Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

	Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.M.1.7:	Perform advanced dance sequences from a variety of dances accurately. **Clarifications:** Some examples of dances are hip-hop, social, step and line.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental

	screenings; regular physical activity, and workplace safety.
HE.912.C.1.4:	Propose strategies to reduce or prevent injuries and health problems. **Clarifications:** Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this Pre-IB course, designed for dancers who have mastered the basics in two or more dance forms, builds technical and creative skills with a focus on developing the aesthetic quality of movement in the ensemble and as an individual. In addition, the purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the Next Generation Sunshine State Standards and standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject areas, a holistic view of knowledge, intercultural awareness, embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

GENERAL NOTES

Special Note. *Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school can have a course that it calls "pre-IB" as long as it makes it clear that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the course along the lines of, for example, the "Any School pre-IB course".*

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.
ibanswers.ibo.org/app/answers/detail/a_id/5414/kw/pre-ib. **Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.**
Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Dance Transfer (#0300990) 2022 - And Beyond

Course Standards

Name	Description
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:	• Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.

ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

General Course Information and Notes

VERSION DESCRIPTION

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

Dance - Grade Kindergarten (#5003010) 2022 - And Beyond

Course Standards

Name	Description
DA.K.C.1.1:	Associate and identify words of action or feeling with watching or performing simple dances.
DA.K.C.1.2:	Perform creative movement in a specific order.
DA.K.C.2.1:	Explore movement possibilities to solve problems by experiencing tempo, level, and directional changes. **Clarifications:** e.g., turtle: slow; rabbit: fast
DA.K.C.3.1:	Express preferences from among a teacher-selected set of dances. **Clarifications:** e.g., teacher-chosen dances presented live or on video, dancing games, simple dances students have already learned
DA.K.F.1.1:	Create free-form dances, using manipulatives, which are personally pleasing and show exploration and imagination. **Clarifications:** e.g., scarves, long ribbons, soft fabric squares and rectangles
DA.K.F.3.1:	Follow classroom instructions given by the teacher.
DA.K.H.1.1:	Dance to music from a wide range of cultures.
DA.K.O.1.1:	Improvise a short phrase based on the elements of dance. **Clarifications:** e.g., space: pathways, levels; time: speed
DA.K.O.2.1:	Improvise a short dance phrase with a clear beginning and ending. **Clarifications:** e.g., twist, bend, swing, bounce, freeze
DA.K.O.3.1:	Use movement to express a feeling, idea, or story.
DA.K.O.3.2:	Respond to a dance through movement and words.
DA.K.S.1.1:	Discover movement through exploration, creativity, and imitation. **Clarifications:** e.g., use of space, tempo, level, direction
DA.K.S.1.2:	Discover new ways to move by using imitation and imagery. **Clarifications:** e.g., animals, swaying trees, falling snow
DA.K.S.2.1:	Follow classroom directions.
DA.K.S.2.2:	Retain simple sequences and accurate dance terminology over time.
DA.K.S.3.1:	Refine gross- and fine-locomotor skills through repetition.
DA.K.S.3.2:	Imitate simple exercises for strengthening and stretching the body.
DA.K.S.3.3:	Develop kinesthetic awareness by maintaining personal space and moving in pathways through space.
DA.K.S.3.4:	Move to various musical and rhythmic accompaniments, responding to changes in tempo and dynamics.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts.

- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.

	• Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.K.C.2.1:	Recognize locomotor skills. **Clarifications:** Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.
PE.K.C.2.2:	Recognize physical activities have safety rules and procedures. **Clarifications:** An example would be to put equipment away when not in use in order to keep the physical activity area safe.
PE.K.R.6.2:	Identify a benefit of willingly trying new movements and motor skills.
PE.K.R.6.3:	Identify the benefits of continuing to participate when not successful on the first try.
MU.K.C.1.1:	Respond to music from various sound sources to show awareness of steady beat. **Clarifications:** e.g., steady beat, pulse
MU.K.C.2.1:	Identify similarities and/or differences in a performance.
MU.K.O.1.1:	Respond to beat, rhythm, and melodic line through imitation. **Clarifications:** e.g., locomotor and non-locomotor movement, body levels
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.K.C.1.1:	Recognize healthy behaviors. **Clarifications:** Brushing teeth, adequate sleep, and cover mouth for cough and sneeze.

General Course Information and Notes

VERSION DESCRIPTION

Kindergarten students in dance class explore their world through a variety of creative dance concepts, learning strategies, rhythms, stories, songs, manipulatives, images, and

creative play to help them express control and imagination, advance motor skills, increase kinesthetic awareness and coordination, and develop social skills. Instruction facilitates their acquisition of knowledge and skills required to self-express, communicate, create with imagination and artistic intent, and infuse concepts from various academic content areas and cultural origins.

GENERAL NOTES

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as the certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Dance - Grade 1 (#5003020) 2022 - And Beyond

Course Standards

Name	Description
DA.1.C.1.1:	Identify and respond to the feelings expressed in movement pieces.
DA.1.C.1.2:	Repeat simple movements from verbal cueing. **Clarifications:** e.g., "right foot front," "arms to the side"
DA.1.C.2.1:	Make movement choices, using one or more given elements, to complete a short phrase. **Clarifications:** e.g., levels, tempos, directions, energy
DA.1.C.3.1:	Share personal opinions on selected movement pieces, recognizing that individual opinions often vary.
DA.1.F.1.1:	Create dances, with or without manipulatives, which imitate animated shapes, letters, animals, and/or storybook characters. **Clarifications:** e.g., scarves, long ribbons, soft fabric squares and rectangles
DA.1.F.3.1:	Follow directions given by the teacher or by peers in small groups.
DA.1.H.1.1:	Practice children's dances from around the world.
DA.1.H.3.1:	Perform movement that infuses music, language, and numbers.
DA.1.O.1.1:	Experiment with given elements to develop knowledge of their characteristics. **Clarifications:** e.g., fast/slow, big/small, smooth/sharp, curved/straight
DA.1.O.1.2:	Demonstrate awareness of expectations in class and at informal performances.
DA.1.O.2.1:	Select and apply a change in tempo or level to transform the meaning, feeling, or look of a movement or phrase.
DA.1.O.3.1:	Create movement phrases to express a feeling, idea, or story.
DA.1.O.3.2:	Use accurate dance terminology to describe specified movements and shapes.
DA.1.S.1.1:	Discover movement through exploration, creativity, self-discovery, and experimentation in dance.
DA.1.S.1.2:	Explore how body parts move by using imitation and imagery. **Clarifications:** e.g., elbow circles: turn a crank; flex/point: gas peddle
DA.1.S.2.1:	Listen attentively and follow directions when learning movement skills and sequences. **Clarifications:** e.g., clapping, visual or verbal cue
DA.1.S.2.2:	Practice simple dance sequences with assistance.
DA.1.S.2.3:	Perform simple movements on both sides of the body. **Clarifications:** e.g., shake right hand, shake left hand
DA.1.S.3.1:	Imitate basic body postures and maintain a pose in a held stance. **Clarifications:** e.g., curved, straight, bent, crooked
DA.1.S.3.2:	Repeat simple body movements to strengthen and stretch the body. **Clarifications:** e.g., bend front and side, jump, hop
DA.1.S.3.3:	Practice moving body parts in and through space to develop coordination. **Clarifications:** e.g., arms with legs, up/down, forward/backward, skipping with arm swings
DA.1.S.3.4:	Demonstrate acuity in transferring given rhythmic patterns from the aural to the kinesthetic. **Clarifications:** e.g., verbalized rhythm transferred to the feet
DA.1.S.3.5:	Explore, manipulate, and manage concepts of personal and general space by moving in different levels and directions.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	• Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.1.C.2.1:	Identify the critical elements of locomotor skills. **Clarifications:** Some examples of critical elements of locomotor skills are step-hop for skipping and use of one foot for hopping.
PE.1.C.2.2:	Identify safety rules and procedures for teacher-selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.1.C.2.9:	Name examples of warm-up and cool-down exercises. **Clarifications:** An example of a warm-up exercise is an activity that gets your blood flowing. An example of a cool-down exercise is one that slows your heart rate.
PE.1.R.6.2:	Identify feelings resulting from participation in physical activity.
PE.1.R.6.3:	Identify the benefits of learning new movement skills.
TH.1.O.1.1:	Demonstrate how the parts of the story go together by acting out a story with a beginning, middle, and end.
TH.1.S.1.1:	Exhibit appropriate audience etiquette and response.
	Use simple acting techniques to portray a person, place, action, or thing.

TH.1.S.3.1:	**Clarifications:** e.g., pantomime, voice
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.1.C.1.1:	Identify healthy behaviors. **Clarifications:** Eating breakfast, playing safely on the playground, wearing helmet on bike, and participating in moderate to vigorous physical activity.
SC.1.P.12.1:	Demonstrate and describe the various ways that objects can move, such as in a straight line, zigzag, back-and-forth, round-and-round, fast, and slow.

General Course Information and Notes

VERSION DESCRIPTION

First-grade students in dance class explore their expanding world as they create, interpret, and replicate steps, movement patterns, shapes, rhythms, and dances inspired by a variety of stories, songs, ideas, cultures, manipulatives, images, creative play, and technologies. Through structured and unstructured movement, students stretch their imaginations, strengthen their bodies, and learn to make choices in a risk-free environment. Instruction facilitates their acquisition of knowledge and skills required to self-express, create with artistic intent, and infuse concepts from various academic content areas and cultural origins.

GENERAL NOTES

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

Course Standards

Name	Description
DA.2.C.1.1:	Explain, using accurate dance terminology, how teacher-specified elements of dance are used in a phrase or dance piece. **Clarifications:** e.g., body, effort/energy, space, time, groups, solos, names of steps
DA.2.C.1.2:	Demonstrate listening, observing, and following skills while learning dance movements; and perform them with the teacher and alone.
DA.2.C.1.3:	Express the meaning or feeling of a dance piece creatively, using pictures, symbols, and/or words.
DA.2.C.2.1:	Decide which of two movements will express a desired result.
DA.2.C.3.1:	Share personal opinions about a dance piece, using a mix of accurate dance and non-dance terminology.
DA.2.F.1.1:	Create dances that interpret animals and storybook or other imagined characters.
DA.2.F.3.1:	Follow directions given by the teacher or peers, and work successfully in small-group, cooperative settings.
DA.2.H.1.1:	Perform a variety of dances to explore their origins, cultures, and themes.
DA.2.H.3.1:	Create a dance phrase using numbers, shapes, and patterns.
DA.2.H.3.2:	Describe connections between creating in dance and creating in other content areas.
DA.2.O.1.1:	Identify the elements of dance in planned and improvised dance pieces to show early awareness of structure. **Clarifications:** e.g., body, action, space, time, energy, relationships
DA.2.O.1.2:	Identify and practice specified procedures and etiquette in dance class and at performances.
DA.2.O.2.1:	Change the feeling, meaning, or look of a movement phrase by altering the elements of dance. **Clarifications:** e.g., tempo, direction, level, quality of movement
DA.2.O.3.1:	Use movement to interpret feelings, stories, pictures, and songs.
DA.2.O.3.2:	Describe a dancer or dance piece using words, pictures, or movements.
DA.2.S.1.1:	Demonstrate basic movement through kinesthetic exploration. **Clarifications:** e.g., stretch, collapse, sustain
DA.2.S.1.2:	Explore dance sequences by creating and imitating images that move through space.
DA.2.S.1.3:	Follow body-part initiation through space to increase kinesthetic awareness.
DA.2.S.2.1:	Demonstrate focus and concentration while listening to instructions and observing others' movement.
DA.2.S.2.2:	Demonstrate simple dance sequences to show memorization and presentation skills.
DA.2.S.2.3:	Follow and repeat movement on opposite sides of the body.
DA.2.S.3.1:	Replicate basic positions with clear body lines and correct alignment. **Clarifications:** e.g., lengthened torso, stretched legs, curved arms
DA.2.S.3.2:	Perform bending and reaching exercises to increase strength, stamina, flexibility, and range of motion. **Clarifications:** e.g., feet/arms, cambre, side stretch, deep lunge, exercises of bend/reach
DA.2.S.3.3:	Repeat given movements to show coordination between body parts. **Clarifications:** e.g., skipping with arm movements, skips with turns, spotting head
DA.2.S.3.4:	Maintain a demonstrated rhythm in time to musical accompaniment.
DA.2.S.3.5:	Maintain balance in basic positions and in shifting weight through plie.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.

- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.

MA.K12.MTR.7.1:	• Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.2.C.2.2:	Identify safety rules and procedures for selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.2.C.2.8:	Explain the importance of warm-up and cool-down activities. **Clarifications:** An example of the importance for warm-up activities is the prevention of injuries.
PE.2.R.6.2:	Discuss the relationship between skill competence and enjoyment.
PE.2.R.6.3:	Identify ways to contribute as a member of a cooperative group.
VA.2.H.1.2:	Distinguish between appropriate and inappropriate audience behavior.
VA.2.S.1.3:	Explore art from different time periods and cultures as sources for inspiration.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.2.C.2.4:	Explain the ways that rules make the classroom, school, and community safer. **Clarifications:** Walking not running, waiting your turn, and following traffic laws.
TH.2.F.1.1:	Create and sustain a character inspired by a class reading or activity.

General Course Information and Notes

VERSION DESCRIPTION

Second-grade students in dance class establish use of the body through structured and unstructured movement, exploring the elements of dance through a variety of techniques, forms, and dance traditions. As they create, interpret, and replicate steps, movement patterns, shapes, rhythms, and dances inspired by a variety of stories, music, ideas, cultures, images, and technologies, students stretch their imaginations, strengthen their bodies, and learn to make choices in a risk-free environment. Instruction fosters skills and knowledge that enable students to respond to dance in ways that facilitate creativity with artistic expression, self-discipline, and a connection to other content areas and cultures.

GENERAL NOTES

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as the certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Dance-Intermediate 1 (#5003040) 2022 - And Beyond

Course Standards

Name	Description
DA.3.C.1.1:	Identify one or more elements and, using accurate dance terminology, discuss how they are used to shape a piece into a dance.
DA.3.C.1.2:	Learn movement quickly and accurately through application of learning strategies. **Clarifications:** e.g., associate words and mental images, create a narrative
DA.3.C.1.3:	Identify and demonstrate changes made in various elements of a movement piece.
DA.3.C.2.1:	Apply knowledge of basic elements of dance to identify examples in a dance piece.
DA.3.C.2.2:	Share and apply feedback to improve the quality of dance movement.
DA.3.C.3.1:	Examine one element of a dance piece and judge how well it expressed or supported the given intent.
DA.3.F.1.1:	Create dance pieces that interpret characters from stories, poems, and other literature sources.
DA.3.F.3.1:	Be on time and prepared for classes, and work successfully in small- and large-group cooperative settings, following directions given by the teacher or peers.
DA.3.H.1.1:	Practice and perform social, cultural, or folk dances, using associated traditional music, to identify commonalities and differences.
DA.3.H.2.1:	Discuss the roles that dance has played in various social, cultural, and folk traditions.
DA.3.H.3.1:	Create and perform a dance, inspired by developmentally appropriate literature, stories, or poems, that has a beginning, middle, and end. **Clarifications:** e.g., language arts: essay-writing
DA.3.H.3.2:	Identify connections between the skills required to learn dance and the skills needed in other learning environments.
DA.3.O.1.1:	Relate how the elements of dance are applied in classwork to how they are used in dance pieces. **Clarifications:** e.g., body, action, space, time, energy, relationships
DA.3.O.1.2:	Identify the procedures and structures common to dance classes.
DA.3.O.2.1:	Select an element to change within a phrase and discuss the results.
DA.3.O.3.1:	Translate words, pictures, or movements into dance to express ideas or feelings.
DA.3.O.3.2:	Use accurate dance terminology to respond to and communicate about dance.
DA.3.O.3.3:	Share, using accurate dance terminology, ways in which dance communicates its meaning to the audience. **Clarifications:** e.g., pantomime, gestures
DA.3.S.1.1:	Create movement to express feelings, images, and stories.
DA.3.S.1.2:	Respond to improvisation prompts, as an individual or in a group, to explore new ways to move.
DA.3.S.1.3:	Explore positive and negative space to increase kinesthetic awareness.
DA.3.S.1.4:	Create dance sequences, based on expanded, everyday gestures and/or movements.
DA.3.S.2.1:	Explain why focus and cooperation are important in class and performance.
DA.3.S.2.2:	Learn and repeat movement using observation and listening skills.
DA.3.S.2.3:	Practice simple dance movements on both sides and facing in different directions.
DA.3.S.2.4:	Use learning strategies to remember movement between classes and rehearsals. **Clarifications:** e.g., write down steps and corrections, draw floor patterns, verbalize
DA.3.S.3.1:	Demonstrate appropriate posture with strength in the abdomen and length in the spine.
DA.3.S.3.2:	Perform safe practice exercises for increasing strength, flexibility, and range of motion.
DA.3.S.3.3:	Perform far-reach exercises to demonstrate knowledge of the use of line in movement.
DA.3.S.3.4:	Identify and demonstrate an understanding of the elements of time.
DA.3.S.3.5:	Maintain center line of balance in place, in transfer of weight, and while changing levels.
DA.3.S.3.6:	Execute a movement sequence, in and through space, with a specific expression.
DA.3.S.3.7:	Rehearse movements and dance sequences to develop coordination and agility in muscular groups.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

MA.K12.MTR.7.1:	Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.3.C.2.2:	Understand the importance of safety rules and procedures in all physical activities. **Clarifications:** An example of a safety procedure is wearing a helmet when riding a bicycle.
PE.3.M.1.10:	Perform one dance accurately. **Clarifications:** Some examples of dances are square, contra, step and social.
PE.3.R.6.1:	List personally challenging physical-activity experiences.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.3.C.1.1:	Describe healthy behaviors that affect personal health. **Clarifications:** Covering mouth cough/sneeze, washing hands before eating and after using the bathroom, performing daily physical activity, never using other's hair/toothbrushes, preventing the spread of germs, exercising regularly, avoiding junk food, and avoiding tobacco products.
SC.3.P.10.2:	Recognize that energy has the ability to cause motion or create change.
TH.3.C.2.2:	Discuss the meaning of an artistic choice to support development of critical thinking and decision-making skills.
VA.3.H.1.3:	Identify and be respectful of ideas important to individuals, groups, or cultures that are reflected in their artworks.

General Course Information and Notes

VERSION DESCRIPTION

Third-grade* students in dance class apply knowledge of the basic elements and principles of dance through improvisation and structured practice of locomotor and non-locomotor patterns, steps, positions, and actions of the body requiring strength, coordination, and flexibility. The creative process facilitates aesthetic and affective progression, as well as an awareness of historical perspectives and contemporary ideas in the arts that enable students to identify connections between skills required in dance and skills required in other content areas.

GENERAL NOTES

* Intermediate Dance 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the upper elementary grades. Dance teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence. Examples: • A 3rd grade class that has taken Dance previously should be enrolled in Intermediate Dance 1 and progress through the series in subsequent grades. • 4th graders beginning formal instruction in Dance for the first time may be enrolled, as a class, in Intermediate Dance 1, and must then progress to Intermediate Dance 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Dance-Intermediate 2 (#5003050) 2022 - And Beyond

Course Standards

Name	Description
DA.4.C.1.1:	Create a tableau, theme, or main idea in a dance piece to explore the potential of shapes and space. **Clarifications:** e.g., symmetrical, asymmetrical, twisted, curved, rounded, curled, arched, spiraled, angular, flat
DA.4.C.1.2:	Learn and produce short movement sequences, assisted by the teacher, using observation, imitation, and musical cues.
DA.4.C.1.3:	Identify points within a dance piece at which mood, character, or meaning change abruptly or evolve.
DA.4.C.2.1:	Apply knowledge of the basic elements of dance to suggest changes in a movement piece.
DA.4.C.2.2:	Demonstrate the ability to participate in objective feedback sessions as a means of evaluating one's own and others' work.
DA.4.C.3.1:	Evaluate a dance by examining how effectively two or more elements were used in the piece. **Clarifications:** e.g., body, space, time, energy/dynamics, relationships
DA.4.F.1.1:	Collaborate with others to create dance pieces that show innovative movement options. **Clarifications:** e.g., elements of weather, magnets, real or imagined multi-part machines, fables and stories from history
DA.4.F.2.1:	Describe the various roles and responsibilities associated with careers in dance. **Clarifications:** e.g., choreographer, dancer, teacher
DA.4.F.3.1:	Be on time, prepared, and focused in classes, and share skills and ideas with peers appropriately.
DA.4.H.1.1:	Perform dances from different cultures, emulating the essential movement characteristics and traditions.
DA.4.H.1.2:	Discuss why people of various ages and cultures dance and how they benefit from doing so.
DA.4.H.2.1:	Identify and examine important figures, historical events, and trends that have helped shape dance.
DA.4.H.3.1:	Create a dance with student-selected components from other content areas and/or personal interests.
DA.4.H.3.2:	Use improvisation and movement studies to explore concepts from other content areas. **Clarifications:** e.g., science, math, reading, history
DA.4.H.3.3:	Describe how dance and music can each be used to interpret and support the other.
DA.4.O.1.1:	Describe how the elements of dance are used in class and in dance pieces. **Clarifications:** e.g., body, action, space, time, energy, relationships
DA.4.O.1.2:	Describe how the procedures and structures in a dance class help create a positive and healthful environment for learning.
DA.4.O.1.3:	Investigate the positions, initiations, and movements within a given step.
DA.4.O.2.1:	Experiment with a dance phrase by using a variety of elements to create a variation on the original work.
DA.4.O.2.2:	Describe how the contributions of one or more selected innovators changed a particular genre or dance form.
DA.4.O.3.1:	Express ideas through movements, steps, and gestures.
DA.4.O.3.2:	Use accurate dance terminology as a means of asking questions, discussing dances, and learning new dance pieces.
DA.4.O.3.3:	Respect varying interpretations of a dance, recognizing that viewer perspectives may be different.
DA.4.S.1.1:	Create movement sequences that are personally meaningful and/or express an idea.
DA.4.S.1.2:	Improvise to music, using choreographic principles, and match tempo, phrasing, style, and emotion.
DA.4.S.1.3:	Use kinesthetic awareness to explore movement in personal space and relative to other dancers.
DA.4.S.1.4:	Change isolations, level, direction, or tempo to explore movement choices.
DA.4.S.2.1:	Display attention, cooperation, and focus during class and performance.
DA.4.S.2.2:	Recall and perform movement in short sequences to improve memorization and speed of replication. **Clarifications:** e.g., associate words and mental images, create a narrative
DA.4.S.2.3:	Replicate movement sequences on opposite sides of the body or in the opposite direction.
DA.4.S.2.4:	Demonstrate application and memorization of corrections given by the teacher.
DA.4.S.3.1:	Observe and practice appropriate alignment of the torso, arms, and legs in a given dance sequence, using assisted correction, allegory, and/or imagery to support understanding and successful repetition. **Clarifications:** e.g., "spine is like a string of pearls"
DA.4.S.3.2:	Identify weaknesses in personal strength, flexibility, and range of motion, and apply basic, safe practice exercises to address the need.
DA.4.S.3.3:	Practice weight shift and transitions through plie, elevation, pique, and chasse.
DA.4.S.3.4:	Replicate timing, rhythm, and accents demonstrated by the teacher and peers.
DA.4.S.3.5:	Maintain center of balance in various positions.
DA.4.S.3.6:	Practice varying expression and intention by moving in dance sequences using direct and indirect space and active and passive energy.
DA.4.S.3.7:	Repeat dance sequences with increasing speed and articulation to develop agility and coordination.
	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task.

- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:	• Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.4.C.2.2:	Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a golf club during striking activities.
PE.4.M.1.10:	Perform two or more dances accurately. **Clarifications:** Some examples of dances are line, square, contra, folk, step and social.
PE.4.R.6.1:	Discuss how physical activity can be a positive opportunity for social and group interaction.

TH.4.C.2.1:	Provide a verbal critique to help strengthen a peer's performance.
TH.4.C.2.2:	Reflect on the strengths and needs of one's own performance.
TH.4.S.1.1:	Exhibit proper audience etiquette, give constructive criticism, and defend personal responses.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.4.C.1.4:	Describe ways to prevent common childhood injuries and health problems. **Clarifications:** Not sharing head gear, getting yearly check-ups, washing hands before eating and after using bathroom, following pedestrian/vehicle/bicycle safety rules, and brushing/flossing teeth to prevent dental cavities.

General Course Information and Notes

VERSION DESCRIPTION

Fourth-grade* students develop reflective critical and creative-thinking skills to solve artistic problems in dance, make informed judgments about the significance of dance, and explore why people of various cultures dance. The process provides students with opportunities to perform extended phrases and original and established compositions requiring strength, flexibility, a variety of rhythmical patterns, changes in direction, focus, and concentration. They also learn how to assess themselves and others constructively and respectfully.

GENERAL NOTES

* Intermediate Dance 1, 2, and 3 have been designed in two ways: 1) to challenge students *on grade level* who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the upper elementary grades. Dance teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence. Examples: • A 3rd grade class that has taken Dance previously should be enrolled in Intermediate Dance 1 and progress through the series in subsequent grades. • 4th graders beginning formal instruction in Dance for the first time may be enrolled, as a class, in Intermediate Dance 1, and must then progress to Intermediate Dance 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as the certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Dance - Intermediate 3 (#5003060) 2022 - And Beyond

Course Standards

Name	Description
DA.5.C.1.1:	Identify and discuss, using background knowledge of structure and personal experience, concepts and themes in dance pieces.
DA.5.C.1.2:	Learn and produce movement sequences, assisted by the teacher, with speed and accuracy. **Clarifications:** e.g., observe, imitate, apply musical cues
DA.5.C.1.3:	Demonstrate the use of time, space, effort, and energy to express feelings and ideas through movement.
DA.5.C.2.1:	Visualize and experiment with a variety of potential solutions to a given dance problem and explore the effects of each option.
DA.5.C.2.2:	Demonstrate the ability to share objective, positive feedback and constructive criticism, and apply suggested changes with the guidance of others.
DA.5.C.3.1:	Critique a dance piece using established criteria. **Clarifications:** e.g., provide positive feedback in a safe environment, use a rubric
DA.5.F.1.1:	Evaluate the effectiveness of combining other works of art with specified works of dance. **Clarifications:** e.g., music, literature, information media
DA.5.F.1.2:	Evaluate the impact of technology on a specified work of dance. **Clarifications:** e.g., video, projections
DA.5.F.1.3:	Incorporate creative risk-taking when improvising or developing a dance phrase.
DA.5.F.2.1:	Identify dance and dance-related businesses in the community and describe their impact. **Clarifications:** e.g., public service, cross-cultural connections, economic impact, enrichment
DA.5.F.3.1:	Show leadership by sharing ideas or by demonstrating or teaching skills to others.
DA.5.H.1.1:	Share and perform dances from diverse cultural or historical backgrounds and describe their significance within their original context.
DA.5.H.1.2:	Describe the dances, music, and authentic costumes from specified world cultures.
DA.5.H.2.1:	Describe historical developments and the continuing evolution of various dance forms.
DA.5.H.2.2:	Classify a dance performance or repertoire piece by origin, genre, or period. **Clarifications:** e.g., African, Asian, Indian, ballet, folk, modern, tap
DA.5.H.3.1:	Create a dance, inspired by another art form, which shows one or more connections between the two disciplines. **Clarifications:** e.g., music, theatre, visual art
DA.5.H.3.2:	Demonstrate how math and science concepts may be used in dance. **Clarifications:** e.g., spacial relationships, groupings, symmetry, patterns, cycles, angles, reflections, rotations
DA.5.H.3.3:	Describe how the self-discipline required in dance training can be applied to other areas of study.
DA.5.H.3.4:	Perform a movement study based on a personal interpretation of a work of art.
DA.5.H.3.5:	Identify the use of world languages in various dance genres.
DA.5.O.1.1:	Analyze individual elements of a choreographic work to determine how they comprise the structure of a dance piece.
DA.5.O.1.2:	Review and apply the procedures and structures of class and performance to gain respect for their purposes and the traditions of the discipline.
DA.5.O.1.3:	Identify and explain the positions and movements within a given step or combination.
DA.5.O.2.1:	Make one or more revisions to a given dance phrase and explain how the meaning or feeling was altered.
DA.5.O.2.2:	Identify ways in which dance innovators contributed to new directions in the art form.
DA.5.O.3.1:	Practice movements, steps, pantomime, and gestures as a means of communicating ideas or intent without using words.
DA.5.O.3.2:	Use accurate dance terminology as a means of identifying, communicating, and documenting movement vocabulary.
DA.5.O.3.3:	Use accurate dance terminology and/or movement vocabulary to respond to movement based on personal ideas, values, or point of view.
DA.5.S.1.1:	Apply choreographic principles to create dance steps or sequences.
DA.5.S.1.2:	Demonstrate dynamic changes in response to one or more sources. **Clarifications:** e.g., music, drum beat, poetry
DA.5.S.1.3:	Manipulate given elements of a phrase to produce variations and expand movement choices.
DA.5.S.1.4:	Use kinesthetic awareness to respond to shared movement with one or more dancers. **Clarifications:** e.g., counter-balance, mirroring, unison
DA.5.S.2.1:	Demonstrate the ability to focus and maintain presence during dance classes and performances.
DA.5.S.2.2:	Practice purposefully, over time, to improve technique and performance in a choreographed piece.
DA.5.S.2.3:	Follow and repeat movement on the opposite side of the body or in reverse order.
DA.5.S.2.4:	Adapt and apply ensemble corrections to personal work.

DA.5.S.3.1:	Demonstrate basic posture, engage abdominal muscles, lengthen the spine, and show awareness of shoulder-to-hip line.
DA.5.S.3.2:	Increase strength, flexibility, and range of motion in the joints based on an awareness of safe practices and knowledge of basic anatomy and physiology.
DA.5.S.3.3:	Practice shifting weight from one leg to another using space and various levels and shapes.
DA.5.S.3.4:	Perform a phrase that uses complex changes in rhythms and meters. **Clarifications:** e.g., 2/4 to 3/4, 3/4 to 6/8
DA.5.S.3.5:	Apply understanding of support, weight placement, and center of gravity to attain balance.
DA.5.S.3.6:	Change the expression or intention of a given dance sequence by applying two contrasting dynamic elements.
DA.5.S.3.7:	Dissect dance sequences to understand how movement is initiated, articulated, and practiced, and to develop agility and coordination.
DA.5.S.3.8:	Explore the use of sagittal, vertical, and horizontal line.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems.

MA.K12.MTR.5.1:	• Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to

	do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.5.M.1.10:	Perform a variety of dances accurately. **Clarifications:** Some examples of dances are line, square, contra, folk, step and social.
PE.5.R.6.1:	Describe how participation in physical activity is a source of self-expression and meaning.
TH.5.H.1.2:	Participate in a performance to explore and celebrate a variety of human experiences.
TH.5.S.3.1:	Create and sustain imagined characters and relationships, using basic acting skills, to tell an original story based on historical, literary, or everyday situations. **Clarifications:** e.g., breath control, diction, concentration, control of isolated body parts
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.5.C.1.4:	Compare ways to prevent common childhood injuries and health problems. **Clarifications:** Wearing appropriate restraints, avoiding food with no nutritional value, and pursuing yearly health check-ups.

General Course Information and Notes

VERSION DESCRIPTION

Fifth-grade* students learn to classify, create, and replicate extended dance phrases and original and established compositions requiring concentration, strength, agility, creative risk-taking, use of technology, and knowledge of cultural tradition in at least two dance forms to cultivate a personal definition of and appreciation for dance. They develop reflective critical and creative-thinking skills to solve artistic problems in dance, make informed judgments about the significance of dance in various cultures, and learn how to critique dance performance constructively and with respect based on established and student-created criteria.

GENERAL NOTES

* Intermediate Dance 1, 2, and 3 have been designed in two ways: 1) to challenge students *on grade level* who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the upper elementary grades. Dance teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence. Examples: • A 3rd grade class that has taken Dance previously should be enrolled in Intermediate Dance 1 and progress through the series in subsequent grades. • 4th graders beginning formal instruction in Dance for the first time may be enrolled, as a class, in Intermediate Dance 1, and must then progress to Intermediate Dance 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as the certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

M/J Theatre 1 (#0400000) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.5:	Describe how a theatrical activity can entertain or instruct an audience.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.2.2:	Identify industries within the state of Florida that have a significant impact on local economies, in which the arts are either directly or indirectly involved in their success.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.4:	Discuss the differences between presentational and representational theatre styles.
TH.68.H.2.8:	Identify and describe theatrical resources in the community, including professional and community theatres, experts, and sources of scripts and materials.
TH.68.H.3.1:	Identify principles and techniques that are shared between the arts and other content areas. **Clarifications:** e.g., art elements, writing styles, science and math principles
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.5:	Describe how social skills learned through play participation are used in other classroom and extracurricular activities. **Clarifications:** e.g., cooperation, communication, collaboration
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.4:	Perform a scene or pantomime to demonstrate understanding of blocking and stage movement.
TH.68.O.3.1:	Compare theatre and its elements and vocabulary to other art forms.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:	**Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students learn the basics of building a character through such activities as pantomime, improvisation, and effective speaking using articulation, projection, and breathing. Students also learn the importance of technical theatre and explore the use of such elements as costumes, props, and scenery. Students practice writing for the theatre and explore various theatre roles and functions. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

M/J Theatre 2 (#0400010) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.6:	Analyze selections from the canon of great world drama as a foundation for understanding the development of drama over time. **Clarifications:** e.g., Sophocles, Shakespeare, Moliere, Ibsen, Chekhov, O'Neill, Brecht, Williams, Beckett, Miller, Wilson, Simon
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.2:	Keep a rehearsal journal to document individual performance progress.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.2.4:	Defend personal responses to a theatre production.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.C.3.2:	Compare a film version of a story to its original play form.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.2.1:	Research careers in the global economy that are not directly related to the arts, but include skills that are arts-based or derive part of their economic impact from the arts.
TH.68.F.2.3:	Identify businesses that are directly or indirectly associated with school and community theatre, and calculate their impact on the local and/or regional economy. **Clarifications:** e.g., caterers, neighborhood eateries, fabric stores, paint and paintbrush manufacturers, orchestrators, playwrights, babysitters
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.4:	Create a monologue or story that reflects one's understanding of an event in a culture different from one's own.
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.1.6:	Discuss how a performer responds to different audiences.
TH.68.H.2.3:	Analyze theatre history and dramatic literature in the context of societal and cultural history.
TH.68.H.2.7:	Define theatre genres from different periods in history, giving examples of each.
TH.68.H.3.1:	Identify principles and techniques that are shared between the arts and other content areas. **Clarifications:** e.g., art elements, writing styles, science and math principles
TH.68.H.3.2:	Read plays from a variety of genres and styles and compare how common themes are expressed in various art forms.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.O.1.1:	Compare different processes an actor uses to prepare for a performance.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.2.2:	Explain how a performance would change if depicted in a different location, time, or culture.
TH.68.O.2.3:	Write alternate endings for a specified play.
TH.68.O.3.2:	Explore how theatre and theatrical works have influenced various cultures.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.1.4:	Discuss the ways in which theatre experiences involve empathy and aesthetic distance. **Clarifications:** e.g., vicarious identification with characters and actions, recognition that the play is not real life
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task.

- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.

MA.K12.MTR.6.1:	• Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous theatre experience and instruction continue to study acting, design, and dramatic literature to increase the enjoyment and understanding of what is

required to prepare plays for the public. Students explore theatre history, study the great American playwrights, examine the cultural and historical contributions to theatre, and begin to use the information to inform and improve their theatre knowledge and skills. Students begin to use the basic elements of theatre design through practical application and projects. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

TH.68.O.1.1:	Compare different processes an actor uses to prepare for a performance.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.2.2:	Explain how a performance would change if depicted in a different location, time, or culture.
TH.68.O.2.3:	Write alternate endings for a specified play.
TH.68.O.3.2:	Explore how theatre and theatrical works have influenced various cultures.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.1.4:	Discuss the ways in which theatre experiences involve empathy and aesthetic distance. **Clarifications:** e.g., vicarious identification with characters and actions, recognition that the play is not real life
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
TH.68.S.3.4:	Lead small groups to safely select and create elements of technical theatre to signify a character or setting. **Clarifications:** e.g., scenery, properties, lighting, costumes, make-up, sound

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

MA.K12.MTR.6.1:	Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students continue to build skills and knowledge as they explore aspects of theatre. Students explore theatre history, study the great American playwrights, examine the cultural and historical contributions to theatre, and improve their theatre knowledge and skills. Students learn about and begin to use the basic elements of theatre design through practical application and projects. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

M/J Theatre 3 and Career Planning (#0400025) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.1:	Devise an original work based on a community issue that explores various solutions to a problem. **Clarifications:** e.g., health, environment, politics, bullying
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.4:	Create and present a design, production concept, or performance and defend artistic choices.
TH.68.C.1.6:	Analyze selections from the canon of great world drama as a foundation for understanding the development of drama over time. **Clarifications:** e.g., Sophocles, Shakespeare, Moliere, Ibsen, Chekhov, O'Neill, Brecht, Williams, Beckett, Miller, Wilson, Simon
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.2.1:	Research careers in the global economy that are not directly related to the arts, but include skills that are arts-based or derive part of their economic impact from the arts.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.4:	Create a monologue or story that reflects one's understanding of an event in a culture different from one's own.
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.3:	Analyze theatre history and dramatic literature in the context of societal and cultural history.
TH.68.H.3.2:	Read plays from a variety of genres and styles and compare how common themes are expressed in various art forms.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.2:	Explain how a performance would change if depicted in a different location, time, or culture.
TH.68.O.3.2:	Explore how theatre and theatrical works have influenced various cultures.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
TH.68.S.3.4:	Lead small groups to safely select and create elements of technical theatre to signify a character or setting. **Clarifications:** e.g., scenery, properties, lighting, costumes, make-up, sound
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.

- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.

	• Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.
MA.K12.MTR.7.1:	**Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning.
ELA.K12.EE.1.1:	**Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
	Read and comprehend grade-level complex texts proficiently.
ELA.K12.EE.2.1:	**Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
	Make inferences to support comprehension.
ELA.K12.EE.3.1:	**Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
ELA.K12.EE.4.1:	**Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	**Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students explore advanced concepts and other aspects of theatre, and explore the elements of theatre design through practical application, projects, and increasingly complex dramatic literature. In parallel with their learning opportunities in theatre, they investigate careers in a wide variety of fields, including theatre and the other arts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Special Note: Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida

Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

Career and Education Planning Course Standards – Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

2.0 Develop skills to locate, evaluate, and interpret career information.

3.0 Identify and demonstrate processes for making short and long term goals.

4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. Course Standards

Name	Description
TH.68.C.1.1:	Devise an original work based on a community issue that explores various solutions to a problem. **Clarifications:** e.g., health, environment, politics, bullying
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.4:	Create and present a design, production concept, or performance and defend artistic choices.
TH.68.C.1.6:	Analyze selections from the canon of great world drama as a foundation for understanding the development of drama over time. **Clarifications:** e.g., Sophocles, Shakespeare, Moliere, Ibsen, Chekhov, O'Neill, Brecht, Williams, Beckett, Miller, Wilson, Simon
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.2:	Keep a rehearsal journal to document individual performance progress.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.2.4:	Defend personal responses to a theatre production.
TH.68.C.3.2:	Compare a film version of a story to its original play form.
TH.68.C.3.3:	Determine personal strengths and challenges, using evaluations and critiques to guide selection of material for a portfolio.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.1.4:	Survey an aspect of theatre to understand the ways in which technology has affected it over time. **Clarifications:** e.g., staging, lights, costumes
TH.68.F.2.1:	Research careers in the global economy that are not directly related to the arts, but include skills that are arts-based or derive part of their economic impact from the arts.
TH.68.F.2.3:	Identify businesses that are directly or indirectly associated with school and community theatre, and calculate their impact on the local and/or regional economy. **Clarifications:** e.g., caterers, neighborhood eateries, fabric stores, paint and paintbrush manufacturers, orchestrators, playwrights, babysitters
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.1:	Explore potential differences when performing works set in a variety of historical and cultural contexts.
TH.68.H.1.2:	Analyze the impact of one's emotional and social experiences when responding to, or participating in, a play.
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.4:	Create a monologue or story that reflects one's understanding of an event in a culture different from one's own.
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.1:	Compare western theatre traditions with those of other cultures.
TH.68.H.2.2:	Identify examples of American musical theatre productions that reflect specific correlations to American history and culture. **Clarifications:** e.g., Hair: antiwar sentiment; Show Boat: discrimination; South Pacific: discrimination
TH.68.H.2.3:	Analyze theatre history and dramatic literature in the context of societal and cultural history.
TH.68.H.2.5:	Compare decorum, environments, and manners from a variety of cultures and historical periods to discover and influence historical acting styles and design choices.
TH.68.H.2.7:	Define theatre genres from different periods in history, giving examples of each.
TH.68.H.3.2:	Read plays from a variety of genres and styles and compare how common themes are expressed in various art forms.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.1:	Compare different processes an actor uses to prepare for a performance.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.1.4:	Discuss how the whole of a theatre performance is greater than the sum of its parts.
TH.68.O.2.2:	Explain how a performance would change if depicted in a different location, time, or culture.
TH.68.O.2.5:	Explain how the contributions of significant playwrights, performers, directors, designers, and producers from various cultures and historical periods have influenced the creative innovations of theatre.
TH.68.O.3.2:	Explore how theatre and theatrical works have influenced various cultures.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.1.3:	Describe criteria for the evaluation of dramatic texts, performances, direction, and production elements.
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.2.2:	Discuss and apply the theatrical production process to create a live performance.

TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.2:	Use the elements of dramatic form to stage a play. **Clarifications:** e.g., plot, character, dialogue, conflict and resolution, setting
TH.68.S.3.3:	Lead rehearsals of improvised and scripted scenes, communicating with cast and crew to create appropriate characterization and dramatic environments. **Clarifications:** e.g., people, events, time, place
TH.68.S.3.4:	Lead small groups to safely select and create elements of technical theatre to signify a character or setting. **Clarifications:** e.g., scenery, properties, lighting, costumes, make-up, sound
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:	• Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
	Use the accepted rules governing a specific format to create quality work. **Clarifications:**

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students study advanced acting, theatre history, and dramatic literature and read and write scenes and plays. Students' work brings together all facets of a theatre production, combining performance and technical theatre skills through collaboration on a variety of classroom and/or school productions. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.68.C.1.5:	Describe how a theatrical activity can entertain or instruct an audience.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.2.2:	Identify industries within the state of Florida that have a significant impact on local economies, in which the arts are either directly or indirectly involved in their success.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.5:	Describe how social skills learned through play participation are used in other classroom and extracurricular activities. **Clarifications:** e.g., cooperation, communication, collaboration
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:	• Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly

	quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

General Course Information and Notes

GENERAL NOTES

Students learn the basics of theatre arts by exploring a character through such activities as pantomime, improvisation and effective speaking using articulation, projection and breathing. Students also explore elements of technical theatre by exploring the use of such elements as costumes, props and scenery. Students practice writing for the theatre and explore various theatre roles and functions. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside of the school day to support, extend and assess learning in the classroom.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.5:	Describe how a theatrical activity can entertain or instruct an audience.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.4:	Discuss the differences between presentational and representational theatre styles.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.5:	Describe how social skills learned through play participation are used in other classroom and extracurricular activities. **Clarifications:** e.g., cooperation, communication, collaboration
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.4:	Perform a scene or pantomime to demonstrate understanding of blocking and stage movement.
TH.68.O.3.1:	Compare theatre and its elements and vocabulary to other art forms.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:	• Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:	4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Through simple scripted scenes, performance projects, and/or practical application, students learn to identify what makes performances believeable and explore the tools used to create, articulate, and execute them. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside of the school day to support, extend, and assess learning in the classroom.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

M/J Acting 2 (#0400045) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.2.4:	Defend personal responses to a theatre production.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.C.3.2:	Compare a film version of a story to its original play form.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.3:	Demonstrate creative risk-taking by incorporating personal experiences in an improvisation.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.1.6:	Discuss how a performer responds to different audiences.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.O.1.1:	Compare different processes an actor uses to prepare for a performance.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.4:	Discuss the ways in which theatre experiences involve empathy and aesthetic distance. **Clarifications:** e.g., vicarious identification with characters and actions, recognition that the play is not real life
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:

- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.

ELA.K12.EE.1.1:	In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

General Course Information and Notes

GENERAL NOTES

Students with previous acting experience continue to build skills and knowledge in acting through analysis, discussion, and classroom performance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside of the school day to support, extend, and assess learning in the classroom.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

M/J Introduction to Technical Theatre (#0400100) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.5:	Compare decorum, environments, and manners from a variety of cultures and historical periods to discover and influence historical acting styles and design choices.
TH.68.H.2.6:	Describe historical and cultural influences leading to changes in theatre performance spaces and technology. **Clarifications:** e.g., indoor theatres, proscenium, gas lighting, computers
TH.68.H.2.8:	Identify and describe theatrical resources in the community, including professional and community theatres, experts, and sources of scripts and materials.
TH.68.H.3.1:	Identify principles and techniques that are shared between the arts and other content areas. **Clarifications:** e.g., art elements, writing styles, science and math principles
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.5:	Describe how social skills learned through play participation are used in other classroom and extracurricular activities. **Clarifications:** e.g., cooperation, communication, collaboration
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.2:	Discuss how color, line, shape, and texture are used to show emotion in technical theatre elements. **Clarifications:** e.g., costume, scenery, lighting
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.3.1:	Compare theatre and its elements and vocabulary to other art forms.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.1.3:	Describe criteria for the evaluation of dramatic texts, performances, direction, and production elements.
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:	**Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Students are introduced to the elements of technical theatre, which includes costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Also important is students' technical knowledge of safety procedures and demonstrated safe operations of theatre equipment, tools, and raw materials. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

M/J Technical Theatre: Design and Production (#0400110) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.4:	Create and present a design, production concept, or performance and defend artistic choices.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.3:	Ask questions to understand a peer's artistic choices for a performance or design.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.F.3.2:	Develop a list of line items that would typically be found in a production budget for a performance. **Clarifications:** e.g., royalties, publicity, set, costumes, theatre rental
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.5:	Compare decorum, environments, and manners from a variety of cultures and historical periods to discover and influence historical acting styles and design choices.
TH.68.H.2.6:	Describe historical and cultural influences leading to changes in theatre performance spaces and technology. **Clarifications:** e.g., indoor theatres, proscenium, gas lighting, computers
TH.68.H.2.8:	Identify and describe theatrical resources in the community, including professional and community theatres, experts, and sources of scripts and materials.
TH.68.H.3.1:	Identify principles and techniques that are shared between the arts and other content areas. **Clarifications:** e.g., art elements, writing styles, science and math principles
TH.68.H.3.2:	Read plays from a variety of genres and styles and compare how common themes are expressed in various art forms.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.5:	Describe how social skills learned through play participation are used in other classroom and extracurricular activities. **Clarifications:** e.g., cooperation, communication, collaboration
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.2:	Discuss how color, line, shape, and texture are used to show emotion in technical theatre elements. **Clarifications:** e.g., costume, scenery, lighting
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.3.1:	Compare theatre and its elements and vocabulary to other art forms.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.1.3:	Describe criteria for the evaluation of dramatic texts, performances, direction, and production elements.
TH.68.S.2.1:	Discuss the value of collaboration in theatre and work together to create a theatrical production.
TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.3.4:	Lead small groups to safely select and create elements of technical theatre to signify a character or setting. **Clarifications:** e.g., scenery, properties, lighting, costumes, make-up, sound
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners.

- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

	• Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students' work focuses on learning the elements of technical theatre, which includes costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Also important is students' technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

M/J Musical Theatre 1 (#0400200) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.5:	Describe how a theatrical activity can entertain or instruct an audience.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.2:	Keep a rehearsal journal to document individual performance progress.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.C.3.3:	Determine personal strengths and challenges, using evaluations and critiques to guide selection of material for a portfolio.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.2.2:	Identify industries within the state of Florida that have a significant impact on local economies, in which the arts are either directly or indirectly involved in their success.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.2:	Identify examples of American musical theatre productions that reflect specific correlations to American history and culture. **Clarifications:** e.g., Hair: antiwar sentiment; Show Boat: discrimination; South Pacific: discrimination
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

ELA.K12.EE.1.1:	2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
DA.68.O.3.5:	Use accurate dance, theatre, and anatomical terminology to communicate with others in and related to the field of dance.
DA.68.S.3.2:	Develop strength, stamina, flexibility, and range of motion through safe practices and knowledge of basic anatomy and physiology.
DA.68.S.3.3:	Apply the mechanics of movement transitions and weight changes. **Clarifications:** e.g., body-part initiation, pelvic shift, fall and recovery
DA.68.S.3.4:	Perform, using dance technique, with musical accuracy and expression. **Clarifications:** e.g., on the counts, fill the music
DA.68.S.3.7:	Practice a variety of dance sequences to increase agility and coordination in movement patterns.
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.M.1.7:	Apply skill-related components of balance, reaction time, agility, coordination, power and speed to enhance performance levels.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Student's coursework focuses on, but is not limited to, basic acting, basic vocal performance, basic dance/movement, non-dance movement, and staging, which transfer readily to musical theatre literature. Students will survey the current trends in musical theatre by studying representative literature. Students will explore the unique staging and technical demands of musicals in contrast to non-musical plays. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Course Standards

Name	Description
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.1.6:	Analyze selections from the canon of great world drama as a foundation for understanding the development of drama over time. **Clarifications:** e.g., Sophocles, Shakespeare, Moliere, Ibsen, Chekhov, O'Neill, Brecht, Williams, Beckett, Miller, Wilson, Simon
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.2:	Keep a rehearsal journal to document individual performance progress.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.C.3.3:	Determine personal strengths and challenges, using evaluations and critiques to guide selection of material for a portfolio.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.1.4:	Survey an aspect of theatre to understand the ways in which technology has affected it over time. **Clarifications:** e.g., staging, lights, costumes
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.1:	Explore potential differences when performing works set in a variety of historical and cultural contexts.
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.5:	Describe one's own personal responses to a theatrical work and show respect for the responses of others.
TH.68.H.2.2:	Identify examples of American musical theatre productions that reflect specific correlations to American history and culture. **Clarifications:** e.g., Hair: antiwar sentiment; Show Boat: discrimination; South Pacific: discrimination
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.2.2:	Explain how a performance would change if depicted in a different location, time, or culture.
TH.68.O.2.4:	Perform a scene or pantomime to demonstrate understanding of blocking and stage movement.
TH.68.O.2.5:	Explain how the contributions of significant playwrights, performers, directors, designers, and producers from various cultures and historical periods have influenced the creative innovations of theatre.
TH.68.O.3.2:	Explore how theatre and theatrical works have influenced various cultures.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.1:	Describe the responsibilities of audience members, to the actors and each other, at live and recorded performances and demonstrate appropriate behavior.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.1.3:	Describe criteria for the evaluation of dramatic texts, performances, direction, and production elements.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
DA.68.C.1.3:	Evaluate, using personal and established criteria, how choreographic structures and/or production elements were designed to impact mood or aesthetic value within a dance piece. **Clarifications:** e.g., floor patterns, stage design, ABA, theme and variations, rondo, use of costumes, lights, props
DA.68.H.1.2:	Research and discuss the influence that social dances have had on the development of classical, theatrical, modern, and contemporary dance genres.
DA.68.O.3.5:	Use accurate dance, theatre, and anatomical terminology to communicate with others in and related to the field of dance.
DA.68.S.3.3:	Apply the mechanics of movement transitions and weight changes. **Clarifications:** e.g., body-part initiation, pelvic shift, fall and recovery
DA.68.S.3.4:	Perform, using dance technique, with musical accuracy and expression. **Clarifications:** e.g., on the counts, fill the music
DA.68.S.3.7:	Practice a variety of dance sequences to increase agility and coordination in movement patterns.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal.

MU.68.C.2.2:	**Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.C.2.6:	Identify the critical elements for successful performance in a variety of sport skills or physical activities.
PE.8.M.1.7:	Apply skill-related components of balance, reaction time, agility, coordination, power and speed to enhance performance levels.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Student's coursework focuses on, but is not limited to, acting, vocal performance, dance/movement, and staging, which transfer readily to musical theatre literature. Students will survey the evolution of music in theatre from ancient Greece to modern Broadway through a humanities approach and with representative, age appropriate literature. They will learn to analyze the structures, stories and settings of musical theatre exemplars to understand how those components serve the story. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside of the school day to support, extend, and assess learning in the classroom.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

M/J Musical Theatre 3 (#0400210) 2022 - And Beyond

Course Standards

Name	Description
TH.68.C.1.2:	Develop a character analysis to support artistic portrayal.
TH.68.C.1.3:	Determine the purpose(s), elements, meaning, and value of a theatrical work based on personal, cultural, or historical standards.
TH.68.C.2.1:	Use group-generated criteria to critique others and help strengthen each other's performance.
TH.68.C.2.2:	Keep a rehearsal journal to document individual performance progress.
TH.68.C.3.1:	Discuss how visual and aural design elements communicate environment, mood, and theme in a theatrical presentation. **Clarifications:** e.g., color, texture, shape, form, sound
TH.68.C.3.3:	Determine personal strengths and challenges, using evaluations and critiques to guide selection of material for a portfolio.
TH.68.F.1.2:	Use vocal, physical, and imaginative ideas, through improvisation, as a foundation to create new characters and to write dialogue.
TH.68.F.3.1:	Practice safe, legal, and responsible use of copyrighted, published plays to show respect for intellectual property and the playwright. **Clarifications:** e.g., royalties, copies, changing text
TH.68.H.1.1:	Explore potential differences when performing works set in a variety of historical and cultural contexts.
TH.68.H.1.2:	Analyze the impact of one's emotional and social experiences when responding to, or participating in, a play.
TH.68.H.1.3:	Identify significant contributions of playwrights, actors, and designers and describe their dramatic heritage.
TH.68.H.1.6:	Discuss how a performer responds to different audiences.
TH.68.H.2.2:	Identify examples of American musical theatre productions that reflect specific correlations to American history and culture. **Clarifications:** e.g., Hair: antiwar sentiment; Show Boat: discrimination; South Pacific: discrimination
TH.68.H.2.7:	Define theatre genres from different periods in history, giving examples of each.
TH.68.H.3.3:	Use brainstorming as a method to discover multiple solutions for an acting or technical challenge.
TH.68.H.3.4:	Describe the importance of wellness and care for the actor's physical being as a performance instrument.
TH.68.H.3.6:	Discuss ways in which dance, music, and the visual arts enhance theatrical presentations.
TH.68.O.1.1:	Compare different processes an actor uses to prepare for a performance.
TH.68.O.1.3:	Explain the impact of choices made by directors, designers, and actors on audience understanding.
TH.68.O.2.1:	Diagram the major parts of a play and their relationships to each other.
TH.68.O.2.4:	Perform a scene or pantomime to demonstrate understanding of blocking and stage movement.
TH.68.O.2.5:	Explain how the contributions of significant playwrights, performers, directors, designers, and producers from various cultures and historical periods have influenced the creative innovations of theatre.
TH.68.O.3.3:	Discuss the collaborative nature of theatre and work together to create a scene or play, respecting group members' ideas and differences.
TH.68.S.1.2:	Invent a character with distinct behavior(s) based on observations of people in the real world and interact with others in a cast as the invented characters.
TH.68.S.1.3:	Describe criteria for the evaluation of dramatic texts, performances, direction, and production elements.
TH.68.S.2.3:	Analyze the relationships of plot, conflict, and theme in a play and transfer the knowledge to a play that contrasts in style, genre, and/or mood.
TH.68.S.2.4:	Memorize and present a character's lines from a monologue or scene.
TH.68.S.3.1:	Develop characterizations, using basic acting skills, appropriate for selected dramatizations. **Clarifications:** e.g., sensory recall, concentration, breath control, diction, body alignment, control of isolated body parts
TH.68.S.3.2:	Use the elements of dramatic form to stage a play. **Clarifications:** e.g., plot, character, dialogue, conflict and resolution, setting
TH.68.S.3.3:	Lead rehearsals of improvised and scripted scenes, communicating with cast and crew to create appropriate characterization and dramatic environments. **Clarifications:** e.g., people, events, time, place
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.

	• Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
	Evaluate, using personal and established criteria, how choreographic structures and/or production elements were designed to impact mood or

DA.68.C.1.3:	aesthetic value within a dance piece. **Clarifications:** e.g., floor patterns, stage design, ABA, theme and variations, rondo, use of costumes, lights, props
DA.68.O.3.5:	Use accurate dance, theatre, and anatomical terminology to communicate with others in and related to the field of dance.
DA.68.S.3.4:	Perform, using dance technique, with musical accuracy and expression. **Clarifications:** e.g., on the counts, fill the music
DA.68.S.3.7:	Practice a variety of dance sequences to increase agility and coordination in movement patterns.
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.C.2.6:	Identify the critical elements for successful performance in a variety of sport skills or physical activities.
PE.8.M.1.7:	Apply skill-related components of balance, reaction time, agility, coordination, power and speed to enhance performance levels.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Student's coursework focuses on, but is not limited to, intermediate acting, intermediate vocal performance, intermediate dance/movement, and staging, which transfer readily to music theatre literature. Students will learn from studying styles and techniques used by well-known singer-actor-dancers and choreographers and they will begin to build a performance portfolio. Students will begin to use their prior knowledge to develop scenes on their own and incorporate blocking, choreography and settings. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside of the school day to support, extend, and assess learning in the classroom.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Name	Description
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:	• Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.

ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

GENERAL INFORMATION

Course Number: 0400220

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >
Abbreviated Title: M/J DRAMA TRAN
Course Length: Not Applicable

Course Type: Transfer Course
Course Status: Draft - Course Pending Approval
Grade Level(s): 6,7,8

Introduction to Drama (#0400300) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations.

- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.

	• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.
MA.K12.MTR.7.1:	**Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students explore various performance, technical, and administrative aspects of theatre. Students learn about basic characterization through physical activity, reading selected theatre literature, reading and writing theatrical reviews, and analysis of such tools as scripts, costuming, and theatrical makeup. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Speech (Grades 6-12)
Middle Grades English (Middle Grades 5-9)

Theatre 1 (#0400310) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions.

TH.912.S.2.3:	**Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:	• Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.

ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with little or no theatre experience, and promotes enjoyment and appreciation for all aspects of theatre. Classwork focuses on the exploration of theatre literature, performance, historical and cultural connections, and technical requirements. Improvisation, creative dramatics, and beginning scene work are used to introduce students to acting and character development. Incorporation of other art forms in theatre also helps students gain appreciation for other art forms, such as music, dance, and visual art.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 0400310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >
Abbreviated Title: THEATRE 1

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)
Middle Grades English (Middle Grades 5-9)

Theatre 2 (#0400320) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.11:	Describe the significant works and major contributions of major playwrights, performers, designers, directors, and producers in American musical theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext

TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.3:	Analyze and demonstrate how to use various media to impact theatrical productions. **Clarifications:** e.g., projections, digital video, sound, animation, intelligent lighting
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:	• Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.

ELA.K12.EE.1.1:	In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with a year of experience or more, and promotes enjoyment and appreciation for all aspects of theatre through opportunities to build significantly on existing skills. Classwork focuses on characterization, playwriting, and playwrights' contributions to theatre; while improvisation, creative dramatics, and scene work are used to help students challenge and strengthen their acting skills and explore the technical aspect of scene work.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting

document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.3:	Analyze different types of stage configurations to determine the effects of each as potential production solutions. **Clarifications:** e.g., proscenium, thrust, arena, black box
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.

TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.1.4:	Write an original script or a dramatic adaptation of a literary work to demonstrate knowledge of theatrical conventions.
TH.912.O.2.1:	Apply the principles of dramatic structure to the writing of a one-act play.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.3:	Analyze and demonstrate how to use various media to impact theatrical productions. **Clarifications:** e.g., projections, digital video, sound, animation, intelligent lighting
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:**

	e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.4:	Apply scientific and technological advances to develop visual and aural design elements that complement the interpretation of the text.
TH.912.S.3.5:	Conduct a comparative analysis of acting methods and the teacher-artists who developed them as a foundational guide to acting.
TH.912.S.3.6:	Compare the Stanislavski Method with other acting methods to support development of a personal method.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations.

	Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context.
	Clarifications: Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.
	Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with significant experience in theatre, and promotes depth of engagement and lifelong appreciation for theatre through a broad spectrum of teacher-assigned and self-directed study and performance. Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre in ways that are progressively more innovative. In keeping with the rigor expected in an accelerated setting, students assemble a portfolio that showcases a significant body of work representing personal vision and artistic growth over time; mastery of theatre skills and techniques in one or more areas; and evidence of significant oral and written analytical and problem-solving skills based on their structural, historical, and cultural knowledge.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 0400330

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >

Abbreviated Title: THEATRE 3 HON

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)

Theatre 4 Honors (#0400340) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.1:	Devise an original work based on a global issue that explores various solutions to a problem. **Clarifications:** e.g., global warming, AIDS, food shortage, genocide
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.2:	Construct imaginative, complex scripts and revise them in collaboration with actors to convey story and meaning to an audience. **Clarifications:** e.g., multiple characters, multiple settings, multiple time periods
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.1:	Analyze and identify the functions of a successful system of business management for a theatre company and compare them to the systems found in a successful business management system. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters
TH.912.F.3.2:	Develop a production budget for a hypothetical performance, using real-world numbers, and determine how much to charge the audience in order to cover costs.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.

TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.4:	Research the intent of, and critical reaction to, artists in history who created groundbreaking, innovative, or controversial works.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.1.4:	Write an original script or a dramatic adaptation of a literary work to demonstrate knowledge of theatrical conventions.
TH.912.O.2.1:	Apply the principles of dramatic structure to the writing of a one-act play.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.3:	Create a non-traditional scenic or costume design of a classical play that visually connects it to another time period. **Clarifications:** e.g., Shakespeare, classical Greek
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:** e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:**

	e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.7:	Interpret dramatic texts, organize and conduct rehearsals, and justify directorial choices for formal and informal productions. **Clarifications:** e.g., blocking, pacing, mood, concept, style
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.7:	Create a prompt book to organize dramaturgy, blocking, and play analysis to demonstrate understanding of the production process and the job responsibilities of a director or stage manager.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.4:	Apply scientific and technological advances to develop visual and aural design elements that complement the interpretation of the text.
TH.912.S.3.7:	Demonstrate the audition process by researching and selecting monologues and presenting a memorized selection.
TH.912.S.3.8:	Direct a scene or one-act play.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency:

	• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation.

	9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with extensive experience in theatre, and promotes significant depth of engagement and lifelong appreciation for theatre through a broad spectrum of primarily self-directed study and performance. In keeping with the rigor expected in an accelerated setting, students assemble a portfolio that showcases a significant body of work representing personal vision and artistic growth over time; mastery of theatre skills and techniques in one or more areas; and evidence of sophisticated oral and written analytical and problem-solving skills based on their structural, historical, and cultural knowledge.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting

document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Speech (Grades 6-12)

Theatre History and Literature 1 (#0400350) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.2.3:	Create a non-traditional scenic or costume design of a classical play that visually connects it to another time period. **Clarifications:** e.g., Shakespeare, classical Greek
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	• Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students' coursework focuses on the origins of western theatre from ancient civilizations through the Renaissance period. Students research and investigate the dramatic forms and practices of the times through the reading and analysis of plays and related literature. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, textspecific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.2.3:	Create a non-traditional scenic or costume design of a classical play that visually connects it to another time period. **Clarifications:** e.g., Shakespeare, classical Greek
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:**

	e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations.

	Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students' coursework focuses on the origins of western theatre from the Renaissance period to modern theatre. Students research and investigate the dramatic forms and practices of the times through the reading of plays and related literature. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Special Notes:
Instructional Practices
Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, textspecific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)

Acting 1 (#0400370) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Through improvisation, simple scripted scenes, performance projects, and/or practical application, students learn to identify what makes performances believable and explore the tools used to create, articulate, and execute them. Upon completion of this course, students have a strong foundation for future scene work, script analysis, and play production. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design

TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:**

	Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:**

ELA.K12.EE.4.1:	In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students examine the various dimensions of characters through analysis, discussion, and classroom performance, working with scripts from a variety of time periods and cultures. They learn to break down a scene from a character's point of view, and also learn to sustain a character and build the relationship between actor and audience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Drama (Grades 6-12)
Speech (Grades 6-12)

Acting 3 (#0400390) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.4:	Research the intent of, and critical reaction to, artists in history who created groundbreaking, innovative, or controversial works.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.

TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:** e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.5:	Conduct a comparative analysis of acting methods and the teacher-artists who developed them as a foundational guide to acting.
TH.912.S.3.7:	Demonstrate the audition process by researching and selecting monologues and presenting a memorized selection.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students focus on development of significant acting skills and knowledge of the actor's literature, compiling a working actor's portfolio for exhibition and/or the interview process. They research potential job opportunities in the film, television, game animation, and theatre industries, as well as scholarships and opportunities available at the university level. An inquiry-based capstone project may be required. Public performances may serve as a culmination of specific instructional goals. Students may be required to participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.2:	Construct imaginative, complex scripts and revise them in collaboration with actors to convey story and meaning to an audience. **Clarifications:** e.g., multiple characters, multiple settings, multiple time periods
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept,

TH.912.O.1.1:	characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.6:	Compare the Stanislavski Method with other acting methods to support development of a personal method.
TH.912.S.3.7:	Demonstrate the audition process by researching and selecting monologues and presenting a memorized selection.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.

MA.K12.MTR.3.1:	Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning. **Clarifications:**

ELA.K12.EE.1.1:	K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students create characters for theatrical and film/video productions through scene, character, and technical analysis. Through improvisation, script writing, and aesthetic creation and collaboration, actors refine their working knowledge and independent thought, articulating and justifying their creative choices. Students' "critical eye" becomes more developed and significant mastery of artistic choices becomes evident. An inquiry-based capstone project may be required. Public performances may serve as a culmination of specific instructional goals. Students may be required to participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Speech (Grades 6-12)
Drama (Grades 6-12)

Technical Theatre: Design and Production for Scenery and Props (#0400407) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.3:	Analyze different types of stage configurations to determine the effects of each as potential production solutions. **Clarifications:** e.g., proscenium, thrust, arena, black box
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.O.3.6:	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents. **Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:**

	e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations.

	Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context.
	Clarifications: Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.
	Clarifications: Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
VA.912.C.1.7:	Analyze challenges and identify solutions for three-dimensional structural problems.
VA.912.S.2.2:	Focus on visual information and processes to complete the artistic concept.
VA.912.S.3.1:	Manipulate materials, techniques, and processes through practice and perseverance to create a desired result in two- and/or three-dimensional artworks.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students focus on learning the basic tools and procedures for designing and creating scenery and properties (props) with particular attention to technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials. Students also learn the standard conventions of design presentation and documentation; the organizational structure of theatre production and creative work in a collaborative environment; through various self-assessment tools. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:	• Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
VA.912.S.3.7:	Use and maintain tools and equipment to facilitate the creative process. **Clarifications:** e.g., sewing machine, pottery wheel, kiln, technology, printing press, hand tools
VA.912.S.3.8:	Develop color-mixing skills and techniques through application of the principles of heat properties and color and light theory. **Clarifications:** e.g., media: ceramics, glass, wet, dry, digital
VA.912.S.3.12:	Develop competence and dexterity, through practice, in the use of processes, tools, and techniques for various media. **Clarifications:** e.g., printmaking: relief print; ceramics: wheel-throwing; drawing: charcoal; painting: watercolor; technology: layering images
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students focus on learning the basic tools and procedures for designing and creating costumes, hair, and makeup with particular attention to technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials. Students also learn the standard conventions of design presentation and documentation; the organizational structure of theatre production and creative work in a collaborative environment; and the resulting artistic improvement. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Technical Theatre Design & Production 1 (#0400410) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.2.3:	Analyze different types of stage configurations to determine the effects of each as potential production solutions. **Clarifications:** e.g., proscenium, thrust, arena, black box
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.O.3.6:	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents. **Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:**

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

	Clarifications: Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
VA.912.S.2.6:	Incorporate skills, concepts, and media to create images from ideation to resolution. **Clarifications:** e.g., structural elements of art, organizational principles of design, breadth
VA.912.S.3.7:	Use and maintain tools and equipment to facilitate the creative process. **Clarifications:** e.g., sewing machine, pottery wheel, kiln, technology, printing press, hand tools
VA.912.S.3.8:	Develop color-mixing skills and techniques through application of the principles of heat properties and color and light theory. **Clarifications:** e.g., media: ceramics, glass, wet, dry, digital
VA.912.S.3.12:	Develop competence and dexterity, through practice, in the use of processes, tools, and techniques for various media. **Clarifications:**

	e.g., printmaking: relief print; ceramics: wheel-throwing; drawing: charcoal; painting: watercolor; technology: layering images
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
SC.912.P.10.15:	Investigate and explain the relationships among current, voltage, resistance, and power.

General Course Information and Notes

VERSION DESCRIPTION

Students focus on developing the basic tools and procedures for creating elements of technical theatre, including costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials are central to success in this course. Students explore and learn to analyze dramatic scripts, seeking production solutions through historical, cultural, and geographic research. Students also learn the basics of standard conventions of design presentation and documentation; the organizational structure of theatre production and creative work in a collaborative environment; and the resulting artistic improvement. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. Technical Theatre Design & Production 2 (#0400420) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.11:	Describe the significant works and major contributions of major playwrights, performers, designers, directors, and producers in American musical theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:** e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents.

TH.912.O.3.6:	**Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task.

MA.K12.MTR.4.1:	• Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
VA.912.S.2.6:	Incorporate skills, concepts, and media to create images from ideation to resolution. **Clarifications:** e.g., structural elements of art, organizational principles of design, breadth
VA.912.S.3.7:	Use and maintain tools and equipment to facilitate the creative process. **Clarifications:** e.g., sewing machine, pottery wheel, kiln, technology, printing press, hand tools
VA.912.S.3.8:	Develop color-mixing skills and techniques through application of the principles of heat properties and color and light theory. **Clarifications:** e.g., media: ceramics, glass, wet, dry, digital
VA.912.S.3.12:	Develop competence and dexterity, through practice, in the use of processes, tools, and techniques for various media. **Clarifications:** e.g., printmaking: relief print; ceramics: wheel-throwing; drawing: charcoal; painting: watercolor; technology: layering images
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students focus on the design and safe application of basic tools and procedures to create elements of technical theatre, including costumes, lighting, makeup, properties (props), publicity, scenery, and sound. Students develop assessment and problem-solving skills; the ability to connect selected literature to a variety of cultures, history, and other content areas. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Speech (Grades 6-12)

Technical Theatre Design & Production 3 (#0400430) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.11:	Describe the significant works and major contributions of major playwrights, performers, designers, directors, and producers in American musical theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism

TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.3:	Analyze and demonstrate how to use various media to impact theatrical productions. **Clarifications:** e.g., projections, digital video, sound, animation, intelligent lighting
TH.912.O.3.6:	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents. **Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:	• Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

ELA.K12.EE.1.1:	2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
VA.912.S.2.6:	Incorporate skills, concepts, and media to create images from ideation to resolution. **Clarifications:** e.g., structural elements of art, organizational principles of design, breadth

General Course Information and Notes

VERSION DESCRIPTION

Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre. Student designers and technicians assemble a portfolio that showcases a body of work representing artistic growth over time; growing command of theatre skills and techniques in one or more areas; and evidence of significant oral and written analytical and problem-solving skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or performances beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.1:	Analyze and identify the functions of a successful system of business management for a theatre company and compare them to the systems found in a successful business management system. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters
TH.912.F.3.2:	Develop a production budget for a hypothetical performance, using real-world numbers, and determine how much to charge the audience in order to cover costs.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.4:	Research the intent of, and critical reaction to, artists in history who created groundbreaking, innovative, or controversial works.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design.

TH.912.O.1.1:	**Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.3:	Create a non-traditional scenic or costume design of a classical play that visually connects it to another time period. **Clarifications:** e.g., Shakespeare, classical Greek
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.6:	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents. **Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.4:	Apply scientific and technological advances to develop visual and aural design elements that complement the interpretation of the text.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:**

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

	• Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
VA.912.S.2.6:	Incorporate skills, concepts, and media to create images from ideation to resolution. **Clarifications:** e.g., structural elements of art, organizational principles of design, breadth

General Course Information and Notes

VERSION DESCRIPTION

Students regularly reflect on aesthetics and issues related to and addressed through theatre, and create within various aspects of theatre in ways that are progressively more innovative. Students analyze increasingly more sophisticated theatre literature to inform the work of developing technical design and production pieces for one-acts or a larger production. Students assemble a portfolio that showcases an extensive body of work representing personal vision and artistic growth over time. Public performances may serve as a culmination of specific instructional goals. Students may be required to participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 0400440

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >

Abbreviated Title: TECH THEA DES&PROD4H

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)

Theatrical Direction and Stage Management 1 (#0400500) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.3.2:	Develop a production budget for a hypothetical performance, using real-world numbers, and determine how much to charge the audience in order to cover costs.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:**

	e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.3:	Analyze and demonstrate how to use various media to impact theatrical productions. **Clarifications:** e.g., projections, digital video, sound, animation, intelligent lighting
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.7:	Interpret dramatic texts, organize and conduct rehearsals, and justify directorial choices for formal and informal productions. **Clarifications:** e.g., blocking, pacing, mood, concept, style
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.7:	Create a prompt book to organize dramaturgy, blocking, and play analysis to demonstrate understanding of the production process and the job responsibilities of a director or stage manager.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.8:	Direct a scene or one-act play.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency:

	• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation.

	9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students learn how to select, organize, and mount formal and informal staged productions by means of exploring the leadership roles of director and stage manager. Students focus on the nature and responsibilities of the director and stage manager in relation to the entire production team; the effect of the director's concept on the overall production; vocabulary and principles of the various elements of play production; techniques used to create an effective theatre work; and basic knowledge and application of staging. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)

Theatrical Direction and Stage Management 2 Honors (#0400510) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.3:	Analyze different types of stage configurations to determine the effects of each as potential production solutions. **Clarifications:** e.g., proscenium, thrust, arena, black box
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.3.2:	Develop a production budget for a hypothetical performance, using real-world numbers, and determine how much to charge the audience in order to cover costs.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:**

	e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:** e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.7:	Interpret dramatic texts, organize and conduct rehearsals, and justify directorial choices for formal and informal productions. **Clarifications:** e.g., blocking, pacing, mood, concept, style
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.7:	Create a prompt book to organize dramaturgy, blocking, and play analysis to demonstrate understanding of the production process and the job responsibilities of a director or stage manager.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.8:	Direct a scene or one-act play.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.

	• Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students execute the responsibilities of director or stage manager by applying standard theatrical conventions in specialized, practical assignments. Coursework include, but is not limited to, play selection; justification, analysis, and the formation of a directorial concept; assembling a prompt book; assembling a cast, production team, and tech crew; effective team-building ensemble skills and communication practices; and successfully planning and running rehearsals leading toward one or more culminating projects. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

	• Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

General Course Information and Notes

VERSION DESCRIPTION

Students assess their own and others' speaking habits and vocal characteristics as the first step in identifying qualities to retain and refine and modifying or eliminating those that may be undesirable in certain settings, such as regional dialects and slang. With this work, students also identify common speech errors and strengthen their comfort level with Standard American English language. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Speech (Grades 6-12)

Theatre Improvisation (#0400620) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.H.3.5:	Explain how the social interactions of daily life are manifested in theatre. **Clarifications:** e.g., cooperation, communication, consensus, self-esteem, taking risks, sympathy, empathy
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:**

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

	• Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students learn to communicate effectively, both verbally and non-verbally; develop and build critical listening and collaborative skills, and think and solve problems quickly and appropriately on the spot, which transfers well to academic, career, and social arenas. Through collaboration, communication, and performance activities, students engage in improvisation as a stand-alone art form and as an acting methodology. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Theatre, Cinema and Film Production (#0400660) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.O.3.6:	Apply standard drafting conventions for scenic, lighting, and sound design to create production design documents. **Clarifications:** e.g., scale rule, lighting template, stock furniture template, USITT standards
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
	Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:
- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:
- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:
- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:
- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:	• Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

In Theatre, Cinema, and Film Production, a one-credit course, students explore the elements of film and cinematic techniques used by those who create movies. Students study the techniques in film that serve the story and articulate the theme. Students also prepare a comparative for theatre, film, and literature. Public performances may serve as a resource for specific instructional goals. Students may be required to attend or participate in technical work, rehearsals, and/or film production beyond the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Musical Theatre 1 (#0400700) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.4:	Discuss how participation in theatre supports development of life skills useful in other content areas and organizational structures. **Clarifications:** e.g., goal-setting, self-discipline, punctuality, meeting deadlines, fulfilling responsibilities, adaptability, initiative, productivity
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.S.1.1:	Describe the interactive effect of audience members and actors on performances.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:	• Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.912.C.2.4:	Evaluate nuances of movement and their relationship to style, choreographic elements, and/or other dancers, and apply this knowledge to alter personal performance.
DA.912.S.3.2:	Develop and maintain flexibility, strength, and stamina for wellness and performance.
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.

ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students' course work focuses on, but is not limited to, acting, vocal performance, dance, non-dance movement, and staging, which transfer readily to performances in musicals and other venues. Students survey the evolution of music in theatre from ancient Greece to modern Broadway through a humanities approach and representative literature. Music theatre students explore the unique staging and technical demands of musicals in contrast to non-musical plays. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

Course Standards

Name	Description
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.2:	Research and discuss the effects of personal experience, culture, and current events that shape individual response to theatrical works.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.2.11:	Describe the significant works and major contributions of major playwrights, performers, designers, directors, and producers in American musical theatre.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.1.4:	Write an original script or a dramatic adaptation of a literary work to demonstrate knowledge of theatrical conventions.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of

TH.912.S.1.4:	the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

	• Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully.

ELA.K12.EE.4.1:	In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
DA.912.C.2.1:	Analyze movement from varying perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges. **Clarifications:** e.g., improvisation, trial and error, collaboration
DA.912.S.1.2:	Generate choreographic ideas through improvisation and physical brainstorming.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students learn from the styles and techniques used by well-known singer-actor-dancers and choreographers to build a performance portfolio for auditions and/or interviews. Students examine the contributions of major writers, composers, lyricists, and choreographers of musical theatre and learn to analyze the structures, stories, and settings of musical theatre exemplars to understand how those components serve the story and concept. Students extend their dance and movement techniques required to sing and dance at the same time. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 0400710

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >
Abbreviated Title: MUSIC THEATRE 2

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Speech (Grades 6-12)
Dance (Elementary and Secondary Grades K-12)
Drama (Grades 6-12)
Music (Elementary and Secondary Grades K-12)
Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)

Musical Theatre 3 (#0400720) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.1:	Analyze and identify the functions of a successful system of business management for a theatre company and compare them to the systems found in a successful business management system. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters
TH.912.F.3.5:	Monitor the tasks involved in the creative and design processes and analyze ways those processes might be applied in the workforce. **Clarifications:** e.g., script-writing, set design, costume design
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.4:	Research the intent of, and critical reaction to, artists in history who created groundbreaking, innovative, or controversial works.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.2.11:	Describe the significant works and major contributions of major playwrights, performers, designers, directors, and producers in American musical theatre.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design.

TH.912.O.1.1:	**Clarifications:** e.g., beats, actions, subtext
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.4:	Sustain a character or follow technical cues in a production piece to show focus.
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.7:	Demonstrate the audition process by researching and selecting monologues and presenting a memorized selection.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations.

MA.K12.MTR.3.1:

- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:	4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
DA.912.C.2.2:	Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from a variety of sources, to support personal competence and artistic growth. **Clarifications:** e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works
DA.912.S.3.7:	Move with agility, alone and relative to others, to perform complex dance sequences.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students refine their audition techniques and performance/audition portfolio, and consider the contributions of musical theatre in the community and beyond. Students select a number of pieces to showcase their abilities and become conversant about individuals who, currently and in the past, are considered major contributors to the field. Students refine their dance and movement techniques required to sing and dance for long periods of time in rehearsals and performance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.4:	Research and define the physical/visual elements necessary to create theatrical reality for a specific historical and/or geographical play. **Clarifications:** e.g., architectural details; period costumes, furnishings, and hair; attire appropriate to climate and time of year; props appropriate to economic level
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.1:	Explore and describe possible solutions to production or acting challenges and select the solution most likely to produce desired results.
TH.912.C.2.3:	Analyze different types of stage configurations to determine the effects of each as potential production solutions. **Clarifications:** e.g., proscenium, thrust, arena, black box
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.2:	Solve short conflict-driven scenarios through improvisation.
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.2:	Assess the skills needed for theatre-related jobs in the community to support career selection.
TH.912.F.2.3:	Work collaboratively with others to survey the theatre activities in the school, community, and/or region to calculate their impact on the economy.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.7:	Use social networking or other communication technology appropriately to advertise for a production or school event.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.

TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.6:	Explore how gender, race, and age are perceived in plays and how they affect the development of theatre.
TH.912.H.2.8:	Analyze how events have been portrayed through theatre and film, balancing historical accuracy versus theatrical storytelling.
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.1.4:	Write an original script or a dramatic adaptation of a literary work to demonstrate knowledge of theatrical conventions.
TH.912.O.2.1:	Apply the principles of dramatic structure to the writing of a one-act play.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.2.8:	Create a scene or improvisation to manipulate and challenge the conventions of the performer/audience relationship.
TH.912.O.3.2:	Analyze a variety of theatre and staging configurations to understand their influence on the audience experience and response. **Clarifications:** e.g., indoor vs. outdoor venue, proscenium theatre vs. theatre-in-the-round
TH.912.O.3.3:	Analyze and demonstrate how to use various media to impact theatrical productions. **Clarifications:** e.g., projections, digital video, sound, animation, intelligent lighting
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values
TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.2.1:	Create one or more technical design documents for a theatrical production. **Clarifications:** e.g., scale model, drafted floor plans, light plots, costume renderings, make-up plot
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.

TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.2.9:	Research and defend one's own artistic choices as a designer.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.3:	Develop acting skills and techniques in the rehearsal process.
TH.912.S.3.4:	Apply scientific and technological advances to develop visual and aural design elements that complement the interpretation of the text.
TH.912.S.3.5:	Conduct a comparative analysis of acting methods and the teacher-artists who developed them as a foundational guide to acting.
TH.912.S.3.6:	Compare the Stanislavski Method with other acting methods to support development of a personal method.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:	• Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

GENERAL NOTES

This course is designed to give an overview of theatre arts. Students are introduced to the fundamentals of stage tech, including make-up, costuming, set construction and lighting. Students perform improvisation, monologues, readings and acting scenes. The content includes an introduction to the process of directing, basic vocal techniques, movement, theory, production management and script writing. Students are primarily exposed to pieces in their native language. Students are encouraged to view at least one out-of-class production per nine weeks for critical review.

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

GENERAL INFORMATION

Course Number: 0400800

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >

Abbreviated Title: FL PRE-IB THEATRE 1

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10

Graduation Requirement: Performing/Fine Arts

Educator Certifications

English (Grades 6-12)
Drama (Grades 6-12)
Speech (Grades 6-12)

Florida's Preinternational Baccalaureate Theatre 2 (#0400805) 2022 - And Beyond

Course Standards

Name	Description
TH.912.C.1.1:	Devise an original work based on a global issue that explores various solutions to a problem. **Clarifications:** e.g., global warming, AIDS, food shortage, genocide
TH.912.C.1.2:	Create, refine, and sustain complex and believable characters for performance through the integration and application of artistic choices based on research, rehearsal, feedback, and refinement. **Clarifications:** e.g., physical, vocal, emotional
TH.912.C.1.3:	Justify a response to a theatrical experience through oral or written analysis, using correct theatre terminology.
TH.912.C.1.5:	Make and defend conscious choices in the creation of a character that will fulfill anticipated audience response.
TH.912.C.1.6:	Respond to theatrical works by identifying and interpreting influences of historical, social, or cultural contexts.
TH.912.C.1.7:	Justify personal perceptions of a director's vision and/or playwright's intent.
TH.912.C.1.8:	Apply the components of aesthetics and criticism to a theatrical performance or design. **Clarifications:** e.g., description, interpretation, judgment, theorizing
TH.912.C.2.2:	Construct imaginative, complex scripts and revise them in collaboration with actors to convey story and meaning to an audience. **Clarifications:** e.g., multiple characters, multiple settings, multiple time periods
TH.912.C.2.4:	Collaborate with a team to outline several potential solutions to a design problem and rank them in order of likely success.
TH.912.C.2.5:	Analyze the effect of rehearsal sessions and/or strategies on refining skills and techniques by keeping a performance or rehearsal journal/log.
TH.912.C.2.6:	Assess a peer's artistic choices in a production as a foundation for one's own artistic growth.
TH.912.C.2.7:	Accept feedback from others, analyze it for validity, and apply suggestions appropriately to future performances or designs.
TH.912.C.2.8:	Improve a performance or project using various self-assessment tools, coaching, feedback, and/or constructive criticism. **Clarifications:** e.g., peer assessment, rubric, criteria, coaching, feedback, criticism
TH.912.C.3.1:	Explore commonalities between works of theatre and other performance media. **Clarifications:** e.g., dance, mime, movies, street theatre, poetry reading
TH.912.C.3.2:	Develop and apply criteria to select works for a portfolio and defend one's artistic choices with a prepared analysis.
TH.912.C.3.3:	Critique, based on exemplary models and established criteria, the production values and effectiveness of school, community, and live or recorded professional productions.
TH.912.F.1.1:	Synthesize research, analysis, and imagination to create believable characters and settings. **Clarifications:** e.g., scenery, costumes, props
TH.912.F.1.3:	Stimulate imagination, quick thinking, and creative risk-taking through improvisation to create written scenes or plays.
TH.912.F.1.4:	Research the cause-and-effect relationship between production needs and new and emerging technologies to support creativity and innovation in theatre.
TH.912.F.2.1:	Create and maintain a portfolio for a variety of college or job interviews that can be customized for each opportunity. **Clarifications:** e.g., body of work, references, résumé, artist statement
TH.912.F.2.4:	Apply the skills necessary to be an effective director, designer, stage manager, and/or technician in the mounting of a theatrical performance.
TH.912.F.2.5:	Analyze the impact the arts have on local, national, and global economies by researching how businesses use the arts to help them be successful.
TH.912.F.3.1:	Analyze and identify the functions of a successful system of business management for a theatre company and compare them to the systems found in a successful business management system. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters
TH.912.F.3.2:	Develop a production budget for a hypothetical performance, using real-world numbers, and determine how much to charge the audience in order to cover costs.
TH.912.F.3.3:	Exhibit independence, discipline, and commitment to the theatre process when working on assigned projects and productions.
TH.912.F.3.6:	Examine how skills used in putting on a production can be applied in the general work place and design a résumé showing marketable skills for a college or job application. **Clarifications:** e.g., time management, organization, public speaking, creative writing, leadership, collaboration, design, construction, business management, accounting
TH.912.F.3.8:	Use current and emerging technology appropriately to communicate rehearsal information with the cast and crew of a production.

TH.912.H.1.1:	Analyze how playwrights' work reflects the cultural and socio-political framework in which it was created.
TH.912.H.1.2:	Study, rehearse, and discuss a broad range of theatre works by diverse playwrights to enrich one's perspective of the world.
TH.912.H.1.3:	Present a design or perform in the style of a different historical or cultural context to gain appreciation of that time and culture.
TH.912.H.1.4:	Interpret a text through different social, cultural, and historical lenses to consider how perspective and context shape a work and its characters.
TH.912.H.1.5:	Respect the rights of performers and audience members to perform or view controversial work with sensitivity to school and community standards.
TH.912.H.2.1:	Research the correlations between theatrical forms and the social, cultural, historical, and political climates from which they emerged, to form an understanding of the influences that have shaped theatre.
TH.912.H.2.3:	Weigh and discuss, based on analysis of dramatic texts, the importance of cultural protocols and historical accuracy for artistic impact.
TH.912.H.2.4:	Research the intent of, and critical reaction to, artists in history who created groundbreaking, innovative, or controversial works.
TH.912.H.2.5:	Apply knowledge of dramatic genres and historical periods to shape the work of performers, directors, and designers.
TH.912.H.2.7:	Hypothesize how theatre may look in the future and defend that hypothesis, based on historical and social trends, to show understanding of their importance to the development of theatre.
TH.912.H.2.9:	Create scenes that satirize current political or social events. **Clarifications:** e.g., improvise, script, perform
TH.912.H.2.10:	Analyze how the history of American musical theatre is tied to events in U.S. history and popular culture, detailing the ways in which theatre evolved.
TH.912.H.3.1:	Apply critical-thinking and problem-solving skills used in theatre collaboration to develop creative solutions to real-life issues. **Clarifications:** e.g., time management, interpersonal skills, making priorities
TH.912.H.3.2:	Compare the applications of various art forms used in theatre production.
TH.912.H.3.3:	Apply knowledge of non-theatre content areas to enhance presentations of characters, environments, and actions in performance. **Clarifications:** e.g., history, literature, visual art, welding, sewing, computer applications, math, science, world languages
TH.912.H.3.4:	Create a routine of wellness and care for the actor's physical being as a performance instrument.
TH.912.O.1.1:	Research and analyze a dramatic text by breaking it down into its basic, structural elements to support development of a directorial concept, characterization, and design. **Clarifications:** e.g., beats, actions, subtext
TH.912.O.1.2:	Compare the conventions of western theatre with eastern theatre practices. **Clarifications:** e.g., puppetry, masks, stage space, symbolism
TH.912.O.1.3:	Execute the responsibilities of director, designer, manager, technician, or performer by applying standard theatrical conventions.
TH.912.O.1.4:	Write an original script or a dramatic adaptation of a literary work to demonstrate knowledge of theatrical conventions.
TH.912.O.2.1:	Apply the principles of dramatic structure to the writing of a one-act play.
TH.912.O.2.2:	Perform a scene or monologue in a non-traditional way that stays true to its dramatic structure and can be justified within the script.
TH.912.O.2.3:	Create a non-traditional scenic or costume design of a classical play that visually connects it to another time period. **Clarifications:** e.g., Shakespeare, classical Greek
TH.912.O.2.4:	Construct and perform a pantomime of a complete story, showing a full character arc.
TH.912.O.2.5:	Explain how the contributions and methods of significant individuals from various cultures and historical periods have influenced the creative innovations of theatre, and apply one of their innovations to a theatrical piece in a new way. **Clarifications:** e.g., playwrights, performers, directors, producers, designers
TH.912.O.2.6:	Deconstruct a play, using an established theory, to understand its dramatic structure. **Clarifications:** e.g., Aristotle's Poetics
TH.912.O.2.7:	Brainstorm a variety of ways to deviate from western rules and conventions in theatre to influence audience and performer experiences. **Clarifications:** e.g., audience, writing, space, design
TH.912.O.3.1:	Analyze the methods of communication among directors, designers, stage managers, technicians, and actors that establish the most effective support of the creative process. **Clarifications:** e.g., correct terminology, plots, production meetings, headset etiquette
TH.912.O.3.4:	Create a performance piece to document a significant issue or event. **Clarifications:** e.g., pantomime, improvisation, scene, monologue
TH.912.O.3.5:	Design technical elements to document the progression of a character, plot, or theme.
TH.912.O.3.7:	Apply standard conventions of directing, stage management, and design to denote blocking and stage movement for production documentation. **Clarifications:** e.g., body language, pantomime, blocking, staging, design elements, characterization, subtext, physical characterization
TH.912.S.1.2:	Describe the Stanislavski Method and its impact on realism in theatrical performance in the 20th century.
TH.912.S.1.3:	Develop criteria that may be applied to the selection and performance of theatrical work. **Clarifications:** e.g., appropriate to available actors, budget, venue, appropriate to community values

TH.912.S.1.4:	Compare the artistic content as described by playwrights, actors, designers, and/or directors with the final artistic product and assess the success of the final artistic product using established criteria. **Clarifications:** e.g., empathy, aesthetic distance, historical accuracy, personal or cultural perspective, social issues
TH.912.S.1.5:	Write monologues, scenes, and/or short plays using principles and elements of writing found in dramatic literature.
TH.912.S.1.6:	Respond appropriately to directorial choices for improvised and scripted scenes.
TH.912.S.1.7:	Interpret dramatic texts, organize and conduct rehearsals, and justify directorial choices for formal and informal productions. **Clarifications:** e.g., blocking, pacing, mood, concept, style
TH.912.S.1.8:	Use research to extract clues in dramatic texts to create performances or technical elements, choosing those that are most interesting and that best convey dramatic intent. **Clarifications:** e.g., cultural, historical, symbolic, interpretive
TH.912.S.2.2:	Apply technical knowledge of safety procedures and demonstrate safe operation of theatre equipment, tools, and raw materials. **Clarifications:** e.g., tools, ladders, paint, sewing machines, dyes, cosmetics
TH.912.S.2.3:	Demonstrate an understanding of a dramatic work by developing a character analysis for one or more of its major characters and show how the analysis clarifies the character's physical and emotional dimensions. **Clarifications:** e.g., relationships, wants, needs, motivations
TH.912.S.2.5:	Perform memorized theatrical literature in contrasting pieces to show ability to apply principles and structure, focus on details of performance, and processing skills to establish successful interpretation, expression, and believability.
TH.912.S.2.6:	Transfer acting and technical skills and techniques from one piece of dramatic text to another.
TH.912.S.2.7:	Create a prompt book to organize dramaturgy, blocking, and play analysis to demonstrate understanding of the production process and the job responsibilities of a director or stage manager.
TH.912.S.2.8:	Strengthen acting skills by engaging in theatre games and improvisations. **Clarifications:** e.g., concentration, observation, imagination, sense memory, listening, reacting
TH.912.S.3.1:	Articulate, based on research, the rationale for artistic choices in casting, staging, or technical design for a scene from original or scripted material.
TH.912.S.3.2:	Exercise artistic discipline and collaboration to achieve ensemble in rehearsal and performance.
TH.912.S.3.4:	Apply scientific and technological advances to develop visual and aural design elements that complement the interpretation of the text.
TH.912.S.3.7:	Demonstrate the audition process by researching and selecting monologues and presenting a memorized selection.
TH.912.S.3.8:	Direct a scene or one-act play.
TH.912.S.3.9:	Research, analyze, and explain the processes that playwrights, directors, designers, and performers use when developing a work that conveys artistic intent.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:	• Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly

	quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to provide students an opportunity to gain experience and further their knowledge in theatre fundamentals. The content includes instruction in reading and interpretation of dramatic literature; techniques and mechanics of stagecraft, character analysis and portrayal; interpretive and analytical study of plays; theory and scriptwriting; and production of plays and other dramatic presentations. Students encounter international pieces including Japanese theater, theater of the Absurd, satire, as well as current works. All students are required to view at least one out-of-class production per nine weeks for critical review.

All instruction related o Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: This course requires students to participate in extra rehearsals and performances beyond the school day.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting

document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Course Standards

Name	Description
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:	• Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.

ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

General Course Information and Notes

GENERAL NOTES

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

Theatre Grade Kindergarten (#5004200) 2022 - And Beyond

Course Standards

Name	Description
TH.K.C.1.1:	Create a story about an everyday event involving family members and/or pets using body movements, sounds, and imagination.
TH.K.C.2.1:	Respond to a performance and share personal preferences about parts of the performance.
TH.K.C.3.1:	Recognize that individuals may like different things about a selected story or play.
TH.K.C.3.2:	Share reactions to a live theatre performance. **Clarifications:** e.g., formal or informal in classroom
TH.K.F.1.1:	Pretend to be an animal by imitating its movements and sounds. **Clarifications:** e.g., walking, eating, hunting, growling, grunting, roaring
TH.K.F.3.1:	Exhibit age-appropriate dramatic play behaviors. **Clarifications:** e.g., using imagination, leading and following, following directions
TH.K.H.2.1:	Identify how the elements of place and time can change a story.
TH.K.H.3.1:	Describe feelings related to watching a play. **Clarifications:** e.g., happy, sad, surprised, scared
TH.K.O.1.1:	Share opinions about a story with classmates.
TH.K.O.2.1:	Draw a picture of a favorite scene from a play. **Clarifications:** e.g., character, costume, set piece
TH.K.O.3.1:	Compare a story that is read to one that is acted out.
TH.K.S.1.1:	Demonstrate appropriate audience behavior at a live performance. **Clarifications:** e.g., listen quietly, applaud
TH.K.S.1.2:	Describe play-acting, pretending, and real life.
TH.K.S.1.3:	Describe personal preferences related to a performance.
TH.K.S.2.1:	Pretend to be a character from a given story.
TH.K.S.3.1:	Use imagination to show a person at work, using the body and voice to communicate ideas.
TH.K.S.3.2:	Describe the concept of beginning, middle, and ending in stories using dramatic play.
TH.K.S.3.3:	Demonstrate use of the stage space using dramatic play.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.

MA.K12.MTR.3.1:

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

ELA.K12.EE.1.1:	K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MU.K.C.1.4:	Identify singing, speaking, and whispering voices.
MU.K.C.2.1:	Identify similarities and/or differences in a performance.
MU.K.S.1.1:	Improvise a response to a musical question sung or played by someone else. **Clarifications:** e.g., melodic, rhythmic
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.K.B.5.3:	Recognize the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Injury to self and/or others.
PE.K.R.6.3:	Identify the benefits of continuing to participate when not successful on the first try.

General Course Information and Notes

VERSION DESCRIPTION

Kindergarten students in theatre class explore their world through use of imagination and creative dramatics. In a very non-threatening setting, students role-play and re-tell stories based on class experiences with high-quality children's literature, while learning the fundamentals of structured storytelling in terms of sequenced events and a sense of beginning, middle, and end. Kindergarten students develop language skills together and extend their vocabulary significantly as they explore characterization. As children begin to gain more command over their intellectual and physical abilities, they explore their senses, the five Ws (who, what, when, where, and why) and other concepts through pantomime, using physicalization as a means of expression, and learn to distinguish between "real" and "pretend." During dramatic play, Kindergarteners also develop life skills that help them function in and as a group, such as listening while others speak, responding, taking turns, and problem-solving.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Primary Education (K-3)
Drama (Grades 6-12)

Theatre Grade 1 (#5004210) 2022 - And Beyond

Course Standards

Name	Description
TH.1.C.1.1:	Create a story and act it out, using a picture of people, animals, or objects as the inspiration.
TH.1.C.1.2:	Draw a picture from a favorite story and share with the class why the scene was important to the story.
TH.1.C.2.1:	Discuss what worked well and what didn't work well after acting out a story.
TH.1.C.2.2:	Identify elements of an effective performance.
TH.1.C.3.1:	Share opinions about selected plays.
TH.1.F.1.1:	Pretend to be an animal or person living in an imagined place. **Clarifications:** e.g., farm, zoo, jungle, house, circus, city, moon
TH.1.F.3.1:	Describe and discuss how to work together as actors.
TH.1.H.1.1:	Identify characters in stories from various cultures.
TH.1.H.1.2:	Describe how people respond to special events in the community. **Clarifications:** e.g., sporting event, graduation, surprise party, wedding
TH.1.H.2.1:	Re-tell a story, demonstrating respect, from a culture other than one's own.
TH.1.H.3.1:	Identify similarities between plays and stories. **Clarifications:** e.g., characters, settings, costumes
TH.1.O.1.1:	Demonstrate how the parts of the story go together by acting out a story with a beginning, middle, and end.
TH.1.O.2.1:	Describe in words or by drawing a picture, the most exciting part in the story line of a play.
TH.1.O.3.1:	Compare a play to an animated movie that tells the same story.
TH.1.S.1.1:	Exhibit appropriate audience etiquette and response.
TH.1.S.1.2:	Demonstrate the differences between play-acting, pretending, and real life.
TH.1.S.1.3:	Explain personal preferences related to a performance.
TH.1.S.2.1:	Collaborate with others to present scenes from familiar stories.
TH.1.S.3.1:	Use simple acting techniques to portray a person, place, action, or thing. **Clarifications:** e.g., pantomime, voice
TH.1.S.3.2:	Describe characters and plot development discovered during dramatic play.
TH.1.S.3.3:	Distinguish stage space from audience space to show understanding of the physical relationship between audience and actor in performance.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:

- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.

ELA.K12.EE.1.1:	In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.1.S.1.2:	Explore how body parts move by using imitation and imagery. **Clarifications:** e.g., elbow circles: turn a crank; flex/point: gas peddle
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.1.B.5.3:	Explain the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Tooth decay and environmental damage.
PE.1.R.6.3:	Identify the benefits of learning new movement skills.
SC.1.P.12.1:	Demonstrate and describe the various ways that objects can move, such as in a straight line, zigzag, back-and-forth, round-and-round, fast, and slow.

General Course Information and Notes

VERSION DESCRIPTION

First-grade students in theatre class explore their expanding world through use of imagination and creative dramatics. In a very non-threatening setting, students role-play and re-tell stories based on class experiences with high-quality children's literature, while learning about structured storytelling in terms of plot, sequenced events, and a sense of beginning, middle, and end. First graders develop language skills together and extend their vocabulary significantly as they share opinions and aesthetic responses, discuss rudimentary character development and complete open-ended stories as a means of strengthening and celebrating their creativity and learning to solve challenges. As children continue to gain command over their intellectual and physical abilities and explore their senses and the five Ws (who, what, when, where, and why), they advance their literacy skills, particularly fluency, by reading and rehearsing their own lines and stories. Students use simple acting techniques to portray a person, place, action, or thing and pantomime becomes more detailed. During dramatic play, first graders also develop life skills that help them function in and as a group, such as listening while others speak, responding, taking turns, and problem-solving.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
TH.2.C.1.1:	Describe a character in a story and tell why the character is important to the story.
TH.2.C.1.2:	Respond to a play by drawing and/or writing about a favorite aspect of it.
TH.2.C.2.1:	Discuss the purpose of a critique.
TH.2.C.2.2:	Describe how an actor in a play, musical, or film creates a character.
TH.2.C.3.1:	Identify important characteristics to discuss when sharing opinions about theatre.
TH.2.F.1.1:	Create and sustain a character inspired by a class reading or activity.
TH.2.F.2.1:	Identify the jobs people can have in a theater. **Clarifications:** e.g., actor, director, playwright, technician
TH.2.F.3.1:	Identify what was successful about a collaborative theatre activity. **Clarifications:** e.g., take turns, share, be a good listener
TH.2.H.1.1:	Read and dramatize stories with similar themes to show developing knowledge of, and respect for, cultural differences.
TH.2.H.1.2:	Explain how to respond as an audience member in a different way, depending on the style of performance.
TH.2.H.2.1:	Identify universal characters in stories from different cultures.
TH.2.H.3.1:	Create dialogue for characters from a story.
TH.2.O.1.1:	Compare the differences between reading a story and seeing it as a play.
TH.2.O.1.2:	Explain the difference between the stage, backstage, and audience areas.
TH.2.O.2.1:	Re-tell what happened in the beginning, middle, and end of a story after viewing a play.
TH.2.O.3.1:	Identify theatrical elements and vocabulary found in everyday life. **Clarifications:** e.g., listening, watching, costumes
TH.2.S.1.1:	Exhibit the behavior necessary to establish audience etiquette, response, and constructive criticism.
TH.2.S.1.2:	Compare, explain, and exhibit the differences between play-acting, pretending, and real life.
TH.2.S.1.3:	Explain, using specific examples, why some individuals may or may not like a particular performance.
TH.2.S.2.1:	Collaborate with others to perform a scene and solve challenges.
TH.2.S.3.1:	Create imagined characters, relationships, and environments using basic acting skills. **Clarifications:** e.g., sensory recall, concentration, pantomime, vocal improvisation
TH.2.S.3.2:	Communicate with others the concept of dramatic conflict and resolution in stories using dramatic play.
TH.2.S.3.3:	Create the stage space to communicate character and action in specific locales.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.

MA.K12.MTR.3.1:

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

ELA.K12.EE.1.1:	K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.2.F.3.1:	Follow directions given by the teacher or peers, and work successfully in small-group, cooperative settings.
DA.2.O.3.1:	Use movement to interpret feelings, stories, pictures, and songs.
DA.2.S.2.1:	Demonstrate focus and concentration while listening to instructions and observing others' movement.
PE.2.C.2.2:	Identify safety rules and procedures for selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.2.R.6.2:	Discuss the relationship between skill competence and enjoyment.
PE.2.R.6.3:	Identify ways to contribute as a member of a cooperative group.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.2.B.5.3:	Compare the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Negative emotions, accidents, injuries, and pollution.

General Course Information and Notes

VERSION DESCRIPTION

Second-grade theatre students explore their expanding world through use of imagination and creative dramatics. In a non-threatening setting, students gain confidence and proficiency as they role-play and re-tell stories based on an expanding body of high-quality children's literature from a variety of times and cultures, including fables. As they strengthen their knowledge of structured storytelling and plot, students learn to retain sequential information and transfer that ability to other settings and content areas. Students' life experiences inform and enrich their ability to explore characters and motivation, and the ability to discern nuance in dramatic play strengthens their ability to do so in print and oral language, as well. Second graders continue to increase their vocabulary through group discussions, writing original lines and simple scripts, and describing their own perceptions of stories and theatre. As students' cognitive and literacy skills advance, particularly in the areas of vocabulary acquisition and fluency, they portray a person, place, action, or thing with increasing detail and nuance and begin to differentiate theatre from other art forms. As students play, move, and create together, they develop the foundation for important skills such as teamwork, acceptance, respect, critical thinking, and responsibility that will help students be successful in the 21st century.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Prekindergarten/Primary Education (Age 3 through Grade 3)
Primary Education (K-3)
Drama (Grades 6-12)

Theatre Intermediate 1 (#5004230) 2022 - And Beyond

Course Standards

Name	Description
TH.3.C.1.1:	Create an imaginative costume piece or prop out of everyday items found around the classroom or at home and use it as the basis to tell an original story.
TH.3.C.1.2:	Watch a play and describe how the elements of light, costumes, props, and sound influence the mood of the production.
TH.3.C.2.1:	Revise a formal or informal performance after receiving a critique.
TH.3.C.2.2:	Discuss the meaning of an artistic choice to support development of critical thinking and decision-making skills.
TH.3.C.3.1:	Discuss the techniques that help create an effective theatre work.
TH.3.F.1.1:	Create and/or collect appropriate props and costumes and use them to help tell a story.
TH.3.F.1.2:	Arrange classroom furniture to create an environment for a story.
TH.3.F.2.1:	Identify non-theatre professions that require the same skills as are used in theatre.
TH.3.F.3.1:	Participate in a collaborative project to create a theatrical performance and reflect on the experience.
TH.3.H.1.1:	Understand how cultural differences are expressed through character, environment, and theme.
TH.3.H.1.2:	Interview an adult and create a story from his or her life using any theatrical form. **Clarifications:** e.g., pantomime, monologue, duet, ensemble scene
TH.3.H.2.1:	Identify geographical or cultural origins of stories.
TH.3.H.2.2:	Create and tell a story, fable, or tale.
TH.3.H.3.1:	Identify interpersonal skills that are learned through participation in a play. **Clarifications:** e.g., cooperation, listening, taking turns
TH.3.H.3.2:	Discuss differences between stories that are presented in different modes or time periods. **Clarifications:** e.g., live play, a reading, film
TH.3.H.3.3:	Plan and perform a simple performance based on a theme from another content area.
TH.3.O.1.1:	Describe how an actor creates a character. **Clarifications:** e.g., research, memorization, rehearsal process, warm-up, performance
TH.3.O.1.2:	Discuss why costumes and makeup are used in a play.
TH.3.O.2.1:	Describe what happened in a play, using age-appropriate theatre terminology. **Clarifications:** e.g., plot, character
TH.3.O.2.2:	Collaborate to create a collage to show the emotion(s) of a particular story or play.
TH.3.O.3.1:	Compare the characteristics of theatre to television and movies.
TH.3.S.1.1:	Demonstrate effective audience etiquette and constructive criticism for a live performance.
TH.3.S.1.2:	Compare a theatrical performance with real life and discuss how theatre makes pretense seem like real life.
TH.3.S.1.3:	Evaluate a performance, using correct theatre terms, and give specific examples to support personal opinions.
TH.3.S.2.1:	Discuss the process and responsibilities in creating a play and then apply them to collaborate and create a simple production.
TH.3.S.3.1:	Create and sustain imagined characters and relationships, using basic acting skills, to tell a simple story. **Clarifications:** e.g., breath control, diction, concentration, control of isolated body parts
TH.3.S.3.2:	Use information gained from research to shape the creation of a character. **Clarifications:** e.g., print and non-print sources
TH.3.S.3.3:	Describe elements of dramatic performance that produce an emotional response in oneself or an audience.
TH.3.S.3.4:	Describe the relationships between scenery, properties, lighting, sound, costumes, and makeup in dramatic scenes and informal play productions.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:

- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.3.F.3.1:	Be on time and prepared for classes, and work successfully in small- and large-group cooperative settings, following directions given by the teacher or peers.
DA.3.S.1.1:	Create movement to express feelings, images, and stories.
DA.3.S.1.2:	Respond to improvisation prompts, as an individual or in a group, to explore new ways to move.
DA.3.S.1.3:	Explore positive and negative space to increase kinesthetic awareness.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.3.C.2.2:	Understand the importance of safety rules and procedures in all physical activities. **Clarifications:** An example of a safety procedure is wearing a helmet when riding a bicycle.

General Course Information and Notes

VERSION DESCRIPTION

Third-grade* theatre students strengthen their knowledge of such theatre skills and concepts as storytelling, plot, pantomime, and awareness of the audience-performer relationship through imagination and creative dramatics. High-quality children's literature, including prose and poetry, continues to provide a strong foundation for

development of their theatrical, literacy, and life skills as students begin to learn about history, culture, and the technical elements used to create theatre. Readers' Theatre may be introduced at this level, contributing to students' vocabulary acquisition and reading fluency, and both vocal and physical techniques are instituted as prerequisites for character analysis. Students add to their vocabulary through readings, group discussions, and development of simple scripts. As students play, move, and create together, they continue to develop important skills such as teamwork, acceptance, respect, critical thinking, and responsibility that will help students be successful in the 21st century.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Theatre 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate elementary grades. Theatre teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Theatre previously should be enrolled in Intermediate Theatre 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Theatre for the first time may be enrolled, as a class, in Upper Elementary Theatre 1, and must then progress to Intermediate Theatre 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5004230

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >
Abbreviated Title: THEATRE-INTERM 1
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): 3,4,5

Educator Certifications

Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
Prekindergarten/Primary Education (Age 3 through Grade 3)
Primary Education (K-3)
Drama (Grades 6-12)

Theatre Intermediate 2 (#5004240) 2022 - And Beyond

Course Standards

Name	Description
TH.4.C.1.1:	Devise a story about an age-appropriate issue and explore different endings. **Clarifications:** e.g., strangers, healthy eating habits, bullying
TH.4.C.1.2:	Describe choices made to create an original pantomime based on a fable, folk tale, or fairy tale.
TH.4.C.2.1:	Provide a verbal critique to help strengthen a peer's performance.
TH.4.C.2.2:	Reflect on the strengths and needs of one's own performance.
TH.4.C.2.3:	Describe the choices perceived in a peer's performance or design.
TH.4.C.3.1:	Identify the characteristics of an effective acting performance. **Clarifications:** e.g., Can I be seen? Can I be heard? Can I be understood?
TH.4.C.3.2:	Create an original scene or monologue based on a historical event or person.
TH.4.C.3.3:	Define the elements of a selected scene that create an effective presentation of an event or person.
TH.4.F.1.1:	Create a character based on a historical figure and respond to questions, posed by the audience, about that character.
TH.4.F.1.2:	Create sound and lighting effects to suggest the mood of a story.
TH.4.F.2.1:	Identify the types of jobs related to putting on a theatre production and compare them with other arts-related and non-arts performances or events. **Clarifications:** e.g., concert, dance performance, gallery opening, sports event, public speaker
TH.4.F.3.1:	Identify the leadership qualities of directors, actors, and/or technicians. **Clarifications:** e.g., punctuality, preparedness, dependability, self-discipline, problem-solving
TH.4.H.1.1:	Re-create a famous character from Florida history.
TH.4.H.1.2:	Define how a character might react to a new set of circumstances in a given story.
TH.4.H.1.3:	Identify playwrights whose lives or careers have a connection with Florida. **Clarifications:** e.g., Tennessee Williams, Nilo Cruz, Bruce Rodgers
TH.4.H.2.1:	Discover how the same idea or theme is treated in a variety of cultural and historic periods.
TH.4.H.2.2:	Re-tell stories, fables, and/or tales from cultures that settled in Florida.
TH.4.H.3.1:	Describe how individuals learn about themselves and others through theatre experiences.
TH.4.H.3.2:	Compare a historical play with actual historical events.
TH.4.H.3.3:	Create an original story after listening to music or viewing a work of art.
TH.4.O.1.1:	Describe what a designer and director do to support the actor in creating a performance.
TH.4.O.1.2:	Identify common audience conventions used when viewing a play. **Clarifications:** e.g., curtain open/close, blackout, lights dimming, blinking lights, bell ringing
TH.4.O.2.1:	Write a summary of dramatic events after reading or watching a play.
TH.4.O.2.2:	Create a mask to show a comic or tragic character.
TH.4.O.3.1:	Explain how theatre and its conventions are used to communicate ideas.
TH.4.O.3.2:	Explore how theatre is used to understand different cultures.
TH.4.S.1.1:	Exhibit proper audience etiquette, give constructive criticism, and defend personal responses.
TH.4.S.1.2:	Discuss the concept of "willing suspension of disbelief" used in theatre to help create the illusion of real life in performances.
TH.4.S.1.3:	Use theatre terms to evaluate a live performance and discuss the qualities that directly impacted the audience's response to the production.
TH.4.S.2.1:	Collaborate with others to share responsibilities for a production.
TH.4.S.3.1:	Create and sustain imagined characters and relationships, using basic acting skills, to re-tell a well-known fairy tale, fable, or story. **Clarifications:** e.g., breath control, diction, concentration, control of isolated body parts
TH.4.S.3.2:	Use information gained from research to shape acting choices in a simple, historically based scene. **Clarifications:** e.g., print and non-print sources
TH.4.S.3.3:	Describe elements of dramatic and technical performance that produce an emotional response in oneself or an audience.
TH.4.S.3.4:	Manipulate the relationships between scenery, properties, lighting, sound, costumes, and makeup in dramatic scenes and informal play productions to create different environments for a classroom piece.
	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.

MA.K12.MTR.3.1:

- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.

MA.K12.MTR.4.1:

- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.

MA.K12.MTR.5.1:

- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.

MA.K12.MTR.6.1:	• Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.4.F.3.1:	Be on time, prepared, and focused in classes, and share skills and ideas with peers appropriately.
DA.4.O.3.1:	Express ideas through movements, steps, and gestures.
DA.4.S.2.1:	Display attention, cooperation, and focus during class and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
PE.4.C.2.2:	Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a golf club during striking activities.
SS.4.A.9.1:	Utilize timelines to sequence key events in Florida history.

General Course Information and Notes

VERSION DESCRIPTION

Fourth-grade* theatre students strengthen their knowledge of theatre skills and concepts through imagination, creative dramatics, and writing their own monologues and short scenes. Also new to theatre at this level are basic stage techniques, ensemble techniques, and the early development of directorial skills through the collaborative process. High-quality children's literature continues to provide a strong foundation for development of students' theatrical, literacy, and life skills as students are more formally introduced to production (e.g., lighting, sound, stage management, costuming) and management (e.g., box office, publicity, audience engineering) areas of the physical theater. Improvisational exercises are used to create a sense of harmony and teamwork in the classroom and use of detailed pantomime is accelerated. Students also begin to support characterization through research, rather than imagination alone. The basic elements of acting technique are strengthened through the use of theatre exercises, light scene work, and new theatre vocabulary. The students explore theatre connections to geography, history, and a variety of cultures, particularly as they study, explore, and re-enact historical scenes from Florida history. As students play, move, and create together, they continue to develop important skills such as teamwork, acceptance, respect, critical thinking, and responsibility that will help students be successful in the 21st century.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Theatre 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate elementary grades. Theatre teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Theatre previously should be enrolled in Intermediate Elementary Theatre 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Theatre for the first time may be enrolled, as a class, in Upper Elementary Theatre 1, and must then progress to Intermediate Elementary Theatre 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5004240

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Drama - Theatre Arts > **SubSubject:** General >
Abbreviated Title: THEATRE-INTERM 2
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): 3,4,5

Educator Certifications

Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
Drama (Grades 6-12)

Theatre Intermediate 3 (#5004250) 2022 - And Beyond

Course Standards

Name	Description
TH.5.C.1.1:	Devise an original performance piece based on an age-appropriate theme or social issue relevant to the school climate and explore different solutions and endings. **Clarifications:** e.g., bullying, name-calling, cheating
TH.5.C.1.2:	Create an original pantomime using instrumental music created or found to set the mood.
TH.5.C.2.1:	Change and strengthen one's own performance based on coaching from a director.
TH.5.C.2.2:	Write a self-critique of a performance.
TH.5.C.2.3:	Defend an artistic choice for a theatrical work.
TH.5.C.2.4:	Identify correct vocabulary used in a formal theatre critique.
TH.5.C.3.1:	Discuss alternate performance possibilities of the same character in the same play.
TH.5.C.3.2:	Use a photograph, sculpture, or two-dimensional work of art to inspire creation of an original scene or monologue.
TH.5.C.3.3:	Define the visual elements that must be conveyed dramatically to make a scene effective.
TH.5.F.1.1:	Create a character based on a literary figure and respond to questions, posed by the audience, using information inferred in the story.
TH.5.F.1.2:	Create a new ending for a familiar story.
TH.5.F.1.3:	Take creative risks through improvisation, using sensory skills to explore characters' feelings and environments.
TH.5.F.2.1:	Identify jobs in the community that are associated with or impacted by having a theater in the neighborhood. **Clarifications:** e.g., area restaurants, printers, musicians, fabric stores, paint and hardware suppliers, parking attendants
TH.5.F.3.1:	Examine and discuss the characteristics displayed by directors, actors, and technicians that can be applied to jobs outside the theatre classroom. **Clarifications:** e.g., dedication, working toward mastery, punctuality, preparedness, dependability, self-discipline, problem-solving
TH.5.H.1.1:	Research and describe the context in which a specified playwright wrote a particular dramatic work.
TH.5.H.1.2:	Participate in a performance to explore and celebrate a variety of human experiences.
TH.5.H.2.1:	Recognize theatre works as a reflection of societal beliefs and values.
TH.5.H.2.2:	Identify types of early American theatre. **Clarifications:** e.g., melodrama, musical theatre
TH.5.H.3.1:	Identify symbolism in a play that is found in other art forms. **Clarifications:** e.g., red/anger or high energy, symmetry/order, asymmetry/energy or conflict
TH.5.H.3.2:	Compare theatre to other modes of communication. **Clarifications:** e.g., film, television, concerts, literature, visual art
TH.5.H.3.3:	Demonstrate how the use of movement and sound enhance the telling of a story.
TH.5.H.3.4:	Act out a character learned about in another content area. **Clarifications:** e.g., science, history, literature, physical education, health
TH.5.O.1.1:	Explain an actor's choices in the creation of a character for a scene or play.
TH.5.O.1.2:	Research types of props that might be found in a play.
TH.5.O.1.3:	Evaluate how an actor or designer's choices about a character affect the audience's understanding of a play.
TH.5.O.2.1:	Create a story board of the major events in a play.
TH.5.O.2.2:	Make a list of types of props that might be found in a play.
TH.5.O.2.3:	Predict the ending of a play or performance.
TH.5.O.2.4:	Collaborate with others to develop and refine original scripts, and justify writing choices.
TH.5.O.3.1:	Describe a variety of theatrical methods and/or conventions that a group of individuals can use to communicate with audiences.
TH.5.O.3.2:	Explore how theatre can communicate universal truths across the boundaries of culture and language.
TH.5.S.1.1:	Describe the difference in responsibilities between being an audience member at live or recorded performances.
TH.5.S.1.2:	Weigh the use of "fourth wall" and "willing suspension of disbelief" in effectively creating the illusion of real life in specified theatre performances.
TH.5.S.1.3:	Evaluate a performance, using theatre terminology, and articulate emotional responses to the whole and parts of dramatic performances.
TH.5.S.2.1:	Collaborate with others to create productions and solve challenges.
TH.5.S.3.1:	Create and sustain imagined characters and relationships, using basic acting skills, to tell an original story based on historical, literary, or everyday situations. **Clarifications:** e.g., breath control, diction, concentration, control of isolated body parts
TH.5.S.3.2:	Use information gained from research to shape acting choices in the re-telling of a favorite scene from a well-known literary piece. **Clarifications:** e.g., print and non-print sources

TH.5.S.3.3:	Use elements of dramatic and technical performance designed to produce an emotional response in an audience.
TH.5.S.3.4:	Manipulate, based on research, the relationships between scenery, properties, lighting, sound, costumes, and makeup in dramatic scenes and informal play productions to create an environment.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems.

	• Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
DA.5.O.3.1:	Practice movements, steps, pantomime, and gestures as a means of communicating ideas or intent without using words.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.

General Course Information and Notes

VERSION DESCRIPTION

Fifth-grade* theatre students expand their previously acquired knowledge of theatre skills and concepts through imagination, creative dramatics, writing their own monologues and short scenes, and research with a focus on improving individual performance and acting choices. Students explore theme development, play analysis, and the playwrights' intent to guide acting choices, along with the craft of directing at a more advanced level. High-quality children's literature continues to provide a strong foundation for development of students' theatrical, literacy, and life skills as students investigate and complete practical assignments in technical theatre and theatre management for staged productions. The use of improvisation is accelerated, shaping and molding their ability to think quickly and fostering a higher sense of autonomy. Students use research and their acquired theatre knowledge to analyze and develop a character from a play or a story of their choosing to present a monologue as that character. Students learn more intricate detailed of dramatic structure through play analysis and character analysis. As students play, move, and create together, they continue to develop important skills such as teamwork, acceptance, respect, critical thinking, and responsibility that will help students be successful in the 21st century.

GENERAL NOTES

All instruction related to Theatre benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Theatre benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Elementary Theatre 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate elementary grades. Theatre teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Theatre previously should be enrolled in Intermediate Elementary Theatre 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Theatre for the first time may be enrolled, as a class, in Upper Elementary Theatre 1, and must then progress to Intermediate Elementary Theatre 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Name	Description
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:	• Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
	Use the accepted rules governing a specific format to create quality work. **Clarifications:**

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Major concepts/content
The purpose of this classroom course is to introduce students to the highway transportation system and to teach strategies that will develop driving knowledge related to today's and tomorrow's motorized society. It will also provide an in-depth study of the scope and nature of accident problems and their solutions. The content should include, but not be limited to, the following:

- vehicle control and traffic procedures
- defensive driving strategies
- pertinent laws and their application to driving
- energy efficient and safe enjoyable vehicle ownership
- physical and mental factors
- legal and moral obligations
- knowledge of motorcycle operations and interactions in the system
- planning for safe travel to include map studies
- effects of alcohol and other drugs on driving performance

GENERAL NOTES

Classroom instruction only.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

After successfully completing this course, the student will:

- Describe basic aspects of the Highway Transportation System (HTS)--its purpose, major elements, effectiveness, and the roles played by man in the system.
- Describe basic vehicle control, including exterior and interior promotion checks, control of motion and direction, and basic maneuvers.
- Describe and interpret signs, signals, and pavement markings.
- Describe the need for identifying potential hazards in traffic, making predictions about possible occurrences, making wise decisions for action based on minimum risk, and describe appropriate execution of these decisions (I.P.D.E.).
- Describe the management of space requirements in all driving situations.
- Describe the skills required to effectively control and take proper actions in emergency situations to avoid a collision or minimize the impact if unavoidable.
- Describe needed measures for correcting or minimizing the effects of temporary or permanent physical defects or limitations.
- Describe the legal and moral responsibilities at the scene of highway collisions.
- Describe the effects of attitudes and emotions on driving decisions.
- Describe the effect of alcohol and other drugs on driving.
- Describe the importance of vehicle maintenance for safe and efficient operation.
- Describe the requirements for compliance with the laws that apply to drivers as well as owners of motor vehicles.
- Describe the principles and practices related to trip planning.
- Describe the operation and interaction of motor driven cycles in the Highway Transportation System.
- Describe specific decisions to be made when interacting with other users of the Highway Transportation System other than the automobile.
- Describe the value and use of occupant vehicle restraints and other built-in safety features and devices.
- Describe the need for actively supporting traffic law enforcement agencies and assisting in the improvement of highway safety programs.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree plus Driver Education Endorsement.

Course Standards

Name	Description
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency: • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem.

MA.K12.MTR.5.1:	• Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they

	must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Major concepts/content
The purpose of this course is to introduce students to the highway transportation system and to strategies that will develop driving knowledge and skills related to today's and tomorrow's motorized society. It will also provide an in-depth study of the scope and nature of accident problems and their solutions. The content should include, but not be limited to, the following:

- vehicle control and traffic procedure
- defensive driving strategies
- pertinent laws and their application to driving
- energy efficient and safe enjoyable vehicle ownership
- physical and mental factors
- legal and moral obligations
- knowledge of motorcycle operations and interactions in the system
- planning for safe travel to include map studies
- the effects of alcohol and other drugs on driving performance

GENERAL NOTES

Special note:
This course includes laboratory activities.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

After successfully completing this course, the student will:

- Describe basic aspects of the Highway Transportation System (HTS)--its purpose, major elements, effectiveness, and the roles played by man in the system.
- Describe and demonstrate basic control of the vehicle, including exterior and interior promotion checks, control of motion and direction, and basic maneuvers.
- Describe, interpret, and react properly to signs, signals, and pavement markings.
- Describe the need for identifying potential hazards in traffic, making predictions about possible occurrences, making wise decisions for action based on minimum risk, and demonstrate appropriate executions of these decisions (I.P.D.E.).
- Describe and demonstrate the management of space requirements in all driving situations.
- Describe and demonstrate the skills required to effectively control and take proper actions in emergency situations to avoid a collision or minimize the impact if unavoidable.
- Describe needed measures for correcting or minimizing the effects of temporary or permanent physical defects or limitations.
- Describe the legal and moral responsibilities at the scene of highway collisions.
- Describe the effects of attitudes and emotions on driving decisions.
- Describe the effects of alcohol and other drugs on driving.
- Describe the importance of vehicle maintenance for safe and efficient operation.
- Describe the requirements for compliance with the laws that apply to drivers as well as owners of motor vehicles.
- Describe the principles and practices related to trip planning.
- Describe the operation and interaction of motor driven cycles in the Highway Transportation System.
- Describe and demonstrate specific decisions to be made when interacting with other users of the Highway Transportation System other than the automobile.
- Describe the value and demonstrate the use of occupant vehicle restraints and other built-in safety features and devices.
- Describe the need for actively supporting traffic law enforcement agencies and assisting in the improvement of highway safety programs.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree plus Driver Education Endorsement.

Course Number: 1900310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Driver Education and Traffic Safety > **SubSubject:** General >

Abbreviated Title: DRIVER ED CLASS/LAB

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Elective Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

M/J Intensive Reading 1 (#1000010) 2021 - And Beyond

Course Standards

For 6th grade standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.6.C.1.2:	Write personal or fictional narratives using narrative techniques, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: Figurative language at this grade level should include any on which students have received instruction in this or previous grades. See Figurative Language Standard. **Standard Relation to Course: Supporting**
ELA.6.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, and a logical organizational structure with varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Supporting**
ELA.6.C.1.4:	Write expository texts to explain and/or analyze information from multiple sources, using a logical organizational structure, relevant elaboration, and varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Supporting**
ELA.6.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, clear pronunciation, and appropriate pacing. **Clarifications:** *Clarification 1*: Nonverbal cues appropriate to this grade level are posture, tone, expressive delivery, focus on the audience, and facial expression. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. Appropriate pacing is adhering to the pauses dictated by punctuation and speaking at a rate that best facilitates comprehension by the audience. Too fast a pace will lose listeners and too slow can become monotonous. The element will also help students address the nervousness that may make them speak too fast during presentations. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Supporting**
ELA.6.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use verbals including gerunds, infinitives, and participial phrases. • Use comparative and superlative forms of adjectives. • Use pronouns correctly with regard to case, number, and person, correcting for vague pronoun reference. Skills to be implemented but not yet mastered are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Supporting**
ELA.6.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refocusing the inquiry when appropriate. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Supporting**
ELA.6.R.1.1:	Analyze how the interaction between characters contributes to the development of a plot in a literary text. **Standard Relation to Course: Major**
ELA.6.R.1.2:	Analyze the development of stated or implied theme(s) throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. See Theme in Glossary. *Clarification 2*: Students should be introduced to the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.

	Standard Relation to Course: Major
ELA.6.R.1.3:	Explain the influence of multiple narrators and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: When referring to the person of the narrator, the term "point of view" is used. Students focused on perspective in fifth grade, so they should differentiate between point of view and perspective when working on this benchmark. **Standard Relation to Course: Major**
ELA.6.R.1.4:	Describe the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. **Standard Relation to Course: Major**
ELA.6.R.2.1:	Explain how individual text sections and/or features convey meaning in texts. **Standard Relation to Course: Major**
ELA.6.R.2.2:	Analyze the central idea(s), implied or explicit, and its development throughout a text. **Clarifications:** *Clarification 1*: Various types of support could include an author's use of facts, definitions, concrete details, and/or quotations to develop the central idea(s) in a text. **Standard Relation to Course: Major**
ELA.6.R.2.3:	Analyze authors' purpose(s) in multiple accounts of the same event or topic. **Standard Relation to Course: Major**
ELA.6.R.2.4:	Track the development of an argument, identifying the types of reasoning used. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.6.R.3.1:	Explain how figurative language contributes to tone and meaning in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser. **Standard Relation to Course: Major**
	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns.

ELA.612.F.2.2:	**Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning. **Standard Relation to Course: Major**
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word. **Standard Relation to Course: Major**
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

	Standard Relation to Course: Supporting
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 6th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

Important Note: Reading and writing courses should not be used in place of English language arts courses; reading and writing courses are intended to be used to supplement further study in English language arts.

The Intensive courses have been designed for the teacher to select and teach only the appropriate standards corresponding to the student's grade and/or instructional level. This course should not be used in place of grade level English language arts courses and is intended to provide intervention for students who have reading deficiencies.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree plus Reading Endorsement.

Course Standards

For 7th grade standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser. **Standard Relation to Course: Major**
ELA.612.F.2.2:	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning. **Standard Relation to Course: Major**
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word. **Standard Relation to Course: Major**
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.7.C.1.2:	Write personal or fictional narratives using narrative techniques, a recognizable point of view, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Supporting**
ELA.7.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, a logical organizational structure with varied transitions, and acknowledging at least one counterclaim. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Supporting**
ELA.7.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details and a logical organizational pattern. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Supporting**
	Present information orally, in a logical sequence, emphasizing key points that support the central idea.

ELA.7.C.2.1:	**Clarifications:** *Clarification 1*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Supporting**
ELA.7.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. Skills to be implemented but not yet mastered are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Supporting**
ELA.7.R.1.1:	Analyze the impact of setting on character development and plot in a literary text. **Standard Relation to Course: Major**
ELA.7.R.1.2:	Compare two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. *Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.7.R.1.3:	Explain the influence of narrator(s), including unreliable narrator(s), and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: An unreliable narrator is one who lacks credibility. Because all information is being conveyed through this untrustworthy source, readers have to use inferencing to establish what is likely to be true. Narrators can be unreliable for many reasons including purposeful dishonesty, a lack information or background knowledge about what that information means, mental illness, or self-deception. *Clarification 2*: "Shifts in point of view" refers to a change in the narrator's point of view done for effect. Changes can be in degree and/or person: for example, a shift from third-person limited to third-person omniscient or from first-person limited to third-person limited. **Standard Relation to Course: Major**
ELA.7.R.1.4:	Analyze the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. *Clarification 2*: Instruction in this benchmark should focus on how the structure of each poetic form affects its meaning. **Standard Relation to Course: Major**
ELA.7.R.2.1:	Explain how individual text sections and/or features convey a purpose in texts. **Standard Relation to Course: Major**
ELA.7.R.2.2:	Compare two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.7.R.2.3:	Explain how an author establishes and achieves purpose(s) through diction and syntax. **Clarifications:** *Clarification 1*: This benchmark focuses on the way in which diction (the author's word choice) and syntax (the way in which an author arranges those words) work together to achieve a purpose. **Standard Relation to Course: Major**
ELA.7.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.7.R.3.1:	Analyze how figurative language contributes to tone and meaning and explain examples of allusions in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.7.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.

	Standard Relation to Course: Major
ELA.7.R.3.3:	Compare and contrast how authors with differing perspectives address the same or related topics or themes. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.7.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.7.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.7.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.7.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**

ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 7th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

Important Note: Reading and writing courses should not be used in place of English language arts courses; reading and writing courses are intended to be used to supplement further study in English language arts.

The Intensive courses have been designed for the teacher to select and teach only the appropriate standards corresponding to the student's grade and/or instructional level. This course should not be used in place of grade level English language arts courses and is intended to provide intervention for students who have reading deficiencies.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 1000012

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** English/Language Arts > **SubSubject:** Remedial >

Course Length: Year (Y)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

Reading (Elementary and Secondary Grades K-12)
Middle Grades English (Middle Grades 5-9) Plus Reading Endorsement

M/J Intensive Reading 3 (#1000014) 2021 - And Beyond (current)

Course Standards

For 8th grade standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser. **Standard Relation to Course: Major**
ELA.612.F.2.2:	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning. **Standard Relation to Course: Major**
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word. **Standard Relation to Course: Major**
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.8.C.1.2:	Write personal or fictional narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.3:	Write to argue a position, supporting at least one claim and rebutting at least one counterclaim with logical reasoning, credible evidence from sources, elaboration, and using a logical organizational structure. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details, logical organization, and varied purposeful transitions. **Clarifications:** Clarification 1: See Writing Types. **Standard Relation to Course: Major**
	Present information orally, in a logical sequence, supporting the central idea with credible evidence. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume,

ELA.8.C.2.1:	pronunciation, and pacing. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.8.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.8.R.1.1:	Analyze the interaction between character development, setting, and plot in a literary text. **Standard Relation to Course: Major**
ELA.8.R.1.2:	Analyze two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. *Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.8.R.1.3:	Analyze how an author develops and individualizes the perspectives of different characters. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.8.R.1.4:	Analyze structure, sound, imagery, and figurative language in poetry. **Clarifications:** Clarification 1: Structural elements for this benchmark are form, line length, white space, indention, line breaks, and stanza breaks. *Clarification 2*: Sound can be created through the use of end rhyme, internal rhyme, slant rhyme, alliteration, assonance, consonance, onomatopoeia, repetition, and meter. *Clarification 3*: Imagery, as used here, refers to language and description that appeals to the five senses. *Clarification 4*: Figurative language types for this benchmark are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. **Standard Relation to Course: Major**
ELA.8.R.2.1:	Analyze how individual text sections and/or features convey a purpose and/or meaning in texts. **Standard Relation to Course: Major**
ELA.8.R.2.2:	Analyze two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.8.R.2.3:	Explain how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** Clarification 1: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.8.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness, identifying ways in which the argument could be improved. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.8.R.3.1:	Analyze how figurative language contributes to meaning and explain examples of symbolism in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**

ELA.8.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.8.R.3.3:	Compare and contrast the use or discussion of archetypes in texts. **Clarifications:** *Clarification 1*: See Archetypes. **Standard Relation to Course: Major**
ELA.8.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.8.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.8.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.8.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume,

ELA.9.C.2.1:	pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Supporting**
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony. **Standard Relation to Course: Major**
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.

	Standard Relation to Course: Major
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Supporting**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:	**Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 9th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 1000412

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts > **SubSubject:** Remedial >

Abbreviated Title: Intens Read 1

Number of Credits: Multiple Credit (more than 1 credit)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Graduation Requirement: Electives

Educator Certifications

Reading (Elementary and Secondary Grades K-12)
English (Grades 6-12) Plus Reading Endorsement
Reading Endorsement Plus Social Science (Grades 6-12)

Intensive Reading 2 (#1000414) 2021 - And Beyond (current)

Course Standards

For 10th grade reading standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.
ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays.
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible.

ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language.
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser.
ELA.612.F.2.2:	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning.
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word.
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.7.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.8.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade

	level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 10th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

Intensive Reading 3 (#1000416) 2021 - And Beyond (current)

Course Standards

For 11th grade reading standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.11.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis.
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.11.C.4.1:	Conduct literary research to answer a question, refining the scope of the question to align with interpretations of texts, and synthesizing information from primary and secondary sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.11.R.1.2:	Track and analyze universal themes in literary texts from different times and places. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.

ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods.
ELA.11.R.2.1:	Evaluate the structure(s) and features in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in speeches and essays from the Classical Period.
ELA.11.R.2.4:	Compare the development of multiple arguments on the same topic, evaluating the effectiveness and validity of the claims, the authors' reasoning, and the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
ELA.11.R.3.1:	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language.
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and

ELA.11.R.3.4:	responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser.
ELA.612.F.2.2:	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning.
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word.
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.8.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
	Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:	**Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 11th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 1000416

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts

> **SubSubject:** Remedial >

Abbreviated Title: INTENS READ 3

Number of Credits: One (1) credit

Course Length: Multiple (M) - Course length can vary

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Graduation Requirement: Electives

Educator Certifications

Reading (Elementary and Secondary Grades K-12)
English (Grades 6-12) Plus Reading Endorsement
Reading Endorsement Plus Social Science (Grades 6-12)

Intensive Reading 4 (#1000418) 2021 - And Beyond (current)

Course Standards

For 12th grade reading standards, teachers may need to go to the benchmark of an earlier grade as a scaffold where a student has not yet reached mastery.

Name	Description
ELA.12.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives and convey universal themes. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.12.C.1.3:	Write arguments to support claims based on an in-depth analysis of topics or texts using valid reasoning and credible evidence from sources, elaboration, and demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: These written works will take longer and are meant to reflect thorough research and analysis. **Standard Relation to Course: Major**
ELA.12.C.1.4:	Write an in-depth analysis of complex texts using logical organization and appropriate tone and voice, demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.12.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. Students will be using rhetorical devices as introduced in the 11th grade benchmark. Added to this grade level is a responsiveness to the needs of the audience and adapting to audience response. Students will read the nonverbal cues of the audience to do this. Students first learned nonverbal cues in elementary for this benchmark. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.12.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.12.C.4.1:	Conduct research on a topical issue to answer a question and synthesize information from a variety of sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.12.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text and explain the functional significance of those elements in interpreting the text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning, but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. *Clarification 4*: Functional significance refers to the role each element plays in creating meaning or effect for the reader. **Standard Relation to Course: Major**
ELA.12.R.1.2:	Analyze two or more themes and evaluate their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. **Standard Relation to Course: Major**
	Evaluate the development of character perspective, including conflicting perspectives.

ELA.12.R.1.3:	**Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.12.R.1.4:	Evaluate works of major poets in their historical context. **Clarifications:** *Sample poets for this benchmark include*: • Emily Dickinson • Langston Hughes • Robert Frost • Phyllis Wheatley • Edna St. Vincent Millay • Countee Cullen • Robert Burns • Percy Bysshe Shelley *Clarification 1*: A poet's historical context is the period in which the writing occurred, not when it was discovered or became resurgent. *Clarification 2*: Evaluation of a poet in context may include similarity to or differences from the work of contemporaries and the literary period, critical reception at the time, and scope of work. *Clarification 3*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.12.R.2.1:	Evaluate the structure(s) and features in texts, identifying how the author could make the text(s) more effective. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.12.R.2.2:	Evaluate how an author develops the central idea(s), identifying how the author could make the support more effective. **Standard Relation to Course: Major**
ELA.12.R.2.3:	Evaluate an author's choices in establishing and achieving purpose(s). **Standard Relation to Course: Major**
ELA.12.R.2.4:	Compare the development of multiple arguments in related texts, evaluating the validity of the claims, the authors' reasoning, use of the same information, and/or the authors' rhetoric. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 3*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.12.R.3.1:	Evaluate an author's use of figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will evaluate are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.12.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.12.R.3.3:	Analyze the influence of classic literature on contemporary world texts. **Clarifications:** *Clarification 1*: Classic literature for this benchmark should be drawn from and representative of the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Contemporary world texts are those written after World War II that, through quality of form and expression, convey ideas of permanent or universal interest. **Standard Relation to Course: Major**
	Evaluate rhetorical choices across multiple texts. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos was added in 11th grade. This differs from the 11th grade benchmark in that it is comparing the

ELA.12.R.3.4:	effectiveness of multiple texts. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.12.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.12.V.1.2:	Apply knowledge of etymology, derivations, and commonly used foreign phrases to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. *Clarification 3*: See Foreign Words and Phrases for a list of commonly used foreign phrases. **Standard Relation to Course: Major**
ELA.12.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.12.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.612.F.2.1:	Demonstrate an understanding of spoken words, syllables, and sounds. a. Orally produce single-syllable and multisyllabic words by accurately blending sounds. b. Accurately segment single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. a. Orally combine c-a-t to make cat/ orally combine trou-ser to make trouser. b. Orally break cat into c-a-t/ orally break trouser into trou-ser. **Standard Relation to Course: Major**
ELA.612.F.2.2:	Know and apply phonics and word analysis skills in decoding words. a. Use an array of strategies to decode single-syllable and multisyllabic words. b. Accurately read multisyllabic words using a combined knowledge of all letter-sound correspondences, and syllabication patterns. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). Since morphemes represent the smallest unit of language with meaning, morphology refers to the skill of recognizing morphemes as a unit when decoding and determining meaning. **Standard Relation to Course: Major**
ELA.612.F.2.3:	Know and apply phonics and word analysis skills in encoding words. a. Use an array of strategies to accurately encode single-syllable and multisyllabic words. **Clarifications:** *Clarification 1*: Encoding refers to using the written word in order to communicate. It combines the skills of phonological awareness, phonics, and morphology to move from the oral to the written word. a. The process of encoding sounds through letters (s, r), consonant blends (sh, sk), digraphs (ay, ew), or trigraphs (sch, thr) using conventional spelling patterns to form words. b. The process of adding single units of sound with meaning to existing word parts to encode a given word. **Standard Relation to Course: Major**
ELA.612.F.2.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. The chart stops at 6th grade because it represents sufficient automaticity for proficient reading. For secondary students receiving reading interventions, teachers should use the 6th grade norms as a goal. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**

ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 12th grade students reading below grade level. The course includes foundational skill standards to be used until a student has mastered the standard.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring. The expected outcome is for the student to achieve grade-level proficiency.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 1000418

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts > **SubSubject:** Remedial >

Abbreviated Title: INTENS READ 4

Number of Credits: One (1) credit

Course Length: Multiple (M) - Course length can vary

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Graduation Requirement: Electives

Educator Certifications

English (Grades 6-12) Plus Reading Endorsement
Reading (Elementary and Secondary Grades K-12)
Reading Endorsement Plus Social Science (Grades 6-12)

M/J Language Arts 1 (#1001010) 2022 - And Beyond

Course Standards

Name	Description
ELA.6.C.1.2:	Write personal or fictional narratives using narrative techniques, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: Figurative language at this grade level should include any on which students have received instruction in this or previous grades. See Figurative Language Standard. **Standard Relation to Course: Major**
ELA.6.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, and a logical organizational structure with varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.6.C.1.4:	Write expository texts to explain and/or analyze information from multiple sources, using a logical organizational structure, relevant elaboration, and varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.6.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers. **Standard Relation to Course: Major**
ELA.6.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, clear pronunciation, and appropriate pacing. **Clarifications:** *Clarification 1*: Nonverbal cues appropriate to this grade level are posture, tone, expressive delivery, focus on the audience, and facial expression. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. Appropriate pacing is adhering to the pauses dictated by punctuation and speaking at a rate that best facilitates comprehension by the audience. Too fast a pace will lose listeners and too slow can become monotonous. The element will also help students address the nervousness that may make them speak too fast during presentations. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.6.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use verbals including gerunds, infinitives, and participial phrases. • Use comparative and superlative forms of adjectives. • Use pronouns correctly with regard to case, number, and person, correcting for vague pronoun reference. Skills to be implemented but not yet mastered are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.6.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refocusing the inquiry when appropriate. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.6.C.5.1:	Integrate diverse digital media to enhance audience engagement in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the task and complement the information being shared, meaning that the multimedia elements should add information to the presentation, not restate or reinforce it. The elements should be smoothly integrated into the presentation. **Standard Relation to Course: Major**
ELA.6.C.5.2:	Use digital tools to produce writing. **Standard Relation to Course: Major**

ELA.6.R.1.1:	Analyze how the interaction between characters contributes to the development of a plot in a literary text. **Standard Relation to Course: Major**
ELA.6.R.1.2:	Analyze the development of stated or implied theme(s) throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. See Theme in Glossary. *Clarification 2*: Students should be introduced to the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.6.R.1.3:	Explain the influence of multiple narrators and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: When referring to the person of the narrator, the term "point of view" is used. Students focused on perspective in fifth grade, so they should differentiate between point of view and perspective when working on this benchmark. **Standard Relation to Course: Major**
ELA.6.R.1.4:	Describe the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. **Standard Relation to Course: Major**
ELA.6.R.2.1:	Explain how individual text sections and/or features convey meaning in texts. **Standard Relation to Course: Major**
ELA.6.R.2.2:	Analyze the central idea(s), implied or explicit, and its development throughout a text. **Clarifications:** *Clarification 1*: Various types of support could include an author's use of facts, definitions, concrete details, and/or quotations to develop the central idea(s) in a text. **Standard Relation to Course: Major**
ELA.6.R.2.3:	Analyze authors' purpose(s) in multiple accounts of the same event or topic. **Standard Relation to Course: Major**
ELA.6.R.2.4:	Track the development of an argument, identifying the types of reasoning used. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.6.R.3.1:	Explain how figurative language contributes to tone and meaning in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.6.R.3.3:	Compare and contrast how authors from different time periods address the same or related topics. **Clarifications:** *Clarification 1*: Texts for this benchmark should be selected from the following literary periods: • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) **Standard Relation to Course: Major**
ELA.6.R.3.4:	Identify rhetorical appeals in a text. **Clarifications:** *Clarification 1*: Students will identify the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals. **Standard Relation to Course: Major**
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.

	Standard Relation to Course: Major
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 6th grade. Knowledge acquisition should be the primary purpose of any reading

approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 6th Grade Sample Book List should be used in instruction.

ELA.6.R.2.4:	Track the development of an argument, identifying the types of reasoning used. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.6.R.3.1:	Explain how figurative language contributes to tone and meaning in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.6.R.3.3:	Compare and contrast how authors from different time periods address the same or related topics. **Clarifications:** *Clarification 1*: Texts for this benchmark should be selected from the following literary periods: • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) **Standard Relation to Course: Major**
ELA.6.R.3.4:	Identify rhetorical appeals in a text. **Clarifications:** *Clarification 1*: Students will identify the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals. **Standard Relation to Course: Major**
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.

	Standard Relation to Course: Major
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.6.W.1.3:	Interpret primary and secondary sources. **Clarifications:** Examples are artifacts, images, auditory sources, written sources. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of the grade level. Knowledge acquisition should be the primary purpose of any reading approach. The systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 6th Grade Sample Book List should be used in instruction.

Course Standards

Name	Description
ELA.7.C.1.2:	Write personal or fictional narratives using narrative techniques, a recognizable point of view, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.7.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, a logical organizational structure with varied transitions, and acknowledging at least one counterclaim. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.7.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details and a logical organizational pattern. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.7.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers. **Standard Relation to Course: Major**
ELA.7.C.2.1:	Present information orally, in a logical sequence, emphasizing key points that support the central idea. **Clarifications:** *Clarification 1*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.7.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. Skills to be implemented but not yet mastered are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.7.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and generating additional questions for further research. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. *Clarification 2*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.7.C.5.1:	Integrate diverse digital media to build cohesion in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the presentation and help to unify the concepts. The elements should be smoothly integrated into the presentation. **Standard Relation to Course: Major**
ELA.7.C.5.2:	Use digital tools to produce and share writing. **Standard Relation to Course: Major**
ELA.7.R.1.1:	Analyze the impact of setting on character development and plot in a literary text. **Standard Relation to Course: Major**
	Compare two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message.

ELA.7.R.1.2:	*Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.7.R.1.3:	Explain the influence of narrator(s), including unreliable narrator(s), and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: An unreliable narrator is one who lacks credibility. Because all information is being conveyed through this untrustworthy source, readers have to use inferencing to establish what is likely to be true. Narrators can be unreliable for many reasons including purposeful dishonesty, a lack information or background knowledge about what that information means, mental illness, or self-deception. *Clarification 2*: "Shifts in point of view" refers to a change in the narrator's point of view done for effect. Changes can be in degree and/or person: for example, a shift from third-person limited to third-person omniscient or from first-person limited to third-person limited. **Standard Relation to Course: Major**
ELA.7.R.1.4:	Analyze the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. *Clarification 2*: Instruction in this benchmark should focus on how the structure of each poetic form affects its meaning. **Standard Relation to Course: Major**
ELA.7.R.2.1:	Explain how individual text sections and/or features convey a purpose in texts. **Standard Relation to Course: Major**
ELA.7.R.2.2:	Compare two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.7.R.2.3:	Explain how an author establishes and achieves purpose(s) through diction and syntax. **Clarifications:** *Clarification 1*: This benchmark focuses on the way in which diction (the author's word choice) and syntax (the way in which an author arranges those words) work together to achieve a purpose. **Standard Relation to Course: Major**
ELA.7.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.7.R.3.1:	Analyze how figurative language contributes to tone and meaning and explain examples of allusions in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.7.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.7.R.3.3:	Compare and contrast how authors with differing perspectives address the same or related topics or themes. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.7.R.3.4:	Explain the meaning and/or significance of rhetorical devices in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 7.R.3.1 with the addition of irony and rhetorical questioning. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Devices. **Standard Relation to Course: Major**
ELA.7.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.7.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.

	Standard Relation to Course: Major
ELA.7.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.7.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 7th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.7.C.5.1:	Integrate diverse digital media to build cohesion in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the presentation and help to unify the concepts. The elements should be smoothly integrated into the presentation. **Standard Relation to Course: Major**
ELA.7.C.5.2:	Use digital tools to produce and share writing. **Standard Relation to Course: Major**
ELA.7.R.1.1:	Analyze the impact of setting on character development and plot in a literary text. **Standard Relation to Course: Major**
	Compare two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message.

ELA.7.R.1.2:	*Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.7.R.1.3:	Explain the influence of narrator(s), including unreliable narrator(s), and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: An unreliable narrator is one who lacks credibility. Because all information is being conveyed through this untrustworthy source, readers have to use inferencing to establish what is likely to be true. Narrators can be unreliable for many reasons including purposeful dishonesty, a lack information or background knowledge about what that information means, mental illness, or self-deception. *Clarification 2*: "Shifts in point of view" refers to a change in the narrator's point of view done for effect. Changes can be in degree and/or person: for example, a shift from third-person limited to third-person omniscient or from first-person limited to third-person limited. **Standard Relation to Course: Major**
ELA.7.R.1.4:	Analyze the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. *Clarification 2*: Instruction in this benchmark should focus on how the structure of each poetic form affects its meaning. **Standard Relation to Course: Major**
ELA.7.R.2.1:	Explain how individual text sections and/or features convey a purpose in texts. **Standard Relation to Course: Major**
ELA.7.R.2.2:	Compare two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.7.R.2.3:	Explain how an author establishes and achieves purpose(s) through diction and syntax. **Clarifications:** *Clarification 1*: This benchmark focuses on the way in which diction (the author's word choice) and syntax (the way in which an author arranges those words) work together to achieve a purpose. **Standard Relation to Course: Major**
ELA.7.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.7.R.3.1:	Analyze how figurative language contributes to tone and meaning and explain examples of allusions in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.7.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.7.R.3.3:	Compare and contrast how authors with differing perspectives address the same or related topics or themes. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.7.R.3.4:	Explain the meaning and/or significance of rhetorical devices in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 7.R.3.1 with the addition of irony and rhetorical questioning. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Devices. **Standard Relation to Course: Major**
ELA.7.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.7.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.

	Standard Relation to Course: Major
ELA.7.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.7.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.7.C.2.11:	Analyze media and political communications (bias, symbolism, propaganda). **Clarifications:** This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of the grade level. Knowledge acquisition should be the primary purpose of any reading approach. The systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 7th Grade Sample Book List should be used in instruction.

M/J Language Arts 3 (#1001070) 2022 - And Beyond

Course Standards

Name	Description
ELA.8.C.1.2:	Write personal or fictional narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.3:	Write to argue a position, supporting at least one claim and rebutting at least one counterclaim with logical reasoning, credible evidence from sources, elaboration, and using a logical organizational structure. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details, logical organization, and varied purposeful transitions. **Clarifications:** Clarification 1: See Writing Types. **Standard Relation to Course: Major**
ELA.8.C.1.5:	Improve writing by planning, editing, considering feedback from adults and peers, and revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.8.C.2.1:	Present information orally, in a logical sequence, supporting the central idea with credible evidence. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.8.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.8.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and generating additional questions for further research. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. *Clarification 2*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.8.C.5.1:	Integrate diverse digital media to emphasize the relevance of a topic or idea in oral or written tasks. **Standard Relation to Course: Major**
ELA.8.C.5.2:	Use a variety of digital tools to collaborate with others to produce writing. **Standard Relation to Course: Major**
ELA.8.R.1.1:	Analyze the interaction between character development, setting, and plot in a literary text. **Standard Relation to Course: Major**
ELA.8.R.1.2:	Analyze two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. *Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
	Analyze how an author develops and individualizes the perspectives of different characters. **Clarifications:**

ELA.8.R.1.3:	*Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.8.R.1.4:	Analyze structure, sound, imagery, and figurative language in poetry. **Clarifications:** Clarification 1: Structural elements for this benchmark are form, line length, white space, indention, line breaks, and stanza breaks. *Clarification 2*: Sound can be created through the use of end rhyme, internal rhyme, slant rhyme, alliteration, assonance, consonance, onomatopoeia, repetition, and meter. *Clarification 3*: Imagery, as used here, refers to language and description that appeals to the five senses. *Clarification 4*: Figurative language types for this benchmark are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. **Standard Relation to Course: Major**
ELA.8.R.2.1:	Analyze how individual text sections and/or features convey a purpose and/or meaning in texts. **Standard Relation to Course: Major**
ELA.8.R.2.2:	Analyze two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.8.R.2.3:	Explain how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** Clarification 1: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.8.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness, identifying ways in which the argument could be improved. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.8.R.3.1:	Analyze how figurative language contributes to meaning and explain examples of symbolism in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.8.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.8.R.3.3:	Compare and contrast the use or discussion of archetypes in texts. **Clarifications:** *Clarification 1*: See Archetypes. **Standard Relation to Course: Major**
ELA.8.R.3.4:	Explain how an author uses rhetorical devices to support or advance an appeal. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 8.R.3.1 with the addition of irony, rhetorical question, antithesis, and zeugma. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 4*: Students will explain the connection between an author's use of rhetorical devices and the appeal—logos, ethos, or pathos—that is being made. Instruction should focus on ensuring students can explain how specific rhetorical devices contribute to the development of the rhetorical appeal(s) the author uses. **Standard Relation to Course: Major**
ELA.8.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content.

ELA.8.V.1.2:	**Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.8.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.8.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 8th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
ELA.8.C.1.2:	Write personal or fictional narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.3:	Write to argue a position, supporting at least one claim and rebutting at least one counterclaim with logical reasoning, credible evidence from sources, elaboration, and using a logical organizational structure. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.8.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details, logical organization, and varied purposeful transitions. **Clarifications:** Clarification 1: See Writing Types. **Standard Relation to Course: Major**
ELA.8.C.1.5:	Improve writing by planning, editing, considering feedback from adults and peers, and revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.8.C.2.1:	Present information orally, in a logical sequence, supporting the central idea with credible evidence. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.8.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.8.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and generating additional questions for further research. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. *Clarification 2*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.8.C.5.1:	Integrate diverse digital media to emphasize the relevance of a topic or idea in oral or written tasks. **Standard Relation to Course: Major**
ELA.8.C.5.2:	Use a variety of digital tools to collaborate with others to produce writing. **Standard Relation to Course: Major**
ELA.8.R.1.1:	Analyze the interaction between character development, setting, and plot in a literary text. **Standard Relation to Course: Major**
ELA.8.R.1.2:	Analyze two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. *Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
	Analyze how an author develops and individualizes the perspectives of different characters. **Clarifications:**

ELA.8.R.1.3:	*Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.8.R.1.4:	Analyze structure, sound, imagery, and figurative language in poetry. **Clarifications:** Clarification 1: Structural elements for this benchmark are form, line length, white space, indention, line breaks, and stanza breaks. *Clarification 2*: Sound can be created through the use of end rhyme, internal rhyme, slant rhyme, alliteration, assonance, consonance, onomatopoeia, repetition, and meter. *Clarification 3*: Imagery, as used here, refers to language and description that appeals to the five senses. *Clarification 4*: Figurative language types for this benchmark are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. **Standard Relation to Course: Major**
ELA.8.R.2.1:	Analyze how individual text sections and/or features convey a purpose and/or meaning in texts. **Standard Relation to Course: Major**
ELA.8.R.2.2:	Analyze two or more central ideas and their development throughout a text. **Standard Relation to Course: Major**
ELA.8.R.2.3:	Explain how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** Clarification 1: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.8.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness, identifying ways in which the argument could be improved. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal). **Standard Relation to Course: Major**
ELA.8.R.3.1:	Analyze how figurative language contributes to meaning and explain examples of symbolism in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.8.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.8.R.3.3:	Compare and contrast the use or discussion of archetypes in texts. **Clarifications:** *Clarification 1*: See Archetypes. **Standard Relation to Course: Major**
ELA.8.R.3.4:	Explain how an author uses rhetorical devices to support or advance an appeal. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 8.R.3.1 with the addition of irony, rhetorical question, antithesis, and zeugma. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 4*: Students will explain the connection between an author's use of rhetorical devices and the appeal—logos, ethos, or pathos—that is being made. Instruction should focus on ensuring students can explain how specific rhetorical devices contribute to the development of the rhetorical appeal(s) the author uses. **Standard Relation to Course: Major**
ELA.8.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content.

ELA.8.V.1.2:	**Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Major**
ELA.8.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.8.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of the grade level. Knowledge acquisition should be the primary purpose of any reading approach. The systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with

rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 8th Grade Sample Book List should be used in instruction.

English 1 (#1001310) 2022 - And Beyond

Course Standards

Name	Description
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. **Standard Relation to Course: Major**
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience. **Standard Relation to Course: Major**
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.

	Standard Relation to Course: Major
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony. **Standard Relation to Course: Major**
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:**

ELA.9.V.1.2:	*Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 9th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Name	Description
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness.
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level.
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated.
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience.
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony.
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.
	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast,

ELA.9.R.2.1:	cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible.
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices.
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 9th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Special Notes: Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 9th Grade Sample Book List should be used in instruction.

GENERAL INFORMATION

Course Number: 1001315

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts > **SubSubject:** English >

Abbreviated Title: ENG 1 CR

Number of Credits: One (1) credit

Course Length: Credit Recovery (R)

Course Type: Credit Recovery

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9

Educator Certifications

English (Grades 6-12)
Middle Grades English (Middle Grades 5-9)

English Honors 1 (#1001320) 2022 - And Beyond

Course Standards

Name	Description
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. **Standard Relation to Course: Major**
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience. **Standard Relation to Course: Major**
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.

	Standard Relation to Course: Major
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony. **Standard Relation to Course: Major**
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:**

ELA.9.V.1.2:	*Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.912.H.2.2:	Classify styles, forms, types, and genres within art forms. **Clarifications:** Examples are Gothic and Romanesque columns, modern and ethnic dance, epic poetry and Shakespearean plays, ballads and nationalistic music, surrealism and cubism. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 9th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.10.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and maintaining a formal and objective tone. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: The tone should be both formal and objective, relying more on argument and rhetorical appeals rather than on propaganda techniques. Use narrative techniques to strengthen writing where appropriate. **Standard Relation to Course: Major**
ELA.10.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, purposeful transitions, and a tone and voice appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience. **Standard Relation to Course: Major**
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.10.C.5.1:	Create digital presentations to improve understanding of findings, reasoning, and evidence. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**
ELA.10.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience, integrating multimedia elements. **Standard Relation to Course: Major**
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.

	Standard Relation to Course: Major
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.1.4:	Analyze how authors create multiple layers of meaning and/or ambiguity in a poem. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays. **Standard Relation to Course: Major**
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.

	Standard Relation to Course: Major
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**

ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 10th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 10th Grade Sample Book List should be used in instruction.

GENERAL INFORMATION

Course Number: 1001340

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts > **SubSubject:** English >

Abbreviated Title: ENG 2

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Graduation Requirement: English

Educator Certifications

English (Grades 6-12)

Equivalent Courses

1001416-Pre-Advanced Placement English 2
Equivalency start year: 2020

English 2 for Credit Recovery (#1001345) 2022 - And Beyond

Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.10.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and maintaining a formal and objective tone. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: The tone should be both formal and objective, relying more on argument and rhetorical appeals rather than on propaganda techniques. Use narrative techniques to strengthen writing where appropriate.
ELA.10.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, purposeful transitions, and a tone and voice appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience.
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.10.C.5.1:	Create digital presentations to improve understanding of findings, reasoning, and evidence. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.10.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience, integrating multimedia elements.
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.
ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:**

	Clarification 1: For more information, see Literary Periods.
ELA.10.R.1.4:	Analyze how authors create multiple layers of meaning and/or ambiguity in a poem. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays.
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible.
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly

	quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 10th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Special Notes: Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.

	Standard Relation to Course: Major
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.912.H.2.2:	Classify styles, forms, types, and genres within art forms. **Clarifications:** Examples are Gothic and Romanesque columns, modern and ethnic dance, epic poetry and Shakespearean plays, ballads and nationalistic music, surrealism and cubism. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students in an honors setting should understand and be able to do by the end of 10th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 10th Grade Sample Book List should be used in instruction.

Course Standards

Name	Description
ELA.11.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis. **Standard Relation to Course: Major**
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.11.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to improve clarity, structure, and style. **Standard Relation to Course: Major**
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.11.C.4.1:	Conduct literary research to answer a question, refining the scope of the question to align with interpretations of texts, and synthesizing information from primary and secondary sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.11.C.5.1:	Create digital presentations to improve the experience of the audience. **Clarifications:** *Clarification 1*: At this grade level, students are using multiple elements. The presentation may be delivered live or delivered as a stand-alone digital experience. The elements should be of different types. The elements should relate directly to the presentation and be incorporated in a way that engages the audience. **Standard Relation to Course: Major**
ELA.11.C.5.2:	Create and export quality writing tailored to a specific audience, integrating multimedia elements, publishing to an online or LAN site. **Standard Relation to Course: Major**
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the

	author's voice. **Standard Relation to Course: Major**
ELA.11.R.1.2:	Track and analyze universal themes in literary texts from different times and places. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.11.R.2.1:	Evaluate the structure(s) and features in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in speeches and essays from the Classical Period. **Standard Relation to Course: Major**
ELA.11.R.2.4:	Compare the development of multiple arguments on the same topic, evaluating the effectiveness and validity of the claims, the authors' reasoning, and the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
ELA.11.R.3.1:	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**

ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
ELA.11.R.3.4:	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

	Standard Relation to Course: Supporting
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 11th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 11th Grade Sample Book List should be used in instruction.

English (Grades 6-12)

English 3 for Credit Recovery (#1001375) 2022 - And Beyond

Course Standards

Additional Requirements:

The following Florida Standards for Mathematical Practices are applicable in all content areas.

- Make sense of problems and persevere in solving them. (MP 1)
- Construct viable arguments and critique the reasoning of others. (MP 3)
- Attend to precision. (MP 6)

Name	Description
ELA.11.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis.
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.11.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to improve clarity, structure, and style.
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.11.C.4.1:	Conduct literary research to answer a question, refining the scope of the question to align with interpretations of texts, and synthesizing information from primary and secondary sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.11.C.5.1:	Create digital presentations to improve the experience of the audience. **Clarifications:** *Clarification 1*: At this grade level, students are using multiple elements. The presentation may be delivered live or delivered as a stand-alone digital experience. The elements should be of different types. The elements should relate directly to the presentation and be incorporated in a way that engages the audience.
ELA.11.C.5.2:	Create and export quality writing tailored to a specific audience, integrating multimedia elements, publishing to an online or LAN site.
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
	Track and analyze universal themes in literary texts from different times and places.

ELA.11.R.1.2:	**Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.
ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods.
ELA.11.R.2.1:	Evaluate the structure(s) and features in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in speeches and essays from the Classical Period.
ELA.11.R.2.4:	Compare the development of multiple arguments on the same topic, evaluating the effectiveness and validity of the claims, the authors' reasoning, and the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
ELA.11.R.3.1:	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language.
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930)

	• Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
ELA.11.R.3.4:	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.

ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 11th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Approximately one-third of the titles from the 11th Grade Sample Book List should be used in instruction.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

Educator Certifications

English (Grades 6-12)

English Honors 3 (#1001380) 2022 - And Beyond

Course Standards

Name	Description
ELA.11.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis. **Standard Relation to Course: Major**
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.11.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to improve clarity, structure, and style. **Standard Relation to Course: Major**
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.11.C.4.1:	Conduct literary research to answer a question, refining the scope of the question to align with interpretations of texts, and synthesizing information from primary and secondary sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.11.C.5.1:	Create digital presentations to improve the experience of the audience. **Clarifications:** *Clarification 1*: At this grade level, students are using multiple elements. The presentation may be delivered live or delivered as a stand-alone digital experience. The elements should be of different types. The elements should relate directly to the presentation and be incorporated in a way that engages the audience. **Standard Relation to Course: Major**
ELA.11.C.5.2:	Create and export quality writing tailored to a specific audience, integrating multimedia elements, publishing to an online or LAN site. **Standard Relation to Course: Major**
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the

	author's voice. **Standard Relation to Course: Major**
ELA.11.R.1.2:	Track and analyze universal themes in literary texts from different times and places. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.11.R.2.1:	Evaluate the structure(s) and features in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in speeches and essays from the Classical Period. **Standard Relation to Course: Major**
ELA.11.R.2.4:	Compare the development of multiple arguments on the same topic, evaluating the effectiveness and validity of the claims, the authors' reasoning, and the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
ELA.11.R.3.1:	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**

ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
ELA.11.R.3.4:	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

	Standard Relation to Course: Supporting
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.912.H.2.2:	Classify styles, forms, types, and genres within art forms. **Clarifications:** Examples are Gothic and Romanesque columns, modern and ethnic dance, epic poetry and Shakespearean plays, ballads and nationalistic music, surrealism and cubism. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of the grade level. Knowledge acquisition should be the primary purpose of any reading approach. The systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 11th Grade Sample Book List should be used in instruction.

Course Standards

Name	Description
ELA.12.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives and convey universal themes. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.12.C.1.3:	Write arguments to support claims based on an in-depth analysis of topics or texts using valid reasoning and credible evidence from sources, elaboration, and demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: These written works will take longer and are meant to reflect thorough research and analysis. **Standard Relation to Course: Major**
ELA.12.C.1.4:	Write an in-depth analysis of complex texts using logical organization and appropriate tone and voice, demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.12.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to enhance purpose, clarity, structure, and style. **Standard Relation to Course: Major**
ELA.12.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. Students will be using rhetorical devices as introduced in the 11th grade benchmark. Added to this grade level is a responsiveness to the needs of the audience and adapting to audience response. Students will read the nonverbal cues of the audience to do this. Students first learned nonverbal cues in elementary for this benchmark. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.12.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.12.C.4.1:	Conduct research on a topical issue to answer a question and synthesize information from a variety of sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.12.C.5.1:	Design and evaluate digital presentations for effectiveness. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**
ELA.12.C.5.2:	Create, publish, and share multimedia texts through a variety of digital formats. **Standard Relation to Course: Major**
ELA.12.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text and explain the functional significance of those elements in interpreting the text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning, but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the

	author's voice. *Clarification 4*: Functional significance refers to the role each element plays in creating meaning or effect for the reader. **Standard Relation to Course: Major**
ELA.12.R.1.2:	Analyze two or more themes and evaluate their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. **Standard Relation to Course: Major**
ELA.12.R.1.3:	Evaluate the development of character perspective, including conflicting perspectives. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.12.R.1.4:	Evaluate works of major poets in their historical context. **Clarifications:** *Sample poets for this benchmark include*: • Emily Dickinson • Langston Hughes • Robert Frost • Phyllis Wheatley • Edna St. Vincent Millay • Countee Cullen • Robert Burns • Percy Bysshe Shelley *Clarification 1*: A poet's historical context is the period in which the writing occurred, not when it was discovered or became resurgent. *Clarification 2*: Evaluation of a poet in context may include similarity to or differences from the work of contemporaries and the literary period, critical reception at the time, and scope of work. *Clarification 3*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.12.R.2.1:	Evaluate the structure(s) and features in texts, identifying how the author could make the text(s) more effective. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.12.R.2.2:	Evaluate how an author develops the central idea(s), identifying how the author could make the support more effective. **Standard Relation to Course: Major**
ELA.12.R.2.3:	Evaluate an author's choices in establishing and achieving purpose(s). **Standard Relation to Course: Major**
ELA.12.R.2.4:	Compare the development of multiple arguments in related texts, evaluating the validity of the claims, the authors' reasoning, use of the same information, and/or the authors' rhetoric. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 3*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.12.R.3.1:	Evaluate an author's use of figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will evaluate are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.12.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.12.R.3.3:	Analyze the influence of classic literature on contemporary world texts. **Clarifications:** *Clarification 1*: Classic literature for this benchmark should be drawn from and representative of the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature

	• Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Contemporary world texts are those written after World War II that, through quality of form and expression, convey ideas of permanent or universal interest. **Standard Relation to Course: Major**
ELA.12.R.3.4:	Evaluate rhetorical choices across multiple texts. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos was added in 11th grade. This differs from the 11th grade benchmark in that it is comparing the effectiveness of multiple texts. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.12.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.12.V.1.2:	Apply knowledge of etymology, derivations, and commonly used foreign phrases to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. *Clarification 3*: See Foreign Words and Phrases for a list of commonly used foreign phrases. **Standard Relation to Course: Major**
ELA.12.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.12.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 12th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 12th Grade Sample Book List should be used in instruction.

GENERAL INFORMATION

Course Path: Section: Grades PreK to 12 Education

Course Number: 1001400

Number of Credits: One (1) credit

Course Type: Core Academic Course

Course Status: Course Approved

Graduation Requirement: English

Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** English/Language Arts > **SubSubject:** English >

Abbreviated Title: ENG 4

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Educator Certifications

English (Grades 6-12)

English 4 for Credit Recovery (#1001402) 2022 - And Beyond

Course Standards

Additional Requirements:

The following Florida State Standards for Mathematical Practices are applicable in all content areas.

- *Make sense of problems and persevere in solving them. (MP 1)*
- *Construct viable arguments and critique the reasoning of others. (MP 3)*
- *Attend to precision. (MP 6)*

Name	Description
ELA.12.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives and convey universal themes. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.12.C.1.3:	Write arguments to support claims based on an in-depth analysis of topics or texts using valid reasoning and credible evidence from sources, elaboration, and demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: These written works will take longer and are meant to reflect thorough research and analysis.
ELA.12.C.1.4:	Write an in-depth analysis of complex texts using logical organization and appropriate tone and voice, demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.12.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to enhance purpose, clarity, structure, and style.
ELA.12.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. Students will be using rhetorical devices as introduced in the 11th grade benchmark. Added to this grade level is a responsiveness to the needs of the audience and adapting to audience response. Students will read the nonverbal cues of the audience to do this. Students first learned nonverbal cues in elementary for this benchmark. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.12.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: See Convention Progression by Grade Level for more information.
ELA.12.C.4.1:	Conduct research on a topical issue to answer a question and synthesize information from a variety of sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.12.C.5.1:	Design and evaluate digital presentations for effectiveness. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.12.C.5.2:	Create, publish, and share multimedia texts through a variety of digital formats.
ELA.12.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text and explain the functional significance of those elements in interpreting the text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning, but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. *Clarification 4*: Functional significance refers to the role each element plays in creating meaning or effect for the reader.
ELA.12.R.1.2:	Analyze two or more themes and evaluate their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the

	author's message.
ELA.12.R.1.3:	Evaluate the development of character perspective, including conflicting perspectives. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.
ELA.12.R.1.4:	Evaluate works of major poets in their historical context. **Clarifications:** *Sample poets for this benchmark include*: • Emily Dickinson • Langston Hughes • Robert Frost • Phyllis Wheatley • Edna St. Vincent Millay • Countee Cullen • Robert Burns • Percy Bysshe Shelley *Clarification 1*: A poet's historical context is the period in which the writing occurred, not when it was discovered or became resurgent. *Clarification 2*: Evaluation of a poet in context may include similarity to or differences from the work of contemporaries and the literary period, critical reception at the time, and scope of work. *Clarification 3*: For more information, see Literary Periods.
ELA.12.R.2.1:	Evaluate the structure(s) and features in texts, identifying how the author could make the text(s) more effective. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.12.R.2.2:	Evaluate how an author develops the central idea(s), identifying how the author could make the support more effective.
ELA.12.R.2.3:	Evaluate an author's choices in establishing and achieving purpose(s).
ELA.12.R.2.4:	Compare the development of multiple arguments in related texts, evaluating the validity of the claims, the authors' reasoning, use of the same information, and/or the authors' rhetoric. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 3*: Validity refers to the soundness of the arguments.
ELA.12.R.3.1:	Evaluate an author's use of figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will evaluate are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.12.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.12.R.3.3:	Analyze the influence of classic literature on contemporary world texts. **Clarifications:** *Clarification 1*: Classic literature for this benchmark should be drawn from and representative of the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Contemporary world texts are those written after World War II that, through quality of form and expression, convey ideas of permanent or universal interest.
ELA.12.R.3.4:	Evaluate rhetorical choices across multiple texts. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos was added in 11th grade. This differs from the 11th grade benchmark in that it is comparing the effectiveness of multiple texts. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.

ELA.12.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.12.V.1.2:	Apply knowledge of etymology, derivations, and commonly used foreign phrases to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. *Clarification 3*: See Foreign Words and Phrases for a list of commonly used foreign phrases.
ELA.12.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.12.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 12th grade. Knowledge acquisition should be the primary purpose of any reading

approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Approximately one-third of the titles from the 12th Grade Sample Book List should be used in instruction.

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Common Core State Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. 	Clarification 2: Contemporary world texts are those written after World War II that, through quality of form and expression, convey ideas of permanent or universal interest. **Standard Relation to Course: Major**
ELA.12.R.3.4:	Evaluate rhetorical choices across multiple texts. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos was added in 11th grade. This differs from the 11th grade benchmark in that it is comparing the effectiveness of multiple texts. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.12.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.12.V.1.2:	Apply knowledge of etymology, derivations, and commonly used foreign phrases to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. *Clarification 3*: See Foreign Words and Phrases for a list of commonly used foreign phrases. **Standard Relation to Course: Major**
ELA.12.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.12.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**

ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
SS.912.H.2.2:	Classify styles, forms, types, and genres within art forms. **Clarifications:** Examples are Gothic and Romanesque columns, modern and ethnic dance, epic poetry and Shakespearean plays, ballads and nationalistic music, surrealism and cubism. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of the grade level. Knowledge acquisition should be the primary purpose of any reading approach. The systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are building their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Approximately one-third of the titles from the 12th Grade Sample Book List should be used in instruction.

Course Standards

Name	Description
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness.
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level.
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated.
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience.
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony.
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.

ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible.
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices.
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 9th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Special Note: *Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school can have a course that it calls "pre-IB" as long as it makes it clear that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the course along the lines of, for example, the "Any School pre-IB course".*

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

ibanswers.ibo.org/app/answers/detail/a_id/5414/kw/pre-ib

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally

embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.10.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and maintaining a formal and objective tone. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: The tone should be both formal and objective, relying more on argument and rhetorical appeals rather than on propaganda techniques. Use narrative techniques to strengthen writing where appropriate.
ELA.10.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, purposeful transitions, and a tone and voice appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience.
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.10.C.5.1:	Create digital presentations to improve understanding of findings, reasoning, and evidence. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.10.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience, integrating multimedia elements.
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice.
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence.

ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.
ELA.10.R.1.4:	Analyze how authors create multiple layers of meaning and/or ambiguity in a poem. **Clarifications:** *Clarification 1*: For more information, see Literary Periods.
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays.
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible.
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language.
	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it.

ELA.K12.EE.1.1:	In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. **Clarifications:** Teachers who encourage students to participate actively in effortful learning both individually and with others: • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. **Clarifications:** Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. **Clarifications:** Teachers who encourage students to complete tasks with mathematical fluency:

	• Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. **Clarifications:** Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. **Clarifications:** Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts: • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions: • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. **Clarifications:** Teachers who encourage students to assess the reasonableness of solutions: • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts: • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. **Clarifications:** Teachers who encourage students to apply mathematics to real-world contexts: • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this Pre-IB course is to prepare students for the International Baccalaureate Diploma Programme (DP). As such, this course will provide academic rigor and relevance through a comprehensive curriculum based on the standards taught with reference to the unique facets of the IB. These facets include interrelatedness of subject

areas, a holistic view of knowledge, intercultural awareness, embracing international issues, and communication as fundamental to learning. Instructional design must provide students with values and opportunities that enable them to develop respect for others and an appreciation of similarities and differences. Learning how to learn and how to critically evaluate information is as important as the content of the disciplines themselves.

Special Notes: *Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school can have a course that it calls "pre-IB" as long as it makes it clear that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the course along the lines of, for example, the "Any School pre-IB course".*

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.

ibanswers.ibo.org/app/answers/detail/a_id/5414/kw/pre-ib. **Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.**

GENERAL NOTES

This course defines what students should understand and be able to do by the end of 10th grade. Knowledge acquisition should be the primary purpose of any reading approach as the systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy. At this grade level, students are working with universal themes and archetypes. They are also continuing to build their facility with rhetoric, the craft of using language in writing and speaking, using classic literature, essays, and speeches as mentor texts.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

Approximately one-third of the titles from the 10th Grade Sample Book List should be used in instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

Course Status: Course Approved

Grade Level(s): 9,10

Graduation Requirement: English

Educator Certifications

English (Grades 6-12)

Semantics and Logic Honors (#1004300) 2021 - And Beyond

Course Standards

Name	Description
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis.
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.11.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to improve clarity, structure, and style.
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.11.C.4.1:	Conduct literary research to answer a question, refining the scope of the question to align with interpretations of texts, and synthesizing information from primary and secondary sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.11.C.5.1:	Create digital presentations to improve the experience of the audience. **Clarifications:** *Clarification 1*: At this grade level, students are using multiple elements. The presentation may be delivered live or delivered as a stand-alone digital experience. The elements should be of different types. The elements should relate directly to the presentation and be incorporated in a way that engages the audience.
ELA.11.C.5.2:	Create and export quality writing tailored to a specific audience, integrating multimedia elements, publishing to an online or LAN site.
ELA.11.R.2.1:	Evaluate the structure(s) and features in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in speeches and essays from the Classical Period.
ELA.11.R.2.4:	Compare the development of multiple arguments on the same topic, evaluating the effectiveness and validity of the claims, the authors' reasoning, and the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE)

ELA.11.R.3.1:	• Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language.
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning.
ELA.11.R.3.4:	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language.
ELA.12.C.1.2:	Write complex narratives using appropriate techniques to establish multiple perspectives and convey universal themes. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.12.C.1.3:	Write arguments to support claims based on an in-depth analysis of topics or texts using valid reasoning and credible evidence from sources, elaboration, and demonstrating a thorough understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: These written works will take longer and are meant to reflect thorough research and analysis.
ELA.12.R.2.2:	Evaluate how an author develops the central idea(s), identifying how the author could make the support more effective.
ELA.12.R.2.3:	Evaluate an author's choices in establishing and achieving purpose(s).
ELA.12.R.2.4:	Compare the development of multiple arguments in related texts, evaluating the validity of the claims, the authors' reasoning, use of the same information, and/or the authors' rhetoric. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning.

	Clarification 2: See Rhetorical Appeals and Rhetorical Devices. *Clarification 3*: Validity refers to the soundness of the arguments.
ELA.12.R.3.1:	Evaluate an author's use of figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will evaluate are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.12.R.3.4:	Evaluate rhetorical choices across multiple texts. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos was added in 11th grade. This differs from the 11th grade benchmark in that it is comparing the effectiveness of multiple texts. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to provide students knowledge of the principles of semantics and logic using texts of high complexity and advanced integrated language arts study.

Honors and Advanced Level Course Note: Academic rigor is more than simply assigning to students a greater quantity of work. Through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted, students are challenged to think and collaborate critically on the content they are learning.

GENERAL NOTES

The content should include, but not be limited to, the following:

- active reading of advanced texts for what they say explicitly, as well as the logical inferences that can be drawn
- analysis of informational texts from varied literary periods to examine:
  - semantic concepts of text and changes across literary periods
  - arguments and claims supported by textual evidence, including logical fallacies
  - power and impact of language
  - inductive and deductive reasoning
  - critical and aesthetic response
- writing for varied purposes
  - developing and supporting argumentative claims
  - crafting coherent, supported informative/expository texts
  - writing to sources using text- based evidence and reasoning
- effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions
- collaboration amongst peers

Special Notes:

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

World Literature (#1005300) 2021 - And Beyond

Course Standards

Name	Description
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony. **Standard Relation to Course: Major**
ELA.9.R.1.4:	Analyze the characters, structures, and themes of epic poetry. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts.

ELA.9.R.3.3:	**Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**

ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students, using texts of appropriate complexity, to develop knowledge of world literature while honing their reading skills and increasing their knowledge base. Emphasis will be on representative world literature, with its varied cultural influences, highlighting the major genres, themes, issues, and influences associated with the selections.

GENERAL NOTES

The content should include, but not be limited to, the following:

- active reading of texts of high literary merit for what they say explicitly, as well as the logical inferences that can be drawn
- analysis of literature and informational texts from varied literary periods to examine:
  - text craft and structure
  - elements of literature
  - arguments, themes, and claims supported by textual evidence
  - power and impact of language
  - influence of history, culture, and setting on language
  - personal critical and aesthetic response
- writing for varied purposes
  - crafting coherent, supported informative/expository texts
  - responding to literature for personal and analytical purposes
- effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions
- collaboration amongst peers

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

One-third of the 9th Grade Sample Book List, or selections by the authors represented on the list, should be included in instructional materials, augmented with selections of similar quality that will reinforce the concepts, vocabulary and skills in the English I.

American Literature (#1005310) 2021 - And Beyond

Course Standards

Name	Description
ELA.10.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, purposeful transitions, and a tone and voice appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience. **Standard Relation to Course: Major**
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.1.4:	Analyze how authors create multiple layers of meaning and/or ambiguity in a poem. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
	Paraphrase content from grade-level texts.

ELA.10.R.3.2:	**Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.10.R.3.3:	Analyze how mythical, classical, or religious texts have been adapted. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students

	build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students, using texts of appropriate complexity, to develop knowledge of American literature while honing their reading skills and increasing their knowledge base. Emphasis will be on representative American literature, highlighting the major genres, themes, issues, and influences associated with the selections.

GENERAL NOTES

The content should include, but not be limited to, the following:

- active reading of varied American literary texts for what they say explicitly, as well as the logical inferences that can be drawn
- analysis of literature and informational texts from varied American literary periods to examine:
  - text craft and structure
  - elements of literature
  - arguments and claims supported by textual evidence
  - power and impact of language
  - influence of history, culture, and setting on language
  - personal critical and aesthetic response
- writing for varied purposes
  - crafting coherent, supported informative/expository texts
  - responding to literature for personal and analytical purposes
- collaboration amongst peers

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Classical Literature (#1005340) 2021 - And Beyond

Course Standards

Name	Description
ELA.11.C.1.3:	Write literary analyses to support claims, using logical reasoning, credible evidence from sources, and elaboration, demonstrating an understanding of literary elements. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: Appropriate tone is expected to continue from 9th and 10th. Use narrative techniques to strengthen argument writing where appropriate. *Clarification 3*: These written works will take longer and are meant to reflect thorough research and analysis. **Standard Relation to Course: Major**
ELA.11.C.1.4:	Write an analysis of complex texts using logical organization and a tone and voice appropriate to the task and audience, demonstrating an understanding of the subject. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.11.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.11.R.1.2:	Track and analyze universal themes in literary texts from different times and places. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods. **Standard Relation to Course: Major**

ELA.11.R.2.2:	Analyze the central idea(s) of speeches and essays from the Classical Period. **Clarifications:** *Clarification 1*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.R.3.1:	Analyze the author's use of figurative language and explain examples of allegory. **Clarifications:** *Clarification 1*: Examples of allegory should be taken from the following periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 3*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
ELA.11.R.3.4:	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language.

	Standard Relation to Course: Major
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students, using texts of high complexity, to develop knowledge of classical literature through integrated educational experiences of reading, writing, speaking and listening, and language. Emphasis will be on representative classical literature, with its varied cultural influences, highlighting the major genres, themes, issues, and influences associated with the literary period.

GENERAL NOTES

The content should include, but not be limited to, the following:

- active reading of Classical literary texts for what they say explicitly, as well as the logical inferences that can be drawn
- analysis of literature and informational texts from the Classical literary period to examine:
  - text craft and structure
  - elements of literature

- arguments and claims supported by textual evidence
- power and impact of language
- influence of history, culture, and setting on language
- personal critical and aesthetic response

- writing for varied purposes
  - crafting coherent, supported informative/expository texts
  - responding to literature for personal and analytical purposes
- collaboration amongst peers

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

One-third of the 11th Grade Sample Book List, or selections by the authors represented on the list, should be included in instructional materials, augmented with selections of similar quality that will reinforce the concepts, vocabulary and skills in the English 3.

M/J Journalism 1 (#1006000) 2021 - And Beyond

Course Standards

Name	Description
ELA.6.C.1.2:	Write personal or fictional narratives using narrative techniques, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: Figurative language at this grade level should include any on which students have received instruction in this or previous grades. See Figurative Language Standard.
ELA.6.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, and a logical organizational structure with varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.6.C.1.4:	Write expository texts to explain and/or analyze information from multiple sources, using a logical organizational structure, relevant elaboration, and varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.6.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers.
ELA.6.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, clear pronunciation, and appropriate pacing. **Clarifications:** *Clarification 1*: Nonverbal cues appropriate to this grade level are posture, tone, expressive delivery, focus on the audience, and facial expression. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. Appropriate pacing is adhering to the pauses dictated by punctuation and speaking at a rate that best facilitates comprehension by the audience. Too fast a pace will lose listeners and too slow can become monotonous. The element will also help students address the nervousness that may make them speak too fast during presentations. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.6.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use verbals including gerunds, infinitives, and participial phrases. • Use comparative and superlative forms of adjectives. • Use pronouns correctly with regard to case, number, and person, correcting for vague pronoun reference. Skills to be implemented but not yet mastered are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.6.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refocusing the inquiry when appropriate. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.6.C.5.1:	Integrate diverse digital media to enhance audience engagement in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the task and complement the information being shared, meaning that the multimedia elements should add information to the presentation, not restate or reinforce it. The elements should be smoothly integrated into the presentation.
ELA.6.C.5.2:	Use digital tools to produce writing.
ELA.6.R.2.1:	Explain how individual text sections and/or features convey meaning in texts.
ELA.6.R.2.2:	Analyze the central idea(s), implied or explicit, and its development throughout a text. **Clarifications:** *Clarification 1*: Various types of support could include an author's use of facts, definitions, concrete details, and/or quotations to develop the central idea(s) in a text.
ELA.6.R.2.3:	Analyze authors' purpose(s) in multiple accounts of the same event or topic.
	Track the development of an argument, identifying the types of reasoning used. **Clarifications:**

ELA.6.R.2.4:	*Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal).
ELA.6.R.3.1:	Explain how figurative language contributes to tone and meaning in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.6.R.3.3:	Compare and contrast how authors from different time periods address the same or related topics. **Clarifications:** *Clarification 1*: Texts for this benchmark should be selected from the following literary periods: • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present)
ELA.6.R.3.4:	Identify rhetorical appeals in a text. **Clarifications:** *Clarification 1*: Students will identify the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals.
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to develop fundamental skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to become aware of journalism history, careers, ethics use, and management techniques related to the production of journalistic media.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

The content should include, but not be limited to, the following:

- demonstrating entry-level skills in telling stories and providing reports and choosing appropriate platforms/mediums of print, multimedia, online, and broadcast/radio
- demonstrating fundamental skills in layout design, organization/management skills, and use of technology for the successful production of journalistic media
- using fundamental research skills and networking formats collaboration amongst peers, especially during the drafting and practicing stages
- demonstrating awareness of the varied careers within the multiple formats of 21st century journalism

Course Standards

Name	Description
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness.
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level.
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated.
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience.
ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
	Explain how figurative language creates mood in text(s).

ELA.9.R.3.1:	**Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices.
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

VA.912.F.3.4:	Follow directions and use effective time-management skills to complete the art-making process and show development of 21st-century skills. **Clarifications:** e.g., punctuality, reliability, diligence, positive work ethic
VA.912.F.3.7:	Create a body of collaborative work to show artistic cohesiveness, team-building, respectful compromise, and time-management skills.
VA.912.F.3.11:	Demonstrate proficiency in creating individual and sequential images, animation, or media in motion with sound to solve visual problems.
VA.912.F.3.12:	Use digital equipment and peripheral devices to record, create, present, and/or share accurate visual images with others.
VA.912.H.1.5:	Investigate the use of technology and media design to reflect creative trends in visual culture.
VA.912.H.2.1:	Identify transitions in art media, technique, and focus to explain how technology has changed art throughout history.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to develop fundamental skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media.

GENERAL NOTES

The content should include, but not be limited to, the following:

- demonstrating entry-level skills in telling stories and packaging them across the platforms/mediums of print, multimedia, online, and broadcast/radio;
- demonstrating fundamental skills in layout design, organization/management skills, and use of technology for the successful production of journalistic media;
- using writing strategies to craft various forms of journalistic writing, including news writing, feature writing, sports writing, and editorial writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context;
- using fundamental research skills and networking formats;
- demonstrating awareness of the history of journalism and changes in the responsible and ethical use of information, including the use of print and non-print photojournalism; and
- demonstrating awareness of the varied careers within the multiple formats of 21st century journalism.

Special Notes:

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques.
ELA.10.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and maintaining a formal and objective tone. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. *Clarification 2*: The tone should be both formal and objective, relying more on argument and rhetorical appeals rather than on propaganda techniques. Use narrative techniques to strengthen writing where appropriate.
ELA.10.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, purposeful transitions, and a tone and voice appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience.
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.10.C.5.1:	Create digital presentations to improve understanding of findings, reasoning, and evidence. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience.
ELA.10.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience, integrating multimedia elements.
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix.
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays.
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments.
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole,

	meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.10.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.10.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes.
ELA.10.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.10.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.

ELA.K12.EE.6.1:	**Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
VA.912.F.3.4:	Follow directions and use effective time-management skills to complete the art-making process and show development of 21st-century skills. **Clarifications:** e.g., punctuality, reliability, diligence, positive work ethic
VA.912.F.3.7:	Create a body of collaborative work to show artistic cohesiveness, team-building, respectful compromise, and time-management skills.
VA.912.F.3.11:	Demonstrate proficiency in creating individual and sequential images, animation, or media in motion with sound to solve visual problems.
VA.912.F.3.12:	Use digital equipment and peripheral devices to record, create, present, and/or share accurate visual images with others.
VA.912.H.1.5:	Investigate the use of technology and media design to reflect creative trends in visual culture.
VA.912.H.2.1:	Identify transitions in art media, technique, and focus to explain how technology has changed art throughout history.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to extend fundamental skills in the production of journalism across print, multimedia, web, and broadcast/radio platforms and to develop further knowledge of journalism history, ethics use, and management techniques related to the production of journalistic media.

GENERAL NOTES

The content should include, but not be limited to, the following:

- demonstrating entry-level skills in telling stories and packaging them across the platforms/mediums of print, multimedia, online, and broadcast/radio;
- demonstrating fundamental skills in layout design, organization/management skills, and use of technology for the successful production of journalistic media;
- using writing strategies to craft various forms of journalistic writing, including news writing, feature writing, sports writing, and editorial writing expressing ideas with maturity and complexity appropriate to writer, audience, purpose, and context;
- using fundamental research skills and networking formats;
- demonstrating awareness of the history of journalism and changes in the responsible and ethical use of information, including the use of print and non-print photojournalism; and
- demonstrating awareness of the varied careers within the multiple formats of 21st century journalism.

Special Notes:

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Course Standards

Name	Description
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. **Standard Relation to Course: Major**
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**

ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience. **Standard Relation to Course: Major**
ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
VA.912.C.1.5:	Analyze how visual information is developed in specific media to create a recorded visual image. **Clarifications:** e.g., four-dimensional media, motion or multi-media **Standard Relation to Course: Major**
VA.912.O.1.4:	Compare and analyze traditional and digital media to learn how technology has altered opportunities for innovative responses and results. **Standard Relation to Course: Major**
VA.912.S.1.2:	Investigate the use of technology and other resources to inspire art-making decisions. **Standard Relation to Course: Major**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts. **Standard Relation to Course: Supporting**
HE.912.C.2.5:	Evaluate the effect of media on personal and family health. **Clarifications:** Compares brand-name/store-brand items in home, analyzes television viewing habits, identifies effective PSAs, consumer skills, advertisements of health-related community resources, participation in risky behaviors, and deconstructs media to identify promotion of unhealthy stereotypes, and normalization of violence. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to develop fundamental skills in the use of social media across print, multimedia, web, and broadcast platforms, including ethical and legal uses.

GENERAL NOTES

The content should include, but not be limited to, the following:

- Demonstrating entry-level skills in digital communication and packaging them across the platforms/mediums of print, multimedia, online, and broadcast;
- Demonstrating fundamental skills in social media platforms and their uses; expressing social connections with maturity and complexity appropriate to writer, audience, purpose, and context;
- Using fundamental research skills and networking formats;
- Collaborating amongst peers; and
- Using effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

M/J Speech and Debate 1 (#1007000) 2021 - And Beyond

Course Standards

Name	Description
ELA.6.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, and a logical organizational structure with varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.6.C.1.4:	Write expository texts to explain and/or analyze information from multiple sources, using a logical organizational structure, relevant elaboration, and varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.6.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers.
ELA.6.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, clear pronunciation, and appropriate pacing. **Clarifications:** *Clarification 1*: Nonverbal cues appropriate to this grade level are posture, tone, expressive delivery, focus on the audience, and facial expression. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. Appropriate pacing is adhering to the pauses dictated by punctuation and speaking at a rate that best facilitates comprehension by the audience. Too fast a pace will lose listeners and too slow can become monotonous. The element will also help students address the nervousness that may make them speak too fast during presentations. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.6.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use verbals including gerunds, infinitives, and participial phrases. • Use comparative and superlative forms of adjectives. • Use pronouns correctly with regard to case, number, and person, correcting for vague pronoun reference. Skills to be implemented but not yet mastered are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.6.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refocusing the inquiry when appropriate. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.6.C.5.1:	Integrate diverse digital media to enhance audience engagement in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the task and complement the information being shared, meaning that the multimedia elements should add information to the presentation, not restate or reinforce it. The elements should be smoothly integrated into the presentation.
ELA.6.C.5.2:	Use digital tools to produce writing.
ELA.6.R.2.2:	Analyze the central idea(s), implied or explicit, and its development throughout a text. **Clarifications:** *Clarification 1*: Various types of support could include an author's use of facts, definitions, concrete details, and/or quotations to develop the central idea(s) in a text.
ELA.6.R.2.4:	Track the development of an argument, identifying the types of reasoning used. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal).
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
	Compare and contrast how authors from different time periods address the same or related topics.

ELA.6.R.3.3:	**Clarifications:** *Clarification 1*: Texts for this benchmark should be selected from the following literary periods: • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present)
ELA.6.R.3.4:	Identify rhetorical appeals in a text. **Clarifications:** *Clarification 1*: Students will identify the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals.
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course is focused on the use of correct and effective language and organizational skills in preparing, delivering, and evaluating different types of oral presentations and debate. Students will critique speeches, paying attention to content, organization, language, and delivery style, and produce and present well-structured, developed speeches.

GENERAL NOTES

The purpose of this course is to develop grade 6 students' beginning awareness, understanding, and application of language arts as it applies to oral communication concepts and strategies in a variety of given settings.

The content should include, but not be limited to, the following:

- learning and practicing a variety of speech forms
- learning and demonstrating appropriate formal and informal public speaking techniques for audience, purpose, and occasion
  - eye contact and body movements
  - voice register and choices of language arts
  - use of standard English
- using research & writing skills to support selected topics and points of view
  - across a range of disciplines
  - using a range of sources, including digital
  - collaboration amongst peers, especially during the drafting and practicing stages

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success.

The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

M/J Speech and Debate 2 (#1007010) 2021 - And Beyond

Course Standards

Name	Description
ELA.7.C.1.3:	Write and support a claim using logical reasoning, relevant evidence from sources, elaboration, a logical organizational structure with varied transitions, and acknowledging at least one counterclaim. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.7.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details and a logical organizational pattern. **Clarifications:** *Clarification 1*: See Writing Types.
ELA.7.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers.
ELA.7.C.2.1:	Present information orally, in a logical sequence, emphasizing key points that support the central idea. **Clarifications:** *Clarification 1*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.7.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. Skills to be implemented but not yet mastered are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.7.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and generating additional questions for further research. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. *Clarification 2*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.7.C.5.1:	Integrate diverse digital media to build cohesion in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the presentation and help to unify the concepts. The elements should be smoothly integrated into the presentation.
ELA.7.C.5.2:	Use digital tools to produce and share writing.
ELA.7.R.2.2:	Compare two or more central ideas and their development throughout a text.
ELA.7.R.2.3:	Explain how an author establishes and achieves purpose(s) through diction and syntax. **Clarifications:** *Clarification 1*: This benchmark focuses on the way in which diction (the author's word choice) and syntax (the way in which an author arranges those words) work together to achieve a purpose.
ELA.7.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal).
ELA.7.R.3.1:	Analyze how figurative language contributes to tone and meaning and explain examples of allusions in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.7.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.

ELA.7.R.3.3:	Compare and contrast how authors with differing perspectives address the same or related topics or themes. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.7.R.3.4:	Explain the meaning and/or significance of rhetorical devices in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 7.R.3.1 with the addition of irony and rhetorical questioning. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Devices.
ELA.7.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.7.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.7.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.7.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to develop grade 7 students' awareness, understanding, and application of language arts as it applies to oral communication concepts and strategies in a variety of given settings.

GENERAL NOTES

The content should include, but not be limited to, the following:

- learning and practicing a variety of speech formats
- learning and demonstrating appropriate formal and informal public speaking techniques for audience, purpose, and occasion
  - eye contact and body movements
  - voice register and choices of language
  - use of standard English
- using research and writing skills to support selected topics and points of view
  - across a range of disciplines
  - using a range of sources, including digital
- collaboration amongst peers, especially during the drafting and practicing stages

M/J Speech and Debate 3 (#1007020) 2021 - And Beyond

Course Standards

Name	Description
ELA.8.C.1.3:	Write to argue a position, supporting at least one claim and rebutting at least one counterclaim with logical reasoning, credible evidence from sources, elaboration, and using a logical organizational structure. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques.
ELA.8.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using relevant supporting details, logical organization, and varied purposeful transitions. **Clarifications:** Clarification 1: See Writing Types.
ELA.8.C.1.5:	Improve writing by planning, editing, considering feedback from adults and peers, and revising for clarity and cohesiveness.
ELA.8.C.2.1:	Present information orally, in a logical sequence, supporting the central idea with credible evidence. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric.
ELA.8.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Appropriately use passive and active voice. • Use semicolons to form sentences. • Use verbs with attention to voice and mood. Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. *Clarification 2*: See Convention Progression by Grade Level for more information.
ELA.8.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and generating additional questions for further research. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. *Clarification 2*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include.
ELA.8.C.5.1:	Integrate diverse digital media to emphasize the relevance of a topic or idea in oral or written tasks.
ELA.8.C.5.2:	Use a variety of digital tools to collaborate with others to produce writing.
ELA.8.R.2.2:	Analyze two or more central ideas and their development throughout a text.
ELA.8.R.2.3:	Explain how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** Clarification 1: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.
ELA.8.R.2.4:	Track the development of an argument, analyzing the types of reasoning used and their effectiveness, identifying ways in which the argument could be improved. **Clarifications:** *Clarification 1*: For more information on types of reasoning, see Types of Logical Reasoning. *Clarification 2*: Instruction in types of reasoning will include an introduction to fallacies in reasoning. Fallacies that are related to content, informal fallacies, will be the focus. See Fallacies in Reasoning (Informal).
ELA.8.R.3.1:	Analyze how figurative language contributes to meaning and explain examples of symbolism in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language.
ELA.8.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.

ELA.8.R.3.3:	Compare and contrast the use or discussion of archetypes in texts. **Clarifications:** *Clarification 1*: See Archetypes.
ELA.8.R.3.4:	Explain how an author uses rhetorical devices to support or advance an appeal. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 8.R.3.1 with the addition of irony, rhetorical question, antithesis, and zeugma. *Clarification 2*: See Secondary Figurative Language. *Clarification 3*: See Rhetorical Appeals and Rhetorical Devices. *Clarification 4*: Students will explain the connection between an author's use of rhetorical devices and the appeal—logos, ethos, or pathos—that is being made. Instruction should focus on ensuring students can explain how specific rhetorical devices contribute to the development of the rhetorical appeal(s) the author uses.
ELA.8.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.8.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes.
ELA.8.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.8.R.3.1 and Secondary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

Course Standards

Name	Description
ELA.10.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to address the needs of a specific audience. **Standard Relation to Course: Major**
ELA.10.C.4.1:	Conduct research to answer a question, refining the scope of the question to align with findings, and synthesizing information from multiple reliable and valid sources. **Clarifications:** *Clarification 1*: While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
ELA.10.R.2.1:	Analyze the impact of multiple text structures and the use of features in text(s). **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays. **Standard Relation to Course: Major**
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.4:	Write expository texts to explain and analyze information from multiple sources, using a logical organization, varied purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. **Standard Relation to Course: Major**
ELA.9.C.5.1:	Create digital presentations with coherent ideas and a clear perspective. **Clarifications:** *Clarification 1*: The presentation may be delivered live or delivered as a stand-alone digital experience. **Standard Relation to Course: Major**

ELA.9.R.2.1:	Analyze how multiple text structures and/or features convey a purpose and/or meaning in texts. **Clarifications:** *Clarification 1*: Students will evaluate the use of the following structures: description, problem/solution, chronological, compare and contrast, cause and effect, and sequence. *Clarification 2*: Students will evaluate the use of the following features: table of contents, headings, captions, photographs, graphs, charts, illustrations, glossary, footnotes, annotations, and appendix. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**

ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed to build student facility in structuring various types of speeches, researching information, audience analysis, presentation of speeches and building self confidence in public speaking situations. Students will critique speeches, paying attention to content, organization, language, and delivery style, and produce and present well-structured, developed speeches.

GENERAL NOTES

The content should include, but not be limited to, the following:

- learning and practicing a variety of speech formats
- learning and demonstrating appropriate formal and informal public speaking techniques for audience, purpose, and occasion
  - eye contact and body movements
  - voice register and choices of language
  - use of standard English
- using research and writing skills to support selected topics and points of view
  - across a range of disciplines
  - using a range of sources, including digital
- collaboration amongst peers, especially during the drafting and practicing stages

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

Course Standards

Name	Description
ELA.10.R.2.2:	Analyze the central idea(s) of historical American speeches and essays. **Standard Relation to Course: Major**
ELA.10.R.2.3:	Analyze an author's choices in establishing and achieving purpose(s) in historical American speeches and essays. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.10.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims, and analyzing the ways in which the authors use the same information to achieve different ends. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.10.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.C.1.3:	Write to argue a position, supporting claims using logical reasoning and credible evidence from multiple sources, rebutting counterclaims with relevant evidence, using a logical organizational structure, elaboration, purposeful transitions, and a tone appropriate to the task. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level. **Standard Relation to Course: Major**
ELA.9.C.4.1:	Conduct research to answer a question, drawing on multiple reliable and valid sources, and refining the scope of the question to align with findings. **Clarifications:** *Clarification 1*: There is no requirement that students research the additional questions generated. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices.

	Standard Relation to Course: Major
ELA.9.R.2.4:	Compare the development of two opposing arguments on the same topic, evaluating the effectiveness and validity of the claims. **Clarifications:** *Clarification 1*: Validity refers to the soundness of the arguments. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**

ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is focused on the use of correct and effective language and organizational skills in preparing, delivering, and evaluating argument and debate. Students will critique debates, paying attention to content, organization, language, and delivery style, and produce and present well-structured, developed arguments, applying oral communication concepts and strategies for public debate in a variety of given settings.

GENERAL NOTES

The content should include, but not be limited to, the following:

- delivering and analyzing a variety of argument and debate formats such as
  - Lincoln-Douglas
  - team debate
  - extemporaneous
- delineating and evaluating the argument and specific claims in an oral or written text by
  - citing specific text evidence
  - assessing the validity of the evidence and soundness of the reasoning
  - determining the sufficiency of evidence for success
  - recognizing when irrelevant evidence or faulty reasoning is introduced
- demonstrating appropriate formal and informal public speaking techniques for audience, purpose, and occasion
  - eye contact and body movements
  - voice register and choices of language
  - use of standard English
- using research and writing skills to support selected topics and points of view
  - across a range of disciplines
  - using a range of sources, including digital
- assessing the veracity of claims and the reliability of sources
  - determining different types of evidence (e.g., documentary evidence in the social sciences, experimental evidence in the realm of natural sciences)
  - determining reliable print and digital sources
- demonstrating use of techniques for timing and judging debates and other forensic activities
- collaboration amongst peers, especially during the drafting and practicing stages

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

M/J Creative Writing (#1009025) 2021 - And Beyond

Course Standards

Name	Description
ELA.6.C.1.2:	Write personal or fictional narratives using narrative techniques, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: Figurative language at this grade level should include any on which students have received instruction in this or previous grades. See Figurative Language Standard. **Standard Relation to Course: Major**
ELA.6.C.1.4:	Write expository texts to explain and/or analyze information from multiple sources, using a logical organizational structure, relevant elaboration, and varied transitions. **Clarifications:** *Clarification 1*: See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.6.C.1.5:	Improve writing by planning, revising, and editing, considering feedback from adults and peers. **Standard Relation to Course: Major**
ELA.6.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Use verbals including gerunds, infinitives, and participial phrases. • Use comparative and superlative forms of adjectives. • Use pronouns correctly with regard to case, number, and person, correcting for vague pronoun reference. Skills to be implemented but not yet mastered are as follows: • Appropriately use colons. • Appropriately use dangling modifiers. • Appropriately use ellipses. • Appropriately use hyphens. • Vary sentence structure. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.6.C.5.1:	Integrate diverse digital media to enhance audience engagement in oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, students are using more than one element. The elements may be of the same type (for example, two pictures or a picture and an audio recording). The elements should relate directly to the task and complement the information being shared, meaning that the multimedia elements should add information to the presentation, not restate or reinforce it. The elements should be smoothly integrated into the presentation. **Standard Relation to Course: Supporting**
ELA.6.C.5.2:	Use digital tools to produce writing. **Standard Relation to Course: Supporting**
ELA.6.R.1.2:	Analyze the development of stated or implied theme(s) throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. See Theme in Glossary. *Clarification 2*: Students should be introduced to the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.6.R.1.3:	Explain the influence of multiple narrators and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: When referring to the person of the narrator, the term "point of view" is used. Students focused on perspective in fifth grade, so they should differentiate between point of view and perspective when working on this benchmark. **Standard Relation to Course: Major**
ELA.6.R.1.4:	Describe the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. **Standard Relation to Course: Major**
	Explain how figurative language contributes to tone and meaning in text(s). **Clarifications:**

ELA.6.R.3.1:	*Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.6.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.6.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.6.V.1.2:	Apply knowledge of Greek and Latin roots and affixes to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 6-8 and Affixes. **Standard Relation to Course: Supporting**
ELA.6.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.6.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Supporting**
ELA.7.C.1.2:	Write personal or fictional narratives using narrative techniques, a recognizable point of view, precise words and phrases, and figurative language. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.7.R.1.1:	Analyze the impact of setting on character development and plot in a literary text. **Standard Relation to Course: Major**
ELA.7.R.1.2:	Compare two or more themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: For the purposes of this benchmark, theme is not a one- or two-word topic, but a complete thought that communicates the author's message. *Clarification 2*: Students should continue to work with the concept of universal themes, although mastery isn't expected until 9th grade. A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.7.R.1.3:	Explain the influence of narrator(s), including unreliable narrator(s), and/or shifts in point of view in a literary text. **Clarifications:** *Clarification 1*: An unreliable narrator is one who lacks credibility. Because all information is being conveyed through this untrustworthy source, readers have to use inferencing to establish what is likely to be true. Narrators can be unreliable for many reasons including purposeful dishonesty, a lack information or background knowledge about what that information means, mental illness, or self-deception. *Clarification 2*: "Shifts in point of view" refers to a change in the narrator's point of view done for effect. Changes can be in degree and/or person: for example, a shift from third-person limited to third-person omniscient or from first-person limited to third-person limited. **Standard Relation to Course: Major**
ELA.7.R.1.4:	Analyze the impact of various poetic forms on meaning and style. **Clarifications:** *Clarification 1*: Poetic forms used for this benchmark are sonnet and villanelle. See Appendix B for examples. *Clarification 2*: Instruction in this benchmark should focus on how the structure of each poetic form affects its meaning. **Standard Relation to Course: Major**
ELA.8.C.5.2:	Use a variety of digital tools to collaborate with others to produce writing. **Standard Relation to Course: Supporting**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide

	referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course is designed to help students develop the skills for understanding and analyzing the art and craft of creative writing. Students will begin to develop critical editorial skills with regard to their own work and that of their peers. Students will read a variety of published stories, essays, and poems and learn how to apply the techniques of other writers to their writing while developing their own voice.

GENERAL NOTES

The purpose of this course is to enable students to learn and use middle school writing and language skills for creative expression in a variety of literary forms. Emphasis will be on development of a personal writing style.

The content should include, but not be limited to, the following:

- a study of a variety of short literary collections, including poetry, one-act plays, the short story, and memoir to determine and practice
  - literary text craft and structure
  - use of figurative, denotative, and connotative language
  - appropriate voice and/or tone
  - story structure, poetic forms, and creative pacing techniques
  - reciprocal nature of content and form
- writing for varied purposes and in varied genres, including
  - personal and dramatic narratives
  - various poetic forms
  - plays and multimedia productions

    - multi-genre and creative nonfiction selections
    - digital writing platforms
- effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions
- collaboration amongst peers, especially regarding peer reviews of multiple drafts

Important Note: Reading and writing courses should not be used in place of English/Language Arts courses; reading and writing courses are intended to be used to supplement further study in English/Language Arts.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

Creative Writing 1 (#1009320) 2021 - And Beyond

Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.10.R.1.3:	Analyze coming of age experiences reflected in a text and how the author represents conflicting perspectives. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.1.4:	Analyze how authors create multiple layers of meaning and/or ambiguity in a poem. **Clarifications:** *Clarification 1*: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.C.1.2:	Write narratives using narrative techniques, varied transitions, and a clearly established point of view. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.9.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising for clarity and cohesiveness. **Standard Relation to Course: Major**
ELA.9.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.9.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be implemented but not yet mastered are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level.

	Standard Relation to Course: Major
ELA.9.C.5.2:	Use online collaborative platforms to create and export publication-ready quality writing tailored to a specific audience. **Standard Relation to Course: Major**
ELA.9.R.1.1:	Explain how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.9.R.1.2:	Analyze universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.9.R.1.3:	Analyze the influence of narrator perspective on a text, explaining how the author creates irony or satire. **Clarifications:** *Clarification 1*: See Rhetorical Devices for more information on irony. **Standard Relation to Course: Major**
ELA.9.R.2.2:	Evaluate the support an author uses to develop the central idea(s) throughout a text. **Clarifications:** *Clarification 1*: In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.2.3:	Analyze how an author establishes and achieves purpose(s) through rhetorical appeals and/or figurative language. **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: Students will explain the appropriateness of appeals in achieving a purpose. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.R.3.1:	Explain how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.9.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.9.R.3.3:	Compare and contrast the ways in which authors have adapted mythical, classical, or religious literary texts. **Clarifications:** *Clarification 1*: The classical source texts for this benchmark should be from ancient Greece or Rome's Classical period (1200 BCE–455 CE). Mythical texts for this benchmark can be from any civilization's early history. Religious texts for this benchmark include works such as the Bible. **Standard Relation to Course: Major**
ELA.9.R.3.4:	Explain an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 9.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, and synecdoche. *Clarification 2*: See Secondary Figurative Language and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.9.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade

	level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.9.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.9.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.9.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to develop and use writing and language skills for creative expression in a variety of literary forms. Studying and modeling a variety of genres will be emphasized at this level of creative writing.

GENERAL NOTES

The content should include, but not be limited to, the following:

- examination of a variety of short literary collections, including poetry, which includes a variety of professional, peer, and/or teacher examples in order to examine
  - text craft and structure, including line length and placement
  - effects of figurative, denotative, and connotative language choice
  - power and impact of appropriate voice and/or tone
  - story structure, sentence structure, and grammatical choices
  - reciprocal nature of content and form in development of a personal style
- writing for varied purposes and in varied genres, including
  - personal and dramatic narratives
  - various poetic forms
  - screenplays and multimedia productions
  - multi-genre and creative non-fiction selections
  - digital writing platforms
- effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions
- collaboration amongst peers, especially regarding peer reviews of multiple drafts

Important Note: Reading and writing courses should not be used in place of English language arts courses; reading and writing courses are intended to be used to supplement further study in English language arts.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

Creative Writing 2 (#1009330) 2021 - And Beyond

Course Standards

Name	Description
ELA.10.C.1.2:	Write narratives using an appropriate pace to create tension, mood, and/or tone. **Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.10.C.2.1:	Present information orally, with a logical organization and coherent focus, with credible evidence, creating a clear perspective. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: volume, pronunciation, and pacing. A clear perspective is the through-line that unites the elements of the presentation. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.10.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Add variety to writing or presentations by using parallel structure and various types of phrases and clauses. Skills to be implemented but not yet mastered are as follows: • Use knowledge of usage rules to create flow in writing and presenting. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.10.R.1.1:	Analyze how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I.A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred). *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.10.R.1.2:	Analyze and compare universal themes and their development throughout a literary text. **Clarifications:** *Clarification 1*: A universal theme is an idea that applies to anyone, anywhere, regardless of cultural differences. Examples include but are not limited to an individual's or a community's confrontation with nature; an individual's struggle toward understanding, awareness, and/or spiritual enlightenment; the tension between the ideal and the real; the conflict between human beings and advancements in technology/science; the impact of the past on the present; the inevitability of fate; the struggle for equality; and the loss of innocence. **Standard Relation to Course: Major**
ELA.10.R.3.1:	Analyze how figurative language creates mood in text(s). **Clarifications:** *Clarification 1*: Figurative language use that students will analyze are metaphor, simile, alliteration, onomatopoeia, personification, hyperbole, meiosis (understatement), allusion, and idiom. Other examples can be used in instruction. *Clarification 2*: See Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.10.R.3.4:	Analyze an author's use of rhetoric in a text. **Clarifications:** *Clarification 1*: Students will analyze the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for the appeals of logos, ethos, and pathos. *Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 10.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, and asyndeton. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
	Write complex narratives using appropriate techniques to establish multiple perspectives.

ELA.11.C.1.2:	**Clarifications:** *Clarification 1*: See Writing Types and Narrative Techniques. **Standard Relation to Course: Major**
ELA.11.C.1.5:	Improve writing by considering feedback from adults, peers, and/or online editing tools, revising to improve clarity, structure, and style. **Standard Relation to Course: Major**
ELA.11.C.2.1:	Present information orally, with a logical organization, coherent focus, and credible evidence, while employing effective rhetorical devices where appropriate. **Clarifications:** *Clarification 1*: At this grade level, the emphasis is on the content, but students are still expected to follow earlier expectations: appropriate volume, pronunciation, and pacing. This benchmark introduces rhetorical devices to the benchmark, building on what students have learned in R.3.2 and giving them a chance to apply it. *Clarification 2*: For further guidance, see the Secondary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.11.R.1.1:	Evaluate how key elements enhance or add layers of meaning and/or style in a literary text. **Clarifications:** *Clarification 1*: Key elements of a literary text are setting, plot, characterization, conflict, point of view, theme, and tone. *Clarification 2*: For layers of meaning, any methodology or model may be used as long as students understand that text may have multiple layers and that authors use techniques to achieve those layers. A very workable model for looking at layers of meaning is that of I. A. Richards: Layer 1) the literal level, what the words actually mean Layer 2) mood, those feelings that are evoked in the reader Layer 3) tone, the author's attitude Layer 4) author's purpose (interpretation of author's purpose as it is often inferred) *Clarification 3*: Style is the way in which the writer uses techniques for effect. It is distinct from meaning but can be used to make the author's message more effective. The components of style are diction, syntax, grammar, and use of figurative language. Style helps to create the author's voice. **Standard Relation to Course: Major**
ELA.11.R.1.3:	Analyze the author's choices in using juxtaposition to define character perspective. **Clarifications:** *Clarification 1*: Juxtaposition is the technique of putting two or more elements side by side to invite comparison or contrast. *Clarification 2*: The term perspective means "a particular attitude toward or way of regarding something." **Standard Relation to Course: Major**
ELA.11.R.1.4:	Analyze ways in which poetry reflects themes and issues of its time period. **Clarifications:** *Clarification 1*: Poetry for this benchmark should be selected from one of the following literary periods. • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (130–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) • Contemporary Period (1945–present) Clarification 2: For more information, see Literary Periods. **Standard Relation to Course: Major**
ELA.11.R.3.2:	Paraphrase content from grade-level texts. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.11.R.3.3:	Compare and contrast how contemporaneous authors address related topics, comparing the authors' use of reasoning, and analyzing the texts within the context of the time period. **Clarifications:** *Clarification 1*: Contemporaneous authors here refers to authors who are contemporaries of each other writing within any of the following literary periods: • Classical Period (1200 BCE–455 CE) • Medieval Period (455 CE–1485 CE) • Renaissance Period (1300–1600) • Restoration and 18th Century (1660–1790) British Literature • Colonial and Early National Period (1600–1830) American Literature • Romantic Period (1790–1870) • Realism and Naturalism Period (1870–1930) • Modernist Period (1910–1945) *Clarification 2*: For more information on types of reasoning, see Types of Logical Reasoning. **Standard Relation to Course: Major**
	Evaluate an author's use of rhetoric in text. **Clarifications:** *Clarification 1*: Students will evaluate the appropriateness of appeals and the effectiveness of devices. In this grade level, students are using and responsible for all four appeals; kairos is added at this grade level

ELA.11.R.3.4:	*Clarification 2*: Rhetorical devices for the purposes of this benchmark are the figurative language devices from 11.R.3.1 with the addition of irony, rhetorical question, antithesis, zeugma, metonymy, synecdoche, asyndeton, and chiasmus. *Clarification 3*: See Secondary Figurative Language. *Clarification 4*: See Rhetorical Appeals and Rhetorical Devices. **Standard Relation to Course: Major**
ELA.11.V.1.1:	Integrate academic vocabulary appropriate to grade level in speaking and writing. **Clarifications:** *Clarification 1*: To integrate vocabulary, students will apply the vocabulary they have learned to authentic speaking and writing tasks independently. This use should be intentional, beyond responding to a prompt to use a word in a sentence. *Clarification 2*: Academic vocabulary appropriate to grade level refers to words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.11.V.1.2:	Apply knowledge of etymology and derivations to determine meanings of words and phrases in grade-level content. **Clarifications:** *Clarification 1*: Etymology refers to the study of word origins and the ways that words have changed over time. *Clarification 2*: Derivation refers to making new words from an existing word by adding affixes. **Standard Relation to Course: Major**
ELA.11.V.1.3:	Apply knowledge of context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the connotative and denotative meaning of words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Review of words learned in this way is critical to building background knowledge and related vocabulary. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.11.R.3.1 and Secondary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to enable students to continue developing and applying writing and language skills for creative expression in a variety of literary forms. Studying and modeling a variety of genres will be emphasized at this level of creative writing.

GENERAL NOTES

The content should include, but not be limited to, the following:

- examination of a variety of short literary collections, including poetry, which includes a variety of professional, peer, and/or teacher examples in order to examine
  - text craft and structure, including line length and placement
  - effects of figurative, denotative, and connotative language choice
  - power and impact of appropriate voice and/or tone
  - story structure, sentence structure, and grammatical choices
  - reciprocal nature of content and form in development of a personal style
- writing for varied purposes and in varied genres, including
  - personal and dramatic narratives
  - various poetic forms
  - screenplays and multimedia productions
  - multi-genre and creative non-fiction selections
  - digital writing platforms
- effective listening, speaking, and viewing strategies with emphasis on the use of evidence to support or refute a claim in multimedia presentations, class discussions, and extended text discussions
- collaboration amongst peers, especially regarding peer reviews of multiple drafts

Important Note: Reading and writing courses should not be used in place of English language arts courses; reading and writing courses are intended to be used to supplement further study in English language arts.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards
This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. Name	Description
ELA.1.F.1.1:	Locate the title, table of contents, names of author(s) and illustrator(s), and glossary of books. **Standard Relation to Course: Major**
ELA.1.F.1.2:	Demonstrate phonological awareness. a. Segment spoken words into initial, medial, and final phonemes, including words with digraphs, blends, and trigraphs. b. Orally blend initial, medial, and final phonemes together to produce a single-syllable word that includes digraphs, blends, or trigraphs. c. Blend single-syllable spoken words with at least five phonemes. d. Segment single-syllable spoken words with at least five phonemes. e. Segment and blend phonemes in multi-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.1.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Decode words using knowledge of spelling-sound correspondences for common consonant digraphs, trigraphs, and blends. b. Decode simple words with r-controlled vowels. c. Decode and encode regularly spelled one-syllable words. d. Decode words with inflectional endings. e. Decode two-syllable words with regular patterns by breaking the words into syllables. f. Decode words that use final –e and vowel teams to make long-vowel sound. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See 1.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.1.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. a. Recognize and read with automaticity the grade-level sight words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 1.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with speed. *Clarification 4*: "Appropriate prosody" refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.1.R.1.1:	Identify and describe the main story elements in a story. **Clarifications:** *Clarification 1*: Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2*: In describing the characters, students can describe appearance, actions, feelings, and thoughts of the characters. Students will explain what in the text their description is based on. *Clarification 3*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated.
ELA.1.R.1.2:	Identify and explain the moral of a story. **Clarifications:** *Clarification 1*: This benchmark introduces the moral of a story as a precursor to theme in 2nd grade. A moral is the lesson of a story. During instruction, let students know that not all stories have a lesson by referring to stories read that did not have a moral or a lesson.
ELA.1.R.1.3:	Explain who is telling the story using context clues. **Clarifications:** *Clarification 1*: Students will use the term "narrator" to refer to the speaker telling the story. Students will determine if the narrator is a character in the story or a speaker outside of the story. Students will give reasons why they know who is speaking.
	Identify stanzas and line breaks in poems.

ELA.1.R.1.4:	**Clarifications:** *Clarification 1*: This benchmark can be paired with R.1.1, R.1.2, R.1.3, and R.3.2 for instruction with story poems.
ELA.1.R.2.1:	Use text features including titles, headings, captions, graphs, maps, glossaries, and/or illustrations to demonstrate understanding of texts.
ELA.1.R.2.2:	Identify the topic of and relevant details in a text.
ELA.1.R.2.3:	Explain similarities and differences between information provided in visuals and words in an informational text. **Clarifications:** *Clarification 1*: When explaining similarities and differences, students will also explain how the visuals and words help the reader make sense of the topic. *Clarification 2*: During instruction, give students opportunities to see visual representations of similarities and differences using tools such as Venn diagrams or T-charts.
ELA.1.R.2.4:	Identify an author's opinion(s) about the topic.
ELA.1.R.3.1:	Identify and explain descriptive words and phrases in text(s). **Clarifications:** *Clarification 1*: Continue to expose students to the academic vocabulary word "adjective." Discussion should focus on how the descriptive words add meaning to the text.
ELA.1.R.3.2:	Retell a text in oral or written form to enhance comprehension. a. Use main story elements at the beginning, middle, and end for a literary text. b. Use topic and important details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.1.R.3.3:	Compare and contrast two texts on the same topic. **Clarifications:** *Clarification 1*: Students are being asked to compare and contrast. During instruction, give students opportunities to see visual representations of similarities and differences using tools such as Venn diagrams or T-charts.
ELA.1.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.1.V.1.2:	Identify and use frequently occurring base words and their common inflections in grade-level content. **Clarifications:** *Clarification 1*: See Base Words for frequently occurring base words. *Clarification 2*: Inflectional endings, the inflections referred to here, are added to the end of a word to add additional information. *Example*: Regular verbs add the inflectional ending -ed to indicate the past tense. **Standard Relation to Course: Major**
ELA.1.V.1.3:	Identify and use picture clues, context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships.
ELA.2.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words. a. Decode words with variable vowel teams (e.g., oo, ea, ou) and vowel diphthongs (e.g., oi, oy, ow). b. Decode regularly spelled two-syllable words with long and short vowels. c. Decode words with open (e.g., hi, baby, moment) and closed (e.g., bag, sunshine, chop) syllables and consonant -le (e.g., purple, circle, stumble). d. Decode words with common prefixes and suffixes. e. Decode words with silent letter combinations (e.g., knight, comb, island, ghost). **Clarifications:** *Clarification 1:* Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2:* Students will decode decodable high frequency words appropriate to the grade level. See 2.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity.
ELA.2.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Dolch and Fry word lists. *Clarification 2:* Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 2.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 4:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See

	Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.2.R.1.1:	Identify plot structure and describe main story elements in a literary text. **Clarifications:** *Clarification 1:* Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2:* For setting, students will describe where and when the events of the story are happening. The time element of setting will be addressed even when not explicitly indicated in the text. *Clarification 3:* For character, student's will describe characters' traits, feelings, and behaviors.
ELA.2.R.1.2:	Identify and explain a theme of a literary text.
ELA.2.R.1.3:	Identify different characters' perspectives in a literary text. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.
ELA.2.R.1.4:	Identify rhyme schemes in poems. **Clarifications:** *Clarification 1:* Students will mark rhyme scheme and recognize rhyme scheme notation. Rhyme scheme notation uses capital letters, starting with A to mark the end of each line, repeating the letter for each line in the poem that rhymes with that line and progressing through the alphabet for each new end rhyme. Lines designated with the same letter all rhyme with each other. *Examples:* I never saw a Purple Cow, A I never hope to see one; B But I can tell you, anyhow, A I'd rather see than be one B –Gelett Burgess Little Miss Muffet A Sat on a tuffet, A Eating her curds and whey; B Along came a spider C Who sat down beside her C And frightened Miss Muffet away. B –Traditional Nursery Rhyme
ELA.2.R.2.1:	Explain how text features—including titles, headings, captions, graphs, maps, glossaries, and/or illustrations—contribute to the meaning of texts.
ELA.2.R.2.2:	Identify the central idea and relevant details in a text.
ELA.2.R.2.3:	Explain an author's purpose in an informational text.
ELA.2.R.2.4:	Explain an author's opinion(s) and supporting evidence.
ELA.2.R.3.1:	Identify and explain similes, idioms, and alliteration in text(s).
ELA.2.R.3.2:	Retell a text to enhance comprehension. a. Use main story elements in a logical sequence for a literary text. b. Use the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1:* Most grade-level texts are appropriate for this benchmark.
ELA.2.R.3.3:	Compare and contrast important details presented by two texts on the same topic or theme. **Clarifications:** *Clarification 1:* For literary texts, students can compare and contrast story elements such as characters, illustrations, and sequence of events. *Clarification 2:* The different versions may be of the same or different formats.
ELA.2.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.2.V.1.2:	Identify and use base words and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Base Words.
ELA.2.V.1.3:	Identify and use context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships.
	Demonstrate knowledge of the basic concepts of print. a. Locate a printed word on a page. b. Distinguish letters from words within sentences. c. Match print to speech to demonstrate that language is represented by print. d. Identify parts of a book (front cover, back cover, title page).

ELA.K.F.1.1:	e. Move top to bottom and left to right on the printed page; returning to the beginning of the next line. f. Identify all upper- and lowercase letters of the alphabet. g. Recognize that print conveys specific meaning and pictures may support meaning. **Clarifications:** *Clarification 1*: Matching print to speech involves making a one-to-one correspondence between a spoken word and the print on the page. This can be accomplished by having the child point to each word in a sentence as it is read by an adult. **Standard Relation to Course: Major**
ELA.K.F.1.2:	Demonstrate phonological awareness. a. Blend and segment syllables in spoken words. b. Identify and produce alliterative and rhyming words. c. Blend and segment onset and rimes of single-syllable words. d. Identify the initial, medial, and final sound of spoken words. e. Add or delete phonemes at the beginning or end of a spoken word and say the resulting word. f. Segment and blend phonemes in single-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at the syllable, onset-rime, and phoneme levels. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.K.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Demonstrate knowledge of the most frequent sound for each consonant. b. Demonstrate knowledge of the short and long sounds for the five major vowels. c. Decode consonant-vowel-consonant (CVC) words. d. Encode consonant-vowel-consonant (CVC) words. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See K.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.F.1.4:	Recognize and read with automaticity grade-level high frequency words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See K.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.R.1.1:	Describe the main character(s), setting, and important events in a story. **Clarifications:** *Clarification 1*: In describing the main character, students can describe appearance, actions, feelings, and thoughts of the character. Students will explain what in the text their description is based on. *Clarification 2*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. *Clarification 3*: Descriptions can be oral, either in response to a question or through discussion. **Standard Relation to Course: Major**
ELA.K.R.1.3:	Explain the roles of author and illustrator of a story. **Clarifications:** *Clarification 1*: Students will explain that the author writes the words and the illustrator creates the pictures, recognizing that sometimes one person does both jobs, as in Dr. Seuss' Hop on Pop where Dr. Seuss performs both roles. *Clarification 2*: Students should also explain that both authors and illustrators contribute to the meaning of the text.
ELA.K.R.1.4:	Identify rhyme in a poem. **Clarifications:** *Clarification 1*: This benchmark builds on the skills from the phonological awareness benchmark ELA.K.F.1.2(a): Identify and produce alliterative and rhyming words. The expectation is that students identify rhyming words in a poem that is read aloud. *Clarification 2*: Students will also note where the rhyme is coming, e.g., at the end of a line.
ELA.K.R.2.1:	Use titles, headings, and illustrations to predict and confirm the topic of texts. **Clarifications:** *Clarification 1*: The step of confirming the prediction is essential to mastery of this benchmark. **Standard Relation to Course: Major**
ELA.K.R.2.2:	Identify the topic of and multiple details in a text. **Clarifications:** *Clarification 1*: The topic is the general subject of the text, a word or a short phrase describing what the text is about. For example, the main topic of the book Why Should I Recycle? is recycling. **Standard Relation to Course: Major**
	Explain the difference between opinions and facts about a topic.

ELA.K.R.2.4:	**Clarifications:** *Clarification 1*: Students will explain which statements are fact and which are opinion within a text. *Clarification 2*: Students will orally explain that facts are things that a person knows about something and that can be proven true or false. Students will orally explain that opinions are what a person thinks about something, often related to feelings or beliefs. Opinions cannot be proven true or false. *Example*: "Dogs need food and water to survive" is a fact. It can be proven to be true. "Dogs are the best pets" is an opinion. It's what someone may think, but it can't be proven. **Standard Relation to Course: Major**
ELA.K.R.3.1:	Identify and explain descriptive words in text(s). **Clarifications:** *Clarification 1*: Students will explain examples of descriptive words in text and how they add meaning. *Clarification 2*: Students will be introduced to the academic vocabulary word "adjective." However, students are not expected to use the word independently. Discussion should focus on how the descriptive words add meaning to the text. **Standard Relation to Course: Major**
ELA.K.R.3.2:	Retell a text orally to enhance comprehension: a. Use main character(s), setting, and important events for a story. b. Use topic and details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.K.R.3.3:	Compare and contrast characters' experiences in stories. **Clarifications:** *Clarification 1*: Students will orally compare and contrast the experiences that characters have had, comparing them to those experienced by other characters, in the same story or a different story. Those experiences can be expressed as events, feelings, or behaviors.
ELA.K.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.K.V.1.2:	Ask and answer questions about unfamiliar words in grade-level content. **Standard Relation to Course: Major**
ELA.K.V.1.3:	Identify and sort common words into basic categories, relating vocabulary to background knowledge. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course supports students who are struggling to read and write or speak about what they have read in core instruction. Instruction will use explicit, systematic, and sequential approaches to reading instruction addressing all components of reading including phonological awareness, phonics, vocabulary, fluency, and reading comprehension.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective instruction matches instruction to the need of the students in the group and provides multiple opportunities to practice the skill and receive feedback. The additional time allotted is **in addition** to core instruction. The intervention includes materials and strategies designed to supplement core instruction.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 5010020

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** English/Language Arts > **SubSubject:** General >
Abbreviated Title: BAS SKLS READ K-2
Course Length: Year (Y)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

Elementary Education (Elementary Grades 1-6)
Reading (Elementary and Secondary Grades K-12)
Prekindergarten/Primary Education (Age 3 through Grade 3)
Primary Education (K-3)
Elementary Education (Grades K-6)

Functional Reading Skills K-2 (#5010022) 2021 - And Beyond (current)

Course Standards

Name	Description
ELA.1.F.1.1:	Locate the title, table of contents, names of author(s) and illustrator(s), and glossary of books. **Standard Relation to Course: Major**
ELA.1.F.1.2:	Demonstrate phonological awareness. a. Segment spoken words into initial, medial, and final phonemes, including words with digraphs, blends, and trigraphs. b. Orally blend initial, medial, and final phonemes together to produce a single-syllable word that includes digraphs, blends, or trigraphs. c. Blend single-syllable spoken words with at least five phonemes. d. Segment single-syllable spoken words with at least five phonemes. e. Segment and blend phonemes in multi-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.1.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Decode words using knowledge of spelling-sound correspondences for common consonant digraphs, trigraphs, and blends. b. Decode simple words with r-controlled vowels. c. Decode and encode regularly spelled one-syllable words. d. Decode words with inflectional endings. e. Decode two-syllable words with regular patterns by breaking the words into syllables. f. Decode words that use final –e and vowel teams to make long-vowel sound. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See 1.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.1.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. a. Recognize and read with automaticity the grade-level sight words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 1.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with speed. *Clarification 4*: "Appropriate prosody" refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.1.R.1.1:	Identify and describe the main story elements in a story. **Clarifications:** *Clarification 1*: Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2*: In describing the characters, students can describe appearance, actions, feelings, and thoughts of the characters. Students will explain what in the text their description is based on. *Clarification 3*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. **Standard Relation to Course: Supporting**
ELA.1.R.2.2:	Identify the topic of and relevant details in a text. **Standard Relation to Course: Supporting**
ELA.1.R.3.2:	Retell a text in oral or written form to enhance comprehension. a. Use main story elements at the beginning, middle, and end for a literary text. b. Use topic and important details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**

ELA.1.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.1.V.1.2:	Identify and use frequently occurring base words and their common inflections in grade-level content. **Clarifications:** *Clarification 1*: See Base Words for frequently occurring base words. *Clarification 2*: Inflectional endings, the inflections referred to here, are added to the end of a word to add additional information. *Example*: Regular verbs add the inflectional ending -ed to indicate the past tense. **Standard Relation to Course: Major**
ELA.1.V.1.3:	Identify and use picture clues, context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.2.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words. a. Decode words with variable vowel teams (e.g., oo, ea, ou) and vowel diphthongs (e.g., oi, oy, ow). b. Decode regularly spelled two-syllable words with long and short vowels. c. Decode words with open (e.g., hi, baby, moment) and closed (e.g., bag, sunshine, chop) syllables and consonant -le (e.g., purple, circle, stumble). d. Decode words with common prefixes and suffixes. e. Decode words with silent letter combinations (e.g., knight, comb, island, ghost). **Clarifications:** *Clarification 1:* Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2:* Students will decode decodable high frequency words appropriate to the grade level. See 2.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.2.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Dolch and Fry word lists. *Clarification 2:* Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 2.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 4:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.2.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.2.V.1.2:	Identify and use base words and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Base Words. **Standard Relation to Course: Major**
ELA.2.V.1.3:	Identify and use context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
	Demonstrate knowledge of the basic concepts of print. a. Locate a printed word on a page. b. Distinguish letters from words within sentences.

ELA.K.F.1.1:	c. Match print to speech to demonstrate that language is represented by print. d. Identify parts of a book (front cover, back cover, title page). e. Move top to bottom and left to right on the printed page; returning to the beginning of the next line. f. Identify all upper- and lowercase letters of the alphabet. g. Recognize that print conveys specific meaning and pictures may support meaning. **Clarifications:** *Clarification 1*: Matching print to speech involves making a one-to-one correspondence between a spoken word and the print on the page. This can be accomplished by having the child point to each word in a sentence as it is read by an adult. **Standard Relation to Course: Major**
ELA.K.F.1.2:	Demonstrate phonological awareness. a. Blend and segment syllables in spoken words. b. Identify and produce alliterative and rhyming words. c. Blend and segment onset and rimes of single-syllable words. d. Identify the initial, medial, and final sound of spoken words. e. Add or delete phonemes at the beginning or end of a spoken word and say the resulting word. f. Segment and blend phonemes in single-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at the syllable, onset-rime, and phoneme levels. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.K.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Demonstrate knowledge of the most frequent sound for each consonant. b. Demonstrate knowledge of the short and long sounds for the five major vowels. c. Decode consonant-vowel-consonant (CVC) words. d. Encode consonant-vowel-consonant (CVC) words. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See K.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.F.1.4:	Recognize and read with automaticity grade-level high frequency words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See K.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.R.1.1:	Describe the main character(s), setting, and important events in a story. **Clarifications:** *Clarification 1*: In describing the main character, students can describe appearance, actions, feelings, and thoughts of the character. Students will explain what in the text their description is based on. *Clarification 2*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. *Clarification 3*: Descriptions can be oral, either in response to a question or through discussion. **Standard Relation to Course: Supporting**
ELA.K.R.3.2:	Retell a text orally to enhance comprehension: a. Use main character(s), setting, and important events for a story. b. Use topic and details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Supporting**
ELA.K.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.K.V.1.2:	Ask and answer questions about unfamiliar words in grade-level content. **Standard Relation to Course: Major**
ELA.K.V.1.3:	Identify and sort common words into basic categories, relating vocabulary to background knowledge. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships.

	Standard Relation to Course: Major
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
	Standard Relation to Course: Supporting
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
	Standard Relation to Course: Supporting
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
	Standard Relation to Course: Supporting
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
	Standard Relation to Course: Supporting
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Standard Relation to Course: Supporting
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
	Standard Relation to Course: Supporting
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with a substantial deficiency in reading for whom interventions have not been effective. Instruction will use explicit, systematic, and sequential approaches to reading instruction addressing all components of reading including phonological awareness, phonics, vocabulary, fluency, and reading comprehension.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in Basic Skills in Reading K-2 and core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring with more extensive opportunities for guided practice, error correction, and feedback. The expected outcome is for the student to achieve grade-level proficiency.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 5010022

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** English/Language Arts > **SubSubject:** General >
Abbreviated Title: Fun Read K-2
Course Length: Year (Y)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

Primary Education (K-3)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)
Prekindergarten/Primary Education (Age 3 through Grade 3)
Reading (Elementary and Secondary Grades K-12)

Basic Skills in Reading 3-5 (#5010024) 2021 - And Beyond (current)

Course Standards

Name	Description
ELA.2.C.1.1:	Demonstrate legible printing skills.
ELA.2.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words. a. Decode words with variable vowel teams (e.g., oo, ea, ou) and vowel diphthongs (e.g., oi, oy, ow). b. Decode regularly spelled two-syllable words with long and short vowels. c. Decode words with open (e.g., hi, baby, moment) and closed (e.g., bag, sunshine, chop) syllables and consonant -le (e.g., purple, circle, stumble). d. Decode words with common prefixes and suffixes. e. Decode words with silent letter combinations (e.g., knight, comb, island, ghost). **Clarifications:** *Clarification 1:* Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2:* Students will decode decodable high frequency words appropriate to the grade level. See 2.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity.
ELA.2.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Dolch and Fry word lists. *Clarification 2:* Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 2.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 4:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.2.R.1.1:	Identify plot structure and describe main story elements in a literary text. **Clarifications:** *Clarification 1:* Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2:* For setting, students will describe where and when the events of the story are happening. The time element of setting will be addressed even when not explicitly indicated in the text. *Clarification 3:* For character, student's will describe characters' traits, feelings, and behaviors.
ELA.2.R.1.2:	Identify and explain a theme of a literary text.
ELA.2.R.1.3:	Identify different characters' perspectives in a literary text. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.
ELA.2.R.2.1:	Explain how text features—including titles, headings, captions, graphs, maps, glossaries, and/or illustrations—contribute to the meaning of texts.
ELA.2.R.2.2:	Identify the central idea and relevant details in a text.
ELA.2.R.2.3:	Explain an author's purpose in an informational text.
ELA.2.R.2.4:	Explain an author's opinion(s) and supporting evidence.
ELA.2.R.3.2:	Retell a text to enhance comprehension. a. Use main story elements in a logical sequence for a literary text. b. Use the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1:* Most grade-level texts are appropriate for this benchmark.
ELA.2.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.2.V.1.2:	Identify and use base words and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Base Words.
	Identify and use context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:**

ELA.2.V.1.3:	*Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships.
ELA.3.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, and clear pronunciation. **Clarifications:** *Clarification 1:* Nonverbal cues appropriate to this grade level are posture, tone, and expressive delivery. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. This grade level introduces an expectation that the information be presented in a logical sequence. A student may self-correct an error in sequence. *Clarification 2:* For further guidance, see the *Elementary Oral Communication Rubric*.
ELA.3.F.1.3:	Use knowledge of grade-level phonics and word-analysis skills to decode words. a. Decode words with common Greek and Latin roots and affixes. (See benchmark 3.V.1.2) b. Decode words with common derivational suffixes and describe how they turn words into different parts of speech. (e.g., -ful, -less, -est). c. Decode multisyllabic words. **Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes. *Clarification 2:* See Affixes and the Parts of Speech They Form.
ELA.3.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.3.R.1.1:	Explain how one or more characters develop throughout the plot in a literary text. **Clarifications:** *Clarification 1:* When explaining character development, students will include character traits, feelings, motivations, and responses to situations.
ELA.3.R.1.2:	Explain a theme and how it develops, using details, in a literary text.
ELA.3.R.1.3:	Explain different characters' perspectives in a literary text. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.
ELA.3.R.2.1:	Explain how text features contribute to meaning and identify the text structures of chronology, comparison, and cause/effect in texts.
ELA.3.R.2.2:	Identify the central idea and explain how relevant details support that idea in a text.
ELA.3.R.2.3:	Explain the development of an author's purpose in an informational text.
ELA.3.R.2.4:	Identify an author's claim and explain how an author uses evidence to support the claim.
ELA.3.R.3.2:	Summarize a text to enhance comprehension. a. Include plot and theme for a literary text. b. Use the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1:* Most grade-level texts are appropriate for this benchmark.
ELA.3.R.3.3:	Compare and contrast how two authors present information on the same topic or theme.
ELA.3.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.3.V.1.2:	Identify and apply knowledge of common Greek and Latin roots, base words, and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes.
ELA.3.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2:* See Context Clues and Word Relationships. *Clarification 3:* See ELA.3.R.3.1 and Elementary Figurative Language.
ELA.4.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, and clear pronunciation. **Clarifications:** *Clarification 1*: Nonverbal cues appropriate to this grade level are posture, tone, expressive delivery, focus on the audience, and facial expression. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation.

	Clarification 2: For further guidance, see the Elementary Oral Communication Rubric.
ELA.4.F.1.3:	Use knowledge of grade-level phonics and word-analysis skills to decode words. a. Apply knowledge of all letter-sound correspondences, syllabication patterns, and morphology to read and write unfamiliar single-syllable and multisyllabic words in and out of context. **Clarifications:** *Clarification 1*: At this level of reading, a student who is decoding at the phoneme level (i.e., "e-n-t-er-t-ai-n") may decode a given text but will struggle with fluency and comprehension. As such, phonics instruction should move toward decoding at the syllabication and morpheme level. For example, when a 4th-grader encounters the word "entertain" in text, we want him or her to segment by syllable (i.e., "en-ter-tain") or by morphological structure (i.e., "enter-tain").
ELA.4.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.4.R.1.1:	Explain how setting, events, conflict, and character development contribute to the plot in a literary text.
ELA.4.R.1.2:	Explain a stated or implied theme and how it develops, using details, in a literary text. **Clarifications:** *Clarification 1*: An explanation of how the theme develops should include how characters respond to situations and how the speaker reflects upon a topic in a literary text.
ELA.4.R.1.3:	Identify the narrator's point of view and explain the difference between a narrator's point of view and character perspective in a literary text. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.
ELA.4.R.1.4:	Explain how rhyme and structure create meaning in a poem.
ELA.4.R.2.1:	Explain how text features contribute to the meaning and identify the text structures of problem/solution, sequence, and description in texts.
ELA.4.R.2.2:	Explain how relevant details support the central idea, implied or explicit.
ELA.4.R.2.3:	Explain an author's perspective toward a topic in an informational text. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.4.R.2.4:	Explain an author's claim and the reasons and evidence used to support the claim.
ELA.4.R.3.1:	Explain how figurative language contributes to meaning in text(s). **Clarifications:** *Clarification 1*: Figurative language for the purposes of this benchmark refers to metaphor, simile, alliteration, personification, hyperbole, and idiom. Other examples can be used in instruction. *Clarification 2*: See Elementary Figurative Language.
ELA.4.R.3.2:	Summarize a text to enhance comprehension. a. Include plot and theme for a literary text. b. Include the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.4.R.3.3:	Compare and contrast accounts of the same event using primary and/or secondary sources. **Clarifications:** *Clarification 1*: Introduce the terms "primary sources" and "secondary sources."
ELA.4.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.4.V.1.2:	Apply knowledge of common Greek and Latin roots, base words, and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 3-5 and Affixes.
ELA.4.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.4.R.3.1 and Elementary Figurative Language.
	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words.

ELA.5.F.1.3:	a. Apply knowledge of all letter-sound correspondences, syllabication patterns, and morphology to read and write unfamiliar single-syllable and multisyllabic words in and out of context.
ELA.5.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.
ELA.5.R.1.1:	Analyze how setting, events, conflict, and characterization contribute to the plot in a literary text.
ELA.5.R.1.2:	Explain the development of stated or implied theme(s) throughout a literary text. **Clarifications:** *Clarification 1*: Where the development of multiple themes is being explained, the themes may come from the same or multiple literary texts.
ELA.5.R.1.3:	Describe how an author develops a character's perspective in a literary text. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.5.R.1.4:	Explain how figurative language and other poetic elements work together in a poem. **Clarifications:** *Clarification 1*: Figurative language for the purposes of this benchmark refers to metaphor, simile, alliteration, personification, hyperbole, imagery, and idiom. Other examples can be used in instruction. Clarification 2: Poetic elements to be used for the purposes of this benchmark are form, rhyme, meter, line breaks, and imagery.
ELA.5.R.2.1:	Explain how text structures and/or features contribute to the overall meaning of texts. **Clarifications:** *Clarification 1*: For more information, see Text Structures and Text Features.
ELA.5.R.2.2:	Explain how relevant details support the central idea(s), implied or explicit.
ELA.5.R.2.3:	Analyze an author's purpose and/or perspective in an informational text. **Clarifications:** *Clarification 1*: The term perspective means "a particular attitude toward or way of regarding something."
ELA.5.R.2.4:	Track the development of an argument, identifying the specific claim(s), evidence, and reasoning. **Clarifications:** *Clarification 1*: A claim is a statement that asserts something is true. A claim can either be fact or opinion. Claims can be used alone or with other claims to form a larger argument.
ELA.5.R.3.1:	Analyze how figurative language contributes to meaning in text(s).
ELA.5.R.3.2:	Summarize a text to enhance comprehension. a. Include plot and theme for a literary text. b. Include the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark.
ELA.5.R.3.3:	Compare and contrast primary and secondary sources related to the same topic.
ELA.5.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction.
ELA.5.V.1.2:	Apply knowledge of Greek and Latin roots and affixes, recognizing the connection between affixes and parts of speech, to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 3-5, Affixes, and Parts of Speech.
ELA.5.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.5.R.3.1 and Elementary Figurative Language.
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly

	quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course supports students who are struggling to read and write or speak about what they have read in core instruction. Instruction will use explicit, systematic, and sequential approaches to reading instruction addressing all components of reading including phonological awareness, phonics, vocabulary, fluency, and reading comprehension.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective instruction matches instruction to the need of the students in the group and provides multiple opportunities to practice the skill and receive feedback. The additional time allotted is in addition to core instruction. The intervention includes materials and strategies designed to supplement core instruction.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

GENERAL INFORMATION

Course Number: 5010024

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** English/Language Arts > **SubSubject:** General >

Abbreviated Title: BAS SKLS READ 3-5

Course Length: Multiple (M) - Course length can vary

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
Primary Education (K-3)
Reading (Elementary and Secondary Grades K-12)

Functional Reading Skills 3-5 (#5010026) 2021 - And Beyond (current)

Course Standards

Name	Description
ELA.1.F.1.1:	Locate the title, table of contents, names of author(s) and illustrator(s), and glossary of books. **Standard Relation to Course: Major**
ELA.1.F.1.2:	Demonstrate phonological awareness. a. Segment spoken words into initial, medial, and final phonemes, including words with digraphs, blends, and trigraphs. b. Orally blend initial, medial, and final phonemes together to produce a single-syllable word that includes digraphs, blends, or trigraphs. c. Blend single-syllable spoken words with at least five phonemes. d. Segment single-syllable spoken words with at least five phonemes. e. Segment and blend phonemes in multi-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.1.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Decode words using knowledge of spelling-sound correspondences for common consonant digraphs, trigraphs, and blends. b. Decode simple words with r-controlled vowels. c. Decode and encode regularly spelled one-syllable words. d. Decode words with inflectional endings. e. Decode two-syllable words with regular patterns by breaking the words into syllables. f. Decode words that use final –e and vowel teams to make long-vowel sound. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See 1.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.1.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. a. Recognize and read with automaticity the grade-level sight words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 1.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with speed. *Clarification 4*: "Appropriate prosody" refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.1.R.1.1:	Identify and describe the main story elements in a story. **Clarifications:** *Clarification 1*: Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2*: In describing the characters, students can describe appearance, actions, feelings, and thoughts of the characters. Students will explain what in the text their description is based on. *Clarification 3*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. **Standard Relation to Course: Major**
ELA.1.R.1.2:	Identify and explain the moral of a story. **Clarifications:** *Clarification 1*: This benchmark introduces the moral of a story as a precursor to theme in 2nd grade. A moral is the lesson of a story. During instruction, let students know that not all stories have a lesson by referring to stories read that did not have a moral or a lesson. **Standard Relation to Course: Major**
ELA.1.R.1.3:	Explain who is telling the story using context clues. **Clarifications:** *Clarification 1*: Students will use the term "narrator" to refer to the speaker telling the story. Students will determine if the narrator is a character in the story or a speaker outside of the story. Students will give reasons why they know who is speaking.

	Standard Relation to Course: Major
ELA.1.R.2.2:	Identify the topic of and relevant details in a text. **Standard Relation to Course: Major**
ELA.1.R.3.1:	Identify and explain descriptive words and phrases in text(s). **Clarifications:** *Clarification 1*: Continue to expose students to the academic vocabulary word "adjective." Discussion should focus on how the descriptive words add meaning to the text. **Standard Relation to Course: Major**
ELA.1.R.3.2:	Retell a text in oral or written form to enhance comprehension. a. Use main story elements at the beginning, middle, and end for a literary text. b. Use topic and important details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.1.R.3.3:	Compare and contrast two texts on the same topic. **Clarifications:** *Clarification 1*: Students are being asked to compare and contrast. During instruction, give students opportunities to see visual representations of similarities and differences using tools such as Venn diagrams or T-charts. **Standard Relation to Course: Major**
ELA.1.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.1.V.1.2:	Identify and use frequently occurring base words and their common inflections in grade-level content. **Clarifications:** *Clarification 1*: See Base Words for frequently occurring base words. *Clarification 2*: Inflectional endings, the inflections referred to here, are added to the end of a word to add additional information. *Example*: Regular verbs add the inflectional ending -ed to indicate the past tense. **Standard Relation to Course: Major**
ELA.1.V.1.3:	Identify and use picture clues, context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.2.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words. a. Decode words with variable vowel teams (e.g., oo, ea, ou) and vowel diphthongs (e.g., oi, oy, ow). b. Decode regularly spelled two-syllable words with long and short vowels. c. Decode words with open (e.g., hi, baby, moment) and closed (e.g., bag, sunshine, chop) syllables and consonant -le (e.g., purple, circle, stumble). d. Decode words with common prefixes and suffixes. e. Decode words with silent letter combinations (e.g., knight, comb, island, ghost). **Clarifications:** *Clarification 1:* Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2:* Students will decode decodable high frequency words appropriate to the grade level. See 2.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.2.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Dolch and Fry word lists. *Clarification 2:* Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 2.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 4:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**

ELA.2.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.2.V.1.2:	Identify and use base words and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Base Words. **Standard Relation to Course: Major**
ELA.2.V.1.3:	Identify and use context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.3.F.1.3:	Use knowledge of grade-level phonics and word-analysis skills to decode words. a. Decode words with common Greek and Latin roots and affixes. (See benchmark 3.V.1.2) b. Decode words with common derivational suffixes and describe how they turn words into different parts of speech. (e.g., -ful, -less, -est). c. Decode multisyllabic words. **Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes. *Clarification 2:* See Affixes and the Parts of Speech They Form. **Standard Relation to Course: Major**
ELA.3.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.3.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.3.V.1.2:	Identify and apply knowledge of common Greek and Latin roots, base words, and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes. **Standard Relation to Course: Major**
ELA.3.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2:* See Context Clues and Word Relationships. *Clarification 3:* See ELA.3.R.3.1 and Elementary Figurative Language. **Standard Relation to Course: Major**
ELA.4.F.1.3:	Use knowledge of grade-level phonics and word-analysis skills to decode words. a. Apply knowledge of all letter-sound correspondences, syllabication patterns, and morphology to read and write unfamiliar single-syllable and multisyllabic words in and out of context. **Clarifications:** *Clarification 1*: At this level of reading, a student who is decoding at the phoneme level (i.e., "e-n-t-er-t-ai-n") may decode a given text but will struggle with fluency and comprehension. As such, phonics instruction should move toward decoding at the syllabication and morpheme level. For example, when a 4th-grader encounters the word "entertain" in text, we want him or her to segment by syllable (i.e., "en-ter-tain") or by morphological structure (i.e., "enter-tain"). **Standard Relation to Course: Major**
	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate.

ELA.4.F.1.4:	*Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.4.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.4.V.1.2:	Apply knowledge of common Greek and Latin roots, base words, and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 3-5 and Affixes. **Standard Relation to Course: Major**
ELA.4.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.4.R.3.1 and Elementary Figurative Language. **Standard Relation to Course: Major**
ELA.5.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words. a. Apply knowledge of all letter-sound correspondences, syllabication patterns, and morphology to read and write unfamiliar single-syllable and multisyllabic words in and out of context. **Standard Relation to Course: Major**
ELA.5.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2*: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.5.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.5.V.1.2:	Apply knowledge of Greek and Latin roots and affixes, recognizing the connection between affixes and parts of speech, to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1*: See Common Greek and Latin Roots 3-5, Affixes, and Parts of Speech. **Standard Relation to Course: Major**
ELA.5.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. *Clarification 3*: See ELA.5.R.3.1 and Elementary Figurative Language. **Standard Relation to Course: Major**
ELA.K.F.1.2:	Demonstrate phonological awareness. a. Blend and segment syllables in spoken words. b. Identify and produce alliterative and rhyming words. c. Blend and segment onset and rimes of single-syllable words. d. Identify the initial, medial, and final sound of spoken words. e. Add or delete phonemes at the beginning or end of a spoken word and say the resulting word. f. Segment and blend phonemes in single-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at the syllable, onset-rime, and phoneme levels. It does not involve

	print or letter knowledge. **Standard Relation to Course: Major**
ELA.K.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Demonstrate knowledge of the most frequent sound for each consonant. b. Demonstrate knowledge of the short and long sounds for the five major vowels. c. Decode consonant-vowel-consonant (CVC) words. d. Encode consonant-vowel-consonant (CVC) words. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See K.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.F.1.4:	Recognize and read with automaticity grade-level high frequency words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See K.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.R.1.1:	Describe the main character(s), setting, and important events in a story. **Clarifications:** *Clarification 1*: In describing the main character, students can describe appearance, actions, feelings, and thoughts of the character. Students will explain what in the text their description is based on. *Clarification 2*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. *Clarification 3*: Descriptions can be oral, either in response to a question or through discussion. **Standard Relation to Course: Major**
ELA.K.R.2.1:	Use titles, headings, and illustrations to predict and confirm the topic of texts. **Clarifications:** *Clarification 1*: The step of confirming the prediction is essential to mastery of this benchmark. **Standard Relation to Course: Major**
ELA.K.R.2.2:	Identify the topic of and multiple details in a text. **Clarifications:** *Clarification 1*: The topic is the general subject of the text, a word or a short phrase describing what the text is about. For example, the main topic of the book Why Should I Recycle? is recycling. **Standard Relation to Course: Major**
ELA.K.R.3.1:	Identify and explain descriptive words in text(s). **Clarifications:** *Clarification 1*: Students will explain examples of descriptive words in text and how they add meaning. *Clarification 2*: Students will be introduced to the academic vocabulary word "adjective." However, students are not expected to use the word independently. Discussion should focus on how the descriptive words add meaning to the text. **Standard Relation to Course: Major**
ELA.K.R.3.2:	Retell a text orally to enhance comprehension: a. Use main character(s), setting, and important events for a story. b. Use topic and details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.K.R.3.3:	Compare and contrast characters' experiences in stories. **Clarifications:** *Clarification 1*: Students will orally compare and contrast the experiences that characters have had, comparing them to those experienced by other characters, in the same story or a different story. Those experiences can be expressed as events, feelings, or behaviors. **Standard Relation to Course: Major**
ELA.K.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.K.V.1.2:	Ask and answer questions about unfamiliar words in grade-level content. **Standard Relation to Course: Major**
ELA.K.V.1.3:	Identify and sort common words into basic categories, relating vocabulary to background knowledge. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level.

	Clarification 2: See Context Clues and Word Relationships.
	Standard Relation to Course: Major
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
	Standard Relation to Course: Supporting
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric.
	Standard Relation to Course: Supporting
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for students with a substantial deficiency in reading and for whom interventions have not been effective. Instruction will use explicit, systematic, and sequential approaches to reading instruction addressing all components of reading including phonological awareness, phonics, vocabulary, fluency, and reading comprehension.

Teachers will use the listed standards that correspond to student need based on diagnostic assessments and adjust according to ongoing progress monitoring data.

Effective implementation requires the support to be matched to student need and is provided by the most experienced, and/or specialized expert. Instruction is individualized and targeted to the skills that pose the greatest barrier to learning and is characterized by the greatest number of minutes of instruction with the narrowest focus for an individual or a very small group of students. Individualized diagnostic data, as well as instructional time, are in addition to those provided in Basic Skills in Reading 3-5 and core instruction. Formative assessments occur more frequently and focus on the learning barriers to success and are based on intensity of needs. The larger the gap, the more frequent the progress monitoring, with more extensive opportunities for guided practice, error correction, and feedback. The expected outcome is for the student to achieve grade-level proficiency.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and

concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Interventions must be evidence-based and correspond to either the district K-12 Evidence-based Comprehensive Reading plan or the reading plan within a school's charter.

Primary Education (K-3)

Language Arts - Kindergarten (#5010041) 2021 - And Beyond

Course Standards

Name	Description
ELA.K.C.1.1:	Print many upper- and lowercase letters. **Clarifications:** *Clarification 1*: Students should attend to spacing between letters. *Clarification 2*: Of the many letters students need to be able to print, all vowels must be included. For example, a student who can print 22 letters, both upper- and lowercase, but not "a" or "A" has not mastered the benchmark. **Standard Relation to Course: Major**
ELA.K.C.1.2:	Using a combination of drawing, dictating, and/or writing, create narratives with the events in chronological order. **Clarifications:** *Clarification 1*: The product can be written, drawn, dictated, or a combination of all. *Clarification 2*: See Writing Types. **Standard Relation to Course: Major**
ELA.K.C.1.3:	Using a combination of drawing, dictating, and/or writing, express opinions about a topic or text with at least one supporting reason. **Clarifications:** *Clarification 1*: The product can be written, oral, drawn, dictated, or a combination of all. *Clarification 2*: See Writing Types. **Standard Relation to Course: Major**
ELA.K.C.1.4:	Using a combination of drawing, dictating, and/or writing, provide factual information about a topic. **Clarifications:** *Clarification 1*: The product can be written, drawn, dictated, or a combination of all. *Clarification 2*: Some opinion can be added to the information, but it should mostly be factual. It is important that students understand the difference between writing to explain and writing to express an opinion. *Clarification 3*: See Writing Types. **Standard Relation to Course: Major**
ELA.K.C.1.5:	With guidance and support from adults, improve drawing and writing, as needed, by planning, revising, and editing. **Clarifications:** *Clarification 1*: "As needed" refers to the fact that sometimes instruction will focus on a specific skill or part of the process. For example, a lesson may focus on planning. In those instances, only the planning step would be focused on. By the end of the year, students should have ample opportunities to engage in planning, revising, and editing. **Standard Relation to Course: Major**
ELA.K.C.2.1:	Present information orally using complete sentences. **Clarifications:** *Clarification 1*: For further guidance, see the Elementary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.K.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Capitalize proper nouns. • Form and use simple verb tenses for regular verbs by adding the affix -ed. • Form and use complete simple sentences. • Use possessives. • Use subject-verb agreement in simple sentences. Skills to be implemented but not yet mastered are as follows: • Form plurals -y to -ies. • Conjugate regular and irregular verb tenses. • Form and use regular and frequently occurring irregular plural nouns. • Form and use the past tense of frequently occurring irregular verbs. • Use apostrophes to form contractions. • Appropriately use pronouns. • Use commas in a series. • Use plural possessives. • Use interjections. *Clarification 2*: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.K.C.4.1:	Recall information to answer a question about a single topic. **Standard Relation to Course: Major**
	Use a multimedia element to enhance oral or written tasks.

ELA.K.C.5.1:	**Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, a drawing, picture, artifact, audio or digital representation. At this grade level, the element should relate to the task. As long as the student is able to explain how the picture relates, the multimedia element is suitable. The element may be shared at the beginning or added on to the end instead of shared during the course of the task. There is no expectation that the element be integrated into the task. **Standard Relation to Course: Major**
ELA.K.F.1.1:	Demonstrate knowledge of the basic concepts of print. a. Locate a printed word on a page. b. Distinguish letters from words within sentences. c. Match print to speech to demonstrate that language is represented by print. d. Identify parts of a book (front cover, back cover, title page). e. Move top to bottom and left to right on the printed page; returning to the beginning of the next line. f. Identify all upper- and lowercase letters of the alphabet. g. Recognize that print conveys specific meaning and pictures may support meaning. **Clarifications:** *Clarification 1*: Matching print to speech involves making a one-to-one correspondence between a spoken word and the print on the page. This can be accomplished by having the child point to each word in a sentence as it is read by an adult. **Standard Relation to Course: Major**
ELA.K.F.1.2:	Demonstrate phonological awareness. a. Blend and segment syllables in spoken words. b. Identify and produce alliterative and rhyming words. c. Blend and segment onset and rimes of single-syllable words. d. Identify the initial, medial, and final sound of spoken words. e. Add or delete phonemes at the beginning or end of a spoken word and say the resulting word. f. Segment and blend phonemes in single-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at the syllable, onset-rime, and phoneme levels. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.K.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Demonstrate knowledge of the most frequent sound for each consonant. b. Demonstrate knowledge of the short and long sounds for the five major vowels. c. Decode consonant-vowel-consonant (CVC) words. d. Encode consonant-vowel-consonant (CVC) words. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See K.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.F.1.4:	Recognize and read with automaticity grade-level high frequency words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See K.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.K.R.1.1:	Describe the main character(s), setting, and important events in a story. **Clarifications:** *Clarification 1*: In describing the main character, students can describe appearance, actions, feelings, and thoughts of the character. Students will explain what in the text their description is based on. *Clarification 2*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. *Clarification 3*: Descriptions can be oral, either in response to a question or through discussion. **Standard Relation to Course: Major**
ELA.K.R.1.3:	Explain the roles of author and illustrator of a story. **Clarifications:** *Clarification 1*: Students will explain that the author writes the words and the illustrator creates the pictures, recognizing that sometimes one person does both jobs, as in Dr. Seuss' Hop on Pop where Dr. Seuss performs both roles. *Clarification 2*: Students should also explain that both authors and illustrators contribute to the meaning of the text. **Standard Relation to Course: Major**
ELA.K.R.1.4:	Identify rhyme in a poem. **Clarifications:** *Clarification 1*: This benchmark builds on the skills from the phonological awareness benchmark ELA.K.F.1.2(a): Identify and produce alliterative and rhyming words. The expectation is that students identify rhyming words in a poem that is read aloud. *Clarification 2*: Students will also note where the rhyme is coming, e.g., at the end of a line.

	Standard Relation to Course: Major
ELA.K.R.2.1:	Use titles, headings, and illustrations to predict and confirm the topic of texts. **Clarifications:** *Clarification 1*: The step of confirming the prediction is essential to mastery of this benchmark. **Standard Relation to Course: Major**
ELA.K.R.2.2:	Identify the topic of and multiple details in a text. **Clarifications:** *Clarification 1*: The topic is the general subject of the text, a word or a short phrase describing what the text is about. For example, the main topic of the book Why Should I Recycle? is recycling. **Standard Relation to Course: Major**
ELA.K.R.2.4:	Explain the difference between opinions and facts about a topic. **Clarifications:** *Clarification 1*: Students will explain which statements are fact and which are opinion within a text. *Clarification 2*: Students will orally explain that facts are things that a person knows about something and that can be proven true or false. Students will orally explain that opinions are what a person thinks about something, often related to feelings or beliefs. Opinions cannot be proven true or false. *Example*: "Dogs need food and water to survive" is a fact. It can be proven to be true. "Dogs are the best pets" is an opinion. It's what someone may think, but it can't be proven. **Standard Relation to Course: Major**
ELA.K.R.3.1:	Identify and explain descriptive words in text(s). **Clarifications:** *Clarification 1*: Students will explain examples of descriptive words in text and how they add meaning. *Clarification 2*: Students will be introduced to the academic vocabulary word "adjective." However, students are not expected to use the word independently. Discussion should focus on how the descriptive words add meaning to the text. **Standard Relation to Course: Major**
ELA.K.R.3.2:	Retell a text orally to enhance comprehension: a. Use main character(s), setting, and important events for a story. b. Use topic and details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.K.R.3.3:	Compare and contrast characters' experiences in stories. **Clarifications:** *Clarification 1*: Students will orally compare and contrast the experiences that characters have had, comparing them to those experienced by other characters, in the same story or a different story. Those experiences can be expressed as events, feelings, or behaviors. **Standard Relation to Course: Major**
ELA.K.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.K.V.1.2:	Ask and answer questions about unfamiliar words in grade-level content. **Standard Relation to Course: Major**
ELA.K.V.1.3:	Identify and sort common words into basic categories, relating vocabulary to background knowledge. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
	Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:	**Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of kindergarten. The standards emphasize explicit, systematic phonics instruction as the foundation of literacy. Decoding and fluency are essential to creating proficient readers. Knowledge acquisition should be the primary purpose of any reading approach as systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Build background knowledge in K-5 with a balance of approximately 50% informational texts and 50% literary texts

Approximately one-third of the titles from the Kindergarten Sample Book List should be used in instruction.

Language Arts - Grade One (#5010042) 2021 - And Beyond

Course Standards

Name	Description
ELA.1.C.1.1:	Print all upper- and lowercase letters. **Clarifications:** *Clarification 1*: Students should have adequate spacing between letters and/or words. **Standard Relation to Course: Major**
ELA.1.C.1.2:	Write narratives that retell two or more appropriately sequenced events, including relevant details and a sense of closure. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.1.C.1.3:	Write opinions about a topic or text with at least one supporting reason from a source and a sense of closure. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.1.C.1.4:	Write expository texts about a topic, using a source, providing facts and a sense of closure. **Clarifications:** *Clarification 1*: See Writing Types. **Standard Relation to Course: Major**
ELA.1.C.1.5:	With guidance and support from adults, improve writing, as needed, by planning, revising, and editing. **Clarifications:** *Clarification 1*: As needed refers to the fact that sometimes instruction will focus on a specific skill or part of the process. In those instances, only the applicable activity will be engaged in. **Standard Relation to Course: Major**
ELA.1.C.2.1:	Present information orally using complete sentences and appropriate volume. **Clarifications:** *Clarification 1*: For further guidance, see the Elementary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.1.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1*: Skills to be mastered at this grade level are as follows: • Capitalize proper nouns. • Form and use simple verb tenses for regular verbs by adding the affix -ed. • Form and use complete simple sentences. • Use possessives. • Use subject-verb agreement in simple sentences. Skills to be implemented but not yet mastered are as follows: • Form plurals -y to -ies. • Conjugate regular and irregular verb tenses. • Form and use regular and frequently occurring irregular plural nouns. • Form and use the past tense of frequently occurring irregular verbs. • Use apostrophes to form contractions. • Appropriately use pronouns. • Use commas in a series. • Use plural possessives. • Use interjections. Clarification 2: See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.1.C.4.1:	Participate in research to gather information to answer a question about a single topic. **Clarifications:** *Clarification 1*: The question could ask for an explanation or could ask how to do something, where the appropriate response could be to give a sequence of steps or instructions. **Standard Relation to Course: Major**
ELA.1.C.5.1:	Use a multimedia element to enhance oral or written tasks. **Clarifications:** *Clarification 1*: Multimedia elements may include, but are not limited to, a drawing, picture, artifact, audio or digital representation. At this grade level, the element should relate to the task. As long as the student is able to explain how the picture relates, the multimedia element is suitable. The element may be shared at the beginning or added on to the end instead of shared during the course of the task. There is no expectation that the element be integrated into the task. **Standard Relation to Course: Major**

ELA.1.C.5.2:	Identify and use digital tools to produce and publish writing individually or with peers and with support from adults. **Standard Relation to Course: Major**
ELA.1.F.1.1:	Locate the title, table of contents, names of author(s) and illustrator(s), and glossary of books. **Standard Relation to Course: Major**
ELA.1.F.1.2:	Demonstrate phonological awareness. a. Segment spoken words into initial, medial, and final phonemes, including words with digraphs, blends, and trigraphs. b. Orally blend initial, medial, and final phonemes together to produce a single-syllable word that includes digraphs, blends, or trigraphs. c. Blend single-syllable spoken words with at least five phonemes. d. Segment single-syllable spoken words with at least five phonemes. e. Segment and blend phonemes in multi-syllable spoken words. **Clarifications:** *Clarification 1*: Phonological awareness only refers to what can be done orally at both the sound and syllabic level. This includes isolating sounds, blending sounds, and orally segmenting words based on syllables. It does not involve print or letter knowledge. **Standard Relation to Course: Major**
ELA.1.F.1.3:	Use knowledge of grade-appropriate phonics and word-analysis skills to decode words accurately. a. Decode words using knowledge of spelling-sound correspondences for common consonant digraphs, trigraphs, and blends. b. Decode simple words with r-controlled vowels. c. Decode and encode regularly spelled one-syllable words. d. Decode words with inflectional endings. e. Decode two-syllable words with regular patterns by breaking the words into syllables. f. Decode words that use final –e and vowel teams to make long-vowel sound. **Clarifications:** *Clarification 1*: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds). *Clarification 2*: Students will decode decodable high frequency words appropriate to the grade level. See 1.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. **Standard Relation to Course: Major**
ELA.1.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. a. Recognize and read with automaticity the grade-level sight words. **Clarifications:** *Clarification 1*: See Dolch and Fry word lists. *Clarification 2*: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 1.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity. *Clarification 3*: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with speed. *Clarification 4*: "Appropriate prosody" refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 5*: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.1.R.1.1:	Identify and describe the main story elements in a story. **Clarifications:** *Clarification 1*: Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story. *Clarification 2*: In describing the characters, students can describe appearance, actions, feelings, and thoughts of the characters. Students will explain what in the text their description is based on. *Clarification 3*: For setting, students will discuss where the events of the story are happening. The time element of setting should only be addressed in texts where it is explicitly indicated. **Standard Relation to Course: Major**
ELA.1.R.1.2:	Identify and explain the moral of a story. **Clarifications:** *Clarification 1*: This benchmark introduces the moral of a story as a precursor to theme in 2nd grade. A moral is the lesson of a story. During instruction, let students know that not all stories have a lesson by referring to stories read that did not have a moral or a lesson. **Standard Relation to Course: Major**
ELA.1.R.1.3:	Explain who is telling the story using context clues. **Clarifications:** *Clarification 1*: Students will use the term "narrator" to refer to the speaker telling the story. Students will determine if the narrator is a character in the story or a speaker outside of the story. Students will give reasons why they know who is speaking. **Standard Relation to Course: Major**
ELA.1.R.1.4:	Identify stanzas and line breaks in poems. **Clarifications:** *Clarification 1*: This benchmark can be paired with R.1.1, R.1.2, R.1.3, and R.3.2 for instruction with story poems. **Standard Relation to Course: Major**
ELA.1.R.2.1:	Use text features including titles, headings, captions, graphs, maps, glossaries, and/or illustrations to demonstrate understanding of texts. **Standard Relation to Course: Major**

ELA.1.R.2.2:	Identify the topic of and relevant details in a text. **Standard Relation to Course: Major**
ELA.1.R.2.3:	Explain similarities and differences between information provided in visuals and words in an informational text. **Clarifications:** *Clarification 1*: When explaining similarities and differences, students will also explain how the visuals and words help the reader make sense of the topic. *Clarification 2*: During instruction, give students opportunities to see visual representations of similarities and differences using tools such as Venn diagrams or T-charts. **Standard Relation to Course: Major**
ELA.1.R.2.4:	Identify an author's opinion(s) about the topic. **Standard Relation to Course: Major**
ELA.1.R.3.1:	Identify and explain descriptive words and phrases in text(s). **Clarifications:** *Clarification 1*: Continue to expose students to the academic vocabulary word "adjective." Discussion should focus on how the descriptive words add meaning to the text. **Standard Relation to Course: Major**
ELA.1.R.3.2:	Retell a text in oral or written form to enhance comprehension. a. Use main story elements at the beginning, middle, and end for a literary text. b. Use topic and important details for an informational text. **Clarifications:** *Clarification 1*: Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.1.R.3.3:	Compare and contrast two texts on the same topic. **Clarifications:** *Clarification 1*: Students are being asked to compare and contrast. During instruction, give students opportunities to see visual representations of similarities and differences using tools such as Venn diagrams or T-charts. **Standard Relation to Course: Major**
ELA.1.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1*: Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, are vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.1.V.1.2:	Identify and use frequently occurring base words and their common inflections in grade-level content. **Clarifications:** *Clarification 1*: See Base Words for frequently occurring base words. *Clarification 2*: Inflectional endings, the inflections referred to here, are added to the end of a word to add additional information. *Example*: Regular verbs add the inflectional ending -ed to indicate the past tense. **Standard Relation to Course: Major**
ELA.1.V.1.3:	Identify and use picture clues, context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1*: Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
	Make inferences to support comprehension. **Clarifications:**

ELA.K12.EE.3.1:	Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 1st grade. The standards emphasize explicit, systematic phonics instruction as the foundation of literacy. Decoding and fluency are essential to creating proficient readers. Knowledge acquisition should be the primary purpose of any reading approach as systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf

VERSION REQUIREMENTS

Build background knowledge in K-5 with a balance of approximately 50% informational texts and 50% literary texts

Approximately one-third of the titles from the 1st Grade Sample Book List should be used in instruction.

GENERAL INFORMATION

Course Number: 5010042

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Educator Certifications

Elementary Education (Elementary Grades 1-6)
Primary Education (K-3)
Prekindergarten/Primary Education (Age 3 through Grade 3)
Elementary Education (Grades K-6)

Language Arts - Grade Two (#5010043) 2021 - And Beyond

Course Standards

Name	Description
ELA.2.C.1.1:	Demonstrate legible printing skills. **Standard Relation to Course: Major**
ELA.2.C.1.2:	Write personal or fictional narratives using a logical sequence of events, transitions, and an ending. **Clarifications:** Clarification 1: See Writing Types. **Standard Relation to Course: Major**
ELA.2.C.1.3:	Write opinions about a topic or text with reasons supported by details from a source, use transitions, and provide a conclusion. **Clarifications:** *Clarification 1:* See Writing Types. **Standard Relation to Course: Major**
ELA.2.C.1.4:	Write expository texts about a topic, using a source, providing an introduction, facts, transitions, and a conclusion. **Clarifications:** *Clarification 1:* See Writing Types. **Standard Relation to Course: Major**
ELA.2.C.1.5:	Improve writing as needed by planning, revising, and editing with guidance and support from adults and feedback from peers. **Clarifications:** *Clarification 1:* "As needed" refers to the fact that sometimes instruction will focus on a specific skill or part of the process. In those instances, only the applicable activity will be engaged in. **Standard Relation to Course: Major**
ELA.2.C.2.1:	Present information orally using complete sentences, appropriate volume, and clear pronunciation. **Clarifications:** *Clarification 1:* Clear pronunciation shows an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. *Clarification 2:* For further guidance, see the Elementary Oral Communication Rubric. **Standard Relation to Course: Major**
ELA.2.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1:* Skills to be mastered at this grade level are as follows: • Form plurals -y to -ies. • Use apostrophes to form contractions. • Appropriately use pronouns. • Use commas in a series. • Use plural possessives. • Use interjections. Skills to be implemented but not yet mastered are as follows: • Conjugate regular and irregular verb tenses. • Form and use regular and frequently occurring irregular plural nouns. • Form and use the past tense of frequently occurring irregular verbs. • Maintain consistent verb tense across paragraphs. • Form and use irregular plural nouns. • Form and use the progressive and perfect verb tenses. • Use simple modifiers. • Use prepositions and prepositional phrases. • Form and use compound sentences. • Use quotation marks with dialogue and direct quotations. • Use commas to indicate direct address. • Use subject-verb agreement with intervening clauses and phrases. • Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons. *Clarification 2:* See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.2.C.4.1:	Participate in research to gather information to answer a question about a single topic using multiple sources. **Standard Relation to Course: Major**
ELA.2.C.5.1:	Use one or more multimedia element(s) to enhance oral or written tasks. **Clarifications:** *Clarification 1:* Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, the element(s) should relate directly to the task. There is no expectation that the element(s) be integrated into the task. The student can but is not required to use more than one multimedia element.

Standard Relation to Course: Major

ELA.2.C.5.2:
Use digital tools to produce and publish writing individually or with peers and with support from adults.
Standard Relation to Course: Major

ELA.2.F.1.3:
Use knowledge of grade-appropriate phonics and word-analysis skills to decode words.

a. Decode words with variable vowel teams (e.g., oo, ea, ou) and vowel diphthongs (e.g., oi, oy, ow).
b. Decode regularly spelled two-syllable words with long and short vowels.
c. Decode words with open (e.g., hi, baby, moment) and closed (e.g., bag, sunshine, chop) syllables and consonant -le (e.g., purple, circle, stumble).
d. Decode words with common prefixes and suffixes.
e. Decode words with silent letter combinations (e.g., knight, comb, island, ghost).

Clarifications:
Clarification 1: Phonics refers to the relationship between graphemes (letters or letter combinations) and phonemes (speech sounds).

Clarification 2: Students will decode decodable high frequency words appropriate to the grade level. See 2.F.1.4 and Dolch and Fry word lists. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity.

Standard Relation to Course: Major

ELA.2.F.1.4:
Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression.

Clarifications:
Clarification 1: See Dolch and Fry word lists.
Clarification 2: Many of the high frequency words at this grade level are either irregularly spelled and therefore not decodable or are temporarily irregular, meaning that students have not yet learned the phonics rule that would enable them to decode the word. Those words that are decodable should be introduced to students using appropriate phonics rules. See 2.F.1.3. Students will read grade-level appropriate high frequency words, decodable or not, with automaticity.
Clarification 3: See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate.
Clarification 4: Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody.
Clarification 5: Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures.

Standard Relation to Course: Major

ELA.2.R.1.1:
Identify plot structure and describe main story elements in a literary text.

Clarifications:
Clarification 1: Main story elements for the purpose of this benchmark are the setting, characters, and sequence of events of a story.
Clarification 2: For setting, students will describe where and when the events of the story are happening. The time element of setting will be addressed even when not explicitly indicated in the text.
Clarification 3: For character, student's will describe characters' traits, feelings, and behaviors.

Standard Relation to Course: Major

ELA.2.R.1.2:
Identify and explain a theme of a literary text.
Standard Relation to Course: Major

ELA.2.R.1.3:
Identify different characters' perspectives in a literary text.

Clarifications:
Clarification 1: The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation.

Standard Relation to Course: Major

ELA.2.R.1.4:
Identify rhyme schemes in poems.

Clarifications:
Clarification 1: Students will mark rhyme scheme and recognize rhyme scheme notation. Rhyme scheme notation uses capital letters, starting with A to mark the end of each line, repeating the letter for each line in the poem that rhymes with that line and progressing through the alphabet for each new end rhyme. Lines designated with the same letter all rhyme with each other.
Examples:

I never saw a Purple Cow, A
I never hope to see one; B
But I can tell you, anyhow, A
I'd rather see than be one B

–Gelett Burgess

Little Miss Muffet A
Sat on a tuffet, A
Eating her curds and whey; B
Along came a spider C
Who sat down beside her C
And frightened Miss Muffet away. B

–Traditional Nursery Rhyme

Standard Relation to Course: Major

ELA.2.R.2.1:
Explain how text features—including titles, headings, captions, graphs, maps, glossaries, and/or illustrations—contribute to the meaning of texts.
Standard Relation to Course: Major

ELA.2.R.2.2:	Identify the central idea and relevant details in a text. **Standard Relation to Course: Major**
ELA.2.R.2.3:	Explain an author's purpose in an informational text. **Standard Relation to Course: Major**
ELA.2.R.2.4:	Explain an author's opinion(s) and supporting evidence. **Standard Relation to Course: Major**
ELA.2.R.3.1:	Identify and explain similes, idioms, and alliteration in text(s). **Standard Relation to Course: Major**
ELA.2.R.3.2:	Retell a text to enhance comprehension. a. Use main story elements in a logical sequence for a literary text. b. Use the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1:* Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.2.R.3.3:	Compare and contrast important details presented by two texts on the same topic or theme. **Clarifications:** *Clarification 1:* For literary texts, students can compare and contrast story elements such as characters, illustrations, and sequence of events. *Clarification 2:* The different versions may be of the same or different formats. **Standard Relation to Course: Major**
ELA.2.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
ELA.2.V.1.2:	Identify and use base words and affixes to determine the meaning of unfamiliar words in grade-level content. **Clarifications:** *Clarification 1:* See Base Words. **Standard Relation to Course: Major**
ELA.2.V.1.3:	Identify and use context clues, word relationships, reference materials, and/or background knowledge to determine the meaning of unknown words. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2*: See Context Clues and Word Relationships. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**

ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Additional**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 2nd grade. The standards emphasize explicit, systematic phonics instruction as the foundation of literacy. Decoding and fluency are essential to creating proficient readers. Knowledge acquisition should be the primary purpose of any reading approach as systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Build background knowledge in K-5 with a balance of approximately 50% informational texts and 50% literary texts

Approximately one-third of the titles from the 2nd Grade Sample Book List should be used in instruction.

Course Standards

Name	Description
ELA.3.C.1.1:	Write in cursive all upper- and lowercase letters. **Standard Relation to Course: Major**
ELA.3.C.1.2:	Write personal or fictional narratives using a logical sequence of events, appropriate descriptions, dialogue, a variety of transitional words or phrases, and an ending. **Clarifications:** *Clarification 1:* See Writing Types. **Standard Relation to Course: Major**
ELA.3.C.1.3:	Write opinions about a topic or text, include reasons supported by details from one or more sources, use transitions, and provide a conclusion. **Clarifications:** *Clarification 1:* See Writing Types. **Standard Relation to Course: Major**
ELA.3.C.1.4:	Write expository texts about a topic, using one or more sources, providing an introduction, facts and details, some elaboration, transitions, and a conclusion. **Clarifications:** *Clarification 1:* See Writing Types and Elaborative Techniques. **Standard Relation to Course: Major**
ELA.3.C.1.5:	Improve writing as needed by planning, revising, and editing with guidance and support from adults and feedback from peers. **Clarifications:** *Clarification 1:* As needed refers to the fact that sometimes instruction will focus on a specific skill or part of the process. In those instances, only the applicable activity will be engaged in. **Standard Relation to Course: Major**
ELA.3.C.2.1:	Present information orally, in a logical sequence, using nonverbal cues, appropriate volume, and clear pronunciation. **Clarifications:** *Clarification 1:* Nonverbal cues appropriate to this grade level are posture, tone, and expressive delivery. Clear pronunciation should be interpreted to mean an understanding and application of phonics rules and sight words as well as care taken in delivery. A student's speech impediment should not be considered as impeding clear pronunciation. This grade level introduces an expectation that the information be presented in a logical sequence. A student may self-correct an error in sequence. *Clarification 2:* For further guidance, see the *Elementary Oral Communication Rubric*. **Standard Relation to Course: Major**
ELA.3.C.3.1:	Follow the rules of standard English grammar, punctuation, capitalization, and spelling appropriate to grade level. **Clarifications:** *Clarification 1:* Skills to be mastered at this grade level are as follows: • Conjugate regular and irregular verb tenses. • Form and use regular and frequently occurring irregular plural nouns. • Form and use the past tense of frequently occurring irregular verbs. • Maintain consistent verb tense across paragraphs. • Form and use irregular plural nouns. • Form and use the progressive and perfect verb tenses. • Use simple modifiers. • Use prepositions and prepositional phrases. • Form and use compound sentences. • Use quotation marks with dialogue and direct quotations. • Use commas to indicate direct address. Skills to be implemented but not yet mastered are as follows: • Use subject-verb agreement with intervening clauses and phrases. • Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons. • Use conjunctions. • Use principal modals to indicate the mood of a verb. • Use appositives, main clauses, and subordinate clauses. *Clarification 2:* See Convention Progression by Grade Level for more information. **Standard Relation to Course: Major**
ELA.3.C.4.1:	Conduct research to answer a question, organizing information about the topic from multiple sources. **Clarifications:** *Clarification 1:* While the benchmark does require that students consult multiple sources, there is no requirement that they use every source they consult. Part of the skill in researching is discernment—being able to tell which information is relevant and which sources are trustworthy enough to include. **Standard Relation to Course: Major**
	Use two or more multimedia elements to enhance oral or written tasks. **Clarifications:**

ELA.3.C.5.1:	*Clarification 1:* Multimedia elements may include, but are not limited to, drawings, pictures, artifacts, and audio or digital representation. At this grade level, the elements should relate directly to the presentation. The elements can reinforce or complement the information being shared. There is no expectation that the elements be fully integrated into the presentation. **Standard Relation to Course: Major**
ELA.3.C.5.2:	Use digital writing tools individually or collaboratively to plan, draft, and revise writing. **Standard Relation to Course: Major**
ELA.3.F.1.3:	Use knowledge of grade-level phonics and word-analysis skills to decode words. a. Decode words with common Greek and Latin roots and affixes. (See benchmark 3.V.1.2) b. Decode words with common derivational suffixes and describe how they turn words into different parts of speech. (e.g., -ful, -less, -est). c. Decode multisyllabic words. **Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes. *Clarification 2:* See Affixes and the Parts of Speech They Form. **Standard Relation to Course: Major**
ELA.3.F.1.4:	Read grade-level texts with accuracy, automaticity, and appropriate prosody or expression. **Clarifications:** *Clarification 1:* See Fluency Norms for grade-level norms. Norms are expressed as words correct per minute (WCPM), a measure that combines accuracy with rate. *Clarification 2:* Appropriate prosody refers to pausing patterns during oral reading that reflect the punctuation and meaning of a text. See Sample Oral Reading Fluency Rubrics for prosody. *Clarification 3:* Grade-level texts, for the purposes of fluency, are those within the grade band on quantitative text complexity measures and appropriate in content and qualitative measures. **Standard Relation to Course: Major**
ELA.3.R.1.1:	Explain how one or more characters develop throughout the plot in a literary text. **Clarifications:** *Clarification 1:* When explaining character development, students will include character traits, feelings, motivations, and responses to situations. **Standard Relation to Course: Major**
ELA.3.R.1.2:	Explain a theme and how it develops, using details, in a literary text. **Standard Relation to Course: Major**
ELA.3.R.1.3:	Explain different characters' perspectives in a literary text. **Clarifications:** *Clarification 1:* The term perspective means "a particular attitude toward or way of regarding something." The term point of view is used when referring to the person of the narrator. This is to prevent confusion and conflation. **Standard Relation to Course: Major**
ELA.3.R.1.4:	Identify types of poems: free verse, rhymed verse, haiku, and limerick. **Clarifications:** *Clarification 1:* For examples of these forms, see Appendix B. **Standard Relation to Course: Major**
ELA.3.R.2.1:	Explain how text features contribute to meaning and identify the text structures of chronology, comparison, and cause/effect in texts. **Standard Relation to Course: Major**
ELA.3.R.2.2:	Identify the central idea and explain how relevant details support that idea in a text. **Standard Relation to Course: Major**
ELA.3.R.2.3:	Explain the development of an author's purpose in an informational text. **Standard Relation to Course: Major**
ELA.3.R.2.4:	Identify an author's claim and explain how an author uses evidence to support the claim. **Standard Relation to Course: Major**
ELA.3.R.3.1:	Identify and explain metaphors, personification, and hyperbole in text(s). **Clarifications:** *Clarification 1:* In addition to the types of figurative language listed in this benchmark, students are still working with types from previous grades such as simile, alliteration, and idiom. Other examples can be used in instruction. *Clarification 2:* See Elementary Figurative Language. **Standard Relation to Course: Major**
ELA.3.R.3.2:	Summarize a text to enhance comprehension. a. Include plot and theme for a literary text. b. Use the central idea and relevant details for an informational text. **Clarifications:** *Clarification 1:* Most grade-level texts are appropriate for this benchmark. **Standard Relation to Course: Major**
ELA.3.R.3.3:	Compare and contrast how two authors present information on the same topic or theme. **Standard Relation to Course: Major**
ELA.3.V.1.1:	Use grade-level academic vocabulary appropriately in speaking and writing. **Clarifications:** *Clarification 1:* Grade-level academic vocabulary consists of words that are likely to appear across subject areas for the current grade level and beyond, vital to comprehension, critical for academic discussions and writing, and usually require explicit instruction. **Standard Relation to Course: Major**
	Identify and apply knowledge of common Greek and Latin roots, base words, and affixes to determine the meaning of unfamiliar words in grade-level content.

ELA.3.V.1.2:	**Clarifications:** *Clarification 1:* See Common Greek and Latin Roots 3-5 and Affixes. **Standard Relation to Course: Major**
ELA.3.V.1.3:	Use context clues, figurative language, word relationships, reference materials, and/or background knowledge to determine the meaning of multiple-meaning and unknown words and phrases, appropriate to grade level. **Clarifications:** *Clarification 1:* Instruction for this benchmark should include text read-alouds and think-alouds aimed at building and activating background knowledge. Review of words learned in this way is critical to building background knowledge and related vocabulary. Texts read aloud can be two grade levels higher than student reading level. *Clarification 2:* See Context Clues and Word Relationships. *Clarification 3:* See ELA.3.R.3.1 and Elementary Figurative Language. **Standard Relation to Course: Major**
ELA.K12.EE.1.1:	Cite evidence to explain and justify reasoning. **Clarifications:** K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ. **Standard Relation to Course: Supporting**
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. **Clarifications:** See Text Complexity for grade-level complexity bands and a text complexity rubric. **Standard Relation to Course: Supporting**
ELA.K12.EE.3.1:	Make inferences to support comprehension. **Clarifications:** Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond. **Standard Relation to Course: Supporting**
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. **Clarifications:** In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence. **Standard Relation to Course: Supporting**
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. **Clarifications:** Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work. **Standard Relation to Course: Supporting**
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. **Clarifications:** In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.LA.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Language Arts. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. **Standard Relation to Course: Supporting**

General Course Information and Notes

VERSION DESCRIPTION

This course defines what students should understand and be able to do by the end of 3rd grade. The standards emphasize explicit, systematic phonics instruction as the foundation of literacy. Decoding and fluency are essential to creating proficient readers. Knowledge acquisition should be the primary purpose of any reading approach as

systematic building of a wide range of knowledge across domains is a prerequisite to higher literacy.

The benchmarks in this course are mastery goals that students are expected to attain by the end of the year. To build mastery, students will continue to review and apply earlier grade-level benchmarks and expectations.

GENERAL NOTES

English Language Arts is not a discrete set of skills, but a rich discipline with meaningful, significant content, the knowledge of which helps all students actively and fully participate in our society.

Standards should not stand alone as a separate focus for instruction, but should be combined purposefully.

The texts students read should be meaningful and thought-provoking, preparing them to be informed, civic-minded members of their community.

Curricular content for all subjects must integrate critical-thinking, problem-solving, and workforce-literacy skills; communication, reading, and writing skills; mathematics skills; collaboration skills; contextual and applied-learning skills; technology-literacy skills; information and media-literacy skills; and civic-engagement skills.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Language Arts. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/la.pdf.

VERSION REQUIREMENTS

Build background knowledge in K-5 with a balance of approximately 50% informational texts and 50% literary texts

Approximately one-third of the titles from the 3rd Grade Sample Book List should be used in instruction.

GENERAL INFORMATION

Course Number: 5010044
