundationsThe student will be able to:
	27.01 Establish elevations.
	27.02 Identify various types of footing and foundations.
	27.03 Select the appropriate footing for a foundation.
	27.04 Lay out and construct a selected footing and foundation using an established gridline.
	27.05 Install templates, keyways and embedments.
	27.06 Form and strip pier foundation forms and prepare for resetting at another location.
	27.07 Identify the different classes of slabs-on-grade.
	27.08 Identify edge forms and explain their purpose.
	27.09 Construct and disassemble edge forms.
	27.10 Install vapor barrier, reinforcement and control joints.
	27.11 Establish finish grade and fill requirements.
28.0	Construct vertical formworkThe student will be able to:
	28.01 Explain safety procedures associated with using concrete wall forms.
	28.02 Identify the various types of concrete wall forms.

	28.03 Identify the components of each type of vertical forming system.
	28.04 Erect, plumb and brace a selected wall.
	28.05 Recognize various types of manufactured forms.
	28.06 State the differences in construction and use among different types of forms.
	28.07 Erect, plumb and brace a column form.
	28.08 Erect, plumb and brace a stair form.
	28.09 Locate and install bulkheads and embedded forms.
29.0	Construct horizontal formworkThe student will be able to:
	29.01 Identify the safety hazards associated with elevated deck formwork and explain how to eliminate them.
	29.02 Identify the different types of elevated decks.
	29.03 Identify the different types of flying form systems.
	29.04 Identify different types of handset form systems.
	29.05 Erect, plumb, brace and level different types of handset deck form systems.
	29.06 Install edge forms, blockouts, embedments and construction joints.
	29.07 Distinguish characteristics of joints: control, expansion and construction.
	29.08 Identify typical bridge and culvert form systems.
30.0	Erect and properly align tilt-up wall panelsThe student will be able to:
	30.01 Describe the different processes used in installing tilt-up wall panels.
	30.02 Explain the importance of the casting bed.
	30.03 Identify and install the various types of lifting eyes used in forming tilt-up panels.
	30.04 Identify the special rigging requirements for tilt-up wall panels.
	30.05 Identify the different methods of forming tilt-up wall panels.
	30.06 Demonstrate the different methods of forming tilt-up wall panels.

	30.07 Prepare for the erection of tilt-up wall panels.
	30.08 Install proper bracing for tilt-up wall panels.
	30.09 Install embedments, blockouts, architectural finishes, lifting devices and reinforcing materials using a set of construction drawings.
	30.10 Describe the final grouting procedure.
31.0	Install drywallThe student will be able to:
	31.01 Identify the different types of drywall and their uses.
	31.02 Select the type and thickness of drywall required for specific installations.
	31.03 Select fasteners for drywall installation.
	31.04 Explain the fastener schedules for different types of drywall installations.
	31.05 Perform single-layer and multi-layer drywall installations using different types of fastening systems including nails, drywall screws and adhesives.
	31.06 Install gypsum drywall on steel studs.
	31.07 Explain how soundproofing is achieved in drywall installations.
	31.08 Estimate material quantities for a drywall installation.
32.0	Install a suspended ceilingThe student will be able to:
	32.01 Establish a level line.
	32.02 Explain the common terms related to sound waves and acoustical ceiling materials.
	32.03 Identify the different types of suspended ceilings.
	32.04 Interpret plans related to ceiling layout.
	32.05 Sketch the ceiling layout for a basic suspended ceiling.
	32.06 Perform a material takeoff for a suspended ceiling.
	32.07 Install selected suspended ceilings.
33.0	Interpret door and door hardware requirements based on plans and specificationsThe student will be able to:
	33.01 Identify various types of door jambs and frames and demonstrate the installation procedures for placing selected door jambs and frames in different types of interior partitions.

	33.02 Identify different types of interior doors.
	33.03 Identify different types of interior door hardware and demonstrate the installation procedures for selected types.
	33.04 List and identify specific items included on a typical door schedule.
	33.05 Explain the procedure for placing and hanging a specified door.
34.0	Install windows and exterior doorsThe student will be able to:
	34.01 Identify various types of fixed, sliding and swinging windows.
	34.02 Identify the parts of a window installation.
	34.03 State the requirements for a proper window installation.
	34.04 Install a pre-hung window.
	34.05 Identify the common types of exterior doors and explain how they are constructed.
	34.06 Identify the parts of a door installation.
	34.07 Identify the types of thresholds used with exterior doors.
	34.08 Install a pre-hung exterior door.
	34.09 Identify the various types of locksets used on exterior doors and explain how they are installed.
	34.10 Install a lockset.
35.0	Apply interior trimThe student will be able to:
	35.01 Identify the different types of standard moldings and describe their uses.
	35.02 Make square and miter cuts using a saw buck or power miter saw.
	35.03 Select and properly use fasteners to install trim.
	35.04 Install interior trim including door, window, base and ceiling trim.
	35.05 Estimate the quantities of different trim materials required for selected rooms.
36.0	Lay out and construct an exterior stair systemThe student will be able to:
	36.01 Identify the types of exterior stair systems.

	36.02 Identify the parts of an exterior stair system.
	36.03 Calculate the number of treads and risers for an exterior stair system.
	36.04 Lay out, cut and assemble an exterior stair system.
37.0	Apply exterior finishingThe student will be able to:
	37.01 Describe the purpose of wall insulation and flashing.
	37.02 Install selected common cornices.
	37.03 Demonstrate lap and panel siding estimating methods.
	37.04 Describe the types and applications of common wood siding.
	37.05 Describe fiber-cement siding and its uses.
	37.06 Describe the types and styles of vinyl and metal siding.
	37.07 Describe the types and applications of stucco and masonry veneer finishes.
	37.08 Describe the types and applications of special exterior finish systems.
	37.09 Install three types of siding commonly used in your area.
38.0	Set up and install basic rigging and scaffoldingThe student will be able to:
	38.01 Identify and explain rigging equipment.
	38.02 Inspect rigging equipment, following safety precautions.
	38.03 Estimate size, weight and center of gravity.
	38.04 Tie knots.
	38.05 Identify and explain types of cranes.
	38.06 Rig and move materials and equipment, following safety precautions.
	38.07 Set up and install scaffolds, following safety precautions.
	38.08 Inspect various types of ladders and scaffolds, following safety precautions.
39.0	Erect, plumb and brace a simple concrete form with reinforcementThe student will be able to:

1	
	39.01 Identify the properties of cement.
	39.02 Describe the composition of concrete.
	39.03 Estimate volumes of concrete.
	39.04 Identify types of concrete reinforcement materials and describe their uses.
	39.05 Identify various types of footings and explain their uses.
	39.06 Identify the parts of various types of forms.
	39.07 Explain the safety procedures associated with the construction and use of concrete forms.
40.0	Explain and demonstrate how to place reinforcing bars in walls, columns, beams, girders, joists and slabsThe student will be able to:
	40.01 Describe the applications of reinforcing bars, the uses of reinforced structural concrete and the basic processes involved in placing reinforcing bars.
	40.02 Recognize and identify the bar bends standardized by the American Concrete Institution (ACI).
	40.03 Read and interpret bar lists and describe the information found on a bar list.
	40.04 List the types of ties used in securing reinforcing bars.
	40.05 State the tolerances allowed in the fabrication of reinforcing bars.
	40.06 Demonstrate the proper use of common ties for reinforcing bars.
	40.07 Describe methods by which reinforcing bars may be cut and bent in the field.
	40.08 Use the tools and equipment needed for installing reinforcing bars.
	40.09 Safely use selected tools and equipment to cut, bend and install reinforcing materials.
	40.10 Explain the necessity of concrete cover in placing reinforcing bars.
	40.11 Identify lapped splices.
41.0	Explain the transport and placement of concreteThe student will be able to:
	41.01 List various types of equipment used to transport and place concrete.
	41.02 Describe the factors that contribute to the quality of concrete placement.
	41.03 Demonstrate the correct methods for placing and consolidating concrete into forms.

	41.04 Use a screed to strike off and level concrete to the proper grade in a form.
	41.05 Use tools for placing, floating and finishing concrete.
	41.06 Determine when conditions permit the concrete finishing operation to start.
	41.07 Name the factors that affect the curing of concrete and describe the methods used to achieve proper curing.
	41.08 Properly care for and safely use hand and power tools used when working with concrete.
42.0	Demonstrate an understanding of trenching and excavationThe student will be able to:
	42.01 Identify the different types, bearing capacities and classifications of soils.
	42.02 Identify ways to increase soil density.
	42.03 State the purpose of soil density (compaction) tests.
	42.04 Explain the safety considerations for trenches and deep excavations.
	42.05 Identify and describe groundwater mitigation methods.
	42.06 Identify and describe rock mitigation techniques.

Occu	se Number: BCV0128 pational Completion Point: D enter Rough – 150 Hours – SOC Code 47-2031
43.0	Identify structural timberThe student will be able to:
	43.01 Identify structural-timber components and heavy structural timber.
44.0	Use plans and specifications for form carpentryThe student will be able to:
	44.01 Read an architect's scale for form carpentry job.
	44.02 Determine dimensions from plans.
	44.03 Relate information on plans and specifications to real parts, locations, hardware and fasteners.
45.0	Explain or identify various formsThe student will be able to:
	45.01 Identify styles of footings.
	45.02 Explain method for setting a pier footing form.

45.03	Explain how to strip a form for reuse.
45.04	Explain edge forms for a floor with or without foundation walls and for a stoop.
45.05	Explain various types of curb and gutter forms.
45.06	Identify various types of beams, columns and slabs with various form systems (Burke, Symons, plywood and 2'x 4').
45.07	Identify and explain the different types and uses of flying forms for decks and shear walls.
45.08	Explain concrete pressure and its implications for form work routines.
45.09	Identify form-work accessories such as snap-ties, wedges, pigs-feet, whalers, and stiffbacks for forming walls, beams and columns with plywood and 2'x 4' material.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Electricity

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	1460312
CIP Number	0646030202
Grade Level	30,31
Standard Length	1200 Hours
Teacher Certification	ELECTRICAL @7 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-3013 - HelpersElectricians 47-2111 - Electricians
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9
	Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in a variety of construction electrical industries.

This program focuses on broad, transferable skills, stresses the understanding of all aspects of the electricity industry, and demonstrates such elements of the industry as planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0603	Electrician Helper	300 Hours	47-3013
В	BCV0640	Residential Electrician	450 Hours	47-2111
С	BCV0652	Commercial Electrician	450 Hours	47-2111

<u>Common Career Technical Core – Career Ready Practices</u>

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Explain the importance of health, safety, environmental stewardship and related regulatory compliance.
- 02.0 Identify, use and maintain the tools and accessories used in the electrical industry.
- 03.0 Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skills.
- 04.0 Apply mathematics knowledge and skills to electricity.
- 05.0 Demonstrate an understanding of basic electricity.
- 06.0 Read and interpret basic electric codes.
- 07.0 Apply mathematics knowledge and skills to electricity.
- 08.0 Demonstrate further understanding of electricity.
- 09.0 Demonstrate science knowledge and skills related to electrical principles.
- 10.0 Demonstrate proficiency in electrical math problems and skills.
- 11.0 Demonstrate Alternating-Current (AC) circuit skills.
- 12.0 Explain the importance of employability and entrepreneurship skills.
- 13.0 Install residential wiring.
- 14.0 Install residential wiring systems.
- 15.0 Demonstrate proficiency in commercial wiring.
- 16.0 Demonstrate specialized electrical skills.

Florida Department of Education Student Performance Standards

Program Title: Electricity PSAV Number: 1460312

Occu	se Number: BCV0603 pational Completion Point: A rician Helper – 300 Hours – SOC Code 47-3013
01.0	Explain the importance of health, safety, environmental stewardship and related regulatory complianceThe student will be able to:
	01.01 Clean the work area and maintain it in a safe condition.
	01.02 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	01.03 Identify and operate workplace-safety electrical devices.
	01.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and know the proper precautions required for handling such materials.
	01.05 Explain emergency procedures to follow in response to workplace accidents.
	01.06 Create a disaster and/or emergency response plan.
	01.07 Explain the importance of CPR (cardiopulmonary resuscitation) and first aid.
	01.08 Describe "Right-to-Know" Law as recorded in (29 CFR.1910.1200).
02.0	Identify, use and maintain the tools and accessories used in the electrical industryThe student will be able to:
	02.01 Identify and select tools, equipment, materials and wires to complete a job.
	02.02 Drill holes in metal, wood and concrete for electrical wiring.
	02.03 Lay out electrical devices, complying with regulations.
	 02.04 Install the following, complying with the appropriate local, state or national electric codes: a. Conductors and cable b. Standard outlets and switch boxes c. Explain cord connections on equipment. d. Cords switches, receptacles and dimmers, including a single-pole switched lighting circuit, a three-way switched lighting circuit and a four-way combination circuit.
03.0	Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skillsThe student will be able to:

	03.01 Define the following terms: voltage, current, resistance and power.
	03.02 Measure voltage, amperage and resistance using industry standard electrical measuring devices.
	03.03 Analyze and explain a series, series-parallel and parallel circuit.
	03.04 Draw each type of circuit and calculate the circuit values.
	03.05 Explain and apply Ohm's Law.
	03.06 Compute conductance and resistance of conductors and insulators.
04.0	Apply mathematics knowledge and skills to electricityThe student will be able to:
	04.01 Demonstrate knowledge of arithmetic operations.
	04.02 Analyze and apply data and measurements to solve problems and interpret documents.
	04.03 Construct charts/tables/graphs using functions and data.
05.0	Demonstrate an understanding of basic electricityThe student will be able to:
	05.01 Explain the principles of electromagnetism.
	05.02 Explain the magnetic properties of circuits and devices.
	05.03 Relate electricity to the nature of matter.
	05.04 Describe various ways that electricity is produced.
06.0	Read and interpret basic electric codesThe student will be able to:
	06.01 Describe the importance of following the local, state and national electric codes.
	06.02 Read and interpret basic electric codes, wiring plans and specifications.
	06.03 Identify licensure requirements for electrical occupations.
	06.04 Demonstrate knowledge of National Fire Protection Association (NFPA) 70E and how it relates to job safety.
07.0	Apply mathematics knowledge and skills to electricityThe student will be able to:
	07.01 Solve basic algebraic formulas related to electricity.
	07.02 Solve basic trigonometric functions related to electrical theory.

	07.03 Explain basic AC theory and solve related mathematical problems using appropriate test equipment.
	07.04 Solve math-related problems from measurements on training aids. (Optional)
08.0	Demonstrate further understanding of electricityThe student will be able to:
	08.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.
	08.02 Explain how voltage is produced by chemical, mechanical, thermal, photoelectric and piezo electric means.
	08.03 Identify electrical symbols in construction documents.
09.0	Demonstrate science knowledge and skills related to electrical principlesThe student will be able to:
	09.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	09.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.

Demonstrate proficiency in electrical math problems and skillsThe student will be able to:
10.01 Calculate wiring costs.
10.02 Draw an industrial electrical-wiring plan.
10.03 Describe the use of high-voltage test equipment.
10.04 Describe how to test insulation.
10.05 Describe how to balance a load.
10.06 Use electrical related math skills.
Demonstrate Alternating-Current (AC) circuit skillsThe student will be able to:
11.01 Identify the physical and electrical characteristics of capacitors and inductors.
11.02 Demonstrate proficiency in measuring, testing and connecting a transformer.
11.03 Apply the principles of transformers to AC circuits.
11.04 Identify the properties of an AC signal.

	11.05 Identify AC sources.
	11.06 Analyze and apply the principles of transformers to AC circuits.
	11.07 Analyze polyphase circuits.
	11.08 Install a simple polyphase circuit.
12.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	12.01 Identify and demonstrate positive work behaviors needed to be employable.
	12.02 Develop personal career plan that includes goals, objectives and strategies.
	12.03 Examine licensing, certification and industry credentialing requirements.
	12.04 Maintain a career portfolio to document knowledge, skills and experience.
	12.05 Evaluate and compare employment opportunities that match career goals.
	12.06 Identify and exhibit traits for retaining employment.
	12.07 Identify opportunities and research requirements for career advancement.
	12.08 Research the benefits of ongoing professional development.
	12.09 Examine and describe entrepreneurship opportunities as a career planning option.
13.0	Install residential wiringThe student will be able to:
	13.01 Identify residential-wiring requirements and specifications in accordance with a wiring plan.
	13.02 Draw a residential wiring plan, using electrical-wiring symbols.
	13.03 Identify and install a recessed lighting fixture, a fluorescent lighting fixture and a surface lighting fixture according to the specifications, complying with the appropriate local, state or national electric codes.
	13.04 Identify, install and wire a duplex- receptacle-outlet circuit, a split-circuit duplex-receptacle-outlet circuit and a special-purpose
14.0	receptacle-outlet circuit according to the specifications, complying with the appropriate local, state or national electric codes. Install residential wiring systemsThe student will be able to:
	14.01 Install and wire a low-voltage signal system.
	14.02 Install conduit systems.
	14.03 Provide power for heating, ventilation and air-conditioning equipment.

14.04	Install the following, complying with the appropriate local, state, or national electric codes: a. Service-entrance main panel b. Service-entrance meter base c. Alarm system/smoke detectors
14.05	Demonstrate knowledge of the requirements for the installation of a swimming-pool electrical system.
14.06	Connect single-phase and three-phase transformers.
14.07	Troubleshoot residential electric circuits.

Occu	se Number: BCV0652 pational Completion Point: C nercial Electrician – 450 Hours SOC Code 47-2111
15.0	Demonstrate proficiency in commercial wiringThe student will be able to:
	15.01 Read and interpret a commercial wiring plan and specifications.
	15.02 Draw a commercial electrical-wiring plan.
	15.03 Select tools, equipment, materials and wires to complete a job.
	15.04 Install the following according to the plan and specifications, complying with appropriate electric codes: a. Wire mold b. Conduit, duct and raceway systems c. Conductors in a conduit
	15.05 Describe the difference between a residential and a commercial lighting circuit.
	15.06 Construct control circuits from schematics.
	15.07 Describe high-voltage (over 600V) wiring requirements.
	15.08 Demonstrate knowledge of installing wiring in hazardous areas.
	15.09 Explain a commercial three-phase receptacle circuit and an emergency-lighting system.
	15.10 Explain commercial-service-entrance requirements.
16.0	Demonstrate specialized electrical skillsThe student will be able to:
	16.01 Explain solid-state control devices.
	16.02 Explain data cable installation according to the plan and specifications.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Industrial Electricity
Program Type: Career Preparatory

Career Cluster: Architecture & Construction

NOTE: This program has been daggered for deletion. There will be no new enrollments as of the 2015-2016 school year. Students may enroll in 'Electricity – I460312'.

	PSAV
Program Number	1460313
CIP Number	0646030203
Grade Level	30, 31
Standard Length	960 Hours
Teacher Certification	ELECTRICAL @7 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-3013 - Helpers—Electricians 47-2111- Electricians
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to planning and installing electrical wiring systems according to local codes. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of a program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0603	Electrician Helper	300 Hours	47-3013
В	BCV0667	Industrial Electrician	300 Hours	47-2111
С	BCV0666	Electrical Technician	360 Hours	47-2111

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and accessories used in the electrical industry.
- 03.0 Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skills.
- 04.0 Demonstrate mathematics knowledge and skills.
- 05.0 Demonstrate an understanding of basic electricity.
- 06.0 Read and interpret basic electric codes.
- 07.0 Apply mathematics knowledge and skills to electricity.
- 08.0 Demonstrate further understanding of electricity.
- 09.0 Demonstrate science knowledge and skills.
- 10.0 Demonstrate competency in industrial wiring.
- 11.0 Demonstrate competency in transformers.
- 12.0 Demonstrate competency in Alternating-Current (AC) and Direct-Current (DC) motors.
- 13.0 Demonstrate competency in electrical and electronic control circuits and equipment.
- 14.0 Demonstrate competency in electronic circuits and devices.
- 15.0 Demonstrate competency in Programmable Logic Controllers (PLCs).

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Industrial Electricity

I460313

Occu	se: BCV0603 pational Completion Point: A
01.0	ician Helper - 300 Hours - SOC 47-3013 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	01.01 Clean the work area and maintain it in a safe condition.
	01.02 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	01.03 Identify and operate workplace-safety electrical devices.
	01.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and know the proper precautions required for handling such materials.
	01.05 Explain emergency procedures to follow in response to workplace accidents.
	01.06 Create a disaster and/or emergency response plan.
	01.07 Demonstrate knowledge of CPR (cardiopulmonary resuscitation) and first aid.
	01.08 Describe "Right-to-Know" Law as recorded in (29 CFR.1910.1200)
02.0	Identify, use and maintain the tools and accessories used in the electrical industryThe student will be able to:
	02.01 Identify and select tools, equipment, materials and wires to complete a job.
	02.02 Drill holes in metal, wood and concrete for electrical wiring.
	02.03 Lay out electrical devices, complying with regulations.
	 02.04 Install the following, complying with the appropriate local, state, or national electric codes: a. Conductors and cable b. Standard outlets and switch boxes c. Explain cord connections on major appliances d. Cords switches, receptacles and dimmers, including a single-pole switched lighting circuit, a three-way switched lighting circuit and a four-way combination circuit.

03.0	Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skillsThe student will be able to:
	03.01 Define the terms "voltage," "current," "resistance," "power," and "energy."
	03.02 Measure voltage, amperage and resistance, using a Volt-Ohm Meter (VOM) and a Digital Volt-Ohm Meter (DVM).
	03.03 Analyze and explain a series, series-parallel and parallel circuit.
	03.04 Draw each type of circuit and calculate the circuit values.
	03.05 Explain and apply Ohm's Law.
	03.06 Compute conductance and resistance of conductors and insulators.
04.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	04.01 Demonstrate knowledge of arithmetic operations.
	04.02 Analyze and apply data and measurements to solve problems and interpret documents.
	04.03 Construct charts/tables/graphs using functions and data.
05.0	Demonstrate an understanding of basic electricityThe student will be able to:
	05.01 Explain the principles of electromagnetism.
	05.02 Explain the magnetic properties of circuits and devices.
	05.03 Relate electricity to the nature of matter.
	05.04 Describe various ways that electricity is produced.
06.0	Read and interpret basic electric codesThe student will be able to:
	06.01 Describe the importance of following the local, state and national electric codes.
	06.02 Read and interpret basic electric codes, wiring plans and specifications.
	06.03 Identify licensure requirements for electrical occupations.
	06.04 Demonstrate knowledge of National Fire Protection Agency (NFPA) 70E and how it relates to job safety.
07.0	Apply mathematics knowledge and skills to electricityThe student will be able to:
	07.01 Demonstrate Solve basic algebraic formulas related to electricity.

	07.02 Solve basic trigonometric functions related to electrical theory.
	07.03 Explain basic AC theory and solve related mathematical problems using appropriate test equipment.
	07.04 Solve math-related problems from measurements on training aids. (Optional)
08.0	Demonstrate further understanding of electricityThe student will be able to:
	08.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.
	08.02 Explain how voltage is produced by chemical, mechanical, thermal, photoelectric and piezo electric means.
	08.03 Identify electrical symbols in construction documents.
09.0	Demonstrate science knowledge and skillsThe students will be able to:
	09.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	09.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.

Occu	se: BCV0667 pational Completion Point: B trial Electrician – 300 Hours – SOC 47-2111
10.0	Demonstrate competency in industrial wiringThe student will be able to:
	10.01 Draw an industrial one-line power diagram.
	10.02 Test insulation resistance using a megohm meter.
	10.03 Install a motor branch circuit.
	 10.04 Using the National Electrical Code (NEC), make the following required calculations: a. Conductor size b. Overcurrent protection c. Overload protection d. Short circuit protection
	10.05 Install a 277v lighting branch circuit.
	10.06 Describe a bus duct power distribution system.
	10.07 Describe fiber-optic installation requirements.
	10.08 Demonstrate the use of industrial test equipment.

	10.09 Install the following:
	a. Disconnect switch - fused and unfusedb. Raceways
	c. Emergency stop switch
	d. Circuit breaker
	e. Panelboard
11.0	Demonstrate competency in transformersThe student will be able to:
	11.01 Explain the basic principles of mutual induction and transformer action.
	11.02 Explain the operation and use of a current transformer.
	11.03 Explain the operation and use of a potential transformer.
	11.04 Explain the operation and use of a buck-boost transformer and when it is used.
	11.05 Explain and connect 3 phase transformers in both delta and wye configuration.
	11.06 Calculate the over current protection requirements for the primary and secondary.
	11.07 Explain what transformer impedance is and its importance.
12.0	Demonstrate competency in Alternating-Current (AC) and Direct-Current (DC) motorsThe student will be able to:
	12.01 Install and connect the following types of DC motors:
	a. Series
	b. Shunt
	c. Compound 12.02 Install and connect the following types of single phase AC motors:
	a. Capacitor-start
	b. Capacitor-start and run
	c. Split-phase inductor
	d. Universal
	e. Repulsion-start, induction-run
	12.03 Install and connect the following types of three phase AC motors:
	a. Squirrel-cage induction
	b. Wound-rotor
	c. Synchronous
	12.04 Demonstrate the ability to select and connect a three-phase induction motor for either high or low voltage requirements.
13.0	Demonstrate competency in electrical and electronic control circuits and equipmentThe student will be able to:
	13.01 Draw an elementary motor control ladder diagram.

13.02	Interpret symbols, read and troubleshoot from schematics and ladder diagrams.
13.03	Describe the operation of the following overload relays:
	a. Thermal
	b. Magnetic
	c. Thermal-magnetic
13.04	Install a manual single phase and three phase control station.
13.05	Install a three-phase magnetic starter.
13.06	Install the following control devices:
	a. Start/stop station
	b. Forward/reverse/stop station
	c. Hands/off/auto station
	d. Start/jog/stop station
	e. Limit switches
	f. Pressure, temperature, level and float switches
	g. Pilot, run and stop indicator lights
	h. Control relay and timing relays
	i. Multi-motor push-button station
13.07	, I
	a. Start/stop
	b. Forward/reverse
	c. Hands-off-auto
	d. Start/jog
	e. Automatic timed sequence, "ON" and "OFF" delays
	f. Manually timed sequence, "ON" and "OFF" delays
	g. Plugging
	h. DC injection braking
13.08	\cdot 1
	a. Variable Frequency Drive (VFD)
	b. DC drive
13.09	Explain the alternatives to relay logic control.

Course: BCV0666 Occupational Completion Point: C Electrical Technician – 360 Hours SOC 47-2111		
14.0	Demonstrate competency in electronic circuits and devicesThe student will be able to:	
	14.01 Explain the principles of operation of the following devices: a. Rectifiers and diodes	

		b. Transistors, PNP and NPN
		c. Operational amplifiers
		d. Logic gates
		e. 555 timers
		f. DC power supplies
		g. Inductive, capacitive and magnetic proximity switches
		h. Photoelectric-eyes
		i. Infrared scanners (bar-code)
		j. Ultra-sonic sensors
	14.02	Demonstrate competency in using the following test equipment:
		a. Oscilloscope
		b. True RMS voltmeter
		c. Signal generator
		d. LCR meter
		e. Logic probe
		f. Function generator
		g. Frequency counter
	14.03	Conduct, test and troubleshoot the following:
		a. Half and full-wave DC power supplies
		b. A filtered full-wave regulated DC power supply
		c. Logic circuits (e.g. and, or, not, exclusive or, exclusive nor)
		d. Operational amplifier circuit
		e. Timing circuit using a 555 timer
		f. Common base, common collector and common emitter transistor circuits for both NPN and PNP transistors.
	14.04 Describe and write a simple Boolean equation.	
	14.05	Explain and demonstrate proper shielding and grouping methods.
15.0	Demonstrate competency in Programmable Logic Controllers (PLCs)The student will be able to:	
	15.01	Name the basic components of a PLC.
	15.02	Explain the operation of the following:
		a. Input modules
		b. Output modules
		c. Power supply
		d. Central Processing Unit (CPU)
		e. Programming device
	15.03	Explain typical memory structure and the terms, ROM, RAM, EEPROM, Bit, Byte, Word and Double-word.
	15.04	Explain the following numbering systems and demonstrate ability to convert from one to another.
		a. Decimal

	b. Binaryc. Octald. Hexadecimal
15.05	Explain how digital logic gate devices are used in programming.
15.06	Connect, test and operate the following input devices to the PLC: a. Pushbuttons (NC and NO) b. Proximity switches (capacitive and inductive) c. Photo-eyes (NC and NO) d. On/off switches e. Analog (4-20 ma and 0-10v) devices
15.07	Connect, test and operate the following output devices: a. Indicator lights b. Magnetic motor contractors c. Solenoid operated valves
15.08	Demonstrate the ability to access the PLC software and monitor an operating program.
15.09	Write, debug, download and run the following application programs: a. Basic start/stop operation b. Forward/reverse operation c. Timed sequence operation d. Counting operation e. Shift register operation f. Word transfer operation g. Analog input/output operation h. Jump instruction operation i. Set-reset operation j. Compare values operation k. Compute values operation
	Demonstrate the ability to address inputs and outputs in programming language.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Basic Skills Level	Mathematics: 9
	Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in a variety of construction electrical industries.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster. The content includes but is not limited to planning and installing electrical wiring, equipment, or fixtures based on job specifications and local codes. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of a program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0603	Electrician Helper	300 Hours	47-3013
В	BCV0640	Residential Electrician	450 Hours	47-2111
С	BCV0652	Commercial Electrician	450 Hours	47-2111
D	BCV0667	Industrial Electrician	300 Hours	47-2111

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and accessories used in the electrical industry.
- 03.0 Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skills.
- 04.0 Demonstrate mathematics knowledge and skills.
- 05.0 Demonstrate an understanding of basic electricity.
- 06.0 Read and interpret basic electric codes.
- 07.0 Apply mathematics knowledge and skills to electricity.
- 08.0 Demonstrate further understanding of electricity.
- 09.0 Demonstrate science knowledge and skills--The students will be able to:
- 10.0 Demonstrate proficiency in electrical math problems and skills.
- 11.0 Demonstrate Alternating-Current (AC) circuit skills.
- 12.0 Explain the importance of employability and entrepreneurship skills.
- 13.0 Install residential wiring.
- 14.0 Install residential wiring systems.
- 15.0 Demonstrate proficiency in commercial wiring.
- 16.0 Demonstrate specialized electrical skills.
- 17.0 Demonstrate competency in industrial wiring.
- 18.0 Demonstrate competency in AC and DC motors.
- 19.0 Demonstrate competency in electrical and electronic control circuits and equipment.

Florida Department of Education Student Performance Standards

Program Title: Electrician PSAV Number: 1460314

Occu	Course Number: BCV0603 Occupational Completion Point: A Electrician Helper – 300 Hours – SOC Code 47-3013			
01.0	0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:			
	01.01 Clean the work area and maintain it in a safe condition.			
	01.02 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.			
	01.03 Identify and operate workplace-safety electrical devices.			
	01.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and know the proper precautions required for handling such materials.			
	01.05 Explain emergency procedures to follow in response to workplace accidents.			
	01.06 Create a disaster and/or emergency response plan.			
	01.07 Demonstrate knowledge of CPR (cardiopulmonary resuscitation) and first aid.			
	01.08 Describe "Right-to-Know" Law as recorded in (29 CFR.1910.1200)			
02.0	Identify, use and maintain the tools and accessories used in the electrical industryThe student will be able to:			
	02.01 Identify and select tools, equipment, materials and wires to complete a job.			
	02.02 Drill holes in metal, wood and concrete for electrical wiring.			
	02.03 Lay out electrical devices, complying with regulations.			
	 02.04 Install the following, complying with the appropriate local, state, or national electric codes: a. Conductors and cable b. Standard outlets and switch boxes c. Explain cord connections on major appliances d. Cords switches, receptacles and dimmers, including a single-pole switched lighting circuit, a three-way switched lighting circuit and a four-way combination circuit. 			

03.0	Demonstrate an understanding of basic Direct-Current (DC) electrical-circuit skillsThe student will be able to:
	03.01 Define the following terms: voltage, current, resistance, power, energy
	03.02 Measure voltage, amperage and resistance, using a Volt-Ohm Meter (VOM) and a Digital Volt-Ohm Meter (DVM).
	03.03 Analyze and explain a series, series-parallel and parallel circuit.
	03.04 Draw each type of circuit and calculate the circuit values.
	03.05 Explain and apply Ohm's Law.
	03.06 Compute conductance and resistance of conductors and insulators.
04.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	04.01 Demonstrate knowledge of arithmetic operations.
	04.02 Analyze and apply data and measurements to solve problems and interpret documents.
	04.03 Construct charts/tables/graphs using functions and data.
05.0	Demonstrate an understanding of basic electricityThe student will be able to:
	05.01 Explain the principles of electromagnetism.
	05.02 Explain the magnetic properties of circuits and devices.
	05.03 Relate electricity to the nature of matter.
	05.04 Describe various ways that electricity is produced.
06.0	Read and interpret basic electric codesThe student will be able to:
	06.01 Describe the importance of following the local, state and national electric codes.
	06.02 Read and interpret basic electric codes, wiring plans and specifications.
	06.03 Identify licensure requirements for electrical occupations.
	06.04 Demonstrate knowledge of National Fire Protection Agency (NFPA) 70E and how it relates to job safety.
07.0	Apply mathematics knowledge and skills to electricityThe student will be able to:
	07.01 Demonstrate Solve basic algebraic formulas related to electricity.

	07.02 Solve basic trigonometric functions related to electrical theory.
	07.03 Explain basic AC theory and solve related mathematical problems using appropriate test equipment.
	07.04 Solve math-related problems from measurements on training aids. (Optional)
08.0	Demonstrate further understanding of electricityThe student will be able to:
	08.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.
	08.02 Explain how voltage is produced by chemical, mechanical, thermal, photoelectric and piezo electric means.
	08.03 Identify electrical symbols in construction documents.
09.0	Demonstrate science knowledge and skillsThe students will be able to:
	09.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	09.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.

Occu	e Number: BCV0640 pational Completion Point: B ential Electrician – 450 Hours SOC Code 47-2111
10.0	Demonstrate proficiency in electrical math problems and skillsThe student will be able to:
	10.01 Calculate wiring costs.
	10.02 Draw an industrial electrical-wiring plan.
	10.03 Describe the use of high-voltage test equipment.
	10.04 Describe how to test insulation.
	10.05 Describe how to balance a load.
	10.06 Use electrical related math skills.
11.0	Demonstrate Alternating-Current (AC) circuit skillsThe student will be able to:
	11.01 Identify the physical and electrical characteristics of capacitors and inductors.
	11.02 Demonstrate proficiency in measuring, testing and connecting a transformer.
	11.03 Apply the principles of transformers to AC circuits.

	11.04 Identify the properties of an AC signal.
	11.05 Identify AC sources.
	11.06 Analyze and apply the principles of transformers to AC circuits.
	11.07 Analyze polyphase circuits.
	11.08 Install a simple polyphase circuit.
12.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	12.01 Identify and demonstrate positive work behaviors needed to be employable.
	12.02 Develop personal career plan that includes goals, objectives and strategies.
	12.03 Examine licensing, certification and industry credentialing requirements.
	12.04 Maintain a career portfolio to document knowledge, skills and experience.
	12.05 Evaluate and compare employment opportunities that match career goals.
	12.06 Identify and exhibit traits for retaining employment.
	12.07 Identify opportunities and research requirements for career advancement.
	12.08 Research the benefits of ongoing professional development.
	12.09 Examine and describe entrepreneurship opportunities as a career planning option.
13.0	Install residential wiringThe student will be able to:
	13.01 Identify residential-wiring requirements and specifications in accordance with a wiring plan.
	13.02 Draw a residential wiring plan, using electrical-wiring symbols.
	13.03 Identify and install a recessed lighting fixture, a fluorescent lighting fixture and a surface lighting fixture according to the specifications, complying with the appropriate local, state, or national electric codes.
	13.04 Identify, install and wire a duplex- receptacle-outlet circuit, a split-circuit duplex-receptacle-outlet circuit and a special-purpose receptacle-outlet circuit according to the specifications, complying with the appropriate local, state, or national electric codes.
14.0	Install residential wiring systemsThe student will be able to:
	14.01 Install and wire a low-voltage signal system.
	14.02 Install conduit systems.

14.03	Provide power for heating, ventilation and air-conditioning equipment.
14.04	Install the following, complying with the appropriate local, state, or national electric codes: a. Service-entrance main panel b. Service-entrance meter base c. Alarm system/smoke detectors
14.05	Demonstrate knowledge of the requirements for the installation of a swimming-pool electrical system.
14.06	Connect single-phase and three-phase transformers.
14.07	Troubleshoot residential electric circuits.

Occu	Course Number: BCV0652 Occupational Completion Point: C Commercial Electrician – 450 Hours SOC Code 47-2111		
15.0	Demonstrate proficiency in commercial wiringThe student will be able to:		
	15.01 Read and interpret a commercial wiring plan and specifications.		
	15.02 Draw a commercial electrical-wiring plan.		
	15.03 Select tools, equipment, materials and wires to complete a job.		
	 15.04 Install the following according to the plan and specifications, complying with appropriate electric codes: a. Wire mold b. Conduit, duct and raceway systems c. Conductors in a conduit 		
	15.05 Describe the difference between a residential and a commercial lighting circuit.		
	15.06 Construct control circuits from schematics.		
	15.07 Describe high-voltage (over 600V) wiring requirements.		
	15.08 Demonstrate knowledge of installing wiring in hazardous areas.		
	15.09 Explain a commercial three-phase receptacle circuit and an emergency-lighting system.		
	15.10 Explain commercial-service-entrance requirements.		
16.0	Demonstrate specialized electrical skillsThe student will be able to:		
	16.01 Explain solid-state control devices.		

16.02 Explain data cable installation according to the plan and specifications.

Occu	se Number: BCV0667 pational Completion Point: D trial Electrician – 300 Hours – SOC Code 47-2111
17.0	Demonstrate competency in industrial wiringThe student will be able to:
	17.01 Draw an industrial one-line power diagram.
	17.02 Test insulation resistance using a megohmmeter.
	17.03 Install a motor branch circuit.
	 17.04 Using the National Electrical Code (NEC), make the following required calculations: a. Conductor size b. Overcurrent protection c. Overload protection d. Short circuit protection
	17.05 Install a 277 V lighting branch circuit.
	17.06 Describe a bus duct power distribution system.
	17.07 Describe fiber-optic installation requirements.
	17.08 Demonstrate the use of industrial test equipment.
	17.09 Install the following: a. Disconnect switch - fused and unfused b. Raceways c. Emergency stop switch d. Circuit breaker e. Panelboard
	17.10 Explain the basic principles of mutual induction and transformer action.
	17.11 Explain the operation and use of a current transformer.
	17.12 Explain the operation and use of a potential transformer.
	17.13 Explain the operation and use of a buck-boost transformer and when it is used.
	17.14 Explain and connect 3 phase transformers in both delta and wye configuration.
	17.15 Calculate the over current protection requirements for the primary and secondary.

	17.16 Explain what transformer impedance is and its importance.		
18.0	Demonstrate competency in Alternating-Current (AC) and Direct-Current (DC) motorsThe student will be able to:		
	18.01 Install and connect the following types of DC motors: a. Series b. Shunt c. Compound		
	 18.02 Install and connect the following types of single phase AC motors: a. Capacitor-start b. Capacitor-start and run c. Split-phase inductor d. Universal e. Repulsion-start, induction-run 		
	 18.03 Install and connect the following types of three phase AC motors: a. Squirrel-cage induction b. Wound-rotor c. Synchronous 		
	18.04 Select and connect a three-phase induction motor for either high or low voltage requirements.		
19.0	Demonstrate competency in electrical and electronic control circuits and equipmentThe student will be able to:		
	19.01 Draw an elementary motor control ladder diagram.		
	19.02 Interpret symbols, read and troubleshoot from schematics and ladder diagrams.		
	19.03 Describe the operation of the following overload relays: a. Thermal b. Magnetic c. Thermal-magnetic		
	19.04 Install a manual single phase and three phase control station.		
	19.05 Install a three-phase magnetic starter.		
	19.06 Install the following control devices: a. Start/stop station b. Forward/reverse/stop station c. Hands/off/auto station d. Start/jog/stop station e. Limit switches f. Pressure, temperature, level and float switches g. Pilot, run and stop indicator lights h. Control relay and timing relays		

	i. Multi-motor push-button station
19.07	Install, operate and troubleshoot the following relay control circuits:
	a. Start/stop
	b. Forward/reverse
	c. Hands-off-auto
	d. Start/jog
	e. Automatic timed sequence, "ON" and "OFF" delays
	f. Manually timed sequence, "ON" and "OFF" delays
	g. Plugging
	h. DC injection braking
19.08	Install, operate and troubleshoot the following electronic control equipment and circuits:
	a. Variable Frequency Drive (VFD)
	b. DC drive
19.09	Explain the alternatives to relay logic control.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9			

Purpose

The purpose of this program is to prepare students for employment or advanced training in the building construction industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster.

The content includes but is not limited to developing skills in various construction trades, as well as providing a foundation in construction management. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0400	Building Construction Helper	450 Hours	49-9071
	BCV0401	Building Construction Technician 1	300 Hours	49-9071
В	BCV0402	Building Construction Technician 2	300 Hours	49-9071

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Investigate the construction industry and explore related occupations.
- 03.0 Select and use basic hand tools.
- 04.0 Select and use power tools and describe their proper operation.
- 05.0 Demonstrate mathematics knowledge and skills.
- 06.0 Demonstrate carpentry skills.
- 07.0 Read and interpret construction drawings.
- 08.0 Frame floor systems based on drawing and specification requirements.
- 09.0 Frame walls and ceilings based on drawing and specification requirements.
- 10.0 Frame a roof based on drawing and specification requirements.
- 11.0 Analyze construction components, materials, hardware and characteristics.
- 12.0 Demonstrate masonry skills.
- 13.0 Erect, plumb and brace a simple concrete form with reinforcement.
- 14.0 Place concrete.
- 15.0 Lay masonry units.
- 16.0 Demonstrate science knowledge and skills.
- 17.0 Create construction documents, contract documents and specifications.
- 18.0 Select the appropriate heavy equipment for a given task.
- 19.0 Identify local, state and federal codes and regulations.
- 20.0 Perform site preparation and maintenance.
- 21.0 Estimate project costs and schedule construction activities for a specific job.
- 22.0 Investigate sustainability issues related to the design, construction and maintenance of the built environment.
- 23.0 Install roofing materials.
- 24.0 Install exterior finishes.
- 25.0 Explain the importance of employability and entrepreneurship skills.
- 26.0 Demonstrate interior carpentry skill.
- 27.0 Install cabinets.
- 28.0 Prepare and apply finishes to surfaces.
- 29.0 Build stairs.
- 30.0 Troubleshoot, repair and install plumbing systems.
- 31.0 Demonstrate knowledge of drain, waste and vent (DWV) systems.
- 32.0 Measure, cut and join plastic piping.
- 33.0 Properly measure, ream, cut and join copper piping.
- 34.0 Troubleshoot, repair and install electrical systems.
- 35.0 Demonstrate electrical safety.
- 36.0 Demonstrate a basic understanding of the Heating, Ventilation and Air-Cooling (HVAC) profession.
- 37.0 Maintain, repair and install Heating, Ventilation and Air-Cooling (HVAC) systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: **Building Construction Technologies I460401**

Occu	se Number: BCV0400 pational Completion Point: A ng Construction Helper – 450 Hours – SOC Code 49-9071
01.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	01.01 Comply with all applicable Occupational Safety and Health Administration (OSHA) rules and regulations.
	01.02 Identify and locate the Material Safety Data Sheets (MSDS) and follow the procedures as necessary.
	01.03 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
	01.04 Identify and use safety equipment.
	01.05 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	01.06 Explain emergency procedures to follow in response to workplace accidents.
	01.07 Create a disaster and/or emergency response plan.
02.0	Investigate the construction industry and explore related occupationsThe student will be able to:
	02.01 Describe the development of construction technology, its impact on the built environment and the impact of growth on the construction industry.
	02.02 Describe the benefits of the construction industry on health and safety, communication, transportation and the economy.
	02.03 Demonstrate an understanding of the relationship between construction and the environment.
	02.04 Describe the role of trade unions in the construction industry.
	02.05 Demonstrate an understanding of apprenticeship.
	02.06 Identify the different classifications of construction projects.
	02.07 Define the roles and responsibilities of the general contractor, specialty contractor, construction management and design build firms.
	02.08 Identify construction trade occupations and the roles and responsibilities of each craft.

	02.09 Identify construction management occupations and the roles and responsibilities of each.
	02.10 Identify design and engineering occupations and the roles and responsibilities of each.
	02.11 Demonstrate an understanding of the relationship between construction and the economy.
	02.12 Describe the process of applying for building permits and variances.
	02.13 Demonstrate an understanding of zoning requirements.
03.0	Select and use basic hand toolsThe student will be able to:
	03.01 Use a claw hammer to drive and pull out nails.
	03.02 Use handsaws to cut boards.
	03.03 Use screwdrivers to drive in screws.
	03.04 Drill holes with hand-powered drills.
	03.05 Select and use various types of:
	a. Wrenches
	b. Pipe wrenches and plumbing tools
	c. Chisels
	d. Staple guns
	e. Wood planes
	f. Woodworking files
	g. Spirit levels
	h. Socket wrench sets
	i. Hand or block sanders
	j. Carpenters' squares
04.0	Select and use power tools and describe their proper operationThe student will be able to:
	04.01 Identify power tools, including:

_	
	a. Sanders
	b. Drills
	c. Screwdrivers
	d. Hand-held saws
	e. Reciprocating saws
	f. Radial-arm saws
	g. Table saws
	h. Drill presses
	i. Band saws
	j. Miter saws
	k. Planes
	I. Electric routers
	04.02 Describe the proper operation of power tools and equipment.
05.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	05.01 Solve job-related problems by adding, subtracting, multiplying and dividing numbers, using fractions, decimals and whole numbers.
	05.02 Change numbers to percentages.
	05.03 Demonstrate knowledge of arithmetic operations.
	05.04 Read a ruler and a tape measure.
	05.05 Compute feet, inches and yards.
	05.06 Change hours and minutes to decimals, fractions and mixed numbers.
	05.07 Construct charts/tables/graphs using functions and data.
	05.08 Analyze and apply data and measurements to solve problems and interpret documents.
	05.09 Determine ratios and proportions.

	05.10 Convert measurements from the English to the metric system and from the metric to the English system.
	05.11 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	05.12 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
06.0	Demonstrate carpentry skillsThe student will be able to:
	06.01 Construct various types of concrete forms.
	06.02 Describe in-beds used in concrete formwork.
	06.03 Identify appropriate form stripping and handling techniques.
	06.04 Layout and install framing members for a structure.
	06.05 Demonstrate the ability to dry in a structure.
07.0	Read and interpret construction drawingsThe student will be able to:
	07.01 Identify basic construction drawing terms, components and symbols.
	07.02 Locate sections, elevations and details to their location on the plan view.
	07.03 Use drawing dimensions to layout a construction project,
	07.04 Interpret and use architectural scales.
08.0	Frame floor systems based on drawing and specification requirementsThe student will be able to:
	08.01 Identify floor and sill framing and support members.
	08.02 Name the methods used to fasten sills to the foundation.
	08.03 Select the proper girder/beam and joist size from a list, given specific floor load and span data,
	08.04 List and recognize different types of floor joists.
	08.05 List and recognize different types of bridging.
	08.06 List and recognize different types of flooring materials.
	08.07 Explain the purposes of subflooring and underlayment.
	08.08 Match selected fasteners used in floor framing to their correct uses.

	08.09 Estimate the amount of material needed to frame a floor assembly.
	08.10 Demonstrate the ability to:
	a. Lay out and construct a floor assembly
	b. Install bridging
	c. Install joists for a cantilever floor
	d. Install a subfloor using butt-joint plywood/OSB panels
	e. Install a single floor system using tongue-and-groove plywood/OSB panels
09.0	Frame walls and ceilings based on drawing and specification requirementsThe student will be able to:
	09.01 Identify the components of a wall and ceiling layout.
	09.02 Describe the procedure for laying out a wood frame wall, including plates, corner posts, door and window openings, partitions, bracing and fire stops.
	09.03 Describe the correct procedure for assembling and erecting an exterior wall.
	09.04 Identify the common materials and methods used for installing sheathing on walls.
	09.05 Lay out, assemble, erect and brace exterior walls for a frame building.
	09.06 Describe wall framing techniques used in masonry construction.
	09.07 Explain the use of metal studs in wall framing.
	09.08 Describe the correct procedure for laying out ceiling joists.
	09.09 Cut and install ceiling joists on a wood frame building.
	09.10 Estimate the materials required to frame walls and ceilings.
10.0	Frame a roof based on drawing and specification requirementsThe student will be able to:
	10.01 Understand the terms associated with roof framing.
	10.02 Identify the roof framing members used in gable and hip roofs.
	10.03 Identify the methods used to calculate the length of a rafter.
	10.04 Identify the various types of trusses used in roof framing.

	10.05 Use a rafter framing square, speed square and calculator in laying out a roof.
	10.06 Identify various types of sheathing used in roof construction.
	10.07 Frame a gable roof with vent openings.
	10.08 Frame a roof opening.
	10.09 Erect a gable roof using trusses.
	10.10 Estimate the materials used in framing and sheathing a roof.
11.0	Analyze construction components, materials, hardware and characteristicsThe student will be able to:
	11.01 Identify the components of various kinds of structures, including:
	a. Slabs and foundations
	b. Interior walls
	c. Exterior walls
	d. Roofs
	e. Flooring systems
	11.02 Identify the types of wall sections.
	11.03 Identify the types and installation procedures of:
	a. Roof sheathing
	b. Wall sheathing
	c. Floor sheathing
	11.04 Identify various roof supports.
12.0	Demonstrate masonry skillsThe student will be able to:
	12.01 Select the tools and equipment used for mixing mortar.
	12.02 Describe the factors that affect the consistency of mortar.
	12.03 Identify the common ratios (M, N, S and O) of mortar mixtures.
· · · · · · · · · · · · · · · · · · ·	

	12.04 Identify pointing tools and strike mortar joints.
	12.05 Repoint old work.
	12.06 Prepare a work area, protecting adjacent areas.
	12.07 Apply mortar.
	12.08 Identify the methods of putting up the line.
	12.09 Identify the types of trowels.
	12.10 Identify various types of caulking and application.
	12.11 Describe procedures for stucco application and repair.
	12.12 Mix various types of stucco.
	12.13 Mix various types of concrete, considering application and Pounds per Square Inch (PSI) strength.
	12.14 Identify and select concrete tools.
	12.15 Demonstrate procedures for concrete repair and installation.
	12.16 Identify and select cleaning materials and equipment.
	12.17 Demonstrate safe and proper procedures for cleaning equipment, materials, work areas and worker.
13.0	Erect, plumb and brace a simple concrete form with reinforcementThe student will be able to:
	13.01 Identify the properties of cement.
	13.02 Describe the composition of concrete.
	13.03 Perform volume estimates for concrete quantity requirements.
	13.04 Identify types of concrete reinforcement materials and describe their uses.
	13.05 Identify various types of footings and explain their uses.
	13.06 Identify the parts of various types of forms.
	13.07 Explain the safety procedures associated with the construction and use of concrete forms.
14.0	Place concreteThe student will be able to:

	14.01 Identify equipment used to transport and place concrete.
	14.02 Describe the factors that contribute to the quality of concrete placement.
	14.03 Demonstrate the correct methods for placing and consolidating concrete into forms.
	14.04 Demonstrate how to use a screed to strike off and level concrete to the proper grade in a form.
	14.05 Demonstrate how to use tools for placing, floating and finishing concrete.
	14.06 Determine when conditions permit the concrete finishing operation to start.
	14.07 Name the factors that affect the curing of concrete and describe the methods used to achieve proper curing.
15.0	Lay masonry unitsThe student will be able to:
	15.01 Describe the most common types of masonry units.
	15.02 Describe and demonstrate how to set up a wall.
	15.03 Lay a dry bond.
	15.04 Spread and furrow a bed joint and butter masonry units.
	15.05 Describe the different types of masonry bonds.
	15.06 Cut brick and block accurately.
16.0	Demonstrate science knowledge and skillsThe student will be able to:
	16.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.
	16.02 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	16.03 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.
	16.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials, and demonstrate knowledge of the proper precautions required for handling such materials.
	16.05 Explain pressure measurement in terms of PSI and inches of mercury.
	16.06 Explain and demonstrate the use of electrical-system testing devices.
17.0	Create construction documents, contract documents and specificationsThe student will be able to:
	17.01 Explain the purpose and components of contract documents and specifications.

	17.02 Design and draw plans, elevations, sections and details.
	17.03 Explain the relationships of the elements of contract documents.
	17.04 Create lists of materials and specifications.
	17.05 Use architectural and engineering scales.
	17.06 Compare various computer-aided drafting (CAD) and building information modeling (BIM) products and how they can be used by designers and construction project managers.
	17.07 Prepare estimates using estimating software.
	17.08 Prepare schedules using bar charts and scheduling software.
18.0	Select the appropriate heavy equipment for a given taskThe student will be able to:
	18.01 Identify different types and uses of heavy equipment.
	18.02 Describe the operations of different types of heavy equipment.
19.0	Identify local, state and federal codes and regulationsThe student will be able to:
	19.01 Identify and locate local, state and federal codes, regulations and standards.
	19.02 Identify local, state and federal regulatory agencies.
20.0	Perform site preparation and maintenanceThe student will be able to:
	20.01 Determine zoning requirements.
	20.02 Assess suitability for project.
	20.03 Determine boundary lines.
	20.04 Determine elevations.
	20.05 Determine need to add, remove, or relocate fill.
	20.06 Layout and mark building location and elevation.
	20.07 Clean and maintain the site.
21.0	Estimate project costs and schedule construction activities for a specific jobThe student will be able to:
	21.01 Calculate material quantities and purchase cost (including sales tax).

	21.02 Calculate labor costs including work hours, duration and cost of workers.
	21.03 Explain and compute federal, state and local taxes.
	21.04 Schedule various construction activities.
	21.05 Determine amount to be charged to the client at various intervals throughout the project.
22.0	Investigate sustainability issues related to the design, construction and maintenance of the built environmentThe student will be able to:
	22.01 Describe the impact of the construction industry on the natural environment.
	22.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	22.03 Recommend sustainable alternatives to conventional construction practices.
	22.04 Identify specific practices that can lessen adverse impacts on the environment.
	22.05 Investigate building assessment tools such as Leadership in Energy and Environmental Design (LEED).

Occu	Course Number: BCV0401 Occupational Completion Point: Building Construction Technician – 300 Hours – SOC Code 49-9071	
23.0	Install roofing materialsThe student will be able to:	
	23.01 Identify and explain different types of roofing systems and applications.	
	23.02 Install various types of shingles.	
	23.03 Install roof gutters and downspouts.	
	23.04 Seal pipes and vents on roofs.	
	23.05 Identify installation procedures for:	
	a. Sheet metal roofs	
	b. Built-up roofs	
	c. Roof flashing	
24.0	Install exterior finishesThe student will be able to:	
	24.01 Describe the purpose of wall insulation and flashing.	

	24.02 Install common cornices.
	24.03 Demonstrate lap and panel siding estimating methods.
	24.04 Describe the types and applications of various types of siding (e.g. wood, fiber-cement, vinyl, metal, stucco, masonry, etc.).
	24.05 Install siding.
25.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	25.01 Identify and demonstrate positive work behaviors needed to be employable.
	25.02 Develop personal career plan that includes goals, objectives and strategies.
	25.03 Examine licensing, certification and industry credentialing requirements.
	25.04 Maintain a career portfolio to document knowledge, skills and experience.
	25.05 Evaluate and compare employment opportunities that match career goals.
	25.06 Identify and exhibit traits for retaining employment.
	25.07 Identify opportunities and research requirements for career advancement.
	25.08 Research the benefits of ongoing professional development.
	25.09 Examine and describe entrepreneurship opportunities as a career planning option.
26.0	Demonstrate interior carpentry skillThe student will be able to:
	26.01 Install interior finish materials.
	26.02 Install exterior and interior doors.
	26.03 Install windows.
	26.04 Install interior trim.
	26.05 Measure the size of a room.
	26.06 Install acoustical ceiling systems.
	26.07 Identify the types of insulation.
27.0	Install cabinetsThe student will be able to:

27.01 Identify the parts of a cabinet.
27.02 Identify the types of cabinet-door installation.
27.03 Identify the types of cabinet hardware.
27.04 Install cabinet hardware.
27.05 Describe cabinet-installation procedures.
Prepare and apply finishes to surfacesThe student will be able to:
28.01 Erect an extension ladder and a scaffold.
28.02 Prepare the surfaces.
28.03 Apply finished coatings to surfaces with a roller, brush and sprayer.
Build stairsThe student will be able to:
29.01 Identify various types and parts of stairs.
29.02 Identify materials used in the construction of stairs.
29.03 Interpret construction drawings of stairs.
29.04 Calculate the total rise, the number and size of the risers and treads required for a stairway.
29.05 Lay out and cut stringers, risers and treads.
e Number: BCV0402 pational Completion Point: B ng Construction Technician – 300 Hours – SOC Code 49-9071
Troubleshoot, repair and install plumbing systemsThe student will be able to:
30.01 Troubleshoot, repair and install bathroom fixtures and hardware, such as:
a. Lavatory
b. Water closet
c. Urinal
d. Shower
e. Bathtub
)

	f Trans
	f. Traps
	g. Drain, Waste and Vent (DWV) system
	30.02 Troubleshoot, repair and install kitchen fixtures and hardware, such as sinks, garbage disposals, faucets and hot-water-heater tanks.
	30.03 Identify and install various pipes and tubing used in the plumbing trade.
	30.04 Test and inspect plumbing systems.
31.0	Demonstrate knowledge of drain, waste and vent (DWV) systems The student will be able to:
	31.01 Explain how waste moves from a fixture through the drain system to the environment.
	31.02 Identify the major components of a drainage system and describe their functions.
	31.03 Identify the different types of traps and their components, explain the importance of traps and identify the ways that traps can lose their seals.
	31.04 Identify the various types of drain, waste and vent (DWV) fittings and describe their applications.
	31.05 Identify significant code and health issues, violations and consequences related to DWV systems.
32.0	Measure, cut and join plastic pipingThe student will be able to:
	32.01 Identify types of materials and schedules of plastic piping.
	32.02 Identify proper and improper applications of plastic piping.
	32.03 Identify types of fittings and valves used with plastic piping.
	32.04 Identify and determine the kinds of hangers and supports needed for plastic piping.
	32.05 Identify the various techniques used in hanging and supporting plastic piping.
	32.06 Explain proper procedures for the handling, storage and protection of plastic pipes.
33.0	Properly measure, ream, cut and join copper pipingThe student will be able to:
	33.01 Identify the types of materials and schedules used with copper piping.
	33.02 Identify the material properties, storage and handling requirements of copper piping.
	33.03 Identify the types of fittings and valves used with copper piping.
	33.04 Identify the techniques used in hanging and supporting copper piping.

	33.05 Identify the hazards and safety precautions associated with copper piping.
34.0	Troubleshoot, repair and install electrical systemsThe student will be able to:
	34.01 Explain basic electrical theory.
	34.02 Explain branch circuit systems.
	34.03 Calculate and select service-entrance equipment.
	34.04 Identify and explain Ground Fault Circuit Interrupter (GFCI) circuitry.
	34.05 Troubleshoot electrical systems, using testing and metering devices.
	34.06 Install electrical:
	a. Outlets
	b. Switches
	c. Light fixtures
	34.07 Install and replace breakers and fuses.
	34.08 Identify types of wiring raceways.
	34.09 Wire a blower motor into an electrical supply.
	34.10 Test and inspect electrical systems.
	34.11 Explain basic motor-control operation.
	34.12 Describe rules for installing electric space heating and HVAC requirements.
35.0	Demonstrate electrical safetyThe student will be able to:
	35.01 Identify electrical hazards and how to avoid or minimize them in the workplace.
	35.02 Explain safety issues concerning lockout/tag-out procedures, confined space entry, respiratory protection and fall protection systems.
	Develop a task plan and hazard assessment for a given task and select the appropriate personal protective equipment (PPE) and work methods.
	35.04 Explain the Role of the National Electric Code and describe how to determine electric service requirements.
36.0	Demonstrate a basic understanding of the Heating, Ventilation and Air-Cooling (HVAC) professionThe student will be able to:

	6.01 Identify careers in the HVAC industry and the educational pathways (including apprenticeships) available.
	6.02 Explain what the 'Clean Air Act' means to the HVAC profession.
	6.03 Describe regulatory codes relevant to the HVAC industry.
	6.04 Read and interpret HVAC plans and schedules.
37.0	aintain, repair and install Heating, Ventilation and Air-Cooling (HVAC) systemsThe student will be able to:
	7.01 Explain heating and cooling principles and code requirements.
	7.02 Describe methods of calculating heating and cooling loads.
	7.03 Explain the operation and types of the following heating methods: water, steam, forced air, gas, electrical components and heat pumps.
	7.04 Troubleshoot and repair a circulation pump, zone valves, burners, pilot lights and thermocouples in a heating system.
	7.05 Identify refrigerants.
	7.06 Determine a refrigerant level.
	7.07 Describe the proper procedures for descaling air-conditioner units.
	7.08 Troubleshoot, repair and replace air filters, drive belts and drain systems.
	7.09 Troubleshoot, repair and replace control systems.
	7.10 Explain the computer monitoring system associated with Heating, Ventilation and Air-Conditioning (HVAC) control systems and air-quality management.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Painting and Decorating Program Type: Career Preparatory

Career Cluster: Architecture & Construction

	PSAV
Program Number	1460408
CIP Number	0646040800
Grade Level	30, 31
Standard Length	600 Hours
Teacher Certification	TEC CONSTR ¶ 7 ¶ G BLDG CONST ¶ 7 ¶ G PAINTING 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-2141 - Painters, Construction and Maintenance
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment as painters.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to safe and efficient work practices, materials and cost estimates, surface preparation, paint mixing and matching, application procedures, special effects, wall covering application, blueprint reading, ladder and scaffold erection and use, selection, application and care of materials, use of hand and power tools, and use of current industry standards, practices and techniques.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of one occupational completion point.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
	BCV0164	Painter and Paper Hanger 1	300 Hours	
Α	BCV0165	Painter and Paper Hanger 2	300 Hours	47-2141

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the ability to work safely.
- 02.0 Select, use and care for tools and equipment, scaffolding and ladders.
- 03.0 Demonstrate proficiency in preparation of surfaces.
- 04.0 Demonstrate the use of the materials used in painting.
- 05.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 06.0 Use chemical stripping and cleaning solutions.
- 07.0 Estimate cost and provide quotations.
- 08.0 Demonstrate mathematics knowledge and skills.
- 09.0 Demonstrate proper application of materials used in painting using brushes, rollers and sprayers.
- 10.0 Mix colors and match samples.
- 11.0 Demonstrate science knowledge and skills.
- 12.0 Apply stains, varnishes, lacquers and acrylics.
- 13.0 Advise on suitability of different materials.
- 14.0 Fit and apply wallpaper.
- 15.0 Explain the importance of employability and entrepreneurship skills.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Painting and Decorating 1460408

Occu	se Number: BCV0164 pational Completion Point: er and Paper Hanger 1 – 300 Hours – SOC Code 47-2141
01.0	Demonstrate the ability to work safelyThe student will be able to:
	01.01 Explain the hazards of working above ground and appropriate work habits.
	01.02 Explain and demonstrate safe use of hand and power tools.
02.0	Select, use and care for tools and equipment, scaffolding and laddersThe student will be able to:
	02.01 Erect a scaffold.
	02.02 Demonstrate proper use of folding and extension ladders.
	02.03 Explain proper storage of flammable materials.
	02.04 Explain and demonstrate proper cleaning and storage of tools and equipment.
03.0	Demonstrate proficiency in preparation of surfacesThe student will be able to:
	03.01 Prepare new wood surfaces for coating with paint.
	03.02 Remove old wall coverings.
	03.03 Prepare and seal walls for wall coverings.
	03.04 Prime plaster and sheetrock surfaces for painting.
	03.05 Prepare metal surfaces for painting.
	03.06 Use sandblasting equipment to remove old surface coatings.
	03.07 Spackle/patch sheetrock and plaster surfaces.
04.0	Demonstrate the use of the materials used in paintingThe student will be able to:

_	
	04.01 Explain the criteria for selection and use of water and chemical based coatings.
	04.02 Select brushes, roller covers and spray equipment for coatings to be used.
05.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe students will be able to:
	05.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	05.02 Explain emergency procedures to follow in response to workplace accidents.
	05.03 Create a disaster and/or emergency response plan.
	05.04 Demonstrate knowledge of the "Right-To-Know Law" as recorded in (29 CFR-1910.1200).
06.0	Use chemical stripping and cleaning solutionsThe student will be able to:
	06.01 Remove a finish from a painted surface using a chemical solution.
	06.02 Use prepared solutions to clean a surface.
	06.03 Apply rust inhibitors to metal surfaces.
07.0	Estimate cost and provide quotationsThe student will be able to:
	07.01 Compute number of rolls of wallpaper required for a specified job.
	07.02 Compute amount of paint for a specified job.
08.0	Demonstrate mathematics knowledge and skillsThe students will be able to:
	08.01 Demonstrate knowledge of arithmetic operations.
	08.02 Analyze and apply data and measurements to solve problems and interpret documents.
	08.03 Construct charts/tables/graphs using functions and data.
	08.04 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	08.05 Measure tolerance(s) on horizontal and vertical surfaces using millimeters, centimeters, feet and inches.
	08.06 Add, subtract, multiply and divide using fractions, decimals and whole numbers.
	08.07 Determine the correct purchase price, to include sales tax for a materials list containing a minimum of six items.
	08.08 Demonstrate an understanding of federal, state and local taxes and their computation.

Cours	se Number: BCV0165		
Occu	Occupational Completion Point: A		
09.0	er and Paper Hanger – 300 Hours – SOC Code 47-2141 Demonstrate proper application of materials used in painting using brushes, rollers and sprayersThe student will be able to:		
	09.01 Paint a surface using a brush.		
	09.02 Paint trim with a brush.		
	09.03 Paint a surface with a roller.		
	09.04 Spray paint a surface.		
10.0	Mix colors and match samplesThe student will be able to:		
	10.01 Identify fundamental colors.		
	10.02 Explain the process of mixing to arrive at custom colors or tints.		
	10.03 Mix paint to match a given sample.		
11.0	Demonstrate science knowledge and skillsThe student will be able to:		
	11.01 Understand molecular action as a result of temperature extremes, chemical reaction and moisture content.		
	11.02 Discuss the role of creativity in constructing scientific questions, methods and explanations.		
	11.03 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.		
	11.04 Identify health-related problems, which may result from exposure to work related chemicals and hazardous materials, and know the proper precautions required for handling such materials.		
	11.05 Understand pressure measurement in terms of PSI, inches of mercury and KPA.		
12.0	Apply stains, varnishes, lacquers and acrylicsThe student will be able to:		
	12.01 Stain woodwork to a uniform color.		
	12.02 Stain wood to match a sample.		
	12.03 Seal wood for finishing.		
	12.04 Apply a varnish finish to a prepared wood surface.		
	12.04 Apply a variish linish to a prepared wood surface.		

	12.05 Apply an oil finish to a prepared wood surface.
	12.06 Apply a lacquer finish to a prepared wood surface.
	12.07 Apply an acrylic finish to a prepared wood surface.
13.0	Advise on suitability of different materialsThe student will be able to:
	13.01 Select a suitable type of wall covering based on surface of wall and environment.
	13.02 Select a suitable type of coating based on surface, anticipated wear and environment.
14.0	Fit and apply wallpaperThe student will be able to:
	14.01 Select and mix paste (for non-pre-pasted) wall coverings.
	14.02 Apply grass cloth wall covering.
	14.03 Apply paper wall covering.
	14.04 Apply foil wall covering.
	14.05 Apply Mylar wall covering.
	14.06 Apply cloth-backed wall covering.
	14.07 Match a pattern to a corner.
	14.08 Fit wall paper around a window and door.
15.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:
	15.01 Identify and demonstrate positive work behaviors needed to be employable.
	15.02 Develop personal career plan that includes goals, objectives and strategies.
	15.03 Examine licensing, certification and industry credentialing requirements.
	15.04 Maintain a career portfolio to document knowledge, skills and experience.
	15.05 Evaluate and compare employment opportunities that match career goals.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

<u>Purpose</u>

The purpose of the programs in this cluster is to prepare students for employment or advanced training in a variety of pipe occupations.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to reading construction documents, understanding building codes in the pipe trades, plumbing pipe-cutting-and-joining skills and plumbing layout and installation.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
Α	BCV0508	Helper, Plumber, Pipefitter	360 Hours	47-3015
В	BCV0540	Residential Plumber	240 Hours	47-2152
С	BCV0562	Commercial Plumber	240 Hours	47-2152
D	BCV0592	Plumber	120 Hours	47-2152

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Describe career and training opportunities in the pipe-trade industry.
- 02.0 Demonstrate a basic knowledge of the pipe-trade industry.
- 03.0 Identify the use and care of basic tools in the pipe-trade industry.
- 04.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 05.0 Demonstrate mathematics knowledge and skills.
- 06.0 Use oral and written communication skills in creating, expressing and interpreting information and ideas.
- 07.0 Read and interpret construction documents.
- 08.0 Read and interpret basic pipe-trade codes.
- 09.0 Demonstrate knowledge of basic plumbing skills.
- 10.0 Cut and join pipes.
- 11.0 Demonstrate knowledge of plumbing codes.
- 12.0 Read and interpret construction documents and specifications.
- 13.0 Lay out and coordinate a job.
- 14.0 Install first rough (underground).
- 15.0 Install second rough (first floor and above).
- 16.0 Trim out plumbing.
- 17.0 Explain the importance of employability and entrepreneurship skills.
- 18.0 Install hot-water-heating and circulating-systems.
- 19.0 Install interceptors and separators.
- 20.0 Install a storm drainage system.
- 21.0 Explain the principles of backflow cross and connection control.
- 22.0 Explain the process of installing a medical gas system. (optional)
- 23.0 Explain how a Liquid Propane Gas (LPG) system works.
- 24.0 Repair, service and maintain plumbing systems.
- 25.0 Explain how to connect residential plumbing to a municipal sewer line. (optional)

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Plumbing Technology 1460513

Occu	se Number: BCV0508 pational Completion Point: A per Helper – 360 Hours – SOC Code 47-3015
01.0	Describe career and training opportunities in the pipe-trade industryThe student will be able to:
	01.01 Obtain information on current and future job opportunities in the pipe-trade industry and discuss its trends.
	01.02 Describe career ladders (entry, intermediate and technical-level careers) in each of the pipe-trade-industry programs and preparation requirements.
	01.03 Describe advanced-training opportunities, including apprenticeship programs in each of the pipe-trade-industry programs.
02.0	Demonstrate a basic knowledge of the pipe-trade industryThe student will be able to:
	02.01 Discuss the history of pipe trades.
	02.02 Identify pipes, fittings, materials and equipment related to the pipe trades.
	02.03 Identify fixtures and appliances for plumbing, fire-sprinkler fitting, pipe fitting and gas fitting jobs.
	02.04 Define the terms used in the pipe-trade industry.
03.0	Identify the use and care of basic tools in the pipe-trade industryThe student will be able to:
	03.01 Identify and use the basic tools, equipment and materials of the pipe-trade industry.
	03.02 Demonstrate the procedures/techniques for the selection, use, care and storage of tools and equipment.
	03.03 Compare the various tools used for plumbing and pipe fitting.
	03.04 Identify tools and equipment and the safety hazards associated with them.
04.0	Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe student will be able to:
	04.01 Explain the importance of following safety precautions when working in the pipe-trade industry.
	04.02 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.

	04.03 Observe safety precautions.
	04.04 Identify safe working practices and safe working conditions in the pipe-trade industry.
	04.05 Explain emergency procedures to follow in response to workplace accidents.
	04.06 Create a disaster and/or emergency response plan.
	04.07 Demonstrate Cardiopulmonary Resuscitation (CPR) techniques.
	04.08 Demonstrate an understanding of when and how to use first aid.
	04.09 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)
05.0	Demonstrate mathematics knowledge and skillsThe students will be able to:
	05.01 Solve problems for volume, weight, area, circumference and perimeter measurements for rectangles, squares and cylinders.
	05.02 Measure tolerances on horizontal and vertical surfaces, using millimeters, centimeters, feet and inches.
	05.03 Analyze and apply data and measurements to solve problems and interpret documents.
	05.04 Solve pipe-trade-related basic math problems, such as piping offset and metric conversion.
	05.05 Calculate material length and bend pipe by hand or with a pipe-bending machine and tools.
	05.06 Construct charts/tables/graphs using functions and data.
06.0	Demonstrate science knowledge and skillsThe student will be able to:
	06.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	06.02 Describe molecular action as a result of temperature and pressure extremes, chemical reaction and moisture content.
	06.03 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.
	06.04 Identify health-related problems that may result from exposure to work-related chemicals and hazardous materials and describe the
	proper precautions for handling such materials. 06.05 Discuss environmental concerns related to hazardous waste and chemical disposal.
	06.06 Explain pressure measurement in terms of Pounds per Square Inch (PSI), inches of mercury and KPA.
	06.07 Explain how to use alternating-current meters and instruments in the pipe trades.
07.0	Read and interpret construction documentsThe student will be able to:
07.0	The district of the distriction and districtio

	07.01 Read and interpret measuring devices.
	07.02 Draw and interpret basic isometric sketches.
	07.03 Identify the basic symbols used in the pipe trades.
	07.04 Read and interpret manufacturers' schematics and specifications.
08.0	Read and interpret basic pipe-trade codesThe student will be able to:
	08.01 Describe the importance of following the local, state and national codes for plumbing, gas fitting and/or pipe fitting.
	08.02 Read and interpret current standards and codes for plumbing, gas fitting and/or pipe fitting.
	08.03 Read and interpret basic building codes in the pipe-trade industry.

Occu	se Number: BCV0562 pational Completion Point: B ential Plumber 240 Hours – SOC Code 47-2152
09.0	Demonstrate knowledge of basic plumbing skillsThe student will be able to:
	09.01 Explain the basic theory and principles of plumbing.
	09.02 Identify:
	a. Pipe and fitting
	b. Pipe-joining methods
	c. Plumbing fixtures, appliances, materials and equipment
	d. Valves by type, size, materials and application
10.0	Cut and join pipesThe student will be able to:
	10.01 Join different types of pipes (including PVC, galvanized, steel, plastic, copper and cast-iron pipes) according to plumbing codes and specifications using various methods including brazing, clamping, compression, threading, flange, flaring, gasket joint, gluing, soldering and welding.
	10.02 Measure, mark and cut different types of pipes using various pipe cutters including one- and four-wheel steel pipe cutters, hack saw, tubing cutter and cutting torch.
	10.03 Thread a steel pipe with a power-driven vise stand or a pipe-threading machine.
	10.04 Demonstrate proficiency in using the tools, following safety practices and procedures.

11.0	Demonstrate knowledge of plumbing codesThe student will be able to:
	11.01 Describe and explain the purpose of plumbing codes.
	11.02 Apply the basic theory and principles of plumbing in relation to the codes.
	11.03 Read and locate information in the applicable plumbing codes.
	11.04 Define and explain the terms used in the plumbing codes.
	11.05 Explain why the code may supersede the manufacturer's specifications.
12.0	Read and interpret construction documents and specificationsThe student will be able to:
12.0	12.01 Recognize and identify plumbing symbols.
	12.02 Identify basic plumbing systems from the blueprint.
	12.03 From the blueprints and specifications, identify the plumbing fixtures and materials required for the plumbing job.
	12.04 Relate the blueprint to all applicable (local, state and federal) plumbing codes.
	12.05 Cross-reference all working drawings to determine the location and elevation of the piping system and duct work.
	12.06 Demonstrate trade-related computer skills for blueprints and specifications.
13.0	Lay out and coordinate a jobThe student will be able to:
	13.01 Identify specifications.
	13.02 Make a list of materials required to lay out a job.
	13.03 Determine the work aids required and the sequence of installations, according to building plans, specifications and working drawings.
14.0	Install the first rough (underground)The student will be able to:
	14.01 Lay out a job on site underground and establish a starting point according to codes and specifications, coordinating with other crafts.
	14.02 Install building drain, waste, vent, storm drainage and water-heating-and-circulating systems.
	14.03 Install distribution systems.
	14.04 Install a temporary water service with backflow prevention.
	14.05 Test and inspect the first rough.

15.0	Install the second rough (first floor and above)The student will be able to:
13.0	
	15.01 Lay out a job on site for the first floor and above according to codes and specifications, coordinating with other crafts.
	15.02 Cut openings in walls and floors to accommodate the pipe and fittings.
	15.03 Install hangers and supports.
	15.04 Install building-drain, waste vent, storm-drainage; and water-heating-and-circulating systems, including hot-tubs and spas.
	15.05 Install distribution systems.
	15.06 Test and inspect the second rough.
16.0	Trim out plumbingThe student will be able to:
	16.01 Distribute and place fixtures, appliances and equipment, including safety devices and control.
	16.02 Trim out and install job-site fixtures, appliances and equipment including closet flanges, supply stops on water pipes, lavatory, water closets, showers, kitchen sinks, garbage disposal, ice makers, dishwashers and water heaters.
	16.03 Install backflow assemblies as required.
	16.04 Test and inspect the final installation.
17.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:
	17.01 Identify and demonstrate positive work behaviors needed to be employable.
	17.02 Develop personal career plan that includes goals, objectives and strategies.
	17.03 Examine licensing, certification and industry credentialing requirements.
	17.04 Maintain a career portfolio to document knowledge, skills and experience.
	17.05 Evaluate and compare employment opportunities that match career goals.
	17.06 Identify and exhibit traits for retaining employment.
	17.07 Identify opportunities and research requirements for career advancement.
	17.08 Research the benefits of ongoing professional development.
	17.09 Examine and describe entrepreneurship opportunities as a career planning option.

Occu	se Number: BCV0562 pational Completion Point: C nercial Plumber 240 Hours – SOC Code 47-2152
18.0	Install hot-water-heating and circulating systemsThe student will be able to:
	18.01 Explain the basic theory of domestic hot-water-heating.
	18.02 Design, size and lay out a system.
	18.03 Identify the equipment and materials needed for the job in accordance with job specifications and plumbing codes.
	18.04 Test and inspect the system.
19.0	Install interceptors and separatorsThe student will be able to:
	19.01 Identify various types of interceptors and separators.
	19.02 Explain the theory and function of various interceptors and separators.
	19.03 Install and maintain lint and grease traps, gas and oil separators, sand and sediment interceptors.
20.0	Install a storm-drainage systemThe student will be able to:
	20.01 Explain the theory of roof drains, leaders and the storm-drainage system.
	20.02 Size and lay out a storm-drainage system.
	20.03 Identify the materials needed to install a storm-drainage system in accordance with job specifications and plumbing codes.
	20.04 Lay out a job on site according to job specifications and plumbing codes, coordinating with other trades.
	20.05 Illustrate roof drains, leaders and drainage systems.
	20.06 Test and inspect the systems.
21.0	Explain the principles of backflow and cross-connection controlThe student will be able to:
	21.01 Define backflow and cross-connection control.
	21.02 Describe the importance of backflow and cross-connection control to the health of the public.
	21.03 Identify the proper devices and assemblies for individual applications.
	21.04 Explain the "degree of hazard" principle and how it relates to the installation of devices and assemblies.

Cours	se Number: BCV0592
	pational Completion Point: D per 120 Hours – SOC Code 47-2152
22.0	Explain the process of installing a medical gas system (optional)The student will be able to:
	22.01 Explain the procedures for:
	a. Installing a medical gas system in a health-care facility according to applicable plumbing codes
	b. Connecting medical equipment, safety devices and controls
	c. Testing and inspecting medical gas systems to make sure there is no cross connection and the system is pure
23.0	Explain how a Liquid Propane Gas (LPG) system worksThe student will be able to:
	23.01 Identify materials required for LPG installation.
	23.02 Explain how to size and lay out a job on site according to plumbing codes and specifications codes.
	23.03 Install distribution systems, including equipment, safety devices and controls.
	23.04 Test and inspect the systems.
24.0	Repair, service and maintain plumbing systemsThe student will be able to:
	24.01 Troubleshoot and diagnose plumbing systems.
	24.02 Repair and replace water service and sanitary lines.
	24.03 Repair and replace water closets, ball cocks, flush valves, floats, lift rods, ball stoppers and trip levers.
	24.04 Repair leaks in traps and faucets.
	24.05 Repair and replace sink strainers.
	24.06 Repair and replace water heaters.
	24.07 Replace and repair fixture water-supply pipes.
	24.08 Reseal water closets to flanges.
	24.09 Test and inspect repaired systems.
	24.10 Clear obstructions from kitchen sink, water closet, bathtub, lavatory and sewer lines, using chemicals and tools.
25.0	Demonstrate how to connect residential plumbing to a municipal sewer line (optional)The student will be able to:

25.01	Describe who is allowed (according to municipal codes) to tap into a sewer line.
25.02	Excavate from the house drain to a sewer main.
25.03	Connect the house drain to the sewer main.
25.04	Test and inspect the system.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

<u>Purpose</u>

The purpose of the program is to prepare students for employment in a variety of industrial pipefitting occupations.

This program focuses on broad, transferable skills, stresses understanding of the pipe fitting industry, and demonstrates elements of the Pipe Fitting Trades industry; such as planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture & Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture & Construction career cluster.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of two occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

В	BCV0569	Industrial Pipefitter	300 Hours	47-2152

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply safety rules and procedures.
- 02.0 Apply proper use and care of hand tools.
- 03.0 Apply proper use and care of power tools.
- 04.0 Accomplish threaded pipe fabrications.
- 05.0 Apply proper use and care of ladders and scaffolds.
- 06.0 Apply proper use and care of motorized equipment.
- 07.0 Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 08.0 Identify and explain excavations.
- 09.0 Identify and explain underground pipe.
- 10.0 Identify and explain intermediate excavations.
- 11.0 Perform underground pipe installation.
- 12.0 Understand drawings and detail sheets.
- 13.0 Identify and explain piping systems.
- 14.0 Use pipefitter trade math.
- 15.0 Identify and explain socket weld pipe fabrication.
- 16.0 Identify and explain butt weld pipe fabrication.
- 17.0 Identify, select, use and maintain rigging.
- 18.0 Identify and use pipe hangers and supports.
- 19.0 Read advanced blue print.
- 20.0 Read, interpret pipefitting standards and specifications.
- 21.0 Use, explain, perform and calculate advanced trade math.
- 22.0 Identify, explain, and use motorized equipment.
- 23.0 Accomplish above ground pipe installation.
- 24.0 Identify and install valves.
- 25.0 Field route and accomplish vessel trim.
- 26.0 Identify, explain, select, install spring can supports.
- 27.0 Test piping systems and equipment.
- 28.0 Accomplish basic plumbing.
- 29.0 Plan work activities.
- 30.0 Accomplish advanced pipe fabrication.
- 31.0 Perform NDE testing.
- 32.0 Accomplish stress-relieving and aligning.
- 33.0 Identify and use steam traps.
- 34.0 Identify and use inline components.
- 35.0 Use and fabricate special piping.
- 36.0 Accomplish hot taps.
- 37.0 Maintain valves.

Program Title: PSAV Number: **Industrial Pipefitter**

I460514

Occu	se Number: BCV0568 pational Completion Point: A trial Pipefitter Helper – 300 Hours – SOC Code 47-2152
01.0	Apply safety rules and proceduresThe student will be able to:
	01.01 Practice shop safety rules and procedures.
	01.02 Practice personal safety rules and procedures.
	01.03 Practice fire safety rules and procedures.
	01.04 Practice electrical safety rules and procedures.
	01.05 Practice tool safety rules and procedures.
	01.06 Practice ladder and scaffolding safety rules and procedures.
	01.07 Practice maintaining a clean work and shop area.
	01.08 Perform tag lockout procedures
	01.09 Identify Occupational Safety and Health Administration (OSHA) requirements and procedures.
	01.10 Locate and use Materials Safety Data Sheets (MSDS).
02.0	Apply proper use and care of hand toolsThe student will be able to:
	02.01 Explain general hand tool safety.
	02.02 Use and care for pipefitter vises and stands.
	02.03 Use and care for pipe wrenches.
	02.04 Use and care for levels.
	02.05 Use and care for pipe fabrication tools.

	02.06 Use and care for pipe cutting tools.
	02.07 Use and care for benders and flaring tools.
03.0	Apply proper use and care of power toolsThe student will be able to:
	03.01 Explain and perform power tool safety.
	03.02 Cut pipe using a portable band saw.
	03.03 Identify and explain types of portable grinders.
	03.04 Use and care for portable grinders.
	03.05 Identify and explain pipe-threading machines.
	03.06 Use and care for pipe threading machines.
	03.07 Perform special threading applications.
	03.08 Identify and explain portable power drives.
	03.09 Operate portable power drives.
	03.10 Identify and explain types of power bevellers.
04.0	Accomplish threaded pipe fabricationThe student will be able to:
	04.01 Identify and explain the materials used in threaded systems.
	04.02 Identify and explain pipefittings.
	04.03 Read and interpret screwed fitting joint drawings.
	04.04 Identify and explain types of threads.
	04.05 Determine pipe lengths between fittings.
	04.06 Perform threaded pipe assembly techniques.
05.0	Apply proper use and care of ladders and scaffoldsThe student will be able to:
	05.01 Use and care for ladders.
	05.02 Use and care for tubular buck scaffolds.

	05.03 Use and care for pole scaffolds (OES).
	05.04 Use and care for rolling scaffolds.
06.0	Apply proper use and care of motorized equipmentThe student will be able to:
	06.01 Use and care for engine-driven generators.
	06.02 Use and care for portable air compressors.
	06.03 Identify and explain portable pumps.
	06.04 Identify and explain forklift trucks (OSHA).
	06.05 Identify and explain hydraulic cranes.
07.0	Demonstrate the importance of health, safety, and environmental management systems in organizations and their importance to organizational performance and regulatory complianceThe students will be able to:
	07.01 Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.
	07.02 Explain emergency procedures to follow in response to workplace accidents.
	07.03 Create a disaster and/or emergency response plan.
0.80	Identify and explain excavationsThe student will be able to:
	08.01 Explain properties of soil.
	08.02 Identify and explain types of soils.
	08.03 Explain excavation safety.
	08.04 Explain sloping requirements for different types of solid.
	08.05 Explain excavation support systems.
	08.06 Identify and explain bedding materials.
09.0	Identify and explain underground pipeThe student will be able to:
	09.01 Identify and explain the types of underground piping materials.
	09.02 Identify the size classifications of underground pipe.
	09.03 Identify and explain the use of underground pipefittings.

	09.04 Explain the joining methods for underground pipe.
	09.05 Explain the storage and handling requirements of underground pipe.
10.0	Identify and explain intermediate excavationsThe student will be able to:
	10.01 Identify and explain the use of shoring materials.
	10.02 Identify and explain the use of pre-manufactured support systems.
	10.03 Install a vertical shore to be used for shoring.
	10.04 Determine the overall fall of a sewer line.
	10.05 Determine and set the grade and elevation of a trench.
	10.06 Explain backfilling procedures.
11.0	Perform underground pipe installationThe student will be able to:
	11.01 Identify and explain underground pipe installation guidelines.
	11.02 Install cast iron pipe.
	11.03 Install ductile iron pipe.
	11.04 Install vitrified clay pipe.
	11.05 Install concrete pipe.
	11.06 Install carbon steel pipe.
	11.07 Install fiberglass pipe.
	11.08 Install thermoplastic pipe.
12.0	Use drawings and detail sheetsThe student will be able to:
	12.01 Identify and explain parts of drawings.
	12.02 Identify and explain types of drawings.
	12.03 Make field sketches.
13.0	Identify and explain piping systemsThe student will be able to:

	13.01 Identify and explain the types of piping systems.
	13.02 Identify piping systems according to color-coding.
	13.03 Explain thermal expansion.
	13.04 Explain types and applications of pipe insulation.
14.0	Use pipefitter trade mathThe student will be able to:
	14.01 Identify and explain the use of special measuring devices.
	14.02 Use tables of weights and measurements.
	14.03 Use ratios and proportions.
	14.04 Solve basic algebra problems.
	14.05 Solve area problems.
	14.06 Solve volume problems.
	14.07 Solve circumference problems.
	14.08 Solve right triangles.
15.0	Identify and explain socket weld pipe fabricationThe student will be able to:
	15.01 Identify and explain types of socket weld piping materials.
	15.02 Identify and explain socket weld fittings.
	15.03 Read and interpret socket weld piping drawings.
	15.04 Determine pipe lengths between socket weld fittings.
	15.05 Fabricate socket weld fittings to pipe.
16.0	Identify and explain butt weld pipe fabricationsThe student will be able to:
	16.01 Identify butt weld piping materials.
	16.02 Identify butt weld fittings.
	16.03 Read and interpret butt weld piping drawings.

	16.04 Set up oxyacetylene equipment.
	16.05 Cut plate steel using an oxyacetylene torch.
	16.06 Bevel plate steel using and oxyacetylene torch.
	16.07 Cut holes using an oxyacetylene torch.
	16.08 Cut pipe using an oxyacetylene torch.
	16.09 Prepare by beveling pipe ends for set-up.
	16.10 Determine pipe lengths between fittings.
	16.11 Select and install backing rings.
	16.12 Use and care for clamps and alignment tools.
	16.13 Perform alignment procedures for various types of fittings.
17.0	Identify, select, use and maintain riggingThe student will be able to:
	17.01 Select, inspect, use and maintain a block and tackle hoist.
	17.02 Select, inspect, use and maintain chain hoists.
	17.03 Select, inspect, use and maintain come-alongs.
	17.04 Select, inspect, use and maintain jacks.
	17.05 Select, inspect, use and maintain a tugger.
	17.06 Identify and explain heavy rigging hardware.
	17.07 Inspect heavy rigging hardware.
	17.08 Read and interpret lifting capacity charts.
	17.09 Explain load balancing.
	17.10 Rig pipe and valves.
	17.11 Plan a rigging job.
18.0	Identify and use pipe hangers and supportsThe student will be able to:

18.01	Identify types of pipe hangers and supports.
18.02	Identify and interpret pipe support drawings and symbols.
18.03	Determine field placement of hangers.
18.04	Identify and install concrete fasteners.
18.05	Fabricate angle iron brackets to support pipe.

Occu	se Number: BCV0569 pational Completion Point: B trial Pipefitter – 300 Hours – SOC Code 47-2152
19.0	Read advanced blueprintsThe student will be able to:
	19.01 Identify symbols and abbreviations on P & IDs.
	19.02 Identify piping arrangement drawings.
	19.03 Read and interpret coordinates, control points, and elevation.
	19.04 Read and interpret P & IDs, plan views, and section views.
	19.05 Identify isometric drawings.
	19.06 Read isometric drawings taken from plan views.
	19.07 Draw isometric drawings.
20.0	Read an interpret pipefitting standards and specificationsThe student will be able to:
	20.01 Read and interpret pipefitting standards and codes.
	20.02 Read and interpret pipefitting specifications.
	20.03 Identify pipe and components according to specifications.
21.0	Use, explain, perform, and calculate advanced trade mathThe student will be able to:
	21.01 Use tables of equivalents.
	21.02 Use unit conversion tables.
	21.03 Explain thermal expansion.

	21.04 Perform right angle trigonometry.
	21.05 Calculate take-outs using trigonometry.
22.0	Identify, explain, and use motorized equipmentThe student will be able to:
	22.01 Identify and explain types of manlifts.
	22.02 Explain manlift safety rules and hazards.
	22.03 Inspect scissors-type and telescoping boom manlifts.
	22.04 Explain the use of cable lifts.
	22.05 Identify and explain the use of hydrostatic pumps.
	22.06 Identify and explain the use of hydroblaster pumps.
	22.07 Identify and explain the use of drain cleaners.
	22.08 Identify and explain the use of pipeline side boom tractors.
	22.09 Use construction trucks and trailers.
23.0	Accomplish above ground pipe installationThe student will be able to:
	23.01 Store pipe and materials.
	23.02 Identify types of flanges.
	23.03 Identify types of gaskets and bolts used with flanges.
	23.04 Explain the location of flange bolt holes.
	23.05 Install pipe with flanged connections.
	23.06 Lay out and install pipe sleeves and floor penetrations.
	23.07 Read and interpret spool sheets.
	23.08 Explain how to erect spools in piping systems.
24.0	Identify and install valvesThe student will be able to:
	24.01 Identify types of valves that start and stop flow.

	24.02 Identify types of valves that regulate flow.
	24.03 Identify valves that relieve pressure.
	24.04 Identify valves that regulate the direction of flow.
	24.05 Identify types of valve actuators.
	24.06 Explain how to properly store and handle valves.
	24.07 Explain valve locations and positions.
	24.08 Install valves with threaded ends.
	24.09 Install valves with welded ends.
	24.10 Install valves with flanged ends.
25.0	Field route and accomplish vessel trimThe student will be able to:
	25.01 Secure the work area.
	25.02 Determine field run specifications.
	25.03 Determine the required rigging equipment based on weight, location, and configuration.
	25.04 Determine the load weight for erection equipment.
	25.05 Determine the support needs.
	25.06 Select and install erection materials.
	25.07 Perform screw pipe assembly.
	25.08 Perform socket weld pipe assembly.
	25.09 Perform butt weld pipe assembly.
	25.10 Fabricate the field run of piping.
	25.11 Erect vessel trim.
26.0	Identify, explain, select, and install spring can supportsThe student will be able to:
	26.01 Explain standard practice document MSS SP-58.

	26.02 Identify and explain the types of spring can supports.
	26.03 Identify and explain the types of variable spring can supports.
	26.04 Identify and explain the types of constant spring can supports.
	26.05 Explain how to select spring can supports.
	26.06 Explain the storing and handling procedures for spring can supports.
	26.07 Explain how to install spring can supports.
	26.08 Maintain spring can supports.
27.0	Test piping systems and equipmentThe student will be able to:
	27.01 Perform pretest requirements.
	27.02 Perform service and flow tests.
	27.03 Perform head pressure tests.
	27.04 Perform hydrostatic tests.
	27.05 Explain how to perform steam blow tests.
28.0	Accomplish basic plumbingThe student will be able to:
	28.01 Identify and explain the basic materials used in manufacturing plumbing fixtures.
	28.02 Identify drainage fixture unit ratings for given type of plumbing fixtures.
	28.03 Identify and explain the operation of lavatories and sinks.
	28.04 Identify and explain water closets, urinals and bidets.
	28.05 Identify and explain drinking fountains and water coolers.
	28.06 Identify and explain mop sinks, service basins, and floor drains.
	28.07 Identify and explain the basic considerations for plumbing fixture installations.
	28.08 Identify cast iron soil pipefittings.
	28.09 Assemble cast iron soil pipe with lead-and-oakum joints.

	28.10 Assemble cast iron soil pipe with compression joints.
	28.11 Assemble cast iron soil pipe with no-hub joints.
29.0	Plan work activitiesThe student will be able to:
	29.01 Plan daily work activities.
	29.02 Coordinate work activities with other crafts.
	29.03 Ensure safe working conditions.
	29.04 Determine material requirements.
	29.05 Secure equipment and materials.
	29.06 Prepare to perform a task.
	29.07 Sequence operations specific to the task.
	29.08 Field-verify the installation.
30.0	Accomplish advanced pipe fabricationThe student will be able to:
	30.01 Calculate simple piping offsets.
	30.02 Calculate three line, 45 degree, equal-spread offsets around a vessel.
	30.03 Calculate three line, 45 degree, unequal-spread offsets.
	30.04 Fabricate tank heating coils.
	30.05 Perform mitering procedures.
	30.06 Layout three and four piece mitered turns.
	30.07 Layout 45 degree laterals using reference.
	30.08 Fabricate dummy legs and trunions out of pipe using references.
	30.09 Perform geometric layout of pipe laterals and supports.
31.0	Perform NDE testingThe student will be able to:
	31.01 Identify potential hazards for testing.

	31.02 Identify types of NDE testing.
	31.03 Prepare welds for NDE testing.
	31.04 Perform visual inspections.
32.0	Accomplish stress relieving and aligningThe student will be able to:
	32.01 Explain thermal expansion.
	32.02 Perform stress-relief procedures.
	32.03 Explain grouting.
	32.04 Explain types of misalignment.
	32.05 Align pipe flanges to equipment nozzles.
33.0	Identify and use steam trapsThe student will be able to:
	33.01 Identify types of steam traps.
	33.02 Install steam traps.
	33.03 Troubleshoot steam trap systems.
34.0	Identify and use inline componentsThe student will be able to:
	34.01 Identify the potential hazards associated with in-line components.
	34.02 Identify in-line special components.
	34.03 Explain how to store and handle in-line special components.
35.0	Use and fabricate special pipingThe student will be able to:
	35.01 Install flared and compression joints using copper tubing.
	35.02 Solder and braze joints using copper tubing.
	35.03 Bend pipe to a specified radius.
	35.04 Install glass-lines pipe.
	35.05 Explain how to install hydraulic fitted compression joints.

	35.06 Install grooved pipe couplings.
36.0	Accomplish hot tapsThe student will be able to:
	36.01 Explain hot tap safety and potential hazards.
	36.02 Identify and install fittings used with hot taps.
	36.03 Explain the use of hot tap machines.
	36.04 Identify and explain the use of stopples.
37.0	Maintain valvesThe student will be able to:
	37.01 Remove and install threaded valves.
	37.02 Remove and install flanged valves.
	37.03 Replace valve stem o-rings.
	37.04 Replace bonnet gaskets.
	37.05 Explain the purpose of valve packing.
	37.06 Repack a valve.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Brick and Block Masonry

Program Type: Career Preparatory

Career Cluster: Architectural and Construction

	PSAV
Program Number	1463112
CIP Number	0646010103
Grade Level	30,31
Standard Length	1650 Hours
Teacher Certification	BLDG CONST ¶ 7 ¶G TEC CONSTR ¶ 7 ¶ G TROWEL TR 7G
CTSO	SkillsUSA
SOC Codes (all applicable)	47-3011- Helpers—Brickmasons, Blockmasons, Stonemasons, and Tile and Marble Setters 47-2021- Brickmasons and Blockmasons
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 9 Language: 8 Reading: 8

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the brick, block, and concrete masonry industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to selecting and mixing mortars, laying bricks and blocks, and interpreting construction documents **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of three occupational completion points. The recommended sequence allows students to complete specified portions of the program for employment or to remain for advanced training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or terminate as an occupational completer.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	BCV0330	Masonry Tender	450 Hours	47-3011
В	BCV0360	Bricklayer Helper	300 Hours	47-3011
	BCV0362	Brickmason 1	450 Hours	
С	BCV0363	Brickmason 2	450 Hours	47-2021

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Investigate the masonry industry.
- 02.0 Follow safety practices relevant to the masonry industry.
- 03.0 Describe the properties, characteristics and uses of brick.
- 04.0 Describe the properties, characteristics and uses of concrete block.
- 05.0 Use hand tools relevant to the masonry industry.
- 06.0 Read measurements, drawings and specifications.
- 07.0 Demonstrate mathematics knowledge and skills.
- 08.0 Lay brick and/or block to the line.
- 09.0 Describe the various types and uses of bonding.
- 10.0 Select and mix mortars and concrete.
- 11.0 Demonstrate science knowledge and skills.
- 12.0 Clean masonry.
- 13.0 Identify the various methods of masonry practices.
- 14.0 Erect and disassemble basic scaffolds.
- 15.0 Research sustainability issues related to the masonry profession.
- 16.0 Read construction drawings and specifications.
- 17.0 Construct residential masonry projects.
- 18.0 Apply grout and other reinforcement.
- 19.0 Install metals used in masonry.
- 20.0 Explain the importance of employability and entrepreneurship skills.
- 21.0 Perform building layout.
- 22.0 Demonstrate advanced laying techniques.
- 23.0 Apply construction techniques and moisture control.
- 24.0 Apply quality control measures.
- 25.0 Build foundations.
- 26.0 Estimate materials and cost.
- 27.0 Operate and maintain power equipment.
- 28.0 Perform construction details.
- 29.0 Demonstrate knowledge of masonry repair and restoration.
- 30.0 Demonstrate productivity skills.
- 31.0 Demonstrate understanding of masonry in high-rise construction.
- 32.0 Demonstrate knowledge of specialized materials and techniques.

Florida Department of Education Student Performance Standards

Brick and Block Masonry I463112 Program Title: PSAV Number:

Occu	Course Number: BCV0330 Occupational Completion Point: A Masonry Tender – 450 Hours – SOC Code 47-3011	
01.0	Investigate the masonry industryThe student will be able to:	
	01.01 Summarize the history of the masonry industry.	
	01.02 Explain the importance of the masonry industry to the local, state and national economy.	
	01.03 Identify employment and advancement opportunities in the masonry industry.	
	01.04 Explain the factors involved in good-quality work.	
	01.05 Describe modern masonry materials.	
02.0	Follow safety practices relevant to the masonry industryThe student will be able to:	
	02.01 Identify causes and types of accidents.	
	02.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA) in jobsite safety.	
	02.03 Describe the OSHA "Right-to-Know" Law as recorded in (29 CFR-1910.1200)	
	02.04 Recognize jobsite hazards and risk assessment techniques.	
	02.05 Describe first-aid procedures.	
	02.06 Follow safety practices when using tools and equipment.	
	02.07 Explain the importance of hazard communications (HazCom) and Material Safety Data Sheets (MSDSs).	
	02.08 Demonstrate the use of and care of appropriate personal protective equipment (PPE).	
03.0	Describe the properties, characteristics and uses of brickThe student will be able to:	
	03.01 Explain the brick-manufacturing process.	

	03.02 Identify the properties and characteristics of brick.
	03.03 Distinguish between standard and modular bricks.
	03.04 Describe the different types of bricks and their principal uses.
	03.05 Identify brick positioning in a wall.
	03.06 Build 4" corner return leads and a wall 4 feet high and 12 feet long.
04.0	Describe the properties, characteristics and uses of concrete blockThe student will be able to:
	04.01 Explain the manufacturing process of concrete block.
	04.02 Identify the properties and characteristics of concrete block.
	04.03 Describe the different types, including shapes and sizes, of concrete blocks and their principal uses.
	04.04 Build an 8" block corner return lead 7 courses high.
05.0	Use hand tools relevant to the masonry industryThe student will be able to:
	05.01 Identify, care for and use basic hand tools.
	05.02 Select hand tools for specific jobs.
	05.03 Identify power tools.
	05.04 Read ruler to the 1/16".
	05.05 Read brick-spacing rules and brick modular rules.
	05.06 Course brick to a given height with the brick spacing rule and the modular rule.
06.0	Read measurements, drawings and specificationsThe student will be able to:
	06.01 Work with denominate numbers.
	06.02 Identify the ingredients and properties of mortars.
	06.03 Read a mason's measure.
	06.04 Convert measurements in the U.S. Customary (English) system into metric equivalents.
	06.05 Read construction documents and identify basic parts of a drawing set.

	06.06 Discuss the different types of specifications used in the building industry and the sections that pertain to masonry.
07.0	Demonstrate mathematics knowledge and skillsThe students will be able to:
	07.01 Demonstrate knowledge of arithmetic operations.
	07.02 Analyze and apply data and measurements to solve problems and interpret documents.
	07.03 Construct charts/tables/graphs using functions and data.
08.0	Lay brick and/or block to the lineThe student will be able to:
	08.01 Spread mortar for brick and/or block.
	08.02 Butter head joints.
	08.03 Set up masonry materials.
	08.04 Pull a line.
	08.05 Cut bricks and/or blocks with a hammer, a brick set and a trowel.
	08.06 Temper mortar.
	08.07 Maintain proper spacing of head and bed joints.
	08.08 Point and tool joints in brick and/or block walls.
	08.09 Lay brick and/or block to the line.
	08.10 Repeat the above nine tasks with 8" block.
	08.11 Demonstrate proper handling of materials to prevent damage.
09.0	Describe the various types and uses of bondingThe student will be able to:
	09.01 Define and describe pattern, structural and adhesive bonding.
	09.02 Differentiate among and use stretcher, common, English, English cross, Flemish and stack bonds.
10.0	Select and mix mortars and concreteThe student will be able to:
	10.01 Identify types of mortars and identify types to use on various concrete masonry units (CMU).
	10.02 Identify the ingredients and properties of mortars.

	10.03 Identify the properties and characteristics of concrete.
	10.04 Identify colored mortars (admix and factory-blended).
	10.05 Identify the types and purposes of grouts.
	10.06 Store and place materials.
	10.07 Select mortars and concrete.
	10.08 Mix mortars by hand and by machine.
	10.09 Mix concrete by hand and by machine.
	10.10 Clean up tools, equipment and the work site.
	10.11 Build a brick 4" corner return lead.
	10.12 Identify common problems found in mortar application and their uses.
11.0	Demonstrate science knowledge and skillsThe students will be able to:
	11.01 Explain molecular action as a result of temperature extremes, chemical reaction and moisture content.
	11.02 Explain pressure measurement in terms of Pounds per Square Inch (PSI) and inches of mercury.
	11.03 Discuss the role of creativity in constructing scientific questions, methods and explanations.
	11.04 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.
	11.05 Identify health-related problems caused by exposure to work-related chemicals and hazardous materials.
	11.06 Describe proper precautions for handling work-related chemicals and hazardous materials.
12.0	Clean masonryThe student will be able to:
	12.01 Follow safety practices when cleaning masonry.
	12.02 Identify reasons for cleaning.
	12.03 Identify and select cleaning materials and equipment.
	12.04 Prepare cleaning solutions.
	12.05 Point new and old work.

	12.06 Prepare the area and protect surrounding area from masonry cleaning solutions.
	12.07 Clean the wall using various methods.
13.0	Identify the various methods of masonry practicesThe student will be able to:
	13.01 Identify the methods of basic building layouts.
	13.02 Identify the methods of digging and pouring footings.
	13.03 Identify the methods of forming, grading and pouring concrete slabs.
	13.04 Identify the different types of reinforced masonry, flashing, wall reinforcement and ties and use proper technique for installation.
	13.05 Identify measuring tools.
	13.06 Identify power equipment.
14.0	Erect and disassemble basic scaffoldsThe student will be able to:
	14.01 Follow safety practices when working with ladders and scaffolds.
	14.02 Erect and disassemble basic scaffolds.
15.0	Research sustainability issues related to the masonry professionThe student will be able to:
	15.01 Describe the impact of the construction industry on the natural environment.
	15.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	15.03 Identify and analyze sustainable alternatives to conventional masonry practices.
	15.04 Identify specific practices that can lessen adverse impacts on the environment.
	15.05 Describe the building assessment tools such as Leadership in Energy and Environmental Design (LEED).
	15.06 Identify construction activities pertaining to the masonry profession that contribute to a project's overall sustainability.
16.0	Read construction drawings and specifications- The student will be able to:
	16.01 Identify types of drawings.
	16.02 Identify symbols on the drawings.
	16.03 Read and interpret simple drawings.

	16.04 Read and interpret specifications.
	16.05 Explain the importance of following local, state and national codes and standards.
	16.06 Interpret a finished schedule.
	16.07 Use an architect's scale.
	16.08 Use construction documents to estimate material quantities.
	16.09 Demonstrate ability to make simple sketches.
17.0	Construct residential masonry projectsThe students will be able to:
	17.01 Explain the requirements for construction of various types of residential foundations.
	17.02 Identify and explain the characteristics, uses and installation techniques for brick pavers.
	17.03 Lay out and build steps, patios and decks made from masonry units.
	17.04 Lay out and build chimneys and fireplaces.
18.0	Apply grout and other reinforcementThe students will be able to:
	18.01 Name and describe the primary ingredients in grout and their properties.
	18.02 Identify the different types of grout used in masonry work.
	18.03 Describe common admixtures and their uses.
	18.04 Describe the use of steel bar reinforcement in masonry construction.
	18.05 Apply grout in low and high lifts using the proper techniques.
	18.06 Place grout in a hollow block wall and rod it into place.
19.0	Install metals used in masonryThe students will be able to:
	19.01 Describe the uses and installation of vertical reinforcement.
	19.02 Describe the uses and installation of different types of horizontal joint reinforcement and ties.
	19.03 Describe the uses and installation of different anchors, fasteners and embedded items.
	19.04 Install hollow metal frames.

19.05	Describe the functions of sills and lintels.
19.06	Install sills and lintels.
19.07	Install metal hardware.

Cours	se Number: BCV0360
Occu	pational Completion Point: B
20.0	layer Helper, Firebrick and Refractory – 300 Hours – SOC Code 47-3011
20.0	Explain the importance of employability and entrepreneurship skillsThe students will be able to:
	20.01 Identify and demonstrate positive work behaviors needed to be employable.
	20.02 Develop personal career plan that includes goals, objectives and strategies.
	20.03 Examine licensing, certification and industry credentialing requirements.
	20.04 Maintain a career portfolio to document knowledge, skills and experience.
	20.05 Evaluate and compare employment opportunities that match career goals.
	20.06 Demonstrate ability to complete job applications and make a resume.
	20.07 Identify and exhibit traits for retaining employment.
	20.08 Identify opportunities and research requirements for career advancement.
	20.09 Research the benefits of ongoing professional development.
	20.10 Examine and describe entrepreneurship opportunities as a career planning option.
21.0	Perform building layoutThe student will be able to:
	21.01 Read and interpret plot plans.
	21.02 Establish building corners.
	21.03 Check and/or establish 90-degree angles using the 3-4-5 rule.
	21.04 Use optical and leaser leveling instruments, transit and leveling rod.
	21.05 Build batter boards and establish building lines and elevations.
	21.06 Dig, prepare and pour footings to local codes and standards.

22.0	Demonstrate advanced laying techniques—The student will be able to:
	22.01 Recognize the structural principles and fundamental uses of basic types of walls.
	22.02 Recognize the requirement for and function of control joints and expansion joints.
	22.03 Build various types of walls using proper reinforcement, jointing and bonding techniques.
	22.04 Lay out specialty structures such as maintenance holes, segmented block walls and screens.
	22.05 Identify and explain the different types of masonry arches used today.
	22.06 Lay out a semicircular arch and a jack arch.
23.0	Apply construction techniques and moisture control—The student will be able to:
	23.01 Construct masonry around windows, doors and other openings.
	23.02 Construct pilasters and other types of bracing.
	23.03 Install insulation used in conjunction with masonry construction.
	23.04 Identify the need for moisture control in various types of masonry construction, and demonstrate the techniques used to eliminate moisture problems.
	23.05 Construct corbelling in a double-wythe wall.
	23.06 Join intersecting walls.
	23.07 Install flashing.
24.0	Apply quality control measures—The student will be able to:
	24.01 Describe industry standards for quality control.
	24.02 Describe how to build masonry sample panels and prisms.
	24.03 Perform a slump test.
	24.04 Describe and perform field inspections.
25.0	Build foundationsThe student will be able to:
	25.01 Build an 8" block corner 7 courses high.
	25.02 Build an 8" block corner to the correct height and range of a given foundation batter board line.

	25.03 Bond and build an 8" block corner to the correct height and range on the opposite corner of a given foundation batter board line.
	25.04 Pull a line and build an 8" block wall between the block corners.
	25.05 Establish and build the other corner leads.
	25.06 Build foundation walls to floor elevations.
	25.07 Make foundation walls waterproof, if required.
	25.08 Install flashing, anchor bolts, termite shields and weep holes; install vents (if a wooden floor system is used).
26.0	Estimate materials and costThe student will be able to:
	26.01 Estimate the materials needed for a specific job.
	26.02 Estimate the cost of the materials, labor, unit/ labor costs and sales tax.
27.0	Operate and maintain power equipmentThe student will be able to:
	27.01 Follow safety practices when using and maintaining power equipment.
	27.02 Use masonry saw with an abrasive blade to cut masonry units.
	27.03 Use masonry saw with a diamond blade to cut masonry units.
	27.04 Set up, operate and maintain power tools and equipment.
-	

Occu	Course Number: BCV0362 Occupational Completion Point: Brickmason – 450 Hours – SOC Code 47-2021		
28.0	3.0 Perform construction detailsThe student will be able to:		
	28.01 Build 4" and 8" brick corners.		
	28.02 Build 4", 6", 8" and 12" block corners.		
	28.03 Build reinforced masonry walls, composite walls and cavity walls.		
	28.04 Erect corner poles and lay out brick coursing on story pole.		
	28.05 Course brick heights.		
	28.06 Build brick and/or block sills, steps, piers, pilasters, columns, brick chase, flue, paving, BBQ pits and planters.		

	28.07 Construct a brick-veneer wall.
	28.08 Set precast and built-in lintels.
	28.09 Build modular brick walls.
	28.10 Lay glass blocks.
	28.11 Set door jams.
	28.12 Reinforce masonry walls.
29.0	Demonstrate knowledge of masonry repair and restorationThe student will be able to:
29.0	Demonstrate knowledge of masonry repair and restorationThe student will be able to: 29.01 Recognize signs of deterioration in masonry structures.
29.0	
29.0	29.01 Recognize signs of deterioration in masonry structures.
29.0	29.01 Recognize signs of deterioration in masonry structures. 29.02 Describe the causes of efflorescence, cracking and faulty mortar joints.
29.0	 29.01 Recognize signs of deterioration in masonry structures. 29.02 Describe the causes of efflorescence, cracking and faulty mortar joints. 29.03 Describe the procedures for preventing and correcting efflorescence, cracking and faulty mortar joints.

Course Number: BCV0363 Occupational Completion Point: C Brickmason – 450 Hours – SOC Code 47-2021		
30.0	Demonstrate productivity skillsThe student will be able to:	
	30.01 Lay and joint standard brick on a straight brick-veneer wall, with established leads, at an average daily rate of:	
	a. 100-200	
	b. 200-300	
	c. 300-400	
	d. 400-500	
	e. 500-600	
	f. 600-700	
	g. 700-800	

	h. over 800
	30.02 Lay and joint 8" block on a straight block wall, with established leads, at an average daily rate of:
	a. 50-100
	b. 100-150
	c. 150-200
	d. 200-250
	e. 250-300
	f. 300-350
	g. 350-400
	h. over 400
31.0	Demonstrate understanding of masonry in high-rise constructionThe student will be able to:
	31.01 Recognize and explain the use of high-rise construction equipment.
	31.02 Identify construction sequence in high-rise construction.
	31.03 State the safety procedures in high-rise construction.
	31.04 Safely work with materials handling equipment in high-rise construction.
	31.05 Properly put on a safety harness, lanyard and lifeline.
	31.06 Demonstrate hand signals used for lifting materials.
32.0	Demonstrate knowledge of specialized materials and techniquesThe student will be able to:
	32.01 Explain the various techniques used to provide adequate protection during hot- and cold-weather masonry construction.
	32.02 Describe all-weather construction techniques.
	32.03 Describe techniques for surface-bonding mortar.
	32.04 Demonstrate techniques for construction of stone walls and other stone building surfaces.
	32.05 Demonstrate basic knowledge of various building materials such as glass block and refractory brick.

32.06	Describe the procedures for rebuilding fireplaces.
32.07	Replace a damaged brick in a wall.
32.08	Repair mortar joints.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 8, and Reading 8. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan

with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Course Title: Architecture and Construction Cooperative Education OJT

Course Type: Career Preparatory

Career Cluster: Architecture and Construction

PSAV – Cooperative Education - OJT		
Course Number	1469999	
CIP Number	06469999CP	
Grade Level	30, 31	
Standard Length	Multiple hours	
Teacher Certification	Any Certification appropriate to the students' chosen career field	
CTSO	SkillsUSA	
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml	

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction cluster.

Each student job placement must be related to the job preparatory program in which the student is enrolled or has completed.

The purpose of this course is to provide the on-the-job training component when the **cooperative method of instruction** is appropriate. Whenever the cooperative method is offered, the following is required for each student: a training agreement; a training plan signed by the student, teacher and employer, including instructional objectives; a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks which are relevant to the occupation which the student has chosen as a career goal; and a site supervisor with a working knowledge of the selected occupation. The workstation may be in an industry setting or in a virtual learning environment. The student **must be compensated** for work performed.

The teacher/coordinator must meet with the site supervisor a minimum of once during each grading period for the purpose of evaluating the student's progress in attaining the competencies listed in the training plan.

Architecture and Construction Cooperative Education OJT may be taken by a student for one or more semesters. A student may earn multiple credits in this course. The specific student performance standards which the student must achieve to earn credit are specified in the Cooperative Education - OJT Training Plan.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- Perform designated job skills. Demonstrate work ethics. 01.0
- 02.0

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: **Architecture and Construction Cooperative Education OJT**

1469999

Stand	Standards and Benchmarks		
01.0	Perform designated job skillsThe student will be able to:		
	01.01 Perform tasks as outlined in the training plan.		
	01.02 Demonstrate job performance skills.		
	01.03 Demonstrate safety procedures on the job.		
	01.04 Maintain appropriate records.		
	01.05 Attain an acceptable level of productivity.		
	01.06 Demonstrate appropriate dress and grooming habits.		
02.0	Demonstrate work ethicsThe student will be able to:		
	02.01 Follow directions.		
	02.02 Demonstrate good human relations skills on the job.		
	02.03 Demonstrate good work habits.		
	02.04 Demonstrate acceptable business ethics.		

Additional Information

Special Notes

There is a **Cooperative Education Manual** available online that has guidelines for students, teachers, employers, parents and other administrators and sample training agreements. It can be accessed on the DOE website at http://www.fldoe.org/core/fileparse.php/3/urlt/steps-manual.pdf.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization(s) for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Air-Conditioning, Refrigeration and Heating Technology

Program Type: Career Preparatory

Career Cluster: Architecture and Construction

	PSAV
Program Number	1470203
CIP Number	0647020106
Grade Level	30, 31
Standard Length	1350 Hours
Teacher Certification	AC HEAT ME @7 7G REFRG MECH 7 G
CTSO	SkillsUSA
SOC Codes (all applicable)	49-9021 - Heating, Air Conditioning, and Refrigeration Mechanics and Installers
CTE Program Resources	http://www.fldoe.org/academics/career-adult-edu/career-tech-edu/program-resources.stml
Basic Skills Level	Mathematics: 10 Language: 9 Reading: 9

Purpose

The purpose of this program is to prepare students for employment or advanced training in the heating, air-conditioning, and refrigeration and ventilation industry.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to designing, testing and repairing heating, ventilation, air-conditioning and cooling (HVAC) systems.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points. There are two course options, ACR0044 OR ACR0045, for occupational completion point D.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	ACR0041	Air-Conditioning, Refrigeration and Heating Helper	250 Hours	49-9021
В	ACR0043	Air-Conditioning, Refrigeration and Heating Mechanic Assistant	250 Hours	49-9021
	ACR0047	Air-Conditioning, Refrigeration and Heating Mechanic 1	250 Hours	
С	ACR0049	Air-Conditioning, Refrigeration and Heating Mechanic 2	250 Hours	49-9021
	ACR0044	Air-Conditioning, Refrigeration and Heating Technician	350 Hours	
D	OR	OR		49-9021
	ACR0045	Refrigeration Mechanic	350 Hours	

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate the importance of health, safety and environmental management systems in organizations and their importance to organizational performance and regulatory compliance.
- 02.0 Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industry.
- 03.0 Demonstrate mathematics knowledge and skills.
- 04.0 Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipment.
- 05.0 Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their components.
- 06.0 Select and test electrical generation and distribution components for commercial heating and air conditioning systems.
- 07.0 Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systems.
- 08.0 Troubleshoot and wire electrical motors and their components.
- 09.0 Operate solid-state electronics as used in heating, air-conditioning and refrigeration systems.
- 10.0 Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems.
- 11.0 Explain the function of basic electronics.
- 12.0 Read construction documents.
- 13.0 Describe the history and concepts of heating, air-conditioning and refrigeration.
- 14.0 Demonstrate science knowledge and skills.
- 15.0 Explain the properties of matter and heat behavior.
- 16.0 Analyze fluids, pressures, refrigerants and related codes.
- 17.0 Evaluate heating, air-conditioning and refrigeration system components and accessories.
- 18.0 Select appropriate commercial compressors.
- 19.0 Test and adjust commercial evaporative condensers.
- 20.0 Maintain, test and troubleshoot commercial evaporators.
- 21.0 Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
- 22.0 Explain the importance of employability and entrepreneurship skills.
- 23.0 Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizing.
- 24.0 Utilize and operate mechanical refrigeration servicing and testing equipment.
- 25.0 Assist in the installation of a residential heating and air-conditioning system and determine start-up procedures.
- 26.0 Conduct start-up and check-out procedures for mechanical heating and air-conditioning systems.
- 27.0 Demonstrate a working knowledge of refrigerants and oils.
- 28.0 Interpret, use and modify construction drawings and specifications.
- 29.0 Conduct system startup and shutdown.
- 30.0 Design heating and cooling systems.
- 31.0 Use combustion-type heating servicing and testing equipment.
- 32.0 Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systems.
- 33.0 Maintain, test and adjust commercial heating and air-conditioning accessories--The student will be able to
- 34.0 Maintain, troubleshoot and repair commercial heating systems.
- 35.0 Install, maintain and repair heating, air-conditioning and refrigeration systems.

- 36.0 Demonstrate knowledge of retail refrigeration systems.
- 37.0 Demonstrate knowledge of commercial and industrial refrigeration systems.
- 38.0 Develop an understanding of hydronic systems.
- 39.0 Develop an understanding of steam systems.
- 40.0 Determine the properties of air.
- 41.0 Use a pressure enthalpy chart to diagram refrigerant cycles.
- 42.0 Explain the standards for and ways to measure indoor-air quality.
- 43.0 Operate environmental control systems as used in commercial heating and air-conditioning systems.
- 44.0 Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applications.
- 45.0 Maintain and repair thermal storage systems.
- 46.0 Maintain, troubleshoot and repair commercial heating and air-conditioning systems.
- 47.0 Calculate commercial heating and air-conditioning loads.
- 48.0 Install air distribution systems.
- 49.0 Evaluate commercial airside systems.
- 50.0 Balance an air distribution system.
- 51.0 Select energy conservation equipment.
- 52.0 Analyze building management systems.
- 53.0 Recommend alternative heating and cooling systems for various case studies.
- 54.0 Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systems.
- 55.0 Demonstrate a working knowledge of refrigeration-system vibration and insulation.
- 56.0 Apply commercial refrigeration-pipe sizing and troubleshooting procedures.
- 57.0 Use refrigeration-systems skills in commercial applications.
- 58.0 Demonstrate a working knowledge of refrigerated storage systems.
- 59.0 Diagnose, maintain and repair ice-making systems.
- 60.0 Use refrigeration electrical-system skills in commercial applications.
- 61.0 Maintain and troubleshoot commercial refrigeration systems.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Air Conditioning, Refrigeration and Heating Technology 1470203

Occupationa	Course Number: ACR0041 Occupational Completion Point: A Air-Conditioning, Refrigeration and Heating Helper – 250 Hours – SOC Code 49-9021		
	nstrate the importance of health, safety and environmental management systems in organizations and their importance to zational performance and regulatory complianceThe student will be able to:		
01.01	Describe personal and jobsite safety rules and regulations that maintain safe and healthy work environments.		
01.02	Explain the reasons for regular safety meetings and for company safety policies.		
01.03	Explain the need for employee-background checks and medical examinations.		
01.04	Identify and use appropriate fire extinguishers and other such safety devices.		
01.05	Identify and follow emergency and rescue procedures.		
01.06	Identify and use safe-handling practices as they relate to hazardous and volatile fluids, compounds and gases.		
01.07	Understand and apply Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA) and Department of Transportation (DOT) hazardous materials safety requirements.		
01.08	Apply specific safety and recovery practices for refrigerants used in the industry.		
01.09	Apply specific safety practices as they relate to handling and storing cylinders and materials.		
01.10	Select and wear proper protective clothing and equipment.		
01.11	Identify and use specific safety practices when using soldering and brazing skills.		
01.12	Identify and use OSHA practices when working with heating, air-conditioning and refrigeration systems and equipment.		
01.13	Follow safety precautions when using hand and power tools.		
01.14	Demonstrate an understanding of first aid, Cardiopulmonary Resuscitation (CPR) and the use of portable defibrillators.		
01.15	Explain emergency procedures to follow in response to workplace accidents.		
01.16	Create a disaster and/or emergency response plan.		

02.0	Identify, use and maintain the tools and tool accessories used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	02.01 Identify and use basic hand tools and tool accessories; power tools (electric, mechanical and pneumatic, if available); pipe and tube-working tools; and specialized tools of the trade.
	02.02 Apply appropriate care and maintenance procedures for tools and tool accessories, following the directions in the tool-equipment manufacturer's manual.
03.0	Demonstrate mathematics knowledge and skillsThe student will be able to:
	03.01 Demonstrate knowledge of arithmetic operations.
	03.02 Analyze and apply data and measurements to solve problems and interpret documents.
	03.03 Construct charts/tables/graphs using functions and data.
04.0	Demonstrate a practical knowledge of basic electricity and of the electrical components of heating, air-conditioning and refrigeration equipmentThe student will be able to:
	04.01 Explain the principles of electricity.
	04.02 Explain single- and three-phase power distribution.
	04.03 Define and explain watts, ohms, volts and amps.
	04.04 Identify and explain electrical measuring tools and devices.
	04.05 Explain the standards for and ways to measure watts, resistance, voltage and amperage, using appropriate instruments or devices.
	04.06 Identify and explain appropriate electrical wiring symbols.
	04.07 Draw and explain a wiring schematic diagram for a control system.
	04.08 Create a wiring schematic for an air conditioner an electric furnace, a heat pump, an oil furnace (optional) and a gas furnace.
	04.09 Explain codes and standards and safety requirements for working with the electrical components used in heating, air conditioning and refrigeration.
	04.10 Troubleshoot protection devices, such as fuses and breakers.
	04.11 Interpret tables and charts from the National Electrical Codes (NEC).
05.0	Troubleshoot heating, air-conditioning and refrigeration electrical control systems and their componentsThe student will be able to:
	05.01 Identify and explain the operations of electrical control systems and their components (zone damper motors, duel fuel lock out controls, outdoor thermostats/low ambient controls, defrost controls/timers and auxiliary heating controls).
	05.02 Identify, install and troubleshoot controls for heating, air-conditioning and refrigeration systems.

	05.03 Explain the operation of different types of electromechanical thermostats.
	05.04 Wire basic heating, air-conditioning and refrigeration systems.
	05.05 Troubleshoot operational problems for different types of electromechanical thermostats.
	05.06 Explain the electrical and mechanical operations of the basic heat pump.
06.0	Select and test electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	06.01 Determine wire sizes and voltage drops.
	06.02 Describe the operation of various types of transformers.
	06.03 Draw and identify various power-transformers.
	06.04 Test, size and replace protection devices such as fuses and breakers, motor starters and overloads.
07.0	Maintain, test and troubleshoot electrical motors and their components for commercial heating and air-conditioning systemsThe student will be able to:
	07.01 Explain how alternating current is developed and draw a sine wave.
	07.02 Identify single-phase and three-phase wiring arrangements.
	07.03 Explain how phase shift occurs in inductors and capacitors.
	07.04 Describe the types of capacitors and their applications.
	07.05 Explain the operation of single-phase and three-phase induction motors.
	07.06 Identify the various types of single-phase motors and their applications.
	07.07 State and demonstrate the safety precautions, such as lock out / tag out, which must be followed when working with electrical equipment.
	07.08 Explain how the electric company uses a demand meter.
	07.09 Identify and explain the operations and applications of various types of electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.10 Maintain, test and troubleshoot various types of commercial electrical motors and their components as used in commercial heating and air-conditioning systems.
	07.11 Demonstrate the proper use of motor testing equipment.
0.80	Troubleshoot and wire electrical motors and their componentsThe student will be able to:
	08.01 Identify and explain the functions of various types of motors and their components.
	·

	08.02 Troubleshoot, test and analyze motors, using various methods.
	08.03 Identify, troubleshoot and wire various types of electric motors.
	08.04 Reverse the rotation of a motor.
09.0	Operate solid-state electronics as used in heating, air-conditioning and refrigeration systemsThe student will be able to:
	09.01 Explain the basic principles and functions of Direct Digital Control (DDC).
	09.02 Explain basic solid-state circuits and boards.
	09.03 Identify, test and replace circuits and boards.
	09.04 Identify and explain the functions of a building-management system.
	09.05 Program a programmable thermostat.
10.0	Evaluate single-phase and three-phase power as used in heating, air-conditioning and refrigeration systems The student will be able to:
	10.01 Explain how the principles of designing an electrical system for residential heating and air-conditioning systems apply to commercial heating and air-conditioning systems.
	10.02 Define and compare single- and multiphase voltage and current related to commercial heating and air-conditioning systems.
	10.03 Calculate various circuit loads in commercial heating and air-conditioning applications using Ohm's law.
	10.04 Troubleshoot electrical circuits for commercial heating and air-conditioning systems
11.0	Explain the function of basic electronicsThe student will be able to:
	11.01 Explain the basic theory of electronics and semiconductors.
	11.02 Explain how various semiconductor devices such as diodes, LEDs and photo diodes work, and how they are used in power and control circuits.
	11.03 Identify different types of resistors and explain how their resistance values can be determined.
	11.04 Describe the operation and function of thermistors and cad cells.
	11.05 Test semiconductor components.
	11.06 Identify the connectors on a personal computer.

Course Number: ACR0043 Occupational Completion Point: B Air-Conditioning, Refrigeration and Heating Mechanic Assistant – 250 Hours – SOC Code 49-9021		
12.0	Read construction documentsThe student will be able to:	
	12.01 Recognize and identify basic construction drawing terms, components and symbols.	
	12.02 Relate information on construction drawings to actual locations on the print.	
	12.03 Recognize different classifications of construction drawings.	
	12.04 Interpret and use drawing dimensions.	
13.0	Describe the history and concepts of heating, air-conditioning and refrigerationThe student will be able to:	
	13.01 Explain the basic principles of heating, ventilation and air-conditioning.	
	13.02 Identify educational paths to career opportunities in the HVAC profession.	
	13.03 Identify and explain the four major refrigeration components.	
	13.04 Identify and explain the characteristics of a compression-cycle refrigerant system.	
	13.05 Differentiate between air-conditioning and refrigeration.	
	13.06 Differentiate between split systems and package systems.	
	13.07 Describe the benefits of conditioned air and environments.	
	13.08 Discuss the impact of heating, air-conditioning and refrigeration on society.	
	13.09 Discuss current issues and concerns (such as indoor-air quality, the ozone layer and computer technology) in the heating, air-conditioning and refrigeration industry and in the environment and explain their future ramifications.	
	13.10 Describe the purpose and requirements of local, state and federal heating, air-conditioning and refrigeration codes and standards as well as the manufacturer's installation instructions.	
	13.11 Identify various professional organizations, associations and societies and explain their purposes.	
14.0	Demonstrate science knowledge and skillsThe student will be able to:	
	14.01 Discuss the role of creativity in constructing scientific questions, methods and explanations.	
	14.02 Formulate scientifically investigable questions, construct investigations, collect and evaluate data and develop scientific recommendations based on findings.	
15.0	Explain the properties of matter and heat behaviorThe student will be able to:	

1	
	15.01 Describe and explain freezing point, critical temperature and absolute zero.
	15.02 Describe matter, heat and heat transfer.
	15.03 Differentiate between heat and temperature.
	15.04 Explain and distinguish among the characteristics of the three states of matter.
	15.05 Explain the relationship between temperature and humidity.
	15.06 Differentiate between latent heat and sensible heat.
16.0	Analyze fluids, pressures, refrigerants and related codesThe student will be able to:
	16.01 Identify the refrigeration cycle.
	16.02 Identify and explain general safety issues and EPA rules and regulations regarding the handling of refrigerants.
	16.03 Define and explain pressure, fluid, and temperature.
	16.04 Explain the standards for and ways to measure and calculate absolute and gauge pressures.
	16.05 Identify and explain the classifications, properties and uses of different refrigerants.
	16.06 Explain how fluids react and flow in a closed versus an open environment or vessel.
	16.07 Define and identify "color-coding" of refrigerant cylinders.
	16.08 Compare Pressure and Temperature (P/T) charts.
	16.09 Explain the proper methods of transferring, storing and recovering refrigerants.
	16.10 Explain the effects of an improper refrigerant and contaminants in a system.
17.0	Evaluate heating, air-conditioning and refrigeration system components and accessoriesThe student will be able to:
	17.01 Explain the types, operation, use and maintenance requirements of
	a. Compressors (such as reciprocating, rotary, screw and scroll)
	 b. Condensers and evaporators (such as evaporative condensers, evaporative coils, shell and tube, tube within a tube and fin and tube)
	 Metering devices (such as adjusting automatic and thermostatic expansion valves, fixed orifices and other devices available on the local market)
	17.02 Evaluate metering-device performance.

	17.03 Explain the methods of compression, lubrication and compressor loading and unloading.
	17.04 Analyze the operating condition of a compressor.
	17.05 Test, troubleshoot and correct the causes of mechanical problems in a heating, air-conditioning and refrigeration system.
	17.06 Identify the location and explain the uses of refrigerant flow accessories.
	17.07 Identify the location and explain the uses of heating, air-conditioning and refrigeration-system accessories (such as receivers, dryers/filers, solenoid valves, heat exchangers, accumulators, suction filter, oil separators, evaporator pressure-regulating valve, crankcase pressure-regulating valves, hot gas bypass valves and check valves).
	17.08 Evaluate system performance.
18.0	Select appropriate commercial compressorsThe student will be able to:
	18.01 Compare commercial-compressor requirements with those for residential and light commercial heating and air-conditioning systems.
	18.02 Select appropriate commercial compressors for cooling requirements.
	18.03 Describe the mechanical operation for each type of compressor.
	18.04 Explain compressor lubrication methods.
	18.05 Explain methods used to control compressor capacity.
	18.06 Describe how compressor protection devices operate.
	18.07 Perform the common procedures used when field servicing open and semi-hermetic compressors.
19.0	Test and adjust commercial evaporative condensersThe student will be able to:
	19.01 Determine the proper air and fluid flow for commercial evaporative condensers.
	19.02 Test and adjust the airflow for proper temperature difference.
	19.03 Test and adjust the water flow for proper GPM and temperature difference.
	19.04 Check for proper water treatment.
20.0	Maintain, test and troubleshoot commercial evaporatorsThe student will be able to:
	20.01 Determine the operational requirements for evaporators used in commercial heating and air-conditioning applications.
	20.02 Select appropriate evaporators for commercial heating and air-conditioning systems.
	20.03 Maintain, test and adjust various commercial heating and air-conditioning accessories.

21.0	Fabricate and service the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industryThe student will be able to:
	21.01 Identify and explain the purpose of the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.02 Bend tubing, using tube benders.
	21.03 Connect tubing using flared fittings and compression fittings.
	21.04 Connect tubing, using solderless connectors.
	21.05 Connect tubing, using a swaged-joint connection.
	21.06 Identify and use various types of torches.
	21.07 Identify, select and use appropriate brazing alloys, materials and skills.
	21.08 Explain the purposes and procedures for protecting piping materials and fabrication, such as valves, fittings and products, from heat.
	21.09 Braze tubing.
	21.10 Silver-braze brass, steels and copper.
	21.11 Demonstrate an understanding of the procedures for installing pipe and tubing insulation.
	21.12 Explain the procedures required for installing heating, air-conditioning, refrigerant and ventilation accessories.
	21.13 Fabricate and leak-test the piping, tubing and fittings used in the heating, air-conditioning and refrigeration industry.
	21.14 Maintain project time and materials lists.
	21.15 Demonstrate proper safety measures when fabricating and servicing piping, tubing and fittings.
22.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:
	22.01 Identify and demonstrate positive work behaviors needed to be employable.
	22.02 Develop personal career plan that includes goals, objectives and strategies.
	22.03 Examine licensing, certification and industry credentialing requirements.
	22.04 Maintain a career portfolio to document knowledge, skills and experience.
	22.05 Evaluate and compare employment opportunities that match career goals.
	22.06 Identify and exhibit traits for retaining employment.

22.07	Identify opportunities and research requirements for career advancement.
22.08	Research the benefits of ongoing professional development.

Occu	se Number: ACR0047 pational Completion Point: onditioning, Refrigeration and Heating Mechanic 1 – 250 Hours – SOC Code 49-9021
23.0	Identify basic principles of heating, air conditioning, refrigeration and ventilation piping sizingThe student will be able to:
	23.01 Identify and explain various types of heating, air-conditioning and refrigeration piping.
	23.02 Identify basic principles of sizing various heating, air conditioning, refrigeration and ventilation for various tasks.
	23.03 Explain pressure and temperature drops.
24.0	Utilize and operate mechanical refrigeration servicing and testing equipmentThe student will be able to:
	24.01 Identify the effects of superheat and sub-cooling on a system.
	24.02 Identify and explain the functions of servicing and testing equipment (such as vacuum pumps, micron gauges, EPA-approved equipment, leak detectors and charging systems).
	24.03 Operate a refrigerant recovery system.
	24.04 Explain the standards for and ways to measure, test, maintain and evacuate a mechanical heating, air-conditioning and refrigeration system.
	24.05 Evacuate the refrigerant system with various vacuum methods.
	24.06 Demonstrate compliance with Environmental Protection Agency (EPA) rules and regulations and, if possible, take the EPA test.
	24.07 Charge various air-conditioning and mechanical refrigeration systems by various methods.
	24.08 Demonstrate the effects of superheat and sub-cooling on a system utilizing test equipment (such as thermometers and gages)
25.0	Assist in the installation of a residential heating and air-conditioning system and determine start-up proceduresThe student will be able to:
	25.01 Read and comply with dispatch orders.
	25.02 Explain local codes and ordinances.
	25.03 Select and use appropriate tools and safety practices to test equipment.
	25.04 Determine the electrical requirements of equipment.
	25.05 Assist in the installation of a heating and air-conditioning system to the manufacturer's installation and operation specifications, using a practical knowledge of duct fabrication methods.

	25.06 Determine the proper charge in a residential air-conditioning unit and adjust superheat.
	25.07 Determine the temperature drop across the evaporator.
	25.08 Determine the temperature rise across the condenser.
	25.09 Write a service report.
	25.10 Apply good customer-relations skills.
26.0	Conduct start-up and check-out procedures for mechanical heating and air-conditioning systemsThe student will be able to:
	26.01 Identify and explain the following heat-pump systems air-to-air, water-to-air, water-to-water, air-to-ground (geothermal), open-loop and closed-loop.
	26.02 Determine the start-up and checkout procedures recommended by different manufacturers.
	26.03 Determine the electrical requirements of equipment.
	26.04 Select and use appropriate tools, instruments and test equipment following safety precautions.
	26.05 Determine the temperature drop across the outdoor coil on a heat pump.
	26.06 Determine the temperature rise across the indoor coil on a heat pump.
	26.07 Test for a proper refrigerant charge in a residential heat pump.
	26.08 Apply good customer-relations skills.
27.0	Demonstrate a working knowledge of refrigerants and oilsThe student will be able to:
	27.01 Identify the refrigerants in common use and state the types of applications in which each is used.
	27.02 Explain the effects of releasing refrigerants into the atmosphere.
	27.03 Explain how refrigerants are classified by their chemical composition.
	27.04 Describe the color-coding scheme used to identify refrigerant cylinders.
	27.05 Describe how azeotropes and near-azeotropes differ from each other and from so-called pure refrigerants.
	27.06 Interpret a P-T chart for an azeotrope refrigerant.
	27.07 Calculate superheat and subcooling.
	27.08 Demonstrate refrigerant leak detecting methods.

	27.09 Identify the different types of oils used in refrigeration systems and explain their relationships to the various refrigerants.
	27.10 Explain how to add and remove oil from a system.
	27.11 Describe how to test oil for contamination.
28.0	Interpret, use and modify construction drawings and specificationsThe student will be able to:
	28.01 Read mechanical plans within a set of construction drawings explain their relationship.
	28.02 Compare mechanical plans with the actual installation of duct and pipe runs, fittings and sections.
	28.03 Interpret specification documents and apply them to the plans.
	28.04 Interpret shop drawings and apply them to the plans and specifications.
	28.05 Develop a field set of as-built drawings.
	28.06 Identify the steps required for transferring design information to component production.
	28.07 List and classify materials most commonly used in HVAC systems.
29.0	Conduct system startup and shutdownThe student will be able to:
	29.01 Start up and shut down an air handler and related forced-air distribution system.
	29.02 Test compressor oil for acid contamination.
	29.03 Add or remove oil from a semi-hermetic or open reciprocating compressor.
30.0	Design heating and cooling systemsThe student will be able to:
	30.01 Identify and describe the steps in the system design process.
	30.02 Use construction drawings or an actual job site to obtain information needed to complete heating and cooling load estimates.
	30.03 Identify the factors that affect heat gains and losses to a building and describe how these factors influence the design process.
	30.04 Complete a load estimate to determine the heating and/or cooling load of a building.
	30.05 State the principles that affect the selection of equipment to satisfy the calculated heating and/or cooling load.
	30.06 Select heating and/or cooling equipment using manufacturers' product data.
	30.07 Identify the various types of duct systems and explain why and where each type is used.

30.08	Demonstrate the effect of fittings and transitions on duct system design.
30.09	Use a friction loss chart and duct sizing table to size duct.
30.10	Install insulation and vapor barriers used in duct systems.
30.11	Select and install refrigerant and condensate piping following proper design principles.

Occu	se Number: ACR0049 pational Completion Point: C pnditioning, Refrigeration and Heating Mechanic 2 – 250 Hours – SOC Code 49-9021
31.0	Use combustion-type heating servicing and testing equipmentThe student will be able to:
	31.01 Explain combustion theory and the safety precautions for using combustion-type-heating servicing and testing equipment.
	31.02 Identify and explain the various types of combustion-type heating servicing and testing equipment (such as draft gauge, U-tube manometer, sling psychrometer, millivolt meter and oil-furnace testing equipment).
	31.03 Use the servicing and testing equipment.
	31.04 Test, analyze and troubleshoot combustion-type-heating systems.
32.0	Troubleshoot combustion gas valves and regulators as used in heating, air-conditioning, refrigeration and ventilation systemsThe student will be able to:
	32.01 Identify and discuss the safety and regulation issues and concerns.
	32.02 Explain the operations of various types of gas valves and regulators (such as low-voltage, line-voltage, pneumatic, solenoid and gas and pressure regulators).
	32.03 Identify and size various types of gas valves and regulators.
	32.04 Determine the application of gas valves and regulators.
	32.05 Troubleshoot gas valves and regulators.
33.0	Maintain, test and adjust commercial heating and air-conditioning accessoriesThe student will be able to
	33.01 Compare commercial accessories with residential and light- commercial-heating and air-conditioning accessories.
	33.02 Select the heating and air-conditioning accessories appropriate for various commercial applications.
	33.03 Maintain, test and adjust commercial heating and air-conditioning accessories.
34.0	Maintain, troubleshoot and repair commercial heating systemsThe student will be able to:

	34.01 Identify the components of various commercial heating systems.
	34.02 Explain the operational principles of various commercial heating systems.
	34.03 Test and analyze heating air-distribution systems.
	34.04 Maintain, troubleshoot and repair various commercial heating systems including a gas furnace and boiler, an oil furnace and boiler, an electric furnace, electric heaters, a heat pump and solar-heating systems.
35.0	Install, maintain and repair heating, air-conditioning and refrigeration systemsThe student will be able to:
	35.01 Follow safety precautions.
	35.02 Describe new technologies in heating, air-conditioning and refrigeration installation, including variable-speed motors, heat-pipe systems, desiccant systems and gas-driven heating systems.
	35.03 Lay out, construct and troubleshoot comfort systems.
	35.04 Test and analyze systems.
	35.05 Test and analyze heat-recovery systems.
36.0	Demonstrate knowledge of retail refrigeration systemsThe student will be able to:
	36.01 Describe the mechanical refrigeration cycle as it applies to retail refrigeration systems.
	36.02 Explain the differences in refrigerants and applications in low-, medium- and high-temperature refrigeration systems.
	36.03 Identify and describe the primary refrigeration cycle components used in retail refrigeration systems.
	36.04 Identify and describe the supporting components and accessories used in retail refrigeration systems.
	36.05 Describe the various methods of defrost used in retail refrigeration systems.
	36.06 Identify and describe the applications for the various types of retail refrigeration systems.
	36.07 Describe the control system components used in retail refrigeration systems.
	36.08 Explain the operating sequence of a retail refrigeration system.
	36.09 Interpret wiring diagrams and troubleshooting charts to isolate malfunctions in retail refrigeration systems.
37.0	Demonstrate knowledge of commercial and industrial refrigeration systemsThe student will be able to:
	37.01 Identify different types of refrigerated coolers and display cases and describe each one's common application.
	37.02 Compare the basic components used in commercial/industrial refrigeration systems with those used in retail refrigeration systems.
L	

	37.03 Identify single, multiple and satellite compressor systems. Describe the applications, installation considerations and advantages and disadvantages of each type.
	37.04 Identify packaged condensing units and unit coolers. Describe their applications, operation and installation considerations.
	37.05 Identify two-stage compressors and explain their operation and applications.
	37.06 Identify the various accessories used in commercial refrigeration systems and explain why each is used and where it should be installed in the system.
	37.07 Identify the various refrigeration control devices and explain the purpose of each type and how it works.
	37.08 Compare the components used in ammonia systems with those used in halocarbon-based refrigerant systems.
38.0	Develop an understanding of hydronic systemsThe student will be able to:
	38.01 Explain the terms and concepts used when working with hot-water heating and chilled-water cooling systems.
	38.02 Identify the major components of hot-water heating, chilled-water cooling and dual-temperature water systems.
	38.03 Explain the purpose of each component of hot-water heating, chilled-water cooling and dual-temperature water systems.
	38.04 Describe the safety precautions used when working with hot-water/chilled-water systems.
	38.05 Explain the differences between reciprocating, rotary screw, scroll and centrifugal chillers.
	38.06 Identify the common piping configurations used with hot-water heating and chilled-water cooling systems.
	38.07 Explain the principles involved and describe the procedures used, in balancing hydronic systems.
	38.08 Select, calibrate and properly use the tools and instruments needed to balance hydronic systems.
	38.09 Read the pressure across a water system circulating pump.
39.0	Develop an understanding of steam systemsThe student will be able to:
	39.01 Explain the terms and concepts used when working with steam-heating systems.
	39.02 Identify major components of steam heating systems and explain the purpose of each.
	39.03 Describe the basic steam-heating cycle.
	39.04 Safely perform selected operating procedures on low-pressure steam boilers and systems.
	39.05 Install and maintain selected steam traps.
	39.06 Identify the common piping configurations used with steam-heating systems.

Course Number: ACR0044

Occupational Completion Point: D
Air-Conditioning, Refrigeration and Heating Technician – 350 Hours – SOC Code 49-9021

Note: Students may choose one of the following courses for the completion of OCP D: 'Air-Conditioning, Refrigeration and Heating

Techr	nician' – ACR0044 or 'Refrigeration Technician' – ACR0045.
40.0	Determine the properties of airThe student will be able to:
	40.01 Explain the principles of psychrometrics.
	40.02 Identify and explain the components and uses of a psychrometric meter.
	40.03 Identify indoor-air-quality concerns as related to psychrometrics.
	40.04 Determine the properties of air, using a psychrometric chart.
	40.05 Follow safety precautions.
	40.06 Identify and explain the different types and benefits of air-filtration systems, air-handling systems and ventilation systems.
	40.07 Fabricate, operate, maintain and troubleshoot air-filtration systems, air-handling systems and ventilation systems.
41.0	Use a pressure enthalpy chart to diagram refrigerant cyclesThe student will be able to:
	41.01 Identify all components of the pressure enthalpy chart.
	41.02 Define enthalpy and entropy.
	41.03 Diagram several refrigerant cycles, using the pressure enthalpy chart.
42.0	Explain the standards for and ways to measure indoor-air qualityThe student will be able to:
	42.01 Define indoor-air quality.
	42.02 Identify and explain the codes and standards regarding indoor-air quality.
	42.03 Select and use indoor-air-quality measuring devices.
	42.04 Explain the standards for and ways to measure indoor-air quality using various methods.
43.0	Operate environmental control systems as used in commercial heating and air-conditioning systemsThe student will be able to:
	43.01 Identify and explain the various types of environmental control systems and their sequences of operation as used in commercial heating and air-conditioning systems.
	43.02 Maintain, test and troubleshoot various types of environmental control systems as used in commercial heating and air-conditioning systems.

44.0	Maintain and troubleshoot pneumatic control systems for commercial heating and air-conditioning applicationsThe student will be able to:
	44.01 Identify pneumatic control systems.
	44.02 Demonstrate the ability to maintain and troubleshoot pneumatic control systems.
45.0	Maintain and repair thermal storage systemsThe student will be able to:
	45.01 Apply appropriate codes, standards and safety practices.
	45.02 Describe the benefits and limitations of each type.
	45.03 Explain the operational principles of a thermal storage system.
	45.04 Identify and explain various types of thermal storage systems.
	45.05 Maintain, troubleshoot and test various types of thermal storage systems.
46.0	Maintain, troubleshoot and repair commercial heating and air-conditioning systemsThe student will be able to:
	46.01 Keep a record of the installation, maintenance and repair of commercial heating and air-conditioning systems.
	46.02 Apply local and national codes and safety practices.
	46.03 Lay out a commercial heating and air-conditioning system.
	46.04 Lay out a typical split commercial air-conditioning system.
	46.05 Lay out a typical split commercial heating system.
	46.06 Maintain, test, analyze and repair various types of commercial heating and air-conditioning systems.
	46.07 Maintain, troubleshoot and repair water-cooled condensers
47.0	Calculate commercial heating and air-conditioning loadsThe student will be able to:
	47.01 Explain conduction as a heat-load source.
	47.02 Describe the implications of conducting and the resistance values for different types of construction materials.
	47.03 Interpret heat-transfer tables and define values U, K, C, and R.
	47.04 Locate the total heat-transfer value of any surface.
	47.05 Explain infiltration and exfiltration/ventilation as a heat-load source.

	47.06 Explain a product heat-load source.
	47.07 Explain miscellaneous loads (people, motors and equipment) as heat-load sources.
	47.08 Explain the purpose of vapor barriers.
	47.09 Interpret tables of specific heat values as applied to commercial heating and air-conditioning systems.
	47.10 Calculate and design systems.
	47.11 Calculate cooling and heating equipment sizes.
	47.12 Design and identify methods of installing air-movement systems.
48.0	Install air distribution systemsThe student will be able to:
	48.01 Describe airflow and pressures in a basic forced-air distribution system.
	48.02 Explain the differences between propeller and centrifugal fans and blowers.
	48.03 Identify the various types of duct systems and explain why and where each type is used.
	48.04 Demonstrate or explain the installation of metal, fiberboard and flexible duct.
	48.05 Demonstrate or explain the installation of fittings and transitions used in duct systems.
	48.06 Demonstrate or explain the use and installation of diffusers, registers and grilles used in duct systems.
	48.07 Demonstrate or explain the use and installation of dampers used in duct systems.
	48.08 Demonstrate or explain the use and installation of insulation and vapor barriers used in duct systems.
	48.09 Identify instruments used to make measurements in air systems and explain the use of each instrument.
	48.10 Make basic temperature, air pressure and velocity measurements in an air distribution system.
49.0	Evaluate commercial airside systemsThe student will be able to:
	49.01 Identify the differences in various types of commercial all-air systems.
	49.02 Identify the type of building in which a particular type of system is used.
	49.03 Explain the typical range of capacities for a commercial air system.
50.0	Balance an air distribution systemThe student will be able to:

	50.01 Explain the gas laws (Dalton, Boyle and Charles) used when dealing with air and its properties.
	50.02 Explain the fan and pump laws.
	50.03 Use a psychrometric chart to evaluate air properties and changes in air properties.
	50.04 Explain the principles involved in the balancing of air and water distribution systems.
	50.05 Define common terms used by manufacturers when describing grilles, registers and diffusers.
	50.06 Identify and use the tools and instruments needed to balance air distribution systems.
	50.07 Change the speed of an air distribution system supply fan.
51.0	Select energy conservation equipmentThe student will be able to:
	51.01 Identify and explain the operation of energy conservation equipment.
	51.02 Operate selected energy conservation equipment.
52.0	Analyze building management systemsThe student will be able to:
	52.01 Identify the major components of a building management system and describe how they fit together.
	52.02 Operate a basic direct digital controller.
53.0	Recommend alternative heating and cooling systems for various case studiesThe student will be able to:
	53.01 Describe alternative technologies for heating such as in-floor, direct-fired makeup unit (DFMU), solar, air turnover, corn or wood pellet burners, waste oil/multi-fuel and fireplace inserts.
	53.02 Describe alternative technologies for heating such as ductless systems, computer rooms, chilled beams and multi-zone.
Occup Refrig	se Number: ACR0045 pational Completion Point: D peration Mechanic – 350 Hours – SOC Code 49-9021 Students may choose one of the following courses for the completion of OCP D: 'Air-Conditioning, Refrigeration and Heating
Techr	nician' – ACR0044 or 'Refrigeration Technician' – ACR0045.
54.0	Demonstrate a working knowledge of electrical generation and distribution components for commercial heating and air conditioning systemsThe student will be able to:
	54.01 Calculate loads and design and lay out a commercial refrigeration system.
	54.02 Identify and explain commercial refrigeration-pressure-regulation devices, controls and components.
	54.03 Install, service and repair ice machines and specialty refrigeration systems.

1	
	54.04 Test and troubleshoot refrigerant-pressure-regulating devices, controls and components.
	54.05 Apply local and national codes and mechanical safety practices.
55.0	Demonstrate a working knowledge of refrigeration-system vibration and insulationThe student will be able to:
	55.01 Describe the applications of vibration eliminators.
	55.02 Identify and select the correct insulation for commercial application.
56.0	Apply commercial refrigeration-pipe sizing and troubleshooting proceduresThe student will be able to:
	56.01 Determine the capacities of refrigerant lines, including the amounts they will hold, equivalent lengths of fittings and the total effective length for various pipelines.
	56.02 Identify and apply industry-approved installation procedures.
	56.03 Troubleshoot refrigeration-pipe-sizing problems.
	a. Explain the use of traps in suction-line risers.
	b. Explain pressure drop.
	c. Calculate pressure drop in liquid-line risers.
	d. Size double risers, hot-gas lines and liquid lines from condenser to receiver.
57.0	Use refrigeration-systems skills in commercial applicationsThe student will be able to:
	57.01 Identify and apply the safety practices used with commercial refrigeration systems.
	57.02 Apply refrigeration-systems skills to commercial refrigeration systems.
	a. Perform dehydration, evacuation and recovery procedures.
	b. Interpret blueprints and mechanical drawings.
	c. Service and charge a refrigeration system.
	d. Test, analyze and replace compressors.
	e. Retrofit alternative refrigerants and oils.
58.0	Demonstrate a working knowledge of refrigerated storage systemsThe student will be able to:
	58.01 Identify and differentiate among various types of cases, such as service cases and self-service cases.

	58.02 Explain the operation of air-screen freezers, glass-door freezers, coffin cases and walk-in coolers.
	58.03 Differentiate among medium-temperature, low-temperature and ultralow-temperature systems.
	58.04 Explain various defrost methods.
	58.05 Maintain, test and troubleshoot defrost components.
	58.06 Identify and explain the components of various refrigerated storage systems.
	58.07 Maintain, test and troubleshoot various refrigerated storage system components.
59.0	Diagnose, maintain and repair ice-making systemsThe student will be able to:
	59.01 Identify and explain various types and operations of ice-making systems.
	59.02 Maintain, test, troubleshoot and repair various types of ice-making systems, following the manufacturers' recommendations.
	59.03 Identify and explain the different types of water-treatment methods and systems.
	59.04 Analyze water to identify water problems and the proper treatments.
60.0	Use refrigeration electrical-system skills in commercial applicationsThe student will be able to:
	60.01 Apply electrical safety practices for commercial refrigeration systems.
	60.02 Apply refrigeration electrical-system skills to commercial refrigeration systems:
	a. Interpret symbols of electrical components and diagrams.
	b. Interpret schematics and diagrams.
	c. Apply electrical theory and calculations.
	d. Explain the principles of designing electrical systems.
	e. Test and troubleshoot single- and three-phase motors.
	60.03 Test the solid-state components used in commercial refrigeration systems.
	60.04 Troubleshoot and diagnose the electrical circuits used in commercial refrigeration systems.
	60.05 Test and troubleshoot the thermostatic controls used in commercial refrigeration systems.
61.0	Maintain and troubleshoot commercial refrigeration systemsThe student will be able to:

61.01	Follow appropriate safety precautions for commercial refrigeration systems.
61.02	Identify and explain the operations of various types of commercial refrigeration systems and applications, such as single, multiplex and cascade systems.
61.03	Maintain and troubleshoot various types of commercial refrigeration systems.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education Curriculum Framework

Program Title: Cabinetmaking Program Type: Career Preparatory

Career Cluster: Architecture and Construction

NOTE: This program has been daggered for deletion. There will be no new enrollments as of the 2015-2016 school year. Students may enroll in 'Cabinetmaking NEW - C410400'.

PSAV	
Program Number	1480704

Basic Skills Level	Mathematics: 9 Language: 9 Reading: 9

<u>Purpose</u>

The purpose of this program is to prepare students for employment in the carpentry and cabinetmaking industry with a stress on basic cabinet making skills.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Architecture and Construction career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and

problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Architecture and Construction career cluster.

The content includes but is not limited to carpentry and cabinetmaking. **Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

Program Structure

This program is a planned sequence of instruction consisting of four occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

The following table illustrates the post-secondary program structure:

OCP	Course Number	Course Title	Length	SOC Code
А	BCV0107	Carpenter Helper	300 Hours	47-3012
В	BCV0235	Cabinet Finisher	150 Hours	51-7011
С	BCV0240	Cabinet Assembler	300 Hours	51-7011
D	BCV0243	Cabinetmaker	450 Hours	51-7011

Common Career Technical Core – Career Ready Practices

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

- 1. Act as a responsible and contributing citizen and employee.
- 2. Apply appropriate academic and technical skills.
- 3. Attend to personal health and financial well-being.
- 4. Communicate clearly, effectively and with reason.
- 5. Consider the environmental, social and economic impacts of decisions.
- 6. Demonstrate creativity and innovation.
- 7. Employ valid and reliable research strategies.
- 8. Utilize critical thinking to make sense of problems and persevere in solving them.
- 9. Model integrity, ethical leadership and effective management.
- 10. Plan education and career path aligned to personal goals.
- 11. Use technology to enhance productivity.
- 12. Work productively in teams while using cultural/global competence.

Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Apply shop safety skills.
- 02.0 Utilize manual and power tools relevant to the carpentry and cabinetmaking professions.
- 03.0 Demonstrate mathematics knowledge and skills relevant to the carpentry and cabinetmaking field.
- 04.0 Create basic construction drawings.
- 05.0 Recommend appropriate building materials for specific scenarios.
- 06.0 Select appropriate fasteners and hardware for specific scenarios.
- 07.0 Apply occupational safety skills.
- 08.0 Select and use hand and power tools relevant to the carpentry and cabinetmaking profession.
- 09.0 Fasten stock and joints.
- 10.0 Construct millwork from a set of drawings.
- 11.0 Read and design construction documents.
- 12.0 Assemble and install cabinets and components.
- 13.0 Investigate sustainability issues related to the carpentry and cabinetmaking professions.
- 14.0 Assemble and install cabinetry.
- 15.0 Install interior and exterior doors (wood and/or metal).
- 16.0 Install trim and finish carpentry using plans and specifications.
- 17.0 Cut and install framing members for a floor (wood and/or metal).
- 18.0 Cut and install a wall and partition framing (wood and/or metal).
- 19.0 Install an interior wall and ceiling materials.
- 20.0 Lay out and construct an interior-stair system.
- 21.0 Explain the importance of employability and entrepreneurship skills.
- 22.0 Prepare cabinets for finish.
- 23.0 Apply finishes.
- 24.0 Install cabinets.
- 25.0 Apply laminates.
- 26.0 Plan, design and lay out casework.
- 27.0 Utilize power tools specific to cabinet making.
- 28.0 Construct joints.
- 29.0 Cut casework components.
- 30.0 Assemble casework components.
- 31.0 Construct cabinet drawers.
- 32.0 Construct cabinet doors.
- 33.0 Construct curved pieces.
- 34.0 Construct millwork details.

Florida Department of Education Student Performance Standards

Program Title: PSAV Number: Cabinetmaking 1480704

Occu	se Number: BCV0107 pational Completion Point: A enter Helper – 300 Hours – SOC Code 47-3012
01.0	Apply shop safety skillsThe student will be able to:
	01.01 Maintain a clean, orderly and safe work area.
	01.02 Transport, handle and store materials safely.
	01.03 Operate a fire extinguisher.
	01.04 Qualify in basic first-aid procedures.
	01.05 Identify safety hazards.
	01.06 Demonstrate the use and care of personal protective equipment (PPE).
02.0	Utilize manual and power tools relevant to the carpentry and cabinetmaking professionsThe student will be able to:
	02.01 Identify various hand and power tools.
	02.02 Select correct tools for specific jobs.
	02.03 Clean and care for tools and equipment.
	02.04 Demonstrate proficiency in the safe use of hand and power tools.
	02.05 Read and use carpenter's measuring tools.
03.0	Demonstrate mathematics knowledge and skills relevant to the carpentry and cabinetmaking fieldThe student will be able to:
	03.01 Apply geometry and algebra skills to solve math problems related to carpentry and/or cabinetmaking with and without a calculator.
	03.02 Demonstrate knowledge of arithmetic operations.
	03.03 Solve problems for distance, area and volume.

	03.04 Analyze and apply data and measurements to solve problems and interpret documents.	
	03.05 Construct charts/tables/graphs using functions and data.	
04.0	Create basic construction drawingsThe student will be able to:	
	04.01 Recognize and identify basic construction drawing terms, components and symbols.	
	04.02 Relate information on construction drawings to actual locations on the print.	
	04.03 Recognize different classifications of construction drawings.	
	04.04 Interpret and use drawing dimensions and scales.	
05.0	Recommend appropriate building materials for specific scenariosThe student will be able to:	
	05.01 Identify the grades and species of lumber and their appropriate uses.	
	05.02 Identify the actual and nominal sizes of lumber.	
	05.03 Identify the grades of plywood and wood products.	
	05.04 Identify defects and blemishes that affect the durability and strength of lumber.	
	05.05 Explain the effects of temperature extremes, chemical reaction and moisture content on building materials.	
	05.06 Explain the uses of various types of engineered lumber.	
06.0	Select appropriate fasteners and hardware for specific scenariosThe student will be able to:	
	06.01 Identify the fasteners commonly used in carpentry and/or cabinetmaking.	
	06.02 Identify the hardware commonly used in carpentry and/or cabinetmaking.	
07.0	Apply occupational safety skillsThe student will be able to:	
	07.01 Describe "Right-to-Know" Law as recorded in (29 CFR-1910.1200)	
	07.02 Explain the purpose of the Occupational Safety and Health Administration (OSHA).	
	07.03 Identify health-related problems that may result from exposure to hazardous materials.	
	07.04 Describe the proper precautions for handling hazardous materials.	
	07.05 Explain eligibility and the procedures for obtaining worker's compensation.	

	07.06 Explain the importance of complying with the Americans with Disabilities Act (ADA) requirements.
08.0	Select and use hand and power tools relevant to the carpentry and cabinetmaking professionThe student will be able to:
	08.01 Identify the hand tools commonly used by carpenters and describe their uses.
	08.02 Use hand tools in a safe and appropriate manner.
	08.03 State the general safety rules for operating all power tools, regardless of type.
	08.04 State the general rules for properly maintaining all power tools, regardless of type.
	08.05 Identify the portable power tools commonly used by carpenters and describe their uses.
	08.06 Use portable power tools in a safe and appropriate manner.
09.0	Fasten stock and jointsThe student will be able to:
	09.01 Identify types of glues and fasteners and describe their applications.
	09.02 Fasten stock with glue and clamps.
	09.03 Fasten stock and joints with appropriate fasteners such as nails, staples, screws and bolts.
	09.04 Fill and finish nail and screw holes with fillers and plugs.
	09.05 Glue and clamp stock using various techniques.
10.0	Construct millwork from a set of drawingsThe student will be able to:
	10.01 Recognize the common types of woods used to make cabinets.
	10.02 Use stationary power tools.
	10.03 Identify and cut the various types of joints used in cabinetmaking.
	10.04 Build a cabinet from a set of drawings.
	10.05 Install plastic laminate on a countertop core.
11.0	Read and design construction documentsThe student will be able to:
	11.01 Explain the types of drawings usually included in a set of plans and list the information found on each type.
	11.02 Identify the different types of lines used on construction drawings.

	11.03 Identify selected abbreviations commonly used on plans.
	11.04 Read and interpret plans, elevations, schedules, sections and details contained in basic construction drawings.
	11.05 State the purpose of written specifications.
	11.06 Identify and describe the parts of a specification.
	11.07 Conduct quantity takeoff for materials.
	11.08 Design millwork and draw details in construction documents for a given scenario.
12.0	Assemble and install cabinets and componentsThe student will be able to:
	12.01 Install hardware such as hinges, catches, pulls, knobs and guides on assembled cabinets.
	12.02 Install fasteners.
	12.03 Install drawers.
	12.04 Install various types of doors including overlay, lipped and flush.
	12.05 Install adjustable shelving.
	12.06 Install glass panels and metal grills.
	12.07 Install specialty hardware such as a lazy Susan, wire racks and "pull-outs".
	12.08 Install sliding doors and track.
13.0	Investigate sustainability issues related to the carpentry and cabinetmaking professionsThe student will be able to:
	13.01 Describe the impact of the construction industry on the natural environment.
	13.02 Describe the life cycle phases of a building and its impacts on the environment throughout the life of the building.
	13.03 Recommend sustainable alternatives to conventional carpentry and cabinetmaking practices.
	13.04 Identify specific practices that can lessen adverse impacts on the environment.

Course Number: BCV0235
Occupational Completion Point: B
Cabinet Finisher – 150 Hours – SOC Code 51-7011

14.0 Assemble and install cabinetry--The student will be able to:

	14.01 Recognize the common types of woods used to make cabinets.
	14.02 Use stationary power tools.
	14.03 Identify and cut the various types of joints used in cabinetmaking.
	14.04 Build a cabinet from a set of drawings.
	14.05 Install plastic laminate on a countertop core.
15.0	Install interior and exterior doors (wood and/or metal)The student will be able to:
	15.01 Identify the types and parts of door systems.
	15.02 Install a door jamb and hang a door.
	15.03 Identify and install door hardware.
16.0	Install trim and finish carpentry using plans and specificationsThe student will be able to:
	16.01 Read an architect's scale for a trim and finish carpentry job.
	16.02 Determine dimensions from plans.
	16.03 Relate information on plans and specifications to real parts, locations, hardware and fasteners.
17.0	Cut and install framing members for a floor (wood and/or metal)The student will be able to:
	17.01 Identify and describe floor-framing members including subfloor.
	17.02 Lay out, cut and install supports for structures (e.g., sills, columns, beams and girders).
	17.03 Lay out and install various types of joists and openings, including joists for a cantilevered floor.
	17.04 Install various types of bridging.
	17.05 Install various types of subfloors, applying fastening techniques.
18.0	Cut and install a wall and partition framing (wood and/or metal)The student will be able to:
	18.01 Identify framing members used in wall and partition construction.
	18.02 Lay out wall lines and partition locations on a floor.
	18.03 Lay out walls for studs, doors and windows.
_	

	18.04 Cut studs, trimmers, cripples, headers and fire stops to length.
	18.05 Build T's, corners and headers.
	18.06 Lay out and assemble wall sections.
	18.07 Install wall sheathing and/or diagonal bracing.
	18.08 Install insulation material and a vapor barrier.
19.0	Install an interior wall and ceiling materialsThe student will be able to:
	19.01 Install furring strips.
	19.02 Install drywall.
	19.03 Identify and install paneling and trim.
	19.04 Identify and install ceiling materials and systems.
20.0	Lay out and construct an interior-stair systemThe student will be able to:
	20.01 Identify the types and styles of interior-stair systems.
	20.02 Identify the components of an interior-stair system.
	20.03 Calculate the number of risers and treads for an interior-stair system.
	20.04 Lay out, cut and assemble an interior-stair system (rough and finish).

Course Number: BCV0240 Occupational Completion Point: C Cabinet Assembler – 300 Hours – SOC Code 51-7011		
21.0	Explain the importance of employability and entrepreneurship skillsThe student will be able to:	
	21.01 Identify and demonstrate positive work behaviors needed to be employable.	
	21.02 Develop personal career plan that includes goals, objectives and strategies.	
	21.03 Examine licensing, certification and industry credentialing requirements.	
	21.04 Maintain a career portfolio to document knowledge, skills and experience.	
	21.05 Evaluate and compare employment opportunities that match career goals.	

	21.06 Identify and exhibit traits for retaining employment.
	21.07 Identify opportunities and research requirements for career advancement.
	21.08 Research the benefits of ongoing professional development.
	21.09 Examine and describe entrepreneurship opportunities as a career planning option.
22.0	Prepare cabinets for finishThe student will be able to:
	22.01 Fill nail and screw holes.
	22.02 Install wood plugs in prepared holes.
	22.03 Sand a cabinet and joints for finish.
	22.04 Select and apply proper filler.
	22.05 Sand wood surfaces for finishing.
	22.06 Stain, bleach, fill and seal wood surfaces as needed.
23.0	Apply finishesThe student will be able to:
	23.01 Apply various types of finishes including lacquer-based, water-based, oil-based, enamel and polyurethane.
	23.02 Apply the types of finishes that the local market demands.
	23.03 Observe safety precautions when applying finishes, including wearing respirator and protective clothing approved by National Institute of Occupational Safety and Health (NIOSH).
24.0	Install cabinetsThe student will be able to:
	24.01 Load and secure casework for hauling.
	24.02 Check walls and floors for level and plumb.
	24.03 Determine fasteners for block or walls.
	24.04 Install upper and lower cabinets and other casework.
	24.05 Fasten a suspended cabinet unit to ceiling.
	24.06 Install countertops, including sink cutouts and back splash.
	24.07 Cut and install molding and trim.

	24.08 Adjust doors and drawers.
	24.09 Clean work site.
25.0	Apply laminatesThe student will be able to:
	25.01 Lay out and cut core stock to specifications.
	25.02 Lay out and cut laminate to specification.
	25.03 Apply adhesive.
	25.04 Apply laminate to core stock.
	25.05 Trim and file plastic laminate edges.
	25.06 Clean laminated surfaces.
	25.07 Laminate a curved surface.
	25.08 Repair laminate defects.

Course Number: BCV0243 Occupational Completion Point: D Cabinetmaker – 450 Hours – SOC Code 51-7011		
26.0	Plan, design and lay out caseworkThe student will be able to:	
	26.01 Convert measurements from English to the metric system and from the metric system to the English system.	
	26.02 Interpret plans and explain common abbreviations used on drawings.	
	26.03 Draw a set of plans to scale.	
	26.04 Make a layout.	
	26.05 Develop a plan or procedure and a cut list for a specific job.	
	26.06 Estimate the materials required for the job.	
	26.07 Estimate labor and materials cost, using computer-application programs, if available.	
	26.08 Select and match wood stock for compatibility of grain and color.	
	26.09 Design and layout cabinets, using a Computer-Assisted Design (CAD) program, if available.	

27.0	Utilize power tools specific to cabinet makingThe student will be able to:
	27.01 Operate both portable and stationary power tools, observing safety precautions.
	27.02 Select the correct power tools required for specific jobs.
	27.03 Maintain power tools according to the manufacturer's specifications.
28.0	Construct jointsThe student will be able to:
	28.01 Construct various types of joints including butt, dado, rabbeted, lap, miter, splined, tongue-and-groove and mortise-and-tenon.
	28.02 Install dowels in common wood joints.
	28.03 Install biscuit spline in common wood joints.
29.0	Cut casework componentsThe student will be able to:
	29.01 Cut frame stiles and rails.
	29.02 Cut end, top and bottom panels.
	29.03 Cut partitions and sleepers.
	29.04 Cut shelf panels.
	29.05 Cut skeleton frame stiles and rails.
	29.06 Cut a toe board and a back panel.
	29.07 Cut a casework top or countertop and a back splash.
	29.08 Cut drawer front, sides, back and bottom.
	29.09 Cut wood drawer guides.
	29.10 Cut solid, flexible and paneled doors.
	29.11 Route or shape casework components.
30.0	Assemble casework componentsThe student will be able to:
	30.01 Assemble face frame, panels, toe boards and skeleton frame.
	30.02 Fasten a top or countertop and a back splash to casework.

	30.03 Assemble drawers.
	30.04 Assemble flexible and paneled doors.
	30.05 Install shelving.
	30.06 Attach trim, molding and edge banding.
31.0	Construct cabinet drawersThe student will be able to:
	31.01 Make various types of drawers including overlay, lipped and flush.
	31.02 Construct drawer guides.
32.0	Construct cabinet doorsThe student will be able to:
	32.01 Make solid and tambour doors.
	32.02 Make a frame and panel door.
	32.03 Cut and set glass in a frame.
	32.04 Band edges of solid doors.
	32.05 Construct wood-door tracks.
33.0	Construct curved piecesThe student will be able to:
	33.01 Cut a curved piece from solid stock.
	33.02 Make a curved piece by saw kerfing.
	33.03 Construct a curved piece, using curved segments.
	33.04 Construct a curved piece by laminating thin strips.
34.0	Construct millwork detailsThe student will be able to:
	34.01 Build shaped moldings to specifications.
	34.02 Cut built-up moldings.
	34.03 Cut a cornice.

Additional Information

Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Career and Technical Student Organization (CTSO)

SkillsUSA is the intercurricular career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

Basic Skills (if applicable)

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 9, Language 9, and Reading 9. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.) Exemptions from state, national or industry licensure are limited to the certifications listed on the Basic Skills and Licensure Exemption List which may be accessed from the CTE Program Resources page.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.
